IN UNITED STATES DISTRICT COURT
DISTRICT OF MINNESOTA
FOURTH DIVISION

4-57 Civ. 423

THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY, a Minnesota corporation, Plaintiff,

vs.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, Defendants.

COMPLAINT. Filed November 29, 1957

I.

Plaintiff The Minneapolis & St. Louis Railway Company (hereinafter "Minneapolis") brings this suit to enjoin, annul, suspend and set aside the order of Division 4 of the Interstate Commerce Commission issued on May 31, 1957, and the order of the Interstate Commerce Commission issued on October 30, 1957, served on Minneapolis on November 4, 1957, in proceedings entitled "Finance Docket No. 18201 Toledo, Peoria & Western Railroad Company Control" and "Finance Docket No. 19850 Toledo, Peoria & Western Railroad Company Control". The report of the Interstate Commerce Commission in said proceedings which accompanied the order dated May 31, 1957 and dated the same day, is attached hereto as Exhibit A; the order of May 31, 1957 is attached hereto as Exhibit B; and the order of October 30, 1957 is attached hereto as Exhibit C.

[fol. 2]

II.

Plaintiff Minneapolis is a corporation of the State of Minnesota, is a common carrier by railroad subject to the provisions of Part I of the Interstate Commerce Act (Title 49, United States Code, Sec. 1, et seq.) and is engaged in the transportation of property and passengers in interstate

and intrastate commerce in the states of Minnesota, South Dakota, Iowa and Illinois.

III.

Jurisdiction of this Court over this action is provided by Title 28, United States Code, Secs. 1336, 2284 and 2321-2325, inclusive, which authorize suits to be brought in the District Courts of the United States against the United States of America to enjoin, annul, suspend and set aside orders of the Interstate Commerce Commission (hereinafter "Commission"). Venue of this action is in this Court pursuant to Title 28, United States Code, Section 1398, because of the fact that the principal office of Minneapolis is at 111 East Franklin Avenue, Minneapolis 4, Minnesota.

IV.

Pennsylvania Railroad Company (hereinafter "Pennsylvania Railroad") is a corporation of the Commonwealth of Pennsy[illegible]nia and is subject to the provisions of Part I of the Interstate Commerce Act. Pennsylvania Railroad and its wholly owned or controlled subsidiaries operate lines of railroad in the District of Columbia and in the thirteen states of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Virginia and West Virginia.

[fol. 3] V.

Atchison, Topeka & Santa Fe Railway Company (hereinafter "Santa Fe") is a corporation of the State of Kansas and is subject to the provisions of Part I of the Interstate Commerce Act. Santa Fe operates lines of railroad in the twelve states of Illinois, Iowa, Missouri, Kansas, Nebraska, Colorado, Oklahoma, Texas, Louisiana, New Mexico, Arizona and California.

VI.

Pennsylvania Company is a corporation of the Commonwealth of Pennsylvania. Its entire outstanding capital stock is owned by Pennsylvania Railroad. Pennsylvania

Company and Pennsylvania Railroad have identical directors.

VII.

Plaintiff Minneapolis operates approximately 1400 miles of railroad. Its lines serve the Minneapolis and Peoria gateways but do not reach any other important gateways such as Chicago, St. Louis or Kansas City.

Minneapolis is predominantly an east-west railroad providing a by-pass of the Chicago area via the Peoria Gateway. Minneapolis ranks sixtieth in size among the 127 Class I railroads of the nation based on investment. It is one-fortieth the size of Pennsylvania Railroad and one-twentieth the size of Santa Fe. Minneapolis is a light density railroad largely dependent upon agricultural and related products; its traffic is not well balanced with manufactured articles.

VIII.

Pennsylvania Railroad ranks first among Class I railroads of the nation in the matter of investment, freight [fol. 4] traffic, total freight revenues and by any standard used to indicate size and volume of business handled. Pennsylvania Railroad's lines tap the major industrial centers of the nation serving all the major railroad gateways east of the Mississippi River and also St. Louis, Missouri.

The Wabash Railroad Company is owned by Pennsylvania Railroad and the former's lines extend westwardly to Des Moines, Iowa, Omaha, Nebraska, and Kansas City, Missouri.

IX.

Santa Fe ranks first in mileage operated, fourth in number of employes, fifth in freight volume, third in freight revenue, and third in total revenues among the Class I railroads of the nation.

X.

Toledo, Peoria & Western Railroad Company (hereinafter "Western") is a corporation of the State of Dela-

ware, with its principal office at East Peoria, Illinois; and is subject to the provisions of Part I of the Interstate Commerce Act. Western operates 234 miles of main line and 5 miles of branch line track in interstate and intrastate commerce in the three states of Illinois, Indiana and Iowa. Its main line extends from Effner, Indiana, on the east, through Peoria, Illinois, to Lomax, Illinois, and Keokuk, Iowa, on the west; with a branch from Hamilton, Illinois, to Warsaw, Illinois. Western is essentially a carrier of overhead or bridge traffic, that is, traffic originating and terminating off its lines but which moves over the Western for a portion of the through movement from origin to destination. Over two-thirds of Western's total revenues are de- [fol. 5] rived from overhead or bridge traffic. Western is an east and west carrier by-passing the Chicago and St. Louis areas and has connections at various points on its lines for interchange of traffic with sixteen other railroads, including Minneapolis, Pennsylvania Railroad and Santa Fe.

In 1927 after a prolonged ownership of Western by Pennsylvania Railroad and Chicago, Burlington & Quincy Railroad Company, which ended in receivership, George P. McNear took control of Western and operated it until his death in 1947. Since that time the trustees under his will, owning 82 per cent of the total capital stock of Western, have controlled it. Those trustees during all pertinent times herein were the Wilmington Trust Company of Wilmington, Delaware, and Guy A. Gladson, an individual.

XI.

On June 10, 1954 and at all times thereafter to and including May 26, 1955, Minneapolis actively sought to purchase the stock of Western from those trustees. Minneapolis' activities were commenced and pursued by it long prior to any negotiations by Pennsylvania Railroad or Santa Fe to acquire such stock and control. Minneapolis failed in its endeavors only because of the concerted action by Pennsylvania Railroad and Santa Fe as hereinafter described.

XII.

A union of Minneapolis and Western had been under discussion and consideration for years prior to 1954; it was considered among railroads, including Pennsylvania Railroad, to be a natural combination and Pennsylvania Rail-[fol. 6] road had been favorable to the acquisition of Western by Minneapolis. Minneapolis' acquisition of Western would preserve all the strategic transportation advantages of Western, would accomplish important savings in transportation costs to the shipping public in using the united service of Minneapolis and Western, would improve service to the shipping public, would diversify Minneapolis' traffic base with the inclusion of the overhead or bridge traffic of Western in manufactured products, and would enhance the financial stability of both Minneapolis and Western—all in accordance with the undisputed intendment of Congress in enacting Section 5(2) of the Interstate Commerce Act.

XIII.

Pennsylvania Railroad and Santa Fe were not interested in jointly acquiring Western until January 1955. At that time Pennsylvania Railroad was informed that interests friendly to Minneapolis were buying into the Monon Railroad, and of a rumor of a plan whereby through affiliation of Minneapolis, Western and Monon, an outer outer-belt line would be established so as to enhance traffic through the Peoria Gateway and furnish more intense competition with the Chicago Gateway. Immediately Pennsylvania Railroad's favorable attitude toward acquisition of Western by Minneapolis changed. Pennsylvania Railroad and Santa Fe officials thereupon took concerted action through Wilmington Trust Company, one of the co-trustees, to stop acquisition of Western by Minneapolis.

From January 1955 to May 26, 1955 Pennsylvania Railroad and Sante Fe actively sought acquisition of the trustees' stock of Western and handled all their negotiations to [fol. 7] that end through Wilmington Trust Company. Pennsylvania Railroad and subsidiaries of Pennsylvania Railroad had four interlocking directors on the board of

Wilmington Trust Company, and because of this interlocking relationship Pennsylvania Railroad and Santa Fe were able to prevent Minneapolis from obtaining, and obtained for themselves, contracts to purchase the stock of Western. Specifically, on April 15, 1955 Pennsylvania Railroad, through its wholly-owned subsidiary Pennsylvania Company, and Santa Fe made contracts with the co-trustees for the purchase of 56,800 shares, or 52 per cent of the total number of shares outstanding of Western. In the negotiation and execution of these contracts Wilmington Trust Company represented the co-trustees.

These dealings in securities by Pennsylvania Railroad were in direct violation of Section 10 of the Clayton Act (*Title 15, United States Code, Section 20*). During all these times Santa Fe was involved in a joint venture with Pennsylvania Railroad and conspired with Pennsylvania Railroad to acquire the stock of Western so as to keep it out of the hands of Minneapolis, and thereby Santa Fe unlawfully participated in a transaction prohibited by Section 10 of the Clayton Act.

The contracts of April 18, 1955 above mentioned for 52 per cent of Western's stock, were followed by a later contract dated May 26, 1955 between the co-trustees and Santa Fe, whereby all the stock owned by the co-trustees was to be sold to Santa Fe. On information and belief, Santa Fe, during all these times, had a common understanding with Pennsylvania Railroad that it would share equally the ownership of Western, and to consummate this understanding Santa Fe made a contract with Pennsylvania [fol. 8] Company, dated June 28, 1955, whereby Santa Fe agreed to sell, and Pennsylvania Company, the wholly-owned subsidiary of Pennsylvania Railroad, agreed to buy, 50 per cent of the stock of Western which Santa Fe would be able to purchase, including the co-trustees' stock. The contracts of April 18, 1955, May 26, 1955 and June 28, 1955 were in furtherance of, a part of, and a culmination of the transaction initiated in January 1955 in violation of Section 10 of the Clayton Act between Pennsylvania Railroad and Wilmington Trust Company.

XIV.

On July 8, 1955 Pennsylvania Company, Pennsylvania Railroad and Santa Fe (hereinafter "Pennsylvania-Santa Fe") filed with the Interstate Commerce Commission an application under Section 5(2) of the Interstate Commerce Act, in Finance Docket No. 18991. By said application Pennsylvania-Santa Fe sought authority to control Western through exercise of its contracts to purchase its stock. It was the intention and purpose of Pennsylvania-Santa Fe and persons controlling them and affiliated with them, by means of such application to prevent Minneapolis from acquiring control of Western. Minneapolis was authorized by order of the Commission dated August 2, 1955 to intervene in Finance Docket No. 18991 and to become a party in opposition to the Pennsylvania-Santa Fe application.

XV.

On October 13, 1955 Minneapolis filed an application with the Interstate Commerce Commission under Section 5(2) of the Interstate Commerce Act, Finance Docket No. 19086, requesting approval and authority for Minneapolis to ac- [fol. 9] quire control of Western through acquisition of its capital stock and for Minneapolis' application to be considered comparatively with that filed by Pennsylvania-Santa Fe, Finance Docket No. 18991.

XVI.

By order dated December 13, 1955, Division 4 of the Interstate Commerce Commission assigned Minneapolis' and Pennsylvania-Santa Fe's applications for consolidated hearing which was held in Peoria, Illinois, from February 1 to 14, 1956. The record of that hearing contains extensive detailed evidence offered by Minneapolis in support of its application and in opposition to that of Pennsylvania-Santa Fe.

XVII.

On or about November 19, 1956, an examiner of the Interstate Commerce Commission served a proposed report

recommending the grant of Pennsylvania-Santa Fe's application and the dismissal of that of Minneapolis, on the ground that since Minneapolis did not have a contract to purchase the Western stock, its application could not be considered.

XVIII.

On or about December 31, 1956, Minneapolis filed extensive detailed exceptions to the examiner's proposed report.

XIX.

By report and order dated May 31, 1957, Division 4 of the Interstate Commerce Commission approved the application of Pennsylvania-Santa Fe, overruled objections of Minneapolis thereto, and dismissed Minneapolis' application, stating the only question for determination was whether the sale of Western stock to Pennsylvania-Santa Fe was consistent with the public interest, and grounding its [fol. 10] approval on the asserted continued "independent" operation of Western through Pennsylvania-Santa Fe control. See Exhibits A and B hereto attached.

XX.

On July 25, 1957 Minneapolis filed a petition for reconsideration by the full Commission of the report and order of Division 4 dated May 31, 1957, and requested oral argument. The order of May 31, 1957 was stayed on July 26, 1957 pending disposition of pending petitions for reconsideration.

XXI.

By order dated October 30, 1957 (see Exhibit C hereto attached) the Interstate Commerce Commission overruled all of Minneapolis' objections to Pennsylvania-Santa Fe's application, denied Minneapolis' petition for reconsideration and request for oral argument, and affirmed without additional findings or conclusions the order of Division 4 dated May 31, 1957, approving and authorizing the application of Pennsylvania-Santa Fe, and dismissing the application of Minneapolis.

XXII.

The acts of the Interstate Commerce Commission herein complained of and its report and orders of May 31, 1957 and October 30, 1957 in Finance Dockets Nos. 18991 and 19086 denied to Minneapolis due process of law, to the prejudice and damage of Minneapolis; were made without full comparative consideration of the competing applications; were arbitrary, capricious and an abuse of discretion; were not in accordance with legal standards; were in excess of statutory jurisdiction; were against the weight of the evidence and unsupported by substantial evidence; [fol. 41] and were in violation of the Interstate Commerce Act, the National Transportation Policy, the Administrative Procedure Act, the Sherman Act and the Clayton Act in the following respects among others:

(a) The Commission failed to accord Minneapolis a comparative consideration of its application with that of Pennsylvania-Santa Fe.

(b) The Commission failed to find that on a comparison of the two competing applications, the application of Minneapolis alone is consistent with the public interest and the National Transportation Policy enunciated by Congress to guide the Interstate Commerce Commission in its administration of the Interstate Commerce Act. The contrary finding in favor of Pennsylvania-Santa Fe is unsupported by any substantial evidence and is against the weight of the evidence.

(c) The Commission failed to find that because of the undisputed fact Western will be sold, union of Western with Minneapolis is the only natural combination consistent with the public interest so as to enable Western to continue its public service; and failed to find that the union of Minneapolis and Western would strengthen the service and finances of both railroads without loss to the public. Contrary findings in these respects in favor of Pennsylvania-Santa Fe are without substantial supporting evidence of record and seriously endanger the future ability of both

Minneapolis and Western to serve the public as required by law and particularly the Interstate Commerce Act.

[fol. 12] (d) All the basic criteria which the Commission has heretofore established in repeated decisions as determinative of the public interest under Section 5(2) of the Interstate Commerce Act, such as the achievement of economies and efficiencies, the improvement in service, the balancing of competitive strength, the strengthening of weaker carriers and the fostering of competition, compel a grant of Minneapolis' application and a denial of that of Pennsylvania-Santa Fe. No reason of substance was advanced by the Commission to justify departure from these established criteria of the public interest.

(e) The Commission's basic assumption and ground for decision that Western will be operated as an independent neutral carrier under the dominating control and influence of Pennsylvania-Santa Fe, is arbitrary and capricious, ignores the commission and court decisions on the domination and influence inherent in intercorporate relationships, and renders meaningless Section 5 of the Interstate Commerce Act and the National Transportation Policy.

(f) The Commission failed to find that in contrast with Minneapolis which enters only the Peoria gateway, the pyramiding of the gateway route of Western via Peoria on top of the competitive gateway routes controlled by or preeminently occupied by Pennsylvania-Santa Fe will promote monopolization of the important east-west gateways and suppress, lessen and restrain competition. The contrary findings of the Commission are unsupported by the evidence of record, and not in accord with the requirements of Section [fol. 13] 5(11) of the Interstate Commerce Act so as to exempt such results from the impact of the federal anti-trust acts, particularly Section 1 of the Sherman Act (*Title 15, United States Code, Section 1*) and Section 7 of the Clayton Act (*Title 15, United States Code, Section 18*).

(g) The Commission failed to find that a grant of the Pennsylvania-Santa Fe application will divert traffic from the Minneapolis, imperil its financial stability and jeopardize its ability to render adequate transportation service in the states of Minnesota and South Dakota. The contrary finding by the Commission is unjustified and unsupported by the evidence of record and therefore inconsistent with the public interest which is the sole criteria of Section 5 of the Interstate Commerce Act.

(h) The Commission erred because the conditions included in its orders and the purported checks and balances referred to therein will not operate to protect Minneapolis against diversion of its bridge traffic by Pennsylvania and Santa Fe through their sole ownership of Western; and will subject the traffic, service and finances of Minneapolis to irreparable injury and loss.

(i) There is no substantial evidence supporting the finding that Pennsylvania-Santa Fe built up Western following its receivership to its present state of prosperity. On the contrary, the evidence supports only a finding that the independent management of West-
[fol. 14] ern alone caused such result.

(j) The Commission erred in failing to find that Pennsylvania-Santa Fe seek to acquire Western solely for their own purposes and to prevent Minneapolis from acquiring Western, and not for purposes of continued public utility, interest and benefit.

(k) The finding of the Commission that the purchase of stock by Pennsylvania-Santa Fe from Wilmington Trust Company did not violate Section 10 of the Clayton Act is against the weight of the evidence, unsupported by substantial evidence, is a wrong legal conclusion, and involves the determination of a judicial question. The Commission's action in that respect was arbitrary and capricious and in excess of its statutory jurisdiction. The Commission lacks power and juris-

diction to approve or immunize a transaction in violation of Section 10 of the Clayton Act.

(l) The proposed acquisition of Western by Pennsylvania is contrary to the conditions under which Pennsylvania was permitted to acquire control of the Wabash Railroad Company (*Wabash Control Case*, 247 I.C.C. 365).

(m) The report of Division 4 ignores the undisputed facts of record underlying the public interest, stresses the bigness and power of Pennsylvania-Santa Fe and stamps with approval their acquisition of Western to stifle competition. There is no evidence to support an exemption to Pennsylvania-Santa Fe from [fol. 15] the impact of the federal anti-trust acts, particularly Section 1 of the Sherman Act and Section 7 of the Clayton Act. In purporting to grant such an exemption the Commission erred in failing to follow the standards promulgated by the Congress and the courts.

(n) Division 4 finds that Minneapolis' proposal contemplates the disappearance of Western as a "neutral connection for the other 15 carriers with which it (Western) presently works." This is untrue and is an erroneous interpretation of the effect and result which would flow from a granting of Minneapolis' application. There is no evidence of record to support this conclusion.

(o) The Commission also finds that Minneapolis' proposal to establish new service routes via additional direct interchange points along Western east of Peoria with other railroads "would be extremely harmful to other carriers." There is no evidence to that effect; the evidence is contrary; that such new interchange points would open up new routes of transportation to the shipping public not now serviceable.

(p) The Commission finds that such a new route with the Wabash via Forrest, Illinois, would "imperil" Wabash, "and possibly could result in the abandonment of Wabash's Des Moines Branch. Other intervening

carrier connections similarly would be adversely affected by the Minneapolis proposal." There is no substantial evidence of record in support of these findings. The Commission declined to accept Minneapolis' [fol. 16] conditions to protect connecting carriers in respect of through routes and joint rates, although accepting the same conditions from Pennsylvania-Santa Fe for like protection to Western's connecting carriers, finding as to the latter that the conditions would be adequate and sufficient. There is no evidence of record to support the discrimination between applicants and no finding why the conditions would be adequate in one instance and not in the other.

(q) The Commission finds that Western's service Lomax to Peoria is "superior" to Minneapolis' service Nemo to Peoria; that the latter is "inferior"; that Minneapolis' traffic "does not move on a competitive service basis;" that "Shippers using the Santa Fe, who prefer the Peoria gateway for service reasons, presently route their traffic via the Western at Lomax because of the inferior service via Nemo;" that "The only traffic moving via the Minneapolis (through Nemo) is traffic on which shippers desire to give it (Minneapolis) a haul, and the Santa Fe parity policy would not affect the continuation of such desires to favor the Minneapolis with a portion of their traffic. Consequently, there would be little or no effect upon the traffic now moving between Nemo and Peoria." There is no evidence of record to support these findings. The evidence, on the contrary, showed the Nemo-Peoria route as an excellent service route on a par with Western's via Lomax, but in jeopardy if Santa Fe controlled Lomax on the Western.

[fol. 17] (r) The Commission found that Minneapolis' business via the Omaha and Kansas City gateways "would not be lost so long as the Minneapolis and the connections handling it continue the same effective solicitation effort that is being exerted today and the service via the Minneapolis through Peoria is not further impaired." There is no evidence to support

either the finding that such business would not be lo
or the unwarranted assumption that Minneapolis
impaired its main line interchange service. The ev
dence is to the contrary.

(8) The Commission's approval of the Pennsylvani
Santa Fe's application is contrary to the public inte
est. Comparison of the two competing applicatio
shows that Minneapolis' application alone is consis
ent with prior commission and court decisions inte
preting the standards and objectives of Section 5 of t
Interstate Commerce Act, and that it alone is con
sistent with the standards of the National Transporta
tion Policy.

(9) In view of the uncontroverted evidence as to t
background and motivation of the purchase by Penn
sylvania Santa Fe, the Commission erred in findi
that the price to be paid by Pennsylvania Santa F
for the stock of Western is fair and reasonable.

(10) The violation of Section 10 of the Clayton Ac
by Pennsylvania Railroad and the unlawful conspira
by Pennsylvania Santa Fe to prevent Minneapolis from
acquiring Western, which unlawfulness permeated th
entire purchase transaction of Pennsylvania Santa Fe,
[fol. 18] warranted a summary denial of their applica
tion.

(11) The Commission acted arbitrarily and capri
ciously in applying different standards in its consider
tion of the Pennsylvania Santa Fe application from
those it applied in its consideration of the Minneapolis
application. As an example, the Commission finds that
Pennsylvania Santa Fe's use of Western as a new rou
could divert traffic presently moving via other gate
ways, but that such diversion would not jeopardize
the maintenance of adequate transportation service by
those carriers which intervened in opposition to Penn
sylvania Santa Fe. Conversely, on Minneapolis' pro
posal to acquire Western and its use of Western as a
new route, the Commission found that such use would
divert traffic from other gateways with an adverse
effect upon the same objecting intervening carriers.

(w) The Commission acted arbitrarily, capriciously and unlawfully in favoring the Pennsylvania-Santa Fe application on the ground that it was supported by existing written contracts as against the Minneapolis application which was not supported by existing written contract.

(x) The Commission acted arbitrarily, capriciously and unlawfully in failing to give effective consideration to the transportation economies which would result from a grant of the application of Minneapolis.

XXIII.

Notwithstanding the gravity of the errors in fact and in law upon which the report and order of Division 4 dated [fol. 19] May 31, 1957 are grounded, the extensive detailed evidence of record supporting Minneapolis' claims, the substantial public interest involved, and the far-reaching nature of the precedent established, the Commission by order of October 30, 1957 denied Minneapolis' petition for reconsideration and oral argument, affirmed the order of Division 4 dated May 31, 1957 and made it effective as of December 4, 1957.

XXIV.

Unless the orders of the Commission are restrained and enjoined by order of this Court, the Pennsylvania-Santa Fe acquisition of the stock of Western may be consummated immediately and Pennsylvania-Santa Fe may immediately take control of Western.

XXV.

If Pennsylvania-Santa Fe are permitted to acquire control of Western pursuant to the order of the Commission dated May 31, 1957, and made effective as of December 4, 1957, Minneapolis will be deprived of the rights and protections afforded to it by the Constitution and laws of the United States, most of which rights and protections will be irretrievably lost and will not be compensable in damages. Unless this Court issues an interlocutory and per-

manent injunction restraining the Interstate Commerce Commission from authorizing Pennsylvania-Santa Fe to acquire control of Western, and from dismissing, for that reason, the application of Minneapolis to acquire control of Western, plaintiff Minneapolis will suffer irreparable damage.

XXVI.

Plaintiff Minneapolis has no adequate remedy at law.

[fol. 20] Wherefore, Plaintiff Minneapolis prays:

1. That process may issue against the United States of America and Interstate Commerce Commission.

2. That this Court, by a temporary restraining order or preliminary or interlocutory injunction, stay, suspend, restrain, and enjoin the operation, application and effectiveness of the Report and Order of the Interstate Commerce Commission dated May 31, 1957, and the Order of the Interstate Commerce Commission dated October 30, 1957, in Finance Dockets 18991 and 19086, and suspend and stay the effective date of said orders of the Interstate Commerce Commission pending the final hearing and determination of this action.

3. That a Court constituted as required by Title 28, United States Code, Sections 2284 and 2321-2325, be convened.

4. That said Court, upon final hearing of this action, enter a decree herein permanently suspending, enjoining, setting aside and annulling the aforesaid orders of the Interstate Commerce Commission.

5. That plaintiff have recovery of the proper costs of this action.

6. That plaintiff be granted such other and further re-
[fol. 21] lief as may be just and equitable.

Respectfully submitted,

Richard Musenbrock, William J. Powell, 111 East Franklin Avenue, Minneapolis 4, Minnesota.

Dorsey, Owen, Barker, Scott & Barber, James E. Dorsey, 1300 First National-Soo Line Building, Minneapolis 2, Minnesota. Attorneys for Plaintiff.

Duly sworn to by A. W. Schroeder, jurat omitted in printing.

[fol. 22]

EXHIBIT A TO COMPLAINT

Interstate Commerce Commission
Finance Docket No. 18991[1]
Toledo, Peoria & Western Railroad Company Control

Decided May 31, 1957

---

1. Acquisition by the Atchison, Topeka & Santa Fe Railway Company and the Pennsylvania Company, and through the latter by the Pennsylvania Railroad Company, of control of the Toledo, Peoria & Western Railroad Company through ownership of capital stock, approved and authorized. Conditions prescribed.

2. Request of the Chicago, Rock Island & Pacific Railroad Company and the New York, Chicago & St. Louis Railroad Company, under section 5(2)(d) of the Interstate Commerce Act, for authority to be included on an equal basis in the acquisition of control, through stock ownership, of the Toledo, Peoria & Western Railroad Company, denied.

3. Application of the Minneapolis & St. Louis Railway Company for authority to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of capital stock dismissed.

---

[1] This report also embraces Finance Docket No. 19086, Toledo, Peoria & Western Railroad Company Control

J. C. Gibson, R. S. Outlaw, Starr Thomas, Carl Bagge, J. B. Reeves, Edwin A. Lucas, John B. Prizer, Robert H. Bierma, and *Thomas O. Hunter*, for applicants in Finance Docket No. 18991.

Burton K. Wheeler, Edward K. Wheeler, Richard Mastbrock, Eldon S. Olson, and *Robert G. Seaks* for applicant in Finance Docket No. 19086.

Latham Castle and *Harry R. Begley* for the State of Illinois.

Phil Saunders, Herman L. Bode, Charles A. Carr, and *C. A. Merkle* for the State of South Dakota and the South Dakota Public Utilities Commission.

Miles Lord, Harold J. Soderberg, Oliver A. Ossanna, and *Paul A. Rasmussen* for the State of Minnesota and the Minnesota Railroad & Warehouse Commission.

[fol. 23] *Bryce L. Hamilton, Howard P. Robinson*, and *Martin M. Lacante* for various McNear interests.

Bruce Ducnell, Eaton Adams, M. L. Cassell, Thomas W. Broker, Eugene S. Davis, Eldon Martin, Harold E. Spencer, Erle J. Zoll, Jr., Edgar Vanneman, Jr., Albert S. Long, Jr., Merrill Shephard, John B. Goodrich, and *John W. Adams* for railroad interveners.

Verle W. Safford, Max J. Eipkin, Fred V. Stiers, Miles Fleming, Don B. Pioletti, Lynn C. Sieberns, Fred Ranger Miller, Lyman R. Fort, Leon L. Lamet, Blaine Ramsey, Lawrence B. McNunn, C. V. O'Hern, Jr., Paul C. Cation, John L. Bordes, and *Robert H. Walker* for other interveners.

Clarence M. Mulholland, Richard R. Lamm, and *H. C. Thompson* for railway labor organizations.

REPORT OF THE COMMISSION

Division 4, Commissioners Mitchell, Arpaia, and Winchell.

By Division 4:

Exceptions and replies to exceptions were filed to the report proposed by the examiner, and the cases have been argued orally. Exceptions and requested findings not specifi-

cally discussed herein or reflected in our findings or conclusions, have been given consideration and found not justified.

The Atchison, Topeka and Santa Fe Railway Company (Santa Fe), the Pennsylvania Company, and The Pennsylvania Railroad Company (Pennsylvania), on July 8, 1955, in Finance Docket No. 18991, applied under section 5(2) of the Interstate Commerce Act, as amended, for authority (1) to the Santa Fe and the Pennsylvania Company to acquire direct control of the Toledo, Peoria & Western Railroad Company (Western), through ownership by each of 50 per cent of the capital stock of the latter; and (2) to Pennsylvania, by virtue of its 100 per cent stock ownership of the Pennsylvania Company, to acquire indirect control of Western.

On October 13, 1955, in Finance Docket No. 19086, The Minneapolis & St. Louis Railway Company (Minne-
[fol. 24] apolis) applied for authority under the same section of the act to acquire control of Western through ownership of its entire capital stock.

A consolidated hearing on both applications was held February 1 to 14, 1956, inclusive, at Peoria, Ill. Prior to, or at the hearing, numerous petitions for leave to intervene were granted. Applicants in Finance Docket No. 18991 intervened in opposition to the Minneapolis application in Finance Docket No. 19086, and the Minneapolis intervened in opposition to the authority sought in Finance Docket No. 18991. Unless otherwise indicated, all points hereinafter mentioned are in the State of Illinois.

Position of intervening railroads—The New York, Chicago and St. Louis Railroad Company (Nickel Plate) and the Chicago, Rock Island and Pacific Railroad Company (Rock Island) each requests authority under section 5(2)(d) of the act to be included in the acquisition of the stock of Western on an equal basis with the successful applicant or applicants. The Chicago, Burlington & Quincy Railroad Company (Burlington), and the Wabash Railroad Com-

Hereinafter in this report, as throughout the record, the various railroads involved sometimes will be referred to by the abbreviated designations shown in parentheses.

pany (Wabash), have no objection to the granting of the application of Santa Fe and Pennsylvania, provided appropriate conditions are contained in the order for the continued maintenance of present routes and channels of trade via existing junctions and gateways, and the continuance of all existing traffic and operating relationships and arrangements. In the event any railroad other than the Santa Fe and the Pennsylvania is authorized to acquire an interest in the stock of Western, the Burlington and Wabash ask to be included in the transaction to the same extent as any such other railroad.

The Illinois Central Railroad Company (Illinois Central) the Gulf, Mobile and Ohio Railroad Company (Gulf), and the Chicago and North Western Railway Company (North Western) request that, if either application is granted, appropriate conditions be imposed with respect to the maintenance of all routes and channels of trade via existing gateways.

The Monon Railroad requests that, in the event the application of the Santa Fe and the Pennsylvania is approved, one of the conditions to be attached to such approval includes a requirement that the Pennsylvania negotiate and enter into a contract giving the Monon trackage [fol. 25] rights over the Pennsylvania lines between Effner and Reynolds, Ind., approximately 35 miles, upon reasonable terms and conditions, subject to our approval. If such a condition is not included, Monon requests that the application of the Santa Fe and the Pennsylvania be denied.

Other interveners—Various communities, civic organizations and shippers, many of whom are located along the line of Western, intervened in support of the Santa Fe-Pennsylvania application; and the Railway Labor Executive's Association and the Brotherhood of Railroad Trainmen intervened to protect the interests of carrier employees. The States of Minnesota and South Dakota, with their respective Public Utilities Commissions, supported, and the State of Illinois opposed, the application filed on behalf of the Minneapolis.

History, policies, and description of Western—The main line of Western extends from its eastern terminus at Effner

on the Illinois-Indiana State line, via Peoria, to the western termini at Keokuk, Iowa, and Lomax, approximately 234 miles. A branch line extends from Hamilton to Warsaw, approximately 5 miles. It has connections for the interchange of traffic with 16 railroads, the principal ones being with the Pennsylvania at Effner, with the Santa Fe at Lomax, and with several carriers at Peoria, a point almost midway between Chicago and St. Louis, Mo. Other points of interchange are maintained at Keokuk, and at Sheldon, Webster, Watseka, Gilman, Forrest, Fairbury, Honegger, Cienoa, El Paso, Eureka, Washington, Farmdale, Canton, Cuba, Bushnell, Ferris, Elvaston, and Hamilton. The headquarters, shops, and yards of Western are at East Peoria, just across the Illinois River from Peoria.

Western began its modern existence in 1927, when George P. McNear acquired the property after a prolonged ownership by the Pennsylvania and the Burlington, which ended in receivership. *T. P. & W. R. R. Acquisition*, 124 I. C. C. 181. Under the guidance of McNear, Western was built into a fine railroad, and upon his death, in 1947, the present management took over and continued with much success. The policy of Western has been, and now is, to maintain strict neutrality between all connections, and to participate in any haul of traffic no matter how slight. Such policy emphasizes the strategic position of an overhead carrier through Peoria as an alternative route, bypassing the [fol. 26] congested terminals of Chicago and St. Louis. Much of the success of Western as a bridge line dates from the construction of a western connection with the Santa Fe at Lomax in 1927, authorized in *T. P. & W. R. R. Construction*, 124 I. C. C. 278. In 1928, the first full year after completion of the Santa Fe-Western Lomax connection, the Western interchanged a total of 29,697 carloads of traffic with the Pennsylvania and 7,264 carloads with the Santa Fe. By 1955, the corresponding figures increased to 58,543 carloads, or 97 per cent, and 34,755 carloads, or 378 per cent, respectively.

Over the years, the Santa Fe and the Pennsylvania have cooperated with Western in coordinating their schedules and services. In 1930, arrangements were made for the establishment of coordinate schedules for the handling of

perishables from Santa Fe origin territory, and the Western constructed icing facilities at Peoria to accommodate such traffic. Today, the Santa Fe, Western, and Pennsylvania schedules are set up to provide a fully competitive service over the Western route. On westbound traffic moving between Effner and Kansas City, Mo., the Western-Santa Fe service west of Peoria would be a full day faster than if the traffic were handled by the Minneapolis from Peoria to Nemo, thence by the Santa Fe to Kansas City. Eastbound it would be from 11 to 14 hours faster.

Western traffic and revenues—At present, more than two-thirds of the total revenues of Western are derived from overhead or bridge traffic. Much of the remainder is produced by the handling of interline traffic which originates or terminates along its line. Less than 9 per cent of its revenues is produced from local traffic.

For the year ended June 30, 1955, the latest period for which both car and revenue data were available, the total freight revenue of Western was $6,920,422. Of a total of 105,705 cars of interline traffic handled during the period, 74,772, or 70.7 per cent, were interchanged with the Santa Fe and of Pennsylvania. Such interchange accounted for $4,404,318 or 63.8 per cent of Western's gross revenues for that year. The Burlington and the New York Central Railroad Company ranked third and fourth in the volume of interchange with Western, and the Rock Island, Nickel Plate and Minneapolis ranked fifth, sixth and seventh, respectively. The protection of interchange traffic was one of [fol. 27] the principal reasons advanced by the applicants, and recognized by us in approving acquisition of control in *Detroit, T. & I. R. Co., Control*, 275 I. C. C. 455.

Capitalization—Western has outstanding 90,000 shares of capital stock of which 73,800 shares, or 82 per cent, are held by the trustees of the McNear estate hereinafter referred to as the trustees. The remainder is held by the Hanover Bank, by other members of the McNear family, and by the president of Western. The Santa Fe has entered into agreements for the purchase of all the capital stock of Western at a price of $135 a share. Each agreement provides for consummation of the purchase of the stock within a reason-

able time after our approval. The purchase price is to be paid upon delivery of the stock at the time of settlement, in cash or by certified cashier's or treasurer's check, and the stock is to be delivered to Santa Fe free and clear of all liens, encumbrances, trusts, or obligations of any kind or nature.

Valuation data—The value of the Western's property for rate-making purposes as reported by division 1 as of June 30, 1917, was $7,121,384. Additions and betterments less retirement from the date of valuation to December 31, 1954, as reported by the carrier, amounted to $5,708,109 for carrier-owned property and $749,974 for noncarrier-owned property.

Negotiations leading to sale of stock—The trustees determined to sell the controlling interest in Western in order to diversify the holdings of the trust estate. In June, 1954, the Minneapolis made the original offer to purchase the shares held by the trustees at a price of approximately $69.50 per share. Subsequently, the purchase price per share was increased to about $80. In the spring of 1955, the Santa Fe and the Pennsylvania actively became interested, and on April 15, 1955, actually obtained commitments from the trustees for 26 per cent of the Western stock, each at a purchase price of $100 per share.[1] A dispute arose, and apparently still exists, with respect to the validity of such commitments.[2] Thereafter, the Minneapolis [fol. 28] made a further offer of $133 a share, but on May 26, 1955, before that offer was accepted, the president of the Santa Fe, acting on behalf of that carrier alone, agreed to purchase all the stock held by the trustees for $135 per share, subject to our approval. Thereafter, separate agreements in like tenor were made with the remaining stockholders of Western.

---

[1] About that same time the Rock Island made an offer to the trustees for a similar block of 26 percent of the stock.

[2] Regardless of the outcome of the dispute, it is the intent and purpose of the Santa Fe and the Pennsylvania that each is to own exactly 50 percent of the capital stock of Western.

Agreement between Santa Fe and Pennsylvania.—By agreement dated June 28, 1955, the Santa Fe, subject to our approval, agreed to sell to the Pennsylvania Company, a wholly owned subsidiary of Pennsylvania, 50 per cent of the entire outstanding capital stock of Western at an average price of $135 a share. Such purchase is without prejudice to any claims, causes of action, or rights which Pennsylvania may have against the trustees with respect to the transaction of April 15, 1955, involving 23,400 shares of such stock; and in the event Pennsylvania acquires all of any of such shares, the obligation under the contract is to be reduced accordingly.

The parties to the agreement, each with the other, and not for the benefit of others not parties thereto, agree that they will exercise their stock ownership of Western to accomplish the following objectives:

1. Western will continue to be operated as a separate and independent carrier with responsible management located along its lines in order to preserve to shippers and communities the present direct access to its officials.

2. The properties of Western, including line and equipment, will be maintained and improved in keeping with the requirements of a railroad of its character and importance.

3. Western will continue to maintain its own solicitation forces and will be entirely free to solicit traffic in such manner as best to serve the interests of Western.

4. All existing routes and channels of trade via Western will be maintained and kept open without discrimination between connecting lines of railroad.

5. The board of directors of Western shall consist of 11 members, of whom 1 shall be the president of the company, 2 shall be officers of Santa Fe, 2 shall be officers of the Pennsylvania Company, or Pennsylvania, or both, and the remaining 6 shall be prominent citizens not connected with any one of the parties to this agreement but selected by the parties thereto and the subject of mutual agreement between them.

[fol. 29] *Proposals before the Commission*—Four alternatives have been proposed for the disposition of these proceedings on the basis of the public interest involved. They are:

1. Authorization of joint and equal control of Western by the Pennsylvania and the Santa Fe.

2. Authorization of sole control by the Minneapolis.

3. Authorization of either application subject to a condition requiring the inclusion, pursuant to the provisions of section 5(2)(d) of the act, of one or more of the railroad intervenors expressing a desire for such inclusion.

4. Denial of both applications, or the dismissal of the Minneapolis application in Finance Docket No. 19086, for the reason that no transaction within the meaning of section 5(2) is presented for our determination.

These proceedings represent a new and more complicated phase in the administration of section 5, since it involves 2 applications for authority to control the same property, and petitions by 4 other carriers for inclusion in the transaction under varying circumstances. We must weigh whether each application is consistent with the public interest, with or without inclusion of other railroads, considering not only other intervening petitioners seeking such inclusion but also the other applicant and nonparticipating railroads as well.

The burden of proof, therefore, has become most heavy for an applicant in a proceeding like this, because it must not only overbalance the claims of those seeking to share in the control but also of those seeking to exclude it from the transaction. As a practical matter we, in such a proceeding as this, must arrive at a standard of public interest and determine which of the various plans of control most nearly approximates it. The applications and petitions for inclusion must be denied unless there are advantages in the public interest.

Santa Fe and Pennsylvania systems—These applicants are two of the largest rail carriers in the United States. Their lines converge at Chicago. The Santa Fe system ex-

tends from that point to the Pacific coast. It serves 12 States, ranks first in mileage operated, third in freight and total revenues, fourth in the number of employees, and fifth in freight volume. The Santa Fe is strong in two of [fol. 30] the fastest growing sections of the country, namely, the southwest and California, and is favored with the long haul of diversified traffic. Except for 3 years during the 1930's, it paid dividends on its stock each and every year since 1901. During the first 9 months of 1955, as compared with the similar period of 1954, the tonnage and freight revenues of the Santa Fe increased approximately 11 per cent, and its net income increased 22.4 per cent. About 64 per cent of its freight revenues was derived from the transportation of manufactured products originating on its lines.

Except for the New England States, system lines of the Pennsylvania and its subsidiaries blanket the east. As owner of the Wabash, such lines extend westwardly to Des Moines, Iowa, Omaha, Nebr., and Kansas City. Although the Pennsylvania controls the Wabash through ownership of practically all its capital stock, the latter is independently operated with its own management and operating departments.

Pennsylvania operates in 13 States and the District of Columbia. It ranks first among class I rail carriers in the matter of investment, freight traffic, total freight revenues, or by practically any standard used to indicate size and volume of business handled. It has paid a stock dividend each year since 1847. In 1954, the freight revenues of the Pennsylvania, together with its independently operated subsidiaries, amounted to 11.9 per cent of the freight revenues of all class I rail carriers, and 170.6 per cent of the freight revenues of the next largest aggregate combination, the New York Central system. During the first 9 months of 1955, as compared with the similar period of 1954, the Pennsylvania enjoyed substantial increases of 19 per cent in freight tonnage, 12 per cent in revenues, and 171.7 per cent in net income. A little more than one-half of its freight revenues is derived from the transportation of manufactured products originated on its lines. In this respect it is the largest originator of rail traffic in the country.

Minneapolis—The Minneapolis operates approximately 1,400 miles of railroad lines in 4 States, the principal route extending from Minneapolis, Minn., through Oskaloosa, Iowa, to Peoria. It also operates lines between Minneapolis, through Winthrop, Minn., to Aberdeen and Leola, S. Dak.; from Winthrop, through Tara, Iowa, to Des Moines and beyond; and from Albert Lea, Minn., through Cor- [fol. 31] with, Iowa, to Fort Dodge, Iowa. Its lines do not reach the important gateways of Chicago, St. Louis, or Kansas City. At Peoria, the Minneapolis maintains direct connections for the interchange of traffic with Western, the Peoria & Pekin Union Railway, the Rock Island, and the Peoria Terminal. A complete description of the Minneapolis is contained in *Associated Rys. Co. Acquisition and Securities*, 228 I. C. C. 277. It serves 57 communities in Minnesota and 17 cities and towns in South Dakota.

Since 1936, Minneapolis has spent more than $84 million out of operating revenues on physical rehabilitation of its property. This expenditure has made Minneapolis a modern and efficient operating plant providing exceptionally good service to the public. It is completely dieselized and owns well conditioned rolling stock in adequate supply to accommodate and handle, in a safe and expeditious manner, an increase of at least 25 per cent in the volume of tonnage now available to it.

Minneapolis is predominantly an east-west railroad, bypassing the congested Chicago area. It is largely dependent upon agriculture and related products, and has not proportionately benefited from the tremendous increase in manufacturers' and consumers' goods in recent years. In 1954, agriculture represented 41.2 per cent of the Minneapolis' originated tonnage, 25.9 per cent of its total tonnage, and 30.4 per cent of its total freight revenues. Products of animals, mines and forests, together with farm products, aggregated 80.6 per cent of its originated tonnage and 52.4 per cent of its revenues. Without doubt, Minneapolis is a substantial railroad rendering good service to the shippers and communities on its lines. It constituted one of the bright spots in providing freight cars for the 1955 grain movement.

For the period 1936-55, the Minneapolis' average annual gross operating revenues were $15,845,000, and its current annual railway operating revenues approximate $20,000,000. For the first 9 months of 1955, as compared with the similar period of 1954, the freight tonnage and revenues of Minneapolis rose by only a few percentage points, and its net income increased 5.6 per cent. On the basis of investment, Minneapolis ranked sixtieth in size among the 127 class I railroads in the country in 1955. It ranks approximately the same with respect to other comparisons usually considered in determining the relative importance [fol. 32] and size of railroads generally. It is now reasonably prosperous, with a financial and physical picture that has been steadily improving over the past few years. Minneapolis has paid dividends regularly since 1943. Its capitalization is not burdened with outstanding preferred stock, and the relatively small amount of unfunded long-term debt will not mature until 1967.

During the 4 years 1950-53, 67 per cent of Minneapolis' aggregate loaded tonnage consisted of traffic originated or terminated on, or local to its lines, and 33 per cent constituted overhead or bridge traffic. In the same period, the Minneapolis' interchange with Western at Peoria averaged 12,995 revenue carloads per year which constituted an average of 5.9 per cent of the Minneapolis' total revenue loads and accounted for 8.1 per cent of its total annual freight revenues. In 1954, approximately one-half of the Minneapolis-Western Peoria interchange represented Minneapolis bridge traffic handled in conjunction with the Santa Fe to and from Nemo.

Nickel Plate and Rock Island—These two interveners are grouped together because their respective interests are identical. Each desires a proportionate share of the capital stock of Western irrespective of which pending application is approved, and in the event the applicant or applicants are unwilling to accept, as a condition to approval of their application, participation on an equal basis of ownership by the Nickel Plate and the Rock Island, the latter are ready and anxious to undertake the purchase of the stock for their own accounts. They believe that the true inde-

pendence and neutrality of Western best can be assured and intended only if the stock-control transaction is thrown open to all interested connections desiring to participate.

Nickel Plate is the sixth largest railroad in size in eastern territory. It serves directly the gateways of Chicago, Peoria, and St. Louis. Nickel Plate is dependent upon the Western for access to western lines, particularly the Santa Fe, via the Peoria gateway, and Western is Nickel Plate's largest single connection at Peoria. Statistics of record indicate that the Western interchange represents 26 per cent of all the traffic handled in Nickel Plate trains to and from Peoria.

The Rock Island operates 7,895 miles of lines in 14 States, extending generally from Chicago, St. Louis, and Memphis, Tenn., on the east, to Tucumcari, N. Mex., and [fol. 33] Denver, Colo., on the west. Its line to Peoria branches off the Chicago-Denver main line at Bureau. In 1954, Rock Island's operating revenues totaled more than $187,000,000, and it earned $28.84 per share of preferred stock and $10.96 per share of common stock.

Wabash and Burlington—As indicated heretofore, the Wabash and the Burlington have no objection to the granting of the application of the Santa Fe and the Pennsylvania, provided the usual conditions for the maintenance of joint rates and through routes are imposed. But, if any carrier other than the Santa Fe and the Pennsylvania is authorized to acquire control or an interest in Western, then the Burlington and the Wabash desire to participate in such control to the same extent.

Since 1859, Wabash has operated under trackage rights over Western's line between Elvaston and Hamilton. At the latter point these two carriers operate a jointly-owned track which connects the Western main line with the municipal bridge across the Mississippi River used by both to serve Keokuk. The Wabash also operates over the main line of Western between Forrest and Fairbury to get to and from its branch line serving Streator. The contractual relationships between Wabash and Western include provisions for the maintenance and operation of stations and interlocking facilities. The current contract contains a l-

year cancellation provision, and it is vitally important to the Wabash, and the shipping public served by its Streator branch, that control of Western will not be acquired by a carrier or carriers detrimental to the interests of the Wabash. Loss of the trackage rights now enjoyed by the Wabash over the Western would require consideration of the abandonment of both the Streator branch and the Keokuk branch north of Meredosia. In 1955, the Wabash interchanged a total of 3,438 carloads of revenue freight with Western at 5 different junction points, the most important of which, from the standpoint of volume, was Forrest.

Minneapolis' proposals—The Minneapolis is opposed to joint or multiple ownership of Western. It seeks to acquire exclusive control in order to increase the operating efficiency of its plant, diversify its traffic base, establish new service routes; provide suitable land for the location of industries on its lines, enhance its financial stability, effect substantial economies through elimination of duplicate [fol. 34] facilities, and render an improved transportation service to the public. The Minneapolis is willing to enter into agreements similar to those now existing between the stockholders of Western, on the one hand, and Santa Fe, on the other. In payment for such stock, the Minneapolis would issue $12,000,000 of first-mortgage sinking-fund bonds, bearing interest at the rate of approximately 4½ per cent per annum, maturing 30 years from the date of issue, with equal annual sinking-fund payments of $480,000, commencing in the sixth year. The remaining $150,000 of the purchase price would be paid in cash from funds available in its treasury.

The proposal of Minneapolis unequivocally contemplates the disappearance of Western as an independent and neutral connection for the other 15 carriers with which it presently works. Only the corporate existence of Western would remain. For all practical purposes Western would be integrated, consolidated and merged into the Minneapolis for ownership, management, and operation. Western's headquarters and general offices would be moved from the present location at Peoria to the city of Minne-

apolis, and all policies and directions for the operation of the joint properties would emanate from that point. An estimated 250 positions, most of them on Western, would be affected by the plan. Of the 24 executive positions on Western at the present time, only a trainmaster and a roadmaster would be retained for direct supervision of Western's trackage.

Only the Minneapolis and its supporting interveners, the States of Minnesota and South Dakota, advocate the disappearance of Western as a separate and independent operating carrier. All the other parties to these proceedings, including the railroad interveners, the communities served by Western, and the shippers who appeared as witnesses, insist that the separate and independent operation of Western under its present local management is a public necessity. In fact, all the communities on the line of Western between Peoria and the western termini are fearful that under the Minneapolis' control the western portion of the line will be abandoned because of the competition that line furnishes the line owned by the Minneapolis between Peoria and Nemo. While at one time officials of the Minneapolis considered such an eventuality, the instant record conclusively demonstrates that abandonment of any portion of [fol. 35] Western is not included in the present plans of the Minneapolis in seeking control. The latter is willing to accept a condition to that effect.

The Minneapolis contends that its acquisition of control of Western not only will give the Minneapolis direct interchange connections with the Nickel Plate, Illinois Terminal and Burlington at Peoria, but will also provide additional direct interchange points east of Peoria with the Pennsylvania at Effner, the Gulf at Chenoa, the Illinois Central at Gilman and El Paso, the Chicago & Eastern Illinois at Watseka, the New York Central at Sheldon, the Wabash at Forrest, the Nickel Plate at Farmdale, and the Chicago, Milwaukee, St. Paul & Pacific at Webster. Under unified operations, the Minneapolis proposes to establish coordinated schedules between it, the Western, and the connecting carriers, providing new service routes via these additional junctions for moving traffic in all directions.

The record shows that such a policy would be extremely harmful to other carriers. For example, of a total of 21,041 cars interchanged between the Wabash and the Minneapolis at Des Moines and Albia, Iowa, in 1955, 7,364 cars were destined to or from points in Illinois and points east thereof. Under the Minneapolis' unified-operation theory, a new service route via Forrest would be established for such traffic which would imperil, or at least diminish, the Wabash's participation therein, and possibly could result in the abandonment of the latter's Des Moines branch. Other intervening carrier connections similarly would be adversely affected by the Minneapolis' proposal. The Minneapolis contends that such carriers can be amply protected by appropriate conditions with respect to through routes and joint rates to be attached to the order approving its control of Western.

The Minneapolis further contends that Western is a natural extension of its railroad; that its interchange with Western at Peoria is proportionately greater in carloads and freight revenues than any other carrier interested in these proceedings; that no one can operate Western to greater advantage or more economically than the Minneapolis; and that its failure to acquire control of Western would materially curtail the expansion of Minneapolis' service and the full use and development of the Peoria gateway. Acquisition of control of Western would permit the Minneapolis to abandon its yard at Peoria and use the yard of [fol. 36] Western, thereby eliminating a switching operation at that point and reducing interchanges to 1 yard instead of the 2 now required.

The Minneapolis estimates that economies totaling $1,770,945 can be achieved jointly by it and the Western through elimination of duplicate facilities and traffic agencies, more efficient use of work forces, plant and power, and mechanical accounting. Most of the savings would be effected at the expense of Western's employees. The Minneapolis states that it will seek to minimize any adverse effect upon employees, because it has a number of workers on the payroll who are in the upper age brackets, and as these people are automatically retired, room will be made for the absorption of Western's employees to be released

or displaced. The Minneapolis states that the economies which would result from its operation of Western would redound not only to the benefit of these two small carriers, but would also redound to the benefit of shippers and the public generally, through improved service, thus encouraging the development of the combined territories served and the location of new industries along their lines.

Other benefits and advantages claimed by the Minneapolis in the matter of adequate car supply and the coördinated service which would result if Western were controlled by the Minneapolis are of record, but in view of our findings herein with respect to the disposition of its application, the details thereof need not be specifically described. The Minneapolis insists that it alone has no conflict of interest with Western, or the Peoria gateway, and no incentive other than to maximize the traffic and service that would be rendered over the combined lines. Conversely, it contends that all other carriers interested in the acquisition of all or a portion of the control of Western have their main lines, interests, and investments in direct competition with Western and the Peoria gateway. Hence, acquisition of Western by any other interested carriers would sharply decrease competition, not only in that it would be the acquisition of Western by its competitors, but also in that it would materially decrease the ability of the Minneapolis to compete with such other carriers.

Competition and diversion of traffic—The Santa Fe and the Pennsylvania are complementary to each other insofar as they work through their connections with the Western. [fol. 37] The Rock Island and the Santa Fe are in competition; the Nickel Plate competes with the Pennsylvania and Wabash; and Minneapolis is in competition with the Rock Island and other parties. All the carriers endeavoring to participate in its control are in competition with Western. Santa Fe's and Pennsylvania's routes via the Chicago gateway compete with Western's routes through the Peoria gateway. The Nickel Plate competes with the eastern half of Western, and the Rock Island competes with the western half. The Wabash, the Burlington, and the Minneapolis also compete with Western.

The important thing is not whether there is possibility of competition, but whether there is probability of existing or potential competition being diminished or strangled by the Western under the control of the Santa Fe and the Pennsylvania. Under such control, Western would have an increased opportunity to secure traffic now moving via other gateways. While the Santa Fe and the Pennsylvania ordinarily solicit traffic for their long hauls, they have not worked against Western, and have offered only passive resistance against Lomax and Effner, respectively, in recognition of the benefits they would receive from the Western route. Considering the greater expense of operating through a large congested terminal, Santa Fe and Pennsylvania are just about as well off financially when handling traffic via Western as they would be on the long haul through Chicago. If the Santa Fe obtains a half interest in Western, it intends to place Lomax on a parity with Chicago from a solicitation standpoint, and as the other half owner, the Pennsylvania will recognize Effner as one of its principal interchanges along with Chicago and St. Louis. While the Pennsylvania will continue to solicit its long haul to St. Louis, Effner and Chicago will be on a parity. Of course, if service over the Western is improved under the control of the Santa Fe and the Pennsylvania traffic can be handled over it more economically and efficiently than over existing routes, there may be some diversion of traffic, but such diversion would not jeopardize the maintenance of adequate transportation service by the objecting intervening carriers.

As for solicitation, the record shows that all but a very small part of the nation's traffic is routed by the shipper, and that many factors, the most important of which is [fol. 38] service, influence such routing. Generally, the shipper gives the originating carrier a long haul, or at least a line haul, but junction points are seldom included in the routing. Shippers also desire to maintain friendly relations with as many railroads as possible and, for that reason, there is a tendency to divide the traffic among several railroads. Shippers like to favor small railroads with a part of their traffic, and will use the line of a particular carrier because of a friendly relationship with that

railroad's solicitors. Normally, an industry feels a definite obligation to the originating carrier. The industry seeks rate and routing information from that line, places rate problems before it, looks to it for car supply, and relies upon it for tracings and diversions. These factors are operating today and are reflected in the present division of traffic among all of Western's connections, and since no change in service is contemplated with Western under the control of the Santa Fe and the Pennsylvania, the volume of traffic handled by the protesting intervening carriers should not be materially affected. The self-interests of the Santa Fe and the Pennsylvania provide further assurance that Western's present solicitation and service policies will be continued. Those policies have been responsible for the success of Western in the past, and the best way for the Santa Fe and the Pennsylvania to insure a substantial return on their investments to be made herein is to see that the Western management is left free to continue them.

The Minneapolis contends that with Santa Fe and the Pennsylvania in control of Western $7,000,000 of its traffic would be vulnerable to diversion, of which it thought $1,100,000 was certain of loss. This last figure was obtained by dividing the traffic into 12 categories and applying a percentage to the gross revenue derived from each category. The record does not disclose the basis of the percentages used.

The Minneapolis estimates that 75 per cent of its traffic moving between Peoria and Nemo will be diverted to the Western by the combined influence of the Santa Fe and the Pennsylvania as originating and terminating carriers. It contends that this will be accentuated by the placing of Lomax on a parity with Chicago. We are of the opinion that the placing of Lomax and Chicago on the same level for the solicitation of traffic would have little effect on the [fol. 39] Nemo-Peoria traffic of the Minneapolis. The Santa Fe has solicited that traffic for its long haul to or from Chicago. The Western has solicited it via Lomax, and all other carriers connecting with the Santa Fe west of Chicago have solicited it. Notwithstanding this intense

competition, the Minneapolis has been able to handle the traffic.

It is evident that the Peoria-Nemo traffic secured by the Minneapolis is traffic which does not move on a competitive service basis. The record shows that the Minneapolis does not co-ordinate schedules with the Santa Fe at Nemo, nor has it been making its connections with the Western and the Nickel Plate at Peoria on eastbound traffic. In 1953, the Minneapolis canceled its guaranteed schedules on perishable traffic moving through Nemo in conjunction with the Nickel Plate at Peoria. The large volume of traffic presently moving via the Western route is evidence of the superior connecting service it provides.

Shippers desiring to favor the Santa Fe now route their traffic via the Santa Fe's long haul to Chicago. The diversion of this traffic to Lomax as a result of placing it on a parity with Chicago would have no effect on the Minneapolis, because the Minneapolis does not share in the haul on this traffic today. Shippers using the Santa Fe, who prefer the Peoria gateway for service reasons, presently route their traffic via the Western at Lomax because of the inferior service via Nemo. The only traffic moving via the Minneapolis is traffic on which shippers desire to give it a haul, and the Santa Fe's parity policy would not affect the continuation of such desires to favor the Minneapolis with a portion of their traffic. Consequently, there would be little or no effect upon the traffic now moving between Nemo and Peoria. On the other hand, the Pennsylvania's policy of placing Effner on a parity with Chicago would divert a portion of traffic now moving through Chicago to Effner and the Peoria gateway, thus giving the Minneapolis an opportunity to solicit the haul to and from its connection with the Western at Peoria.

The Minneapolis estimates that it would lose 50 per cent of the traffic moving through Peoria and the Kansas City and Omaha gateways, which it now bridges between Peoria and junction points other than Nemo. It states that such traffic would be subject to diversion over the Pennsylvania-Western-Santa Fe route. The present routing of this traffic [fol. 40] reflects the influence of the other western carriers which compete with the Santa Fe and which, to a large

extent, are responsible for its movement. The fact that the other western carriers and the Minneapolis overcame the solicitation of the Santa Fe and the Western, which afford a more direct service route, indicates that other factors beyond the control of the Santa Fe influenced the routing of this traffic. Partial ownership of the Western will not alter the degree of the Santa Fe's solicitation influence and will not affect the basis on which this traffic presently moves. This business would not be lost so long as the Minneapolis and the connections handling it continue the same effective solicitation effort that is being exerted today, and the service via the Minneapolis through Peoria is not further impaired. The same solicitation situation exists with respect to the traffic originated and terminated by the Minneapolis at Peoria, a portion of which, it is claimed, would be diverted if the Santa Fe Pennsylvania application were approved.

The Rock Island contends that its traffic vulnerable to diversion with Western under the control of the Santa Fe-Pennsylvania, primarily through the position of the Santa Fe, would amount to an estimated $2,084,309—more than $1,000,000 of which represented traffic originated or terminated at Rock Island points competitive with the Santa Fe and interchanged with the Western at Keokuk. The nature of this interchange traffic is such that the possibility of its diversion to the Santa Fe is remote, particularly in view of the fact that much of it originated or terminated at industries served exclusively by the Rock Island.

Almost $1,500,000 of the alleged loss claimed by the Rock Island through diversion was derived from traffic which moved into and out of Peoria from and to Chicago and Joliet as competitive origins, destinations, or junctions. The small volume of traffic interchanged between the Western and the Santa Fe at Eureka, as reflected by data of record, indicates that the Santa Fe is not a factor in the movement of traffic between Chicago and Peoria via the Western. The Western's route from Peoria to Chicago is via main-line connections with the Wabash at Forrest, the Chicago & Eastern Illinois at Watseka, and the Illinois Central at Gilman. Thus, it appears unlikely that the Santa Fe's partial ownership of the Western could enhance its

competitive position as to traffic for which the Santa Fe maintains no competitive route.

[fol. 41] Neither will the Santa Fe's partial ownership of the Western affect the diversion of traffic moving via the Rock Island between Peoria and points competitive with the Santa Fe in the west. The lack of Santa Fe influence as to this traffic is evidenced by the fact that it has unsuccessfully solicited it. The Rock Island, with direct service at Peoria, enjoys the paramount influence as to this traffic, since it affords shippers at Peoria its services as an originating or terminating carrier. The Western is not afforded such influence, because it maintains direct service to very few industries at Peoria.

With Western under the control of the Santa Fe-Pennsylvania, the Nickel Plate estimates a loss of traffic amounting to approximately $2,200,000, consisting of traffic interchanged with the Santa Fe at Chicago, and with the Western at Peoria. The Santa Fe contends that its policy of placing Lomax on a parity with Chicago will have no effect upon this traffic, because the Nickel Plate is able to solicit it both at Chicago and at Peoria. The divisions accruing to the Nickel Plate at Peoria exceed those at Chicago, and on transcontinental business are equal to those at St. Louis. Thus, it is argued by the Santa Fe that the placing of Lomax and Chicago on a parity will have the effect of increasing the revenues of the Nickel Plate.

The greatest portion of the Nickel Plate's interchange traffic with the Western is bridged via the Western to or from the Santa Fe at Lomax. In 1954, the Nickel Plate interchanged a total of 14,497 cars with Western, of which the Santa Fe participated in the movement of 11,221 cars. Most of the Nickel Plate's traffic bridged from Lomax via the Western is perishable moving, in superior service, to points on the Nickel Plate and its connections. It provides the Santa Fe with a long haul to Lomax on traffic which otherwise might move via St. Louis. If the Western's connection with the Nickel Plate were not maintained as a service route, this traffic would be routed to the Nickel Plate at St. Louis, short-hauling the Santa Fe at Kansas City. Thus, the self-interest of the Santa Fe would assure the continuance of good service to the Nickel Plate at

Peoria and prevent preferential solicitation by the Western for the Pennsylvania at Effner. As stated above, the Western, being dependent upon the traffic of its connecting lines for successful operations, must continue its present policy [fol. 42] of working closely with all its connections or lose the traffic it now interchanges with them. It is evident that such loss would be of no benefit to the Santa Fe-Pennsylvania as owners of the Western. We are convinced that the benefits to be derived from the operation of Western under the control of the Santa Fe and the Pennsylvania as proposed will be in furtherance of the over-all national transportation policy declared by the Congress, and its consummation will not unduly curtail competition in connection with the other carriers. *Compare McLean Trucking Co. v. U. S.*, 321 U. S. 67.

Passenger service—The Rock Island also has a major concern in that it has made commitments in passenger operations to and from Peoria, and has only recently inaugurated a new train between Peoria and Chicago. The Rock Island fears that with the Santa Fe in 50 per cent control of Western, its Peoria passenger business is in jeopardy, and, at the hearing, suggested that the Santa Fe and the Pennsylvania stipulate to a condition that no passenger service would be operated on the Western without application to us for approval. The record shows that the Santa Fe and the Pennsylvania do not contemplate providing passenger-train service on Western, and they have not held out any hopes for such service to the people in the area which it serves. Through passenger service via the Santa Fe and the Western could be established at any time without Santa Fe's control of Western. Passenger service is not an issue in this proceeding and the imposition of a condition such as that suggested by the Rock Island is not necessary.

Trackage rights—As stated heretofore, Monon Railroad requests trackage rights over the Pennsylvania if the latter is authorized to participate on an equal basis with Santa Fe in the control of Western. To the extent that the development of the Peoria route draws traffic from the Chicago gateway, Monon contends that it may lose some of the

traffic it now handles through that gateway in common with other carriers similarly situated. Monon further contends that a connection with the Western at Effner would make it possible for Monon to recover such traffic and place it on an equality with its more powerful competitors in the solicitation of business as between the Chicago and Peoria routes. At the hearing a witness for the Monon [fol. 43] stated its position in the premises, but made no effort to describe with any particularity the traffic which might be lost, the carriers over whose lines it moves, its volume, or the areas of origin and destination.

Ordinarily we are without authority to compel one railroad to grant trackage rights over its line to another carrier. See *Baltimore & O. R. Co. Operation*, 261 I. C. C. 535, and *Alabama, T. & N. R. Corp., Construction*, 124 I. C. C. 114. We are of the opinion that the potential loss of traffic by the Monon via the Chicago gateway as a result of our approval of the Santa Fe-Pennsylvania application is too nebulous to warrant the imposition of a condition granting that carrier trackage rights extending its operations for approximately 35 miles into new territory without proof of public convenience and necessity. Accordingly, the request for such a condition is denied.

Prescribed conditions.—The Santa Fe and the Pennsylvania are committed to the maintenance of all existing routes and channels of trade via Western without discrimination. Their announced policy toward Western's other connections is expressed in specific conditions which they have agreed to accept as a part of any order approving their application. Those conditions are as follows:

1. That under the control of Santa Fe and Pennsylvania, Western shall maintain and keep open all routes and channels of trade via existing junctions and gateways unless and until otherwise authorized by us;

2. The present neutrality of handling traffic inbound and outbound and in overhead service by Western shall be continued so as to permit equal opportunity for service to and from all lines reaching the rails of that carrier without discrimination as to routing or movement of traffic, and

without discrimination in the arrangements of schedules or otherwise;

3. The present traffic and operating relationships existing between Western, on the one hand, and all lines connecting with its tracks, on the other, shall be continued insofar as such matters are within the control of the Santa Fe or the Pennsylvania;

4. Western shall accept, handle, and deliver all cars inbound and outbound and in overhead service, loaded and empty, without discrimination in promptness or frequency of service as between cars destined to or received from [fol. 44] competing carriers and irrespective of destination or route of movement;

5. Santa Fe and or Pennsylvania shall not do anything to restrain or curtail the right of industries located on Western to route traffic over any or all existing routes and gateways;

6. Santa Fe and Pennsylvania shall refrain from closing any existing route or channel of trade with any carrier party to this proceeding on account of their control of Western, unless and until otherwise authorized by us; and

7. Any party or any person having an interest in the subject matter may at any future time make application for such modification of the above-stated conditions, or any of them, as may be required in the public interest, and jurisdiction will be retained to reopen the proceeding on our own motion for the same purpose.

The foregoing conditions are broad enough to protect the interests of all lines connecting with Western, and are similar to the conditions imposed in *Detroit, T. & I. R. Co. Control, supra, Savannah & A. Ry. Co. Control*, 282 I. C. C. 39, and *Pacific Coast R. R. Co. Control*, 282 I. C. C. 699, in each of which the same arguments against the effectiveness of such conditions were advanced. The foregoing conditions will be included, by reference, in our order granting the authority herein sought by the Santa Fe and the Pennsylvania.

Purchase price—The Minneapolis contends that the purchase price of $135 per share offered by Santa Fe is neither just nor reasonable, because the consideration for a portion of that amount is in settlement of the dispute pending between the trustees and the Santa Fe as an outgrowth of the validity of the April 15, 1955, letter in which the trustees agreed to dispose of 26 per cent of the stock of Western each to the Santa Fe and the Pennsylvania. The Minneapolis states that its offer to purchase Western's stock at $135 a share is just and reasonable in view of the substantial economies, increased efficiency, improved service, and other benefits which would flow from Minneapolis' control of Western. The stock of Western, being closely held, is not listed on any exchange, but its market value was established on the basis of agreement between a willing seller and a willing buyer. The price proposed to be paid by the Santa Fe and the Pennsylvania is the same as that [fol. 45] offered by the railroads requesting inclusion. The reasonableness of the purchase price is also indicated by the excellent physical and financial condition of Western, its good earnings and operating record, the value of its properties as fixed by us for rate-making purposes, its progressive and able management, and its strategic location which adds to its value as a long-term investment. If $135 per share is the proper price for the Minneapolis to pay, it is fair and reasonable as to the Santa Fe and the Pennsylvania.

State representations—The States of Minnesota and South Dakota, along with their respective Public Service Commissions, intervened in support of the Minneapolis application. They fear that with Western under the control of the Santa Fe and the Pennsylvania, the Peoria route of the Minneapolis will deteriorate to the extent that its low density lines in Minnesota and South Dakota will be in danger of abandonment. On the other hand, the State of Illinois opposes the application of the Minneapolis because of the possibility that the portion of Western's line west of Peoria may be abandoned, and the further reason that such control would have a devastating effect upon the economy of the city of Peoria and the State of Illinois generally. Of course, there can be no abandonment of any

line of railroad without the issuance by us of a certificate of public convenience and necessity permitting such abandonment. So far as the instant record is concerned, no abandonments are presently contemplated.

Wabash control case—In *Wabash R. Co. Control*, 247 I. C. C. 365 and 252 I. C. C. 319, the Pennsylvania and the Pennsylvania Company were authorized to acquire control of the Wabash through ownership of its capital stock subject to conditions, among others, that the Pennsylvania maintain, or cause to be maintained, joint rates, joint routes, interchange points, and channels of trade through gateways of the Wabash then existing, until and unless otherwise authorized by us.

Both the Minneapolis and the Nickel Plate contend that, since the Wabash now has a substantial interchange with the Pennsylvania at Logansport, Ind., and that route will not be placed on a parity with Western's route via Effner, Pennsylvania's proposal to favor Western over Wabash will effectively alter the joint rates and joint routes in con- [fol. 46] travention of the conditions under which the Pennsylvania was permitted to acquire control of the Wabash. They state that the *Wabash Control case* must be reopened and reexamined to determine whether the joint control of Western by the Pennsylvania would be consistent with the public interest and the interest of the Wabash.

The Wabash has not raised the issue. With the imposition of the usual conditions as to the maintenance of existing through routes and channels of trade it supports the Santa Fe-Pennsylvania application. We are unable to find that the granting of that application with the conditions previously stated attached, will lead to violation of the conditions imposed in the *Wabash Control case* or prejudice their effectiveness. While the plan to place Effner on a parity with Chicago, as previously mentioned, will increase the flow of traffic through Effner, such increase will consist of traffic now moving via Pennsylvania through Chicago in which the Wabash does not at present participate. Furthermore, the Pennsylvania in the past has favored Western's route through Effner rather than

the Wabash route through Logansport and there will be no change in this policy.

Clayton Act antitrust violation—The Minneapolis contends that approval of the Santa Fe-Pennsylvania application for authority to acquire control of Western would be in violation of section 10 of the Clayton Act because of the existence of interlocking directors between the Pennsylvania and its subsidiaries, on the one hand, and the Wilmington Trust, a trustee of the McNear estate, on the other. Section 5(11) of the act provides that "the authority conferred by this section shall be exclusive and plenary" and we have on several occasions pointed out that approval of a transaction consistent with the public interest under section 5 renders inoperative any prohibition of Federal, State, or municipal legislation, including the Clayton Act. Furthermore, the issue before us does not involve a purchase by the Pennsylvania from the Wilmington Trust. The Santa Fe is the only purchaser of the stock from the trustees and had no commitments to sell any of it to any other railroad. Before offering to sell a portion of the stock to Pennsylvania several other joint control possibilities were considered and rejected. Under the circumstances, the contention of the Minneapolis in this respect is untenable.

[fol. 47] *Employees*—Counsel for railway labor organizations exacted commitments from all carriers involved herein to abide by the provisions of the Washington Job Protection Agreement of 1936, and our order herein will be conditioned upon compliance with such provisions. The employees unanimously favor the granting of the Santa Fe-Pennsylvania application.

Conclusion—We cannot decide these cases to the satisfaction of all participants. Our duty is to determine the pending matters on the basis of what is consistent with the public interest. It is universally conceded on the record that Western now is a well managed, independently operated railroad furnishing a valuable rail transportation service to the public. Most of the interested parties, including all the shipping witnesses, municipal authorities, and

commercial associations testifying on the subject, favored the continuation of Western in its present status, but the stockholders desire to sell, and without doubt they have that right, so the only question for determination is whether the sale of the stock to the carrier selected by them and the distribution to be made of it thereafter are consistent with the public interest. We have recognized that it is in the public interest for control of a carrier to pass from non-carrier interests, which no longer desire it, to carrier auspices. *Savannah & A. Ry. Co. Control, supra*, and the cases therein cited.

The Santa Fe and the Pennsylvania assert that they are the logical carriers to acquire control of Western, because they are its principal connections. Situated as it is between the Santa Fe at Lomax on the west and the Pennsylvania at Effner on the east, Western receives its long haul and provides a vital direct link essential to the type of through service which is becoming increasingly important not only to the shipping public but to the railroads as well. Fast, strong, and reliable through transportation service is necessary in order for the railroads adequately to compete with the other modes of modern transportation, and Western, as a direct east-west line, supplies the short-line connection for providing this through service with a minimum of delay.

Public interest demands that the present policies of Western in all respects be continued. Any reduction in the ownership interests of the Santa Fe and the Pennsylvania by [fol. 48] the inclusion of other carriers in the control of Western would be accompanied by an equivalent reduction in their economic incentive for the future development of Western and the territory served by it. The case of *Illinois-Missouri Terminal Railway Company et al. Purchase, Etc.*, Finance Docket No. 18752, 295 I. C. C., —, (not printed in full), decided April 2, 1956, relied upon so heavily by the carriers seeking to be included in these proceedings, is distinguishable in that the invitation to participate in the control of the Illinois-Missouri was extended to each and every railroad connecting with that carrier, and all the participants were in agreement as to the manner by which ownership was to be effected and operations were

to be conducted. Such universal agreement is not pres
in the instant applications. No greater protection co
be afforded to carriers interchanging traffic with West
than to have ownership divided equally between the larg
connecting carrier in the east and the largest one in
west. Under this built-in system of checks and balances
is inconceivable for the Santa Fe to permit impairment
service or discriminatory solicitation with respect to ea
ern connections, or the Pennsylvania with respect to we
ern ones. The contract of June 28, 1955, between the Sa
Fe and the Pennsylvania pertaining to the objectives fo
accomplished under their joint control, together with
conditions imposed with respect to the maintenance of
existing routes and channels of trade of Western with
discrimination, is adequate to protect the latter's other c
nections. Only 3 of Western's 16 rail connections oppo
the joint control of the Santa Fe and the Pennsylvan

With the backing of the Santa Fe and the Pennsylvan
there are excellent prospects for locating new industries
Western which will substantially increase the traffic ori
nating and terminating on its line. Western has large ac
ages of potential industrial property in the Peoria ar
and at other points along its line, and with the combin
efforts of the industrial development departments of t
Santa Fe and the Pennsylvania, such property develo
ment may be expected without undue delay.

Several nationally prominent traffic executives of lar
industrial concerns, which annually route a substantial v
ume of traffic via Western, testified in support of San
Fe and Pennsylvania joint ownership. They based the
[fol. 49] support upon the fact that the Santa Fe and t
Pennsylvania are presently rendering excellent servi
in conjunction with Western and that ownership by the
would constitute their best assurance of continued go
service via the combined Santa Fe-Western-Pennsylvan
route, as well as via each of the other connections
Western.

Virtually every one of the shippers and community w
nesses along the line stressed the importance of maintai
ing Western as a separate and independent carrier. Th
are anxious that Western's present management be

tained and favored the plan for local representation on the board of directors. They stressed the desirability of maintaining the existing plant and facilities in the Peoria area, and the desirability of retaining Western's headquarters at Peoria in order to continue the present easy access to management which is of inestimable value to shippers. Each of the city officials and representatives of chambers of commerce of the communities served by Western recognized the advantage of Santa Fe-Pennsylvania ownership as an economic stimulus to the industrial development of their communities. They were joined by business interests which recognized that such industrial development would result in expanding markets.

The Santa Fe and the Pennsylvania representatives on the board of Western will advise and assist Western on matters involving the technique of railroad management and the realization of economies in operation. Western also can expect to realize advantages in connection with its purchases, if it is controlled by two roads which purchase in such large volume as the Santa Fe and the Pennsylvania.

Under joint control by the Santa Fe and the Pennsylvania the supply of freight cars available to Western would be materially increased. The Santa Fe and the Pennsylvania would see to it that the car ownership obligations of Western were met in full, either by having Western increase its car ownership or by increasing their own ownership sufficiently to take care of Western.

Disposition of the applications.—We have before us two applications requesting authority to acquire control of the same carrier. The first filed in point of time reflects a transaction capable of being consummated upon our approval. The second would require further steps before the plan could be consummated. Under no circumstances could [fol. 50] it be consummated unless the first is denied. The Minneapolis has no enforceable contract for the purchase of Western's stock and there is no guarantee that, if the application of the Santa Fe and the Pennsylvania is denied, the trustees automatically would turn to the Minneapolis as the only remaining prospective purchaser. Furthermore, even if the Minneapolis could prevail upon the

trustees to sell their interest in Western, there still would remain a substantial minority of stock in the hands of other holders which the Minneapolis has no assurance that it could acquire. On the present record, it would not be in the public interest to have a minority block of Western stock outstanding in the hands of others.

The Minneapolis relies upon our decisions in *Board. M. & E. R. Co. Control*, 158 I. C. C. 219 and 170 I. C. C. 556, as authority for entertaining its application herein. That case involved an application by the Rock Island to acquire control of the Beaver, Meade, & Englewood Railroad Company through the purchase of capital stock and certain other securities. The Missouri-Kansas-Texas Railroad Company intervened in opposition to the Rock Island application and subsequently filed its own application for the same authority. The intervener had no contract with the stockholders or the owners of the securities, both stock and securities being involved in the sale, but offered to pay the same cash price therefor as offered by the Rock Island. After a joint hearing, as here, we authorized, as in the public interest, the Missouri-Kansas-Texas to acquire the control requested. In determining consistency with the public interest and the national transportation policy we are not shackled in a case like this by the first application filed, if there is presented for our consideration at the same time a different proposal which but for the situation created by the first application might easily be accomplished. The public interest is the prime consideration, and in making that determination we must have regard for all relevant factors.

Consistent with the foregoing, we have carefully considered the evidence and arguments presented relating to both the applications before us and conclude upon the basis of the whole record, and as reflected by this report, that the application of the Santa Fe and the Pennsylvania should be granted subject to the conditions previously al- [fol. 51] luded to herein. With our approval of that application, the possibility of the Minneapolis' acquiring the Western's stock is eliminated and its application becomes moot. Accordingly, the application of the Minneapolis will be dismissed.

We also have considered the request of certain connecting carriers that they be included in the transaction on an equal basis with the successful applicant or applicants and conclude that this would not be in the public interest. Such requests will be denied.

The transaction proposed by the Santa Fe and the Pennsylvania does not contemplate a guaranty or assumption of the payment of dividends or fixed charges, and there will be no increase in total fixed charges.

Findings—We find, subject to the conditions for the protection of railway employees and the maintenance of existing routes and channels of trade referred to herein, that acquisition by The Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Company, and through the latter by The Pennsylvania Railroad Company, of control of the Toledo, Peoria & Western Railroad Company, through ownership of capital stock, in equal amounts, as described herein, is a transaction within the scope of section 5(2) of the Interstate Commerce Act, as amended; that the terms and conditions proposed are just and reasonable; and that the transaction will be consistent with the public interest.

We further find that the application of The Minneapolis & St. Louis Railway Company for authority to acquire control of the Toledo, Peoria & Western Railroad Company, through ownership of capital stock, should be dismissed.

An appropriate order will be entered effective 35 days from the date of service hereof.

EXHIBIT B TO COMPLAINT

ORDER

At a Session of the Interstate Commerce Commission, Division 4, held at its office in Washington, D. C., on the 31st day of May, A. D. 1957.

Finance Docket No. 18991
Toledo, Peoria & Western Railroad Company Control

Finance Docket No. 19086
Toledo, Peoria & Western Railroad Company Control

Investigation of the matters and things involved in these proceedings having been made, a hearing having been held, and said division, on the date hereof, having made and filed a report containing its findings of fact and conclusions thereon, which report is hereby referred to and made a part hereof:

It is ordered, That, subject to the conditions for the protection of railway employees and the maintenance of existing routes and channels of trade referred to in said report, acquisition by The Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Company, and through the latter by The Pennsylvania Railroad Company, of control of the Toledo, Peoria & Western Railroad Company through ownership of capital stock, in equal amounts, upon the terms and conditions in said report found just and reasonable, be, and it is hereby, approved and authorized:

It is further ordered, That the request of the Chicago, Rock Island and Pacific Railroad Company and The New York, Chicago and St. Louis Railroad Company, under section 5(2)(d) of the act, for authority to be included on an equal basis in the acquisition of control, through stock

ownership, of the Toledo, Peoria & Western Railroad Company be, and it is hereby, denied;

It is further ordered, That the application of The Minneapolis & St. Louis Railway Company for authority to acquire control of the Toledo, Peoria & Western Railroad Company, through ownership of capital stock, be, and it is hereby, dismissed;

And it is further ordered, That this order shall take effect and be in force 35 days from the date of service hereof.

By the Commission, division 4.

HAROLD D. McCOY,
Secretary.

[fol. 53]

EXHIBIT C TO COMPLAINT

ORDER

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 30th day of October, A. D. 1957.

Finance Docket No. 18991
Toledo, Peoria & Western Railroad Company Control

Finance Docket No. 19086
Toledo, Peoria & Western Railroad Company Control

It appearing, That by report and order in the above-entitled proceedings, dated May 31, 1957, the Commission, by division 4, authorized, subject to certain protective conditions, The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Company, and through the latter The Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of capital stock, dismissed the ap-

plication of the Minneapolis & St. Louis Railway Company for authority to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of capital stock, and denied the request of the Chicago, Rock Island and Pacific Railroad Company and the New York, Chicago and St. Louis Railroad Company for authority to be included on an equal basis in the acquisition by the Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Company and through the latter The Pennsylvania Railroad Company of control of the Toledo, Peoria & Western Railroad Company;

It further appearing, That on and after July 24, 1957, the Minneapolis & St. Louis Railway Company, the State of South Dakota, the Chicago, Rock Island and Pacific Railroad Company, and the New York, Chicago and St. Louis Railroad Company filed petitions for reargument and reconsideration of said report and order;

It further appearing, That upon the filing of said petitions and pursuant to section 17(8) of the Interstate Commerce Act the aforesaid order was stayed pending disposition of the matter;

It further appearing, That on August 20 and 21, 1957, The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company, certain chamb[fol. 54]bers of commerce and communities, and certain municipalities and shippers along the lines of the Toledo, Peoria & Western Railroad Company, the City of East Peoria; and the City of Peoria, filed replies to the aforesaid petitions;

It further appearing, That on and after August 19, 1957, the Chicago, Rock Island and Pacific Railroad Company and the New York, Chicago & St. Louis Railroad Company, the Railway Labor Executives' Association, and the State of Illinois filed replies to the aforesaid petition of the Minneapolis & St. Louis Railway Company;

It further appearing, That on September 23, 1957, the State of Minnesota and Minnesota Railroad and Warehouse Commission filed a petition for leave to file a peti-

tion for reconsideration and concurrently therewith submitted to the Commission a petition for reconsideration;

And it further appearing, Upon consideration of the record herein, and the contentions set forth in said petitions for reargument and reconsideration (including the petition of the State of Minnesota and Minnesota Railroad and Warehouse Commission) and replies thereto, that there has been presented no error of fact or law with respect to the matters complained of by the petitioners, and that no showing has been made warranting reconsideration or further hearing;

It is ordered, That the petition filed by the State of Minnesota and Minnesota Railroad and Warehouse Commission for leave to file a petition for reconsideration be, and it is hereby granted; and that said petition for reconsideration submitted by the State of Minnesota and Minnesota Railroad and Warehouse Commission be, and it is hereby, accepted for filing;

It is further ordered, That the petitions for reargument and reconsideration be, and they are hereby, denied;

And it is further ordered, That said order dated May 31, 1957, be, and it is hereby, made effective 30 days from the date of service of this order.

By the Commission.

HAROLD D. McCOY,
Secretary.

(SEAL)

[fol. 55]

IN UNITED STATES DISTRICT COURT, DISTRICT OF MINNESOTA
FOURTH DIVISION.

4-57 Civ. 123

THE MINNEAPOLIS AND ST. LOUIS RAILROAD COMPANY, a Minnesota Corporation, Plaintiff,

vs.

THE UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, Defendants,

and

THE STATE OF MINNESOTA and the MINNESOTA RAILROAD AND WAREHOUSE COMMISSION, Intervening Plaintiffs.

COMPLAINT IN INTERVENTION OF THE STATE OF MINNESOTA AND THE MINNESOTA RAILROAD AND WAREHOUSE COMMISSION—Filed December 27, 1957

1. This is a civil action to enjoin, annul, suspend and set aside the Order of Division 4 of the Interstate Commerce Commission issued on May 31, 1957, and the Order of the Interstate Commerce Commission issued on October 30, 1957, in the proceedings entitled "Finance Docket = 18991, Toledo, Peoria and Western Railroad Company Control" and "Finance Docket = 19086, Toledo, Peoria and Western Railroad Company Control".

2. Jurisdiction of this action is conferred upon this Court by the provisions of Title 28, United States Code, Sections 1336, 2284, and 2321-2325, inclusive, which authorizes suits to be brought in the District Courts of the United States against the United States of America to enjoin, annul, suspend and set aside orders of the Interstate Commerce Commission.

3. The State of Minnesota is one of the sovereign States of the United States and the Minnesota Railroad and

Warehouse Commission is one of the departments of government of that state. These petitioners have an interest [fol. 56] in matters before the Interstate Commerce Commission involving the adequacy of service by common carriers by railroads operating in interstate commerce within the State of Minnesota.

4. The plaintiff, the Minneapolis and St. Louis Railroad Company, is a Minnesota corporation engaged in interstate commerce as a common carrier by railroad, subject to the provisions of the Interstate Commerce Act. Plaintiff has its principal offices in the State of Minnesota and operates a railroad between Leola, South Dakota, Minneapolis, Minnesota and Peoria, Illinois. The plaintiff serves 57 communities in Minnesota and its operated mileage in the State of Minnesota amounts to 399 miles.

5. The petitioners were granted leave to intervene before the Interstate Commerce Commission pursuant to their petition for leave to intervene, dated January 30, 1956, supporting the application of the Minneapolis and St. Louis Railroad Company for authority under Section 5(2) of the Interstate Commerce Act to acquire control of the Toledo, Peoria and Western Railroad Company through ownership of its capital stock. The petitioners produced expert testimony in support of the application of the Minneapolis and St. Louis Railroad Company and the petitioners by brief and by argument supported the application of the Minneapolis and St. Louis Railroad Company before the presiding examiner and before Division 4 of the Interstate Commerce Commission.

6. The Orders of the Interstate Commerce Commission dated May 31, 1957, and October 30, 1957, would have serious economic effect on the Minneapolis and St. Louis Railroad Company which would likely have an adverse effect on the petitioners and, further, these orders are not in accordance with the public interest as required by the Interstate Commerce Act.

[fol. 57] Wherefore, the State of Minnesota and the Minnesota Railroad and Warehouse Commission pray:

1. That upon final hearing and determination of this action, the Court adjudge that said Orders of the Interstate Commerce Commission are unlawful and based upon erroneous construction of the Interstate Commerce Act and the National Transportation Policy, and that a decree be entered setting aside, annulling, suspending, and perpetually enjoining, the enforcement, operation and execution of said orders.

2. That the intervening plaintiffs have such other and further relief as may be determined just and equitable by the Court.

Harold J. Soderberg, Assistant Attorney General, Attorney for the Intervening Plaintiffs, 102 State Capitol, Saint Paul 1, Minnesota.

[File endorsement omitted]

[fol. 58]

IN UNITED STATES DISTRICT COURT, DISTRICT OF MINNESOTA, FOURTH DIVISION.

Civil Action No. 4-57 Civil 123

THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY, Plaintiff,

v.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, Defendants.

ANSWER OF THE UNITED STATES OF AMERICA AND THE INTERSTATE COMMERCE COMMISSION—Filed January 31, 1958

The United States of America and the Interstate Commerce Commission (hereinafter referred to as the Commission), defendants, for their answer to the complaint admit, deny, and aver as follows:

I.

Admit the allegations of paragraphs I, II, III, IV, V, and VI.

II.

Answering paragraph VII, the defendants admit that Minneapolis operates approximately 1,400 miles of railroad; that the lines of Minneapolis serve the Minneapolis and Peoria gateways and do not reach the gateways of Chicago, St. Louis or Kansas City; that Minneapolis is predominantly an east west railroad; that Minneapolis bypasses the Chicago area via Peoria; that on the basis of investment, Minneapolis ranked sixtieth in size among the 127 Class I railroads in the Nation in 1955; and that Minneapolis is largely dependent upon agriculture and related products. Defendants aver that they are without knowl- [fol. 59] edge or information sufficient to form a belief as to the truth of all other allegations of said paragraph VII.

III.

Admit the first sentence of paragraph VIII; admit that Pennsylvania Railroad serves the gateways of Chicago and St. Louis; admit the third sentence of paragraph VIII; and deny all other allegations of said paragraph VIII.

IV.

Admit the allegations of paragraph IX.

V.

Admit the allegations of paragraph X, except that the defendants aver that the ownership of Western by Pennsylvania Railroad and Chicago, Burlington & Quincy Railway Company was terminated in 1917 in which year Western went into receivership.

VI.

Admit that on June 10, 1954, and from time to time thereafter to and including May 26, 1955, Minneapolis sought to purchase the stock of Western from the trustees; that said efforts to purchase the stock of Western were begun prior to the initiation by Pennsylvania Railroad or Santa Fe of negotiations with said trustees to purchase

said stock of Western; and deny all other allegations of paragraph XI.

VII.

Deny the relevancy and materiality of the allegations of the first sentence of paragraph XII, but, if deemed relevant and material, admit that there is testimony in the record to the effect that a union of Minneapolis and Western has been discussed and considered prior to 1954 and that the present president of Pennsylvania Railroad had regarded such union favorably, and aver that they are without knowledge or information sufficient to form a belief as to the [fol. 60] truth of all other allegations of said first sentence of paragraph XII. Defendants deny all other allegations of paragraph XII.

VIII.

Deny the relevancy and materiality of the first two subparagraphs of paragraph XIII, but, if deemed relevant and material, admit that there is testimony in the record to the effect that in or about late 1954 or early 1955, the president of Pennsylvania Railroad received information to the effect that the president of Minneapolis was buying into the Monon Railroad with the view of effecting an eventual merger of Minneapolis, Monon and Western; admit that from early 1955 to and including May 26, 1955, one director of Pennsylvania Railroad was at the same time a director of Wilmington Trust Company; admit that three directors of affiliates or subsidiaries of Pennsylvania Railroad were at the same time directors of Wilmington Trust Company; admit that on April 15, 1955, Pennsylvania Railroad, through its wholly owned subsidiary Pennsylvania Company, reached by letter a certain understanding with Jos. W. Chinn, Jr., and J. Seliers Bancroft, who signed with the notation "For the Trustees U/W of George P. McNear, Jr.," regarding the purchase of 23,400 shares of stock or 26 percent of the total number of shares outstanding of Western; admit that Santa Fe, by letter of April 15, 1955, reached a similar understanding for the purchase by it of 23,400 shares or 26 percent of the total

number of shares outstanding of Western; aver that they are without knowledge or information sufficient to form a belief as to the truth of the allegation that "In the negotiation and execution of these contracts Wilmington Trust Company represented the co-trustees."

Defendants deny the relevancy and materiality of, and any requirement to answer, the allegation and conclusion [fol. 61] of the first sentence of the third sub-paragraph of paragraph XIII, and in support of said denial aver that the Commission in its report of May 31, 1957, found that "the issue before us [the Commission] does not involve a purchase by the Pennsylvania from the Wilmington Trust. The Santa Fe is the only purchaser of the stock from the trustees . . ."

Admit that an agreement dated May 26, 1955, was made between Santa Fe and the co-trustees under the will of George P. McNear, Jr. for the sale of all of the stock held by the co-trustees to Santa Fe, subject to the approval of the Commission; that by agreement dated June 28, 1955, Santa Fe, subject to the Commission's approval, agreed to sell to Pennsylvania Company 50 percent of the stock of Western which Santa Fe would be able to purchase, including the co-trustees' stock.

On the basis of the record before the Commission in Finance Dockets 18991 and 19080 and its findings and report, defendants deny all other allegations of paragraph XIII.

IX.

Admit the first and fourth sentences of paragraph XIV; admit that by said application Santa Fe and Pennsylvania Railroad sought authority to acquire control of Western, each to own 50 percent of the capital stock of Western, through exercise of Santa Fe's agreements with the holders of Western's stock and Pennsylvania Company's agreement with Santa Fe; and deny all other allegations of said paragraph XIV. The defendants respectfully refer to the report of the Commission (Division 4) appended to the complaint as "Exhibit A" for a more complete description of the authority sought and the agreements involved.

X.

Admit the allegations of paragraphs XV and XVI.

[fol. 62]

XI.

Admit that on or about November 9, 1956, the proposed report of the Commission's examiner was served, recommending approval of the application of Santa Fe, Pennsylvania Railroad and Pennsylvania Company and dismissal of the application of Minneapolis, and deny all other allegations of paragraph XVII. The defendants respectfully refer to the proposed report for a full and complete statement of the examiner's recommendations with respect to the disposition of the application of Minneapolis.

XII.

Admit the allegations of paragraph XVIII.

XIII.

Admit that by report and order dated May 31, 1957, Division 4 of the Commission approved the application of Santa Fe, Pennsylvania Railroad and Pennsylvania Company and dismissed the application of Minneapolis, and deny all other allegations of paragraph XIX. The defendants respectfully refer to the report of the Commission (Division 4) appended to the complaint as Exhibit "A" for a full and complete statement of the reasons and conclusions of the Commission.

XIV.

Admit the allegations of paragraphs XX and XXI.

XV.

Deny each and every allegation in the first paragraph of paragraph XXII and in reply to the sub-paragraphs under paragraph XXII:

(a) Deny the allegations of sub-paragraph (a).

(b) Admit the allegations of the first sentence of sub-paragraph (b), but deny that this action of the Commis-

sion was unlawful for any of the reasons specified in the [fol. 63] first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegations of the second sentence of sub-paragraph (b).

(c) Admit the Commission made no finding of the character stated in the first sentence of sub-paragraph (c), but deny that this action or inaction was unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegation of the second sentence of sub-paragraph (c).

(d) Deny that the basic criteria for determination of the public interest under Section 5(2) of the Interstate Commerce Act compel a grant of the application of Minneapolis and a denial of the application of Santa Fe, Pennsylvania Company and Pennsylvania Railroad. With respect to the second sentence of sub-paragraph (d), aver that the Commission did not depart from established criteria of the public interest.

(e) Deny the allegations of sub-paragraph (e).

(f) Admit that the Commission made no finding of the character indicated in the first sentence of sub-paragraph (f), but deny that this action or inaction by the Commission is unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegations of the second sentence of sub-paragraph (f).

(g) Admit that the Commission made no finding of the character indicated in the first sentence of sub-paragraph (g), but deny that such action or inaction of the Commission is unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason. Deny the allegations of the second sentence of sub-paragraph (g).

(h) Deny the allegations of sub-paragraph (h).

[fol. 64] (i) Deny the allegations of sub-paragraph (i), and respectfully refer to the report of the Commission for a full and complete statement of the Commission's findings.

(j) Deny the allegations of sub-paragraph (j).

(k) Deny the allegations of sub-paragraph (k), and respectfully refer to the report of the Commission for a full and complete statement of the Commission's findings.

(l) Deny the allegations of sub-paragraph (l), and aver that neither the conditions in the *Wabash Control* case nor any issue or matter pertinent thereto are material to this cause.

(m) Deny the allegations of sub-paragraph (m).

(n) Admit that the Commission found that Minneapolis proposal contemplates the disappearance of Western as an "independent and neutral connection for the other 15 carriers with which it (Western) presently works," and deny the allegations of the second and third sentences of sub-paragraph (n).

(o) Admit the Commission made a finding substantially of the character set forth in the first sentence of sub-paragraph (o), but deny that such action of the Commission is unlawful for any of the reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (o).

(p) Admit that the Commission made findings substantially of the character of the first two sentences of sub-paragraph (p), but deny that this action of the Commission is unlawful for any of the reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (p).

(q) Admit that the Commission made findings substantially of the character indicated in the first two sentences of sub-paragraph (q), but deny that such action of the [fol. 65] Commission is unlawful for any reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (q).

(r) Admit the Commission made a finding substantially of the character indicated in the first sentence of sub-

paragraph (r), but deny that such action of the Commission is unlawful for any reasons set forth in the first paragraph of paragraph XXII or for any other reason; deny that there is any unwarranted assumption on the Commission's part that plaintiff has impaired its main line interchange service; and deny all other allegations of sub-paragraph (r).

(s) Deny the allegations of sub-paragraph (s).

(t) Deny that the Commission erred in finding that the price to be paid by Santa Fe and thence by Pennsylvania Company to Santa Fe for Western's stock is fair and reasonable and deny all other allegations of sub-paragraph (t).

(u) On the basis of the record before the Commission in Finance Dockets 18991 and 19086 and its findings and report, deny that there is any violation of Section 10 of the Clayton Act or unlawful conspiracy in the transaction approved by the Commission and deny that a summary denial of the application of Santa Fe, Pennsylvania Company, and Pennsylvania Railroad was warranted for any reason whatsoever.

(v) Deny the allegations of sub-paragraph (v).

(w) Deny the allegations of sub-paragraph (w).

(x) Deny the allegations of sub-paragraph (x), and aver that the Commission accorded full consideration to all factors applicable and material to plaintiff's application.

XVI.

Admit that by order of October 30, 1957, the Commission denied the petition of Minneapolis for reconsideration and reargument, affirmed the order of May 31, 1957, and made [fol. 66] it effective as of December 4, 1957, and deny all other allegations of paragraph XXIII.

XVII.

Aver that inasmuch as the immediate relief has been granted by the restraining order of December 3, 1957, and the Commission's orders of December 13, 1957, postponing

the effective date of its orders, no further answer to paragraph XXIV is required.

XVIII.

Deny the allegations of paragraphs XXV and XXVI.

XIX.

For further answer to the allegations contained in the complaint, the defendants deny that the action of the Interstate Commerce Commission challenged herein is unlawful for the reasons specified in the complaint or for any other reason whatsoever. The defendants aver that the report and orders assailed in the complaint are fully supported and justified by the record, and are valid and lawful in all respects.

Wherefore, the United States and the Commission pray that the relief now sought in the complaint be denied and that the complaint be dismissed.

Victor R. Hansen, Assistant Attorney General; George E. MacKinnon, United States Attorney, 221 Federal Courts Building, St. Paul 2, Minnesota; James E. Kilday, P. James Underwood, Attorneys, Department of Justice, Washington 25, D. C., Attorneys for United States of America.

ANSWER OF THE UNITED STATES OF AMERICA AND THE INTERSTATE COMMERCE COMMISSION TO THE COMPLAINT IN INTERVENTION OF THE STATE OF MINNESOTA AND THE MINNESOTA RAILROAD AND WAREHOUSE COMMISSION—Filed February 17, 1958

The United States of America and the Interstate Commerce Commission, defendants, for their answer to the complaint in intervention admit, deny, and aver as follows:

I.

Admit the allegations of paragraphs 1, 2, 3, 4, and 5 of the complaint.

II.

Deny the allegations of paragraph 6 of the complaint.

III.

For further answer to the allegations contained in the complaint in intervention, the defendants deny that the action of the Interstate Commerce Commission challenged herein is unlawful for the reasons specified in the complaint or for any other reason whatsoever. The defendants aver that the report and orders assailed in the complaint are [fol. 68] fully supported and justified by the record, and valid and lawful in all respects.

Wherefore, the United States and the Interstate Commerce Commission pray that the relief sought in the complaint be denied and that the complaint be dismissed.

Victor R. Hansen, Assistant Attorney General; George E. MacKinnon, United States Attorney, 221 Federal Courts Building, St. Paul 2, Minne

sota; James E. Kilday, P. James Underwood, Attorneys, Department of Justice, Washington 25, D. C., Attorneys for United States of America.

[Title omitted]

ANSWER OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, PENNSYLVANIA COMPANY, AND THE PENNSYLVANIA RAILROAD COMPANY, INTERVENING DEFENDANTS
Filed February 3, 1958

Come Now The Atchison, Topeka and Santa Fe Railway Company, Pennsylvania Company and The Pennsylvania Railroad Company, intervening defendants, and file this their Answer to the Complaint of the Minneapolis & St. Louis Railway Company, Plaintiff in the above proceeding.

I.

Admitted.

II.

Admitted.

III.

Admitted.

IV.

Admitted.

V.

Admitted.

VI.

Admitted.

[fol. 70]

VII.

Admit the Plaintiff operates approximately 1,400 miles of railroad and that its lines serve the Minneapolis and Peoria gateways but do not directly reach Chicago, St. Louis or Kansas City. Deny the materiality of the allegations appearing in the second sub-paragraph of paragraph VII of the Complaint, but to the extent that said allegations may be deemed material to any issue here involved, intervening defendants respectfully refer to the record in this proceeding and to the report of the Interstate Commerce Commission, attached as Exhibit A to the Complaint.

VIII.

Admit the first sentence of paragraph VIII; admit that Pennsylvania Railroad serves the gateways of Chicago and St. Louis; admit the third sentence of paragraph VIII; and deny all other allegations of said paragraph VIII.

IX.

Admitted.

X.

Admit the allegations of paragraph X, except that intervening defendants aver that the ownership of Western by Pennsylvania Railroad and Chicago, Burlington & Quincy Railway Company was terminated in 1917 in which year Western went into receivership.

[fol. 71]

XI.

Admit that on June 10, 1954, and from time to time thereafter to and including May 26, 1955, Minneapolis sought to purchase the stock of Western from the trustees; that said efforts to purchase the stock of Western

were begun prior to the initiation by Pennsylvania Railroad or Santa Fe of negotiations with said trustees to purchase said stock of Western; and deny all other allegations of paragraph XI.

XII.

Deny the materiality of the allegations of the first sentence of paragraph XII, but to the extent that such allegations may be deemed material to any issue here involved, respectfully refer to the record in this proceeding and to the report of the Interstate Commerce Commission, attached as Exhibit A to the Complaint; and deny the allegations of the second sentence.

XIII.

Deny the allegations of the first sub-paragraph of paragraph XIII.

Admit that one director of Pennsylvania Railroad and three directors of affiliates or subsidiaries of Pennsylvania Railroad were also directors of Wilmington Trust Company; admit that on April 15, 1955, two letters, each addressed to Wilmington Trust Company and Guy A. Gladson as Trustees under the Will of George P. McNear, Jr., and relating to the purchase by Pennsylvania Company and Santa Fe, each respectively, of 23,400 shares or a total of 46,800 shares, representing 52 per cent of the outstanding stock of Western, were signed by representatives of the Pennsylvania Company and Santa Fe, respectively, and by Jos. W. Chinn, Jr. and J. Sellers Bancroft of the Wilmington Trust Company for the Trustees (copies [fol. 72] of said letters appear as Exhibits 7-f and 7-g to the Application in Docket No. 18991); and deny all other allegations of the second sub paragraph of paragraph XIII.

Deny the allegations of the third sub-paragraph of paragraph XIII.

Admit that by agreement dated May 26, 1955, the Trustees agreed to sell all of the stock held by them to Santa Fe, subject to the Commission's approval; admit that by agreement dated June 28, 1955, Santa Fe agreed, subject to the Commission's approval, to sell to Pennsylvania Com-

pany 50 per cent of the stock of Western which Santa Fe would be able to purchase, including the stock held by the Trustees; and deny all other allegations of the fourth subparagraph of paragraph XIII.

XIV.

Admit the first and fourth sentences of paragraph XIV; admit that by said Application, Santa Fe and Pennsylvania Railroad sought authority to acquire control of Western, each to own 50 per cent of the capital stock of Western, through exercise of Santa Fe's agreements with the holders of Western's stock and Pennsylvania Company's agreement with Santa Fe; and deny all other allegations of said paragraph XIV. Intervening defendants respectfully refer to the report of the Commission (Division 4) appended to the Complaint as Exhibit A for a more complete description of the authority sought and the agreements involved.

[fol. 73]

XV.

Admitted.

XVI.

Admitted.

XVII.

Admit that on or about November 9, 1956, the proposed report of the Commission's examiner was served, recommending approval of the Application of Santa Fe, Pennsylvania Railroad and Pennsylvania Company, and dismissal of the Application of Minneapolis; and deny all other allegations of paragraph XVII. Intervening defendants respectfully refer to the proposed report for a full and complete statement of the examiner's recommendations with respect to the disposition of the Application of Minneapolis.

XVIII.

Admitted.

XIX.

Admit that by report and order dated May 31, 1957, Division 4 of the Commission approved the Application of Santa Fe, Pennsylvania Railroad and Pennsylvania Company, and dismissed the application of Minneapolis; and deny all other allegations of paragraph XIX. Intervening defendants respectfully refer to the report of the Commission (Division 4) appended to the Complaint as Exhibit A, for a full and complete statement of the reasons and conclusions of the Commission.

[fol. 74]

XX.

Admitted.

XXI.

Admitted, except to aver that Minneapolis' petition for reconsideration and request for oral argument was not affirmed without additional findings or conclusions on the part of the Commission. To the contrary, the Commission by its order of October 30, 1957, expressly found and concluded that, upon consideration of the record and the contentions set forth in the petitions for reargument and reconsideration and the replies thereto, that "there has been presented no error of fact or law with respect to the matters complained of by the petitioners, and that no showing has been made warranting reconsideration or further hearing" (p. 2 of Exhibit C attached to the Complaint).

XXII.

The allegations of paragraph XXII are denied. To the contrary, intervening defendants aver that there was no denial on the part of the Commission to Minneapolis of due process of law to its prejudice and damage, or otherwise; that the Commission's report in said dockets was made with full comparative consideration of the competing Applications; that the actions of the Commission in said dockets were not arbitrary or capricious and did not involve any abuses of discretion; were in full accord with legal standards; were not in excess of statutory jurisdiction; not against the weight of the evidence and lacking support

by substantial evidence; and were not in violation of the [fol. 75] Interstate Commerce Act, the National Transportation Policy, the Administrative Procedure Act, the Sherman Act and the Clayton Act, or any of them, in any respects whatsoever, including particularly the respects enumerated in sub-paragraphs (a) to (x) of paragraph XXII.

Specifically in reply to said sub-paragraphs:

(a) Deny that the Commission failed to accord Minneapolis a comparative consideration of its Application with that of Santa Fe-PRR-Pennsylvania Company. To the contrary, Plaintiff's Application was accorded a comparative hearing and extended consideration as more fully appears from the evidence before the Commission and its findings and conclusions, all as more fully set out in its report of May 31, 1957.

(b) Admit the allegations of the first sentence of sub-paragraph (b), but deny that this action of the Commission was unlawful for any of the reasons specified in the first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegations of the second sentence of sub-paragraph (b).

(c) Admit the Commission made no finding of the character stated in the first sentence of sub-paragraph (c), but deny that this action or inaction was unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegation of the second sentence of sub-paragraph (c).

(d) Deny that the basic criteria for determination of the public interest under Section 5(2) of the Interstate Commerce Act compel a grant of the Application of Minneapolis and a denial of the application of Santa Fe, Pennsylvania [fol. 76] Company and Pennsylvania Railroad. With respect to the second sentence of sub-paragraph (d), aver that the Commission did not depart from established criteria of the public interest.

(e) Deny the allegations of sub-paragraph (e).

(f) Admit that the Commission made no finding of the character indicated in the first sentence of sub-paragraph (f), but deny that this action or inaction by the Commission is unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason whatsoever. Deny the allegations of the second sentence of sub-paragraph (f).

(g) Admit that the Commission made no finding of the character indicated in the first sentence of sub-paragraph (g), but deny that such action or inaction of the Commission is unlawful for the reasons specified in the first paragraph of paragraph XXII or for any other reason. Deny the allegations of the second sentence of sub-paragraph (g).

(h) Deny the allegations of sub-paragraph (h).

(i) Deny the allegations of sub-paragraph (i), and respectfully refer to the report of the Commission for a full and complete statement of the Commission's findings.

(j) Deny the allegations of sub-paragraph (j).

(k) Deny the allegations of sub-paragraph (k), and respectfully refer to the report of the Commission for a full and complete statement of the Commission's findings.

(l) Deny the allegations of sub-paragraph (l), and aver that neither the conditions in the *Wabash Control* case nor any issue or matter pertinent thereto are material to this cause.

(m) Deny the allegations of sub-paragraph (m).

[fol. 77] (n) Admit that the Commission found that Minneapolis' proposal contemplates the disappearance of Western as an "independent and neutral connection for the other 15 carriers with which it (Western) presently works," and deny the allegations of the second and third sentences of sub-paragraph (n).

(o) Admit the Commission made a finding substantially of the character set forth in the first sentence of sub-paragraph (o), but deny that such action of the Commission is

unlawful for any of the reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (o).

(p) Admit that the Commission made findings substantially of the character of the first two sentences of sub-paragraph (p), but deny that this action of the Commission is unlawful for any of the reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (p).

(q) Admit that the Commission made findings substantially of the character indicated in the first two sentences of sub-paragraph (q), but deny that such action of the Commission is unlawful for any reasons set forth in the first paragraph of paragraph XXII or for any other reason, and deny all other allegations of sub-paragraph (q).

(r) Admit the Commission made a finding substantially of the character indicated in the first sentence of sub-paragraph (r), but deny that such action of the Commission is unlawful for any reasons set forth in the first paragraph of paragraph XXII or for any other reason; deny that there is any unwarranted assumption on the Commission's part that Plaintiff has impaired its main line [fol. 78] interchange service; and deny all other allegations of sub-paragraph (r).

(s) Deny the allegations of sub-paragraph (s).

(t) Deny that the Commission erred in finding that the price to be paid by Santa Fe and thence by Pennsylvania Company to Santa Fe for Western's stock is fair and reasonable and deny all other allegations of sub-paragraph (t).

(u) Deny that there is any violation of Section 11 of the Clayton Act or unlawful conspiracy in the transaction approved by the Commission and deny that a summary denial of the Application of Santa Fe, Pennsylvania Company and Pennsylvania Railroad was warranted for any reason whatsoever.

(v) Deny the allegations of sub-paragraph (v).

(w) Deny the allegations of sub-paragraph (w).

(x) Deny the allegations of sub paragraph (x), and aver that the Commission accorded full consideration to all factors applicable and material to Plaintiff's Application.

XXIII.

Admit that by its order of October 30, 1957, the Commission denied Minneapolis' petition for reconsideration and oral argument, affirmed the order of Division 4 dated May 31, 1957, and made it effective as of December 4, 1957; and deny all other allegations of paragraph XXIII. To the contrary, intervening defendants allege that the Commission's said action was lawful in all respects, was taken only after careful consideration of the extensive detailed evidence adduced by Minneapolis in support of its claims, was fully in accord with the substantial public interest involved and in keeping with all considerations properly [fol. 79] applicable to the precedent being established on the record before it. Specifically, the Commission found upon consideration of the record, and the contentions set forth in the petitions for reargument and reconsideration and the replies thereto, that there had been presented "no error of fact or law with respect to the matters complained of by the petitioners, and that no showing" had been made "warranting reconsideration or further hearing."

XXIV.

The effectiveness of the Commission's order having been stayed, no further answer to the allegations of this paragraph are required.

XXV.

Deny the allegations of paragraph XXV.

XXVI.

Deny the allegations of paragraph XXVI.

XXVII.

As a further answer to each and all of the paragraphs, sub-paragraphs and prayers of the Complaint, intervening

defendants allege that no error, legal or factual, appears in respect to the Commission's findings, conclusions and orders in Dockets 18991 and 19086 and that said findings, conclusions and orders are supported by substantial evidence of record and in respect to all issues involved in said two dockets, all parties of record were fully heard, including an extended hearing for the receipt of evidence; [fol. 80] the filing of initial briefs before the Examiner; the issuance of the Examiner's Proposed Report; the filing of Exceptions thereto with briefs and reply briefs; the holding of oral argument; the May 31, 1957 Report of Division 4; the filing of Petitions for Reconsideration; briefs in support thereof; briefs in reply to such petitions; and Defendant's final order of October 30, 1957.

Wherefore, The Atchison, Topeka and Santa Fe Railway Company, Pennsylvania Company, and The Pennsylvania Railroad Company, intervening defendants, pray that the relief sought in Plaintiff's Complaint be denied and that the Complaint be dismissed.

Respectfully submitted,

Edwin A. Lucas, Starr Thomas.

R. S. Outlaw, Starr Thomas and Carl E. Bagge, 80 East Jackson Boulevard, Chicago 4, Illinois, Attorneys for The Atchison, Topeka and Santa Fe Ry. Co.

Edwin A. Lucas and Robert H. Bierma, 1138 Transportation Center, Six Penn Center Plaza, Philadelphia 4, Pennsylvania, Attorneys for The Pennsylvania Railroad Company and Pennsylvania Company.

Richards, Janes, Montgomery & Cobb, 1430 Rand Tower, Minneapolis 2, Minnesota.

[Title omitted]

ANSWER OF NEW YORK, CHICAGO AND ST. LOUIS RAILROAD COMPANY, INTERVENER—Filed December 27, 1957

Comes now The New York, Chicago and St. Louis Railroad Company, intervener herein, and for its answer to the complaint filed herein by The Minneapolis & St. Louis Railway Company (hereinafter called Minneapolis):

I.

Admits the allegations in paragraphs I-X inclusive, of the complaint.

II.

Admits that Minneapolis sought to purchase the stock of Toledo, Peoria & Western Railroad Company (hereinafter called Western); but cannot for lack of information and belief, admit or deny the other allegations in paragraph XI of the complaint.

III.

Admits that a union of Minneapolis and Western had been under consideration and discussion and that Pennsylvania Railroad considered such union favorably, but denies all other allegations in paragraph XII of the complaint.

[fol. 83]

IV.

Admits a change of attitude of the Pennsylvania Railroad, that various contracts were made for purchase of Western stock by Pennsylvania Company, Pennsylvania Railroad, and The Atchison, Topeka and Santa Fe Railway Company (hereinafter called Santa Fe), that there were interlocking relationships between Pennsylvania Rail-

road and Wilmington Trust Company, but for lack of information and belief cannot admit or deny the other allegations in paragraph XIII of the complaint. Avers that the Interstate Commerce Commission erred as a matter of law in failing to undertake an investigation to determine all the facts whether Section 10 of the Clayton Anti trust Act (15 U.S.C. §20) had been violated before said Commission determined the proceedings for control of the Western. Had such investigation been undertaken, this intervener would have had sufficient information to affirm or deny these allegations in paragraph XIII of the complaint.

V.

Admits the allegations in paragraph XIV of the complaint, but alleges that the effort of Pennsylvania and Santa Fe to prevent Minneapolis from acquiring control of Western was only one of the purposes of Pennsylvania and Santa Fe, their major object being to divert traffic to their own lines of railroad.

VI.

Admits the allegations of paragraphs XV-XXI, inclusive, of the complaint, but further avers that it, too, intervened in the proceeding before the Commission requesting an equal share of ownership with any applicant authorized to acquire control of Western. It further avers that it too presented evidence, filed a brief, detailed exceptions, and a petition for reargument and reconsideration, which petition was denied by order of October 30, 1957.

[fol. 84] VII.

Admits the allegations in the opening paragraph of paragraph XXII of the complaint, except that it is without information to affirm or deny a violation of the Sherman Act. As for the subparagraphs of paragraph XXII of the complaint it avers:

(a) it denies the allegations of subparagraph (a).

(b) it admits that the finding in favor of Pennsylvania Santa Fe is unsupported by substantial evidence and is

against the weight of the evidence, but denies all other allegations of subparagraph (b).

(c) it admits that findings in favor of Pennsylvania Santa Fe are without substantial supporting evidence of record and will seriously endanger the future ability of Minneapolis to render service, but denies the other allegations of subparagraph (c).

(d) it denies the allegations of subparagraph (d) that various criteria compel a grant of Minneapolis' application but admits that appropriate criteria under the Interstate Commerce Act and other laws require denial of the Pennsylvania-Santa Fe application for exclusive control of Western.

(e) It admits the allegations of subparagraph (e).

(f) It admits the allegations of subparagraph (f) without admitting that control of Western by Minneapolis would not lessen competition. Further it is without information and belief as to the violation of the Sherman Act.

(g) it admits the allegations of subparagraph (g).

(h) it admits the allegations of subparagraph (h).

(i) it admits the allegations of subparagraph (i).

(j) it admits the allegations of subparagraph (j).

(k) it is without information to affirm or deny a violation of Section 10 of the Clayton Act, but admits that [fol. 85] Commission's action was arbitrary in failing to undertake an investigation to determine all the facts in this respect. It admits that the Commission lacks power and jurisdiction to approve or immunize a transaction in violation of Section 10 of the Clayton Act because such a transaction is unlawful from its inception.

(l) it admits the allegations of subparagraph (l) and avers that the Interstate Commerce Commission erred in authorizing Pennsylvania control of Western so long as Pennsylvania controlled the Wabash Railroad Company

(m) it admits the allegations of subparagraph (m) but asserts in addition that the Commission failed to make essential basic findings as to the competitive situation in the East and as to the effect of increase of the size of the Pennsylvania System and the effect of lessening of competition.

(n) it denies the allegations of subparagraph (n) except as to the finding made by Division 4.

(o) it denies the allegations of subparagraph (o) except as to the finding made by the Commission.

(p) it denies the allegations that there is no substantial evidence to support the finding that other carriers would be adversely affected by the Minneapolis proposal, but admits all other allegations of subparagraph (p).

(q) it admits the allegations of subparagraph (q) that both Western and Minneapolis provide excellent service routes.

(r) it admits the allegations of subparagraph (r).

(s) it admits that Commission approval of the Pennsylvania-Santa Fe application is contrary to the public interest but denies the other allegations of said subparagraph (s).

(t) it denies the allegations of subparagraph (t) on the ground that the added revenues to be gained by diversion of traffic from other carriers and the elimination of competition by the Western supports the amount of the purchase price. It avers that payment of a proportionate (about 8%) share of such purchase price by this intervener is justified to protect its revenues.

(u) it is without information to affirm or deny the allegations of subparagraph (u) because it believes there is insufficient evidence in the record to determine whether Section 10 of the Clayton Act has been violated.

(v) it admits the allegations of subparagraph (v) of the complaint.

(w) it denies the allegations of subparagraph (w) with the explanation that until the Commission holds an investi-

gation to ascertain facts whether Section 10 of the Clayton Act had been violated the Commission cannot determine whether Pennsylvania and Santa Fe are equally barred from having their proposal approved because of failure to present a valid existing written contract.

(x) it denies the allegations of subparagraph (x).

VIII.

Admits the allegations of paragraph XXIII of the complaint.

IX.

Admits the allegations of paragraph XXIV of the complaint, and asserts that immediate relief has been granted pursuant to the restraining order of December 3, 1957 and the Commission's order of December 13, 1957 postponing the effective date of its orders.

X.

On information and belief admits the allegations of paragraph XXV of the complaint.

XI.

Admits the allegations of paragraph XXVI of the complaint.

Wherefore, intervener, The New York, Chicago and St. Louis Railroad Company concurs in the prayer of Minneapolis that a proper Court be constituted and convened, that a decree be entered permanently suspending, enjoining [fol. 87] setting aside, and annulling the aforesaid orders of the Interstate Commerce Commission, that costs be awarded this intervener, and that this intervener be granted such other and further relief as may be just and equitable.

Sullivan, Stringer, Donnelly and Sharood, By Philip Stringer, Attorneys for The New York, Chicago and St. Louis Railroad Company, E 905 First National Bank Building, Saint Paul 1, Minnesota.

Of Counsel, Thomas O. Brokor, P. O. Box 6119, 2010 Terminal Tower, Cleveland 1, Ohio.

[Title omitted]

STATEMENT OF DEFENSE OF THE STATE OF ILLINOIS—
Filed January 30, 1958

I.

That the State of Illinois is one of the sovereign states of the United States and has the right to participate and intervene in proceedings before this Court and before the Interstate Commerce Commission, involving the adequacy of service by common carriers by railroad operating in the State of Illinois, whether in interstate or intrastate commerce.

II.

That the State of Illinois intervened and participated in the proceedings before the Interstate Commerce Commission in Interstate Commerce Commission Finance Docket No. 19086, Toledo, Peoria & Western Railroad Company Control.

III.

That the State of Illinois opposed the application of The Minneapolis & St. Louis Railway Company for acquisition of control of the Toledo, Peoria & Western Railroad Company on the ground that ownership by the Minneapolis & St. Louis would adversely affect the interests of the State of Illinois and be inimical to the continued separate operation of the Toledo, Peoria & Western, particularly in respect to its continued operation west of Peoria, Illinois.

[fol. 93]

IV.

That the Orders of the Interstate Commerce Commission, dated May 31, 1957 and October 30, 1957, which are under attack in this proceeding and against which a temporary restraining order was entered by this Court on

December 3, 1957 are supported by proper findings of fact upon substantial evidence and are in all respects proper Orders of the Commission which upon hearing in this matter should be sustained by this Court.

Wherefore, the State of Illinois prays that, upon final hearing and determination of this action, the Court adjudge that said Orders of the Interstate Commerce Commission are in all respects lawful and valid and that the complaint herein accordingly be dismissed.

Latham Castle, Attorney General of the State of Illinois, and Harry R. Begley, Special Assistant Attorney General, 160 N. LaSalle Street, Chicago (1), Illinois.

INTERVENERS' ANSWER — Filed February 24, 1958

Comes now City of Bushnell, Illinois; Bushnell Chamber of Commerce, Bushnell, Illinois; City of Canton, Illinois; Canton Chamber of Commerce, Canton, Illinois; City of LaHarpe, Illinois; LaHarpe Golden Rule Club, LaHarpe, Illinois; Village of Lomax, Illinois; City of Keokuk, Iowa; Keokuk Chamber of Commerce, Keokuk, Iowa; Keokuk Bridge Commission, Keokuk, Iowa; The Hubinger Company, Keokuk, Iowa; City of Warsaw, Illinois; Warsaw Chamber of Commerce, Warsaw, Illinois; City of Forrest, Illinois; City of Fairbury, Illinois; City of Gridley, Illinois; City of Gilman, Illinois; City of Sheldon, Illinois; City of Watseka, Illinois; City of Eureka, Illinois; Village of Secor, Illinois; City of Chenoa, Illinois; and the City of Washington, Illinois, heretofore allowed by this Court to intervene as defendants herein and for answer to the Complaint of the plaintiff herein, states:

First Defense

1. These intervening defendants admit paragraphs I, II, III, IV, V, X, XV, XVI, XVIII, XX and XXIV of plaintiff's complaint.

[fol. 96] 2. These intervening defendants do not have sufficient information to form a belief and, therefore, deny paragraphs VI, VII, VIII, IX, XI, XII and XXVI of the plaintiff's complaint.

3. These intervening defendants do not have sufficient information to form a belief and, therefore, deny literary paragraphs 1, 2 and 4 of paragraph XIII of plaintiff's complaint, and specifically deny the third literary paragraph of paragraph XIII of plaintiff's complaint.

4. These intervening defendants admit that on July 8, 1955, or thereabouts the Pennsylvania Railroad Company and the Santa Fe filed with the Interstate Commerce Commission an application under Section 5(2) of the Interstate Commerce Act in Finance Docket No. 18991, by which they sought authority to control Western through exercise of their contracts to purchase its stock. It is further admitted that Minneapolis was authorized by order of the Commission dated August 2, 1955, to intervene in Finance Docket No. 18991 and to become a party in opposition to the Pennsylvania-Santa Fe application, but these intervening defendants deny each and every other allegation contained in said paragraph XIV of plaintiff's complaint.

5. These intervening defendants admit that on or about November 10, 1956, an Examiner of the Interstate Commerce Commission served a proposed report recommending the granting of the Pennsylvania-Santa Fe application and the dismissal of that of Minneapolis as alleged in paragraph XVII of plaintiff's complaint, but these defendants deny that the only reason given for the dismissal of the application of Minneapolis was as alleged in said paragraph XVII.

6. These intervening defendants admit that the report and order of May 31, 1957, of Division 4 of the Interstate

[fol. 97] Commerce Commission approved the application of the Pennsylvania-Santa Fe and overruled the objection of Minneapolis thereto and dismissed Minneapolis' application, but deny that the only question for determination was stated by the said Division 4 to be whether the sale of the Western stock to Pennsylvania-Santa Fe was grounded entirely on the asserted "independent" operation of Western through Pennsylvania-Santa Fe control, all as set out in paragraph XIX of plaintiff's complaint.

7. These intervening defendants admit that by order dated October 30, 1957, attached to the plaintiff's complaint as Exhibit C, the Interstate Commerce Commission overruled all of Minneapolis' objections to Pennsylvania-Santa Fe's application and denied Minneapolis' petition for reconsideration and request for oral argument, but deny that the Commission affirmed without additional findings or conclusions the Order of Division 4 dated May 31, 1957, approving the application of Pennsylvania-Santa Fe and dismissing the application of Minneapolis, in that the Commission by its Order of October 30, 1957, expressly found and concluded that upon consideration of the record and the contentions set forth in the petitions for reargument and reconsideration and replies thereto, that "there has been presented no error of fact or law with respect to the matters complained of by the petitioners, and that no showing has been made warranting reconsideration or further hearing." (As appears on page 2 of Exhibit C attached to the plaintiff's complaint.), as alleged in paragraph XXI of plaintiff's complaint.

8. These intervening defendants admit that the Interstate Commerce Commission made certain findings concerning the application of Santa Fe-Pennsylvania in Finance Docket No. 18991, the Minneapolis' intervention [fol. 98] therein and the Minneapolis' application No. 19086, substantially as set out and alleged in sub-paragraphs (b), (e), (f), (g), (n), (o), (p), (q) and (r) of paragraph XXII of the plaintiff's complaint, but deny each and every other allegation contained in said paragraph XXII of the plaintiff's complaint, and allege affirmatively that the findings and order of the Commission were supported by the over

whelming weight of the evidence and were within the jurisdiction of the Interstate Commerce Commission, were made in compliance with the Interstate Commerce Act, the National Transportation Policy and any and all other applicable, constitutional, statutory or common law requirements.

9. These intervening defendants admit that the Interstate Commerce Commission by Order of October 30, 1957, denied Minneapolis' petition for reconsideration and oral argument and affirmed the Order of Division 4 dated May 31, 1957, and made it effective as of December 4, 1957, all as alleged in paragraph XXIII of plaintiff's complaint, but these intervening defendants specifically deny that there were errors in fact and in law upon which the report of Division 4 dated May 31, 1957, were grounded and further deny that there was extensive detailed evidence of record supporting Minneapolis' claims, or that there was substantial public interest in favor of the Minneapolis' application as alleged in said paragraph XXIII.

10. These intervening defendants deny in its entirety paragraph XXV of the plaintiff's complaint.

Second Defense

These intervening defendants in further defense to the complaint of plaintiff herein, state affirmatively that they [fol. 99] are communities, associations, corporations, firms and individuals located along the lines of the Toledo, Peoria & Western Railway Company and as such have an interest in the controversy of this action and the question that was before the Commission as alleged in plaintiff's complaint. These intervening defendants, with the exception of Washington, Illinois, intervened in the actions before the Interstate Commerce Commission as described in the plaintiff's complaint, and appeared for and on behalf of the application of the Santa Fe and Pennsylvania in Finance Docket No. 18991 and appeared in opposition to the application of Minneapolis in Finance Docket No. 19086. Except for the intervention of the states of Minnesota and South Dakota in the hearings before the Interstate Commerce

Commission, all of the public witnesses intervened on behalf of the Santa Fe-Pennsylvania application and in opposition to the Minneapolis' application, and the long and extensive testimony and evidence by the public interveners established abundant evidence that the public interest would best be served by the granting of the Santa Fe-Pennsylvania application and the Commission was entirely justified therefor in the action taken.

Third Defense

These intervening defendants in further defense to the complaint of the plaintiff herein state affirmatively that the transcript of the evidence taken in Finance Docket Nos. 18991 and 19086, which hearing extended over a two-week period of time, the extensive briefs that were filed by the parties therein and the report of the Examiner and the decision of Division 4 of the Commission and the entire [fol. 100] Commission adequately and conclusively establish the fact that the National Transportation Policy and the Interstate Commerce Act required the action taken by the Commission. Each and every finding of the Commission in favor of the Santa Fe-Pennsylvania application was supported by the overwhelming weight of the evidence. Every argument propounded or supported by Minneapolis was fully and adequately answered by the Commission's ruling and were not supported by adequate, competent evidence introduced by Minneapolis.

Wherefore, these intervening defendants having answered the complaint of the plaintiff herein fully, adequately and in its entirety, pray that the complaint of the plaintiff herein be dismissed in its entirety at the cost of the plaintiff, and for such other and further relief as may be equitable in the premises.

Respectfully submitted,

Before Sanborn, Circuit Judge, and Nordbye and Devitt, District Judges.

MEMORANDUM DECISION—September 16, 1958.

Per Curiam.

This is an appeal by the Minneapolis & St. Louis Ry. Co. (Minneapolis) from an order of the Interstate Commerce Commission approving the acquisition of control jointly by the Pennsylvania Company and through the latter, the Pennsylvania Railroad Company (Pennsylvania) and the Atchison, Topeka & Santa Fe Railway Company (Santa Fe) of the Toledo, Peoria & Western Railroad Company (Western) under Section 5(2) of the Interstate [fol. 104] Commerce Commission Act (49 U. S. C. A., Sec. 5(2)). Subsequently, the intervening parties were joined.

The report and decision of the Commission's Division 4, dated May 31, 1957, is recorded in 295 I. C. C. 523. The full Commission denied reconsideration and reargument on October 30, 1957. By these orders the Commission granted the application of the Pennsylvania and Santa Fe, subject to the conditions set out in the footnote*, to acquire

* "1. That under the control of the Santa Fe and the Pennsylvania, the Western shall maintain and keep open all routes and channels of trade via existing junctions and gateways, unless and until otherwise authorized by us;

"2. The present neutrality of handling traffic inbound and outbound and in overhead service by the Western shall be continued so as to permit equal opportunity for service to and from all lines reaching the rails of that carrier, without discrimination as to routing or movement of traffic, and without discrimination in the arrangements of schedules or otherwise;

"3. The present traffic and operating relationships existing between the Western, on the one hand, and all lines connecting with

joint control of the Western, dismissed the application of the Minneapolis & St. Louis Railway Company (Minneapolis) to acquire control of Western through stock ownership, and denied the petitions of New York, Chicago & St. Louis Railroad Company (Nickel Plate) and the Chicago, Rock Island and Pacific Railroad Company (Rock Island) for participation in the stock ownership and control of Western.

Western is approximately 240 miles long. It extends across the northern part of Illinois from Effner on the east through Peoria to Lomax, Illinois, and Keokuk, Iowa, on the west. It connects with the Pennsylvania at Effner, with the Santa Fe at Lomax, with the Rock Island and [fol. 105] the Chicago, Burlington & Quincy (Burlington) at Keokuk, with the Minneapolis and Nickel Plate at Peoria. All told, Western has connections for interchange of traffic with 16 railroads. More than two-thirds of its total revenues are derived from overhead or bridge traffic, traffic that is received from one railroad to be delivered to another. Little of its revenue is produced by purely local traffic.

---

its tracks on the other; shall be continued insofar as such matters are within the control of the Santa Fe or the Pennsylvania;

"4. The Western shall accept, handle, and deliver all cars inbound and outbound and in overhead service, loaded and empty, without discrimination in promptness or frequency of service as between cars destined to or received from competing carriers and irrespective of destination or route of movement;

"5. The Santa Fe and or the Pennsylvania shall not do anything to restrain or curtail the right of industries located on the Western to route traffic over any or all existing routes and gateways;

"6. The Santa Fe and Pennsylvania shall refrain from closing any existing route or channel of trade with any carrier party to this proceeding on account of their control of the Western, unless and until otherwise authorized by us; and

"7. Any party or any person having an interest in the subject matter may at any future time make application for such modification of the above-stated conditions, or any of them, as may be required in the public interest, and jurisdiction will be retained to reopen the proceedings on our own motion for the same purpose."

Western has outstanding 90,000 shares of capital stock, 73,800 of which are held by the trustees of the estate of George P. McNear, Guy A. Gladson and Wilmington Trust Company. McNear had acquired the property in 1927, after the unsuccessful operation of it by Pennsylvania and Burlington had ended in receivership. Under his ownership and operation the road became highly successful and a valuable property. Western occupied a strategic position by passing, as it did, the congested terminals of Chicago and St. Louis. It seems that much of its success came after the construction of a Western connection with the Santa Fe at Lomax. For the year ended June 30, 1955, approximately 70% of the cars of interchange traffic and of Western gross revenues were attributable to the Pennsylvania and the Santa Fe. The Burlington and the New York Central Railroad Company ranked third and fourth in the volume of interchange, and Rock Island, Nickel Plate, and Minneapolis followed, in that order.

The trustees of the McNear Estate proposed to dispose of the capital stock of Western for $135 a share. Santa Fe agreed to pay that price after Minneapolis had offered $133. Santa Fe allowed Pennsylvania to have half of the stock, subject, of course, to approval by the I. C. C. It is apparent that Santa Fe and Pennsylvania did not favor acquisition of Western by Minneapolis or participation in ownership and control by Nickel Plate and Rock Island.

Minneapolis, supported by the Minnesota and South Dakota plaintiffs, contends, in effect, that, under the evi- [fol. 106] dence and the applicable law, the Commission could not approve the acquisition of the control of Western by the Pennsylvania and the Santa Fe, and should have approved the application of Minneapolis, which would have resulted in a consolidation with increased efficiency and economy in management.

Minneapolis argues that the orders in suit are invalid for the following reasons: (1) Pennsylvania had violated Section 10 of the Clayton Act, since it and the Wilmington Trust Company, co-trustee of the McNear estate, had directors in common; (2) the acquisition violates Section 1 of the Sherman Act and Section 7 of the Clayton Act; (3) the Commission failed to accord Minneapolis a true

comparative hearing; and (4) the findings of the Commission lack adequate evidentiary support.

The Nickel Plate, which, with the Rock Island, had intervened in the proceedings before the Commission, requested equal participation and ownership of Western with whichever carrier or carriers might be authorized to acquire stock control. Rock Island did not intervene herein. Nickel Plate argues that the Commission failed to make findings on material issues relating to the effect that control by Pennsylvania and Santa Fe would have on competitors and on the general competitive situation in the industry, and that if control of Western is awarded to any carrier to the exclusion of Nickel Plate, the neutrality of Western will be destroyed, to its detriment and that of Nickel Plate.

The applications for the control of Western were filed under 49 U. S. C. A. Section 5(2), which, so far as pertinent, provides:

> "(a) It shall be lawful, with the approval and authorization of the Commission, as provided in subdivision (b)—
>
> "(i) * * * for any carrier, or two or more carriers jointly, to acquire control of another through ownership of its stock * * *
>
> "(b) * * * If the Commission finds that, subject to such terms and conditions and such modifications as it shall find to be just and reasonable, the proposed transaction is within the scope of subparagraph (a) [fol. 107] and will be consistent with the public interest, it shall enter an order approving and authorizing such transaction, upon the terms and conditions and with the modifications, so found to be just and reasonable: * * *"

Section 5(11) of Title 49 U. S. C. A. contains this provision:

> "* * * any carriers or other corporations, and their officers and employees and any other persons, participating in a transaction approved or authorized under the provisions of this section shall be and they are

hereby relieved from the operation of the antitrust laws and of all other restraints, limitations, and prohibitions of law, Federal, State, or municipal, insofar as may be necessary to enable them to carry into effect the transaction so approved or provided for in accordance with the terms and conditions, if any, imposed by the Commission, and to hold, maintain, and operate any properties and exercise any control or franchises acquired through such transaction. * * *"

From these statutes, it would appear that, notwithstanding the antitrust laws and all other legal restraints or obstacles, the Interstate Commerce Commission may, if it determines that it is consistent with the public interest and with the transportation policy of the United States, authorize a carrier or carriers to acquire control of another carrier by purchase of its capital stock. Since Congress has empowered the Commission, and not the courts, to determine whether the acquisition of control of one carrier by another or by others is consistent with the public interest, the determination of the Commission may not be set aside unless it can be said that there is no rational basis for it. *Canadian Pacific Railway Co.* v. *United States*, 158 F. Supp. 248, 251, 252 and cases cited.

That this Court would or might have arrived at a different conclusion, had it had the duty and responsibility of deciding the controversy between the applicants, is of no consequence.*

It must be remembered that, within the limits of the jurisdiction conferred upon it, the power of a court or an administrative agency to decide questions is not confined [fol. 108] to deciding them correctly. *Thompson* v. *Terminal Shares, Inc.*, 8 Cir., 89 F. 2d 652, 655; *Pittsburgh Plate Glass Co.* v. *National Labor Relations Board*, 8 Cir., 113 F. 2d 698, 701.

* It will be to no purpose to discuss the contentions of Minneapolis that Pennsylvania was primarily motivated in acquiring an interest in Western by a desire to thwart the plans of Minneapolis. The Commission had no authority to direct the trustees to deal with Minneapolis rather than with the other interested purchasers.

"A controversy like this always calls for fresh reminder that courts must not substitute their notions of expedience and fairness for those which have guided the agencies to whom the formulation and execution of policy have been entrusted." *Railroad Commission of Texas* v. *Rowan & Nichols Oil Co.*, 310 U. S. 573, 580-581, 60 S. Ct. 1021, 84 L.Ed. 1368; *Pittsburgh Plate Glass* v. *National Labor Relations Board*, *supra*, 113 F. 2d at 701.

Considering now the contentions of the parties, Minneapolis lays principal stress on the argument that the Pennsylvania and the Wilmington Trust Company, co-trustee of the McNear estate, violated Section 10 of the Clayton Act since each of them had directors in common.** Its position is that while the exemption provision, Section 5(11), quoted above, may be applicable to Section 7 of the Clayton Act, it is not applicable to Section 10.

However, a reading of Section 5(11) would indicate that the authority vested in the Commission is not only broad, but it is explicitly made "exclusive and plenary." The Commission having found that the acquisition of the Santa Fe and Pennsylvania is in the public interest, it would seem to follow that any antitrust restrictions or prohibitions would become inoperative. In passing, it may be pointed out that here the Wilmington Trust Company is functioning in a fiduciary capacity as Trustee in the interest of the beneficiaries of the trust. We do not have a situation where interlocking directors may be enriched by reason of dealings in their securities and thus should be required to sell securities only to a bidder whose "bid is most favorable to the common carrier." Section 10 should be quoted. It reads, in part:

"No common carrier engaged in commerce shall have any dealings in securities, supplies, or other articles

---

** It should be pointed out that it is the Pennsylvania Company, the wholly-owned subsidiary of Pennsylvania Railroad, which seeks to acquire 50% of Western stock. The Pennsylvania Company is not engaged in railroad operations nor does it operate carrier property. Section 10 refers only to a "common carrier engaged in commerce". While this distinction may not be of controlling importance, it should be mentioned.

[fol. 109] of commerce, or shall make or have any contracts for construction or maintenance of any kind, to the amount of more than $50,000, in the aggregate, in any one year, with another corporation, firm, partnership, or association when the said common carrier shall have upon its board of directors or as its president, manager, or as its purchasing or selling officer, or agent in the particular transaction, any person who is at the same time a director, manager, or purchasing or selling officer of, or who has any substantial interest in, such other corporation, firm, partnership, or association, unless and except such purchases shall be made from, or such dealings shall be with, the bidder whose bid is the most favorable to such common carrier, to be ascertained by competitive bidding under regulations to be prescribed by rule or otherwise by the Interstate Commerce Commission." 15 U. S. C. A. P. 20.

A mere reading of this section would indicate that the common directorate which existed between the Wilmington Trust Company and the Pennsylvania Company was not the kind intended by the Congress to be covered by the prohibition. It does not appear to cover the sale of stock held by a trust company to a common carrier. This section apparently was designed to prevent a railroad company from buying securities without receiving competitive bids from prospective sellers. There is no language in Section 10 which pertains to any competitive bidding by the railroad company. In any event, Section 10 is a part of the antitrust laws. See 15 U. S. C. A. P. 12. And the immunity granted by Section 5(11) is applicable thereto.

Finally, it should be added that the United States Supreme Court has made it clear that the Interstate Commerce Commission is vested with authority to relieve proposed acquisitions of one railroad by another from the operations of the antitrust laws. For it to do so is consistent with the conditions set out by the Congress in the National Transportation Policy of 1940. In *McLean Trucking Co. v. United States*, 321 U. S. 67, 64 S. Ct. 370, 88 L. Ed. 544, the Court said at pp. 84-85:

"* * * there can be little doubt that the Commission is not to measure proposals for all-rail or all-motor consolidations by the standards of the anti-trust laws. Congress authorized such consolidations because it recognized that in some circumstances they were ap- [fol. 110] propriate for effectuation of the national transportation policy. It was informed that this policy would be furthered by 'encouraging the organization of stronger units' in the motor carrier industry. And in authorizing those consolidations it did not impair the general policies of the anti-trust laws as a measure of their permissibility."

And on p. 87:

"In short, the Commission must estimate the scope and appraise the effects of the curtailment of competition which will result from the proposed consolidation and consider them along with the advantages of improved service, safer operation, lower costs, etc., to determine whether the consolidation will assist in effectuating the overall transportation policy. Resolving these considerations is a complex task which requires extensive facilities, expert judgment and considerable knowledge of the transportation industry. Congress left that task to the Commission 'to the end that the wisdom and experience of that Commission may be used not only in connection with this form of transportation, but in its coordination of all other forms.' 79 Cong. Rec. 12207. 'The wisdom and experience of that commission,' not of the courts, must determine whether the proposed consolidation is 'consistent with the public interest.' (Citing cases). If the Commission did not exceed the statutory limits within which Congress confined its discretion and its findings are adequate and supported by evidence, it is not our function to upset its order."

While this language was used with reference to consolidation in the motor truck industry, it is applicable here.

However, Minneapolis stresses the alleged stifling com-

petition by the so-called oligopolistic control by two major railroads of a strategic bridge line whose independence heretofore assured Minneapolis access to its most important gateway. It reasons that the mere recital in the findings of the Commission as to the extensive mileage, large revenues, and manifest prosperity of these two great railroad systems, compels the conclusion that the acquisition of Western would violate Section 1 of the Sherman Act and Section 7 of the Clayton Act. Minneapolis contends, therefore, that the Commission must weigh the violation of the anti-trust laws against all other relevant factors and base its conclusion on adequate findings.

At the outset, it may be observed that, merely because these two large railroad systems have acquired a 240-mile [fol. 114] railroad under joint control, does not in and of itself justify a finding that there will be an oligopolistic control which stifles competition. It is not the function of the Commission to determine whether the acquisition of Western by these two railroads will violate the anti-trust Laws. The Commission has not attempted to do so and can make no definitive decision as to whether or not the contemplated transaction will result in a restraint of trade or a monopoly which is forbidden by law. *McLean Trucking Company* v. *United States*, *supra*, 321 U. S. at 79.

Suffice it to say that the Commission did give due consideration to the effect of the acquisition on competing carriers and the possible curtailment of competition, and weighed such factors as against the broad question of public interest. We recognize that the Commission's expertise is not infallible, but where there is no question as to the Commission's having given consideration to the effect of curtailing competition in the light of the National Transportation Act, and where its conclusions are not without substantial foundation, we cannot substitute our judgment for that of this administrative agency. Whether dire competitive consequences will occur, as predicted by Minneapolis and Nickel Plate by reason of the acquisition approved by the Commission, is a matter to which its attention was directed. It concluded that any adverse compet-

tive results were far outweighed by the safe, adequate and efficient services which would inure to the public as a result of such acquisition.

Minneapolis next urges that its application was not given a true comparative consideration by the Commission. The Commission pointed out that the proceedings before it concerned two applications for control. The two applications were consolidated and submitted on a single record and disposed of in one decision. Apparently the lack of contract by Minneapolis with the trustees did not deprive it of a full and complete hearing before the Commission. As noted above, the Commission considered the advantages and disadvantages of integration of Western with [fol. 112] Minneapolis, and with respect thereto it considered and weighed the reasons why the Santa Fe and Pennsylvania proposal was more consistent with public interest. We cannot say that the Commission acted arbitrarily, or that it did not evaluate the two competing proposals in light of the public interest. The advantages to Minneapolis in adding Western to its railway system seem apparent. No doubt Minneapolis would be materially strengthened by its proposed integration with Western. But obviously the advantages to Minneapolis was only one of the considerations and factors which the Commission had to weigh and evaluate.

The plan which Minneapolis proposes is to abolish Western as an independent carrier, and that plan is strongly opposed, not only by the carriers and other defendants who have intervened herein, but also by many communities and industries in Illinois and Iowa, as well as the employees of Western. The removal of the offices of Western and its key personnel to Minneapolis is strongly protested. The large savings which allegedly were to follow upon an integration of Minneapolis and Western, as asserted by Minneapolis, was weighed and considered by the Commission. Likewise, the alleged economic harm which would ensue to other carriers under Minneapolis' plan to establish coordinated schedules between it and the many other lines which intersect with Western was considered by the Commission. Whether upon integration there would be su

a diversion of traffic to Minneapolis which would be harmful to other carriers is a matter that the Court should not attempt to determine. Such questions are peculiarly for the Commission to decide, and we cannot say that the evidence as to such harm is not substantial. It may be noted that, of the $1,770,945 reduction in combined operating expense of Minneapolis and Western if integration took place, $1,327,062 would result from the elimination of some 256 positions now occupied by employees of Western. Whether such economies outweigh the alleged detriment to Western's employees, to its local industries and communi- [fol. 113] ties, and to other carriers, is also a matter which is clearly within the sound judgment of the Commission.

Nickel Plate's principal contention is that the Commission failed to make adequate findings on the general competitive situation, primarily with reference to the eastern territory of the United States. Nickel Plate states that the Commission's failure to analyze the effect on competition when railroads the size of Pennsylvania and Santa Fe take over Western and fail to make specific findings in that regard, is fatal to the validity of its order. However, the Commission was fully cognizant of the competitive situation in the light of the proposed acquisition, but it concluded that the other carriers' interchanging traffic with Western would not be injured. It specifically emphasized the protection which would be afforded carriers exchanging traffic with Western in view of the checks and balances ingrained in a system where the ownership is divided equally between the largest connecting carrier in the East and the largest in the West. If the Commission is sound in its prediction that the connecting and immediate competing carriers of Western will not be injured by the acquisition and that competition generally will not be unduly curtailed, it would not seem necessary for the Commission to discuss the question of any alleged monopolistic threat to the eastern railroads or as to the nation as a whole. None of the so-called eastern railroads have intervened here. Moreover, it may be pointed out that Western is not the only strategic bridge line from the Middlewest to the eastern carriers. There

are other carriers that bisect the same east and west area and are in direct competition with Western. Such factors were undoubtedly given due consideration by the Commission. We cannot say that the Commission's conclusion that the patent self-interest of these two large railroads, with the restrictions imposed upon them in the ownership of Western's operations and an independent railroad tends to insure an operation which will be consistent with the public interest, is erroneous.

[fol. 114] The Commission specifically found that "Public interest demands that the present policies of Western in all respects be continued." It concluded that this result would be attained if the two carriers which had contributed the greatest volume of traffic with Western, one from the East and one from the West, should be accorded joint ownership. As stated, it appears that some 70% of Western's interline traffic is exchanged with these two railroads. This constitutes about two-thirds of Western's total traffic. Nickel Plate has not substantiated its position that the Commission acted arbitrarily in denying it the right to participate in the ownership of Western's stock. The Commission concluded that "Any reduction in the ownership interest of the Santa Fe and the Pennsylvania by the inclusion of other carriers in the control of Western would be accompanied by an equivalent reduction in their economic incentive for future development of Western and the territory served by it." That this deduction is a sound appraisal of the situation cannot be characterized as unsupported by the evidence. It is entirely reasonable to expect that the two carriers, which are largely responsible for the excellent condition of Western today, will, by sheer self-interest continue with the same incentive in the future.

The Commission might have granted the application of Minneapolis for sole control and ownership, which was strenuously opposed by all those carriers who wanted Western to remain independent and neutral. The Commission might have authorized the Rock Island and the Nickel Plate to join the Pennsylvania and the Santa Fe in joint ownership and control of Western. The Commission concluded that the application of Pennsylvania and

Santa Fe was consistent with the public interest and should be granted. That, we think, under the evidence and the Law, it had power to do; and, even if that conclusion was wrong, it cannot be said to be arbitrary or capricious, and is therefore binding upon this Court.

[fol. 115] We have fully considered all of the other arguments and contentions of the parties and conclude that they are, likewise, without merit. The Commission's Order is based on adequate findings supported by substantial evidence in the record before it.

The petitions are dismissed and the temporary restraining order is discharged. A stay of 30 days is granted.

Dated: September 16, 1958.

John B. Sanborn, United States Circuit Judge;
Gunnar H. Nordbye, United States District Judge;
Edward J. Devitt, United States District Judge.

NOTICE OF APPEAL BY THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY TO THE SUPREME COURT OF THE UNITED STATES —Filed October 2, 1958

[fol. 117]

I.

Notice is hereby given that The Minneapolis and St. Louis Railway Company, a Minnesota corporation, the plaintiff above named, hereby appeals to the Supreme Court of the United States from the order dismissing the plaintiff's complaint entered in this action on the 16th day of September, 1958.

This appeal is taken pursuant to 28 U.S.C. § 1253.

II.

The clerk will please prepare a transcript of the record in this cause, for transmission to the Clerk of the Supreme Court of the United States, and include in said transcript the following:

1. The Complaint of the plaintiff herein (including Exhibits A, B & C attached thereto);

2. The Complaint in intervention of the State of Minnesota and Minnesota Railroad and Warehouse Commission;

3. The Answer of United States of America and Interstate Commerce Commission;

4. The Answer of United States of America and Interstate Commerce Commission to the Complaint in Intervention of the State of Minnesota and Minnesota Railroad and Warehouse Commission;

5. The Answer of The Atchison, Topeka & Santa Fe Railway Company, The Pennsylvania Railroad Company and the Pennsylvania Company;

6. The Answer of New York, Chicago & St. Louis Railroad Co.;

7. The Answer of the State of South Dakota and Public Utilities Commission of the State of South Dakota;

8. The Defenses of the City of Peoria, the City of East Peoria, and Peoria Association of Commerce;

9. The Answer of the City of Bushnell, et al.;

10. The complete record of all proceedings before the Interstate Commerce Commission in Finance Docket No. 18991 and Finance Docket No. 19086, pre- [fol. 118] viously certified to the United States District Court by the Secretary of the Interstate Commerce Commission in thirteen packets;

11. Decision and Final Order of the United States District Court, District of Minnesota, Fourth Division, dated September 16, 1958;

12. Notice of Appeal to the Supreme Court of the United States by the Plaintiff.

III.

The following questions are presented by this appeal:

1. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission approving and authorizing acquisition by The Atchison, Topeka & Santa Fe Railway Company and the Pennsylvania Company, and through the latter, by The Pennsylvania Railroad Company, of control, through ownership of capital stock, of the Toledo, Peoria & Western Railroad Company, and dismissing the application of The Minneapolis & St. Louis Railway Company for authority to acquire control, through ownership of capital stock, of the Toledo, Peoria & Western Railroad Company, for the reasons that:

(a) The Interstate Commerce Commission failed to make any findings with respect to a number of material issues;

(b) A number of findings made by the Interstate Commerce Commission are unsupported by substantial evidence; and

(c) A number of the findings made by the Interstate Commerce Commission are contrary to the evi-

dence and are contrary to the sworn testimony of officers of the successful applicants.

2. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason [fol. 119] that the Interstate Commerce Commission arbitrarily, capriciously, and unlawfully failed to give The Minneapolis & St. Louis Railway Company a true comparative hearing, by virtue of the following actions:

(a) The Interstate Commerce Commission ignored the standards of the National Transportation Policy;

(b) The Interstate Commerce Commission erroneously assumed, as an improper standard, without a finding thereon supported by substantial evidence, that continued operation of the Toledo, Peoria & Western Railroad Company by and as a separate company was required and outweighed all the specific standards set out in the National Transportation Policy and in section 5 of the Interstate Commerce Act, as amended; and such erroneous assumption necessarily eliminated full consideration on the merits of the competing application of The Minneapolis & St. Louis Railway Company;

(c) The Interstate Commerce Commission ignored relevant questions of economy, efficient service, the contrasting motives and objectives of the competing applicants, the contrasting interests of the competing applicants in the Peoria Gateway, and the strengthening of individual carriers;

(d) The Interstate Commerce Commission applied different standards with respect to the results which would follow from the grant of either of the competing applications.

3. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders

of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission lacked power to condone a violation of section 10 of the Clayton Act occurring prior to the proceedings before the Commis- [fol. 120] sion, and thus acted erroneously and in excess of its statutory jurisdiction and authority, and for the further reason that the Interstate Commerce Commission failed to make any findings with respect to the fact of such violation.

4. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission purported to sanction a violation of section 1 of the Sherman Act and section 7 of the Clayton Act without giving any consideration to the relevant factors and without articulating or even mentioning considerations which could justify relief from the operation of the antitrust laws under section 5(11) of the Interstate Commerce Act, as amended, and thus acted erroneously and in excess of its statutory jurisdiction and authority.

5. Whether the 3-judge District Court erred in holding that the power of the Interstate Commerce Commission to decide questions within the limits of its jurisdiction included the power to decide such questions incorrectly, without regard to the distinction between questions of law, questions of fact, and mixed questions of law and fact, and without regard to the Interstate Commerce Commission's failure to grant procedural due process to The Minneapolis & St. Louis Railway Company.

NOTICE OF APPEAL BY THE STATE OF MINNESOTA AND THE MINNESOTA RAILROAD AND WAREHOUSE COMMISSION TO THE SUPREME COURT OF THE UNITED STATES—Filed November 12, 1958

[fol. 124] I.

Notice is hereby given that the State of Minnesota and the Minnesota Railroad and Warehouse Commission, Intervening plaintiffs herein, hereby appeal to the Supreme Court of the United States from the order dismissing the plaintiff's complaint entered in this action on the 16th day of September, 1958.

This appeal is taken pursuant to 28 U.S.C. § 1253.

II.

The clerk will please include this notice of appeal in the transcript of the record in this cause which he will prepare for transmission to the Clerk of the Supreme Court of the United States.

III.

As stated in the plaintiff's notice of appeal, the following questions are presented by this appeal

1. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission approving and authorizing acquisition by The Atchison, Topeka & Santa Fe Railway Company and the Pennsylvania Company, and through the latter, by The Pennsylvania Railroad Company, of control, through ownership of capital stock, of the Toledo, Peoria & Western Railroad Company, and dismissing the application of The Minneapolis & St. Louis Railway Company for au-

thority to acquire control, through ownership of capital stock, of the Toledo, Peoria & Western Railroad Company, for the reasons that:

(a) The Interstate Commerce Commission failed to make any findings with respect to a number of material issues;

(b) A number of findings made by the Interstate Commerce Commission are unsupported by substantial evidence; and

[fol. 125] (c) A number of the findings made by the Interstate Commerce Commission are contrary to the evidence and are contrary to the sworn testimony of officers of the successful applicants.

2. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission arbitrarily, capriciously, and unlawfully failed to give The Minneapolis & St. Louis Railway Company a true comparative hearing, by virtue of the following actions:

(a) The Interstate Commerce Commission ignored the standards of the National Transportation Policy;

(b) The Interstate Commerce Commission erroneously assumed, as an improper standard, without a finding thereon supported by substantial evidence, that continued operation of the Toledo, Peoria & Western Railroad Company by and as a separate company was required and outweighed all the specific standards set out in the National Transportation Policy and in section 5 of the Interstate Commerce Act, as amended; and such erroneous assumption necessarily eliminated full consideration on the merits of the competing application of The Minneapolis & St. Louis Railway Company;

(c) The Interstate Commerce Commission ignored relevant questions of economy, efficient service, the contrasting motives and objectives of the competing applicants, the contrasting interests of the competing applicants in the Peoria Gateway, and the strengthening of individual carriers;

(d) The Interstate Commerce Commission applied different standards with respect to the results which would follow from the grant of either of the competing applications.

[fol. 126] 3. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission lacked power to condone a violation of section 10 of the Clayton Act occurring prior to the proceedings before the Commission, and thus acted erroneously and in excess of its statutory jurisdiction and authority, and for the further reason that the Interstate Commerce Commission failed to make any findings with respect to the fact of such violation.

4. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission purported to sanction a violation of section 1 of the Sherman Act and section 7 of the Clayton Act without giving any consideration to the relevant factors and without articulating or even mentioning considerations which could justify relief from the operation of the antitrust laws under section 5 (11) of the Interstate Commerce Act, as amended, and thus acted erroneously and in excess of its statutory jurisdiction and authority.

5. Whether the 3-judge District Court erred in holding that the power of the Interstate Commerce Commission to decide questions within the limits of its jurisdiction included the power to decide such questions incorrectly, without regard to the distinction

between questions of law, questions of fact, and mixed questions of law and fact, and without regard to the [fol. 127] Interstate Commerce Commission's failure to grant procedural due process to The Minneapolis & St. Louis Railway Company.

Harold J. Soderberg, Assistant Attorney General, Attorney for the Intervening Plaintiffs, 102 State Capitol, Saint Paul 1, Minnesota.

Notice of Appeal by the State of South Dakota and Public Utilities Commission of the State of South Dakota to the Supreme Court of the United States—Filed November 13, 1958

I.

Notice is hereby given that the State of South Dakota and the Public Utilities Commission of the State of South Dakota, intervening plaintiffs, hereby appeal to the Supreme Court of the United States from the order dismissing the plaintiff's complaint entered in this action on the 16th day of September, 1958.

This appeal is taken pursuant to 28 U.S.C., Section 1253.

II.

The following questions are presented by this appeal:

1. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission approving and authorizing acquisition by The Atchison, Topeka & Santa Fe Railway Company and the Pennsylvania Company, and through the latter, by The Pennsylvania Railroad Company, of control, through ownership of capital stock, of the Toledo, Peoria &

Western Railroad Company, and dismissing the application of The Minneapolis & St. Louis Railway Company for authority to acquire control, through ownership of capital stock, of the Toledo, Peoria & Western Railroad Company, for the reasons that:

(a) The Interstate Commerce Commission failed to make any findings with respect to a number of material issues;

(b) A number of findings made by the Interstate Commerce Commission are unsupported by substantial evidence; and

(c) A number of the findings made by the Interstate Commerce Commission are contrary to the evidence and are contrary to the sworn testimony of officers of the successful applicants.

2. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the [fol. 132] Interstate Commerce Commission arbitrarily, capriciously, and unlawfully failed to give The Minneapolis & St. Louis Railway Company a true comparative hearing, by virtue of the following actions:

(a) The Interstate Commerce Commission ignored the standards of the National Transportation Policy;

(b) The Interstate Commerce Commission erroneously assumed, as an improper standard, without a finding thereon supported by substantial evidence, that continued operation of the Toledo, Peoria & Western Railroad Company by and as a separate company was required and outweighed all the specific standards set out in the National Transportation Policy and in Section 5 of the Interstate Commerce Act, as amended; and such erroneous assumption necessarily eliminated full consideration on the merits of the competing application of The Minneapolis & St. Louis Railway Company;

(c) The Interstate Commerce Commission ignored relevant questions of economy, efficient service, the con-

trasting motives and objectives of the competing applicants, the contrasting interests of the competing applicants in the Peoria Gateway, and the strengthening of individual carriers;

(d) The Interstate Commerce Commission applied different standards with respect to the results which would follow from the grant of either of the competing applications.

3. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission lacked power to condone a violation of Section 10 of the Clayton Act occurring prior to the proceedings before the Commission, and thus acted erroneously and in excess of its statutory jurisdiction and authority, and for the further reason that the Interstate Commerce Commission failed to make any findings with respect to the fact of such violation.

[fol. 433] 4. Whether the 3-judge District Court erred in failing to enjoin, suspend, set aside and annul the orders of the Interstate Commerce Commission, for the reason that the Interstate Commerce Commission purported to sanction a violation of Section 1 of the Sherman Act and Section 7 of the Clayton Act without giving any consideration to the relevant factors and without articulating or even mentioning considerations which could justify relief from the operation of the antitrust laws under Section 5 (11) of the Interstate Commerce Act, as amended, and thus acted erroneously and in excess of its statutory jurisdiction and authority.

5. Whether the 3-judge District Court erred in holding that the power of the Interstate Commerce Commission to decide questions within the limits of its jurisdiction included the power to decide such questions incorrectly, without regard to the distinction between questions of law, questions of fact, and mixed questions of law and fact, and without regard to the Interstate Commerce Commission's

failure to grant procedural due process to The Minneapolis & St. Louis Railway Company.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 18991

APPLICATION OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, THE PENNSYLVANIA RAILROAD COMPANY and PENNSYLVANIA COMPANY for authority under Section 5(2) of the Interstate Commerce Act to acquire control of Toledo, Peoria & Western Railroad Company by purchase of its capital stock.

APPLICATION—Filed July 8, 1955

[fol. 141] *To the Interstate Commerce Commission, Washington, D. C.:*

GENERAL STATEMENT.

This is an application under Section 5(2) of the Interstate Commerce Act for authorization and approval of the acquisition of control of the Toledo, Peoria & Western

Railroad Company* by The Atchison, Topeka and Santa Fe Railway Company* and The Pennsylvania Railroad Company* through purchase of its capital stock by Santa Fe and by Pennsylvania Company, a wholly-owned subsidiary of Pennsylvania Railroad.

Santa Fe has entered into agreements with the holders of 89,296 shares of TP&W stock for purchase of their stock at $135 per share (Exhibits 7, 7-a, 7-b and 7-c). This represents 99.2 per cent of the total of 90,000 shares of [fol. 142] TP&W stock outstanding and Santa Fe expects to complete an agreement for the purchase of the remaining 704 shares at $135 per share in the near future.

By an agreement dated as of June 28, 1955, between Santa Fe, Pennsylvania Railroad and Pennsylvania Company, Santa Fe has agreed to sell to Pennsylvania Company at $135 per share, 45,000 shares of the capital stock of TP&W or such lesser number of shares as will make Santa Fe and Pennsylvania Company each the owner of 50 per cent of the stock of TP&W acquired from all sources (Exhibit 7-d). The agreement also provides for the future operation of TP&W as a separate and independent carrier, soliciting traffic in its own interests and with a majority of its board of directors composed of prominent citizens not connected with applicants; for the maintenance and improvement of its properties, including line and equipment, in keeping with the requirements of a railroad of its character and importance; and for the maintenance of all existing routes and channels of trade via TP&W without discrimination between connecting lines of railroad.

Under the proposed transaction, Santa Fe and Pennsylvania Company will each become the owner of 45,000 shares or 50 per cent of the total outstanding capital stock of TP&W, thus vesting joint control of TP&W in applicants, one-half thereof in Santa Fe and the other half in Pennsylvania Railroad through ownership of the stock by its wholly-owned subsidiary, Pennsylvania Company. The total purchase price for the stock, at $135 per share, will

* The three companies mentioned above are herein sometimes respectively called "TP&W", "Santa Fe", and "Pennsylvania Railroad".

be $12,150,000, representing an expenditure of $6,073,000 each by Santa Fe and Pennsylvania Company.

If Santa Fe is unable to arrange for purchase of the 704 shares of TP&W stock not now covered by purchase agreements, the proposed transaction will involve the acquisition of a total of 89,296 shares, 44,648 each by Santa Fe and [fol. 143] Pennsylvania Company, for a total purchase price of $12,054,960 divided equally between them. The acquisition of this stock, representing 99.2 per cent of the total stock outstanding, would vest control of TP&W jointly in Santa Fe and in Pennsylvania Railroad as the sole owner of Pennsylvania Company.

The transaction proposed will be consistent with and promote the public interest in all respects, as is more fully set forth in a subsequent section hereof (see p. 133).

[fol. 144]

I. Contents of Application.

(a) Identification of applicant, or of each applicant, if there are two or more applicants.

1. The full and correct names of applicants and their business addresses are:

The Atchison, Topeka and Santa Fe Railway Company, 80 East Jackson Boulevard, Chicago 4, Cook County, Illinois.

The Pennsylvania Railroad Company, 1617 Pennsylvania Boulevard, Philadelphia 4, Philadelphia County, Pennsylvania.

Pennsylvania Company, 43 Haverford Station Road, Haverford, Montgomery County, Pennsylvania.

2. Applicants are corporations.

3. Santa Fe and Pennsylvania Railroad are carriers by railroad, subject to Part I of the Interstate Commerce Act; Pennsylvania Company is considered a carrier subject to certain provisions of Part I of the Interstate Commerce Act pursuant to an order in *Wabash Railroad Company Control*, 252 I.C.C. 319 (1942).

4. The properties owned or controlled by Santa Fe are situated in the States of Illinois, Iowa, Missouri, Kansas, Nebraska, Colorado, Oklahoma, Texas, Louisiana, New Mexico, Arizona and California.

The properties owned or controlled by Pennsylvania Railroad are situated in the States of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia and also in the District of Columbia.

Pennsylvania Company exercises control over carriers through ownership of their capital stock but does not operate carrier property.

[fol. 145] 5. The names, titles and business addresses of the officers to whom correspondence with respect to this application should be addressed are:

Starr Thomas, General Attorney and Commerce Counsel, The Atchison, Topeka and Santa Fe Railway Company, 80 East Jackson Boulevard, Chicago 4, Illinois;

Edwin A. Lucas, General Solicitor, The Pennsylvania Railroad Company, 1617 Pennsylvania Boulevard, Philadelphia 4, Pennsylvania.

6. Santa Fe and Pennsylvania Railroad have been continuously engaged in interstate commerce as common carriers by railroad since prior to the enactment of the Transportation Act of 1920. Pennsylvania Company is not a carrier except as stated above.

(b) Information respecting applicant, or each applicant, if there are two or more applicants.

1. (1) Santa Fe was incorporated under the laws of Kansas, December 12, 1895.

Pennsylvania Railroad was incorporated under an act of the Commonwealth of Pennsylvania approved April 13, 1846.

Pennsylvania Company was incorporated under an act of the Commonwealth of Pennsylvania, approved April 7, 1870.

1. (2) The names and business addresses of the Directors of the applicants are:

The entire outstanding capital stock of Pennsylvania Company, consisting of 2,492,500 shares, is owned by Pennsylvania Railroad.

2. Not applicable.

3. Not applicable.

4. Not applicable.

5. Not applicable.

6. Santa Fe has been continuously engaged in interstate commerce as a carrier by railroad since approximately the date it was organized in 1895.

Pennsylvania Railroad has been continuously engaged in interstate commerce during the entire period of its corporate existence since 1846.

The activities of Pennsylvania Company are confined primarily to the ownership of securities of carriers subject

[fol. 151] to the Interstate Commerce Act. It has not operated a railroad since January 1, 1918.

7. Neither the Santa Fe nor Pennsylvania Railroad is owned or controlled by any other corporation or corporations. Pennsylvania Company is controlled by Pennsylvania Railroad through ownership of all of its capital stock other than certain qualifying shares.

8. and 9. The Santa Fe Trail Transportation Company, a motor carrier subject to Part II of the Interstate Commerce Act, whose stock is owned by Santa Fe, owns approximately 32 per cent of the stock of, but does not control, Transcontinental Bus System, Inc., which is also a motor carrier. The measure of control or ownership exercised by Santa Fe over other corporations subject to the Interstate Commerce Act, or over the properties thereof, and also the relationship of Santa Fe to any system or group of corporations, is shown in the following schedules of Santa Fe's 1954 Annual Report to the Commission: 1043, 217, 218, 295 and 383.

The measure of control or ownership exercised by Pennsylvania Railroad and Pennsylvania Company over other carrier corporations subject to the Interstate Commerce Act, or over the properties thereof, is shown in their respective annual reports to the Commission for the year ending December 31, 1954 under Schedules 104, 217, 218 and 220 and to which reference is hereby made. Pennsylvania Railroad is the Parent company in the Pennsylvania Railroad System. The relationship of Pennsylvania Railroad to other members of the Pennsylvania Railroad System, or other groups of corporations, is shown in its annual report to the Commission for the year ending December 31, 1954, to which reference is hereby made.

Pennsylvania Company is a part of the Pennsylvania Railroad system. The relationship of Pennsylvania Company to other members of the Pennsylvania Railroad sys- [fol. 152] tem or other groups of corporations, is shown in its annual report to the Commission for the year ending December 31, 1954 to which reference is hereby made.

10. There are no intercorporate relationships not disclosed in response to prior instructions.

11. Not applicable to Santa Fe.

Pennsylvania Railroad and Pennsylvania Company have identical directors as shown above in item (b)1.(2). The respective officers of both applicants are shown above in item (b)1.(3). However, no authorizations are outstanding in connection with such positions in common since Pennsylvania Company is not subject to Section 20a(12) of the Interstate Commerce Act.

12. As of March 11, 1955, Santa Fe had outstanding 2,483,456 shares of $50 par value preferred stock and 4,854,120 shares of $50 par value common stock. The total number of holders of record on such date of common stock was 39,663 and of the preferred stock, 18,535 or a total of 58,198 stockholders. Each share of stock entitles the owner to one vote and voting rights are attached to no securities other than stock. The total voting power of the Santa Fe's common and preferred stock was 7,337,576 shares.

As of May 11, 1955, the outstanding stock of Pennsylvania Railroad consisted of 13,167,754 shares of common stock with par value of $50 a share. Each share is entitled to one vote at all corporate meetings or elections. No other security holders are entitled to vote. The number of shareholders of record as of May 11, 1955, was 146,711.

As of May 11, 1955, the outstanding capital stock of Pennsylvania Company consisted of 2,492,500 shares of common stock of the par value of $50 a share. Each share is entitled to one vote at all corporate meetings or elections. No other security holders are entitled to vote. The [fol. 153] number of shareholders of record total 23. Of said number, 22 hold stock for qualifying purposes, the remaining shares being in the ownership of The Pennsylvania Railroad Company.

(c) Information respecting the nature of the transaction proposed and the terms and conditions thereof.

1. The proposed transaction for which approval is sought is the joint acquisition of control of TP&W by Santa Fe and Pennsylvania Railroad through purchase of its capital stock in equal amounts by Santa Fe and by

Pennsylvania Company, a wholly-owned subsidiary of Pennsylvania Railroad.

2. The proposed acquisition of control is to be effected by purchase of the stock of TP&W pursuant to certain agreements entered into or being entered into by Santa Fe and the holders thereof and pursuant to an agreement between Santa Fe, Pennsylvania Railroad and Pennsylvania Company which provides for the sale of a part of said TP&W stock by Santa Fe to Pennsylvania Company to the end that each of the two companies shall own 50 per cent of the total amount of stock acquired from all sources.

Santa Fe has entered into agreements for the purchase of 89,296 shares of TP&W stock at $135 per share as follows:

73,800 shares from the Trustees under the Will of George P. McNear, Jr. by agreement dated as of May 26, 1955 (Exhibit 7).

13,142 shares from The Hanover Bank by agreement dated as of June 1, 1955 (Exhibit 7-a).

792 shares, 198 shares each, from Clara McNear Leppo, Miriam McNear Korbel, E. Denman McNear and Louise McNear Naffziger by agreement dated June 2, 1955 (Exhibit 7-b).

[fol. 154] 1,562 shares, 1,035 shares from J. Russel Coulter and 527 shares from the Executors of the Estate of Clinton M. McNear by agreement dated as of June 2, 1955 (Exhibit 7-c).

The 89,296 shares of TP&W stock covered by the aforesaid agreements represent 99.2 per cent of the total of 90,000 shares outstanding and Santa Fe expects to complete an agreement for purchase of the remaining 704 shares in the near future.

The agreement between Santa Fe, Pennsylvania Railroad and Pennsylvania Company, dated as of June 28, 1955 (Exhibit 7-d), provides for the sale by Santa Fe to Pennsylvania Company at $135 per share of 45,000 shares of the capital stock of TP&W or such lesser number of shares as will make Santa Fe and Pennsylvania Company each the owner of 50 per cent of the stock of TP&W acquired from all sources. The agree-

ment also provides for the future operation of TP&W as a separate and independent carrier, soliciting traffic in its own interests and with a majority of its board of directors composed of prominent citizens not connected with applicants; for the maintenance and improvement of its properties, including line and equipment, in keeping with the requirements of a railroad of its character and importance; and for the maintenance of all existing routes and channels of trade without discrimination between connecting lines of railroad.

Each of the agreements described above provides for consummation of the purchase of the stock within a reasonable time after approval by the Commission. The purchase price is to be paid upon delivery of the stock at time of settlement in cash or by certified, cashier's or treasurer's check.

3. There is no financial or other relationship, direct or [fol. 155] indirect, not disclosed in response to prior instructions, existing at the present time between applicants and other parties to the proposed transaction to which this application relates.

4. The route and termini of TP&W are as follows:

From the eastern terminus of Effner at the Illinois-Indiana state line via Peoria, Illinois to the western termini of Lomax, Illinois and Keokuk, Iowa, with a branch from Hamilton, Illinois to Warsaw, Illinois.

The principal points of interchange are with Pennsylvania Railroad at Effner, with Santa Fe at Lomax and with several railroads at Peoria. Other points of interchange are as follows: Keokuk, Iowa; and Sheldon, Webster, Watseka, Gilman, Forrest, Fairbury, Honegger, Chenoa, El Paso, Eureka, Washington, Farmdale, Canton, Cuba, Bushnell, Ferris, Elvaston and Hamilton, all in Illinois.

The mileage of TP&W consists of 234.4 miles of main line and 5 miles of branch line.

5. All the property of TP&W is involved in the proposed acquisition of control.

6. The value of the property of TP&W involved in the proposed transaction, as found by the Commission, and the

net cost of additions and betterments made after valuation date to and including December 31, 1954, are:

Owned and used—Final value (19a 6-30-17)		$ 7,006,050
Owned and not used—Final value (19a 6-30-17)		238,134
Less working capital (19a 6-30-17)	Cr	122,800
Net owned—carrier—6-30-17		7,121,384
Additions and betterments		5,708,109
Total carrier owned		12,829,493
Non-carrier (19a 6-30-17)		16,500
Non-carrier Net additions and betterments		749,974
Total owned—carrier and non-carrier		13,595,967

7. Santa Fe and Pennsylvania Railroad, in compliance with the Commission's Order in Docket No. 15100, adopted [fol. 156] depreciation accounting on road property effective January 1, 1943, and have accrued depreciation on such property since that date.

Contrary to the general practice of railroad companies, TP&W began accruing depreciation on depreciable road property on January 1, 1931 and its accruals up to December 31, 1942 amounted to $702,950. Since January 1, 1943, depreciation on road property has been accrued in accordance with the Commission's regulations. Compared, therefore, to most Class I Railroads, the road depreciation accruals on the balance sheet of TP&W are overstated.

Depreciation rates by classes of property are shown in detail for road and equipment in Schedule 211B of Santa Fe, Pennsylvania Railroad and TP&W Annual Reports filed with the Commission for the year 1954.

8. The stock of TP&W, which Santa Fe and Pennsylvania Company propose to acquire, is not listed on any exchange but its market value has been established at $135 per share by the amounts bid for the stock when recently offered for sale.

9. No obligation or liability with respect to any securities is to be assumed in connection with the proposed transaction.

10. The proposed transaction is not a consolidation or merger.

[fol. 157] (d) Facts and circumstances relied upon to show that the proposed transaction is within the scope of section 5(2)(a) of the Interstate Commerce Act, will be consistent with the public interest, and will otherwise be within the requirements of section 5, particularly:

1. In respect of the proposed transaction applicants state:

(1) The Trustees under the Will of George P. McNear, Jr., owners of 82 per cent of the total outstanding capital stock of TP&W, desire to sell their controlling interest in the company in order to diversify the holdings of the trust estate. Under these circumstances, the acquisition of such control by Santa Fe and Pennsylvania Railroad will definitely promote the public interest. The Commission has recognized that it is in the public interest for control to pass from non-carrier interests, which no longer desire it, to carrier auspices.

Santa Fe and Pennsylvania Railroad are the logical roads to acquire control of TP&W. They are its principal connections. Situated as it is, between Santa Fe and Pennsylvania Railroad, TP&W provides a vital link, essential to the type of through service which is becoming increasingly important not only to the shipping public but to the railroads as well. The tremendous recent expansion of the West and Southwest, the greater portion of which is served by Santa Fe with its own rails, together with the industrial East, a large portion of which is served by Pennsylvania Railroad with its own rails, has placed a premium on fast, strong and reliable through transportation service. TP&W, as a directly east and west line, supplies the short-line connection for providing this through service with a minimum of delay.

By acquiring control of TP&W, Santa Fe and Pennsylvania Railroad will not only strengthen their own freight [fol. 158] service, but will also materially increase the ability of TP&W to serve its own public and its other rail-

road connections. The successful operation of TP&W under the ownership of George P. McNear, Jr. and its development as an important bridge line began with the establishment of the interchange connection with Santa Fe at Lomax, Illinois in 1927. Since that time the through traffic interchanged with Santa Fe at Lomax and Pennsylvania Railroad at Effner has contributed substantially to the prosperity of TP&W. By interchanging with these two roads, TP&W receives a maximum haul. The revenue it receives from traffic interchanged at Lomax and Effner with Santa Fe and Pennsylvania Railroad is substantially greater than its entire revenue from other sources. Control by Santa Fe and Pennsylvania Railroad will assure continuance of this profitable and desirable interchange service. The support of these two strong railroad systems will also increase the stability of TP&W and thus encourage location of new industries along its lines.

(2) The financial consideration involved in the proposed transaction is supported by the good earnings and dividends record of TP&W, by the value of its properties and by the excellent prospects for future growth and development under joint control by Santa Fe and Pennsylvania Railroad. This should insure revenues amply sufficient to meet fixed charges and provide satisfactory net earnings available for dividends. Applicants consider that the purchase of TP&W stock will prove to be a sound and profitable investment. An additional advantage of joint control by applicants will be the retention of future dividend payments within the railroad industry.

(3) The proposed transaction will result in a continuation and improvement of the present transportation service to the public which has been the factor primarily re- [fol. 159] sponsible in building up the traffic volume and earnings of the TP&W, particularly as a bridge route.

(4) No increase in total fixed charges will result from the proposed transaction.

(5) As the proposed transaction will insure continuation of the present independent management and operation of TP&W, it is obviously in the interest of the employees of that carrier.

(6) No guarantee or assumption of payment of dividends or fixed charges is contemplated in the transaction.

2. As the proposed transaction involves railroads, applicants further state:

(1) The public interest will not be adversely affected by not including other railroads in the territory involved in the proposed transaction. The strengthening of TP&W, which will result from the acquisition of control by Santa Fe and Pennsylvania Railroad, will enable it to improve its connecting service with all railroads. Applicants propose to continue the present independent management and operation of TP&W and consummation of the proposed transaction will bring about no change in the TP&W as a route open to all roads on an equal basis. Existing interchange points will be kept open and maintained. Existing through routes and other traffic arrangements will be continued in effect.

(2) Since the present independent management and operation of TP&W will be continued, there is no occasion to impose terms and conditions under Section 5(2)(f) of the Interstate Commerce Act.

(3) Not applicable, as the proposed transaction does not involve a carrier by water subject to Part III of the Interstate Commerce Act.

[fol. 160]

II. Exhibits.

(a) The following exhibits are attached hereto and made a part hereof, or, having been filed in other proceedings, are made a part hereof by reference:

A. A copy of the charter or articles of incorporation of each of the applicants, with all amendments thereof to date, certified by the proper public officer, was filed in Finance Docket applications as follows:

Santa Fe, F. D. 17385;
Pennsylvania Railroad, F. D. 1217;
Pennsylvania Company, F. D. 13235.

Copy of the by-laws of each applicant, with amendments to date, attested by a proper corporate officer, was filed in Finance Docket applications as follows:

Santa Fe, F. D. 18555;
Pennsylvania Railroad, F. D. 18345;
Pennsylvania Company, F. D. 18752.

B. Authenticated copies of the annual reports of Santa Fe, Pennsylvania Railroad, and Pennsylvania Company for the years 1953 and 1954 are attached to the original copy of this application, marked Exhibit B.

(b) The following exhibits are filed with the original application, and with each copy, as a part thereof, except as otherwise stated:

1. Authenticated copies of resolutions of the Board of Directors and the Executive Committee of the Board of Directors of Santa Fe, Pennsylvania Railroad, and Pennsylvania Company are attached hereto and marked Exhibits 1, 1-a, 1-b, 1-c, and 1-d.

2. Resolutions of the Board of Directors of each applicant designating by name and for that purpose the [fol. 161] executive officer by whom this application is signed and verified on its behalf are contained in Exhibits 1-b, 1-c, and 1-d.

3. Not applicable.

4. Not applicable.

5. Opinions of counsel for Santa Fe, Pennsylvania Railroad and Pennsylvania Company indicating that the proposed transaction meets the requirements of law are attached hereto and marked Exhibits 5, 5-a, and 5-b.

6. A map indicating the routes of each applicant and of the TP&W, also showing the carriers connecting with the TP&W, is attached hereto marked as Exhibit 6. There are also transmitted three extra copies of this map for the use of the Commission.

7. Copies of the following contracts which have been entered into pertaining to this transaction are attached hereto:

EXHIBIT 7.

Stock purchase agreement between Santa Fe and the Trustees under the Will of George P. McNear, Jr. See also Exhibit 7-f.

EXHIBIT 7-a.

Stock purchase agreement between Santa Fe and The Hanover Bank.

EXHIBIT 7-b.

Stock purchase agreement between Santa Fe and Clara McNear Leppo, Mirjam McNear Korbel, E. Denman McNear, and Louise McNear Naffziger. See also Exhibit 7-c.

EXHIBIT 7-c.

Stock purchase agreement between Santa Fe and J. Russel Coulter and William McDowell Frederick and Commercial National Bank of Peoria, Executors of the Estate of Clinton M. McNear. See also Exhibit 7-c.

[fol. 162] EXHIBIT 7-d.

Agreement between Santa Fe, Pennsylvania Railroad, and Pennsylvania Company for sale of TP&W stock to Pennsylvania Company. See also Exhibit 7-g.

EXHIBIT 7-e.

Option Agreement between TP&W and individual shareholders, referred to in Exhibits 7-b and 7-c.

EXHIBIT 7-f.

Letter of April 15, 1955, signed by Santa Fe and Jos. W. Chinn and J. Sellers Bancroft for the Trustees under the Will of George P. McNear, Jr. and referred to in Exhibit 7.

EXHIBIT 7-g.

Letter of April 15, 1955 signed by Pennsylvania Company and Jos. W. Chinn and J. Sellers Bancroft for the Trustees under the Will of George P. McNear, Jr. and referred to in Exhibit 7-d.

8. The following general balance sheet statements are attached hereto:

Santa Fe, Exhibit 8;
Pennsylvania Railroad, Exhibit 8-a;
Pennsylvania Company, Exhibit 8-b;
TP&W, Exhibit 8-c.

9. The following income and earned surplus statements are attached hereto:

Santa Fe, Exhibit 9;
Pennsylvania Railroad, Exhibit 9-a;
Pennsylvania Company, Exhibit 9-b;
TP&W, Exhibit 9-c.

10. Not applicable.

11. Not applicable.

12. Not applicable.

[fol. 163] Wherefore, applicants respectfully pray for an order approving this application and authorizing the transaction herein described, pursuant to Section 5(2) of the Interstate Commerce Act.

Respectfully submitted,

The Atchison, Topeka and Santa Fe Railway Company,

By s/ E. S. Marsh,
Its Vice President—Finance.

The Pennsylvania Railroad Company,

By s/ David C. Bevan,
Its Vice President in charge of Finance.

EXHIBIT I TO APPLICATION.

THIS IS TO CERTIFY that at a regular meeting of the Board of Directors of The Atchison, Topeka and Santa Fe Railway Company held in the City of New York, State of New York, on the 26th day of May, 1955, at which meeting there were present twelve Directors, being more than a quorum, the following action was unanimously taken, as appears from the records of said meeting.

RESOLVED, that the resolution adopted by this Board April 26, 1955, authorizing purchase by this Company of 23,400 shares of the capital stock of the Toledo, Peoria & Western Railroad Company is hereby rescinded and that the President is hereby authorized to expend not to exceed Nine Million Nine Hundred Sixty-three Thousand Dollars ($9,963,000.00) for the purchase of 73,800 shares of such

stock from Wilmington Trust Company of Wilmington, Delaware, and Guy A. Gladson of Miami, Florida, Co Trustees under the Will of George P. McNear, Jr., provided, however, that nothing contained in this resolution shall in any way impair the validity of any action taken under said resolution of April 26, 1955;

FURTHER RESOLVED, that this Board hereby authorizes the President or any Vice President to execute a contract or contracts providing for the purchase of such stock of the Toledo, Peoria & Western Railroad Company in such form as the President, with the advice of counsel, shall deem advisable;

FURTHER RESOLVED, that this Board hereby authorizes and approves the making and filing by this Company either severally or jointly with another railroad or railroads of such application or applications as are required by any provisions of the Interstate Commerce Act for the lawful accomplishment of the transaction provided for by said contract or contracts;

[fol. 168] FURTHER RESOLVED, that F. G. Gurley, President, R. G. Rydin, Vice President, J. C. Gibson, Vice President and General Counsel, E. S. Marsh, Vice President-Finance, or R. S. Outlaw, General Solicitor, is hereby authorized and designated to verify and file with the Interstate Commerce Commission such application or applications and to supply such statements or information as shall be appropriate or required in connection therewith.

EXHIBIT 1-A TO APPLICATION.

THIS IS TO CERTIFY that at a meeting of the Executive Committee of the Board of Directors of The Atchison, Topeka and Santa Fe Railway Company held in the City of Chicago, State of Illinois, on the 1st day of June, 1955, at which meeting there were present six Members of the Committee, being more than a quorum, the following action was unanimously taken, as appears from the records of said meeting:

The President stated that pursuant to the Resolution adopted by the Board of Directors on May 26, 1955, this Company had entered into an agreement with the Trustees under the Will of George P. McNear, Jr., to purchase, subject to the approval of the Interstate Commerce Commission, 73,800 shares or 82 per cent of the outstanding capital stock of the Toledo, Peoria & Western Railroad Company for a total purchase price of $9,963,000 and recommended that this Company purchase from the individual and corporate holders thereof the remainder of the capital stock of the said Railroad amounting to 16,200 shares at a purchase price of $135 per share, or a total purchase price of $2,187,000, subject to the approval of the Interstate Commerce Commission.

On motion duly made and seconded, the following resolutions were unanimously adopted:

RESOLVED, That subject to the approval of the Interstate Commerce Commission, this Committee hereby authorizes and approves the purchase by this Company of 16,200 shares of the capital stock of the Toledo, Peoria & Western Railroad Company from the individual and corporate holders thereof at a price of not more than $135 per share, or a total purchase price of $2,187,000, and the execution on behalf of this Company by the President or any Vice President of contracts providing for such purchase in such [fol. 170] form as the President with the advice of counsel shall deem advisable;

FURTHER RESOLVED, That the authority granted by the Board of Directors in its Resolutions adopted May 26,

1955, for the filing, verification, and prosecution of an application or applications under the Interstate Commerce Act for approval of the purchase of 73,800 shares of the capital stock of the Toledo, Peoria & Western Railroad Company, be and the same is hereby expanded to include all such steps as may be necessary to secure approval under the Interstate Commerce Act of the additional purchase of the 16,200 shares of such stock herein authorized.

PENNSYLVANIA COMPANY
Office of the Secretary

I HEREBY CERTIFY that the following is a true and correct copy, from the minutes of action taken at a meeting of the Board of Directors of the above-named Company, held June 22, 1955:

RESOLVED that the Board approves and authorizes the purchase from The Atchison, Topeka and Santa Fe Rail

way Company of 45,000 shares of stock of Toledo, Peoria & Western Railroad Company, or 50% of such lesser number of shares as The Atchison, Topeka and Santa Fe Railway Company may acquire, at a price of not more than $135. per share, or an aggregate purchase price of not exceeding $6,075,000. (plus any taxes and expenses), and the President, any Vice-President, or the Treasurer, is authorized to execute and deliver a contract providing for such purchase, subject to any required approval of the Interstate Commerce Commission, said contract to be in such form and to contain such terms and provisions as may be approved by the officer executing the same, such execution by said officer to be conclusive evidence of his approval thereof.

RESOLVED that J. M. Symes, President, David C. Bevan, Vice-President, or W. R. Gerstnecker, Treasurer, is hereby authorized to sign, verify and file such applications or petitions to the Interstate Commerce Commission as may be required in connection with the purchase of shares of stock of Toledo, Peoria & Western Railroad Company, including an application or petition for joint control of said railroad company, or of its properties.

RESOLVED that the proper officers of the Company are severally authorized to execute, deliver, file, record and approve, or to cause to be executed, delivered, filed, re-
[fol. 176] corded and approved, under the corporate seal of the Company, or otherwise, any and all certificates, instruments, documents and papers, including supplements to or amendments of the above-authorized stock purchase contract, and to do all such acts and things as may be necessary or appropriate to effectuate the foregoing transaction, including taking such action as may be required by orders of the Interstate Commerce Commission.

General Attorney and Commerce Counsel.

[fol. 179]

EXHIBITS 5-A AND 5-B TO APPLICATION.

The Interstate Commerce Commission
Washington 25, D. C.

GENTLEMEN:

As counsel for both The Pennsylvania Railroad Company and Pennsylvania Company, I have examined the Application which is being filed with your Commission for approval and authorization of joint control of the Toledo,

Peoria and Western Railroad Company by The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company through purchase of its capital stock by The Atchison Topeka and Santa Fe Railway Company and Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company.

It is my opinion that the transaction as described in said Application is within the corporate powers of The Pennsylvania Railroad Company and Pennsylvania Company; meets the requirements of the law and will be legally authorized and valid, if approved by the Interstate Commerce Commission.

Respectfully,

/s/ EDWIS A. LUCAS
EDWIS A. LUCAS
Counsel for Applicants, The Pennsylvania Railroad Company and Pennsylvania Company.

EXHIBIT 7 TO APPLICATION.

This Agreement dated as of May 26, 1955, between The Wilmington Trust Company (hereinafter sometimes called the "Trust Company"), a corporation organized under the laws of the State of Delaware, and Guy A. Gladson, an individual, residing in Miami, Florida, Trustees under the Will of George P. McNear, Jr., (hereinafter together called "Trustees"), parties of the first part, and The Atchison, Topeka and Santa Fe Railway Company, a corporation organized under the laws of the State of Kansas (hereinafter called "Santa Fe"), party of the second part,

WITNESSETH:

That on April 15, 1955, Trustees and the Santa Fe exchanged copies of a letter which contemplated the sale of 23,400 shares of the capital stock of the Toledo, Peoria and Western Railroad Company (hereinafter called "T. P. & W.") at a price of $100 per share to Santa Fe for an aggregate purchase price of $2,340,000. A dispute between the parties has subsequently arisen with respect to the legally binding effect of said letter of April 15, 1955. It is the desire of the parties to settle the aforementioned dispute, and to carry out the sale of stock contemplated by said letter in the light and within the intent of such settlement. In addition, Santa Fe wishes to purchase and Trustees desire to sell the remainder of the capital stock of the T. P. & W. now held by Trustees, namely, 50,400 additional shares.

AGREEMENT.

NOW, THEREFORE, for and in consideration of the premises and of the mutual undertakings and obligations herein contained and expressed, the parties agree as follows:

SECTION 1. Pursuant to the objectives of the letter of April 15, 1955, Trustees agree to sell and Santa Fe agrees to buy 23,400 shares of the capital stock of the T. P. & W. at a price of $100 per share, for an aggregate purchase [fol. 182] price of $2,340,000; and in settlement of the dispute regarding the legally binding effect of said letter of

April 15, 1955, Santa Fe agrees to pay to Trustees for said 23,400 shares the additional sum of $35 per share, or an aggregate additional amount of $819,000.

SECTION 2. Trustees agree to sell and Santa Fe agrees to buy an additional 50,400 shares of capital stock of the T. P. & W. (being all of the remaining shares of the T. P. & W. held by Trustees) at a price of $135 per share, for an aggregate purchase price of $6,804,000. It is understood, however, that a question may exist as to the ability of Trustees to sell to Santa Fe 23,400 of said 50,400 shares, but Trustees shall sell and deliver and Santa Fe shall buy and receive said 23,400 shares if, in the opinion of counsel for Santa Fe, Trustees are able to deliver good title to such shares and if, in the opinion of counsel for Trustees, Trustees will not incur liability to others by reason of such sale and delivery.

SECTION 3. The purchase of the stock of T. P. & W. provided in this agreement is subject to the approval of the Interstate Commerce Commission; and Santa Fe agrees that it will promptly file and diligently prosecute an application or applications to the Interstate Commerce Commission for authority to carry out the transaction herein proposed. Trustees will, in all reasonable ways, cooperate with Santa Fe in the prosecution of such application and the assembly of data pertinent to its presentation and consideration. Settlement hereunder shall take place not more than a reasonable time, which shall not exceed sixty days after the order of the Interstate Commerce Commission granting its approval has become effective.

In the event approval of the purchase of the stock of T. P. & W. by Santa Fe shall be denied by the Interstate Commerce Commission and the order of the Commission shall become final, and any proceedings instituted in court [fol. 183] to set aside such an order shall have been finally terminated without said order having been set aside, then this agreement shall cease and determine.

SECTION 4. Trustees represent and warrant to Santa Fe that:

(a) The shares of stock of T. P. & W. delivered to Santa Fe will be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature.

(b) No approval of the sale of said shares of stock is required to be obtained by them, or either of them, from any court, heirs, or other person under the terms of the Will of George P. McNear, Jr., or otherwise.

SECTION 5. Trustees agree that, between the date hereof and the date of settlement, if it is within their power or control, they will not cause or permit T. P. & W., without first obtaining the consent of Santa Fe, to increase the amount of capital stock outstanding of the T. P. & W., impair its capital, waste its assets, declare dividends in excess of earnings of the year in which said dividends are declared and earnings of the year immediately preceding said year available for dividends and not theretofore distributed, make any unusual expenditures, or incur voluntarily any unusual debts or obligations, in an amount sufficient in either case to affect substantially and adversely the value of the stock to be sold pursuant to the terms hereof; except that between the date hereof and the date of settlement or the date December 31, 1957, whichever of the latter two dates is the earlier, no declarations or payments of dividends may be made in any year totaling more than 50 per cent of the net earnings of the T. P. & W. for such year available for dividends; it being understood that in any event quarterly dividends may be declared on the basis of estimated earnings, and to the extent such estimated earnings prove incorrect, appropriate adjustment shall be made in a subsequent dividend or dividends.

[fol. 184] SECTION 6. Settlement hereunder shall be made at the office of the Trust Company in Wilmington, Delaware, or at such other place as Trustees may designate. All transfer taxes with respect to the sale of the stock are to be paid by Trustees. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for transfer of the stock. Payment of the sums provided for in Sections 1 and 2 hereof shall be made by Santa

Fe upon such delivery in cash, or by certified check, or cashier's or treasurer's check to the order of Trustees. If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to Trustees by Santa Fe. If settlement for the stock is made on a date other than a payment date for the payment of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned to the date of settlement, and Santa Fe shall pay to Trustees their pro-rata portion thereof promptly after the receipt of such dividend. The sum payable to Trustees by Santa Fe shall be computed by dividing by ninety the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter-yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed from (but not including) the dividend payment date preceding settlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at time of settlement, the provisions of this section shall survive the settlement.

SECTION 7. This Agreement shall be binding upon and inure to the benefit of the parties hereto, their successors and assigns.

[fol. 185] IN WITNESS WHEREOF, Trustees and Santa Fe have signed and sealed this Agreement, or caused it to be signed and sealed, in triplicate, as of the date first hereinabove written.

EXHIBIT 7-A TO APPLICATION.

This Agreement dated as of June 1, 1955, between The Hanover Bank (hereinafter called the "Bank"), a corporation organized under the laws of the State of New York, party of the first part, and The Atchison, Topeka and Santa Fe Railway Company, a corporation organized under the laws of the State of Kansas (hereinafter called "Santa Fe"), party of the second part,

WITNESSETH:

That pursuant to the oral agreement entered into between the parties on May 27, 1955, and in consideration of the mutual obligations herein contained, the Bank and Santa Fe agree as follows:

SECTION 1. The Bank agrees to sell and Santa Fe agrees to buy 13,142 shares of capital stock of the Toledo, Peoria & Western Railroad Company (hereinafter called "TP&W"), being all of the shares of the TP&W held by the Bank, at a price of $135 per share, for an aggregate purchase price of $1,774,170.

SECTION 2. The purchase of the stock of TP&W provided in this Agreement is subject to the approval of the Interstate Commerce Commission; and Santa Fe agrees that it will promptly file and diligently prosecute an application or applications to the Interstate Commerce Commission for authority to carry out the transaction herein proposed. The Bank will, in all reasonable ways, cooperate with Santa Fe in the prosecution of such application and the assembly of data pertinent to its presentation and consideration. Settlement hereunder shall take place not more than a reasonable time, which shall not exceed sixty days, after the order of the Interstate Commerce Commission granting its approval has become effective.

In the event approval of the purchase of the stock of TP&W, by Santa Fe shall be denied by the Interstate Commerce Commission and the order of the Commission [fol. 187] shall become final, and any proceedings instituted in court to set aside such an order shall have been finally terminated without said order having been set aside, then this agreement shall cease and determine.

SECTION 3. The Bank represents and warrants to Santa Fe that the shares of stock of TP&W delivered to Santa Fe will be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature.

SECTION 4. Settlement hereunder shall be made at the office of the Bank in New York City, New York, or at such other place as the Bank may designate. All transfer taxes with respect to the sale of the stock are to be paid by the Bank. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for transfer of the stock. Payment shall be made by Santa Fe upon such delivery in cash, or by certified check, or cashier's or treasurer's check to the order of the Bank. If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to the Bank by Santa Fe. If settlement for the stock is made on a date other than a payment date for the payment of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned

to the date of settlement, and Santa Fe shall pay to the Bank its pro-rata portion thereof promptly after the receipt of such dividend. The sum payable to the Bank by Santa Fe shall be computed by dividing by ninety the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed [fol. 188] from (but not including) the dividend payment date preceding settlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at time of settlement, the provisions of this section shall survive the settlement.

SECTION 5. This Agreement shall be binding upon and inure to the benefit of the parties hereto, their successors and assigns.

IN WITNESS WHEREOF, the Bank and Santa Fe have signed and sealed this Agreement, or caused it to be signed and sealed, in duplicate, as of the date first hereinabove written.

EXHIBIT 7-B TO APPLICATION.

This Agreement made and entered into as of June 2, 1955, between Clara McNear Leppo, Miriam McNear Korbel, E. Denman McNear, and Louise McNear Naffziger (hereinafter sometimes referred to individually as "Shareholder" and collectively as "Shareholders"), parties of the first part, and Toledo, Peoria & Western Railroad Company, a corporation organized under the laws of the State of Delaware (hereinafter called "TP&W"), party of the second part, and The Atchison, Topeka and Santa Fe Railway Company, a corporation organized under the laws of the State of Kansas (hereinafter called "Santa Fe"), party of the third part,

WITNESSETH:

RECITALS.

Santa Fe wishes to purchase and Shareholders desire to sell all of the capital stock of the TP&W held by Shareholders at a price of $135 per share. By an option agreement dated as of February 15, 1954, between the TP&W and certain individuals, including Shareholders, the Shareholders and the other parties agreed not to sell or otherwise dispose of any portion of the capital stock held by them without first offering to sell such stock to the TP&W. The TP&W does not desire to exercise its rights to purchase such stock under the contract from the individuals who were parties to the agreement or their representatives at $135 per share, and for a consideration of $100 payable by Santa Fe, TP&W is willing to release the Shareholders and such other individuals or their representatives from their obligations under the said option agreement to the extent necessary to permit the sale of such stock to Santa Fe at $135 per share.

[fol. 190]

AGREEMENT.

NOW, THEREFORE, for and in consideration of the premises and of the mutual undertakings and obligations herein contained and expressed, the parties agree as follows:

SECTION 1. Clara McNear Leppo agrees to sell and the Santa Fe agrees to buy 198 shares of the capital stock of the TP&W (being all of said stock held by her) at a price of $135 per share, or an aggregate purchase price of $26,730.

SECTION 2. Miriam McNear Korbel agrees to sell and the Santa Fe agrees to buy 198 shares of the capital stock of the TP&W (being all of said stock held by her) at a price of $135 per share, or an aggregate purchase price of $26,730.

SECTION 3. E. Denman McNear agrees to sell and the Santa Fe agrees to buy 198 shares of the capital stock of the TP&W (being all of said stock held by him) at a price of $135 per share, or an aggregate purchase price of $26,730.

SECTION 4. Louise McNear Naffziger agrees to sell and the Santa Fe agrees to buy 198 shares of the capital stock of the TP&W (being all of said stock held by her) at a price of $135 per share, or an aggregate purchase price of $26,730.

SECTION 5. The purchase of the stock of the TP&W provided in Sections 1 through 4 of this Agreement is subject to the approval of the Interstate Commerce Commission; and Santa Fe agrees that it will promptly file and diligently prosecute an application or applications to the Interstate Commerce Commission for authority to carry out the transactions herein proposed. Each Shareholder will, in all reasonable ways, cooperate with Santa Fe in the prosecution of such application and the assembly of data pertinent to its presentation and consideration. [fol. 191] Settlement hereunder shall take place not more than a reasonable time, which shall not exceed sixty days, after the order of the Interstate Commerce Commission granting its approval has become effective.

In the event approval of the purchase of the stock of TP&W by Santa Fe shall be denied by the Interstate Commerce Commission and the order of the Commission shall become final, and any proceedings instituted in court to set aside such an order shall have been finally terminated without said order having been set aside, then this Agreement shall cease and determine.

SECTION 6. Each Shareholder individually represents and warrants to Santa Fe that the shares of stock of TP&W delivered by him to Santa Fe will be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature.

SECTION 7. Settlement hereunder shall be made at the general offices of Santa Fe at Chicago, Illinois. Each Shareholder shall pay all transfer taxes with respect to the sale of his stock. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for transfer of the stock. Payment shall be made by Santa Fe upon such delivery in cash, or by certified check, or cashier's or treasurer's check to the order of each Shareholder. If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to each Shareholder by Santa Fe. If settlement for the stock is made on a date other than a payment date for the payment of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned to the date of settlement, and Santa Fe shall pay to each Shareholder his pro-rata portion thereof promptly after the receipt of [fol. 192] such dividend. The sum payable to each Shareholder by Santa Fe shall be computed by dividing by ninety the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter-yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed from (but not including) the date of dividend payment preceding settlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at the time of settlement, the provisions of this Section shall survive the settlement.

SECTION 8. For and in consideration of the sum of $100 hereinbefore referred to, the receipt of which from Santa Fe is hereby acknowledged, TP&W agrees to release and relinquish any and all rights accruing to it under

the terms of the option agreement dated as of February 15, 1954, insofar as is necessary to permit Shareholder and the other parties to such agreement to sell and transfer their TP&W stock to Santa Fe at a price of $135 per share, but said option agreement shall in all other respects remain in full force and effect until such sale and transfer have been consummated.

SECTION 9. This Agreement shall be binding upon and inure to the benefit of the parties hereto, their heirs, successors and assigns.

SECTION 10. The masculine pronoun in this Agreement shall be deemed to include the feminine where appropriate.

IN WITNESS WHEREFORE, Shareholders, TP&W, and Santa Fe have signed and sealed this Agreement, or caused it to [fol. 193] be signed and sealed, in six copies, each of which shall constitute an original, as of the date first hereinabove written.

This Agreement made and entered into as of June 2, 1955, between J. Russel Coulter, and William McDowell Frederick, an individual, and Commercial National Bank of Peoria, a national banking association, Executors of the Estate of Clinton M. McNear (hereinafter sometimes referred to individually as "Shareholder" and collectively as "Shareholders"), parties of the first part, and Toledo, Peoria & Western Railroad Company, a corporation organized under the laws of the State of Delaware (hereinafter called "TP&W"), party of the second part, and The Atchison, Topeka and Santa Fe Railway Company, a corporation organized under the laws of the State of Kansas (hereinafter called "Santa Fe"), party of the third part, WITNESSETH:

RECITAL.

Santa Fe wishes to purchase and Shareholders desire to sell all of the capital stock of the TP&W held by Shareholders at a price of $135 per share. By an option agreement dated as of February 15, 1954, between the TP&W and certain individuals, including Shareholders, the Shareholders and the other parties agreed not to sell or otherwise dispose of any portion of the capital stock held by them without first offering to sell such stock to the TP&W. The TP&W does not desire to exercise its rights to purchase such stock under the contract from the individuals who were parties to the agreement or their representatives at $135 per share, and for a consideration of $100 payable by Santa Fe, TP&W is willing to release the Shareholders and such other individuals or their representatives from their obligations under the said option agreement to the extent necessary to permit the sale of such stock to Santa Fe at $135 per share.

[fol. 195]

AGREEMENT.

NOW, THEREFORE, for and in consideration of the premises and of the mutual undertakings and obligations herein contained and expressed, the parties agree as follows:

SECTION 1. J. Russel Coulter agrees to sell and the Santa Fe agrees to buy 1,035 shares of the capital stock of the TP&W (being all of said stock held by him) at a price of $135 per share, or an aggregate purchase price of $139,725.

SECTION 2. William McDowell Frederick, an individual, and Commercial National Bank of Peoria, a national banking association, as Executors of the Estate of Clinton M. McNear, agree to sell and the Santa Fe agrees to buy 527 shares of the capital stock of the TP&W (being all of said stock held by them) at a price of $135 per share, or an aggregate purchase price of $71,145.

SECTION 3. The purchase of the stock of the TP&W provided in Sections 1 and 2 of this Agreement is subject to the approval of the Interstate Commerce Commission; and Santa Fe agrees that it will promptly file and diligently prosecute an application or applications to the Interstate Commerce Commission for authority to carry out the transactions herein proposed. Each Shareholder will, in all reasonable ways, cooperate with Santa Fe in the prosecution of such application and the assembly of data pertinent to its presentation and consideration. Settlement hereunder shall take place not more than a reasonable time, which shall not exceed sixty days, after the order of the Interstate Commerce Commission granting its approval has become effective.

In the event approval of the purchase of the stock of TP&W by Santa Fe shall be denied by the Interstate Commerce Commission and the order of the Commission shall become final, and any proceedings instituted in court [fol. 196] to set aside such an order shall have been finally terminated without said order having been set aside, then this Agreement shall cease and determine.

SECTION 4. Each Shareholder individually represents and warrants to Santa Fe that the shares of stock of TP&W delivered by him to Santa Fe will be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature.

SECTION 5. Settlement hereunder shall be made at the general offices of Santa Fe at Chicago, Illinois. Each

Shareholder shall pay all transfer taxes with respect to the sale of his stock. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for transfer of the stock. Payment shall be made by Santa Fe upon such delivery in cash, or by certified check, or cashier's or treasurer's check to the order of each Shareholder. If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to each Shareholder by Santa Fe. If settlement for the stock is made on a date other than a payment date for the payment of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned to the date of settlement, and Santa Fe shall pay to each Shareholder his pro-rata portion thereof promptly after the receipt of such dividend. The sum payable to each Shareholder by Santa Fe shall be computed by dividing by ninety the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter-yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed from (but not including) the dividend payment date preceding set- [fol. 197] tlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at time of settlement, the provisions of this Section shall survive the settlement.

SECTION 6. For and in consideration of the sum of $100 hereinbefore referred to, the receipt of which from Santa Fe is hereby acknowledged, TP&W agrees to release and relinquish any and all rights accruing to it under the terms of the option agreement, dated as of February 15, 1954, insofar as is necessary to permit Shareholder and the other parties to such agreement to sell and transfer their TP&W stock to Santa Fe at a price of $135 per share, but said option agreement shall in all other respects remain in full force and effect until such sale and transfer have been consummated.

SECTION 7. This Agreement shall be binding upon a
inure to the benefit of the parties hereto, their heirs, su
cessors and assigns.

IN WITNESS WHEREOF, Shareholders, TP&W, and San
Fe have signed and sealed this Agreement, or caused it
be signed and sealed, in five copies, each of which sha
constitute an original, as of the date first hereinabo
written.

EXHIBIT 7-D TO APPLICATION.

This agreement dated as of June 28, 1955, between The Atchison, Topeka and Santa Fe Railway Company, a corporation organized under the laws of the State of Kansas (hereinafter called "Santa Fe"), party of the first part, Pennsylvania Company, a corporation organized under the laws of the Commonwealth of Pennsylvania, party of the second part, and The Pennsylvania Railroad Company, a corporation likewise organized under the laws of the Commonwealth of Pennsylvania, party of the third part,

WITNESSETH:

Whereas, subject to the approval of the Interstate Commerce Commission, Santa Fe by agreement dated as of May 26, 1955, has agreed to purchase for $135 per share all of the capital stock of the Toledo, Peoria & Western Railroad Company, a corporation organized under the laws of the State of Delaware (hereinafter called "TP&W"), held by the Trustees under the Will of George P. McNear, Jr., and has entered into or is entering into like contracts with the owners of the remainder of the 90,000 shares of outstanding capital stock of TP&W, and

Whereas, Pennsylvania Company states that it has entered into a contract dated April 15, 1955, with the Trustees under the Will of George P. McNear, Jr. providing for the sale to it of 23,400 shares of stock of the TP&W at the price of $100 per share, but that said Trustees have refused to acknowledge their obligations under said contract, and Pennsylvania Company now desires to acquire from Santa Fe shares of stock of TP&W in the amounts and upon the terms and conditions hereinafter set forth, but without prejudice to any claims, causes of action or rights which it may have against such Trustees in respect to the said 23,400 shares; and

[fol. 200] Whereas, it is the desire and intention of Santa Fe and Pennsylvania Company each to acquire 50 per cent of so much of the outstanding capital stock of TP&W as may be available for purchase and for the parties to this

agreement to agree as to the future conduct of the operations of TP&W.

NOW, THEREFORE, for and in consideration of the premises and of the mutual undertakings and obligations herein contained and expressed, the parties agree as follows:

SECTION 1. Subject to the approval of the Interstate Commerce Commission, Santa Fe agrees to sell and Pennsylvania Company agrees to buy at $135 per share 45,000 shares of the capital stock of TP&W or 50 per cent of such lesser number of shares as Santa Fe may in fact acquire, to the end that each of the said two companies shall own 50 per cent of the stock acquired from all sources, including those referred to above. Such purchase of stock as herein provided by Pennsylvania Company shall be without prejudice to any claims, causes of action or rights which Pennsylvania Company may have against the Trustees under the Will of George P. McNear, Jr., in respect to said 23,400 shares of the stock of TP&W referred to above, arising out of the circumstances of April 15, 1955; and in the event Pennsylvania Company should acquire from said Trustees all or any of the aforementioned 23,400 shares, then, to the extent of such acquisition by Pennsylvania Company, the obligation hereunder of Santa Fe to sell and of Pennsylvania Company to buy shall be reduced.

SECTION 2. Santa Fe, Pennsylvania Company, and The Pennsylvania Railroad Company agree to file promptly and diligently prosecute a joint application to the Interstate Commerce Commission for authority to carry out the transaction herein provided and to cooperate fully in the assembly of data and the presentation of evidence in support of all aspects of said application. In the event ap- [fol. 201] proval of the purchase of stock of TP&W by Pennsylvania Company shall be denied by the Interstate Commerce Commission, or in the event approval of the purchase of stock of TP&W by Santa Fe shall be denied by the Interstate Commerce Commission, and any such order of the Commission shall have become final, and any proceedings instituted in court to set aside any such order shall have been finally terminated without said order having been set aside, then this agreement and the obligations of the parties hereunder shall cease and determine.

SECTION 3. The Parties hereto, each with the other, and not for the benefit of others not parties hereto, agree that they will exercise their stock ownership of the TP&W to accomplish the following objectives:

(a) TP&W will continue to be operated as a separate and independent carrier with responsible management located along its lines in order to preserve to shippers and communities the present direct access to its officials.

(b) The properties of the TP&W, including line and equipment, will be maintained and improved in keeping with the requirements of a railroad of its character and importance.

(c) TP&W will continue to maintain its own solicitation forces and will be entirely free to solicit traffic in such manner as best to serve the interests of TP&W.

(d) All existing routes and channels of trade via TP&W will be maintained and kept open without discrimination between connecting lines of railroad.

(e) The Board of Directors of TP&W shall consist of eleven members, of whom one shall be the president of the company, two shall be officers of Santa Fe, two shall be officers of Pennsylvania Company or The Pennsylvania Railroad Company or both, and the remaining six shall be prominent citizens not connected with any one of the [fol. 202] parties to this agreement but selected by the parties to this agreement and the subject of mutual agreement between them.

SECTION 4. The parties hereto further agree as follows:

(a) Pennsylvania Company shall not be required to accept and pay for any shares of stock of TP&W sold to it by Santa Fe if in the opinion of counsel for Pennsylvania Company such shares of stock will not at the time of settlement therefor with Pennsylvania Company be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature, unless Santa Fe shall make a warranty to that effect to Pennsylvania Company.

(b) Settlement hereunder shall be made at the passenger station of The Pennsylvania Railroad Company in

Wilmington, Delaware, or at such other place as the parties may agree upon promptly after the transaction provided for herein has been authorized by the Interstate Commerce Commission and Santa Fe has acquired the shares of stock to be sold by it to Pennsylvania Company.

(c) Pennsylvania Company shall pay any transfer taxes and other incidental expenses incurred by Santa Fe in purchasing and transferring to Pennsylvania Company the stock acquired by Pennsylvania Company from Santa Fe hereunder. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for the transfer of the stock. Payment therefor shall be made by Pennsylvania Company upon such delivery in cash or by certified, cashier's or treasurer's check to the order of Santa Fe.

(d) If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to Santa Fe by Pennsylvania Company. If settlement for the stock is made on a date other than a payment date for the payment [fol. 203] of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned to the date of settlement, and Pennsylvania Company shall pay to Santa Fe its pro-rata portion thereof promptly after the receipt of such dividend. The sum payable to Santa Fe by Pennsylvania Company shall be computed by dividing by ninety the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter-yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed from (but not including) the dividend payment date preceding settlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at time of settlement, the provisions of this section shall survive the settlement.

Section 5. Santa Fe, on the one hand, and Pennsylvania Company and The Pennsylvania Railroad Company,

on the other hand, agree that if either party at any future time desires to sell all, or any part, of its ownership of shares of stock of TP&W (other than to a company which is controlled by, controls, or is under common control with it), it will give the other party the first opportunity to purchase such shares at a price equal to the best bona fide offer it can obtain therefor at such time from a third party before selling such shares of stock to a third party. Any such sale to a third party shall not be made until a reasonable time, and in any event not less than ten (10) days, following the receipt by the one party from the other of the two parties, as the case may be, of the prior purchase option herein provided.

SECTION 6. This agreement shall be binding upon and [fol. 204] inure to the benefit of the parties hereto, their successors and assigns.

IN WITNESS WHEREOF, Santa Fe, Pennsylvania Company and The Pennsylvania Railroad Company have caused this agreement to be executed in triplicate as of the date hereinabove written.

EXHIBIT 7-E TO APPLICATION.

THIS AGREEMENT made and entered into as of the fifteenth day of February, 1954, by and between Toledo, Peoria & Western Railroad Company, a corporation organized and existing under the laws of the State of Delaware (hereinafter sometimes referred to as the "Company"), party of the first part, and Elizabeth M. McNear, Clinton M. McNear, Clara McNear Leppo, Miriam M. Korbel, E. Denman McNear, Louise McNear Naffziger, and J. Russel Coulter (hereinafter referred to individually as "Shareholder" and collectively as "Shareholders"), parties of the second part:

WITNESSETH.

WHEREAS, each of the shareholders owns common stock of the Company and desires to insure continuity of management and control of the Company's busjness by providing for reasonable restrictions on the transfer of shares of stock owned by them,

NOW, THEREFORE, in consideration of the sum of Ten Dollars ($10.00) paid by the Company to each of the Sharehoiders, and of the mutual covenants herein contained (the receipt and sufficiency of which are hereby acknowledged), it is mutually covenanted and agreed as follows:

First: Each Shareholder agrees that if during his lifetime he should desire to dispose of any shares of the common stock of the Company at any time owned by him, he shall not sell, transfer or otherwise dispose of the same to any person unless and until he has first offered to sell such stock to the Company upon the terms and conditions hereinafter set forth.

Second: Any Shareholder who desires to sell any shares of common stock of the Company owned by him shall immediately notify the Company in writing of his intention. In such notice the Shareholder shall state the price [fol. 206] and terms at which he is willing to sell such shares, and the Company shall then have the prior right to

purchase such shares from the Shareholder at the same price and terms at any time within 30 days from the date of receipt of such notice. In the event that the Company does not elect to purchase said stock, or fails to notify the Shareholder within the thirty-day period whether or not it elects to purchase it, the Shareholder shall be free to sell and transfer the same at the price specified in said notice. The Company agrees that any shares of stock purchased pursuant to this agreement will be cancelled and retired, and not resold.

Third: Any Shareholder who desires to transfer any of his shares of common stock of the Company by gift to his spouse, or to a child or grandchild of his, may do so without restriction provided that the donee will enter into an agreement identical with this one, either directly or in the case of a minor, through a duly appointed guardian. Any Shareholder who desires to make a gift without that limitation, or to any person other than a spouse or child or grandchild, shall immediately notify the Company in writing of his intention, and the Company shall in such case have the right to purchase the said shares of stock from the Shareholder at the fair market value thereof within sixty (60) days after the date of its receipt of such notice, or, in the event of arbitration as hereinafter contemplated, within ten (10) days after the value thereof is fixed by the arbitrators and accepted by the Shareholder as hereinafter specified. In the event the parties are unable to agree within the sixty-day period on a purchase price representing the fair market value of such stock, the question shall be determined by arbitration. The Shareholder and the Company shall each select one arbitrator, and such arbitrators shall in turn select a third arbitrator. The decision of a majority of such arbitrators shall be [fol. 207] conclusive and binding on all parties hereto, as to the fair market value of such stock. The Shareholder, however, may elect by written notice delivered to the Company within ten (10) days after receiving notice of such decision, to retain the stock, not making either the proposed gift nor the sale to the Company. In the event that the Company does not elect to purchase said stock within such sixty-day period, (or, if there shall have been arbitration,

and if the Shareholder shall not elect to retain the stock, within twenty (20) days after the value is fixed by the arbitrators) the Shareholder shall be free to transfer the same only to the donee described in his notice to the Company.

Fourth: Any of the undersigned Shareholders who makes any voluntary assignment for the benefit of creditors, or whose shares shall become the subject of any involuntary transfer because of insolvency, bankruptcy or execution under a judgment, shall immediately notify the Company in writing of the occurrence of such event. The Company shall have the right at any time within thirty (30) days after the receipt of such notice, or the occurrence of any such event, whichever is the shorter period, to purchase the said shares of stock from the Shareholder, or his transferee, at the book value thereof on the date of occurrence of such assignment or involuntary transfer as determined from the Company's books of account by the firm of certified public accountants then regularly employed as auditors of the Company's accounts. In the event that the Company does not elect to purchase the said stock at the price so determined within said thirty-day period, the Shareholder's assignee or transferee shall be free to sell the said shares subject to all of the terms and conditions provided for in paragraph Second of this agreement, *provided, however,* that no person who becomes the owner of shares of common stock of the Company through a Shareholder's volun- [fol. 208] tary assignment for the benefit of creditors or through involuntary transfer from a Shareholder due to insolvency, bankruptcy, or judicial sale, shall have any right to become a party to this agreement or be entitled to any benefits hereunder. If any provision contained in this paragraph shall be held by any court to be invalid due to any statute or rule of law, such holding shall not affect the validity of any other provision of this agreement.

Fifth: Immediately upon execution of this agreement, each certificate evidencing ownership by the undersigned Shareholders of shares of the common stock of the Company shall be surrendered to the Company, and there shall be endorsed thereon the following statement:

"The shares of common stock represented by this certificate are transferable only upon compliance with an agreement between Shareholders dated as of February 15, 1954, copy of which is on file in the office of the Secretary of the Company, under which the Company has a prior right to purchase the said shares on the terms and conditions stated therein."

After such endorsement has been made, each such stock certificate shall be returned to the owner thereof who shall, subject to the terms of this agreement, be entitled to exercise all rights of ownership of the shares represented by such certificate. All certificates of common stock hereafter issued by the Company to the undersigned Shareholders or their transferees shall bear the same endorsement.

Sixth: This agreement shall be binding upon the parties hereto and their heirs, executors, administrators, successors and assigns.

Seventh: Any notice required under this agreement may be delivered personally or sent to any party hereto by first class mail at the address shown beneath his signature [fol. 209] hereto, but any party shall have the right to change the address to which notices shall be sent by written communication to each of the other parties hereto.

Eighth: The masculine pronoun in this agreement shall be deemed to include the feminine where appropriate.

This agreement may be executed in any number of counterparts all of which together shall constitute one original.

In witness whereof, the Company has caused this agreement to be signed by its President, attested by its Secretary, and its corporate seal to be hereunto affixed, and each of the other parties has hereunto set his hand and seal the day and year first above written.

Mr. Guy A. Gladson,
Chicago, Ill.

Co-Trustees under the Will of George P. McNear, Jr.

GENTLEMEN:

Pursuant to earlier discussions and my conversation today with Messrs. Chinn and Bancroft, this is to confirm the offer to you for the purchase of 23,400 shares, or 26% of the total number of shares outstanding, of the Toledo, Peoria & Western Railroad Company, at a price of $100 a share net cost to us.

This offer, as you will understand, is subject to formal approval by the Board of Directors of this Company and such approval as may be necessary from the Interstate Commerce Commission. The payment of the $2,340,000

total amount for the 23,400 shares is to be made upon delivery of the stock when all required approvals have been obtained.

It is understood that the Toledo, Peoria & Western Railroad Company is to continue its operation as an independent organization after our acquisition of the above described stock. As we agreed, all necessary details, including a purchase agreement, will be arranged by our respective legal representatives.

If this offer has your acceptance, will you kindly so indicate on the enclosed copy of this letter.

Sincerely yours,

E. S. MARSH
Vice President—Finance.

Wilmington Trust Company and Guy A. Gladson,
Trustees under the Will of George P. McNear, Jr.,
Wilmington, Del.

GENTLEMEN:

This letter is to confirm the understanding we have reached with you in connection with the stock of the Toledo, Peoria & Western Railroad Company.

We desire to purchase 23,400 shares of the stock, representing 26% of the total outstanding, at a price of $100 per share, no commissions being involved on either side. This offer is subject to formal approval by our Board of Directors and such approval, if any, as may be necessary from the Interstate Commerce Commission. It is our understanding that the Company will continue to be operated as an independent organization. It is understood that all necessary details to implement this will be worked out by our respective Counsel.

If this meets your approval, will you kindly indicate your acceptance on the attached carbon.

Very truly yours,

DAVID C. BEVAN
Vice-President

Finance Docket No. 18991

APPLICATION OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, THE PENNSYLVANIA RAILROAD COMPANY and PENNSYLVANIA COMPANY for authority under Section 5(2) of the Interstate Commerce Act to acquire control of Toledo, Peoria & Western Railroad Company by purchase of its capital stock.

PETITION OF MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY FOR LEAVE TO INTERVENE—Filed July 20, 1955

Comes now petitioner, Minneapolis & St. Louis Railway Company, and respectfully represents that it has an interest in the matters and issues presented by the application in the above-entitled proceeding and desires to intervene in and become a party to that proceeding, and to present evidence in opposition to the application; and for grounds in support of the proposed intervention petitioner states the following:

1. Petitioner, a corporation organized and existing under the laws of the State of Minnesota, is engaged in transportation in interstate commerce as a common carrier by railroad, subject to the provisions of the Interstate Commerce Act, and operates a railroad between Leola, South Dakota, Minneapolis, Minnesota, and Peoria, Illinois.

2. Petitioner now has and for many years has had direct interchange connections with the Toledo, Peoria & Western Railroad Company at Peoria, Illinois and currently interchanges with that railroad approximately 13,000 carloads [fol. 227] per year. Petitioner also has direct interchange connections and interchanges traffic with The Atchison, Topeka and Santa Fe Railway Company and has indirect interchange connections with The Pennsylvania Railroad Company via the Toledo, Peoria and Western Railroad Company and other railroads.

3. As early as June 10, 1954 and at all times thereafter, to and including May 26, 1955, petitioner was in active negotiation to acquire the controlling stock in the TP&W from the trustees of the estate of George P. McNear, Jr. Petitioner's last bid for the TP&W stock was substantially higher than the price at which the trustees had agreed to sell the controlling stock to applicants on April 15, 1955. While petitioner's bid was pending before the trustees, applicants made a bid higher than petitioner's by only an immaterial amount and the trustees denied petitioner an opportunity to meet or exceed the last bid of the applicants. Petitioner desires to obtain control of the TP&W and asserts that control by it would be in furtherance of the public interest as declared in the National Transportation Policy, the Clayton Act and the Sherman Act; whereas the control of the TP&W by applicants would contravene the principles of the Interstate Commerce Act, the Clayton Act and the Sherman Act for the following reasons:

A. The acquisition by the applicants of the controlling stock of the TP&W was not designed to improve the service of the applicants, or to materially increase the ability of the TP&W to serve its own shippers or its other railroad connections, but, on the contrary, was designed, and its effect would be, substantially to lessen competition and create monopoly.

[fol. 228] B. The acquisition by the applicants of control of the properties and assets of the TP&W was designed, and its effect would be, to prevent petitioner from expanding the territory it serves and from im-

proving and enhancing its financial and physical condition, to the injury and competitive disadvantage of petitioner, and to the undue competitive advantage of applicant railroads over petitioner.

C. The applicant railroads now provide freight service in competition with the TP&W. The competition now afforded by this independent railroad to applicants will disappear if they are permitted to control it. Furthermore, it will be to applicants' economic interest to route freight via their existing Chicago route rather than via the TP&W route. The long-term effects of these economies on the TP&W will be detrimental to it, to the shipping public, to the national defense, and to adequate, efficient and economical transportation service.

D. Your petitioner in no sense competes with the TP&W, but on the contrary, its acquisition of control of the assets and property of the TP&W would be a natural, normal and logical extension of petitioner's lines and the territory it serves. Your petitioner, unlike the applicants, would have no incentive other than to maximize the traffic routed over and carried by the TP&W, and, accordingly, its acquisition, unlike that by the applicants, would enhance competition, tend to restrict and confine monopoly, and otherwise be in the public interest.

[fol. 229] E. The acquisition by the applicants of the TP&W will not result in economies in rail operation, whereas the acquisition by petitioner of the TP&W would result in substantial economies both to the petitioner and to the TP&W, with a consequent strengthening of both companies, all of which is in the public interest.

4. Petitioner further alleges that the application for authority to acquire the control through stock ownership of the TP&W should be denied because neither the terms nor conditions proposed by the applicants are just and reasonable, nor would the control sought to be effectuated be consistent with the public interest.

Wherefore, your petitioner requests leave to intervene in opposition to the application and be treated as a party in interest in the above-entitled proceeding with the right to have notice of and to appear at the taking of testimony, to produce and cross-examine witnesses, and to be heard through counsel on brief and at oral argument, if oral argument is granted.

Petitioner requests that the application be assigned for hearing.

Finance Docket No. 18991

Toledo, Peoria & Western Railroad Company Control

IN THE MATTER OF PETITION FOR LEAVE TO INTERVENE IN OPPOSITION TO THE APPLICATION.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—August 2, 1955.

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company, and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and

by Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company;

It further appearing, That on July 20, 1955, the Minneapolis & St. Louis Railway Company filed its petition for leave to intervene in opposition to the application and requested that the application be assigned for hearing, and that copies of said petition have been served upon the applicants;

It is ordered, That said Minneapolis & St. Louis Railway Company be, and it is hereby, permitted to intervene and be treated as a party to this proceeding.

It is further ordered, That the proceeding be, and it is hereby, assigned for hearing at a time and place hereafter to be designated.

And it is further ordered, That a copy of the petition and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon the Governors and public regulatory commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia, and West Virginia.

Dated at Washington, D.C., this 2nd day of August, A.D. 1955.

PETITION OF THE CITY OF PEORIA FOR LEAVE TO INTERVENE—July 21, 1955

Comes now your petitioner, the City of Peoria, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a Municipal Corporation in the State of Illinois.

2. On July 19, 1955 the City Council of the City of Peoria adopted the following resolution:

> An application has been filed with the Interstate Commerce Commission for approval of joint ownership of the TOLEDO, PEORIA & WESTERN RAILROAD by the SANTA FE and PENNSYLVANIA Railroads, which assures operation of the TOLEDO, PEORIA & WESTERN RAILROAD as a separate entity under its present management and with its headquarters in the Peoria Area.
>
> [fol. 233] NOW, THEREFORE, BE IT RESOLVED that such action is in the best interest of the City of Peoria and the Corporation Counsel is hereby directed to intervene in the proceedings before the Commission requesting that a hearing be held in Peoria and urgently recommending the approval of the application.

Petitioner's position and interest in this proceeding is that stated in the resolution of the Council of the City of Peoria adopted on July 19, 1955.

Wherefore, said City of Peoria prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person, or

by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Peoria, Illinois, July 21st, 1955.

Max J. Lipkin, Corporation Counsel, City Hall, Peoria, Illinois.

PETITION OF PEORIA ASSOCIATION OF COMMERCE FOR LEAVE TO INTERVENE—July 22, 1955

Comes now your petitioner, Peoria Association of Commerce, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding, and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a Corporation of the State of Illinois, having its office in the City of Peoria, with Industrial, Commercial, and Professional Membership of 2875. Its purpose is to promote the civic, economic and social welfare of the people of Peoria and vicinity.

2. On July 18, 1955, Petitioner, by its Board of Directors adopted the following Resolution:

[fol. 235] RESOLUTION

PEORIA ASSOCIATION OF COMMERCE
PEORIA, ILLINOIS

WHEREAS, Application of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company for au-

thority under Section 5 (2) of the Interstate Commerce Act to acquire control of Toledo, Peoria & Western Railroad Company by purchase of its capital stock, Finance Docket No. 18991 has been filed with the Interstate Commerce Commission as of July 8, 1955.

WHEREAS, This application in exhibit 7-d, Section 3 commits the applicants to the following:

(a) TP&W will continue to be operated as a separate and independent carrier with responsible management located along its lines in order to preserve to shippers and communities the present direct access to its officials.

(b) The properties of the TP&W, including line and equipment, will be maintained and improved in keeping with the requirements of a railroad of its character and importance.

(c) TP&W will continue to maintain its own solicitation forces and will be entirely free to solicit traffic in such manner as best to serve the interests of TP&W.

(d) All existing routes and channels of trade via TP&W will be maintained and kept open without discrimination between connecting lines of railroad.

(e) The Board of Directors of TP&W shall consist of eleven members, of whom one shall be the president of the company, two shall be officers of Santa Fe, two shall be officers of Pennsylvania Company or The Pennsylvania Railroad Company or both, and the remaining six shall be prominent citizens not connected with any one of the parties to this agreement but selected by the parties to this agreement and the subject of mutual agreement between them.

WHEREAS, Under joint ownership by the Santa Fe and Pennsylvania the Toledo, Peoria & Western Railroad as an independently operated Railroad can continue its active role in support of this Association's program

[fol. 236] for the industrial development and growth of The Greater Peoria Area and Central Illinois.

WHEREAS, Ownership of the Toledo, Peoria & Western Railroad by these two railroads, which are its most important connections on the East and the West and whose interests are therefore complementary rather than competitive, will not only insure the continued growth of the through traffic for which the Toledo, Peoria & Western Railroad provides such a vital link but will also permit the Toledo, Peoria & Western Railroad to take an even stronger interest in the industrial development of this area;

NOW, THEREFORE BE IT RESOLVED that the Peoria Association of Commerce give its full support to the application of the Santa Fe and Pennsylvania Railroads to the Interstate Commerce Commission for approval of their joint acquisition of control of the Toledo, Peoria & Western Railroad through purchase of its capital stock; and

BE IT FURTHER RESOLVED that the Executive Vice President of this Association be and he is hereby authorized and directed to sign, verify and file in behalf of this Association a Petition for leave to intervene in support of the aforesaid application to the Interstate Commerce Commission, to take all reasonable steps in furtherance thereof, and to request said Commission to set the matter for hearing in Peoria.

APPROVED and ADOPTED by the Board of Directors, Peoria Association of Commerce, Peoria, Illinois at their meeting July 18, 1955.

PEORIA ASSOCIATION OF COMMERCE

By A. D. Theobald
A. D. Theobald, President

ATTEST:

Herbert N. Johnson
Executive Vice President

(Seal)

3. Petitioner's position and interest in this proceeding is that stated in the resolution of its Board of Directors Adopted and Approved July 18, 1955, as above stated.

[fol. 237] Wherefore, said Peoria Association of Commerce prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Peoria, Illinois, July 22nd, 1955.

Toledo, Peoria & Western Railroad Company Control

IN THE MATTER OF PETITIONS FOR LEAVE TO INTERVENE IN SUPPORT OF THE APPLICATION.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—August 2, 1955

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and by Pennsylvania Company, a wholly owned subsidiary of The Pennsylvania Railroad Company;

It further appearing, That on July 25, 1955, The City of Peoria and the Peoria Association of Commerce filed their petitions for leave to intervene in support of the application and that the latter petitioner requested that the hearing be set in Peoria;

It is ordered, That said The City of Peoria and Peoria Association of Commerce be, and they are hereby, permitted to intervene and be treated as parties to this proceeding;

It is further ordered, That the question of where a public hearing is to be held be deferred pending future determination by the Commission;

And it is further ordered, That a copy of the petitions and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon the Governors and public regulatory commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia and West Virginia.

Finance Docket No. 18991

[Title omitted]

PETITION OF THE CITY OF KEOKUK, IOWA, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION—July 28, 1955

Comes now the Petitioner, City of Keokuk, Iowa, and respectfully represents that it has a substantial interest in the subject matter of this proceeding and requests leave to intervene and to become a party thereto, and for the grounds of the proposed intervention, says:

(1) That the Petitioner, City of Keokuk, is a municipal corporation of the State of Iowa.

(2) That the Petitioner is the western terminus of the Toledo, Peoria & Western Railroad; that large quantities of goods are shipped into and out of Keokuk, Iowa, over the Toledo, Peoria & Western Railroad; that the City of Keokuk, Iowa, owns the bridge linking Keokuk, Iowa, with Hamilton, Illinois, and over which the Toledo, Peoria & Western Railroad operates; that the City of Keokuk, Iowa, has a financial interest in the continued flow of goods over the Keokuk Municipal Bridge and in the efficient [fol. 240] operation of the Toledo, Peoria & Western Railroad.

That Petitioner feels the Toledo, Peoria & Western Railroad will continue its efficient operation if the proposed Application of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company, known as Finance Docket No. 18991, before the Interstate Commerce Commission, is approved.

That Petitioner approves the continued operation of the Toledo, Peoria & Western Railroad Company under independent management as proposed in said Application and that it is in the public interest for said Application to be approved, and therefore, this Petitioner supports the position of The Atchison, Topeka and Santa Fe Railroad

Company, The Pennsylvania Railroad Company and Pennsylvania Company in said Application.

Wherefore, the City of Keokuk prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Keokuk, Iowa, this 28 day of July, 1955.

[fol. 241] Respectfully submitted,

City of Keokuk, Iowa, By Paul Proctor, City Attorney, 9½ North Seventh Street, Keokuk, Iowa.

PETITION OF THE KEOKUK CHAMBER OF COMMERCE, KEOKUK, IOWA, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION—July 28, 1955

Comes now the Petitioner, The Keokuk Chamber of Commerce, Keokuk, Iowa, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding and for grounds of the proposed intervention, says:

(1) That Petitioner is a corporation organized to do business in the State of Iowa, the membership of which represents the business interests of the City of Keokuk, Iowa.

(2) That Petitioner, The Keokuk Chamber of Commerce, is interested in the efficient operation of the Toledo, Peoria & Western Railroad; that a number of its members ship large quantities of goods to and from Keokuk over the

Toledo, Peoria & Western Railroad; that Petitioner approves of the continued operation of the Toledo, Peoria & Western Railroad under independent management as proposed in the Application of The Atchison, Topeka and [fol. 243] Santa Fe Railway Company, The Pennsylvania Railroad Company, and Pennsylvania Company under Finance Docket No. 18991 before the Interstate Commerce Commission; that Petitioner feels that it is in the public interest for the said application to be approved, and therefore supports the position of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company.

Wherefore, the Petitioner, The Keokuk Chamber of Commerce, prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Keokuk, Iowa, this 28 day of July, 1955.

PETITION OF THE HUBINGER COMPANY, AN IOWA CORPORATION, OF KEOKUK, IOWA, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION—July 27, 1955

Comes now the Petitioner, The Hubinger Company, an Iowa Corporation of Keokuk, Iowa; and respectfully represents that it has a substantial interest in the subject

matter of this proceeding and requests leave to intervene and to become a party thereto, and for the grounds of the proposed intervention, says:

(1) That the Petitioner, The Hubinger Company, is an Iowa Corporation with principal offices located at Keokuk, Lee County, Iowa.

(2) That Petitioner is a manufacturer and processor of corn products with its principal plant located at Keokuk, Iowa; that the Petitioner is a shipper of large quantities of goods in bulk, package and by tank car; that the majority of all shipments made by the Petitioner are by railroad, both to and from its plant at Keokuk, Iowa; that a large portion of the shipments by railroad to and [fol. 246] from the Petitioner's Keokuk, Iowa, plant are over the Toledo, Peoria & Western Railroad; that the Petitioner is vitally interested, financially and otherwise, in the continued, efficient operation of the Toledo, Peoria & Western Railroad.

That Petitioner feels the Toledo, Peoria & Western Railroad will continue its efficient operation under the proposals made in the Application of the Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company, filed as Finance Docket No. 18991, before the Interstate Commerce Commission; that Petitioner approves the continued operation of the Toledo, Peoria & Western Railroad Company under independent management as proposed in the Application of The Atchison, Topeka and Santa Fe Railway Company, and further, that it is in the public interest for the Application to be approved and for these reasons, the Petitioner supports the position of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company as stated in their Application filed as Docket No. 18991 before the Interstate Commerce Commission.

Wherefore, The Hubinger Company prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses and be heard in per-

sion or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Keokuk, Iowa, this 27th day of July, 1955.

Toledo, Peoria & Western Railroad Company Control

IN THE MATTER OF PETITIONS FOR LEAVE TO INTERVENE IN SUPPORT OF THE APPLICATION.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—August 15, 1955

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and by Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company;

It further appearing, That on August 1, 1955, the City of Keokuk, Iowa, The Keokuk Chamber of Commerce and The Hubinger Company filed their petitions for leave to intervene in support of the application;

It is ordered, That said City of Keokuk, Iowa, The Keokuk Chamber of Commerce and The Hubinger Com-

pany be, and they are hereby, permitted to intervene and be treated as parties to this proceeding.

It is further ordered, That a copy of the petitions and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon the Governors and public regulatory commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia and West Virginia.

Dated at Washington, D. C., this 15th day of August, A. D. 1955.

By the Commission, Commissioner Johnson.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—August 15, 1955

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and by

Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company;

It further appearing, That on August 1, 1955, The New York, Chicago and St. Louis Railroad Company filed its petition for leave to intervene and requested authority to acquire an equal share in the control of Toledo, Peoria & Western Railroad Company, or if inclusion in the transaction is denied or found not required, petitioner opposes and requests denial of the application;

It is ordered, That said The New York, Chicago and St. Louis Railroad Company be, and it is hereby, permitted to intervene and be treated as a party to this proceeding;

It is further ordered, That consideration of the other requests in said petition is withheld pending final determination by the Commission;

And it is further ordered, That a copy of the petition and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon the Governors and public regulatory commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia and West Virginia.

PETITION OF THE CITY OF EAST PEORIA FOR LEAVE TO INTERVENE—August 3, 1955

Comes now your petitioner, The City of East Peoria, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a Municipal Corporation in the State of Illinois.

2. On July 26, 1955 the City Council of the City of East Peoria adopted the following resolution:

> WHEREAS, an application has been filed with the Interstate Commerce Commission for approval of joint ownership of the T. P. & W. R.R. by acquisition of the corporate stock of said Railroad by the Santa Fe and Pennsylvania Railroads, which assures continued operation of the T. P. & W. R.R. as a separate entity under its present management, with headquarters in the City of East Peoria; and
>
> WHEREAS, the acquisition of control of the said T. P. & W. desired is to the best interest of the people of this community and the industrial expansion will be best served by continuing the T. P. & W. as a strong and independent railroad.
>
> [fol. 252] NOW THEREFORE, BE IT RESOLVED by the City Council of the City of East Peoria, Illinois, that the anticipated acquisition of the joint ownership of the T. P. & W. R.R. by the Santa Fe and Pennsylvania Railroads is deemed in the best interest of the City of East Peoria, and the City Attorney, Fred V. Stiers, is hereby directed to intervene in the proceedings before the Interstate Commerce Commission requesting that a hearing be held in Peoria and urgently recommending the approval of the application.

Petitioner's position and interest in this proceeding is that stated in the resolution of the Council of the City of East Peoria adopted on July 26, 1955.

Wherefore, said City of East Peoria prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at East Peoria, Illinois, August 3, 1955.

Fred V. Stiers, City Attorney, City Hall, East Peoria, Illinois.

Duly sworn to by Fred V. Stiers, jurat omitted in printing.

IN THE MATTER OF PETITION FOR LEAVE TO INTERVENE AND FOR OTHER RELIEF.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—August 16, 1955

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Com-

pany, The Pennsylvania Railroad Company and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and by Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company.

It further appearing, That on August 11, 1955, the Illinois Central Railroad Company filed its petition for leave to intervene and asserts that their lines connect at various places for the interchange of traffic with the lines of applicants and if the application be granted, it be granted subject to the condition that the applicants shall maintain and keep open all routes and channels of trade with petitioner via existing gateways unless and until otherwise authorized by the Commission.

It is ordered, That said Illinois Central Railroad Company be, and they are hereby, permitted to intervene and be treated as a party to this proceeding;

And it is further ordered, That a copy of the petition and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon the Governors and public regulatory commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia and West Virginia.

PETITION OF THE KEOKUK BRIDGE COMMISSION, KEOKUK, IOWA, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION — August 25, 1955

Comes now the Petitioner, Keokuk Bridge Commission of Keokuk, Iowa, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding and for grounds of the proposed intervention says:

(1) That Petitioner is a Commission appointed by the Mayor of the City of Keokuk, under the provisions of Section 383.14 of the 1954 Code of Iowa, with power to operate the Keokuk Municipal Bridge.

(2) That Petitioner, Keokuk Bridge Commission is interested in the continued efficient operation of the Toledo, Peoria & Western Railroad; that the Toledo, Peoria & Western Railroad ship large quantities of goods to and from the City of Keokuk across the Keokuk Municipal

Bridge which is controlled and operated by the Petitioner; that the City of Keokuk receives substantial income from the shipments which cross the Keokuk Municipal Bridge; that Petitioner is vitally interested in the continued flow [fol. 259] of goods across the Keokuk Municipal Bridge and approves the continued operation of the Toledo, Peoria & Western Railroad Company as an independent entity under its present management as proposed in the application of The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company under Finance Docket No. 18991 before the Interstate Commerce Commission; that Petitioner feels that the ownership of the Toledo, Peoria & Western Railroad by The Atchison, Topeka and Santa Fe Railway Company, and The Pennsylvania Railroad Company will improve the facilities of the Toledo, Peoria & Western Railroad Company and increase the traffic across the Keokuk Municipal Bridge, and therefore supports the position of The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company.

Wherefore, the Petitioner, Keokuk Bridge Commission prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses and be heard in person or by counsel upon brief and at the oral argument if oral argument is granted.

Dated at Keokuk, Iowa, this 25th day of August, 1955.

Respectfully submitted,

Keokuk Bridge Commission, By W. A. Logan, Chairman, 601 Main Street, Keokuk, Iowa.

APPLICATION OF ATCHISON, TOPEKA & SANTA FE RAILWAY COMPANY, ET AL., TO ACQUIRE CONTROL OF TOLEDO, PEORIA & WESTERN RAILROAD COMPANY.

PETITION OF CITY OF EUREKA FOR LEAVE TO INTERVENE—August 20, 1955

Now comes your Petitioner, the City of Eureka, Eureka, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds for the proposed intervention, states:

1. Petitioner is a municipal corporation in the State of Illinois.

2. Petitioner urges this commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Companies in its entirety, for the following reasons:

(a.) That the application provides that the T P & W will continue to be operated as a separate and independent carrier with responsible local management which is in the interest of this community and others by providing ready access to management.

[fol. 265] (b.) That the application provides that the properties and facilities of the T P & W will be maintained and improved, which is of benefit to this community and others through the maintenance of maximum employment in the community; Petitioner further requests that the applicants be denied the right to abandon any of its major facilities along the existing line, as a condition of the purchase.

(c.) That the application provides for an independent Board of Directors which is in the interest of this community, since granting the Petitions of competing railroads to participate in the purchase would result in a Board of Directors not concerned with the interests of the T P & W and the communities it serves, and would further result in increase of the Board to an unworkable size.

(d.) That your Petitioner has an interest in industrial development which would be best served by the granting of the joint application of the Santa Fe and Pennsylvania, and would likewise be best served by denial of the Petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest or concern in industrial development along the line of the T P & W; that if the Illinois Central should be given the right to participate, the community of El Paso would be favored and the community of Eureka would be ignored; should the Petition of the Nickel Plate to participate be granted, Peoria would be the favored site for industrial

development to the exclusion of all the smaller communities along the line.

(c.) That Petitioner believes the present independent management of the T P & W should be maintained as outlined in the application of the Santa Fe and Pennsylvania, since such management has maintained the tenure of employees and offers the best hope for uninterrupted employment.

[fol. 266] Wherefore, said City of Eureka prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the hearing of this matter, produce and cross examine witnesses and be heard through its duly elected officers or by counsel upon brief and oral argument, if oral argument be granted.

Petitioner further requests that the hearing on this application be held in the City of Peoria, Illinois.

Dated at Eureka, Illinois, this 20th day of August, 1955.

The City of Eureka, By Don B. Pioletti, City Attorney.

Duly sworn to by Don B. Pioletti, jurat omitted in printing.

PETITION OF VILLAGE OF SECOR FOR LEAVE TO INTERVENE—August 20, 1955

Now comes your Petitioner, the Village of Secor, Secor, Illinois, and respectfully represents that it has an interest in the matters and issuances in controversy in the above entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds for the proposed intervention, states:

1. Petitioner is a municipal corporation in the State of Illinois.

2. Petitioner urges this commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Companies in its entirety, for the following reasons:

(a.) That the application provides that the T P & W will continue to be operated as a separate and independent carrier with responsible local management which is in the interest of this community and others by providing local access to management.

[fol. 268] (b.) That the application provides that the properties and facilities of the T P & W will be maintained and improved, which is of benefit to this community and others through the maintenance of maximum employment in the community; Petitioner further requests that the applicants be denied the right to abandon any of its facilities along the existing line, as a condition of the purchase.

(c.) That the application provides for an independent Board of Directors which is in the interest of this community, since granting the Petitions of competing railroads to participate in the purchase would result in a Board of Directors not concerned with the interests of the T P & W and the communities it serves, and would further result in increase of the Board to an unworkable size.

(d.) That your Petitioner has an interest in industrial development which would be best served by the granting of the joint application of the Santa Fe and Pennsylvania, and would likewise be best served by denial of the Petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest or concern in industrial development along the line of the T P & W; that if the Illinois Central should be given the right to participate, the community of El Paso would be favored and the community of Secor would be ignored; should the Petition of the Nickel Plate to participate be granted, Peoria would be the favored site for industrial development to the exclusion of all the smaller communities along the line.

(c.) That Petitioner believes the present independent management of the T P & W should be maintained as outlined in the application of the Santa Fe and Pennsylvania, since such management has maintained the tenure of employees and offers the best hope for uninterrupted employment.

[fol. 269] Wherefore, said Village of Secor prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the hearing of this matter, produce and cross examine witnesses and be heard through its duly elected officers or by counsel upon brief and oral argument, if oral argument be granted.

Petitioner further requests that the hearing on this application be held in the City of Peoria, Illinois.

PETITION OF CITY OF GILMAN FOR LEAVE TO INTERVENE—September 17, 1955

Comes Now, your Petitioner, The City of Gilman, Gilman, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above-entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds of the proposed intervention says:

1. That Petitioner is a municipal corporation located in the County of Iroquois in the State of Illinois.

2. That Petitioner is interested in the proposed application of the Atchison, Topeka & Santa Fe Railroad and the Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company and urges this Commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Railroads in its entirety, for the following reasons:

[fol. 272] (a) That the application provides that the properties and facilities of the T. P. & W. Railroad will be maintained and improved, which is a benefit to this community and others through the maintenance of maximum employment in the community and adequate facilities for the maintenance of the railroad service to the community.

(b) That the application provides that the T. P. & W. Railroad will continue to be operated as a separate and independent carrier with responsible local management which is in the interest of this community and others served by the railroad in providing access to the management.

(c) That the application provides for an independent Board of Directors which is in the interest of this community since the granting of petitions for competing railroads to participate in the purchase would result in the vesting of the control in a Board of Directors not concerned with the interests of the T. P. & W. Railroad and the communities it serves.

(d) That Petitioner believes the present independent management of the T. P. & W. Railroad should be maintained as outlined in the application of the Santa Fe and Pennsylvania Railroads since such management has maintained a tenure of employees and offers the best in uninterrupted employment for such employees.

(e) That your Petitioner has an interest in the industrial development of the municipality and community and [fol. 273] would be best served by granting the joint application of the Santa Fe and Pennsylvania Railroads and by denial of the petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest or concern in the industrial development along the lines of the T. P. & W. Railroad; that competing lines would be inclined to and would favor the industrial development of the communities located along their lines to the exclusion of the small communities located along the lines of the T. P. & W. Railroad.

Wherefore, the City of Gilman prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the hearing on this matter and produce and cross-examine witnesses and be heard through its duly elected officers or by counsel upon brief and oral argument, if oral argument is granted.

PETITION OF VILLAGE OF SHELDON FOR LEAVE TO INTERVENE—September 13, 1955

Comes Now, your Petitioner, The Village of Sheldon, Sheldon, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above-entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds of the proposed intervention says:

1. That Petitioner is a municipal corporation located in the County of Iroquois in the State of Illinois.

2. That Petitioner is interested in the proposed application of the Atchison, Topeka & Santa Fe Railroad and the Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company and urges this Commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Railroads in its entirety, for the following reasons:

[fol. 277] (a) That the application provides that the properties and facilities of the T. P. & W. Railroad will be maintained and improved, which is a benefit to this community and others through the maintenance of maximum employment in the community and adequate facilities for the maintenance of the railroad service to the community.

(b) That the application provides that the T. P. & W. Railroad will continue to be operated as a separate and

independent carrier with responsible local management which is in the interest of this community and others served by the railroad in providing access to the management.

(c) That the application provides for an independent Board of Directors which is in the interest of this community since the granting of petitions for competing railroads to participate in the purchase would result in the vesting of the control in a Board of Directors not concerned with the interests of the T. P. & W. Railroad and the communities it serves.

(d) That Petitioner believes the present independent management of the T. P. & W. Railroad should be maintained as outlined in the application of the Santa Fe and Pennsylvania Railroads since such management has maintained a tenure of employees and offers the best in uninterrupted employment for such employees.

(e) That your Petitioner has an interest in the industrial development of the municipality and community and [fol. 278] would be best served by granting the joint application of the Santa Fe and Pennsylvania Railroads and by denial of the petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest or concern in the industrial development along the lines of the T. P. & W. Railroad; that competing lines would be inclined to and would favor the industrial development of the communities located along their lines to the exclusion of the small communities located along the lines of the T. PETITION OF THE CITY OF WATSEKA FOR LEAVE TO INTERVENE—September 13, 1955

Comes Now, your Petitioner, The City of Watseka, Watseka, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above-entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds of the proposed intervention says:

1. That Petitioner is a municipal corporation located in the County of Iroquois in the State of Illinois.

2. That Petitioner is interested in the proposed application of the Atchison, Topeka & Santa Fe Railroad and the Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company and urges this Commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Railroads in its entirety, for the following reasons:

[fol. 282] (a) That the application provides that the properties and facilities of the T. P. & W. Railroad will be maintained and improved, which is a benefit to this community and others through the maintenance of maximum employment in the community and adequate facilities for the maintenance of the railroad service to the community.

(b) That the application provides that the T. P. & W. Railroad will continue to be operated as a separate and independent carrier with responsible local management which is in the interest of this community and others served by the railroad in providing access to the management.

(c) That the application provides for an independent Board of Directors which is in the interest of this com-

munity since the granting of petitions for competing railroads to participate in the purchase would result in the vesting of the control in a Board of Directors not concerned with the interests of the T. P. & W. Railroad and the communities it serves.

(d) That Petitioner believes the present independent management of the T. P. & W. Railroad should be maintained as outlined in the application of the Santa Fe and Pennsylvania Railroads since such management has maintained a tenure of employees and offers the best in uninterrupted employment for such employees.

(e) That your Petitioner has an interest in the industrial development of the municipality and community and would [fol. 283] be best served by granting the joint application of the Santa Fe and Pennsylvania Railroads and by denial of the petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest or concern in the industrial development along the lines of the T. P. & W. Railroad; that competing lines would be inclined to and would favor the industrial development of the communities located along their lines to the exclusion of the small communities located along the lines of the T. P. & W. Railroad.

Wherefore, the City of Watseka prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the hearing on this matter and produce and cross-examine witnesses and be heard through its duly elected officers or by counsel upon brief and oral argument, if oral argument is granted.

Dated at Watseka, Illinois, this 13th day of September, A.D. 1955.

The City of Watseka, Illinois, By Milo J. Fleming, City Attorney.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 18991

Toledo, Peoria & Western Railroad Company Control

IN THE MATTER OF PETITIONS FOR LEAVE TO INTERVENE IN SUPPORT OF THE APPLICATION.

PRESENT: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—October 25, 1955

It appearing, That on July 8, 1955, an application was filed by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company for authority to acquire joint control of the Toledo, Peoria & Western Railroad Company through purchase of its capital stock in equal amounts by The Atchison, Topeka and Santa Fe Railway Company and by Pennsylvania Company, a wholly-owned subsidiary of The Pennsylvania Railroad Company;

It further appearing, That on September 23, 1955, The City of Gilman, Illinois, The Village of Sheldon, Illinois and The City of Watseka, Illinois, filed their petitions for leave to intervene in support of the application in its entirety alleging that their interests would be best served by denial of the petitions of competing lines to participate in the purchase;

It is ordered, That said The City of Gilman, Illinois, The Village of Sheldon, Illinois, and The City of Watseka, Illinois, be, and they are hereby, permitted to intervene and be treated as parties to this proceeding;

It is further ordered, That a copy of the petitions and of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commission of the States of Illinois and Iowa, and that a copy of

this order be served upon the Governors and public regulatory Commissions of the States of Arizona, California, Colorado, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Nebraska, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia and West Virginia.

Dated at Washington, D. C., this 25th day of October, A. D., 1955.

PETITION OF THE CANTON CHAMBER OF COMMERCE, INC., CANTON, ILLINOIS, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION—October 8, 1955

Comes now the Petitioner, The Canton Chamber of Commerce, Inc., Canton, Illinois, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceedings and desires to intervene in and become a party to said proceedings and for grounds of the proposed intervention, says:

(1) That the Petitioner is a corporation, incorporated not-for-profit, in the State of Illinois, the membership of which represents the business interests of the City of Canton, Illinois and surrounding area.

[fol. 288] (2) That the Petitioner, The Canton Chamber of Commerce, Inc., is interested in the continued efficient operation of the Toledo, Peoria & Western Railroad; that a number of its members ship large quantities of goods into and out of Canton, Illinois over the Toledo, Peoria & Western Railroad; that the Petitioner approves of the continued

operation of the Toledo, Peoria & Western Railroad under independent management as proposed in the application of the Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company, and Pennsylvania Company under Finance Docket No. 18991 before the Interstate Commerce Commission; that the Petitioner feels that it is in the public interest for the said application to be approved, and therefore supports the position of the Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and the Pennsylvania Company.

Wherefore, the Petitioner, The Canton Chamber of Commerce, Inc., prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine wit-
[fol. 289] nesses and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Canton, Illinois this 8th day of October 1955.

Respectfully submitted,

The Canton Chamber of Commerce, Inc., By J. Harry Pinson, President, 35 South Main Street, Canton, Illinois.

PETITION FOR LEAVE TO INTERVENE—October 12, 1955

Comes now your petitioner, the Village of Lomax, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceedings and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a Municipal Corporation in the State of Illinois.

2. On October 4, 1955 the Village Trustees of the Village of Lomax adopted the following resolution:

Whereas an application has been filed with the Interstate Commerce Commission for approval of joint ownership of the Toledo, Peoria & Western Railroad by the Santa Fe and Pennsylvania Railroads which assures operation of the Toledo, Peoria & Western Railroad as a separate entity under its present management.

Now, Therefore, Be It Resolved that such action is in the best interest of the Village of Lomax and the corporation counsel is hereby directed to intervene in the proceedings before the Commission urgently recommending the approval of the application.

[fol. 292] Petitioner's position and interest in this proceeding is that stated in the resolution of the Trustees of the Village of Lomax adopted on October 4, 1955.

Wherefore, said Village of Lomax prays to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

APPLICATION OF ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, ET AL., TO ACQUIRE CONTROL OF TOLEDO, PEORIA & WESTERN RAILROAD COMPANY.

PETITION OF CITY OF WARSAW FOR LEAVE TO INTERVENE

September 29, 1955

Now comes your Petitioner, the City of Warsaw, Warsaw, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above entitled proceeding and desires to intervene in and become a party to that proceeding and for grounds for the proposed intervention, states:

1. Petitioner is a municipal corporation in the State of Illinois.

2. Petitioner urges this commission to approve the application as outlined in the Petition of the Santa Fe and Pennsylvania Companies in its entirety, for the following reasons:

(a.) That the application provides that the T P & W will continue to be operated as a separate and independent carrier with responsible local management which is in the interest of this community and others by providing ready access to management.

(b.) That the application provides that the properties and facilities of the T P & W will be maintained and improved, which is of benefit to this community and others through the maintenance of maximum employment in the community; Petitioner further requests that the applicants be denied the right to abandon any of its trackage facilities along the existing line, as a condition of the purchase.

(c.) That the application provides for an independent Board of Directors which is in the interest of this com-

munity, since granting the Petitions of competing railroads to participate in the purchase would result in a Board of Directors not concerned with the interests of the T P & W and the communities it serves, and would further result in increase of the Board to an unworkable size.

(d.) That your Petitioner has an interest in industrial development which would be best served by the granting of the joint application of the Santa Fe and Pennsylvania, and would likewise be best served by denial of the Petitions of competing lines to participate in the purchase, since competing lines would have no substantial interest, or concern in industrial development along the line of the T P & W.

(e.) That Petitioner believes the present independent management of the T P & W should be maintained as outlined in the application of the Santa Fe and Pennsylvania, since such management has maintained the tenure of employees and offers the best hope for uninterrupted employment.

Wherefore, said City of Warsaw prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the hearing of this matter, produce and cross-examine witnesses and be heard through its duly elected officers or by counsel upon brief and oral argument, if oral argument be granted.

[fol. 298] Petitioner further requests that the hearing on this application be held in the City of Peoria, Illinois.

Dated at Warsaw, Illinois, this 29th day of September, 1955.

PETITION OF CITY OF LALLARPE FOR LEAVE TO INTERVENE—December 22, 1955

Comes now your Petitioner, the City of LaHarpe, LaHarpe, Illinois, and respectfully represents that it has an interest in the matters and issues in controversy in the above-entitled proceeding and desires to intervene in and become a party to that proceeding, and for grounds of the proposed intervention, says:

1. That Petitioner is a municipal corporation organized and existing under the Revised Cities and Villages Act, Chapter 24, Illinois Revised Statutes;

2. That on October 11, 1955, Petitioner, by its City Council, adopted the following Resolution:

[fol. 303] "WHEREAS, We have been informed that the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company have contracted to purchase the Toledo, Peoria and Western Railroad, and

"WHEREAS, We have also been informed that objections have been filed with the Interstate Commerce Commission objecting to said sale, and

"WHEREAS, We feel and know that the sustaining of said objections to said sale would be detrimental to the best interests of our merchants, our farming community and our country, and

"WHEREAS, We have been informed that said objections to said sale are now pending before the Interstate Commerce Commission at Washington, D. C.

"THEREFORE, BE IT RESOLVED by the City Council of the City of LaHarpe, Hancock County, Illinois in regular meeting assembled that this City petition and ask that the Interstate Commerce Commission overrule the objections to the sale of the Toledo, Peoria and Western Railroad to the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company and that the said Commission approve and confirm the said sale of the Toledo, Peoria and Western Railroad to the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company.

"BE IT FURTHER RESOLVED that a certified copy of this Resolution be forwarded by the City Clerk of this City to the Interstate Commerce Commission at Washington, D. C. and also the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company."

3. That Petitioner's position and interest in the proceeding is that stated in the foregoing Resolution [fol. 304] of the City Council of the City of LaHarpe, adopted on October 11, 1955.

Wherefore, said City of LaHarpe prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

[Title omitted]

PETITION OF CENTRAL ILLINOIS LIGHT COMPANY FOR LEAVE TO INTERVENE—January 6, 1956

Comes now your Petitioner, Central Illinois Light Company, an Illinois corporation with its principal offices at 316 South Jefferson Street, Peoria, Illinois, and respectfully represents that it is vitally and substantially interested in the matters and issues in controversy in the above entitled proceeding and desires to intervene and become a party to that proceeding, and for grounds for the proposed intervention says:

1. Petitioner is a corporation organized and doing business in the State of Illinois as a public utility and is engaged, among other things, in the generation and distribution of electricity and steam heat in the Central Illinois area.

2. That Petitioner's principal generating station is located at East Peoria, Illinois, and in connection with the operation of said plant, Petitioner is the largest consignee now served by the Toledo, Peoria & Western Railroad Company. Petitioner receives annually over the tracks of said railroad approximately 600,000 tons of shipping, of

which approximately 400,000 tons originate in Toledo, Peoria & Western Railroad Company territory and along the lines of said railroad. The other 200,000 tons are [fol. 308] switched from other railroads over the Toledo, Peoria & Western Railroad Company lines for delivery to Petitioner. The plans of Petitioner for expansion of its operations also call for Petitioner to receive over Toledo, Peoria & Western Railroad Company lines an additional 300,000 tons of freight by 1960. These plans would be vitally and adversely affected by any future course which would enable or permit said railroad to be so integrated, dismembered or divided in ownership so as to interfere with its future operation on the same basis as it is now being operated. As a result of Petitioner's extensive use and reliance on the facilities of the Toledo, Peoria & Western Railroad Company for the delivery of coal, construction materials and other freight to Petitioner for its use in generating and distributing electricity, Petitioner is vitally and substantially interested in the above-entitled proceeding.

3. As a public utility with its principal offices at Peoria, Illinois and its principal generating station at East Peoria, Illinois, Petitioner is vitally and substantially interested in the industrial development of its territory, a large portion of which is served by the Toledo, Peoria & Western Railroad Company.

4. That because of the character of the Petitioner's operations and its frequent and extensive use of facilities of said railroad, and because of Petitioner's vital interest in the industrial development of its territory, Petitioner is substantially interested in the proposed application of the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company. Petitioner urges this Commission to approve the application as out- [fol. 309] lined in the Petition filed in this proceeding for the following reasons:

(a) Petitioner believes that the property and facilities of the Toledo, Peoria & Western Railroad Company will be maintained and improved under owner-

ship by the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company. Such course is essential to the public welfare in the territory served by such railroad and is to the best interests of the Petitioner, its customers and the communities it serves.

(b) The proposal of the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company for sharing ownership of the Toledo, Peoria & Western Railroad Company and maintaining its present independent management would best guarantee the continued operation of the Toledo, Peoria & Western Railroad on its present basis and is to the best interests of Petitioner, its customers and the communities it serves.

(c) Petitioner believes that the proposal of the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company would also best provide supplies for industrial development of the territories served both by the Petitioner and the Toledo, Peoria & Western Railroad Company, and would be in the best interests of Petitioner and the public.

Wherefore, Central Illinois Light Company prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses and be heard in person or by counsel upon brief and at the oral argument, if [fol. 310] oral argument is granted. Petitioner also requests that the hearing in this matter be held at Peoria, Illinois if it is feasible so to do.

Dated at Peoria, Illinois this 6th day of January, 1956.

Central Illinois Light Company, By E. D. Edwards, Vice President

Duly sworn to by E. D. Edwards, jurat omitted in printing.

PETITION OF THE VILLAGE OF GRIDLEY FOR LEAVE TO INTERVENE—December 6, 1955

Comes now your petitioner, The Village of Gridley, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a Municipal Corporation located in the County of McLean and State of Illinois.

2. Petitioner is now being served by the Toledo, Peoria & Western Railroad.

3. On December 5, 1955 the Board of Trustees of the Village of Gridley adopted the following Resolution:

> RESOLVED that the Village of Gridley, Illinois, shall go on record as being in favor of the proposed acquisition of the Toledo, Peoria & Western Railroad by the Atchison, Topeka & Santa Fe and Pennsylvania Railroads; and that the Village Attorney be instructed to file a Petition of intervention to that effect with the Interstate Commerce Commission stating full support of ICC finance docket 18991.
>
> The above Resolution was passed at a regular meeting of the Board of Trustees of the Village of Gridley held on the 5th day of December, A.D. 1955.

[fol. 314] Petitioners position and interest is that stated in the Resolution of the Board of Trustees adopted on December 5, 1955 and as set forth in this Petition.

Wherefore, said Village of Gridley prays leave to intervene and be treated as a party hereto with the right to

have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Gridley, Illinois, this 6th day of December, A.D. 1955.

L. C. Sieberns, Village Attorney, Gridley, Illinois.

PETITION OF THE VILLAGE OF FORREST FOR LEAVE TO INTERVENE—December 10, 1955

Comes now your Petitioner, the Village of Forrest, Forrest, Illinois, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a municipal corporation in the State of Illinois.

2. On December 7, 1955, the Board of Trustees of the Village of Forrest adopted the following resolution:

> "An application has been filed with the Interstate Commerce Commission for approval of joint ownership of the Toledo, Peoria and Western Railroad by the Santa Fe and Pennsylvania Railroads, which assures operation of the Toledo and Western Railroad as a separate entity under the present management and with its headquarters in the Peoria Area, or vicinity."

RESOLVED that such ownership is for the best interest of the Village of Forrest and that the President [fol. 317] of this Village file a Petition of Intervention with the Interstate Commerce Commission urging the approval of the application of the Santa Fe and Pennsylvania Railroads.

The said Petitioner's interest and position in this proceeding is that stated in the Resolution of the Board of Trustees of the Village of Forrest and adopted December 7, 1955.

Wherefore, said Village of Forrest prays leave to intervene and be treated as a party hereto with the rights to have a notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument if oral argument is granted.

Dated at Forrest, Illinois, this 10th day of December, 1955.

Fred Rieger, President, Board of Trustees.

PETITION OF THE CITY OF FAIRBURY FOR LEAVE TO INTERVENE—December 16, 1955

The City of Fairbury respectfully alleges that it is interested in the issues involved in the above captioned application and desires to become an intervening party in the proceedings and for grounds for such intervention alleges:

1. Petitioner is a Municipality organized under the laws of the State of Illinois.

2. Petitioner is located on the main line track of the Toledo, Peoria & Western Railroad.

3. The following resolution has been adopted by Petitioner's City Council and is now in full force and effect

> [fol. 320] WHEREAS, the Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company have applied to the Interstate Commerce Commission of the United States for approval to acquire control of the Toledo, Peoria & Western Railroad; and
>
> WHEREAS, it appears to be for the best interests of the City of Fairbury that the said Santa Fe and Pennsylvania Railroads shall acquire said ownership and operate the said Toledo, Peoria & Western Railroad as a separate entity as set forth in their application therefor.
>
> NOW, THEREFORE, BE IT RESOLVED That the proper officials of this City be and they are hereby authorized and directed to intervene in the proceedings before the Interstate Commerce Commission in support of said application, to request that the entire hearing before the Commission may be held in the City of Peoria, Illinois or such other place along the line of Toledo, Peoria & Western Railroad as shall be convenient for the appearance of representatives of this and other communities on said line and that said officials shall take such other steps as may be necessary or desirable in urging the approval of said application by the Commission.

The position and interest of the City of Fairbury in the matter is as set forth in the above resolution.

Wherefore, the City of Fairbury requests leave to intervene and be treated as a party hereto, with the right to have notice of and appear at the taking of testimony in

introduce testimony and to be heard in all other respects on this matter by the Commission.

Dated at Fairbury, Illinois, December 16, 1955.

PETITION OF CITY OF BUSHNELL FOR LEAVE TO INTERVENE—October 3, 1955

Comes now your petitioner, City of Bushnell, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. That said City of Bushnell is a Municipal Corporation organized under the City and Village Act of the State of Illinois.

2. That the City of Bushnell is interested in said proceedings and the position it takes is that the matters proposed for in said cause will be to the best interest of the City of Bushnell.

Wherefore, said City of Bushnell prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in per [fol. 323] son or by counsel upon brief and at the oral argument, if oral argument is granted.

PETITION OF GOLDEN RULE CLUB OF CITY OF LAHARPE, INC. FOR LEAVE TO INTERVENE—January 23, 1956

Comes now your Petitioner, the Golden Rule Club of the City of LaHarpe, Illinois, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention, says:

1. That the Golden Rule Club of the City of LaHarpe, Hancock County, Illinois, is an unincorporated civic asso-
[fol. 327] ciation of business and professional men of the City of LaHarpe, Illinois;

2. That Petitioner, LaHarpe Golden Rule Club, is interested in the Application of The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company for the reasons that (1) the community of LaHarpe, Illinois, is located on the line of the Toledo, Peoria & Western Railroad at the point where the Lomax and Keokuk lines converge and that consequently, this community has an economic interest in the Toledo, Peoria & Western Railroad; (2) the Golden Rule Club has an interest in the industrial development of the community of LaHarpe and believes that its interests would best be served

by the acquisition of control of the Toledo, Peoria & Western Railroad by The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company, and further believes that the economic incentives would not exist for stimulating the growth of industry along the line of the Toledo, Peoria & Western Railroad if it were controlled by more than these two carriers; and (3) the [fol. 328] membership of Petitioner, the Golden Rule Club, is comprised of business and professional men, many of whom have occasion to regularly utilize the transportation services afforded by the Toledo, Peoria & Western Railroad, and consequently have a direct interest in the management and operation of this carrier;

3. That Petitioner, Golden Rule Club of the City of LaHarpe, adopted the following Resolution on October 3, 1955.

"Whereas, We have been informed that the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company have contracted to purchase the Toledo, Peoria and Western Railroad, and

"Whereas, We have also been informed that objections have been filed with the Interstate Commerce Commission objecting to said sale, and

"Whereas, We feel and know that the sustaining of said objections to said sale would be detrimental to the best interests of our merchants, our farming community and our country, and

"Whereas, We have been informed that said objections to said sale are pending before the Interstate Commerce Commission at Washington, D.C.,

"Therefore, be it resolved by the Golden Rule Club (the Business and Professional Men's Association) [fol. 329] of the City of LaHarpe, Hancock County, Illinois in Regular Meeting assembled, that we petition and ask that the Interstate Commerce Commission overrule the objections to the sale of the Toledo, Peoria & Western Railroad Company to the Atchison,

Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company and that the said Commission approve and confirm the said sale of the Toledo, Peoria and Western Railroad to the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company."

4. That Petitioner, the Golden Rule Club, urges this Commission to approve the Application of The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company.

Wherefore, said Golden Rule Club prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument. Petitioner further prays that the hearing in connection with this proceeding be set at Peoria, Illinois.

Dated at LaHarpe, Illinois, this 23 day of January, 1956.

PETITION OF THE CITY OF CANTON FOR LEAVE TO INTERVENE—January 19, 1956

Comes now your Petitioner, the City of Canton, Illinois, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding and

desires to intervene in and become a party to said proceeding; and for grounds of the proposed intervention, says:

1. That the City of Canton, Illinois, is a municipal corporation existing under the Revised Cities and Villages Act of Illinois;

2. That Petitioner, the City of Canton, is interested in the Application of The Atchison, Topeka and Santa Fe [fol. 333] Railway Company and The Pennsylvania Railroad Company for the reasons that (1) the City of Canton, Illinois, is located on the line of the Toledo, Peoria & Western Railroad Company and consequently this community has an economic interest in the Toledo, Peoria & Western Railroad; (2) the City of Canton has an interest in the industrial development of the community of Canton and believes that its interests would best be served by the acquisition of control of the Toledo, Peoria & Western Railroad by The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company, and further believes that the economic incentives would not exist for stimulating the growth of industry along the line of the Toledo, Peoria & Western Railroad if it were controlled by more than these two carriers;

3. That Petitioner, the City of Canton, adopted the following Resolution on September 20, 1955:

> "An application has been filed with the Interstate Commerce Commission for approval of joint ownership and control of the TOLEDO, PEORIA & WESTERN RAILROAD by the SANTA FE and PENNSYLVANIA Railroads, which assures continued operation of the TOLEDO, PEORIA & WESTERN RAILROAD as a separate entity under [fol. 334] its present management and with its headquarters remaining on the TOLEDO, PEORIA & WESTERN RAILROAD.
>
> "NOW, THEREFORE, BE IT RESOLVED that such action is in the best interest of the city of Canton, Illinois, and the City Attorney is hereby directed to intervene in the proceedings before the Commission in support of the said application and urgently recommending its approval."

4. That Petitioner, the City of Canton, urges this Commission to approve the Application of The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company.

Wherefore, said City of Canton prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument. Petitioner further prays that the hearing in connection with this proceeding be set at Peoria, Illinois.

PETITION OF THE PEORIA JUNIOR CHAMBER OF COMMERCE FOR LEAVE TO INTERVENE—January 24, 1956

Now comes your petitioner, the Peoria Junior Chamber of Commerce, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention, says:

1. That it is a not-for-profit corporation, organized and existing under and by virtue of the laws of the State of Illinois, with its principal office at 516 Commercial National Bank Building, Peoria, Illinois.

[fol. 338] 2. That your petitioner is a group of more than Four Hundred (400) young men between the ages of 21 and 36 who live in the immediate Peoria area. Your petitioner is on record in favor of the acquisition of the Toledo, Peoria & Western Railroad Company by The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and the Pennsylvania Company for the following reasons:

(a) It is to the best interests of the Peoria area that the offices of the Toledo, Peoria & Western Railroad Company remain in the Peoria area.

(b) The civic mindedness and willingness of civic responsibilities of the present Toledo, Peoria & Western Railroad Company management is a matter of record and well known to the officers and members of this organization and it will be of a definite benefit to our community if the present management of the Toledo, Peoria & Western Railroad Company continues.

(c) The joint acquisition of the Toledo, Peoria & Western Railroad Company by said Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and the Pennsylvania Company will increase and [fol. 339] encourage further industrial development along the line of the Toledo, Peoria & Western Railroad Company and particularly in the Peoria area. Your petitioner is well aware of the necessity for continued industrial development in this area and recognizes the Toledo, Peoria & Western Railroad Company as a leader in our community along these lines.

(d) That your petitioner, the Peoria Junior Chamber of Commerce, further believes that the economic incentives for the industrial development of the property contiguous to the line of the Toledo, Peoria & Western Railroad Company and for the further development of the railroad would not exist if the ownership of the Toledo, Peoria & Western Railroad Company were divided between more than the applicant carriers, The Atchison, Topeka and Santa Fe Railway Company and The Pennsylvania Railroad Company. Your petitioner is therefore opposed to

multiple ownership of the capital stock of the Toledo, Peoria & Western Railroad Company.

Wherefore, said Peoria Junior Chamber of Commerce prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking [fol. 340] of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument.

Dated at Peoria, Illinois, January 24, 1956.

PETITION OF RAILWAY LABOR EXECUTIVES' ASSOCIATION FOR LEAVE TO INTERVENE—January 5, 1956

Comes now your petitioner, Railway Labor Executives' Association, and respectfully represents that it has an interest in the matter in controversy in the above entitled proceeding, that it desires to intervene in and become a party to said proceeding, and for grounds in support of said petition, respectfully shows:

1.

That the petitioner, Railway Labor Executives' Association, is a voluntary unincorporated association, with which are affiliated the following standard international railway labor organizations:

Switchmen's Union of North America
Order of Railroad Telegraphers
American Train Dispatchers' Association
Railway Employes' Department, A.F. of L.
International Association of Machinists
International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers of America
[fol. 344] Sheet Metal Workers' International Association
International Brotherhood of Electrical Workers
Brotherhood Railway Carmen of America
International Brotherhood of Firemen & Oilers
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes
Brotherhood of Railroad Signalmen of America
International Organization Masters, Mates & Pilots of America
National Marine Engineers' Beneficial Association
Hotel & Restaurant Employees' and Bartenders International Union
Railroad Yardmasters of America
Brotherhood of Maintenance of Way Employes
Brotherhood of Sleeping Car Porters
Brotherhood of Locomotive Firemen & Enginemen
Brotherhood of Railroad Trainmen
Order of Railway Conductors and Brakemen

The principal office of the petitioner, Railway Labor Executives' Association, is located at 401 Third Street, N.W., Washington 1, D. C.

2.

That certain of the organizations comprising this petitioner represents employees of the carriers involved for the purpose of collective bargaining and have agreements with said carrier concerning rates of pay, rules, and working conditions.

3.

This application, in part, falls within the provisions of Section 5(2) of the Interstate Commerce Act and is there-

fore a proposed transaction in which the Commission is obligated by Section 5(2)(f) to give weight to the interests of the carriers' employees in its consideration of the merits of the transaction. The evidence which is to be developed before the Commission may well disclose serious and substantial adverse effect which will result to certain employees [fol. 345] of the involved carriers should the proposed transaction be approved by the Commission. Petitioner has a direct and substantial interest in any terms and conditions which parties to the proceeding may propose for the protection of employee interests, as well as in itself proposing the imposition of terms and conditions which may be required for the protection of the interests of said employees.

4.

That the intervention of this petitioner will not broaden the issues already before the Commission in this proceeding.

Wherefore, your petitioner, in its own behalf and in behalf of the international standard railway labor organizations affiliated with it, together with the individual members of such organizations, prays leave to intervene in this cause and be treated as a party hereto with the right to have notice of and participate in any further proceeding, to appear thereat, to present testimony, to produce and examine witnesses, and to be heard by counsel upon brief or oral argument.

Respectfully submitted,

Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio, Philip L. Hoag, 741 National Bank Building, Toledo 4, Ohio, Attorneys for Petitioner.

Of Counsel: Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio.

PETITION OF THE CITY OF CHENOA FOR LEAVE TO INTERVENE—December 20, 1955

The City of Chenoa respectfully alleges that it is interested in the issues involved in the above captioned application and desires to become an intervening party in the proceedings and for grounds for such intervention alleges:

1. Petitioner is a Municipality organized under the laws of the State of Illinois.

2. Petitioner is located on the main line track of the Toledo, Peoria & Western Railroad.

3. The following resolution has been adopted by Petitioner's City Council and is now in full force and effect:

> Resolved that the City of Chenoa, Illinois, shall go on record as being in favor of the proposed acquisition of the Toledo, Peoria & Western Railroad by the Atchison, Topeka & Santa Fe and Pennsylvania Railroads, and that the City Clerk be instructed to file a [fol. 349] petition of intervention to that effect with the Interstate Commerce Commission stating full support of Interstate Commerce Commission Finance Docket #18991;

The position and interest of the City of Chenoa in this matter is as set forth in the above resolution.

Wherefore, the City of Chenoa requests leave to intervene and be treated as a party hereto, with the right to have notice of and appear at the taking of testimony to introduce testimony and to be heard in all other respects on this matter by the Commission.

Dated at Chenoa, Illinois, December 20th, 1955.

No. 19086

APPLICATION OF THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY for authority under Section 5(2) of the Interstate Commerce Act to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of its capital stock.

PETITION OF GUY A. GLADSON AND WILMINGTON TRUST COMPANY, AS TRUSTEES, FOR LEAVE TO INTERVENE—January 25, 1956

To the Interstate Commerce Commission:

Now come Guy A. Gladson and Wilmington Trust Company, a corporation, as trustees, petitioners, and respectfully represent that, as such trustees, they have an interest in the matters in controversy in this proceeding, and desire to intervene in and become parties thereto; and for grounds of the proposed intervention say:

(1) Petitioners are co-trustees of the Estate of George P. McNear, Jr. duly appointed by and acting under the power conferred by the Last Will and Testament of said George P. McNear, Jr.

[fol. 353] (2) As such co-trustees petitioners hold the legal title to approximately 82% of the capital stock of

Toledo, Peoria & Western Railroad Company proposed to be acquired in these proceedings. Petitioners, as such co-trustees, have agreed, subject to the authorization of this Commission, to sell all such shares of capital stock to The Atchison, Topeka & Santa Fe Railway Company, an applicant in Finance Docket No. 18991.

(3) Petitioners believe that the acquisition of control of Toledo, Peoria & Western Railroad Company by applicants in Finance Docket No. 18991 is in the public interest and file this petition in support of the application of said applicants for the authority to make such acquisition.

Wherefore, petitioners pray leave, as such co-trustees, to intervene in this proceeding and be treated as parties hereto, with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard by counsel upon brief and at the oral argument, if oral argument is granted.

PETITION OF ELIZABETH M. MCNEAR, INDIVIDUALLY AND AS GUARDIAN FOR JOHN W. MCNEAR, ELIZABETH H. MCNEAR, THE HANOVER BANK, AND WILLIAM MCDOWELL FREDERIC AND COMMERCIAL NATIONAL BANK OF PEORIA AS EXECUTORS OF THE ESTATE OF CLINTON M. MCNEAR, FOR LEAVE TO INTERVENE—January 24, 1956

Come now petitioners, Elizabeth M. McNear, individually and as guardian for John W. McNear, Elizabeth H. McNear, The Hanover Bank, and William McDowell Frederic and Commercial National Bank of Peoria as Executors of the Estate of Clinton M. McNear, and respectfully represent that they have an interest in the matters in controversy in the above entitled proceedings and desire to intervene in and become parties to said proceedings, and for grounds of the proposed intervention state:

1. Petitioner Commercial National Bank of Peoria, a [fol. 356] national banking association, and William McDowell Frederic are duly appointed and acting Executors of the Estate of Clinton M. McNear; said Estate consists, in part, of 527 shares of the capital stock of the Toledo, Peoria & Western Railroad Company. The Hanover Bank, a corporation organized under the laws of the State of New York, is the owner of 13,142 shares of the capital stock of the Toledo, Peoria & Western Railroad Company. Elizabeth H. McNear is a beneficiary under the trust created by the Will of George P. McNear, Jr. The remaining petitioners each own shares of the capital stock of the Toledo, Peoria & Western Railroad Company and are also beneficiaries under the trust created by the Will of George P. McNear, Jr.; said trust estate consists, in part, of [illegible] shares of the capital stock of the Toledo, Peoria & Western Railroad Company.

2. The interest of each of the petitioners as owners of shares of the capital stock of the Toledo, Peoria & Western Railroad Company and as income beneficiaries under the trust created by the Will of George P. McNear, Jr., is as follows:

	Individual Holdings	*Income Beneficiaries under Trust*
Elizabeth M. McNear	450 shares	36,900 shares
Elizabeth M. McNear as Guardian for John W. McNear	254 "	6,150 "
Elizabeth H. McNear		6,150 "
William McDowell Frederic and Commercial National Bank of Peoria as Executors of the Estate of Clinton M. McNear	527 "	
The Hanover Bank	13,142 "	

(fol. 357) 3. Petitioners have entered into agreements to sell to The Atchison, Topeka and Santa Fe Railway Company all of the capital stock of the Toledo, Peoria & Western Railroad Company owned by them, on the terms and conditions set out in the application in Finance Docket No. 18991, Exhibits 7-A and 7-C. Similarly, the Trustees under the Will of George P. McNear, Jr., have agreed to sell to the Atchison, Topeka and Santa Fe Railway Company all of the capital stock of the Toledo, Peoria & Western Railroad Company held by them as Trustees, as shown by Exhibit 7 to the Application in Finance Docket No. 18991.

4. Petitioners desire to intervene in support of the application in Finance Docket No. 18991 and request the Commission to find that consummation of the agreements described in paragraph 3 hereof is consistent with the public interest and to grant the authority sought by the application in Finance Docket No. 18991.

Wherefore petitioners pray for leave to intervene herein and be treated as parties hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard by counsel upon brief and at oral argument, if oral argument is granted.

Elizabeth M. McNear, Individually and as Guardian for John W. McNear, Elizabeth H. PETITION OF THE BUSHNELL CHAMBER OF COMMERCE, BUSHNELL, ILLINOIS, FOR LEAVE TO INTERVENE TO THE INTERSTATE COMMERCE COMMISSION—January 28, 1956

Comes now the Petitioner, The Bushnell Chamber of Commerce, Bushnell, Illinois, and respectfully represents that it has an interest in the matters in controversy in the above-entitled proceedings and desires to intervene in and become a party to said proceedings and for grounds of the proposed intervention, says:

1) That the Petitioner is an unincorporated association the membership of which represents the business and pro-

fess onal interests of the City of Bushnell, Illinois, and surrounding area.

[fol. 359] 2) That the Petitioner, The Bushnell Chamber of Commerce, is interested in the continued efficient operation of the Toledo, Peoria & Western Railroad; that a number of its members ship large quantities of goods into and out of Bushnell, Illinois, over the Toledo, Peoria & Western Railroad; that the Petitioner approves of the continued operation of the Toledo, Peoria & Western Railroad under independent management as proposed in the application of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company, and Pennsylvania Company under Finance Docket No. 18901 before the Interstate Commerce Commission; that the Petitioner feels that it is in the public interest for the said application to be approved, and therefore supports the position of The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company, and the Pennsylvania Company.

Wherefore, the Petitioner, The Bushnell Chamber of Commerce, prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief [fol. 360] and at the oral argument, if oral argument is granted.

Dated at Bushnell, Illinois, this 28th day of January, 1956.

Respectfully submitted,

The Bushnell Chamber of Commerce, By James R. Roark, President, Bushnell, Illinois.

[Title omitted]

PETITION OF THE UNITED ELECTRIC COAL COMPANIES FOR LEAVE TO INTERVENE—January 30, 1956

Comes now your Petitioner, The United Electric Coal Companies, and respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

1. Petitioner is a corporation organized and existing under the laws of the State of Delaware and duly authorized to do business in Illinois. Its principal office is located at 307 North Michigan Avenue, Chicago, Illinois.

2. Petitioner is engaged in the mining and production of coal in central and southern Illinois territories. For several years last past Petitioner has shipped substantial tonnages of coal to Peoria, Illinois, over the Toledo, Peoria & Western Railroad Company. The receivers of Petitioner's coal at Peoria are making plans to expand their operations within the next 5 years so as to receive over the Toledo, Peoria & Western Railroad Company lines, hundreds of thousands of additional tons of coal. In the opinion of Petitioner these tonnages would be vitally and adversely af-
[fol. 363] fected by any future course which would permit said railroad to be dismembered or divided in ownership so as to cause a change in the present operation and management. As a result of Petitioner's extensive use and reliance on the facilities of the Toledo, Peoria & Western Railroad Company for the delivery of Coal to its customers, Petitioner is vitally and substantially interested in the above entitled proceeding.

3. The policy announced by the Santa Fe Railway Company and the Pennsylvania Railroad Company "to continue the present independent management and operation of

Toledo, Peoria & Western Railroad Company" will insure continuity of management, operation and service as in the past and this declaration of policy is of paramount interest to Petitioner.

4. As a large producer of coal with mines close to Peoria, Petitioner is vitally and substantially interested in the industrial development of this territory, a large portion of which will be served by the Toledo, Peoria & Western Railroad Company.

5. Because of the character of the Petitioner's operations and its frequent and extensive use of facilities of said railroad, and because of Petitioner's vital interest in the industrial development of the territory, Petitioner is substantially interested in the proposed application of the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company to acquire control of the Toledo, Peoria & Western Railroad Company. Petitioner urges this Commission to approve the application as outlined in the Petition filed in this proceeding for the following reasons:

[fol. 364] (a) Petitioner believes that the property and facilities of the Toledo, Peoria & Western Railroad Company will be maintained and improved under ownership by the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company. Such course is essential to the public welfare in the territory served by such railroad and is to the best interests of the Petitioner, its customers and the communities it serves.

(b) The proposal of the Atchison, Topeka and Santa Fe Railroad Company and the Pennsylvania Railroad Company for sharing ownership of the Toledo, Peoria & Western Railroad Company and maintaining its present independent management would best guarantee the continued operation of the Toledo, Peoria & Western Railroad on its present basis and is to the best interests of Petitioner, its customers and the communities it serves.

(c) Joint ownership of the Toledo, Peoria & Western Railroad by the Santa Fe Railway Company and the Pennsylvania Railroad Company would insure an adequate car supply at all times which is of vital importance to both the shipper and receiver of coal.

(d) Petitioner believes that the proposal of the Atchison, Topeka and Santa Fe Railway Company and the Pennsylvania Railroad Company would provide the [fol. 365] impetus for industrial development of the territories served by the Toledo, Peoria & Western Railroad Company, and would be in the best interests of Petitioner and the public.

Wherefore, said The United Electric Coal Companies prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Chicago, Illinois this 30th day of January, 1956.

John L. Bordes of Kirkland, Fleming, Green, Martin & Ellis, Attorneys for Petitioner, 33 North LaSalle Street, Chicago 2, Illinois, RAndolph 6-2929.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 19086

APPLICATION OF THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY for authority under Section 5(2) of the Interstate Commerce Act to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of its capital stock. Filed October 13, 1955

[fol. 373] *To The Interstate Commerce Commission, Washington 25, D. C.*

INTRODUCTORY STATEMENT

This is an application under Section 5(2) of the Interstate Commerce Act for authorization and approval of the acquisition of control of the Toledo, Peoria & Western Railroad Company by The Minneapolis & St. Louis Railway Company through purchase of its capital stock.

The M&StL is no stranger or latecomer to efforts to acquire control of the TP&W.

As early as June 10, 1954, and at all times thereafter to and including May 26, 1955, the M&StL was actively seeking to acquire the controlling stock in the TP&W from the Trustees under the Will of George P. McNear, Jr. These activities were commenced and pursued by the M&StL long prior to any negotiations by the Pennsylvania Railroad or the Atchison, Topeka & Santa Fe Railway Company to acquire such control.*

[fol. 374] On or about April 15, 1955, the Wilmington Trust Company, one of the Trustees, purported to sell the controlling stock to the Pennsylvania and Santa Fe. Thereafter, believing such "sale" to be invalid, the M&StL offered to buy the controlling stock from the Trustees at a substantially higher price than had theretofore been offered by the Pennsylvania-Santa Fe. On May 26, 1955, while the M&StL's bid was still pending, the Trustees accepted a bid of the Santa Fe which was higher than the M&StL's by only an immaterial amount, and the M&StL was not given the opportunity to meet or exceed this last offer of the Santa Fe.

The Pennsylvania, the Santa Fe and the Pennsylvania Company** have heretofore filed an application to acquire control of the TP&W pursuant to agreements entered into by the Santa Fe to purchase, subject to Commission approval, at least 99.2 per cent of the total shares of the

---

* The companies referred to above are respectively termed the "TP&W" "M&StL", "Santa Fe" and "Pennsylvania."

** A wholly owned subsidiary of Pennsylvania Railroad.

TP&W stock outstanding. Such application has been assigned Finance Docket No. 18991. The M&StL has heretofore been granted leave to intervene in those proceedings in opposition to the Pennsylvania-Santa Fe application.

By filing this application, the M&StL believes that it can demonstrate to the Commission in a comparative or consolidated hearing on both applications, that, to paraphrase the *Carolina Coach Purchase case*,* "it would be more desirable in the public interest" for control of the TP&W to be acquired by the M&StL alone, rather than by the Pennsylvania-Santa Fe alone or in combination with other railroads. The M&StL further believes that only by a comparative consideration of the two applications together can the Commission administer Section 5 in accordance with the purpose and intent of Congress to place acquisition of control of railroads within the control of the Commission rather than within the control of private corporations.

[fol 375]

I. Contents of Application

(a) Identification of applicant, or of each applicant, if there are two or more applicants.

1. Full and correct name of applicant and the business address of applicant (street and number, city, county and State).

Answer: The Minneapolis & St. Louis Railway Company, 111 East Franklin Avenue, Minneapolis 4, Hennepin County, Minnesota.

2. Whether applicant is an individual, firm, copartnership, corporation, company, association, joint stock company, trustee, receiver, assignee, or other personal representative, and trade name or style, if any, under which applicant is doing business.

Answer: Applicant is a corporation organized and existing under the laws of the State of Minnesota.

3. Whether applicant is a carrier by railroad or an express company subject to Part I of the Act, or a water

* Carolina Coach Co. of Virginia Purchase, Richmond-Greyhound Lines, Inc., 38 M.C.C. 347.

carrier subject to Part III of the Act, or a person which is not a carrier subject to the Act.

Answer: Applicant is a carrier by railroad subject to Part I of the Interstate Commerce Act.

4. State or States in which any part of the property of the carrier or carriers involved is situated, and, in case of a water carrier, in which any port served by such carrier is located.

Answer: The properties owned by applicant are situated in the States of Illinois, Iowa, Minnesota and South Dakota.

5. The name, title, and business address of the officer or officers to whom correspondence with respect to the application should be addressed.

Answer: Burton K. Wheeler and Edward K. Wheeler, 704 Southern Building, Washington 5, D. C., Special Counsel for The Minneapolis & St. Louis Railway Company, and Richard Musenbrock, General Counsel, The Minneapolis & St. Louis Railway Company, 111 East Franklin Avenue, Minneapolis 4, Minnesota.

[fol. 376] 6. If applicant or other party to the transaction has been authorized by the Interstate Commerce Commission to engage in interstate or foreign commerce, the date of the certificate, permit, or temporary authority, and the number of the Commission's docket assigned to the application upon which such certificate, permit, or temporary authority was issued or granted; or, if application to engage in interstate or foreign commerce has been made but not granted, date of the application and the docket number.

Answer: By decision dated March 4, 1941, in Finance Docket No. 12414 (244 I.C.C. 357), applicant was authorized to purchase portions of the lines of railroad of The Minneapolis & St. Louis Railroad Company. In the same docket and in the same decision The Minneapolis & St. Louis Railroad Corporation was authorized to purchase other portions of the lines of railroad of the Railroad Company—both pursuant to Section 5(2) of the Interstate Commerce Act.

By decision dated November 25, 1944, in Finance Docket No. 14667 (257 I.C.C. 815—not reported in full), applicant was authorized to merge its properties with those of The

Minneapolis & St. Louis Railroad Corporation for ownership, management and operation pursuant to Section 5(2) of the Interstate Commerce Act.

Since December 1, 1944, applicant has been operating the aforesaid merged properties pursuant to authority of the Interstate Commerce Commission, and has been engaged in interstate and foreign commerce.

(b) Information respecting applicant, or each applicant if there are two or more applicants.

1. If applicant is a corporation:

(1) Date of incorporation and Government, State, or Territory of incorporation.

Answer: March 8, 1939, under the laws of the State of Minnesota.

[fol. 377] (2) Name and business address of directors.

Answer:

Name	*Business Address*
Arthur S. Bowes	1420 Lake Shore Drive, Chicago, Illinois.
Archibald G. Bush	900 Fauquier Avenue, St. Paul, Minnesota
Henry DeMeester	4290 Ocean Shore Boulevard, Ormond Beach, Florida
John W. Devins	111 East Franklin Avenue, Minneapolis, Minnesota
William E. Fay	210 South Center Street, Joliet, Illinois.
Ben W. Heineman	135 South LaSalle Street, Chicago, Illinois.
Franklin Lyons	208 South LaSalle Street, Chicago, Illinois.
Joseph Nye	14 Wall Street, New York, New York.
Lee A. Potter	121 South Second Street, Minneapolis, Minnesota
Jouett Shouse	1966 National Press Building, Washington, D. C.
Howell P. E. Stevens	50 Hennepin Avenue, Minneapolis, Minnesota

(3) Name, title, and business address of officers:
Answer:

Name	*Title*	*Business Address*
W. Devins	President	111 East Franklin Avenue, Minneapolis, Minnesota.
W. Nelson	Vice President and Traffic Manager	111 East Franklin Avenue, Minneapolis, Minnesota.
S. Provo	Vice President and Comptroller	111 East Franklin Avenue, Minneapolis, Minnesota.
E. Eaton	Secretary	111 East Franklin Avenue, Minneapolis, Minnesota.
E. Bailey	Treasurer	111 East Franklin Avenue, Minneapolis, Minnesota.
Muscabrock	General Counsel	111 East Franklin Avenue, Minneapolis, Minnesota.
Powell	General Solicitor	111 East Franklin Avenue, Minneapolis, Minnesota.

(4) Name and business address of 20 principal stockholders as of September 30, 1955, and their respective holdings.

	Business Address	*Holdings as of Sept. 30, 1955*
	80 Beaver Street New York, N. Y.	20,223
DuPont Co.	1 Wall Street, New York, N. Y.	24,487
Hammond and Co.	135 West Adams Street, Chicago 90, Ill.	22,634
Lynch, Pierce, and Beane	70 Pine Street, New York, N. Y.	15,477
Wagner	Drake Tower Apts., 179 Lake Shore Drive, Chicago, Ill.	14,384

Name	*Business Address*	*Holdings as of Sept. 30, 19[illegible]*
Bache and Co.	36 Wall Street, New York, N. Y.	11,825
Travelers Ins. Co.	700 Main Street, Hartford, Conn.	11,200
Smith Barney and Co.	14 Wall Street, New York, N. Y.	10,587
[fol. 379]		
Eastman Dillon & Co.	15 Broad Street, New York, N. Y.	9,550
David A. Noyes & Co.	208 South LaSalle Street, Chicago, Illinois	8,900

2. If applicant is a copartnership:
Answer: Not applicable.

3. If applicant is an association or other form of organization, except a corporation:
Answer: Not applicable.

4. If applicant is a trustee, receiver, assignee, or a personal representative of the real party in interest:
Answer: Not applicable.

5. If applicant is not a carrier:
Answer: Not applicable.

6. The length of time applicant has been continuously engaged in the type of business in which it is now engaged; and, if applicant is not a carrier, particulars of its present and prospective activities which have or may have a relation to transportation subject to the Interstate Commerce Act or facilities used therein.

Answer: See answer to Question (a) 6 supra. Applicant and its predecessors in title and interest have been operating railroad properties in interstate and foreign commerce since 1887, the date of the passage of the Interstate Commerce Act—and prior thereto.

Applicant is also engaged in the transportation of property in interstate and foreign commerce by motor vehicle

pursuant to Part II of the Interstate Commerce Act (see Docket MC 104873).

7. Whether or not applicant is controlled by any other corporation or corporations, and, if such control is held, [fol. 380] state the name of the controlling corporation or corporations, the form of control, whether sole or joint, direct or indirect, and its extent.

Answer: Applicant is not controlled by any other corporation or corporations.

8. The measure of control or ownership, if any, now exercised by applicant over any carrier corporation subject to the Interstate Commerce Act, or over the properties of such corporation.

Answer: (a) The Railway Transfer Company of the City of Minneapolis, 100 per cent control.

(b) The Minnesota Transfer Railway Company, 11.11 per cent control. The Minnesota Transfer Railway Company is jointly controlled through ownership of capital stock by applicant, Chicago, Burlington & Quincy Railroad Company, Chicago Great Western Railroad Company, Chicago, Milwaukee, St. Paul & Pacific Railroad Company, Chicago, Rock Island & Pacific Railroad Company, Chicago, St. Paul, Minneapolis & Omaha Railway Company, Great Northern Railway Company, Minneapolis, St. Paul & Sault Ste. Marie Railroad Company, and Northern Pacific Railway Company, each owning a one ninth (1/9) interest.

9. If applicant, or the real party in interest, is part of a system or group of corporations or other persons, the relationship of the applicant, or of the real party in interest, to the members of such system or group, including the form and extent of such relationship, direct or indirect.

Answer: Applicant is not a part of a system or group of corporations or other persons.

10. Whether there are any intercorporate relationships, not disclosed in responses to prior instructions, through holding companies, ownership of securities, or otherwise, direct or indirect, between applicant and any carrier or person affiliated with any carrier, or between any person

affiliated with applicant and any carrier or person affiliated with any carrier, at the time of making the application; if so, the nature and extent of such relationship; and, if applicant owns securities of a carrier corporation or corporations subject to the Act, the name of the corporation, [fol. 381] a description of the securities, and the par value of each class of securities held.

Answer: Applicant has no such relationships, intercorporate or otherwise, as set forth in the above question. See answer to Question 8 supra as to 100 per cent control of The Railway Transfer Company of the City of Minneapolis, and 11.11 per cent control of Minnesota Transfer Railway Company. Various directors of the applicant have investments not amounting to control in other railroads.

11. Whether any of the applicants or any of their affiliates have officers or directors in common with any other applicant or its affiliates; and, if so, a reference to the Commission's order, or orders, if any, authorizing the holding of such positions in common, with the names of such officers or directors, and the position held in each corporation.

Answer: Neither applicant nor The Railway Transfer Company of the City of Minneapolis has any officers or directors in common with any other applicant or its affiliates.

12. The amount of applicant's outstanding capital stock, by classes, and in connection therewith the par value of each share, its voting rights, if any, the total number of stockholders of record, and the voting power of all security holders.

Answer: Applicant has an authorized issue of 800,000 shares of common stock, no par value. As of September 30, 1955, applicant held in its treasury 21,900 of these shares; and as of the same date 765,363 full shares and 1119 thirds of shares (without voting rights until transferred into full shares) were outstanding in the hands of the public. The balance of 12,364 shares are held for issuance in exchange for bonds of predecessor company pursuant to the plan of reorganization of predecessor company (see Finance Docket No. 12414, 240 I.C.C. 57, and 244 I.C.C. 357).

The stated value as fixed by the Interstate Commerce Commission is $25 per share. See Finance Dockets Nos. 15426 and 18383. The shares possess voting power without preference or restriction in the proportion of one vote for each share. As of September 30, 1955, 787,263 shares were [fol. 382] held by 2,691 stockholders of record. The stockholders of applicant possess the sole voting power.

(c) Information respecting the nature of the transaction proposed and the terms and conditions thereof.

1. The nature of the transaction, whether a consolidation or merger, or a purchase, lease, contract to operate properties, or any part thereof, of a carrier subject to part I or part III of the act, or for acquisition of control of such carrier, or to acquire trackage rights over or joint ownership in, or joint use of, any railroad line or lines.

Answer: The proposed transaction for which approval is sought is the acquisition of control of the Toledo, Peoria & Western Railroad Company by applicant through ownership of its capital stock.

2. Briefly, the terms and conditions of the contract or agreement pursuant to which the proposed transaction is to be effected, including the manner in which it is proposed to consummate the transaction and the consideration, in money or otherwise, to be paid by applicant or applicants.

Answer: Applicant proposes to purchase for cash all of the capital stock of the Toledo, Peoria & Western Railroad Company owned and held by the Trustees of the Estate of George P. McNear, Jr., and owned and held by all other shareholders of the TP&W, at a price of $135 per share.

To effectuate this purchase, the M&StL proposes to enter into a contract with the sellers in substantially the form annexed hereto as Exhibit 7.

3. Whether there is any financial or other relationship, direct or indirect, not disclosed in responses to prior instructions, existing at the present time between applicant or applicants and the other party or parties to the transaction proposed; and, if so, a full explanation of such relationship.

Answer: There is no financial or other relationship, direct or indirect, not disclosed in response to prior instruc-
[fol. 383] tions, existing at the present time between applicant and the other party to the transaction proposed.

4. The route, termini, and mileage of the lines to be consolidated, merged, purchased, leased, operated, or controlled, giving the principal points of interchange, with ports served in cases involving carriers subject to part III of the act, and with main line mileage and branch line mileage shown separately in case of railroad properties.

Answer: The route and termini of the TP&W are as follows: From the eastern terminus at Effner, Indiana, via Peoria, Illinois, to the western termini, at Lomax, Illinois, and Keokuk, Iowa, with a branch from Hamilton, Illinois, to Warsaw, Illinois. The only point of interchange between applicant and the TP&W is at Peoria, Illinois. Other points of interchange with other railroads are as follows: Effner, Indiana; Lomax, Sheldon, Webster, Watseka, Gilman, Forrest, Fairbury, Honegger, Chenoa, El Paso, Eureka, Washington, Peoria, Hollis, Farmdale, Canton, Cuba, Bushnell, Ferris, Elvaston and Hamilton, all in Illinois; and Keokuk, Iowa.

The mileage of the TP&W consists of 234.4 miles of main line, and 5 miles of branch line.

5. Whether the property involved in the proposed transaction includes all the property of the applicants proposing a consolidation or merger, or of the carrier whose property it is proposed to purchase, lease, or operate, or control of which is proposed; and, if not, definitely what property is included in the proposed transaction.

Answer: Not applicable. Acquisition of control of the TP&W through stock ownership is sought by applicant.

6. Value of each of the properties involved in the proposed transaction as found by the Commission, or if such value has not been found by the Commission, as appraised for the purposes of the proposed transaction; and, separately, the net cost of additions and betterments made after the date of valuation or appraisal.

Answer: Not applicable. This is an application for acquisition of control through stock ownership and not acquisition of property.

fol. 384] 7. The policy and practice followed by each party to the transaction with respect to reserves for depreciation and similar reserves, including rates by classes of property.

Answer: Not applicable. This is an application for acquisition of control through stock ownership and not acquisition of property.

8. The market value of any securities acquired or proposed to be acquired in consummating the proposed transaction; or, if there be no ascertainable market value, the estimated value, giving the basis of the estimate.

Answer: The stock of the TP&W is not listed on any exchange, but its market value has been established at $135 per share by the amounts bid for the stock when recently offered for sale.

9. If any of the property covered by the application is encumbered and applicant has agreed to assume obligation or liability in respect thereof:

Answer: Not applicable.

10. If a consolidation or merger is proposed:

Answer: Not applicable.

(d) Facts and circumstances relied upon to show that the proposed transaction is within the scope of section 5(2)(a) of the Interstate Commerce Act, will be consistent with the public interest, and will otherwise be within the requirements of section 5, particularly.

1. In case of any proposed transaction:

(1) To establish that the transaction covered by the application will be consistent with the public interest.

Answer: (a) The Trustees under the Will of George P. McNear, Jr., owners of 82 per cent of the total outstanding capital stock of the TP&W, desire to sell their controlling interest in the company in order to diversify the holdings of the Trust Estate. Under these circumstances, the acquisition of such control by the M&StL will definitely promote

the public interest. The Commission has recognized that it [fol. 385] is in the public interest for control to pass from non-carrier interests which no longer desire it, to carrier auspices.

(b) The M&StL is the natural railroad to acquire control of the TP&W. About 5 per cent of the M&StL's total revenue loads is interchanged by it with the TP&W at Peoria, Illinois. In 1954, $1,251,981 or 6.4 per cent of the M&StL's total freight revenues were derived from revenue loads interchanged with the TP&W at Peoria.

No other carrier interested in the acquisition of all or a portion of the control of the TP&W interchanges anything like such a proportion of its total revenue loads with the TP&W, or derives anything like such a proportion of its total revenues from its interchange with the TP&W.

Control by the M&StL will assure continuance of this vital and profitable interchange service which otherwise may be lost if other carriers interested in the TP&W are permitted to acquire control of that property.

The TP&W is a natural extension of the M&StL. The M&StL has based its advertising, its traffic solicitation and much of its service to shippers upon the conception that it is "The Peoria Gateway," providing a bypass of the congested Chicago area. Its acquisition of the TP&W would implement the service that it now provides to shippers to the advantage of both the M&StL and the TP&W. Its failure to acquire the TP&W would materially curtail the expansion of the M&StL's service and the full use and development of the Peoria gateway.

(c) Substantial economies would result from the joint operation of the M&StL and the TP&W which would redound not only to the benefit of these two small carriers, but would also redound to the benefit of shippers and the public generally through improved service.

Both the M&StL and the TP&W are small roads presently in excellent financial and physical condition. Their prior histories, however, emphasize the need for continual alertness to maintain and strengthen that financial and physical condition, and to enable them to compete successfully with their larger, neighboring roads.

(d) The acquisition of control of the TP&W by the M&StL would materially enhance competition. The M&StL [fol. 386] alone of all carriers interested in the acquisition of all or a portion of the control of the TP&W has no conflict of interest with the TP&W, or the Peoria gateway, and no incentive other than to maximize the traffic and service that would be rendered over the combined lines.

Conversely, all other carriers interested in the acquisition of all or a portion of the control of the TP&W have their main lines, interests and investments in direct competition with the TP&W and the Peoria gateway. Hence, acquisition of the TP&W by any other interested carriers would sharply decrease competition, not only in that it would be the acquisition of the TP&W by its competitors, but also in that, for the reasons stated above, it would materially decrease the ability of the M&StL to compete with such other carriers.

The Commission has recognized that an acquisition by two of the strongest carriers in the United States, which endangers or impairs the operation of another railroad, such as the M&StL, is contrary to the public interest.

(e) Additional affirmative harm would result to the M&StL from its failure to acquire control of the TP&W. At the present time, an important portion of the M&StL's bridge traffic is received by it at Peoria and delivered by it to the Santa Fe at Nemo, or received by it at Nemo and delivered by it to connecting carriers, including the TP&W, at Peoria. If the TP&W were acquired by the Pennsylvania and Santa Fe, it would be to the advantage of these large roads to utilize their extensive traffic departments for the purpose of diverting such bridge traffic from the M&StL to the TP&W between Peoria and Lomax. In 1954, such bridge traffic over the M&StL between Nemo and Peoria amounted to 9,891 revenue carloads, contributing $664,397 of total M&StL freight revenues. This amounted to 4.7 per cent of the M&StL's total revenue carloads and 3.4 per cent of its total freight revenues.

(f) The utility of the TP&W as an essential link in a fast, strong and reliable through transportation service

would be enhanced for all of the reasons stated above and elsewhere in this application; nothing in the acquisition of the control of the TP&W by the M&StL would or could adversely affect the function of the TP&W as an important bridge carrier.

[fol. 387] The M&StL and the TP&W are complementary. No other carrier interested in acquiring all or a portion of the control of TP&W can operate it to greater advantage or more economically than the M&StL.

By acquiring control of TP&W, the M&StL will not only strengthen its own freight service but will also materially increase the ability of TP&W to serve its own public and its other railroad connections. The mutual support of these two small railroads will increase the stability of both roads, will assure fast, strong and dependable service and thus will encourage development of the territories served and the location of new industries along their lines.

(2) To explain and properly support the financial considerations involved in the proposed transaction, including an explanation of economies, if any, to be effected in operation, and increase, if any, in traffic, revenues, earnings available for fixed charges, and net earnings, expected to result from the consummation of the proposed transaction.

Answer: (a) Unlike any other proposal for the acquisition of control of the TP&W, acquisition by the M&StL would result in substantial economies. Among such economies would be the elimination or substantial reduction of duplicate facilities and duplication of effort of all kinds.

(b) For the reasons set out above, the acquisition by the M&StL of control of the TP&W would enable both to compete with the Chicago and other gateways for traffic on more vigorous terms, and hence would be expected to increase gross revenues. Revenues of the M&StL and TP&W as presently constituted and without regard to anticipated economies or additional revenues would be more than sufficient to meet fixed charges, provide necessary funds for the continued maintenance, improvement and modernization of the combined physical plant, and provide satisfactory net income available for dividends. The M&StL con-

siders that the purchase of control of the TP&W will prove to be a sound and profitable investment.

An additional advantage of control by the M&StL will be the retention of future dividend payments within the railroad industry.

fol. 388 (3) To show the effect of the proposed transaction upon adequate transportation service to the public.

Answer: The M&StL would have every incentive to maximize and improve the transportation service to the public via the TP&W. It would have no conflict of interest with that route. The strengthening of the M&StL through the acquisition of control of the TP&W would enable both to increase and improve their transportation service. No diminution in the present transportation service afforded by the TP&W will occur.

(4) To establish that the increase, if any, of total fixed charges resulting from the proposed transaction would not be contrary to the public interest.

Answer: It is contemplated that subject to the approval of the Commission, the M&StL would issue $12,000,000 First Mortgage Sinking Fund Bonds bearing interest at the rate of approximately 4¼ per cent, maturing 30 years from date with equal annual sinking fund payments of $480,000 commencing in the sixth year.

There are attached hereto the following schedules:

Schedule I. Statements of Income and Earned Surplus (actual)

(i) For the M&StL and its subsidiary for the eleven years ended December 31, 1954.

(ii) For the TP&W for the seven years ended December 31, 1954.

(iii) For the M&StL and TP&W combined for the seven years ended December 31, 1954.

Schedule II. Pro forma Condensed Combined Statements of Income and Earned Surplus for

the M&StL and TP&W for the seven years ended December 31, 1954, giving effect to the proposed issuance of bonds on the assumption that they had been issued January 1, 1948.

[fol. 389] Schedule III. Pro forma Combined Schedule of Excess of Total Depreciation of M&StL and TP&W over Long-term Debt Maturities and Proposed Bond Sinking Fund Requirements.

The annexed schedules make clear that the creation of total additional fixed charges would not be contrary to the public interest. Such fixed charges, if they had been incurred by the M&StL on January 1, 1948, in connection with acquisition of control of the TP&W at that time, would have been covered an average of 6.6 times in the intervening seven years. The minimum coverage in the seven-year period would have been 4.4 times in 1949; the maximum coverage would have been 9.0 times in 1950.

By incurring such fixed charges in order to make the acquisition, the net income of the M&StL after taxes and all charges (without regard to economies or additional revenues from such acquisition) would have been increased by $3,837,000 over such seven-year period, or an average of $548,143.

The cash flow to the M&StL and TP&W combined would be amply adequate to make provision for the sinking fund payments and all predictable cash requirements of the two roads.

(5) To show the interest of the carrier employees affected:

Answer: By strengthening both the TP&W and the M&StL, the proposed transaction is plainly in the interest of the employees of both carriers.

(6) To establish that any guaranty or assumption of payment of dividends or fixed charges contemplated in the transaction is not inconsistent with the public interest.

Answer: No guaranty or assumption of payment of dividends or fixed charges is contemplated in the transaction.

2. Also, if the proposed transaction involves a railroad:

(1) To show the effect upon the public interest of the inclusion, or the failure to include, other railroads in the territory involved in the proposed transaction:

[fol. 390] Answer: The public interest will not be adversely affected by not including other railroads in the contemplated transaction:

(a) If such other railroads were included, such benefits from the transaction as the contemplated economies, the increased competition and the strengthening of two small roads would not take place.

(b) Such carriers are competitors of the TP&W via gateways other than Peoria; and the M&StL is not.

(c) Joint ownership is not as conducive to efficient, aggressive management as single ownership. The TP&W became insolvent in the past under joint ownership by two roads.

(d) Acquisition of control of the TP&W by the M&StL will bring about no change in the TP&W as a route open to all roads on an equal basis.

(2) To indicate what terms and conditions should be imposed by the Commission to meet the requirements of section 5(2)(f) of the Interstate Commerce Act.

Answer: Pursuant to the provisions of Section 5(2)(f) of the Act, the M&StL will apply the provisions of the so-called Washington Agreement of 1936 for the benefit of all employes who may be affected by the acquisition of control of the TP&W or as a result of the economies achieved thereby. And in any event, just as it is doing now in areas where it is making economies in its present operations, the M&StL would proceed only with the most scrupulous regard for the protection of its employees.

3. Also, in case of a transaction involving a carrier by water subject to part III of the Act, where any applicant is a carrier as defined in section 1(3) of part I of the Act, or is a person controlling, controlled by, or under common control with such a carrier, to establish that the transaction is not within the inhibition of section 5(14) of part I

of the Act; or, if so, that the transaction will not prevent the common carrier by water or vessel involved from being operated in the interest of the public and with advantage to the convenience and commerce of the public and that it will not exclude, prevent, or reduce competition on the route by water under consideration.

Answer: Not applicable.

EXHIBIT 12 — Not applicable.

EXHIBIT 13 — Not applicable.

The following schedules are also filed in support of Answer to Question (d)-1 (4):

SCHEDULE I. Statements of Income and Earned Surplus (actual)

(i) For the M&StL and its subsidiary for the eleven years ended December 31, 1954.

(ii) For the TP&W for the seven years ended December 31, 1954.

(iii) For the M&StL and TP&W combined for the seven years ended December 31, 1954.

SCHEDULE II. Pro forma Condensed Combined Statements of Income and Earned Surplus for the M&StL and TP&W for the seven years ended December 31, 1954, giving effect to the proposed issuance of bonds on the assumption that they had been issued January 1, 1948.

SCHEDULE III. Pro forma Combined Schedule of Excess of Total Depreciation of M&StL and TP&W over Long-term Debt Maturities and Proposed Bond Sinking Fund Requirements.

[fol. 393] WHEREFORE, applicant prays that the Interstate Commerce Commission issue an order herein under Section 5(2) of the Interstate Commerce Act authorizing applicant to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of its capital stock.

Dated at Minneapolis, Minnesota, this 12th day of October, 1955.

Respectfully submitted,

THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY,

By .....

President

Duly sworn to by John W. Devins, jurat omitted in printing.

[Vol. 394]

EXHIBITS 1 AND 2 TO APPLICATION

THIS IS TO CERTIFY that at a meeting of the Executive Committee of The Minneapolis & St. Louis Railway Company duly and regularly called and held in the City of Minneapolis, State of Minnesota, on the 28th day of September, 1955, the following action was unanimously taken, as appears from the records of said meeting:

RESOLVED, that subject to the approval of the Interstate Commerce Commission, the purchase by the Company of the 90,000 shares of capital stock of the Toledo, Peoria & Western Railroad Company or any portion thereof equal to or greater than 73,800 shares, at a purchase price of $135 per share, be and the same is hereby authorized and approved; and the President or any Vice President of this Company be and he is hereby authorized, empowered and directed to execute and deliver any and all contracts, agreements or other documents necessary, appropriate or proper to effectuate such purchase, including but not limited to any and all contracts, agreements or other documents with the Trustees of the Estate of George P. McNear, Jr., and any other owners of the capital stock of the Toledo, Peoria & Western Railroad Company; and it is

FURTHER RESOLVED, that the appropriate officers of this Company be and they are hereby authorized and empowered, subject to the approval of the Interstate Commerce Commission, to take appropriate steps to finance such acquisition, including but not limited to, causing the Company to issue appropriate First Mortgage Bonds upon the property of the Company, and to pledge solely as collateral the acquired stock of the TP&W to the extent necessary, and to execute and deliver any and all contracts, agreements or other documents necessary or appropriate to carrying out the authority herein conferred; and it is

FURTHER RESOLVED, that an application be prepared and filed with the Interstate Commerce Commission by and in behalf of the Company for an order authoriz-

ing the Company to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of its capital stock; and it is

[fol. 395] FURTHER RESOLVED, that an application be prepared and filed with the Interstate Commerce Commission by and in behalf of this Company at such future time as in the opinion of counsel may be appropriate, for an order authorizing the Company to issue necessary securities for such acquisition; and it is

FURTHER RESOLVED, that John W. Devins, President, or Larry S. Provo, Vice President, or Roy W. Nelson, Vice President, be and each of them is hereby authorized and designated as the executive officer of this Company to make, sign, verify and file with the Interstate Commerce Commission such application or applications, as well as supplements and amendments thereto and other papers in form approved by counsel for the Company, as may be necessary or appropriate for the obtaining of an order or orders authorizing the acquisition of control of the TP&W through ownership of its capital stock, and authorizing the issuance of necessary securities for such acquisition; and it is

FURTHER RESOLVED, that the proper officers of this Company be and they hereby are authorized to take any and all further action and do any and all further things they may deem to be desirable or necessary to effectuate the purposes of the within resolutions, as advised by counsel, in connection with the acquisition of control of the TP&W through ownership of its capital stock, and in connection with the issuance of necessary securities for such acquisition.

A TRUE COPY.

ATTEST: .....

IRENE L. RIEKE
Assistant Secretary, The Minneapolis & St. Louis Railway Company.

EXHIBIT 5 TO APPLICATION

October 12, 1955.

Interstate Commerce Commission,
Washington, D.C.

Re: Application of The Minneapolis & St. Louis Railway Company for authority under Section 5(2) of the Interstate Commerce Act to acquire control of the Toledo, Peoria & Western Railroad Company through ownership of its capital stock.

Gentlemen:

I have examined the foregoing application and am familiar with the proposed transaction therein set forth and with the purposes thereof.

In my opinion, the proposed transaction is for a lawful object within the corporate powers of The Minneapolis & St. Louis Railway Company; that said proposed transaction meets the requirements of law and will be lawful and valid upon approval and authorization by the Interstate Commerce Commission.

Very truly yours,

.....

RICHARD MUSENBROCK,

General Counsel for The Minneapolis & St. Louis Railway Company.

EXHIBIT 7 TO APPLICATION

THIS AGREEMENT, dated as of , between The Minneapolis & St. Louis Railway Company, a corporation of the State of Minnesota (hereinafter called "Company"), party of the first part, and the Wilmington Trust Company, a corporation organized under the laws of the State of Delaware, and Guy A. Gladson, an individual, Trustees under the Will of George P. McNear, Jr. (hereinafter collectively called "Trustees"), parties of the second part,

WITNESSETH:

THAT WHEREAS, the Toledo, Peoria & Western Railroad Company (hereinafter called "TP&W") has issued and outstanding a total of 90,000 shares of capital stock; and

WHEREAS, the Trustees, owners of 82 per cent (73,800 shares) of the total outstanding capital stock of the TP&W, desire to sell the stock held by them; and

WHEREAS, the Company desires to purchase the stock of the TP&W held by the Trustees,

NOW, THEREFORE, for and in consideration of the premises and of the mutual covenants and obligations herein contained, the parties agree as follows:

1. The Trustees agree to sell and the Company agrees to buy 73,800 shares of the capital stock of the TP&W at a price of $135 per share, for an aggregate purchase price of $9,963,000.

2. The purchase of the stock of TP&W provided in this agreement is subject to the approval of the Interstate Commerce Commission, and Company agrees that it will file and prosecute an application or applications to the Interstate Commerce Commission for authority to carry out the transaction herein proposed.

The Trustee will in all reasonable ways cooperate with Company in the prosecution of such application and the assembly of data pertinent to its presentation and consideration.

Settlement hereunder shall take place not more than a reasonable time which shall not exceed sixty (60) days after the order of the Interstate Commerce Commission [fol. 399] granting its approval has become effective. In the event approval of the purchase of the stock of TP&W by Company shall be denied by the Interstate Commerce Commission and the order of the Commission shall become final, and any proceedings instituted in court to set aside such an order shall have been finally terminated without said order having been set aside, then this agreement shall cease and determine.

3. Trustees represent and warrant to Company that:

(a) the shares of stock of TP&W delivered to Company will be free and clear of all liens, encumbrances, trusts or obligations of any kind or nature;

(b) no approval of the sale of said shares of stock is required to be obtained by them or either of them from any court, heirs, or other person under the terms of the Will of George P. McNear, Jr., or otherwise.

4. Trustees agree that between the date hereof and the date of settlement, if it is within their power or control, they will not cause or permit TP&W, without first obtaining the consent of Company, to increase the amount of capital stock outstanding of the TP&W, impair its capital, waste its assets, declare dividends in excess of earnings of the year in which said dividends are declared and earnings of the year immediately preceding said year available for dividends and not theretofore distributed, make any unusual expenditures or incur voluntarily any unusual debts or obligations, in an amount sufficient in either case to affect substantially and adversely the value of the stock to be sold pursuant to the terms hereof; except that between the date hereof and the date of settlement or the date December 31, 1957, whichever of the latter two dates is the earlier, no declarations or payments of dividends may be made in any year totaling more than 50 per cent of the net earnings of the TP&W for such year available for dividends; it being understood that in any event quarterly dividends may be declared on the basis of estimated earn

ings and to the extent such estimated earnings prove incorrect, appropriate adjustment shall be made in a subsequent dividend or dividends.

[fol. 400] 5. Settlement hereunder shall be made at the office of the Wilmington Trust Company, in Wilmington, Delaware, or at such other place as Trustees may designate. All transfer taxes with respect to the sale of the stock are to be paid by Trustees. Stock certificates are to be delivered at settlement with all endorsements or assignments necessary for transfer of the stock. Payment of the sum provided for in Section 1 hereof shall be made by Company upon such delivery in cash, or by certified check, or cashier's or treasurer's check to the order of Trustees. If settlement for the stock is made on a payment date for the payment of a quarterly dividend, such dividend shall be paid, endorsed or assigned to Trustees by Company. If settlement for the stock is made on a date other than a payment date for the payment of a quarterly dividend, the next succeeding quarterly dividend on such shares of stock (and also any extra dividend which may be paid during such quarter-yearly period) shall be apportioned to the date of settlement, and Company shall pay to Trustees their pro-rata portion thereof promptly after the receipt of such dividend. The sum payable to Trustees by Company shall be computed by dividing by ninety (90) the dividend paid on the shares of stock on the quarterly dividend payment date next following settlement hereunder (and also any extra dividend which may be paid during such quarter yearly period), and then multiplying the quotient of such division by the number of days which shall have elapsed from (but not including) the dividend payment date preceding settlement to (and including) the date of settlement for such stock. To the extent that dividends herein referred to have not been paid at time of settlement, the provisions of this section shall survive the settlement.

6. This agreement shall be binding upon and inure to the benefit of the parties hereto, their successors and assigns.

[fol. 401] In Witness Whereof, Trustees and Company have signed and sealed this agreement or caused it to be signed and sealed, in triplicate, as of the date first hereinabove written.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 19086

[Title omitted]

PETITION OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, THE PENNSYLVANIA RAILROAD COMPANY AND PENNSYLVANIA COMPANY FOR LEAVE TO INTERVENE AND FOR DENIAL OF APPLICANT'S SUGGESTION FOR A "COMPARATIVE OR CONSOLIDATED" HEARING AND PROTEST AGAINST THE GRANTING OF THE APPLICATION—November 11, 1955

[fol. 414] Come now Petitioners, The Atchison, Topeka and Santa Fe Railway Company, The Pennsylvania Railroad Company and Pennsylvania Company, and respectfully represent that they have, and each of them has, an interest in the matters in controversy in the above-entitled proceeding and desire to intervene in and become parties to said proceeding. For grounds of the proposed intervention, Petitioners say:

[fol. 415] I.

Petitioner, The Atchison, Topeka and Santa Fe Railway Company,* is a corporation organized and existing under the laws of Kansas; Petitioner, The Pennsylvania Railroad Company,* is a corporation organized and existing under the laws of the Commonwealth of Pennsylvania; and both said Petitioners are carriers by railroad in interstate commerce. Petitioner, Pennsylvania Company, is a corporation organized and existing under the laws of the Commonwealth of Pennsylvania and is considered a carrier subject to certain provisions of Part I of the Interstate Commerce Act pursuant to an order in *Wabash Railroad Company Control*, 252 I.C.C. 319 (1942).

II.

The railroad of Petitioner, Santa Fe, connects directly with the line of the Toledo, Peoria & Western Railroad

* Refered to as Santa Fe and Pennsylvania.

Company* at Lomax, Illinois, and also at Eureka, Illinois. The railroad of Petitioner, Pennsylvania, connects directly with the line of the Toledo, Peoria & Western Railroad [fol. 416] Company at Effner, at the Illinois-Indiana state line, and also at Peoria, Illinois. Petitioners have participated and presently participate in the movement of a substantial volume of carload freight traffic, both eastbound and westbound, in conjunction with TP&W, particularly through the said connections at Lomax and Effner.

III.

Acquisition of control by the Minneapolis & St. Louis Railway Company,** a substantial competitor of TP&W, would not be consistent with the public interest and would have a detrimental effect on adequate transportation service to the public, and Petitioners hereby oppose the Application filed herein and request that it be denied.

IV.

In its Application, the M&StL suggests that the Commission conduct a "comparative or consolidated hearing" of the within Application and the Application of Petitioners, dated July 7, 1955, Finance Docket No. 18991. Petitioners [fol. 417] oppose this suggestion for the following reasons:

1. There is not properly before the Commission any issue or factual situation whereby the Commission is called upon to determine whether it would be more desirable in the public interest for control of the TP&W to be acquired by M&StL rather than by Petitioners.

2. The issue pending before the Commission in the Application of Petitioners, Santa Fe and Pennsylvania, F.D. 18991, is whether the transaction therein proposed is consistent with the public interest, not whether such transaction is more desirable than any other transaction relating to the TP&W which has been or may be proposed by others. In proceedings under

* Referred to as TP&W

** Referred to as M&StL

Section 5(2) of the Interstate Commerce Act, the Commission is neither called upon nor authorized to make a "comparative" adjudication of the character suggested by the M&StL.

3. The conduct of a "comparative or consolidated hearing" on F.D. 18991 and F.D. 19086 would tend to [fol. 418] result in an improper blending of unrelated issues and in a confusing record wholly contrary to orderly and proper administrative procedure.

4. Applicant, M&StL, as an intervener in F.D. 18991, is in a position in that proceeding to make such showing as is legally available to it and issues not properly before the Commission in F.D. 18991 should not be the subject of consideration in that proceeding, or in that proceeding in conjunction with any other proceeding, whether by way of a comparative or consolidated hearing or otherwise, nor are Applicant's rights, if any, contingent upon any such "comparative or consolidated hearing."

V.

In their Application, F.D. 18991, dated July 7, 1955, referred to above, Petitioners, Santa Fe and Pennsylvania, seek authority under Section 5(2) of the Interstate Commerce Act to acquire control of TP&W by purchase of its outstanding capital stock pursuant to duly executed contracts with the holders thereof. Petitioners protest the granting of the Application of the M&StL dated October [fol. 419] 12, 1955, F.D. 19086, and in support of such protest state the following grounds:

1. The Application is not based upon any existing "transaction" within the provisions and requirements of Section 5(2) of the Interstate Commerce Act.

2. The Application discloses on its face that Applicant has no "contract or agreement" covering a purchase by it of shares of the capital stock of the TP&W or any "contract or agreement" whereby it now, or at any future time, is assured of a purchase of such shares.

3. The Application is not based upon any showing that the present holders of the capital stock of TP&W have entered into any contract or agreement with M&StL covering a sale of their respective shareholdings of TP&W capital stock or that they are willing to make such a sale to M&StL at any future time.

4. The Application is not based upon a voluntary transaction or proposal of the requisite parties essen- [fol. 420] tial to a proper application.

5. Granting of the Application would have no legal application to, or effect upon, the present holders of the shares of the capital stock of TP&W and hence would be a vain and useless determination.

In further reference to their protest against the granting of the Application herein of M&StL, Petitioners do not request a ruling on said protest in advance of the hearing on said Application but, on the contrary, Petitioners suggest that such ruling be deferred until the conclusion of such hearing in view of the circumstance that the facts underlying such protest will be more fully developed during the course of such hearing.

Wherefore, said Petitioners, Santa Fe and Pennsylvania Railroad and Pennsylvania Company, pray:

(1) For leave to intervene and be treated as parties hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon [fol. 421] brief and at the oral argument, if oral argument is granted;

(2) That the suggestion of Applicant that the Commission conduct a "comparative or consolidated hearing" of the within Application and the Application of Petitioners dated July 7, 1955, F.D. 18991, be denied; and

(3) That following hearing the Commission rule favorably upon the protest of Petitioners against the

granting of the within Application and that said Application be denied.

The Atchison, Topeka and Santa Fe Railway Company, By Starr Thomas, 80 East Jackson Boulevard, Chicago 4, Illinois.

The Pennsylvania Railroad Company and Pennsylvania Company, By Edwin A. Lucas, 1740 Suburban Station Bldg., Philadelphia 4, Pennsylvania.

Their Attorneys.

November 11, 1955.

[fol. 422]

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 19086

[Title omitted]

REPLY OF THE MINNEAPOLIS & ST. LOUIS RAILWAY COMPANY TO THE PETITION OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, THE PENNSYLVANIA RAILROAD COMPANY AND PENNSYLVANIA COMPANY FOR DENIAL OF APPLICANT'S SUGGESTION FOR A "COMPARATIVE OR CONSOLIDATED" HEARING AND TO THE PROTEST AGAINST THE GRANTING OF ITS APPLICATION—November 30, 1955

[fol. 423] Comes now the Minneapolis & St. Louis Railway Company, applicant in the subject proceedings, and respectfully requests that the petition for denial of a "comparative or consolidated" hearing and the protest against the granting of the M&StL application, filed herein by the Atchison, Topeka & Santa Fe Railway Company, the Pennsylvania Railroad Company and Pennsylvania Company, be forthwith dismissed.

The petition and the protest set forth no basis in law or in fact upon which they may be granted. The grounds upon which petitioners seek to rely have heretofore been carefully considered and consistently rejected by the Commission. The Commission heretofore has approved an application, similar to that of the M&StL, where it was asserted that

the second applicant for control of the same carrier was willing to make a like contract and pay the same price as [fol. 424] proposed in the first application. Thus, the filing of an application by the M&StL and its request for a joint or comparative hearing are sustained by prior decisions of this Commission. The M&StL submits that its application complies with all requirements and it hereby reiterates its request that the applications in Finance Dockets 18991 and 19086 be set for joint hearing at the earliest date convenient to the Commission.

The M&StL asserts that the granting of the Santa Fe-Pennsylvania petition (1) would be contrary to the public interest, (2) would be inconsistent with prior decisions of this Commission, (3) would lead to conflict and confusion in commerce procedures, and (4) would prolong and delay the determination of the issues in these proceedings. In support whereof, the M&StL shows the following:

I

Consistency with the public interest requires that the applications in Finance Docket 18991 and Finance Docket 19086 be set down for a comparative or consolidated hearing.

As a condition precedent to its approval of an application under Section 5(2) the Commission is expressly required by statute to find that the proposed transaction is "consistent with the public interest." The term "public interest" as defined by the Supreme Court[1] has direct relation to adequacy of transportation service, to its essential conditions of economy and efficiency and to appropriate provi- [fol. 425] sion and best use of transportation facilities. As stated by the Commission in *Watson Bros. Transportation Co., Inc.—Purchase—West Coast Fast Freight*, 57 M.C.C. 745 (758), "The phrase 'consistent with the public interest' as used in Section 5 is broad in scope, and the Commission plainly is charged with the obligation of considering all matters of every character affecting the public interest . . . ." Similarly, the National Transportation Policy

[1] *New York Central S. Corp. v. U. S.*, 287 U. S. 12, 25

provides that the Interstate Commerce Act shall be so ad ministered as "to promote safe, adequate, economical, and efficient service and foster sound economic conditions in transportation and among the several carriers * * * without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices * * *."

The required findings as to the best use of transportation facilities of the TP&W, the unfair or destructive competi tive practices involved in and resulting from a grant of the Santa Fe-Pennsylvania application and all other considera tions encompassed by "public interest" can be made only after comparative hearings on both applications. Consoli dation of the hearings will aid the development of a full and complete record and expedite the disposition of the issues herein. The applicant submits that the two applica tions not only properly may, but should, in the public interest, be set for joint hearing and be considered and disposed of concurrently.

[fol. 426]

II

Consistency with prior decisions of this Commission requires that the applications in Finance Docket 18991 and Finance Docket 19056 be set for comparative or consolidated hearing.

In Paragraph IV of their petition, the Santa Fe-Pennsyl vania list as their reasons for opposing a joint hearing (1) that there is not properly before the Commission any issue or factual situation whereby the Commission is called upon to determine whether it would be more desirable in the public interest for control of the TP&W to be acquired by the M&StL rather than by the Santa Fe-Pennsylvania, (2) that the issue is whether their application, F.D. 18991, is consistent with the public interest, (3) that a joint hear ing would confuse the record, and (4) that the issues in F.D. 18991 should not be the subject of consideration in con junction with any other proceeding. In substance, peti tioners are asking for consideration of their application prior to and independently of consideration of the M&StL application.

Petitioners in effect argue that they have a right to have their application considered in a vacuum. They in effect assert that private rights supersede the public interest in the best possible transportation system. Both the Commission and Congress have long displayed their great interest in achieving the best possible results from mergers, consolidations and acquisitions of control. As early as the Transportation Act of 1920, Congress decreed that such matters should no longer be effected for private considerations alone and made them subject to approval by the Com- [fol. 427] mission under standards of public interest. In the Transportation Act of 1933, Congress again acted to shore up the Commission's jurisdiction over acquisitions of control. The contention of petitioners that the Commission may not look at alternative applications when an acquisition of control transaction is before it is completely inconsistent with the Congressional history of Section 5. It would permit a "coach-in four" to be driven through that section since if the position urged by petitioners were adopted by the Commission, any private party could block an acquisition of control merely by being the first to file an application with the Commission to acquire control of a particular carrier. No matter how much more in the public interest a second or third application for that same carrier might be, the Commission would have to abstractly and in a vacuum and without consideration of the other application or applications determine whether the first application in and of itself was consistent with the public interest.

It is clear not only from the standpoint of common sense and the legislative history of Section 5 but the Commission's decisions that the position of petitioners must be rejected and the applications of petitioners and the M&St. considered comparatively with the Commission having complete freedom to decide which application will best serve the public interest and be consistent with the requirements of Section 5 and the National Transportation Policy.

Thus, in *Control of Beaver, Meade & E. R. Co.*, 158 I.C.C. 219, the Commission held a comparative hearing on separate [fol. 428] rate applications of the Rock Island and the M-K-T, each of which sought authority to control the same carrier. In this case, the Rock Island entered into a con-

tract to purchase stock and securities of the Beaver, Meade & Englewood Railroad Company, and filed an application with the Commission for authority to control that carrier. The M-K-T intervened in opposition to the Rock Island application and thereafter filed its own application for authority to control the BM&E. Counsel for the Rock Island urged that the two competing applications should be taken up in the order in which presented to the Commission and that a conclusion be reached upon the application of the Rock Island prior to and independently of consideration of the M-K-T application. In rejecting this contention, the Commission said at page 220, "We think that the two applications not only properly may, but should, in the public interest, be considered and disposed of concurrently." In its opinion, the Commission compared the applications and approved control by the M-K-T. At the same time it denied the application of the Rock Island.

Similarly, in *Carolina Coach Company of Va.—Purchase—Richmond—Greyhound*, 38 M.C.C. 347, the Commission again was squarely presented with the problem of two competing applications. In this case, the Richmond Greyhound was required by an order entered in a previous docket to transfer its operating rights between Richmond and Norfolk to another carrier so as to provide competition between those two points. Separate applications were filed by Carolina Coach and Virginia State Lines, each of which sought [fol. 429] authority under Section 5(2) to acquire from Greyhound its operating rights between Richmond and Norfolk. The examiner, in his proposed report, found that the question presented in each application was whether the transaction proposed by it would be consistent with the public interest, and not which of the two transactions (Carolina's or Virginia's application) would be more desirable in the public interest so as to warrant approval of one to the exclusion of the other. The Commission rejected this view of the examiner, stating in unequivocal language, "We do not subscribe to that view."

In *Acquisition of Control by Wabash Railway Co.*, 154 I.C.C. 155, an application for authority to control the Lake Erie & Fort Wayne Railroad was filed by the Wabash. After a hearing on the application had been held, the New

York Central and the Nickel Plate jointly filed for authority to control the same carrier. Even though the hearing on the Wabash application had been held, the Commission in setting the Central-Nickel Plate application for hearing set the Wabash application down for further hearing jointly with that of the Central-Nickel Plate application.

The foregoing decisions of the Commission squarely dispose of the contentions of petitioners. Consistency with the Commission's prior decisions requires that the applications in F.D. 18991 and 19086 be set down for a joint or consolidated hearing. The petition of Santa Fe-Pennsylvania seeking denial of such a hearing should be dismissed.

[fol. 430]

III

Separate hearings would lead to conflict and confusion in Commission procedures.

The Commission has held that where two applications are filed for acquisition of control, it must determine which of the two transactions would be more desirable in the public interest so as to warrant the approval of one to the exclusion of the other.[2] Such a determination can be made only on the record or records on both applications. The simplest and most expeditious procedure would be to assign the applications for joint hearing which will result in only one record.

If separate records are made on the instant applications the parties would have to present testimony in each record whereas in a consolidated or joint hearing the duplicating of testimony and exhibits of the applicants and interveners and the objections on the ground of relevance to the particular application would be minimized. Similarly, the confusion which would otherwise arise in the preparation of briefs, exceptions, protests, petitions for reconsideration, etc., in the references to the two records of the hearings, would be eliminated by consolidation. To avoid all of these difficulties the M&StL urges the Commission to follow its consistent policy in prior proceedings and to forthwith

---

[2] *Carolina Coach Co. of Va.—Purchase—Richmond—Greyhound*, 38 M.C.C. 347; *Control of Beaver, M. & E. R. Co.*, 158 I.C.C. 219.

assign the instant applications for a joint or consolidated hearing.

[fol. 431]

IV

Separate hearings would prolong and delay the determinations of the issues in these proceedings.

Separate hearings on each application would merely prolong and delay an ultimate decision. The same examiner would have to hold the hearing on each application and review and compare the separate records and documents filed thereunder, including the separate briefs and exceptions which necessarily would be long and duplicative in nature. For these and the reasons set forth in the previous paragraph it is obvious that separate hearings on each application necessarily would introduce delay. It would also increase the expense of the proceedings to the Commission, to the applicants and to the interveners. For these additional reasons, the M&StL reiterates its request that the applications in Finance Dockets 18991 and 19086 be set for joint or consolidated hearing.

V

The protest is inconsistent with prior decisions of the Commission and should be dismissed.

In Paragraph V, the Santa Fe-Pennsylvania protest the granting of the M&StL application and in support thereof allege that the M&StL offer to purchase is not an existing transaction, that the M&StL does not have a contract or agreement by which it is assured that it can buy the shares of TP&W capital stock, that the application is not based upon a voluntary transaction of the requisite parties essential to a proper application and that as such, the granting of the application would be a vain and useless determination. The contentions of the Santa Fe-Pennsylvania are without merit.

[fol. 432] The Commission was presented with an identical situation in *Control of Beaver, M. & E. R. Co.*, 158

I.C.C. 219. In that case, the Rock Island, like the Santa Fe-Pennsylvania, had a contract to purchase the stock and securities of another carrier. The M-K-T in a separate application, similar to that of the M&StL herein, represented that it was willing to make a like contract and pay the same price for the securities. Following a joint hearing, the Commission approved the application of the M-K-T and authorized it to acquire control in accordance with a proposed contract to be similar in terms to the Rock Island's contract.[3] The application of the Rock Island was denied.

The *BMdE* case squarely disposes of the petitioners' contentions. However, it is significant that the Commission has also reached a similar conclusion in other proceedings. In *Carolina M. Exp. Lines, Inc.—Lease and Purchase—Reed*, 40 M.C.C. 405, for example, the vendor filed a petition requesting that the application of the vendee under Section 5 be dismissed. At the hearing, counsel for the vendor opposed the authority sought by the vendee and indicated that the vendor would not agree to a consummation of the transaction even though it were approved by the Commission. In refusing to dismiss the application, the Commission said at page 407:

> "* * * authority granted under Section 5 is permissive and may or may not be exercised at the election of the parties. Upon the filing of an appropriate application under Section 5 it is our duty to consider whether the proposed transaction, if consummated, would be consistent with the public interest. * * * It is not for us to assume that the authority, if granted, would be futile."[4]

[fol. 433] Thus, there is no requirement that there be an existing or enforceable contract prior to approval of such

---

[3] A contract between M-K-T and Beaver Meade stockholders subsequently was approved by the Commission in *Beaver, Meade & Englewood R. Co. Control*, 170 I.C.C. 556.

[4] See also *Watson Bros. Transportation Co.—Purchase—Terminal Warehouse Corp.*, 39 M.C.C. 747; *Watson Bros. Van Lines and Heavy Hauling Co. Purchase*, 45 M.C.C. 709; and *Bridgeways, Inc.—Purchase, Consolidated Freight Co.*, 50 M.C.C. 175.

application under Section 5. Authority granted under this section is permissive only and may or may not be exercised at the election of the parties. It is not for the Commission to assume that the authority, if granted, would be futile, particularly since here the sellers are trustees. If the M&StL demonstrates that the acquisition by it of the TP&W is more in the public interest than an acquisition by the Santa Fe-Pennsylvania, then the M&StL is entitled to have this application approved over that of the Santa Fe-Pennsylvania. The protest sets forth no basis upon which it may be granted either now or at the conclusion of the hearing and therefore should be dismissed.

Conclusion

The petition for denial of a comparative or consolidated hearing and the protest against the granting of the M&StL. application, filed herein by the Atchison, Topeka & Santa Fe Railway Company, the Pennsylvania Railroad Company and Pennsylvania Company, should be forthwith dismissed.

Respectfully submitted,

The Minneapolis & St. Louis Railway Company, By Burton K. Wheeler, Edward K. Wheeler, Richard Musenbrock, Its Attorneys.

Finance Docket No. 19086

Toledo, Peoria & Western Railroad Company Control

In the Matter of Petition for Leave to Intervene

Present: J. Monroe Johnson, Commissioner, to whom the above-entitled matter has been assigned for action thereon.

ORDER ALLOWING INTERVENTION—December 21, 1955.

It appearing, That on October 13, 1955, The Minneapolis & St. Louis Railway Company filed application for authority to acquire control of the Toledo, Peoria & Western Railroad Company through purchase of capital stock;

It further appearing, That on December 8, 1955, Illinois Central Railroad Company filed its petition for leave to intervene alleging that petitioner maintains with the Toledo, Peoria & Western Railroad and The Minneapolis & St. Louis Railway Company through routes and joint rates and interchanges with said carriers a substantial volume of traffic, and requested that, if the application is granted, it be granted subject to the condition that said carriers, and each of them, shall maintain and keep open all routes and channels of trade with petitioner via existing gateways unless and until otherwise authorized by the Commission;

It is ordered, That said Illinois Central Railroad Company be, and it is hereby, permitted to intervene and be treated as a party to this proceeding;

It is further ordered, That consideration of the condition requested by petitioner be deferred pending final determination by the Commission;

And it is further ordered, That a copy of the petition and of this order be served upon the Governors and public regulatory commissions of the States of Illinois and Iowa, and that a copy of this order be served upon each of the parties to this proceeding and the Governors and public regulatory commissions of the States of Minnesota and South Dakota.

Dated at Washington, D. C., this 21st day of December, A.D. 1955.

By the Commission, Commissioner Johnson.

Harold D. McCoy, Secretary.

PETITION OF THE STATE OF ILLINOIS FOR LEAVE TO INTERVENE—January 31, 1956

The Petitioner, the State of Illinois, respectfully represents that it has an interest in the matters in controversy in the above entitled proceeding and desires to intervene and become a party to said proceedings and for grounds of proposed intervention says:

1. Petitioner is one of the several sovereign states of the United States.

2. Its interest is in insuring that there are adequate facilities for transportation by railway of the produce of its citizens and provide a source from which they may receive shipments by rail, and more particularly that adequate transportation continues to be provided for points on the Toledo, Peoria & Western west of Peoria.

3. Petitioner's position is in opposition to the relief sought by the applicant, Minneapolis & St. Louis Railway Company.

Wherefore, the State of Illinois prays leave to intervene and be treated as a party thereto with a right to have notice [fol. 462] of and appear at the taking of testimony, produce and cross-examine witnesses and be heard by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Springfield, Illinois, January 31, 1956.

Latham Castle, Attorney General, State of Illinois,
Supreme Court Building, Springfield, Illinois,
Phone: Springfield 4-4871.

John L. Davidson, Jr., First Assistant Attorney General; Harry E. Begley, Special Assistant Attorney General, of Counsel.

BEFORE THE INTERSTATE COMMERCE COMMISSION
Washington, D. C.

Finance Docket No. 19086

[Title omitted]

PETITION OF THE STATE OF MINNESOTA, ET AL., FOR LEAVE TO INTERVENE—January 30, 1956

Comes now petitioners, the State of Minnesota and its Railroad & Warehouse Commission, and respectfully represent that the petitioners have an interest in the matters and issues presented by the application in the above entitled proceeding and desire to intervene in and become parties to that proceeding, and to present evidence in support of the application; and for grounds in support of the proposed intervention petitioners state the following:

I.

That the State of Minnesota is one of the sovereign states of the United States, and its Railroad & Warehouse Commission is one of the departments of the government of such state and is authorized to participate in a proceeding before this Commission involving the adequacy of service by common carriers by railroad operating within [fol. 466] the State of Minnesota and in interstate commerce. Petitioners pray leave to intervene in this proceeding under the rules of practice and regulation promulgated by your Commission in accordance with law. Intervention is sought because petitioners have an interest in this proceeding which is not adequately represented by existing parties and the action of the Commission may bind the petitioners, and for the further reason that petitioners' participation will be in the public interest.

II.

That the applicant, the Minneapolis & St. Louis Railway Company, is a Minnesota corporation, is engaged in transportation in interstate commerce as a common carrier by

railroad, subject to the provisions of the Interstate Commerce Act, has its principal offices in the State of Minnesota, and operates a railroad between Leola, South Dakota, Minneapolis, Minnesota, and Peoria, Illinois.

III.

That the applicant, the Minneapolis & St. Louis Railway Company, seeks to obtain control of the Toledo, Peoria & Western Railroad Company, by purchase of its capital stock, in furtherance of the public interest as declared in the National Transportation Policy, the Clayton Act, and the Sherman Act, in order to improve and enhance its financial and physical condition and increase its ability to serve its shippers within the State of Minnesota and elsewhere along its railroad.

[fol. 467]

IV.

That applicant, the Minneapolis & St. Louis Railway Company, presently has direct interchange connections with the Toledo, Peoria & Western Railroad Company at Peoria, Illinois, and currently interchanges with that railroad carloads originating or destined within the State of Minnesota; and that such applicant also has direct interchange connections and does interchange traffic with the Atchison, Topeka & Santa Fe Railway Company, and has indirect interchange connections with the Pennsylvania Railroad Company via the Toledo, Peoria & Western Railroad Company and other railroads; all of which inures to the benefit of shippers and receivers of carloads within the State of Minnesota.

V.

That the acquisition of control of the Toledo, Peoria & Western Railroad Company, by the purchase of its capital stock by the Atchison, Topeka & Santa Fe Railway Company and the Pennsylvania Railroad Company, or any other railroad company other than the applicant, may prevent the applicant from expanding the territory it serves, from improving and enhancing its financial and physical condition, and would tend to substantially lessen competition and create monopoly and would adversely affect the

public services performed by the applicant over its entire system, including the portion thereof within the State of Minnesota.

[fol. 468]

VI.

That the acquisition by the applicant of control of the Toledo, Peoria & Western Railroad Company, by purchase of its capital stock, is in the public interest.

VII.

Petitioners believe that its intervention in this matter is in the public interest in that the Commission, in passing upon the application herein, would have available to it the facts and argument concerning, among other matters, the effect upon business and industry and the public generally within the State of Minnesota by the granting of the application herein; and that the granting of this petition to intervene will not unduly broaden the issues in this case.

Wherefore, your petitioners request leave to intervene in support of the application and be treated as parties in interest in the above entitled proceeding with the right to have notice of and to appear at the taking of testimony, to produce and cross-examine witnesses, and to be heard through counsel on brief and at oral argument, if oral argument is granted.

Dated at Saint Paul, Minnesota, this 30th day of January, 1956.

State of Minnesota and its Railroad & Warehouse Commission, By: Oliver A. Ossanna, Secretary, Minnesota Railroad & Warehouse Comm., State Office Building, Saint Paul 1, Minnesota.

[fol. 469] Miles Lord, Attorney General; Joseph J. Bright, Assistant Attorney General, Attorneys for Petitioners, 102 State Capitol, Saint Paul 1, Minnesota.

Duly sworn to by Oliver A. Ossanna, jurat omitted in printing.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 19086

[Title omitted]

PETITION OF THE STATE OF SOUTH DAKOTA, ET AL., FOR INTERVENTION—January 16, 1956

Comes now your petitioners, the State of South Dakota and the South Dakota Public Utilities Commission, and respectfully represent that petitioners have an interest in the above-entitled proceedings and desire to intervene in support of the applicant and become a party to said proceedings, and for grounds of intervention alleged:

I.

That the State of South Dakota is one of the sovereign states of the United States and that petitioner South Dakota Public Utilities Commission is one of the Departments of the Government of the State of South Dakota and is authorized and charged with the duty to participate in proceedings before your Honorable Commission involving the adequacy of service by common carriers by railroad operating in the State of South Dakota in interstate commerce. That C. L. "Roy" Doherty, Chris A. Merkle and Fred Lindekugel are the duly elected qualified and acting members of the Commission and collectively constitute the Public Utilities Commission of the State of South Dakota.

II.

That the applicant, The Minneapolis & St. Louis Railway Company, is a common carrier by railroad, operating a segment of rail line in the State of South Dakota of the length of 154 miles serving a number of important cities and towns and the area adjacent thereto in the State of South Dakota.

[fol. 472]

III.

That authorizing The Minneapolis & St. Louis Railway Company to acquire control of the Toledo, Peoria & West-

ern Railroad Company through ownership of its capital stock when effectuated, will be of benefit to said carrier resulting in augmenting and improving its ability and capacity to render more efficient common carrier service over its entire system including that portion thereof located in South Dakota. Interveners allege upon information and belief that the acquisition of the Toledo, Peoria & Western Railroad Company by the Pennsylvania Railroad or The Atchison, Topeka and Santa Fe Railway Company or subsidiaries thereof, will have serious adverse financial and service results to The Minneapolis & St. Louis Railway Company over its entire system including that portion thereof located in South Dakota; and that acquiring control of said railroad by The Minneapolis & St. Louis Railway Company is in the public interest.

IV.

That the granting of this application to intervene will not unduly broaden the issues in this case.

WHEREFORE, your petitioners pray leave to intervene and be treated as parties hereto with the right to have notice of and appear at the taking of testimony, produce and cross-examine witnesses, and be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Dated at Pierre, South Dakota, this 16th day of January 1956.

Phil Saunders, Attorney General of South Dakota, State Capitol Building, Pierre, South Dakota; C. A. Carr, Rate Expert, Public Utilities Commission, State Capitol Building, Pierre, South Dakota; Herman L. Bode, Counsel for South Dakota Public Utilities Commission, State Capitol Building, Pierre, South Dakota.

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 19086

[Title omitted]

PETITION OF RAILWAY LABOR EXECUTIVES' ASSOCIATION FOR LEAVE TO INTERVENE—January 5, 1956

Comes now your petitioner, Railway Labor Executives' Association, and respectfully represents that it has an interest in the matter in controversy in the above entitled proceeding, that it desires to intervene in and become a party to said proceeding, and for grounds in support of said petition respectfully shows:

1.

That the petitioner, Railway Labor Executives' Association, is a voluntary unincorporated association, with which are affiliated the following standard international railway labor organizations:

Switchmen's Union of North America
Order of Railroad Telegraphers
American Train Dispatchers' Association
Railway Employes' Department, A. F. of L.
International Association of Machinists
International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers of America
[fol. 476] Sheet Metal Workers' International Association
International Brotherhood of Electrical Workers
Brotherhood Railway Carmen of America
International Brotherhood of Firemen & Oilers
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes
Brotherhood of Railroad Signalmen of America
International Organization Masters, Mates & Pilots of America
National Marine Engineers' Beneficial Association
Hotel & Restaurant Employees' and Bartenders International Union

Railroad Yardmasters of America
Brotherhood of Maintenance of Way Employes
Brotherhood of Sleeping Car Porters
Brotherhood of Locomotive Firemen & Enginemen
Brotherhood of Railroad Trainmen
Order of Railway Conductors and Brakemen

The principal office of the petitioner, Railway Labor Executives' Association, is located at 401 Third Street, N.W., Washington 1, D. C.

2.

That certain of the organizations comprising this petitioner represents employees of the carriers involved for the purpose of collective bargaining and have agreements with said carrier concerning rates of pay, rules, and working conditions.

3.

This application, in part, falls within the provisions of Section 5(2) of the Interstate Commerce Act and is therefore a proposed transaction in which the Commission is obligated by Section 5(2)(f) to give weight to the interests of the carriers' employees in its consideration of the merits of the transaction. The evidence which is to be developed before the Commission may well disclose serious and sub- [fol. 477] stantial adverse effect which will result to certain employees of the involved carriers should the proposed transaction be approved by the Commission. Petitioner has a direct and substantial interest in any terms and conditions which parties to the proceeding may propose for the protection of employee interests, as well as in itself proposing the imposition of terms and conditions which may be required for the protection of the interests of said employees.

4.

That the intervention of this petitioner will not broaden the issues already before the Commission in this proceeding.

Wherefore, your petitioner, in its own behalf and in behalf of the international standard railway labor organizations affiliated with it, together with the individual members of such organizations, prays leave to intervene in this cause and be treated as a party hereto with the right to have notice of and participate in any further proceeding, to appear thereat, to present testimony, to produce and examine witnesses, and to be heard by counsel upon brief or oral argument.

Respectfully submitted,

Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio; Philip L. Hoag, 741 National Bank Building, Toledo 4, Ohio, Attorneys for Petitioner.

Of Counsel: Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio.

[Title omitted]

PETITION OF BROTHERHOOD OF RAILROAD TRAINMEN FOR LEAVE TO INTERVENE—January 5, 1956

Comes now your petitioner, Brotherhood of Railroad Trainmen, and respectfully represents that it desires to intervene in, and become a party to the above entitled proceeding, and for grounds for the proposed intervention says:

—1—

Your petitioner, Brotherhood of Railroad Trainmen, is a voluntary unincorporated railway labor organization, national in scope, with general offices in the Standard Building, Cleveland 13, Ohio, with membership consisting largely

of the road and yard train service employees of the railroads in the United States.

—2—

Your petitioner has in membership a majority of the train service employees of the Minneapolis and St. Louis Railway Company and of the Toledo, Peoria and Western Railway Company, and represents such employees in collective bargaining procedures with those companies under the provisions of the Railway Labor Act, as amended.

—3—

Any conclusion reached by your Honorable Commission in granting the authority requested by the applicant in the above entitled proceeding may have an adverse affect upon your petitioner's members.

[fol. 480] —4—

For the foregoing reasons your petitioner, Brotherhood of Railroad Trainmen, desires to intervene in this proceeding for the purpose of protecting the welfare of its members as their interests may appear.

Wherefore your petitioner, in its own behalf and in behalf of the members, employees of the above named railway and railroad companies, prays leave to intervene in this proceeding with the right to be treated as a party hereto and have notice of and participate in any proceeding, to appear at such proceedings, to present testimony, to produce and examine witnesses, and to be heard by counsel upon brief or oral argument.

Dated at Cleveland, Ohio, this 5th day of January, 1956.

Respectfully submitted:

By: W. P. Kennedy, President.

Blaine Ramsey, Canton State Bank Building, Canton, Illinois, appearing for the Canton Chamber of Commerce and Canton Industries, Inc., intervenor.

Lawrence B. McMunn, 32 North Main Street, Canton, Illinois, appearing for the City of Canton, Illinois, intervenor.

Harold J. Soderberg, Special Assistant Attorney General, Minnesota State Capitol, State of Minnesota, appearing for the State of Minnesota and the Minnesota Railroad and Warehouse Commission, intervenor.

[fol. 8] PROCEEDINGS

Exam. Albus: The hearing will please come to order.

The Upper State Commerce Commission has assigned for hearing at this time and place Finance Dockets Nos. 18991 and 19086, to Toledo, Peoria & Western Railroad Company Control Through Stock Ownership.

The applicants in Finance Docket No. 18991 are, the Atchison, Topeka & Santa Fe Railway Company, the Pennsylvania Railroad Company, and Pennsylvania Company.

And the applicant in 19086 is the Minneapolis & St. Louis Railway.

We will now call for appearances.

In announcing your appearances please indicate for the record whether or not you have been admitted to practice before the Commission.

First of all, who appears for the applicant in 18991, the Atchison, Topeka & Santa Fe Railway Company?

Mr. Thomas: R. S. Outlaw, Starr Thomas and Carl E. Bagge, appearing for the Santa Fe Railway System, address for all three is 80 East Jackson Boulevard, Chicago 4, and all have been admitted to practice before the Commission.

Mr. Lucas: Mr. Examiner, Edwin A. Lucas, Robert H. Bierma and Thomas O. Hunter, appearing for the Pennsylvania Railroad Company and Pennsylvania Company.

Do you wish the addresses, sir?

[fol. 9] Exam. Albus: If you will, please.

Mr. Lucas: Address of Mr. Lucas, 1740 Suburban Station, Philadelphia, Pennsylvania. Mr. Bierma's address is 752 Union Station, Chicago.

Mr. Hunter's address is 718 Commercial Bank Building, Peoria, and all three of us are admitted to practice before the Commission.

Exam. Albus: Thank you very much.

For the applicant Minneapolis & St. Louis.

Mr. Wheeler: Richard Muzenbrack, 111 East Franklin Street, Minneapolis, Minnesota, Burton K. Wheeler, Edward K. Wheeler, Robert G. Seekes, and Eldon S. Olson, 104 Southern Building, Washington, D. C.

Exam. Albus: Mr. Seekes.

Mr. Seekes: We are all admitted to practice before the Commission.

Exam. Albus: Before we proceed with the intervenors I would like to announce upon my leaving Washington I was presented with certain intervening petitions which were received too late for the preparation of an order and service by the Chairman of Division 4, so the record will show at this time the receipt of the following intervening petitions:

First in Finance Docket No. 18991, the petition of the Peoria Junior Chamber of Commerce;

The City of Canton, Illinois;

[fol. 10] Golden Rule Club of the City of LaHarpe, Illinois;

The Railway Laborers Executives Association;

Brotherhood of Railroad Trainmen;

City of Bushnell;

City of Chenoa;

The Village of Gridley;

The Village of Forrest, Illinois;

The City of Fairbury, Illinois;

Central Illinois Light Company;

Elizabeth M. McNear, individually and as guardian for John W. McNear, Elizabeth H. McNear, the Hanover Bank, and William McDowell Frederic, and Commercial National Bank of Peoria, as executors of the Estate of Clinton M. McNear;

Petition of the Wabash Railroad Company.

And in Finance Docket No. 19086:

The State of South Dakota and the South Public Utilities Commission;

The petition of the Railway Laborers Executives Association;

Brotherhood of Railroad Trainmen;

Petition of the Chicago, Rock Island & Pacific Railroad Company;

Petition of New York, Chicago & St. Louis Railroad Company;

And in both applications petition of Guy A. Gladson and Wilmington Trust Company as trustees.

Now we will proceed with the appearances for all in[fol. 11] tervenors, starting on my left.

Mr. Safford: Verle W. Safford, 727 First National Bank Building, appearing for the Peoria Association of Commerce. I am not admitted to practice before the Commission but my application is pending.

Exam. Albus: It will be understood you may participate in this case since the application is pending.

Mr. Lipkin: Max J. Lipkin, corporation counsel, City of Peoria, City Hall. I am admitted to practice before the Commission.

Exam. Albus: Thank you very much, Mr. Lipkin.

Next, please.

Mr. Fort: Lyman R. Fort, Stronghurst, Illinois, representing the Village of Lomax, its president and the Village trustees. I am not admitted to practice before the Commerce Commission.

Exam. Albus: Have you appeared in any of these cases before?

Mr. Fort: No, sir, I have not.

Exam. Albus: It will be understood you may participate in this case but if you want to participate in any others you will make application to the Commission to do so.

Mr. Hoag: Philip L. Hoag of the firm of Rolland and Hickey, National Bank Building, Toledo, Ohio. I am appearing on behalf of the Railway Laborers Executives Association.

Likewise that the record may be straightened away. There has been an intervening petition filed on behalf of [fol. 12] the Brotherhood of Railroad Trainmen. The Brotherhood of Railroad Trainmen are now a member of the Executives Association. I am likewise representing them.

Exam. Albus: Thank you very much, Mr. Hoag.

Mr. Stiers: Fred V. Stiers, 900 First National Bank Building, Peoria, appearing for the City of East Peoria. I am not admitted.

Exam. Albus: Have you appeared in any of these cases before, Mr. Stiers?

Mr. Stiers: No, sir.

Exam. Albus: That is all right, you may participate in this one to its conclusion.

Mr. O'Hern: C. V. O'Hern of the firm of O'Hern, Alloy, O'Hern & Wambacher, 1105 Lehmann Building, Peoria, appearing for the Central Illinois Light Company, an intervenor. I am not admitted before the Commission.

Exam. Albus: Are you a full-time employee of the Central Illinois Light Company?

Mr. O'Hern: No, sir, we are attorneys representing the company.

Exam. Albus: Have you ever appeared in any hearing before?

Mr. O'Hern: Not before this Commission.

Exam. Albus: It may be understood that you may participate in this case but if you are going to practice before the Commission please file an application.

[fol. 13] Mr. Catton: Paul C. Catton, 912 Central National Bank Building, Peoria, representing the Peoria Junior Chamber of Commerce. I am not admitted to practice before the Commission.

Exam. Albus: What's been said with respect to the other gentlemen also applies to you. You have never been before the Commission?

Mr. Catton: No, sir.

Exam. Albus: Thank you.

Mr. Walker: Robert H. Walker of the firm of Boyd, Walker, HuisKamp and Concannon, 609 Blondeau Street, Keokuk, Iowa. I am appearing for the City of Keokuk, the Keokuk Bridge Commission, the Chamber of Commerce and the Hubinger Company. I am registered as a practitioner before this Commission.

Exam. Albus: Thank you, Mr. Walker.

Mr. Lamet: Leon L. Lamet, Warsaw, appearing for the City of Warsaw, Warsaw Chamber of Commerce. I am registered as a practitioner before the Commission.

Exam. Albus: Thank you, Mr. Lamet.

Mr. Davidson: John L. Davidson, Jr., first assistant attorney general of the State of Illinois, appearing on behalf of the State of Illinois.

Exam. Albus: Thank you, Mr. Davidson.

Mr. Davidson: I am not a member of the bar of this Commission.

[fol. 14] Mr. Lucente: Martin M. Lucente, 11 South LaSalle Street. I am with the firm of Sidley, Austin, Burgess & Smith. That is a Chicago address, 11 South LaSalle Street, representing petitioners Elizabeth M. McNear, individually, and as guardian for John H. McNear, Elizabeth H. McNear, the Hanover Bank, and William McDowell Frederic and Commercial National Bank of Peoria, as executors of the estate of Clinton M. McNear. I have a pending application for admission.

Exam. Albus: Thank you very much.

All right, Mr. Adams.

Mr. Cassell: Eaton Adams and M. L. Cassell, 139 West Van Buren Street, Chicago, Illinois, appearing on behalf of

the Rock Island Railroad in both dockets. We are both attorneys and admitted to practice before this Commission.

Exam. Albus: Thank you.

Mr. Broker: Thomas O. Broker, 3001 Terminal Tower Building, Cleveland, appearing for the New York, Chicago & St. Louis Railroad Company, intervenor and petitioner for relief in Docket 18991 and intervenor in 19086.

May I ask a question? You read a list of the parties that had filed petitions for leave to intervene. Are they all authorized to intervene?

Exam. Albus: Yes, they are. They are all received at this time, all the intervening petitions. Incidentally, I have some extra copies of those petitions with me if anyone [fol. 15] cares for them. They will be right here on the witness table.

Mr. Davis, please.

Mr. Davis: Eugene S. Davis, 1667 Railway Exchange Building, St. Louis 1, Missouri, appearing for intervenor Wabash Railroad Company in both dockets.

In Docket 18991 we have been permitted to intervene according to your announcement. We do have a petition for leave to intervene in Docket 19086 which I will present at such appropriate time as you desire. I will present it now or—

Exam. Albus: May we have it at this time. We might as well include it with all the others.

Is this the original petition?

Mr. Davis: The original.

I am an attorney and I am registered to practice before the Commission.

Exam. Albus: Thank you very much, Mr. Davis.

Anybody else?

Mr. Martin: Eldon Martin, 547 West Jackson Boulevard, Chicago, Illinois, appearing in both dockets for Chicago, Burlington & Quincy Railroad Company.

Mr. Examiner, we should present our intervening petitions later or now?

Exam. Albus: As long as you have them there you might as well present them at this time, just the original and one copy, please.

[fol. 16] Mr. Martin: Mr. Examiner, the document which I have just handed to you is entitled in both dockets and is a petition for leave to intervene as well as a petition for inclusion in the transaction under certain circumstances. The substance of the whole document is simply this, if the original applicants, Pennsylvania and Santa Fe, are authorized to acquire the T. P. & W. we do not object and will be satisfied in that event if the conditions are attached to the Commission's approval order in the form of a petition attached to this petition. If, on the other hand, any other railroad, including the applicant in 19086 or any railroad intervenor in either docket, if any railroad other than Santa Fe and Pennsylvania is authorized to acquire an interest in the T. P. & W., then and under those conditions Burlington asks to be included in the transaction to the same extent as any such other railroad.

Now, the petition itself is verified, the statement in support of the petition is likewise verified, and I would like very much if it would be possible to avoid staying around the hearing indefinitely. I am prepared myself to answer any questions concerning our position. If necessary, I can call an executive officer down here from Chicago to answer further questions. I don't think it is, but I would like your co-operation, Mr. Examiner, and the co-operation of others in the room to this extent, that if you do have any questions concerning our position, would you try to get them [fol. 17] to me before tomorrow night.

Is that a reasonable request, Your Honor?

Exam. Albus: Any objection to that request; I see none.

Mr. Wheeler: Mr. Examiner, may I have it read? I didn't hear the last part of his statement.

Exam. Albus: Off the record.

(Discussion off the record.)

[fol. 18] Exam. Albus: On the record. Mr. Hamilton, please.

Mr. Hamilton: Bryce L. Hamilton, 1400 First National Bank Building, Chicago 3, Illinois, appearing in both dockets for Guy A. Gladson and Wilmington Trust Co. as trustees of the estate of George P. McNear, Jr. I am admitted to practice before the Commission.

Exam. Albus: Thank you, Mr. Hamilton.

Mr. Spencer, please.

Mr. Spencer: Harold E. Spencer, 135 East Eleventh Place, Chicago 5, Illinois, appearing in both dockets for the Illinois Central Railroad Company. I am admitted to practice before the Commission.

Exam. Albus: Are there any further appearances?

Mr. Thompson: H. O. Thompson, 176 West Adams Street, Chicago, Illinois, appearing for the Brotherhood of Railroad Trainmen. I am not permitted to practice.

Exam. Albus: You are an officer of the organization?

Mr. Thompson: That is right.

Exam. Albus: Thank you very much, Mr. Thompson.

Mr. Shepherd: J. H. Shepherd, 120 South LaSalle, Chicago 3, Illinois, appearing for Chicago, Indianapolis and Louisville Railway Co. I am admitted to practice.

I might say, Mr. Examiner, that we have filed an intervening petition. Intervention has been allowed in Docket 18991. We would like leave to file within the next day sim-
[fol. 19] ilar petition in Docket 19088.

Exam. Albus: This will be a consolidated hearing. I doubt if that is necessary. You may file it if you care to. The original petition may stand and it may be considered filed in both dockets.

Mr. Vanneman: Edgar Vanneman, Jr., Room 1422, 400 West Madison Street, Chicago 6, Illinois, appearing for the Chicago & Northwestern Railway Co. in both proceedings.

I have an intervening petition I would like to present at this time.

Exam. Albus: May I have the original and one copy, and will you circulate them to anyone who desires them.

Are there any further appearances?

Mr. John W. Adams: John W. Adams, 104 St. Francis Street, Mobile, Alabama, appearing for Gulf, Mobile and Ohio Railroad Co. We are intervenors in 18991 and have a petition for leave to intervene in 19086. I have been admitted to practice.

Exam. Albus: May I have the original, please, of the petition and one copy.

Are there any further appearances?

Mr. Carr: Charles A. Carr, 305 Capitol Building, Pierre,

South Dakota, appearing for the State of South Dakota. I am a registered practitioner.

Mr. Bordes: John L. Bordes, of the firm of Kirkland, [fol. 20] Fleming, Green, Martin & Ellis, 33 North LaSalle Street, Chicago, Illinois, appearing for The United Electric Coal Companies, intervenor. We mailed copies of the intervening petition to Washington, but I am certain that the Examiner did not receive them in the mail, I think on Monday, and we would like at this time to move for intervention, and I have copies with me, but we mailed copies to all parties of record on Monday last.

Exam. Albus: Very well, your intervening petition is received at this time and made a part of the record.

Mr. Bordes: I am a practitioner before the Commission.

Mr. Ramsey: Blaine Ramsey, Canton State Bank Building, Canton, Illinois, appearing for the Canton Chamber of Commerce and Canton Industries, Inc.

Exam. Albus: Are you a member of the bar or the Commission?

Mr. Ramsey: No, sir, I am not a member of the Commission.

Exam. Albus: Have you ever appeared in any of these cases before?

Mr. Ramsey: No, sir.

Exam. Albus: You may appear in this case at this time.

Mr. McMunn: Lawrence B. McMunn, 32 North Main Street, Canton, Illinois, appearing for the City of Canton, Illinois. I am not admitted to practice before this Commission.

Exam. Albus: The same ruling applies to you, Mr. McMunn.

[fol. 21] Mr. Soderberg: Harold J. Soderberg, Special Assistant Attorney General, Minnesota State Capitol, State of Minnesota, appearing for the State of Minnesota and the Minnesota Railroad and Warehouse Commission. We mailed our petition to the Commission on the 30th, I am sure it wasn't received, or apparently, but I have copies here and we would move to intervene.

Exam. Albus: You mailed the original in to the Commission?

Mr. Soderberg: And 15 copies.

Exam. Albus: Thank you very much. Your petition is received in the record at this time.

Are there any further appearances?

(No response.)

Exam. Albus: Apparently not.

COLLOQUY BETWEEN COURT AND COUNSEL

Let the record show that the applications and all exhibits attached thereto are made a part of this record with the understanding that any material fact contained in there is subject to right of full cross-examination.

Are there any preliminary matters to be disposed of before we put on the first witness?

Mr. Davidson: I would like to present the petition of the State of Illinois for leave to intervene.

Exam. Albus: Thank you very much.

Mr. Davidson: In 19086 only.

Exam. Albus: Thank you, Mr. Davidson.

[fol. 22] Mr. Davidson: That is the original.

Exam. Albus: Thank you.

Are there any further petitions to be presented now?

(No response.)

Exam. Albus: Now, Mr. Thomas, do you have a preliminary?

Mr. Broker: Mr. Thomas, excuse me.

The exhibit that is customarily put in by a petitioner seeking a share of control, I would like to file it at this time and to distribute it with the request that if the other parties wish to cross-examine the person who signed this, that they so inform me so that I know whether or not to call him to appear as a witness in this case for cross-examination.

Exam. Albus: Within what time, Mr. Broker? When do you want to be advised?

Mr. Broker: I would like to know about it the same time that Mr. Martin knows.

Exam. Albus: Off the record for a moment.

(Discussion off the record.)

Exam. Albus: On the record.

As a result of the discussion off the record, let the record now show that Exhibit B attached to Mr. Martin's petition for leave to intervene is marked for identification Exhibit H-1 in this hearing, and the similar material on behalf of the Nickel Plate is marked for identification H-2. Incidentally, the prefix "H" is to distinguish the exhibits [fol. 23] filed at this hearing from those attached to the application.

And the material submitted on behalf of the Rock Island is marked for identification Exhibit H-3.

(Intervenor's Exhibits H-1, H-2, and H-3, Mr. Martin, were marked for identification.)

Exam. Albus: And those exhibits are received in the record.

(Intervenor's Exhibits H-1, H-2, and H-3, Mr. Martin, were received in evidence.)

Mr. Cassel: In order that the record be clear on that I would just like to say that we also, that is, the Rock Island, has its information similar to that mentioned by Mr. Broker on behalf of the Nickel Plate which has been tendered to you. I am also distributing it among those present and I should like the same courtesy that has been extended to the Burlington and the Nickel Plate that those who have any questions with regard to it would inform me in the same time.

Exam. Albus: Thank you, Mr. Cassel.

Those exhibits have all been distributed, is that correct?

Mr. Cassel: Yes, sir.

Exam. Albus: Mr. Davis.

Mr. Davis: Mr. Examiner, the Wabash has here in the hotel a similar information, and it will be permitted, of course, to file that at such time as it is convenient?

Exam. Albus: That will be understood, yes, sir, Mr. Davis.

Mr. Thomas, do you have anything further to present be- [fol. 24] fore we proceed with the testimony?

Mr. Thomas: I want to get one thing clear, Mr. Examiner. This is to be a consolidated record in the two applications?

Exam. Albus: That is correct.

Mr. Thomas: Will there be any technical problems, will every intervenor, whichever one he intervened in, be a party to both, will there be any distinction made on that?

Exam. Albus: No, there will not except in the testimony, there will be no separate record made, this will be a consolidated hearing.

Mr. Thomas: I would like to make a suggestion about the order of procedure. It seems to me that this is quite different from the usual application in that you do have not an applicant and opposing parties but you have two applicants, each with an affirmative proposition, and various other parties who are opposing or seeking to participate, as the case may be. It seems to me that it would be appropriate for the Santa Fe and Pennsylvania, who filed first, to open. I suggest that the M. & St. L., which is the other applicant, then present its case, and that the railroads which wish to participate in one or both then follow, and that the railroads which are seeking to protect their interchange business follow after that.

It is also my suggestion that the intervenors who are supporting one or the other of the two major applicants should be permitted to present their testimony after both [fol. 25] of the affirmative proposals of the two major applicants are in so they will have full knowledge of exactly what they are expected to state a position on.

Exam. Albus: We ordinarily have no trouble with the matter of procedures. Your suggestion is very fine, and I heartily concur with it, except for the fact that if anyone is here who desires to testify and has to leave early we will just let them testify any time they are ready in order to be examined and to be somewhere else tomorrow or the day after. That is the only thing we have to—

Mr. Thomas: I think we want to avail ourselves of that opportunity.

Mr. Wheeler: Mr. Albus, I think a more orderly procedure would be for the Santa Fe and Pennsylvania to proceed to put in the testimony in support of their application, and then that all parties who support that application follow in order after them, putting in the affirmative testimony, so that all of the affirmative testimony with respect

to their application will be in one part of the docket, and then we will follow and we will put in our case and those intervenors who support us will follow and put in the affirmative testimony with respect to our application. Then if anybody wants to appear with respect to the joint applications after that, I think that would be an appropriate time to do so. But I do think we ought to have the affirmative cases together.

[fol. 26] Exam. Albus: We don't intend to get in a hassel over procedure. We will proceed with the Santa Fe-Pennsylvania case first, of course.

So if there are no other preliminaries to be disposed of, you may call your first witness.

Mr. Lucas: Mr. Examiner, certain of the material that is to be presented in behalf of the two applicants in Docket 18991 has been the subject of joint preparation so I would like to call simply to authenticate some material that will be referred to by the witnesses of both the Santa and the Pennsylvania to the stand at this time.

Exam. Albus: Very well, Mr. Lucas.

Mr. Lucas: Mr. Clutz.

JOHN JACOB CLUTZ was sworn and testified as follows:

Direct examination.

Mr. Lucas: Mr. Examiner, before addressing a question to the witness may we have received and marked for identification two exhibits, one is entitled "Basic Maps", and the other is entitled "Traffic Data".

Exam Albus: The exhibits marked "Basic Maps" is marked for identification H-4.

(Applicant's Exhibit H-4, Witness Clutz, was marked for identification.)

Exam. Albus: And the "Traffic Data" is marked for iden[fol. 27] tification H-5.

(Applicant's Exhibit H-5, Witness Clutz, was marked for identification.)

By Mr. Lucas:

Q. Will you state your name for the record, please?

A. John Jacob Clutz.

Q. What is your position with the Pennsylvania Railroad Company?

A. Manager research and development.

Q. Both prior to and at the time of filing the application in Docket 18991 and subsequent thereto have you been personally in charge of the preparation of certain material that is embodied in the exhibits that have been marked for identification H-4 and H-5?

A. I have.

Q. And I assume that will be good for other material that will come later in the proceedings, is that correct?

A. That is correct.

Q. Are you familiar with the exhibits that have been marked H-4 and H-5 for identification?

A. I am.

Q. Was the material in those two exhibits prepared under your direction and supervision?

A. It was.

Q. You are familiar with the contents of the exhibits and can explain whatever explanation might be necessary in [fol. 28] connection with them?

A. I am.

OFFERS IN EVIDENCE

Mr. Lucas: Mr. Examiner, I don't know whether they want to cross-examine, but we now offer exhibits H-4 and H-5.

Exam. Albus: Is there any objection to the receipt of exhibits marked for identification H-4 and H-5?

Mr. Broker: Excuse me, Mr. Examiner, is this witness open for cross-examination now or is this just for the purpose of identification?

Mr. Lucas: He is open for cross-examination on the exhibits if there is any.

Exam. Albus: Will Mr. Clutz be available later on today?

Mr. Lucas: At any time throughout the hearing, Mr. Examiner.

Exam. Albus: Very well, I think the opposition should have an opportunity to look them over.

Mr. Lucas: I think that is quite reasonable, yes.

Exam. Albus: Are there any questions on cross-examination now?

Mr. Broker: I have one question I would like to ask.

Mr. Examiner, certainly the information came from the T. P. & W. files while this witness testified that it was prepared under his direction and supervision.

Will some one from the T. P. & W. authenticate this information?

Mr. Lucas: We are prepared to call a witness from the [fol. 29] Toledo, Peoria and Western, if it is necessary, Mr. Examiner.

Exam. Albus: Very well.

Mr. Broker: I don't have any objection.

Exam. Albus: All right.

With the understanding that Mr. Clutz or some other witness will be available to substantiate the testimony in those exhibits Mr. Clutz is now excused temporarily, subject to recall.

(Witness temporarily excused.)

Exam. Albus: Next witness, please.

Mr. Thomas: Before I call the next witness for the Santa Fe presentation I would like to call attention to the petition just filed by the Burlington. Exhibit "A" to that petition sets forth certain proposed conditions which the petitioner seeks to have the Commission impose in any order in this case granting the authority sought—

Exam. Albus: Yes.

Mr. Thomas (continuing) —on behalf of the Santa Fe and Pennsylvania I wish to state that these conditions are entirely acceptable to us.

Further, we have had some discussions with counsel for some of the other intervening railroads, specifically the Illinois Central and the G. M. & O., and we have agreed with them on some additional language which we would suggest could be inserted in place of Condition 6 in Exhibit "A" to the Burlington petition, with Condition 6 [fol. 30] in the Burlington petition becoming Condition 7.

I have given you a copy, Mr. Examiner, I have a copy here for the reporter. It is very brief. I might read that condition.

Exam. Albus: If you will, Mr. Thomas, please. Would this be 6 or 7?

Mr. Thomas: This would be 6 and would move the present 6 down to 7.

Exam. Albus: All right.

Mr. Thomas: "Applicants and each of them shall refrain from closing any existing route or channel of trade with any carrier party to this proceeding on account of their control of the Toledo, Peoria & Western unless and until otherwise authorized by the Commission."

Exam. Albus: Thank you very much, Mr. Examiner.

Mr. Spencer: In connection with the statement made by Mr. Thomas I would wonder if it would be appropriate for me at this time to inquire since the intervention of the Illinois Central is solely for the protection of routes and channels of trade whether or not there is any objection to the imposition of these conditions on the behalf of any other party who is seeking to be included in the transaction. If they could make such a statement at this time, that would remove our necessity of attendance in the Commission.

[fol. 31] Exam. Albus: Are there any objections?

Mr. Cassel: Our position is similar to that of the Santa Fe. We will accept the conditions requested on our participation in the acquisition.

Mr. Broker: Mr. Examiner, speaking for the Nickel Plate these conditions are entirely satisfactory and successful to us as a part owner.

Mr. Wheeler: Mr. Examiner, on behalf of the M. & St. L. I wish to state we are prepared to accept that condition. I also want to state that we have been in communication with the Milwaukee with respect to this matter and have prior to the hearing agreed with them in writing to the acceptance of such condition.

Mr. Martin: Mr. Examiner, I am sort of a conditional party here but to the extent that the conditions may arise which would make us a participant in the application of the property we have approved suggested conditions.

Mr. Davis: Those conditions are acceptable to the Wabash in the event it becomes a participant in the transaction.

Exam. Albus: Does that take care of everyone?

Mr. Spencer: Thank you, Mr. Examiner.

Exam. Albus: You are excused, Mr. Spencer.

Mr. Lucas: Now, we are ready for the first witness, I think.

Mr. Thomas: I have one further statement, Mr. Examiner.

Exam. Albus: All right.

[fol. 32] Mr. Thomas: I am calling three witnesses for the Santa Fe, Mr. Gurley, Mr. Duffey, and Mr. Mahoney.

Mr. Gurley will talk about Santa Fe executive policy in relation to the T. P. & W.

Mr. Duffey will talk about traffic matters, traffic solicitation policy, and industrial policy of the Santa Fe with respect to the T. P. & W.

Mr. Mahoney will talk about service and schedules and such matters.

I thought that if that was announced it would probably shorten some of the cross-examination.

Exam. Albus: That will be helpful. Thank you very much.

Mr. Thomas: I will now call Mr. Gurley.

[fol. 33] Fred G. Gurley was sworn and testified as follows:

Direct examination.

Mr. Thomas: Mr. Examiner, two exhibits have been distributed to the parties.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Mr. Thomas: Mr. Examiner, may the two exhibits which have been distributed be identified for the record. I suggest that the one entitled "Comparisons of Certain Selected Financial Items" be identified as H-6.

Exam. Albus: It may be so marked for identification.

(Applicant's Exhibit No. H-6, Witness Gurley, was marked for identification.)

Mr. Thomas: And the one which is a copy of agreement between the Santa Fe and Elizabeth McNear be marked as H-7.

Exam. Albus: It may be marked for identification as Exhibit H-7.

(Applicant's Exhibit No. H-7, Witness Gurley, was marked for identification.)

By Mr. Thomas:

Q. Will you state your full name and address for the record?

A. Fred E. Gurley, 80 East Jackson, Chicago, Illinois.

Q. What position do you hold with the Santa Fe Railway?

[fol. 34] A. I am President and Chairman of the Executive Committee.

Q. What other positions have you held with the Santa?

A. I was vice-president for five years.

Q. What was your railroad experience prior to that time, generally?

A. I was associated with Eldon Martin of the Burlington for longer than either one of us like to mention.

Q. What general field were you in during those years?

A. On the Burlington, entirely in the operating department, in various capacities, including assistant vice-president.

Q. Mr. Gurley, what are the objectives of the Santa Fe in seeking authority to obtain joint control of the T. P. & W.?

A. I was asked about that same question by a Peoria newspaper reporter on the telephone on May 27, 1955, not many hours after we had entered into an agreement to purchase 97 per cent of the stock, which as a practical matter gave us control of 100 per cent of the stock. I told him our purpose was to perpetuate the T. P. & W. as an independent railroad, and to build it up. I told him we would retain Mr. Coulter as President—I thought he had done a fine job. That was our purpose when we had con-

tractual control of all of the stock. We always took that position about the T. P. & W. That's the way it is today. We have never equivocated.

Our agreement with the Pennsylvania is shown as Exhibit 7-D of the application in this case. It is appropriate to [fol. 35] call attention especially to Section 3 of that agreement.

While I think Section 3 is easy to understand, I want to make it abundantly clear that our purpose is to help the T. P. & W. It is not our purpose to divert any traffic away from the T. P. & W. route. We believe in that route—we believe that it is in the public interest and in our own selfish interest to continue a strong independent organization under management through a Board of Directors sensitive to the business interests of the area served by the T. P. & W. We are convinced that these purposes are best served by the joint ownership of T. P. & W. by Santa Fe and Pennsylvania under the conditions of our agreement.

I should add that this opinion was formed after a careful appraisal of the particular circumstances incident to the T. P. & W. This appraisal was made over a period of several years—it was not a hurried one. I will have more to say about that later in my testimony.

Q. Will you please give us a brief appraisal and general expression of your opinion about the T. P. & W.? What kind of a railroad is it?

A. As a preliminary to my answer to that question, I think it is fair to say that a railroad is made up of three principal parts: First, management and personnel; second, the physical plant; and, third, its financial structure.

Now, it is also fair to say that if a railroad has good [fol. 36] management over a reasonable period of time, the chances are that the physical plant and the financial structure will be all right. The T. P. & W. is doing all right in all of these three particulars. The management of T.P. & W. is good. It is young and forward looking.

The five principal officers serving under Mr. Coulter range in age from the 38-year-old Chief Engineer to two gentlemen who head respectively the Operating Department and the Traffic Department, both of whom are 46

Each of these five officers has a competent background and the youth and energy which their age suggests.

My observations are that the esprit de corps is excellent. The organization is cooperative and works well together. It is a good team. If we are successful in our application, it would be my purpose through friendly counsel on the Board of Directors to help the team along in its efforts to achieve still better results. We think that we could exercise a watchfulness and bring to the Board a viewpoint of constructive suggestions which would be helpful. Certainly we would try to be helpful and we would not hinder or harass.

This is an appropriate place to say that, while constructive suggestions from a Board should be helpful, too many viewpoints can be bothersome and "too many cooks can spoil the broth". This is a strong reason why the control of T. P. & W. should be only two railroads.

[fol. 37] Q. What have you to say about the physical plan of the T. P. and W.?

A. I have been over the entire property and the physical plant is good. In forming this opinion I have had the benefit of discussions with Santa Fe officers who are familiar with the property in addition to my own personal observations.

The T. P. & W. is a good line for expedited freight train movement. Starting at Effner, the grade line for the first 125 miles is very good, indeed. There is no grade worthy of the name against westbound traffic, and against eastbound traffic there is only one moderate grade immediately east of Peoria. For the some 80 miles west of MP 125 the grade line is undulating. Against westward traffic there are three so-called "hard pulls" of about 1½ miles in length, but with diesel locomotives they are not difficult. Against eastward traffic there is only one hard pull, which is at the crossing of the Spoon River.

Perhaps a simple way to describe the gradient characteristics is to say that three-unit diesel locomotives are now pulling trains of 5,000 tons or better over these so-called "hard pulls" and that is a pretty good trainload to be moved with a three-unit diesel locomotive. The T. P. & W. is completely dieselized.

The headquarters of the T. P. & W., of course, are at Peoria. Their General Office Building is an excellent one. The up-to-date International Business Machines used in the Accounting Department provide necessary information [fol. 38] with a minimum of time and cost. I think everyone will agree that the equipment is up to date and that the entire setup represents a well organized office.

The locomotive shop is in good physical condition, well equipped with proper tools for the efficient and economical repairs of their diesel locomotives. Their locomotives are equipped for radio communication.

Q. Will you comment on their track and roadbed?

A. I would classify their track conditions as good. They have purchased nothing except treated ties for some 21 years. Their ballast conditions are quite all right. They have been pursuing a well-developed program of rail renewal. Beginning in 1953 they adopted a very modern plan of welding their rail in long continuous strips rather than following the time-honored method of fastening rail ends with angle bars.

I think it is fair to say that their program of improving their rail conditions is not yet complete, but I hasten to add that it is moving along and the situation is "well in hand". Their 1956 program contemplates laying 10 miles of 115-pound welded rail. I am personally quite satisfied with their rail condition and program.

For some years they have employed a pressure grouting method of stabilizing the roadbed. This is an example of modern procedure. Also in keeping with modern procedure they are equipped with multiple track tamping outfits and [fol. 39] other power tools in the track maintenance work. Some of their track maintenance forces follow the desirable system of using highway vehicles for moving to and from work. In fact, their entire operating and maintenance administration is top-flight and quite in keeping with what should be expected of the managerial force, concerning which I testified a few moments ago.

Q. What of their sales force?

A. Their traffic soliciting organization gives every indication of being excellent, but I have not had an opportunity to acquaint myself with the off-line force.

Q. What is the financial condition of the T. P. & W.?

A. Exhibit H-6 has been prepared from information shown in Form A, Annual Reports to the Interstate Commerce Commission for the year 1954, to show salient features of their financial situation. The complete reports for all of the railroads are on file with the I. C. C., but I thought this would help in supporting the statement that the T. P. & W. is in good financial shape. Believing that there should be some way to have comparisons available with which to measure their financial situation, I decided to make comparisons between the T. P. & W. and the three Western railroads involved in the case. The three Western railroads are: M. & St. L., Rock Island and Santa Fe.

I would now like to address myself to line 3 of Exhibit H-6, which is the ratio between funded debt and operating revenues. We have made the calculation, and it is self-[fol. 40] explanatory on the exhibit how it was done. I call attention to the fact that the ratio on the T. P. & W. is 26, the M. & St. L. 38, the Rock Island 52, the Santa Fe 37. From a rating standpoint the T. P. & W. would rate number one in that comparison.

I call attention to line 5, which shows the ratio between net current assets and operating revenues. T. P. & W. point— I overlooked it awhile ago, if I may correct that, that 26 should have a decimal point in front of it—decimal point 15, M. & St. L. .13, Rock Island .14, Santa Fe .19. The rating in that regard would go to Santa Fe.

I call attention to line 14, which shows the number of times net railway operating income covers fixed charges and contingent charges before income taxes. The T. P. & W. 18.5, M. & St. L. 10.4, Rock Island 7.6, Santa Fe 11.5. The rating in that instance goes to the T. P. & W.

On line 15 we show the same information after federal income taxes. Perhaps the most significant item is line 14 because the charges are deductible for federal income taxes and do come ahead of taxes.

I will call attention now to line 17. The ratio between operating revenues and total compensation, there the T. P. & W. .36, M. & St. L. .52, Rock Island .47, Santa Fe. .47. The number one rating in that regard would go to T. P. & W.

Finally I call attention to line 18, the per cent of operating revenue carried through to net railway operating income [fol. 41] before federal income taxes. The T. P. & W. is 19.5 per cent, the M. & St. L. 13.9 per cent, the Rock Island 12.8 per cent, the Santa Fe 17.9. The number one rating there goes to the T. P. & W.

Q. Mr. Gurley, will you describe the early relations between the Santa Fe and the T. P. & W.?

A. The early relations between the T. P. & W. and the Santa Fe at Lomax began when the T. P. & W. on February 15, 1927, filed an application for a certificate that the present and future public convenience and necessity required the construction of a connection between T. P. & W. and Santa Fe at Lomax. This application was identified as Finance Docket 6127 by the Interstate Commerce Commission and decision was rendered April 7, 1927.

I now quote two excerpts from the decision. The first is and I now quote:

"No objection to the granting of the application has been presented to us."

That is the end of that quotation.

The second quotation reads as follows. "The applicant represents that this connection will provide shorter routes between points on its line and points on the Santa Fe; that the distance from Peoria, Illinois, to Kansas City, Missouri, would be from forty-nine to seventy-four miles shorter than by its railroad and its present connections; and that by means of this connection its line would form part of [fol. 41-A] short routes between Pittsburgh, Pennsylvania, and Kansas City, which would avoid the Chicago and St. Louis terminals. The number of cars to be moved over the connecting track is estimated at 15 a day in 1927, increasing to 60 a day in 1931 and thereafter.

"It is claimed that the route to be afforded by the proposed connecting track will permit of longer hauls to the applicant and the Santa Fe, and will eliminate one or more intermediate carriers. It is urged that the proposed construction will aid in sustaining that part of the applicant's railroad west of Peoria."

End of the quotation.

I should add too the connection at Lomax was made in August 1927.

Q. Will you outline the circumstances which lead to your decision to seek authority to acquire control of the T. P. & W.?

A. In 1947, shortly after the sudden death of Mr. McNear, I had several discussions with our traffic department people about the T. P. & W. It was my opinion then that due to McNear's death the time was bound to come when ownership of the T. P. & W. would change hands and I wanted to know what, in the light of the circumstances of the times, this prospect suggested we ought to do.

Mr. Grogan was then our Traffic Vice-President and he had been a member of the traffic staff when the Lomax gateway was opened some 20 years previously. Grogan and I had discussions with various Santa Fe Traffic Department [fol. 42] officers. These discussions and considerations carried on for a couple of years.

The opinions were unanimous that if it were not for the T. P. and W. we could lose business to the St. Louis Gateway or to other gateways short of Illinois junction points. I became thoroughly convinced that the T. P. & W. was well established in the minds of shippers and others and that we enjoyed hauls on freight east of Kansas City that we would have lost except for the T. P. & W. I had some conversations with Mr. Franklin, the president of the Pennsylvania or he was either president or executive vice-president, at that time about joint acquisition by the Santa Fe and Pennsylvania.

Of course, I had in mind at that time certain discussions about the T. P. & W. in the spring of 1942. This was during the early days of World War II. The T. P. & W. was involved in serious labor troubles. The government functioning through the Office of Defense Transportation took over the T. P. & W. in March 1942, but both before and after the takeover Messrs. Eastman and Boatner of the Office of Defense Transportation discussed with me the possibilities of Santa Fe and Pennsylvania taking it over rather than operating the T. P. & W. through a federal manager. My position was that our country was at war

and we would do almost anything the Office of Defense Transportation wanted us to do.

Despite that feeling on my part, however, I was conscious of the fact that the Office of Defense Transportation had some property right questions to consider which in-
[fol. 43] cluded settlements of a labor dispute on some basis that might prove to be unsatisfactory to the owners and this caused me to be a little cautious, although I never backed away completely from the position I have just described. Under all the circumstances at that time, however, it suited me all right when they concluded to carry on with the federal manager.

This was the first time my attention was focused upon the possibility of Santa Fe and Pennsylvania taking over the T. P. & W. At that time Mr. Paul Hastings was our Traffic Vice-President. I well remember our discussions in 1942 about the future of the T. P. & W. As a result of all those discussions both with Hastings and others, I formed the opinion that following a period of government control the T. P. & W. would probably go back to McNear, but I also formed the opinion that, if it should pass out of McNear's hands, Santa Fe should buy into it and buying into it with the Pennsylvania looked like a logical thing to do.

During the considerations Grogan and I were giving to the questions in 1947-1949, Mr. Coulter came to the T. P. & W. and under his administration our relations with the T. P. & W. continued on the same friendly basis as under Mr. McNear.

Q. What was the immediate background of the proposal now before the Commission?

A. In 1954 I heard some rumors or gossip to the general effect that the trustees of the McNear estate were consid-
[fol. 44] ering the sale of the T. P. & W. In the fall of 1954 I asked one of the trustees, Mr. Gladson, if that was true and he said it was. He said the trustees had received an offer but that they did not think it was attractive. I told him that if the trustees got to the point where they were seriously considering the sale of the T. P. & W. that we would want an opportunity to buy. Mr. Gladson said he would keep that in mind.

Shortly after this I met Mr. Symes, who was then president of the Pennsylvania. I told him about my conversation with Gladson and that I thought it was something that would bear watching. We left it that way at the time.

On March 15, 1955, I had an engagement to meet the trustees of the T. P. & W. and a representative of The Hanover Bank but one of the trustees failed to show up due to illness and the conversation was with one of the trustees and a representative of The Hanover Bank. They asked me if we were interested in purchasing the stock of the T. P. & W. I told them yes, that we were interested.

It was clear to me that they were interested in a sale and that more specific discussions were imminent. Although several of our officers were rather familiar with the T. P. & W. and, in fact, had acted as advisors to the T. P. & W. in inspections and decisions about the physical property, and even though I was reasonably familiar with it myself, nevertheless, following the discussions of March 15 I arranged for an inspection of the property.

[fol. 45] The inspection was made the latter part of March by Mr. John Reed of our executive staff. Mr. Reed is a graduate of the Sheffield School at Yale. He had experience with Santa Fe in the engineering organization and other assignments including the position of Division Superintendent before occupying his present position.

Shortly after this meeting of March 15, they, that is, the trustees of The Hanover Bank, called upon the Pennsylvania.

Subsequently, on April 15, 1955, there was a meeting between Vice-President Marsh of the Santa Fe and Vice-President Bevan of the Pennsylvania and representatives of the trustees. At this time certain understandings were reached about Santa Fe purchasing 26 per cent of the stock of the T. P. & W. and Pennsylvania purchasing a like amount.

A duplicate of the Santa Fe letter, dated April 15, 1955, pertaining to the discussion and agreement is identified as Exhibit 7-F of the application.

It is well to point out that under the plan whereby the trustee was to sell 52 per cent of the stock to Santa Fe and Pennsylvania, they reduced the concentration of the

T. P. & W. stock in the trust. Yet, they and the Hanover Bank would continue to hold large blocks of the stock.

The proposed plan of ownership and operation, therefore, contemplated 52 per cent of ownership by these two [fol. 46] railroads whose transportation interests did not conflict. With two large outside holdings, as well as some small holdings by various members of the McNear family and by Mr. Coulter, we had a workable setup for a continued independent T. P. & W.

Q. Was their plan satisfactory to you?

A. For my part, the plan was not entirely satisfactory from the standpoint of stock ownership although it was acceptable. We had no formal agreements with either Hanover or the trustees about any further sale of stock, but I felt rather strongly that if there was a further sale, we would be able to make the purchase.

Later there were discussions looking to action about the Purchase Agreement mentioned in the third paragraph of Exhibit 7-F.

Q. That is 7-F of the application?

A. Third paragraph of Exhibit 7-F of the application, yes, I thank you.

But on the afternoon of May 25, 1955, the co-trustees came to my office and advised me that on advice of counsel the co-trustees did not consider there was an enforceable agreement in effect with Santa Fe and Pennsylvania.

In the light of that, they expressed a desire to meet with Mr. Symes and me. I had some telephone conversations and it was arranged that the co-trustees would meet with Mr. Symes and me on Friday, May 27, in Washington.

[fol. 47] At 3:30 p.m. on May 26, 1955, while the Santa Fe Board of Directors was in session at its regular monthly meeting, I was asked to excuse myself from the meeting to respond to a telephone call from Mr. Chinn of the Wilmington Trust Company. He told me that the trustees had an offer from Mr. Heineman, representing the M. & St. L., to purchase all of the T. P. & W. stock held by the trustees for $133.33 per share, which offer would expire at 5 o'clock p.m. that afternoon.

Mr. Chinn said that the trustees had decided that, despite the fact that they had had an engagement with Mr. Symes

and me the next day in Washington, under all the circumstances then existing they would sell the stock at $133.33 per share before 5 o'clock unless there was a higher offer. I made them a higher offer, i.e., $135 a share, which they accepted. This acceptance is reflected in an agreement identified as Exhibit 7 of the application.

Q. What arrangements were made for the purchase of the remainder of the stock?

A. Very shortly thereafter we contracted for the purchase of the stock held by the Hanover Bank, which agreement is identified as Exhibit 7-A of the application. Later we entered into purchase agreements under which we are to purchase all of the remaining shares of stock of the T. P. & W. Copies of these agreements are in the application, with one exception, which is reproduced as Exhibit H-7 in this case.

[fol. 48] So it was that Santa Fe entered into contracts to purchase all of the shares of stock of the T. P. & W. and there were no commitments on our part to sell any of the stock to any other railroad. We were under the obligation to appraise the situation which was getting a little complex by that time and to try to decide what was the logical and right thing for us to do.

Q. Will you describe the alternatives which you considered at that time?

A. First, we gave serious consideration to going it alone. It had the virtue of single control which has its attractions. It would insure the authority to act as well as the obligation to act. We gave consideration to voluntarily including other railroads in the ownership. I had discussions with the chief executive officers of the Nickel Plate, Rock Island, M. & St. L. and the Burlington about joint ownership.

All of these discussions did not relate to the same identical plan of joint ownership, but they all included considerations of joint ownership. We also had discussions with our friends of the Pennsylvania.

My considered opinion after all of these discussions was that when everything had been evaluated as carefully as I was capable of doing the ownership of the T. P. & W. on

the basis of the plan covered by the application of the Santa Fe and the Pennsylvania in this case was the proper and logical course to follow. We notified the Nickel Plate, Rock [fol. 49] Island, M. & St. L., and the Burlington on June 28 of our decision.

Q. What was the basis for this decision?

A. I was convinced then and I am convinced now that the T. P. & W. route should be continued, supported, and improved. I was convinced then and I am convinced now that this accomplishment is impossible with a diluted ownership. A dilated ownership brings to the board men with conflicting interests. That brings on delays in decision and it produces a situation where, due to the dilution in ownership, the stimulant which comes from financial benefits in a venture are pretty well lost. I want to emphasize the adverse effect of such dilution.

Mr. Duffy, our Traffic Vice-President, is to follow me on the stand and he will testify as to what our purposes are about placing the Lomax gateway on a solicitation parity with Chicago if our application is approved. He will testify about our purposes with reference to placing the area served by the T. P. & W. on a parity with communities served by the Santa Fe with reference to the location of industries.

Q. Is the approval of your proposal for joint ownership with the Pennsylvania essential to these purposes?

A. It is. All of this is based upon the belief we will be successful in our efforts to be a 50-50 owner of the T. P. & W. When one is a 50-50 owner and receives 50 per cent of the benefits that flow from the operation of a property, the concept is one thing, but, if contrary to our strong [fol. 50] views, we might face a question of dilution, then we have an entirely changed situation.

While we are discussing the interests and obligations of a 50 per cent owner, it is an appropriate place to take a position on the record with reference to the supply of freight cars.

An adequate freight car supply is very important. Unfortunately, there have been freight car shortages throughout the country, and I think we must admit that the railroads in their entirety do not own enough freight cars.

There have been differences of opinions as to how many freight cars each railroad should own.

There has never been a time when the Santa Fe failed to meet the suggestions or recommendations made by the officers of the Association of American Railroads. Generally, we have gone beyond their recommendations.

I think it is fair to say that Santa Fe's joint ownership in T. P. & W. adds substaatially to the car supply available for T. P. & W. shippers. We would place the T. P. & W. on a parity with the Santa Fe itself. In other words, T. P. & W. shippers would be treated on a parity with shippers located on the Santa Fe.

It is fair to add that the T. P. & W. today does not own as many cars as the A. A. R. study group recommended. The T. P. & W. officials do not seem to agree with the A. A. R. study group, but my inclinations at the moment are more in favor of the A. A. R. study group. Certainly, my purpose would be to have either the T. P. & W. own the [fol. 51] cars which they ought to have or for Santa Fe and Pennsylvania between them to add to their ownership sufficiently to take care of the T. P. & W. It is an obligation which we would meet in full.

Earlier I quoted from Finance Docket 6127 about the position of the applicant in 1927 that the connection between T. P. & W. and Santa Fe at Lomax would aid in sustaining that part of the T. P. & W. west of Peoria. Addressing myself now to that, I call attention to the fact that the west end of the railroad serves Keokuk, Warsaw, La Harpe, Bushnell, Canton, Cuba, and other communities. As things stand today, the traffic moving over the west end of the T. P. & W. through the Lomax gateway is the greatest single underwriting influence of continued good service to all the communities served by the west end of the T. P. & W.

Continuing now with my considerations as to what we sought to do when we had contractual control of the T. P. & W. stock. Of course, people in the railroad business have general knowledge of the flow of traffic through various gateways and between the different railroads. Throughout the years the president or the federal manager, as the case may be, of the T. P. & W. has shown me copies of

T. P. & W. reports which reflect the interchange with other railroads and, therefore, I have had that general knowledge over a period of time.

It was not, however, until after we had made the contracts about the purchase of the T. P. & W. stock and had a contract in connection with necessary applications to the Interstate Commerce Commission under which those from whom we were purchasing the stock pledged themselves that they would—and I now quote from the contract—"in all reasonable ways, cooperate with Santa Fe in the prosecution of such application and the assembly of data pertinent to its presentation and consideration", that I had opportunity to get precise financial figures showing the revenues accruing to the T. P. & W. by reason of interchange at (a) Lomax, and (b) Effner.

Q. Will you turn to Exhibit H-5 and comment on the data to which you have just referred?

A. I would like to call attention first to page 6 of Exhibit H-5. Page 6 is a so-called pie chart which shows in the upper section the percentage of cars interchanged by the T. P. & W. with Santa Fe and P. R. R. as compared with all other interchange. The bottom section reflects the revenue. The comparisons are made for the 12 months ended June 30, 1954, and for the 12 months ended June 30, 1955.

The pie charts are rather self-explanatory but there is 72 per cent of the cars in one year, 70 per cent in the next year, of all the P and W interchange, interchange at these two places.

I think I need not belabor the pie chart, it is rather self-explanatory.

Exam. Albus: Yes, the exhibit will speak for itself.

A. An appraisal of the revenues accruing to the T. P. and W. by reason of the interchanges at (a) Lomax, and (b) [fol. 53] Effner, strongly supported the belief that the T. P. & W. should be owned and controlled by the Santa Fe and Pennsylvania.

I became thoroughly convinced and I am thoroughly now that the public interest as well as our own selfish interest was best served by a joint ownership on the part of the

Pennsylvania and Santa Fe. It was and is my opinion that this provides something quite important which is akin to the so-called checks and balances of our federal government.

By Mr. Thomas:

Q. Can you illustrate this point by referring again to Exhibit H-5?

A. Yes, I would like to call attention to page 16 of the Exhibit H-5, captioned "Road Haul Interchange of the Pennsylvania Railroad and The Atchison, Topeka and Santa Fe Railway with the Toledo, Peoria & Western Railroad.

In explanation of the influences I have identified as checks I have in mind that when you examine this statement showing the business interchanged between the Santa Fe and Eastern railroads through the T. P. & W. you will observe in the right-hand statement on page 16:

Line 1, the Pennsylvania.
Line 2, the Nickel Plate.
Line 3, the New York Central.

Now, the Santa Fe is greatly interested in the traffic moving to and from the Nickel Plate. With the strong interest we have in the Nickel Plate interchange, I am [fol. 54] thoroughly convinced that we would never permit the Pennsylvania to do anything detrimental to that traffic, but I do say we wouldn't let them do it, even if they did want to do so. These same considerations apply, of course, to the traffic reflected on Line 3 going to the New York Central.

When you examine the interchange between the Pennsylvania and the Western railroads through the T. P. & W., you will observe in the left-hand statement:

Line 1, the Santa Fe.
Line 2, the Burlington,
Line 3, the M. & S. L.,
Line 4, the Milwaukee,
Line 5, the Rock Island.

The Pennsylvania is just as much interested in the proper service and proper treatment of these other Western connections as Santa Fe is of the service to and from Nickel Plate and I am thoroughly convinced that the Pennsylvania as a 50-50 owner would never permit Santa Fe to do anything to the detriment of these other Western railroads with which the Pennsylvania, in the very nature of things, wants to be on good terms, and so it seemed to me that these checks and balances provide the selfish interests which are essential to the underwriting of public interests.

Exam. Albus: Let the record show a 10-minute recess. Please observe the no smoking sign in the hearing room.

(Short recess.)

[fol. 55] Exam. Albus: The hearing will please come to order.

Are there any additional appearances to be made at this time?

(No response.)

Exam. Albus: Apparently not.

We will continue with the direct examination of Mr. Gurley.

Mr. Thomas: May I go off the record, please, for a minute.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

By Mr. Thomas:

Q. Will you continue, please, Mr. Gurley.

A. Then, in addition to all of that, there is the pledge we have made about the Board of Directors being so composed that the numerical majority will consist of businessmen along the TP&W who are sensitive to the business interests of the community.

Q. What are some of the other reasons why you did not

wish to take in the interested railroads who sought to become partners with you?

A. The maps in Exhibit 4, captioned "Basic Maps", illustrate some of the other reasons why I felt that the full potentialities of the TP&W would not be realized if the opposing railroads were taken in as partners.

I would first like to discuss the M&StL and call your [fol. 56] attention to page 4 of Exhibit H-4. A glance at page 4 shows that the M&StL now has a line into Peoria and necessarily short hauls the TP&W on much of the traffic it interchanges with it.

I do not know what position the M&StL will take on the record, but I do know that in the past they have either favored or advocated the discontinuance of service on the western section of the TP&W.

I would like to discuss now the Rock Island—see page 5 of Exhibit H-4. It will be observed that, although the Rock Island reaches Keokuk on the west end of the TP&W with a branch line, it enters Peoria from two directions and competes directly with the TP&W on traffic between Keokuk and Peoria. As I see it, therefore, the Rock Island, like the M&StL, would have little interest in developing the west end of the TP&W.

As I understood the Rock Island's position in June 1955, both orally and in writing, they did not like the idea of Santa Fe being in Peoria either directly or through ownership in the TP&W unless the Rock Island itself was a part owner of the TP&W.

I call attention also to the fact that the Rock Island serves St. Louis, and therefore has a lesser interest in the route via the TP&W than the Santa Fe, which does not serve St. Louis.

[fol. 57] Q. What have you to say about the Nickel Plate?

A. The relationship of the Nickel Plate and the TP&W is illustrated on page 7 of Exhibit H-4. It will be observed that the Nickel Plate is competitive with the entire east end of the TP&W just as the M&St.L is on the west end and would have no economic incentive to develop that part of the line between Effner and Peoria.

Q. Will you comment further on your reasons for joining with the Pennsylvania.

A. I would like to turn now to page 13 and call attention to Column 4 and observe Lines 4, 6 and 7—no, I beg your pardon. I got a little bit mixed up in looking at that exhibit. Let me state that over again—no, I am right. (Continuing) —observe Lines 4, 6 and 7. You will see that the TP&W gross revenue accruing by reason of interchange with these three railroads, i.e., Nickel Plate, Rock Island and M&StL is substantially lower than the TP&W revenues resulting from interchange with the Pennsylvania and Santa Fe.

Turn now to Page 2 of Exhibit H-4 and observe that the Pennsylvania on the east and Santa Fe on the west end provide a natural through route for the movement of east-west traffic. It is approximately 68 miles from Logansport to Lomax via the TP&W than via Chicago.

With page 2 of Exhibit H-4 in front of us, let us also examine Page 8 of Exhibit H-5, which is a statement show- [fol. 58] ing the relationship of interchange via Pennsylvania and Santa Fe to the total TP&W carload traffic from 1924 to and including 1955.

In examining Page 8, it is well to keep in mind that the TP&W is essentially a bridge line between the East and the West and it is a very important bridge line, especially in the handling of transcontinental freight.

The data and chart on Pages 2 and 4 of Exhibit H-5—

Q. (Interrupting) I think that is "3", Mr. Gurley, "3 and 4".

A. I misspoke, it is 3 and 4, I beg your pardon—(continuing) pages 3 and 4 of Exhibit 4 shows that this bridge traffic produces better than two-thirds of the total revenues of the TP&W.

Its broad benefits, that is, broad benefits of the TP&W, to shippers and to the national transportation plant lie in its worth-while contribution to the movement of bridge traffic. It is a so-called middle route through Peoria, forming a connection between the East and West without necessitating the interchange of traffic to and from the Santa Fe at Chicago or Kansas City. Chicago and Kansas City are the most perplexing and expensive of the interchange points in Santa Fe territory.

Q. How about the interchange with the TP&W?

A. The interchange between Pennsylvania and TP&W at Effner is what is known as a "corn field" interchange. The interchange at Lomax between the TP&W and the Santa Fe is simplicity itself and has all the expedition and the [fol. 59] economy implicit in that type of an interchange.

Q. Will you describe the growth of the interchange between the Santa Fe and the T. P. & W.?

A. As I stated earlier, the connection between Santa Fe and TP&W at Lomax was established in August 1927. Please note in the center section of Page 8 of Exhibit H-5, and note the interchange of cars between the Santa Fe and the TP&W.

The year 1928 was the first full year of that new source of business for the TP&W. From the last column of this page you will observe that the total cars handled by the TP&W were in 1928 were 67,957.

In 1955, down at the bottom of the page, this increased to 118,956, or approximately a 75 per cent increase.

From column 5 you will observe the cars that were interchanged between the Santa Fe and TP&W, in 1928 were 7,264.

In 1955 this increased to 34,735, or approximately a 378 per cent increase.

This shows what a tremendous part the connecting service of the Santa Fe has played in the development of the TP&W since the opening of the Lomax gateway in 1927. I would like to add this has taken place under the traffic solicitation policy Mr. Duffy will describe. He will discuss also the solicitation policy we propose under our application. That traffic solicitation policy, which he will outline, has executive approval.

It was in the light of all of the foregoing considerations [fol. 60] that we voluntarily entered into an agreement with the Pennsylvania which is covered by Item 7-D of the application in this case.

Q. Does that conclude your testimony, Mr. Gurley?
A. Yes.

Mr. Thomas: I want to offer exhibits H-6 and H-7.
Exam. Albus: Wait until after cross-examination.
Is there any cross-examination of Mr. Gurley?

Mr. Wheeler: Yes, sir.

Exam. Albus: Mr. Wheeler.

Mr. Wheeler: Mr. Examiner, I would like to state at the outset while I would undertake to do some cross-examination now, Mr. Gurley has put in a mass of material now, exhibits and so on, which will make it impossible for me to complete it now. I will go forward as expeditiously as I can now but I may want to recall him.

Exam. Albus: Very well.

Cross Examination.

By Mr. Edward Wheeler:

Q. Mr. Gurley, as I listened to your testimony it appeared to me to outline in considerable detail the reasons why the interests of the Toledo, Peoria and Western would be certified by an acquisition of the railroad by the Santa Fe. I fail to hear, however, reasons which impelled, you may say several usual reasons which impelled or did impel, the Santa Fe to invest $6,000,000 in the stock of the TP&W. [fol. 61] Could you state those reasons, please?

A. I don't believe I could state them much better than I did. I am sorry you didn't understand me. I was trying to tell you why we did that.

Q. So that all the reasons which led to your purchase are set forth in your testimony?

A. Well, perhaps they could be supplemented. They were the belief, as I said, that we have also considered that route of the TP&W be a complementary to us, adds to our traffic, and obtains traffic which we would otherwise not obtain. I tried to say that.

Q. Well, Mr. Gurley, as I understand you now, you are proposing a complete operation of the TP&W, that is, the same operation that exists will exist after your application?

A. We will certainly obtain a complete and independent operation, yes, sir.

Q. How will the TP&W be more complementary to the Santa Fe operation traffic-wise under acquisition than it is at the present time?

A. Well, of course you will get your better traffic testi-

mony from Mr. Duffy, but it will come largely from putting the TP&W on a parity with the Chicago gateway.

Q. There is nothing in the situation at the present time, is there, Mr. Gurley, which would prevent you or the Santa Fe from putting the TP&W on a parity with the Chicago gateway now?

[fol. 62] A. We would have the authority so to do, we won't have the interests, though.

Q. What do you mean "interest"?

A. Well, I meant that while we have got along on a very friendly basis with the TP&W we have favored our long-haul traffic, and when we have the 50-50 interest in it we propose we would have a financial interest which is separate and apart and goes beyond what we have now. That is very evident to me.

Q. So that it would be, it's that economic interest which makes the difference between the condition it now appertains and would appertain if the Commission approved authority for the Santa Fe to acquire control of the TP&W?

A. Oh, yes, I think economic influence is rather strong.

Q. You do?

A. Yes.

Q. Do you think that is generally true in the operation of the railroads?

A. It is pretty true of human nature, I think.

Q. Now, Mr. Gurley, the purposes set forth on Page 1 of your written statement don't seem to have to do with the economics of the situation and therefore I assume would apply whether or not your application was approved?

A. It would not. This whole thing is predicated upon the approval of the application. I could have no purposes about operating this railroad unless I am in on it.

[fol. 63] Q. You say here, for instance, getting into a little more detail, you told the reporter your purpose was to perpetuate the TP&W as an independent railroad. The TP&W is independent at the present time, is it not?

A. Yes.

Q. So even assuming it would be independent under your control that status would not be changed, would it?

A. I said we intended to perpetuate it.

Q. I am just running down here some of the other purposes you stated here.

Mr. Gurley, on this Section 3, this is an agreement between you and the Pennsylvania, is it not?

A. That is correct.

Q. And the agreement states "Not for the benefit of others not a party to the agreement." When was this agreement first entered into, and I am thinking now in terms of, I believe you said you first had a contractor, or believed you had a contract with the trustee on April 15?

A. Yes, that March letter of April 15.

Q. Now, at that time or prior to that, had you and the Pennsylvania agreed on these conditions?

A. No.

Q. What was your general understanding with the Pennsylvania with respect to the conditions that would pertain at that time?

A. Well, under that time those things were to be worked [fol. 64] out as of the date of April 15 those things had not been worked out.

Q. You had no understanding with the Pennsylvania that you were entering into a partnership with as to the operation of the property?

A. Oh, yes, we had a general understanding.

Q. What was that general understanding?

A. Just about what we have here.

Q. This, in other words, is substantially a reduction to writing of the general principles that you—

A. Oh, I think that would be a fair characterization. This is certainly in much more detail, but I think it is reducing to detail the general thoughts of it.

Q. You state here, returning to your testimony, we believe that it is in our selfish interest to continue a strong, independent organization under management through a board of directors sensitive to the business interest of the area served by the TP&W?

Exam. Albus: What page is that quotation from, please?

Mr. Wheeler: Page 1.

Exam. Albus: Thank you.

By Mr. Edward Wheeler:

Q. Do you believe that the railroads generally are sensitive to the business interests served by their operation?

A. Well, I would hope they were.

Q. And the Santa Fe would fall in that category, would it not?

[fol. 65] A. It would try to, surely.

Q. Mr. Gurley, you concluded that paragraph by stating that your purposes would be best served by joint ownership of the TP&W by the Santa Fe and Pennsylvania. Now, elsewhere throughout your testimony you indicate, you talked about too many cooks spoiling the broth and so forth, you made other statements which indicated that single ownership would be preferable to dual ownership or multiple ownership, why did you—

Mr. Thomas: Let me object to that. The question doesn't state what Mr. Gurley testified to. He did not state that single ownership would be preferable to dual ownership.

Exam. Albus: The record will show what he stated.

The objection is overruled.

What is the question?

(Question read.)

By Mr. Wheeler:

Q. Why did you sell part of your contract to the Pennsylvania?

A. Well, Mr. Wheeler, I think that when you examine any particular situation you must examine it as a particular situation and you cannot generalize. As I said in my direct testimony, going along had certain attraction, but for my judgment, and my judgment was a very sincere one and arrived at pretty carefully, I thought in view of the number of cars interchanged with the Pennsylvania, I thought in view of that situation which for want of a better way I attempted to describe as the checks and balances, that the [fol. 66] two railroads could get along in a very satisfactory manner, and I thought that the peculiarities or whatever you choose to call it of the TP&W or the particular

peculiarities of the TP&W warranted a dual control rather than a single control. It is a question of judgment.

Exam. Albus: When you speak of cars interchange with Pennsylvania, whom do you mean?

The Witness: TP&W.

Exam. Albus: TP&W?

The Witness: TP&W.

Exam. Albus: Thank you.

By Mr. Wheeler:

Q. Mr. Gurley, you have indicated that you are quite familiar with the general history of the TP&W. Are you aware of the fact that the TP&W went into bankruptcy in dual ownership in which Pennsylvania was one of the dual owners?

A. I have some familiarity of that history, yes.

Q. Didn't that give you pause in taking the Pennsylvania into partnership with you in this case?

A. It caused an examination, I wouldn't say pause, it took an examination of it.

Mr. Broker: We can't hear the answers. Would repeat that answer, please.

(Answer read.)

By Mr. Wheeler:

Q. And that examination led you to what conclusion? [fol. 67] A. The examination led me to the conclusion to do what we did do. In other words, putting it as nicely as I know how, an examination of that relation prior to '26 or '27 didn't frighten me to the future at all. I thought the future was something to be faced and handled in its own way.

Q. You didn't think past performance was any indication or would deter you in the particularities of this situation to which you referred for dual ownership?

A. It did not deter me at all.

Q. You are aware that the Pennsylvania, of course, as you have pointed out was at that time, as it is today, a

connecting carrier and had a large interchange traffic with the TP&W, are you not?

A. I don't know that I do apprehend that question. I really didn't quite catch the implication.

Will you read the question.

Exam. Albus: The reporter will read the question, please.

(Question read.)

By Mr. Wheeler:

Q. Speaking of at the time of the bankruptcy or immediately prior thereto.

A. Well, I knew they were a connection at Effner as they are now. I do not have in my mind too much of the flow of traffic between the TP&W and the Pennsylvania & W. at Effner in those early days. As far back as I have any actual car count it is reflected on page 8. Some of the years [fol. 68] prior to that, no, I do not have a numerical car count in mind.

Q. Were you aware or did you seek to discover before determining to go into this transaction the extent of the interchange between the Burlington, Chicago, Burlington and Quincy and the TP&W during the course, during ownership of the TP&W with Pennsylvania?

A. No, I did not get that numerically. Of course, historically, as you probably know, contemporaneously with the opening of the Lomax gateway the TP&W discontinued its joint operation from Lomax to Burlington where it connected with the Burlington Railroad, I knew that.

Q. Why was that?

A. Well, that decision was entirely a TP&W decision.

Q. Was it a condition imposed by the Santa Fe for—

A. (Interrupting) Oh, no, no.

Q. (Continuing) —for not objecting to the opening of the Lomax gateway?

A. No.

Q. Are you certain of that fact?

A. Well, I think I am, Mr. Wheeler, I was not here. Under the discussions I have had with the so-called old-timers.

Q. Did you check the Santa Fe files to determine whether or not there were any memoranda relating to that—

A. (Interrupting) I saw nothing of that kind.

Q. Did you check I asked you.

[fol. 69] A. Yes, the best I could, but I saw nothing of that kind.

Q. Did you become aware of the fact that the Burlington at that time was the largest interchanger of traffic with the TP&W at the Lomax gateway or the gateway near Lomax?

A. I would gravely doubt the accuracy of that statement.

Q. Did you investigate to determine whether it was during the course of its ownership of TP&W?

A. The interchange between the Burlington and TP&W at Lomax was the largest they had?

Q. At that gateway.

A. Oh, at that gateway. Well, if there was a connection between the Burlington and the TP&W at Lomax in those early years it would have to be—because it would be the only one, there was no other railroad there.

Q. Further in your testimony, page 2 of your written statement, there occurs the statement "We think that we could exercise a watchfulness and bring to the Board a viewpoint of constructive suggestions that would be helpful." Would you please give me an example of what you had in mind there?

A. Well, I don't know that I need to find the precise language to answer your question nor neither do I know that I have any particular point in mind. I was merely trying to indicate there that we think that our being on the Board would produce a watchfulness and constructive criticism of operations on a broad and general basis. I have no particular thing to which I am pointing at the [fol. 70] moment.

Q. I gather from your previous statement that you believe that two cooks in this situation won't spoil the broth. Do you believe that there is a magic in two?

A. I don't know that I would say there is any magic in two, but I say that two would not spoil the broth because of the peculiarities of this particular railroad. I was con-

vinced that two was better than one, and I am equally convinced you should not go beyond two. That is as clearly as I can tell you about my opinion.

Q. I don't believe you previously stated that two was better than one. I think you stated that the Pennsylvania and Santa Fe was better than the Santa Fe alone, is that not correct?

A. Well, I hope we are not getting to a play on words. I thought that the two in this particular instance was better than either one of the two or any other one. Does that answer you?

Q. Yes, sir. And that derived, as I recall, from this series of checks and balances, is that correct?

A. That is a pretty important part of it.

Q. Why should the Santa Fe want a check on the operation of the lines of the TP&W west of Peoria?

A. The reason that we would want that is that we were convinced that in response to meeting this test, this intangible what you call it public interest that our interests [fol. 71] of checks and balances and that sort would be helpful in the public interest and that's the reason we look upon it as favorably as we do.

Q. It is a check, then, upon the possible excesses of the Santa Fe against the public interest in the operating the line west of Peoria—

A. (Interrupting) Of course I don't think.

Q. May I finish the question?

Exam. Albus: Finish the question, please.

(Question read.)

By Mr. Wheeler (continuing):

Q. —that you think of the partnership of the Pennsylvania would prevent.

A. I don't know whether I thoroughly understand that question, it got a little involved, but I will make you an affirmative answer to it, that I thought it was a good thing.

Q. On the bottom of page 2 of your testimony you state that the TP&W is a good line for expedited freight traffic movement. That condition will not be changed, as I understand it, by the approval of your application, will it?

A. Well, the TP&W is a good line for expedited freight movement and it would not be harmed by our application. As I said earlier, we think we could make a contribution to improving what is already a good situation.

Q. May I have a direct answer to my question now, please?

(Question read.)

By Mr. Wheeler:

Q. I would like a yes or no answer and then you may [fol. 72] explain any time you wish, Mr. Gurley.

Exam. Albus: Read the answer.

(Question and answer read.)

Exam. Albus: Next question, please.

By Mr. Wheeler:

Q. Mr. Gurley, is it proper to conclude from your testimony that, when there are two competing applicants for control of a given railroad the applicant having the greatest exchange of traffic with that railroad should be preferred?

A. Well, I think I'd answer that by saying that is pretty nearly yes, there might be some qualifications but I think the answer is yes.

Q. Why do you so state?

A. I think that the railroads which historically have an interchange or relation with another railroad like the TP&W and whose interchange has produced the condition which is now, TP&W in its present state, more than anything else, I think those are very powerful influences and should have favorable consideration.

Q. Mr. Gurley, doesn't that necessarily lead to the conclusion that in any contest between a large railroad and a small railroad for control of a third railroad that the large one will always prevail?

A. I started to say, if I make this, I started to say, set other things being equal, I would never get to the point quite as you do it that the little railroad is to be choked off [fol. 73] by the big railroad, no, I don't take that position

at all. I tried to say to you, Mr. Wheeler, on two or three occasions, and I would like to repeat now I have not attempted here to testify about any general philosophy of any railroads, I have tried to direct myself to the particular question before the Commission right now.

Q. Well, necessarily of course, Mr. Gurley, the Commission in deciding cases on a case by case basis lays down a policy which if it becomes important becomes a precedent for future action by the Commission, so that I would be therefore interested in whether or not you would agree or disagree that the amount of interchange between the acquired and acquiring road should determine whether or not or should be determinative of who gets authority to control the acquired property.

A. I simply cannot answer that question except by saying this, it would be worthy of very serious consideration in the particular case then being considered. I could not go beyond that. I wouldn't know how to go beyond that.

Q. Now, would your statement be the same whether the interchange, the existing interchange was the result of the efforts of the acquiring carrier—of the acquired carrier rather than those of the acquiring carrier?

A. I cannot answer your question.

Q. Well, let's take this specific case, assume with me that the interchange existing between the Santa Fe and [fol. 74] the Pennsylvania is largely due, and the TP&W, is largely due to the solicitation efforts of the TP&W, do you then think that the existence of that large interchange is a basis for the Santa Fe being preferred in an acquisition of control case, the Santa Fe-Pennsylvania case?

A. If I understand your question correctly, and I think I do, the answer is yes.

Q. Now, at page 8 of your statement you state "I do not know what position the M. & St. L. will take on the record but I do know that in the past they have either favored or advocated the discontinuance of service on the western section of the TP&W." Mr. Gurley, did you hear my earlier statement on the record this morning?

A. No, I did not.

Q. With respect to the preservation of existing routes.

A. Oh, I heard that, yes, I heard that.

Q. Would you consider the Lomax to Peoria run an existing route?

A. Well, yes, I would say that affirmatively. I don't think that answers quite the question, I say I don't know what will be on the record, because I could shift on that, of course, but—

Q. (Interrupting) Mr. Gurley, you could shift on any, the Santa Fe could shift on any policy you have enumerated here this morning, could it not?

A. Yes, we could all do that under the provisions of [fol. 75] going to the Interstate Commerce Commission.

Q. Yes.

A. I have no quarrel with you, Mr. Wheeler. I said I didn't know what position you would take on the record I should say that if I had been probably a little mentally alert I would have said except what you said here this morning because I just didn't connect it up at the time. I would not try to say you said anything improper.

Q. Mr. Gurley, can you give me the basis for this statement that you have made here, that I have read to you?

A. The basis of which statement?

Q. The one that I read to you that you do know that in the past they either favored or advocated the discontinuance of service on the western section of the TP&W. Who ever made that statement or advocated that on behalf of the M. & St. L.?

A. I don't think there is any question about their having advocated it. Do you want me to talk names and things like that to you?

Q. Yes, sir.

A. Well, Mr. Heineman would be the first fellow I would talk about. The first time I ever met Mr. Heineman, we had a very pleasant talk. He was talking about his plans of the M. & St. L. and the T. P. & W., and he said that he felt that he had erred in not having discussions with the Santa Fe earlier, that he thought there were opportunities [fol. 76] to discuss with us consolidations with the reference to the interchange of traffic, and my interpretation of that was that when we consolidated any change of traffic now going to T.P.&W. and M. & St. L. it pretty well means the Nemo gateway. Secondly, I hate to bring Mr. Heine-

man's name into this, but you are forcing me to do it, the next time I saw Mr. Heineman we were talking about this very question, and he said that Devans had advocated taking up the west end of the T.P.&W., or let me reconstruct that, abandoning it, I guess, may be the word that was used, and he, Heineman, had talked with Coulter about it. Coulter had cautioned Heineman that that wouldn't work out and that's about as two personal conversations as I believe I can give you.

I have general knowledge coming to me what you might classify as hearsay stuff but nevertheless you form opinions about it.

Q. But that is the only direct information you had from an officer of the, or director of the M. & St. L. with respect to abandonment of the T. P. & W. line west of Peoria?

A. You narrow that to an officer—or director of the M St. L.?

Q. Yes, sir.

A. Then I would say to narrow it that way the answer to your question is yes.

Q. Mr. Gurley, you state on page 8 of your written testimony that because M. & St. L. has a connection from the west at Peoria and the Rock Island also enters Peoria and competes with the T.P.&.W. on traffic between Keokuk and [fol. 77] Peoria, those roads would have little interest in developing the west end of the T.P.&.W. Did you have that situation in mind when you took the Pennsylvania into partnership with you?

A. Yes.

Q. You are aware, are you not, that the Pennsylvania ha a line running up to Peoria, are you not?

A. Yes, I am somewhat familiar with it.

Q. And that's competitive with the Effner-Peoria-T.P. &W. run, is it not?

A. Well, perhaps you had better ask that of the Pennsylvania. I think you will find there is not much competition to it.

Q. In other words, your determination in that respect was based on your belief that there was not much competition between the Pennsylvania, the Pennsylvania's route

coming into Peoria and the Pennsylvania-T. P. & W. route from Loganspport to Peoria?

A. Yes, that's right.

Q. Now, supposing it turned out that there was substantial competition between those two routes, would you seek to amend your application and make—

A. (Interrupting) If I found there was substantial competition there I would first be surprised. I don't know what I'd do after that.

Exam. Albus: Finish the question, please.

The Witness: I beg your pardon.

(Question read.)

[fol. 78] By Mr. Wheeler (continuing):

Q. — and make it an application by the Santa Fe alone rather than the Santa Fe with the Pennsylvania?

A. I will let my answer stand.

Q. You don't know what you'd do?

A. I said I would first be greatly surprised.

Q. Yes, sir.

A. And being in that frame of mind I don't know how to even kind of think about the next one.

Q. Now, Mr. Gurley, don't you compete with the entire route of the T. P. & W. by your Chicago run at the present time?

A. Well, I think it is fair to say that the Santa Fe as well as the other railroads have a Chicago gateway in which that can be argued. As I say, Mr. Duffy is going to discuss that with you more thoroughly.

Q. I am limiting it to this point now as to conflict of interests that you have indicated might exist between the Rock Island and the M. & St. L. via the western end of the line?

A. I have stated as clearly as I can state that if we are a 50-50 owner of the T. P & W. that Lomax gateway acts on a parity with Chicago for solicitation. I don't believe I can state it any clearer.

Q. Now, isn't the Pennsylvania a competitor with the T. P. & W. route through Chicago?

A. The Pennsylvania, of course, moves business through [fol. 79] Chicago as well as through Effner-Lomax, and you may argue that point, that it is a competitive route, the rates are open.

Q. I would like your opinion, I don't want what we can argue unless I can assume from you that when you say it can be argued that it is competitive or it isn't.

A. I don't think there is any question but what there is a certain degree of competition running all through these routes, running all through all of this thing—

Q. (Interrupting) That is, through the Midcontinent area here?

A. Well, all through this M. & St. L., I mean this T. P. & W. situation, but I am a Santa Fe witness and I am trying to tell you what our purposes are on the record for the administration of the T. P. & W. under the circumstances for which we have made application. That's about as far as the president of the Santa Fe can go.

Q. I would agree with you, Mr. Gurley, except until I read your testimony here where you made some references as to what the Rock Island and the M. & St. L. would do, and since you were willing to discuss the competitive effect of their routes I thought it perhaps would be material to get your views with respect to those of the Santa Fe and Pennsylvania, but I will drop that for the moment.

I would, however, like to ask you whether or not the route of the Wabash connecting with you at Kansas City and going through over the Hannibal Bridge and through [fol. 80] Decatur to Logansport is not competitive with the route, Santa Fe, Lomax, Peoria, Effner, Pennsylvania?

A. Well, it is an open route.

Q. Is that a yes or no answer, Mr. Gurley, I don't understand.

A. Well, I hardly know, while it is an open route, it is there as a physical matter, when you examine what moves there you have to strain pretty much to call it competition, but nevertheless I will agree that there is a route there and it is physically a competitive route.

Q. And the St. Louis gateway, I assume, would also be a competitive route?

A. I think that is correct.

Q. Are you familiar with the conditions under which the Pennsylvania acquired control of the Wabash?

A. No, I am not.

Q. Did you take into account in determining to take Pennsylvania into partnership with you or sell them 50 per cent of this deal that they had control of the Wabash?

A. Oh, I was quite aware of that.

Q. Refer briefly to Page 9 of your written statement, Mr. Gurley. None of the facts set forth on that page would change, would they, on approval of your application from the conditions that now exist?

A. I think the physical conditions I described there would remain constant. That is fairly what you

[fol. 81] Q. (Interrupting) Yes, sir. The same would be true, would it not, if the Commission granted the application of the M. & St. L., would it not?

A. No, I think the physical conditions would remain constant. You see, on Page 9 I have something just a little different than physical conditions, that is the reason I make that distinction. I think we are together on it all right.

Q. Supposing the application of the M. & St. L. is granted, Mr. Gurley, would you change your present solicitation policy with respect to the use of the T. P. & W. route?

A. Well, under proper conditions arrangements with the M. & St. L. I would say no.

Q. You would not take a hostile or discriminatory attitude toward the use of that route, would you?

A. No, we would not do that as long as the M. & St. L. played ball with us we'd play ball with them.

Q. Mr. Gurley, do you have in front of you your application there?

A. Yes, I think so.

Q. Refer to Page 31 and Exhibit 7.

A. Yes, sir.

Q. Look particularly at the second paragraph thereof and tell me why the Santa Fe decided to sell all the stock—decided to buy all the stock held by the trustees instead of the 52 per cent you and the Pennsylvania through you had bought on April 15, 1955.

[fol. 82] A. Well, I doubt that I can do any better than that I did on my direct testimony. We were told that it would be sold unless the bid was above 133.33, as I said in my direct, so we purchased it.

Q. Previously, I am referring specifically now to the fact that you had previously negotiated for 52 per cent, that is, with the Pennsylvania.

That is, you to buy 26 per cent and the Pennsylvania to buy 26 per cent, and now, according to this, you concluded to buy 100 per cent of the holdings of the McNear estate. Why did you change your approach to this problem in that regard?

A. Well, I changed it, again, as I said on direct, when I found an actual situation on the part of the trustees that they were going to sell it to someone else at 133.33. I don't know how better to state it. That is the reason I did what I did.

Q. I see. Were you told the name of the prospective buyer by the trustees or did you know?

A. Well, I knew and I think in the telephone conversation also the name was mentioned.

Q. What was that name?

A. Well, I don't know. It was either M. & St. L. or Mr. Heineman, it was clear, there is no equivocation.

Exam. Albus: That is, as of April 15, 1955?

The Witness: Now, wait a minute. I thought he was [fol. 83] directing my attention to what I did on May 26, that is what I thought I was addressing myself to.

Exam. Albus: Very well.

All right, sir.

By Mr. Wheeler:

Q. On March 15, when the trustees came to see you, did they tell you at that time that they were also going to see Mr. Heineman for the M. & St. L. with respect to the sale of this—

A. (Interrupting) That is, they were going to see Mr. Heineman subsequent to seeing me on March 15?

Q. On the same day with respect to the sale of the stock of the T. P. & W.

A. If my memory serves correctly that was never mentioned that day.

Q. Now, Mr. Gurley, referring now to Section 1 of Exhibit 7—

A. Of the application?

Q. Yes, sir, which runs over on Page 42. Can you tell me why you agreed to pay the trustees of the McNear estate an additional sum of $35 a share in settlement of the dispute regarding the legally binding effect of the letter of April 15, addressed by Santa Fe to the Wilmington Trust, and accepted by it, when it would appear that any liability arising out of that letter was incurred by the Wilmington Trust rather than by the Santa Fe?

A. I think you are going to have to read that question to [fol. 84] me because I don't believe I retained the question as you went along.

Exam. Albus: Read the question, please.

(Question read as follows:

"Question: Can you tell me why you agreed to pay the trustees of the McNear estate an additional sum of $35 a share in settlement of the dispute regarding the legally binding effect of the letter of April 15, addressed by Santa Fe to the Wilmington Trust, and accepted by it, when it would appear that any liability arising out of that letter was incurred by the Wilmington Trust rather than by the Santa Fe?")

A. I think the answer to that question is that we did that because we thought that that was the only way in which we could obtain the stock.

By Mr. Wheeler:

Q. Why would you specifically state in the agreement that the consideration for paying $35 for an extra $35 for the 23,400 shares that you thought you had previously bought was in settlement of a dispute with Wilmington Trust, when if there was any dispute or any liability that liability was on the part of Wilmington, not on your part?

A. Well, I am not so sure, and I don't know that I can answer your question precisely, but I will state it again, we

entered into this agreement with Wilmington Trust to buy all of the stock at $135 because of our judgment at the time that if we expected to get the stock we would have to take [fol. 85] that action, and the formal language to which you address yourself was in the furtherance of that verbal understanding and verbal deal I made.

Q. In other words, in your conversation on May 26 with the Wilmington Trust you agreed to pay $35 a share or $819,000 in consideration of a claim that you had against Wilmington Trust, is that correct?

A. I don't know whether that is correct or not. We agreed—there is no question about our agreeing to pay the money, and there isn't any question but what we stand ready to do that, and there is no question why we did it. The precise question that you raise is, I suppose, why couldn't we have written this agreement in some other way. That's about what I get out of it.

Q. My question is why did you write it in the way you did. There must have been some purpose for it. I would like to know the purpose.

A. I don't know that I can answer that. I suspect that it could have been written some other way. I don't know particularly why.

Exam. Albus: That is a complete answer, he doesn't know.

By Mr. Wheeler:

Q. Mr. Gurley, were you aware that the Pennsylvania was alleging that it still had a contract and a valid contract with Wilmington for 23,400 shares arising out of its letter with the Wilmington Trust of April 15?

A. Yes, sir.

Q. Didn't this have a bearing on that claim by Penns[fol. 86] vania and tied directly into it?

A. I don't know. I really don't know.

Q. Well, Mr. Gurley, let me see if I can refresh your recollection a little. The Pennsylvania would appear by reason of the April 15 letter to the Wilmington Trust, believed it was entitled to receive 23,400 shares of the T. P. & W. stock from Wilmington Trust for $100 a share, is that not correct?

A. That is my understanding of their position.

Q. Now, that is the same amount which is referred to in this particular section of your agreement, is it not?

A. I think that is correct.

Q. Your agreement on May 26 was to pay $135 a share, correct?

A. That is correct.

Q. As to all of it, including the 23,000 shares you had an agreement with the Wilmington Trust, or including the 23,400 shares covered by the letter of April 15 with Wilmington Trust?

A. That is correct.

Q. Who would know, who in the Santa Fe would know, why this provision was inserted in this agreement since you do not?

A. Well, the language is the language of the lawyer who drew the agreement, and I don't know whether you and I are getting together here or not. I know why I moved. I am not so particularly clear, as I said to you, as to the precise language used to carry out the agreement.

Q. Mr. Gurley, let me ask you this, did you understand [fol. 87] that this provision or that in making your arrangement with the Wilmington Trust, or the trustees, you were seeking to prevent prejudicing any claim that the Pensylvania might have under their letter of April 15 against Wilmington?

A. I don't think I was trying to prejudice one way or the other. I was buying this stock because of the opinion I had, opinion that we all had in the Santa Fe, that except for that chances of our getting it were not good.

Q. When was your first negotiation with the Pennsylvania Railroad regarding the purchase of the T. P. & W. stock?

A. You mean the original 25 per cent deal?

Q. Yes, sir.

A. I think that was April 15 was the first meeting.

Q. You had had no prior conversations with-

A. (Interrupting) Oh, oh, yes, we had had some prior conversations.

Q. Did you initiate those conversations or did the Pennsylvania initiate them?

A. I think I did. I think I did. I am pretty clear I did—yes, I am quite clear I did.

Q. And that was on receipt of information by you from the trustees that the M. & St. L. was interested, had notified them of interest in buying the stock in the T. P. & W., is that correct?

A. No, that isn't correct. No, that isn't correct.

[fol. 88] Q. Will you make a correct statement on it?

A. Yes. First, that took place with reference to my interest in acquiring stock of the T. P. & W. is when I asked Mr. Gladson to meet with me in 1954. The next step was when the gentlemen came to my office on May—

Q. (Interrupting) Pardon me, may I interrupt as you go along. At that time, at the time you talked with Mr. Gladson in 1954, were you aware that the M. & St. L. was willing to buy the stock?

A. I don't know when it was. My memory doesn't serve me correctly as to when the M. & St. L. came into my knowledge of this affair.

Q. Now, Mr.—

A. (Interrupting) It was along about that same time with Gladson. Whether it was just before or just afterwards, my memory just doesn't serve me on it.

Q. Let me ask you this, you referred in your testimony to some rumors and some gossips.

A. Yes.

Q. By rumor or gossip did you have the impression that the M. & St. L. was trying to purchase the stock at that time?

A. No, the rumors or gossip was merely that the trustees were considering diversification, were considering selling.

Q. So that that conversation would have taken place after the trustees became interested in selling?

A. I think that must be so, yes, because the gossip, so-

[fol. 89] called, that came to me through financial circles was that the trustees were considering that diversification.

Q. Do you know whether or not prior to that time Mr. Symes or any other officer or employees of the Pennsylvania had talked to anyone with respect to the purchase of the T. P. & W. stock from the trustees of the McNear estate?

A. I don't know a thing about that.

Q. You said, then, after you had this conversation with Mr. Gladson, you were about to relate a second step in the process?

A. I was merely going to say the next step was the March 15 call to my office, which I described in my direct.

Q. So that you jumped from sometime in 1954 to March 15, '55, with no other conversations on your part or on the part of other officers or directors of the Santa Fe with respect to the purchase of this stock, is that correct?

A. Well, not quite. You see, I testified on direct that I had a conversation with Mr. Symes following my conversation with Mr. Gladson in which I told Symes about my conversation with Gladson, and told Symes that Gladson had promised to keep in mind the request I made about wanting to buy the T. P. & W. Other than that conversation with Mr. Symes I think the next conversation that I had about the question was when I was asked for an appointment to meet the gentlemen.

Q. During that interval, that is, between your conversation with Mr. Gladson, and March 15, '55, did Mr. Symes [fol. 90] conduct any negotiation, or any other officer of the Pennsylvania conduct negotiations with the Wilmington Trust?

A. Not to my knowledge.

Q. What was the gist of your conversation with Mr Symes after your talk with Gladson?

A. Well, it was very brief. I told Mr. Symes of my conversation with Mr. Gladson, and I said, "As you probably know, it is something that Clem and Frank and I have talked about in the past and something that might be quite proper for the Santa Fe and the Pennsylvania to buy." And Jim said, indicated, I couldn't recall, he knew something about it and I said, "Well, I am sure we will hear something from Gladson or the trustees." That's about all there was to the conversation.

Q. He didn't evidence any great interest in the purchase of the stock?

A. No, he didn't evidence any great interest, and frankly I didn't evidence any great interest because it was not entirely clear to me what the trustees were going to do. The

impression I had they were arguing among themselves or debating among themselves whether to diversify or whether they were not. It was not anything to get excited about.

Q. And the fact that Gladson at that time, according to your testimony, said that they had received an offer didn't interest you one way or the other, is that correct?

A. I didn't say that at all. I told him I was interested in
fol. 91 | buying. If they were interested in selling I wanted to buy and I hoped that before they made up their minds to sell to anyone they would have another discussion with us.

Q. Now, on March 15 did you make this engagement for that date with the trustees?

A. Did I initiate it?

Q. Yes, sir.

A. No, they initiated it.

Q. The trustees?

A. Yes.

Q. Which one did you receive a call from?

A. I don't recall who I received a call from. The gentlemen who came were Mr. Bancroft and Mr. Kelly. I have forgotten who made the contact.

Q. It was either one of those two gentlemen, then, who called you and asked you for this March 15 appointment?

A. I think that is correct.

Exam. Albus: Let the record show a recess until 2 o'clock.

(Whereupon, at 12:30 p. m., a recess was taken until 2 o'clock of the same day.)

---

fol. 92 AFTERNOON SESSION 2 p. m.

Exam. Albus: The hearing will please come to order. I understand there is an intervening petition to be submitted at this time. Let the record show the petition of the State of Minnesota and its Railroad and Warehouse Commission is received at this time.

We will continue with the cross-examination of Mr. Gurley.

Mr. Wheeler, please.
Mr. Edward K. Wheeler: Off the record.
Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.
You may proceed.

FRED G. GURLEY resumed his testimony as follows:

Cross Examination (Continuing).

By Mr. Edward K. Wheeler:

Q. Mr. Gurley, I have had placed upon an easel a map of the United States showing in red the lines of the Santa Fe and the Pennsylvania, and in a dotted red line the line of the Wabash. That same map shows in green ink the route of the TP&W, and in blue ink the route of the M&StL. Directing your attention to this map, I ask you whether or not the route of the Santa Fe-Pennsylvania through Chicago is not competitive with the route of the Santa Fe-TP&W-Pennsylvania, as shown on that map.

[fol. 93] A. The map so shows.

Q. I will ask you the same question with respect to the route of the Santa Fe, Kansas City, Wabash, Logansport, Pennsylvania. Is that not competitive with the Santa Fe-TP&W-Pennsylvania route?

A. I answered you a while ago that the map so shows and I will make the same answer, I will make that same answer.

Q. And the same would be true with respect to the St. Louis gateway, would it not?

A. I'd say the map shows the competitive route there, yes.

Q. Now, Mr. Gurley, you indicated this morning in answer to a question that the Wabash route between Logansport and Kansas City you considered either unimportant or that the traffic hauled over that line was of a different character than that that moved over the Santa Fe-Penn-

sylvania route via Chicago and the Santa Fe-TP&W-Pennsylvania route by Peoria. Will you please explain that.

A. Well, I mean this, that the traffic through Logansport on the Wabash is, as you say, a different traffic flow than that that comes over the TP&W. I meant also, if I followed your question this morning correctly, you were referring to the competition at Logansport, Pennsylvania, that I didn't consider it significant competition, and I will still say that, even after having looking, after having looked, at this map.

Q. Now, in connection with this, what is different about [fol. 94] the flow of traffic as between, say, the Santa Fe and the Pennsylvania via the Wabash than the flow of traffic of the Santa Fe-Pennsylvania via the TP&W?

A. The difference is in the historic facts.

Q. Well, to what do you refer?

A. Well, I refer to this, that you show, the map shows that there is a route from Logansport to Kansas City via the Wabash, the map shows that there is a connection at Logansport between the Pennsylvania and the Wabash as well as a connection from the Pennsylvania onto its own line out to Effner. I am saying that the historic flow, which you will hear about later, shows that the traffic moves through the TP&W and not over the Wabash.

Q. Well, isn't this the main line of the Wabash, this route between Kansas City and Logansport?

A. Yes, sir.

Q. Do you mean to indicate that there is a much greater traffic flow over the TP&W than over the Wabash?

A. I mean to say this, that the traffic coming into Logansport from the East on the Pennsylvania and which insofar as the map indicates could move out of Logansport either on the Wabash to Kansas City or to Effner, the TP&W to Lomax to Kansas City moves over the latter route.

Q. Moves over the latter route?

A. Yes, sir.

Q. You mean, then, as I understand, that traffic originat- [fol. 95] ing on the Pennsylvania, and let us say destined for points in Texas via the Santa Fe, in all instances, moves over the TP&W rather than over the Wabash, is that correct?

A. I would not say in all instances, but because that would be every car, but I would say preponderantly, very heavily so, all out of this world so, TP&W.

Q. And would that be true as against St. Louis, that the TP&W—

A. (Interrupting) Where is this traffic coming from, Mr. Wheeler?

Q. This is traffic moving from origins on the Pennsylvania Railroad to destinations in the Southwest over the Pennsylvania and the Santa Fe. Now, I want to know—first of all, I ask you whether or not some of that traffic didn't move over the Wabash as well as over the TP&W. I understood you to say very little.

A. That is correct.

Q. I now ask you the same question with respect to St. Louis.

A. And the same answer, very little.

Q. What is the predonderant movement from the Pennsylvania origins to the Southwest, what route does most of that traffic follow, is it through the TP&W?

A. Well, the Pennsylvania can answer that better than I, but by and large the Pennsylvania's route to the Southwest is their own line into St. Louis, I think.

Q. I thought you just said that the preponderance moves from the Southwest to the Pennsylvania destinations over the TP&W.

[fol. 96] A. Wait a minute. You were asking a while ago about traffic coming from Pennsylvania into Logansport and I was addressing myself as to that traffic, as to what went out over the Wabash or what came over the TP&W, and what I am saying is the great bulk of it goes TP&W and Effner.

Now, I should say that you are asking a Santa Fe man a lot of Pennsylvania questions, if I may state that opinion.

Q. Do you have any definite information as to the character—do you have any information which indicates that the character of the traffic moving over the Wabash between Kansas City and Logansport is any different than the character of the traffic moving over the Santa Fe-Pennsylvania route via Chicago, the Santa Fe-Pennsylvania via TP&W or the Santa Fe-Wabash-Pennsylvania via St. Louis?

A. Any difference in the character of the traffic, that is the question, is it?

Q. Correct.

A. That is a little difficult question to answer as to what we mean by "character". There's traffic which moves out of the Detroit area over the Wabash which goes on the Wabash, you might say, all the way to the Missouri River at Kansas City. Whether that is a difference in character or not, I don't know. Generally speaking, railroad traffic has the same characteristic, I suppose, in a broad sense.

Q. Going eastbound from the West and Southwest, on [fol. 97] the traffic going over the Santa Fe, for the moment, is there a difference between the traffic that you interchange with the Wabash at Kansas City for eastern destinations and that that you carry through to Chicago to deliver to the Pennsylvania for eastern destinations?

A. No, I think, if I understand, the character would be about the same.

Q. But isn't that route a directly competing route to eastern destinations with your Chicago route?

A. What route is that, now, again?

Q. The Wabash route.

A. The Wabash east of Kansas City is a competitive route with us on certain traffic east of there, surely.

Q. And it would be competitive with the TP&W, would it not?

A. The route of the Wabash east of Kansas City, being a competitive route of the Santa Fe, would by that very nature be competitive with the route that would bring the traffic to a place where the TP&W could get it. The answer to your question, I think, is a yes, but it has to be kind of explained a bit.

Q. Mr. Gurley, are you familiar with the nature of that Wabash track between Kansas City and Logansport?

A. Part of it.

Q. Is it a good mainline track?

A. Yes, it is a good railroad.

Q. Mr. Gurley, I believe you indicated this morning, I [fol. 98] believe you stated that you solicit the long haul on the Santa Fe, which would take you to Chicago, isn't that correct?

A. That is correct.

Q. And you also stated that you would put the Lomax gateway on a parity with Chicago?

A. That is correct.

Q. I am not clear in my own mind what you mean by "parity".

A. Well, if you would be willing to do so, I would suggest that you hold that question for a man whose technique is solicitation and whose connection is justification, but making you as good an answer as I can, in our solicitation you evidence a willingness, in our solicitation with the shipper, to take it either place, no preference.

Q. You have a different policy now, I gather?

A. That is correct.

Q. What effect, Mr. Gurley, will this solicitation for Lomax on a parity with Chicago have on the effect of the number of employees in your Chicago yard?

A. I have never made a study of it to see what it would mean. I have never made that study.

Q. Do you believe that the effect may be to substantially decrease the amount of traffic off the Santa Fe that moves through Chicago?

A. It is very difficult to talk about the word "substantial". I think it is fair to say the policy will increase the [fol. 99] flow through Lomax and will correspondingly decrease the flow through Chicago. I have not studied it enough to express opinion on the word "substantial". It would have the effect I have just described.

Q. Have you made any estimates with respect to the number of cars that might be diverted by change in your solicitation?

A. No, I have not.

Q. Has anyone in your organization?

A. I think not. Mr. Duffy can answer you, but I think the answer is no.

Q. Have you made any estimates as to the amount of revenue you would lose, the Santa Fe would lose, by this type of of solicitation?

A. We don't figure we will lose any. I would like to say to you again we do not consider the TP&W to be competitive in the sense of effect upon our revenues. We consider the TP&W to be complementary to our revenues.

Q. Well, you are familiar with the fact, are you not, that you get the greatest percent of divisions by hauling traffic to Chicago rather than to Lomax, are you not?

A. Oh, I am quite familiar with that, and I am also quite familiar with the general nature of our business and, as I said earlier and on my direct testimony, we believe that, our experience convinces us that, we get business by reason of the TP&W which we would not get except for it, so that, [fol. 100] as a business proposition, the question is not so much a division at Lomax or a division at Chicago but the total volume of business you haul over your railroad west of Lomax.

Q. Mr. Gurley, maybe I misunderstand you, but I thought you indicated that at the present time you solicit via Chicago, the point to which you get the greatest division, and do not solicit Lomax as against Chicago and that you were going to change your solicitation from that, so that you would solicit Lomax on a parity with Chicago. Now, is that correct?

A. I think that is correct.

Q. Now, to the extent that you divert traffic by your solicitation which presently moves via Chicago to Lomax, have you made an estimate as to the amount of revenue that you will lose by so doing?

A. No, sir.

Q. Didn't you think that was pertinent to the decision you arrived at to put Lomax on a parity solicitationwise with Chicago?

A. Well, I made the decision and I didn't make the setting.

Q. How do you believe those answers jibe with your earlier statement that the economics of the situation usually governed railway policy?

A. I don't know how many times I must tell you that we look upon the advantages of the TP&W in bringing us business to offset whatever would be the net of the differ- [fol. 101] ence between Lomax and Chicago. There is not only the divisions, there is the cost of handling and the participation in it. I repeat, when you wrap it all up as a business appraisal, our business appraisals cause us to take the action we have. There is no equivocation about

what our business appraisal has produced, has produced in our own mind.

Mr. Wheeler: May I have the answer read, please.

(The last answer was read by the reporter.)

Mr. Thomas: Mr. Examiner, I stated when I called my first witness that we were going to have three witnesses, that Mr. Duffy would handle the traffic solicitation policy. Much of what is being discussed now will be covered in his direct testimony. I just suggest that it might be speedier to limit that.

Exam. Albus: I would suggest that if Mr. Duffy could answer these questions better Mr. Gurley would just announce so.

Mr. Thomas: I didn't mean to infer that Mr. Gurley isn't answering them to my satisfaction. It is a matter of the detail that Mr. Gurley has covered.

By Mr. Wheeler:

Q. You said in your last answer that it was the cost of handling, as I understood it, involved in your consideration.

A. That is right.

Q. What is that, Mr. Gurley?

A. Well, there is the cost of handling business from [fol. 102] Lomax to Chicago, there is a cost of handling business from Lomax to Effner, there is a cost of handling business in Chicago terminal, there is the cost of handling it through Peoria, there are a lot of those factors that enter into it, so I say that you have to appraise the best you can what you think about it and what you are willing to do. That is what I meant by it.

Q. Are any of those costs going to be changed by reason of your—if you acquire control of the TP&W?

A. Well, I think the answer to that is yes. I am not sure it is. I am not sure I understand it. My answer is yes, as I understand it.

Q. Would the cost of handling traffic, a car through Chicago, be changed?

A. Well, the cost of handling a car through Chicago would be eliminated if it didn't go through Chicago. That

is the reason I said it was difficult for me to follow your question.

Q. But, Mr. Gurley, the cost of handling a car through Chicago, if it goes through, would be the same before or after acquisition, would it not?

A. Oh, I think that is correct.

Q. The cost of handling cars through Peoria will be the same, will it not?

A. Yes. Of course, always with the modification that volume may affect costs to some extent, but by and large [fol. 103] the answer to the question is yes.

Q. The same thing would be true with respect to the expense of carrying a car from Lomax to Chicago as against Lomax to Effner, would it not?

A. I think that is right.

Q. Mr. Gurley, if you believe, as you state, that you will increase your traffic by soliciting for the Lomax gateway, why haven't you done so in the past?

A. Because with a non-ownership position, we favored the traffic over the line of which we did have—I will reconstruct that. In a non-ownership position of the TP&W, we favored the long haul on our own railroad more than we would with the ownership position of the TP&W.

Q. Isn't, therefore, the difference with that of that that will redound to you from your ownership of 50 per cent of the TP&W stock?

A. Read that to me.

(The last question was read.)

A. Yes, that will be there, there will be that difference.

Q. And that is the reason that you decide, in the event you acquire control, that it will be to your economic interest to solicit traffic to Lomax on a parity with Chicago?

A. Yes, we are willing to accept that.

Q. Just to be doubly clear on this one point, Mr. Gurley, I would like to ask you another question along the same [fol. 104] line. Your solicitation policy, the change in your solicitation policy, is made because you will, as a 50 per cent owner in the TP&W, receive 50 per cent of the revenues from traffic going over that road if you are permitted to control it?

A. I think the answer to that is yes, that is the influencing factor, we will be in an ownership position.

Q. Mr. Gurley, have you any plans with respect to passenger traffic on the TP&W?

A. No, we have not.

Q. Mr. Gurley, returning now to Exhibit 7, your application, at pages 41 and 42, let me ask you, did you or did the Board of Directors of the Santa Fe believe you were liable to the Wilmington Trust for anything more than $2,340,000 as a result of the April fifteenth letter with Wilmington Trust?

A. I don't know that we did.

Q. I am not clear whether that is a yes or no answer, Mr. Gurley.

Exam. Albus: The answer may stand.

By Mr. Wheeler:

Q. Did you have an opinion with respect to liability of the Santa Fe in excess of $2,340,000 as a result of the April 15 letter with Wilmington Trust?

A. No.

Q. Did you discuss the question of your liability or that of the Pennsylvania with any officer or director of the Pennsylvania?

[fol. 105] A. No.

Q. Did any member of your staff, legal staff or otherwise, have such discussions?

A. Let's see if we understand each other. That we discussed with the Pennsylvania our obligations to the trustees?

Q. Yes, sir.

A. No, sir.

Q. Did you have any discussions with the Pennsylvania with respect to the liability of the Wilmington Trust to deliver to you and to the Pennsylvania 23,400 shares of stock at a hundred dollars a share?

A. Yes. We had discussions on that subject. That is a little difficult question.

Q. What was the nature of those discussions?

A. Are you inquiring now as to the nature of the discussions as to the obligations of the trustees?

Q. Yes, sir.

A. Yes, we had such discussions.

Q. Will you tell me what those discussions were?

A. Well, they related to the enforceability of the April 15 letter from Mr. Marsh.

Q. When were these discussions, Mr. Gurley?

A. I couldn't place a precise date on them but they occurred in the latter part of May. They occurred with what might be characterized as increased concentration on May 25 and 26.

[fol. 106] Q. What was the conclusion, what was your conclusion, as a result of those discussions?

A. I took a dim view of getting the stock by reason of the April 15 letter.

Q. Did the Pennsylvania share that view with you in their expressions to you?

A. I think not.

Q. Did they indicate to you what course of action they were going to pursue with respect to the stock or with respect to obtaining that stock with respect to the April 15 letter?

A. No, I don't think they ever did. They have reserved, as you will observe from the contract, certain reservations made, but so far as I know that is all I know about whatever their plans may be.

Q. Did they tell you that they were unwilling to at that time pay a higher amount than $100 for stock of the TP&W?

A. No, I don't know that they ever put it that way. They took a different view than we did about the enforceability of the April 15 letter.

Q. What was to be the purpose of the conference that you say was scheduled for Washington on May 27?

A. I never found out.

Q. Who called that conference?

A. As I testified on my direct, on the afternoon, late in the afternoon of May 25, just before I was going to the [fol. 107] train to go to New York, the trustees came by my office and gave me the information concerning which I testified on direct. They said in the light of that notice they would like to meet with Mr. Symes and me for further discussion. I arranged as quickly as I could for the meeting

on May 27. I knew Mr. Symes and I would both be at Washington on that date at a meeting of the board of directors of the Association of American Railroads. Time was short. I did not have any conversation with the trustees except just about what I have indicated. It was a very brief conversation. The time, as I say, was very short.

Q. You referred to a notice. What notice was that, Mr. Gurley?

A. I don't believe I understand your word "notice".

Mr. Wheeler: Read the previous answer.

(The previous answer was read.)

A. The notice I referred to was the advice that they did not consider there was an enforceable agreement between us.

Q. That was the first notice that the Santa Fe had had received from any of the trustees that that was an unenforceable contract?

A. That was the first notice we had from the trustees. We heard information that you could call gossip or second-hand or something of that sort that the trustees were giving consideration to taking that position. We heard that from [fol. 108] quite a few circles from around Chicago, but that was the only direct advice from the trustees.

Q. Did you get any such advice from the Pennsylvania?

A. No, no.

Q. Now refer to Section 2 of Exhibit 7 to your application and tell me why it contains the statement: "if, in the opinion of counsel for Santa Fe, Trustees are able to deliver good title to such shares and if, in the opinion of counsel for Trustees, Trustees will not incur liability to others by reason of such sale and delivery".

A. I think perhaps I should take time now to explain something about this agreement of May 26 which has not been developed and which may help clear up a few questions you are asking me. On May 26 I was in New York, the conversations I had with Mr. Chinn were in New York. I had conversations on the phone with our general counsel in Chicago. I made the decisions that I have described—those were mine. I told the general counsel to put them into effect with a contract which I would like to have written

during the evening and signed by one of our vice-presidents who was qualified under our rules of procedure to sign such a contract. We had a clear understanding as to what was to be done. We did not discuss the precise language. I did not see the precise language for some two days. That is the reason I said to you this morning I didn't know why certain language was used. I suspect you can always [fol. 109] write a contract more than one way. The contract accomplished that which I wished accomplished.

Q. Then it is conceivable, and I thank you for that clarification, it is conceivable, then, that your general counsel may have had conversations with the Pennsylvania and/or the trustees with respect to the terms of this agreement?

A. There can be no doubt that he had conversations with the trustees, because it was quite something to work out over the telephone, no question about that. I don't know about the Pennsylvania.

Q. Mr. Gurley, that is one aspect of this I don't quite understand. On April 18 you and the Pennsylvania were going it together as partners and along comes May 26 and you buy the whole thing up on your own solely without consultation with them or anything of the kind.

A. Oh, that isn't quite correct. I didn't say that. I said that the Pennsylvania took a different view than we of the enforceability of the April 15 letter, and it was their taking one view and I taking the other which produced the situation where I bought all the stock.

Q. I see. But for that, the Pennsylvania might have bought directly instead of subsequently entering into a contract with you?

A. I think that is a correct statement.

Q. Were you at any time informed by the trustee or the [fol. 110] Pennsylvania in connection with these negotiations that the M&StL had been guaranteed the right to meet any competing bid for this stock.

A. I never heard that statement before right now.

Q. Now, did you discuss with Pennsylvania the price that you would offer for the TP&W stock?

A. You mean on May 28?

Q. Well, almost anytime.

A. That is the only day it was.

Q. Well, I just don't want to limit it to that date.

Mr. Thomas: Mr. Examiner, couldn't that question be clarified? I am not clear whether he means did they discuss the price when they worked out the arrangement on April 15. I think it ought to be specific enough so that we can be sure that he understands it.

By Mr. Wheeler:

Q. Well, let's start on April 15, then. Did you discuss the price with the Pennsylvania?

A. Well, the meeting on April 15, as I thought I testified on direct, was a meeting in which Mr. Bevins of the Pennsylvania and Mr. Marsh were present with representatives of the trustees. There was that discussion. They were all there at the same time. On May 26 I made the offer of one hundred thirty-five without any discussion with the Pennsylvania as to what offer I would make.

Q. Had you made up your own mind in any way as [fol. 111] how high a price you would pay?

A. I never found it necessary to consider above one hundred thirty-five.

Q. Do you know whether Mr. Marsh or any other officer of the Santa Fe had any discussions subsequent to April 15?

A. No. I think there were only the two times, really, April 15 and May 25, and I handled May 25 myself.

Mr. Thomas: I think that is May 26, Mr. Gurley.

The Witness: It is May 26, correct. I correct it.

Exam. Albus: Very well, correct it.

By Mr. Wheeler:

Q. When was the last signature signed, the last signature affixed to the agreements that are contained or attached to your application?

A. You mean with the McNear family?

Q. And the Hanover Bank.

A. Well, the agreement with the McNear family was signed sometime later, I don't know. The Hanover Bank was the same day as the trustees, I think. The exhibits would speak for themselves on that, Mr. Wheeler.

Q. Had you had any discussions with the Pennsylvania with respect to the buying of this additional stock as against the 52 per cent that you earlier were jointly interested in?

The Witness: Read that.

(The last question was read.)

A. Frankly, I don't understand it. I had conversations [fol. 112] with the Pennsylvania about it on May 26 in the afternoon.

Q. What was the substance of those conversations?

A. That I had decided not to stand on the enforceability of the letter, what did they want to do, they wanted to stand on it, and I went ahead and acted on my own.

Q. There was no discussion, then, with respect to the amount of the stock that you would buy?

A. I think I made it quite clear I was going to buy it all. I don't think I missed on that.

Q. With whom were your conversations on May 26, with the Pennsylvania?

A. Mr. Symes.

Q. Is he in agreement with this change to buy all instead of to buy 52 per cent?

A. Well, that particular question was never posed.

Q. Was he in agreement with your buying the stock?

A. He had no objection to it. He was going to stand on the enforceability of the letter.

Q. Mr. Gurley, has the Santa Fe had any other discussions with the Pennsylvania regarding the purchase of stock in any other railroad?

A. Yes.

Q. When were those discussions?

A. Well, I don't recall precisely. It would show up with the sale of the Illinois Northern five or six years ago when [fol. 113] that railroad was purchased.

Q. Any more recent than that?

A. No.

Q. Have you discussed any reciprocal arrangements with the Pennsylvania on routing of traffic if and when you get control of the TP&W?

A. I have not.

Q. Has anybody connected with the Santa Fe?

A. Not that I know of. I don't know, understand, what you mean by "reciprocal interchange of traffic". I frankly don't understand the phrase.

Q. Well, had there been any agreements with respect to the routing of traffic by the Pennsylvania over the TP&W in the event that your application is approved?

A. I think not. Of course, you understand the traffic is routed, not so much by the railroads but by the shippers, you understand that.

Q. No, sir. I thought there was testimony to the contrary in your St. Louis gateway case by Santa Fe witnesses.

A. Might have been talking about the influence of the Santa Fe solicitation.

Q. Yes, sir.

A. But that would be all.

Exam. Albus: We are not going to try the St. Louis gateway case today. We have our hands full as it is.

[fol. 114] By Mr. Wheeler:

Q. Well, has there been any arrangement or agreement or discussion between the Santa Fe and the Pennsylvania with respect to influencing the routing of traffic over the TP&W in the event that your application is approved?

A. I think it is fair to say we have had conversations as to what we might do. We have had more conversations, oddly enough, about what we might do with empty refrigerator cars than anything else. But there has been no agreements or anything of the sort where routing of traffic over the TP&W has been discussed.

Q. Mr. Gurley, could you tell me what percentage of eastbound traffic ever goes on through Lomax over the TP&W and what percentage goes through Chicago?

A. More goes through Chicago. I don't have the precise figures in mind, but of course more goes through Chicago than through Lomax.

Q. By a very substantial margin?

A. Yes, I think that is correct.

Q. Mr. Gurley, does the Santa Fe own any large blocks of stock in carriers outside of the Santa Fe system?

A. No, except we own some stock in a bus company.

Q. But no other railroads?

A. Oh! Yes, we own stock in the Kansas City Terminal, we own stock in the Belt Railway of Chicago, we own stock in a little short line out in California. There might be some [fol. 115] other terminal companies, but that is about all. There are some other terminal companies.

Q. Yes, but outside of terminal companies, the answer would be no.

A. That is correct.

Q. Mr. Gurley, what is the occupation of Mr. Thomas Lamont who is shown as a director of the Santa Fe?

A. He is a banker in New York.

Q. With what banking institution?

A. J. P. Morgan & Company.

Q. Is any officer or director of the Santa Fe in any way connected with the DuPont Company or any of its affiliates or subsidiaries?

A. Is any officer of the Santa Fe connected with the DuPont Company?

Q. Yes. Officer or director.

A. Well, I don't think so. None comes to mind.

Q. You have listed in your application as holding a large block of your stock, one of the large blocks, Mac & Co. That is a nominee, is it not?

A. Yes, that is a nominee.

Q. For whom is that company the nominee?

A. I don't recall.

Q. Who would have that information?

A. I would have it as much as anyone, except I don't have [fol. 116] it in my mind. If it is important and you want it, I will give it to you a little later.

Q. I wonder if you could turn us that information with respect to the nominees shown on page 9 of your application, for the record.

Mr. Thomas: Mr. Wheeler, do you mean all the nominees?

Mr. Wheeler: Yes.

A. I have page 9 in front of me. Mac and Co. of course is related to the Mellon thing. But if you are asking me

for the beneficial stockholders through these nominee accounts, I can't tell you, if that is your question.

By Mr. Wheeler:

Q. You don't have that information?

A. I certainly do not.

Q. What about Shaw & Co.? You have never been told with respect to that?

A. Well, are you talking now about Shaw & Co. in their relation with Morgan or are you talking about who Shaw has this stock for as being a beneficial owner. The latter is what I said I don't know.

Q. What is the former?

A. My recollection is that Shaw & Co. is associated with Morgan. But I must confess that if you want me to—if you will ask me now what you want on page 9, I should be glad to give you all the information that I have available to me on it, which I don't have in my mind at the moment.

[fol. 117] Q. All right, if you will do that.

A. What is it you want?

Q. I would like what information you have with respect to the nominees you have shown on that page.

A. Well, maybe we can get together off the record and find out a little clearer what you want. Frankly, I don't know at the moment.

Q. All right. Do you have any relation with the Mellon National Bank or does the railroad, rather, as a depositor, trustee, transfer agent or anything like that?

A. No.

Q. I believe you show a Mr. Cleveland as a director.

A. That is correct.

Q. Could you tell me his other occupation?

A. He is Chairman of the Board of the Guarantee Trust of New York.

Q. Mr. Gurley, I am not clear from these documents in your application what would happen under the following circumstances. Suppose the Pennsylvania Railroad is able to obtain—when I say "Pennsylvania Railroad", I want to include the Pennsylvania Company because I am never quite clear which is which in this deal—supposing they are able to obtain under the April 15 agreement with

Wilmington Trust, 23,400 shares of the TP&W at $100 a share, what effect would that have on your agreement to sell them 50 per cent of the stock bought by you?

[fol. 118] Mr. Thomas: I wonder if I shouldn't object to that. The contract is written there and it is a legal question as to the interpretation of the contract, it seems to me.

Exam. Albus: I think so, too, but I will permit Mr. Gurley to answer, if he has an answer.

A. Well, let's see if I can put this in layman's language, businessmen's language. If they should succeed in what you describe, they would buy that amount of stock at the hundred dollars a share rather than the one thirty-five. They would pay a hundred thirty-five for the balance, we would pay the one thirty-five for all we get.

By Mr. Wheeler:

Q. Mr. Gurley, turn to Exhibit H-5 for a moment.
A. What page, Mr. Wheeler?
Q. Page 5, the third footnote.
A. The third footnote?
Q. Yes, sir. Now compare that footnote with the note on page 11. Can you tell me why there is a difference in those, why there is a difference in the information shown?
A. The answer to your question, so far as I am concerned, is no.

Mr. Thomas: Mr. Clutz is the man under whose supervision these exhibits were prepared and he can answer that question.

By Mr. Wheeler:

Q. Turn again to page 5, Mr. Gurley, and you will notice there under the first column traffic bridge between AT&SF and PRR, Item C is between Eureka and Effner and [fol. 119] Eureka and Peoria. Will you tell me what the significance of Eureka, the town of Eureka, is in that exhibit.

A. I am trying to find a map here to help me answer that. If you will turn to Exhibit 6, a map, Exhibit 6 of the application, I think I can answer you more clearly.

Q. Yes, sir. I have it.

A. We interchange a little business at Eureka with the TP&W.

Q. Where would that traffic originate?

A. Why, mostly north of Ancona. Do you find Ancona up there?

Q. Yes, sir.

A. Mostly north of there.

Q. Mr. Gurley, do you route any traffic or is any traffic routed over the Santa Fe to Ancona, Ancona to Eureka and then east on the TP&W?

A. Yes, some of it would do that, I think. Are you implying or addressing yourself, does transcontinental traffic come over to Ancona and then back down to Eureka, is that your question?

Q. I didn't want to limit it to transcontinental.

A. There is a difference between the traffic north of Ancona, that is what I am talking about. I am not implying that the traffic comes across from Lomax to Ancona.

Q. I am not clear now. Does any traffic move over your lines north of Lomax to Ancona, from Ancona to Eureka, and thence west to the TP&W?

[fol. 120] A. It would be very unusual and a very rare case. I suppose in the course of a year something of that sort might happen, but it would be a strange situation. Oh, wait a minute. I beg your pardon. There would be some of that for Pekin.

Q. For what, did you say?

A. For Pekin. If you will look at the map there, that would be the only way we could get into Pekin on our line.

Q. Mr. Gurley, refer to page 6 of Exhibit H-5. You have there in the third line "Percent of Interline Traffic". And correct in believing that that should include bridge traffic and not just interline traffic?

Mr. Thomas: Bridge traffic is interline traffic, Mr. Wheeler.

A. Yes, they are synonymous expressions.

Mr. Thomas: I think it will clarify things here if I just point out, all bridge traffic is interline traffic by its very nature. All interline traffic isn't bridge traffic.

Exam. Albus: That is understood.

By Mr. Wheeler:

Q. Now refer to the third column on page 5, under the heading "Cars". Would not those items 17.6 per cent and 39.78 per cent include traffic handled by the M&StL?

A. Mr. Wheeler, I just don't follow. Where are we now? What column are you referring to?

Q. Page 5.

A. Yes, page 5.

[fol. 121] Q. You see, the year ended—column 4.

A. All right.

Q. Do you see those two percentage figures?

A. Twelve eighty-three and seventeen naught six and thirty-nine.

Q. Referring to the 17 and the 39, wouldn't they include traffic handled by the M&StL?

A. I think the answer to that is yes, but I think you had better get that from the man who compiled these figures. I am not sure of my answer on that, Mr. Wheeler. I wouldn't want to be bound by it.

Exam. Albus: What is your answer, Mr. Clutz?

Mr. Clutz: Yes, sir.

Mr. Wheeler: I didn't hear.

The Witness: He said the same thing.

Mr. Thomas: Mr. Examiner, I am afraid we are going to get in a little confusion. This is traffic of the TP&W interchanged with the other roads. The traffic that the TP&W interchanges with the Santa Fe is not likely to move via the M&StL, the traffic moved by the Pennsylvania would include traffic moved by the M&StL.

Mr. Broker: This statement by Mr. Thomas isn't accepted necessarily as a statement of fact, is it, this explanation that he just gave?

Exam. Albus: No. He gave his explanation. You can [fol. 122] bring that out in cross-examination, too.

By Mr. Wheeler:

Q. Mr. Gurley, you are familiar with the Nemo gateway to the TP&W?

A. Reasonably well.

Q. That connects the bridge between your lines and the TP&W through Nemo via the M&StL., is that not correct?

A. That is right.

Q. What is your policy presently with respect to the routing of traffic via the Lomax gateway versus Nemo gateway?

A. Well, it is the same.

Q. Do you have a policy of neutrality as between the two?

A. That is right.

Q. If you acquire control of the TP&W, what will your policy be?

A. It will be the same between those two gateways.

Q. Then Nemo will go on a parity with Chicago, too, then?

A. Then, no, no, no. Now, that isn't what I said. I said we were going to place Lomax on a parity with Chicago. We are going to place Lomax and Nemo on a parity, one with the other, and here again I think you will get along much better with the man who has devoted his life to that solicitation business, Mr. Duffy. He is here to testify on that question.

Mr. Wheeler: I have no further questions.

[fol. 123] Exam. Albus: Mr. Cassell?

Mr. Cassell: Please.

Cross examination.

By Mr. Cassell:

Q. I believe in some of the answers you gave to questions with Mr. Wheeler you said that the Pennsylvania Railroad was quite content and insistent, in fact, in going ahead with its contract for 26 per cent, it would have completed, it felt it had a salaried contract with the trustees.

A. Oh, I don't know that I said quite that. I said they have taken the position they have here, I don't know what they are going to do, that is, if you and I are together.

Q. Well, the Pennsylvania, what I mean to say is as far as you know and your information is that the Pennsylvania

were perfectly willing to go ahead with and complete their contract for 26 per cent?

A. Oh, yes.

Q. If nothing else had interfered?

A. Oh, yes, I think that is so and so would we.

Q. That is my next question. If you thought you had a valid and enforceable contract, you would have gone ahead with your 26 per cent?

A. Yes. We would not have backed away from the April 15 plan.

Q. And at the time you were negotiating with the trustees for your 26 per cent you knew also that the Rock Island had negotiations for a companion 26 per cent, didn't you? [fol. 124] A. No, sir, I did not. I understood that Mr. Farrington went to Mr. Gladson to talk to him about acquiring some interest of it. I think that came up, oh, sometime in about the middle of May.

Q. You didn't know at any time in April or early May of the Rock Island?

A. Of course I wouldn't be too sure of my memory of the precise date. My recollection of it is about the middle of May. It could have been earlier than that. I wouldn't argue with you about that.

Q. It was prior to the time that you entered into the negotiations for the entire stock, wasn't it?

A. Oh, yes.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

By Mr. Cassell:

Q. Mr. Gurley, you made a number of trips to and from Peoria recently, did you not, after this application was underway?

A. Oh, I don't know whether you would call it a number, but I have been here, oh, three or four times, I think.

Q. I have a newspaper report which appeared in the Peoria Journal Star for May 28, 1955, in which I read the following: "Gurley said the Santa Fe will not have any more of a by-pass around Chicago by acquiring the

[fol. 125] T. P. & W. than it has now." You said, "The Santa Fe routes some of its freight on the T. P. & W. tracks now and will continue in about the same amount." Was that a reasonably accurate statement of what you said to the reporter of the Peoria Journal Star on May 28 or thereabouts?

A. I wasn't here at that time. I had this telephone conversation. I was at Washington and was asked to step out of a meeting and asked to respond to this fellow at Peoria and he asked me some questions. I don't recall ever having read the article to which you refer.

Q. That is right, you were in Washington to which it states, is that a reasonably accurate statement of what you said to the reporter?

A. I don't recall much about it. Except the principal thing I recall about it, the thing he seemed to be interested in, what I thought he was interested in, what were we going to do about Russell Coulter, that is the principal thing I recall about the conversation.

Q. Specifically in regard to the statement I will repeat it to you to refresh your recollection. "The Santa Fe will not have any more of a by-pass around Chicago by acquiring the T. P. & W. than it has now." Do you recall that?

A. No, I don't think that would be a correct statement we talked about. I don't recall that at all. I don't mean to say he didn't get right. It is one of those things I don't remember.

Q. "He said the Santa Fe routes some of its freight on [fol. 126] the T. P. & W. tracks now and will continue in about the same amount." Do you remember any such statement as that?

A. No, I don't, and you see, there again you get into the question of Santa Fe routes. As you well know the Santa Fe does not route, neither does the Rock Island, you respect the routing of a shipper.

Q. On July 9—there are quite a lot of articles about this case in the newspapers—

A. My word yes.

Q. (Continuing) —not only in Peoria—there appeared an article in the Peoria Journal Star, and which, among other things, it said, "To the question of whether Peoria

is soon to realize it's long cherished hope of being located on a transcontinental railroad line with direct passenger service to both coasts, both railroad presidents were affable but adamant.

"'Careful consideration,' they said almost in unison, 'will be given to passenger service if the I. C. C. application is approved.'" Do you recall making such a statement?

A. Yes, I remember that conversation. It was held right outside of the door. They asked Mr. Symes and me about the passenger service and would we give it careful consideration. We said we would. I also added it would be unfair if I lead you to believe we had passenger service in mind.

Q. There was a following statement, I am just taking them one at a time, "But both were positive in asserting [fol. 127] that routing of passenger trains through here over the T. P & W. tracks from the Pennsylvania terminal at Effner, Indiana, and onto the Santa Fe at Lomax, Illinois, appears to be—" and then I quote—"I am quoting throughout from the article but this is an inner quote purporting to be from one of you—" 'impractical in the intermediate future.'"

A. I would think that would be a fair appraisal of it. I wouldn't hanker with you on the words.

Q. This not only got into the newspapers here in Peoria and along the line but it also got into the magazine "Trains" edited by David P. Morgan up in Milwaukee, and the same conversation appears in that magazine as appears in the Keokuk Gate City on November 15, 1955, and I am quoting now from the November 15 write-up of the Gate City which is identical, has the same language in it as the magazine "Trains", and this purports to be a quote from an interview with you. "What about transcontinental passenger trains operated via Peoria?". And then the answer purporting to be from you, "'That would be a major job—it would be cruel to hold out any hope now,' said Gurley." Do you remember making any such statement as that?

A. Well, when was that supposed to have been made?

Q. That was on or about November 15 that it appeared in the paper and presumably was made shortly before then.

A. Well, I don't recall making any statements at that time, but I don't get the drift of your question, but I have [fol. 128] never taken the position that we were contemplating passenger service through Peoria and I don't take that position now. Maybe that will clear up what you are working on.

Q. I am just wondering if your expressions of yourself are reasonably accurately reported in the press.

A. I believe I have answered you pretty well.

Q. Is that a reasonably accurate statement?

A. I don't remember making the statement as you quoted at all. In fact, I confess I have not attempted to keep track of what I have said in precise words.

Q. I would assume that is so. But you wouldn't quarrel, would you—

A. (Interrupting) I have no quarrel with what is there at all, even though I don't know whether it is quite accurate, but I haven't any quarrel with you.

Q. Then there followed another sentence purporting to be in the same interview, "Is the much-wanted line up to snuff?" And the reply appearing to be from you said, "'The T. P. & W. is in damned good shape,' affirmed Gurley." Is that a reasonably accurate statement?

A. Yes, I use language like that.

Q. I wasn't so much concerned about the explicative as I was about the other information, Mr. Gurley. You would agree to the rest of it, too, as well as your language?

A. Yes, that is all right.

[fol. 129] Q. Not only were there straight news articles but there were also editorials, more than one, one of them and I have in front of me here, it appeared in the Peoria Journal Star for December 30 1955 these things are getting closer to current dates— among other things the editorial said, "The advantage to Peoria and all shippers on the T. P. & W. of being situated on such a transcontinental route are quite attractive." That is, it was referring to the route of the T. P. & W. in-between the Santa Fe and Pennsylvania. Is that a correct characterization, is that going to be a transcontinental route?

A. Well, I don't know quite how to answer your questions. I don't recall ever having seen that editorial. It is

not my appraisal, it is not my statement.

Q. It doesn't purport to be, Mr. Gurley. I am just wondering if that is an accurate statement.

A. Again, I haven't any quarrel with it. I don't know what it is all about. I am glad they feel kindly towards us.

Q. I think that is apparent.

Mr. Thomas: May I ask, Mr. Cassell, that reference to a transcontinental route didn't have anything to do with passenger service, did it?

Mr. Cassell: That particular one did not.

By Mr. Cassell:

Q. Mr. Gurley, I was much interested in one of the statements you made this morning in answer to Mr. Wheeler's question and again this afternoon, that you considered that [fol. 130] the route of the Pennsylvania, which it now has and as appears more specifically on your Exhibit 4 on page 2, showing a route into Peoria from the east, you said that route was not competitive with the T. P. & W., isn't that right?

A. That route of the Pennsylvania down through Hersey City or Hervey City?

Q. Hervey City, yes.

A. That doesn't look very competitive to me.

Q. Yet in your prepared testimony on page 8, I believe it is, yes, on page 8, when you came to discuss the Rock Island, you said that the Rock Island was competitive with the T. P. & W. for traffic between Keokuk and Peoria.

Referring to this same exhibit again on page 5 where the Rock Island appears, how would traffic have to move to get from Keokuk to Peoria via the Rock Island?

A. From Keokuk itself or through the Keokuk Gateway? Are you originating a car at Keokuk you mean?

Q. Yes, you said it was a competitive route with the P. & W. between Keokuk and Peoria so it would have to originate in Keokuk and get over to Peoria. How would you think that traffic would move?

A. That particular traffic would run over to Eldon.

Q. That is a backhaul, isn't it?

A. That particular thing. Maybe I didn't phrase it well. I was addressing myself—

[fol. 131] Q. (Interrupting) Would you like to withdraw it?

A. If you will allow me to continue, I will try to answer. I was addressing myself, whether I phrased it with accuracy or not, more to traffic passing through Eldon over your other route through Peoria rather than some shipment that originated at Keokuk itself. My judgment wouldn't be there would be such a tremendous amount originated at Keokuk. I think there would be more come through there.

Q. Any traffic coming through Keokuk to Peoria would have to be routed over the T. P. & W., wouldn't it?

A. That is right.

Q. It isn't competitive, it is complementary to the T. P. & W., isn't it?

A. No, no, I am trying to say that the traffic over the Rock Island competitive with the T. P. & W. can come from points west of Eldon down around your north line there, following the Mississippi River there where the line cuts off at Silvis.

Q. So that you think that the route which you mentioned would be through Eldon and up through Silvis and then back down on either one of those lines into Peoria?

A. That is what I was trying to point out, yes, sir.

Q. Do you think that route is any superior to that of the Pennsylvania that you first mentioned?

A. Yes, I would think so.

[fol. 132] Q. The Santa Fe has a route into Peoria today, too, doesn't it?

A. Not that I know of.

Q. Don't you have a line of railroad down into Pekin?

A. Oh, yes.

Q. And isn't Pekin in the Peoria switching district?

A. Well, it may be.

Q. But you don't consider, then, that you are competitive into Peoria today?

A. No. We have to come in here over the P. & P. U., I think it is.

Q. At any rate, as far as the Santa Fe is concerned it doesn't consider that it has a service route or a competitive route into Peoria at the present time?

A. Oh, no, we don't have any route into Peoria.

Exam. Albus: Let the record show a 10 minute recess.

(Short recess.)

Exam. Albus: The hearing will please come to order. We will continue with the cross-examination of Mr. Gurley.

By Mr. Cassell:

Q. Mr. Gurley, you have referred to the fact that you thought that with the ownership as you have contemplated that the Pennsylvania would act as a check on the Santa Fe and the Santa Fe as a check on the Pennsylvania, is that right?

A. That is right.

Q. That is, you think that the Pennsylvania would be a check on you as to what you might do in discriminating as against various gateways on the west end?

fol. 133] A. I think that influence is very definitely there.

Q. Would it make any difference to the Santa Fe as to whether a car went out—I mean as to the Pennsylvania—as to whether a car went out through Lomax or Keokuk?

A. No; I don't know that it would.

Q. Well, the Santa Fe wouldn't be much of a check on that, then, would it—the Pennsylvania? I beg your pardon.

A. You've got me confused.

Q. The Pennsylvania would afford no check on the routing on Keokuk versus Lomax, would it?

A. Why, certainly not, they wouldn't have anything to do with that. That isn't what I said at all. I addressed myself that they'd check the service.

Q. Well, then, you don't believe the Pennsylvania would be effective, then, as a check on the Santa Fe as to its neutrality on various gateways, is that right?

A. No, sir. I say I think they will be.

Q. Well, then, we come back again. My question was as to whether the Pennsylvania would have any interest as to whether traffic moved via Lomax or via Keokuk.

A. I would think not.

Q. Then they have no interest in being a check on the neutrality on those two gateways, have they?

A. Your premise is entirely wrong.

[fol. 134] Q. How?

A. I never said that the Pennsylvania would have any interest in routing of the traffic. I think they would be greatly interested in the service given the shipments.

Q. Well, providing that all the traffic was moving via the Pennsylvania, it doesn't care which route or what the service is so long as it gets the traffic, does it?

A. I think the Pennsylvania is greatly interested in the service that it gets, very much so.

Q. But, at any rate, you didn't mean to imply, then, that the Pennsylvania was any check on the Santa Fe as to neutrality as against gateways on routing?

A. I don't know that I can improve upon what I said. The Santa Fe and the Pennsylvania, in my opinion, would be very watchful upon anything that we might do that would interfere with the traffic to the T. P. & W., the Pennsylvania, on the one hand, and the Santa Fe with its western connections on the other. The routing would be something which would be done by the shipper. The service would be given by the railroad.

Q. Don't you have a traffic department to influence the routing of shipments?

A. Oh, yes, they certainly influence.

Q. Aren't they effective?

A. Why, sometimes not as much as I'd like, but reasonably so.

Q. And the T. P. & W. has a solicitation force, too, doesn't it?

[fol. 135] A. Yes, sir.

Q. And it is effective in securing traffic, is it not?

A. That is correct.

Q. In fact, you said that the traffic which it now enjoys through the Lomax Gateway is primarily through its efforts, is it not?

A. I think that is correct.

Q. The Rock Island is a competitor of the Santa Fe between Kansas City and Chicago, isn't it?

A. That's correct.

Q. In fact, it is competitive, highly competitive, with the Santa Fe throughout its entire system, isn't it?

A. By and large, I think that is correct, between the cities, you know by and large.

Q. On a general over-all basis?

A. That is right.

Q. Santa Fe has the short line between Kansas City and Chicago, doesn't it?

A. I think that is correct.

Q. And as you said in answer to Mr. Wheeler, as traffic moves through the Chicago Gateway it's competitive with the T. P. & W. today?

A. That's right.

Q. And it competes with the Rock Island?

A. That's right.

Q. Now, the Santa Fe doesn't enjoy any revenue on [fol. 136] traffic that moves through Keokuk, does it?

Mr. Thomas: You mean today, Mr. Cassell?

Mr. Cassell: Today.

By Mr. Cassell:

Q. Unless it may have been a participating carrier west of Kansas City?

A. With that addition I can say yes.

Q. So the Keokuk and Lomax Gateways are competitive?

A. Yes, I think that is correct.

Q. Wouldn't you think that in your system of checks and balances that in order to assure neutrality that the Rock Island would be a good check on the Santa Fe and the Santa Fe on the Rock Island, Keokuk versus Lomax?

A. No, I don't think so. I have stated my position and I will repeat it, that I think when you evaluate the entire situation, you add up the benefits and advantages and this and that and the other, then you get into this diluted ownership—

Q. (Interrupting) I didn't ask about that, Mr. Gurley, if you don't mind. I was just asking about the checks and balances. Wouldn't the Santa Fe be a check on the Rock Island and the Rock Island on the Santa Fe as to the neutrality of those two gateways?

A. Well, I don't know about that. I think each of us would strive for our own gateway, of course, and to that extent we may say yes.

Q. And the two railroads would by checkmating each other keep the T. P. & W. neutral as to both gateways?

[fol. 137] A. Yes, we will say that the more people you get in the more neutral you become.

Q. Mr. Gurley, on your prepared testimony on page 2, you said that "this is an appropriate place to say that while constructive suggestions from a board should be helpful, too many viewpoints can be bothersome and 'too many cooks can spoil the broth.'" From that I take it, then, that you would have only two points of view, that is, of the Santa Fe and the Pennsylvania, if your acquisition is approved in its present form?

A. We would have only the viewpoints of those two railroads on the board if this application is approved, yes, sir.

Q. How many directors were you going to have?

A. Eleven, I think it was.

Q. And how many directors was the Santa Fe going to put on?

A. Two.

Q. And the Pennsylvania?

A. Two.

Q. That is four. What becomes of the viewpoint of all those other directors, are they the same as the Santa Fe and Pennsylvania?

A. No, oh, no.

Q. How many cooks do you have then?

A. You will have 11 directors under the plan we speak of. There would be two railroads represented on the board, six outside business people, and the viewpoints of the two [fol. 138] railroads would be the viewpoints of non-competitive railroads, end to end railroad, it might be called, for a lack of a better way to express it, you would have the viewpoint of the independent businessmen on there.

Q. You have some independent businessmen on your own Board of Directors, don't you?

A. Yes, sir.

Q. So there is nothing unusual about that, is there?

A. No, sir.

Q. That is quite common in the railroad industry?

A. Very good.

Q. If another railroad were cut in on the ownership and the Board of Directors would remain constant, and there doesn't seem to be any proposal here to change the board on the part of anybody, the new participant would just put its directors on in addition to yours in place of one of those directors you call independent, wouldn't they?

A. There has not only been no proposal here to change it, there has been no proposal to do it, either. I have no idea what would happen if all you railroads got in on it.

Q. Suppose it did remain constant as at the present time, the same number of directors, you would merely institute a director or two directors for the additional railroad or railroads, as the case may be, and you'd have the same number of directors, wouldn't you?

[fol. 139] A. If I follow what you mean, that you would take two of these independent businessmen off and put two railroad men on, is that what you mean?

Q. Two additional railroad men, yes.

A. That is what I would think would not be a good board.

Q. But you would still have just the same number of viewpoints, wouldn't you?

A. As I said, you would come to the table with conflicting interests, and, of course, I think there being no argument about that.

Q. You mean you would have two lines that were in competition on the board?

A. That is correct.

Q. One of the statements you made in a reply to a question of Mr. Wheeler's, while you had been discussing some other things, you did say that you had conversations with the Pennsylvania as to what you might do with them as to refrigerator cars. Would you mind telling what that discussion was with regard to empty refrigerator cars?

A. It was a tentative discussion as to whether refrigerator cars westbound, S. R. D.'s particularly, how advantageous it would be to bring them over the T. P. & W. rather than through Chicago. It was never run out to anything other than a tentative discussion.

Q. So in your tentative discussion, at least, you were con-
[fol. 140] sidering using the T. P. & W. for the return movement of the empties?

A. Yes, that was given consideration. There is some timesaving in it.

[fol. 141] Q. The Santa Fe does not have to buy into the TP&W nor to preserve any of the present routes, does it?

A. I don't know.

Q. Well, assuming that the TP&W is to remain neutral, you have no reason to believe that any of the routing is going to be changed, is it?

A. Well, of course, I don't know whether the TP&W is going to remain neutral or what is going to happen. I don't know how to answer your question.

Q. Was your motive in buying the—you can answer this, I believe—was your motive in buying the TP&W, buying into control, in order to preserve present routes and gateways?

A. I don't know that the preservation of existing routes and gateways would necessarily be the number one consideration, but certainly the preservation of existing routes and channels was an implicit part of our plan.

Q. You had no intimation, did you, that the TP&W was going to change any of the routes and gateways, did you?

A. I had no intimation one way or the other what would happen to the TP&W if the trustees decided to sell it.

Q. Are there any burdensome leases to which the Santa Fe is subjected to at the present time that you would be able to do away with if this acquisition is approved?

A. Why, I can't think of any.

Q. And I think in this connection it is rather obvious the [fol. 142] Santa Fe isn't losing any money at the present time or incurring any financial stress that will be carried by this purchase, isn't it?

A. If we don't need cure, we need assistance.

Q. Just like everybody else, you'd like more money, you never have enough?

A. I guess that is right.

Q. The Santa Fe is more fortunate than some of the others, isn't it?

A. I don't know. I showed you some figures this morning where we weren't doing as well as some of the others.

Q. Is the Santa Fe losing any money on any particular operation that will be cured as a result of this acquisition?

A. Well, we are operating at a profit, of course. I don't know that this will change any loss that we may have into a profit. I am not certain I apprehend your question.

Q. I mean you don't have any operating problem in the way of bridges or bad trackage or routes that you are going to eliminate by virtue of this?

A. No, the principal thing it would do would be the Chicago congestion.

Q. Now, the T. P. & W. has never been a part of the Santa Fe System, either as a subsidiary or otherwise, has it?

A. I think that is correct.

Q. The territories served by the T. P. & W. has never been [fol. 143] Santa Fe territory, has it?

A. Well, if by Santa Fe territory you mean the Santa Fe tariffs have been in there as a direct application, the answer, of course, to that is no.

Q. You don't have any line of railroad that operates across the state of Illinois serving the same towns that T. P. & W. does, do you.

A. By and large that is correct. We do get together at Eureka over here but by and large the answer is no.

Q. You only touch at the common point of Lomax and Eureka?

A. I think that is correct.

Q. And then where you go out on down to Pekin and some little junction point, it isn't a habited point, it is just a junction, isn't that correct?

A. I think that is correct.

Q. And the Santa Fe is in no way operating in any shape or form the T. P. & W. today, is it?

A. No, sir.

Q. The T. P. & W. is efficiently operated today, isn't it?

A. I think so. I think they get along all right.

Q. Do you approve of their policies?

A. By and large, yes.

Q. It isn't a subsidiary that you are unifying into your system, is it?

A. No, it is not proposed to do that.

[fol. 144] Q. Not only is the T. P. & W. being operated profitably today, but so far as you can foresee it can con-

tinue to be operated profitably separate from the Pennsylvania and the Santa Fe, couldn't it?

A. Oh, I think under good management it could, yes. I think it demonstrated that.

Q. Is there any need in the T. P. & W. today to have the backing of the Santa Fe or the Pennsylvania to keep it solvent?

A. Well, it stayed solvent without the ownership of the Pennsylvania and the Santa Fe. But if you are saying, could they get along without the backing, I don't think they could get along without the backing of the Santa Fe and backing—

Q. (Interrupting) I mean your financial backing as it will be available to it as a result of its transaction. They are getting along all right today on their own, aren't they?

A. They are getting along all right. When you use the word backing and financial backing I think the Santa Fe and Pennsylvania are pretty good backers for that T. P. & W.

Q. I think they would be for anybody. There is no sign of the T. P. & W. deteriorating, is there?

A. I don't think so.

Q. As a matter of fact, it has been improving?

A. I think so. It must be improving.

Q. Haven't its properties at the present time been sufficient for handling of its traffic?

[fol. 145] A. Reasonably so. I think you can always make some improvements here and there.

Q. Your own railroad, which is one of the best in the country, isn't completely improved, is it?

A. No, sir, and probably never will be.

Q. As a matter of fact, the present properties and management are capable of handling any foreseeable traffic, aren't they?

A. I think that is correct.

Q. There is no need for any particular additions and betterments that they can't cope with, is there?

A. I don't know of any.

Q. Are there any additional facilities that will be made available to the T. P. & W. as a result of this purchase which they couldn't otherwise acquire or obtain by themselves?

A. I think there are some advantages that would accrue to them in a purchase in things of that kind, certain things, certain terms, which they would have under this application of the Pennsylvania and Santa Fe. I think that certain benefits would accrue to them.

Q. I am not sure that I understood part of your answer. Do you mean to say that you are going to have joint purchases with the T. P. & W.?

A. I don't know what we would do about joint purchases. I don't anticipate that. I do find where you have a community of interest that there is a benefit flows in purchases. [fol. 146] Q. How is that?

A. Why, it just works that way.

Q. I don't know about those things. Would you explain to me a little more, please?

A. Well, I have the general idea that when you are purchasing from people in the volume that the Pennsylvania and Santa Fe purchases that you may get a little more favorable consideration than when you are purchasing in the T. P. & W. quantities. I could be wrong about that, but I have that general opinion the way purchases work.

Q. If the T. P. & W. continued to operate apart from the Pennsylvania and the Santa Fe, do you think any of its existing services would be in danger? A. Assuming continued friendly relations between Pennsylvania and Santa Fe and T. P. & W. I would think not.

Q. Do you think that the inclusion of the Rock Island would endanger any of its present services?

A. I don't know. I think inclusion of the Rock Island, it is the undesirable thing I have called dilution.

Q. How would that endanger the services of the T. P. & W.?

A. Just the same as the dead hand of neutrality is apt to endanger any company.

Q. Then if the Rock Island were substituted for the Santa Fe, would that be all right, then?

A. It would be all right from the standpoint of avoiding [fol. 147] the dilution.

Q. And would preserve the railroad all right then?

A. Not so well, of course.

Q. I thought the Pennsylvania was the standard railroad of—

A. Well, Jim and I argue about that a little.

[fol. 148] Q. Is there any danger of bad relations between the T. P. & W. or the T. P. & W. and the Santa Fe or the Pennsylvania if this purchase is not approved?

A. I really couldn't answer that.

Q. Assuming present management?

A. Well, I just can't answer that.

Q. You don't know any reason for it?

A. No. I wouldn't look forward to it but it should not be disregarded.

Q. That is the same hazard you have with any railroad at any time, no one can foretell, but so far as you can see there is no imminent danger, is there?

A. I don't see anything of the line you mentioned, no, I don't see it.

Q. All right. Now, under your proposal this is to be a completely independent operation, is that right?

A. Yes, that's what we propose.

Q. With a completely separate operating force?

A. Correct.

Q. Then there won't be any operating economies, will there?

A. There will be only such operating economies as the suggestion that the Pennsylvania and Santa Fe might bring to the management as I pointed out. If we are going to lay off a president or vice-president or something, the answer is no.

Q. The only economies they will make are the efficiencies [fol. 149] they will make themselves, isn't that right?

A. No, that isn't what I have in mind. I think there are some economies that can come in the consolidation that are not in the present-day operation, although I tried to say this morning we have made no specific study along that line, rather we believe that it's a good going road. We believe we can help it go along and make it a little better.

Q. That is merely by giving them ideas, isn't that right?

A. That might be one way to characterize it.

Q. If they just had the experience you have had they might think of it themselves?

A. They might think of it themselves. We might get some

ideas from them. They don't run all one way, you know. I don't take that position.

Q. Then, of course, you intend to keep the present management, is that right?

A. Yes, sir.

Q. And it's to be independent of any particular influence of its owners?

A. Well, I don't know as you can quite put it that way. It's to be operated as an independent railroad. That's about as good a way as I know how to put it.

Q. You mean it will continue to have a separate corporate existence?

[fol. 150] A. A separate corporate existence, separate soliciting forces, free to solicit and handle its business to its best advantages.

Q. But I am not sure that I understand you. The Santa Fe and the Pennsylvania directors, are they to exercise any influence on the management?

A. I would think so.

Q. Is it necessary to acquire the T. P. & W. to continue any present operating agreements?

A. What do you mean "operating agreements"?

Q. Well, trackage rights or anything of that kind.

A. I think not.

Q. Well, the inclusion of the Rock Island, then, wouldn't affect any of your operating agreements as far as you can see or anything of that kind, would it?

A. I know of no operating agreements of the kind you are talking about at all, really.

Q. You don't have any burdensome trackage agreements with the T. P. & W. today, do you?

A. Any burdensome trackage agreements?

Q. Yes.

A. No.

Q. Are any trackage agreements contemplated as a result of this purchase?

A. Oh, I don't know that there are. They might come but there are none contemplated.

[fol. 151] Q. Where would they come?

A. I don't know. I say there is none contemplated.

Q. Well, can you foresee any?

A. Oh, you could foresee as you look towards the expedition of transportation and making some assumptions of what you might be able to work out with labor organizations and things of that kind, you could see some sense, I think, in running crews to Shopton rather than stopping at Lomax. I think those things will shape up as something worth exploring, but that's about all one could say now because you'd have to feel your around to see what you could do.

Q. Well, inclusion of the Rock Island at the present time that wouldn't make any difference as far as the operating agreements are concerned or arrangements, would it?

A. I would not be too sure about that.

Q. Why wouldn't you?

A. Well, I don't think you would be too enthused about some advantages coming through the interchange between Shopton and Effner, that is, beneficial to the Santa Fe. I don't think you would come to any conclusion like that.

Q. How about similar ones to Keokuk, would you be enthused about those?

A. What would you have in mind? You have asked me, let's turn it around.

Exam. Albus: You just answer him, he will ask the [fol. 172] The Witness: Well, I guess you are right about that.

A. Well, frankly, I don't know what you have in mind at Keokuk.

By Mr. Cassell:

Q. I don't know what you have in mind at Lomax either. But there were advantages which you said there might be at Lomax, if there were similar advantages at Keokuk wouldn't you get them with the same enthusiasm that you think the Rock Island would at Lomax?

A. Possibly would.

Q. As a matter of fact, you would?

A. Possibly. That is where I say we get into this conflicting viewpoint.

Q. Are any particular changes in service which is now being provided by the T. P. & W. contemplated by the Santa Fe and Pennsylvania if this—

A. No, I think we have no particular changes in mind, not at the moment.

Q. I can't see, then, if the Rock Island came in with the same position you have as to preserving the neutrality and the independence of the T. P. & W. what difference it would make, if the Rock Island came in. Would it make a difference?

A. Why, I think it would. I have said before I think people in the company are apt to stop good forward looking movements. Now, you asked me what I have in mind to do. I haven't made up my mind what to do or what to advise to do if we get control.

Q. You don't think the Rock Island would be progessive, [fol. 153] then, and the Santa Fe would?

A. I didn't say that.

Exam. Albus: No, I don't think he said that.

By Mr. Cassell:

Q. This is to be continued as a separate unit, there won't be any accounting economies, will there?

A. We haven't planned any.

Q. Well, do you think there will be?

A. I say we hadn't planned any. That represents my thinking.

Q. Do you suppose you will get around to that?

A. I don't know.

Q. Now, I take it from your previous answers that since the T. P. & W. is to be left in its present form there won't be any transportation available to the area served by the T. P. & W. that isn't presently available, isn't that right?

A. I think that's right. We are not proposing any extensions of the T. P. & W.

Q. So that whatever service they have today they will have tomorrow?

A. That is correct, they will serve the same territory.

Q. And from the same reasons you have given before you don't have any plans for eliminating duplicating departments or organizations?

A. We do not.

Q. So there is no economy, then, to be derived from the proposal?

A. We are not proposing any changes in any economies [fol. 153-A] other than the ones that would come gradually from what we believe would be some improvement in the administrative level.

Q. There isn't any possibility of any joint use of any stations anywhere, is there, sir?

A. None come to my mind now.

Q. Will the proposed acquisition eliminate any duplication of capital?

A. I don't see any.

Q. I am sorry if I keep repeating it, but couldn't you leave the T. P. & W. alone with the Rock Island just as well as you leave it alone with the Santa Fe and Pennsylvania?

A. In so far as the duplication of capital is concerned, I think the answer is yes.

Q. The same is true of the services and the—

A. (Interrupting) Well, now, of course, I don't agree with that.

Q. I meant services to the public.

A. I say I don't agree with that.

Q. Wouldn't you under your system of checks and balances and the votes which you were exercise preserve any service which the Rock Island might wish to eliminate?

A. I think the answer to that is no.

Q. You wouldn't?

A. No, I think not.

Q. Why wouldn't you?

A. Well, because you now get into the same, the same as [fol. 154] I have been discussing a while ago, you get into what I consider to be the effects of a railroad such as this on the so-called dilution of ownership.

Q. You would have the same number of directors and votes available to you as the Rock Island, wouldn't you?

A. And the Rock Island would have the same as we.

Q. So if the Rock Island made any proposal you didn't like, you could neutralize it, couldn't you?

A. And the Rock Island could do the same and I don't like this neutralization business.

Q. Will there be any savings in per diem or car mileage charges as a result of this?

A. Oh, I hadn't contemplated that would be much of a factor. Conceivably this movement of cars through here rather than through Chicago to make contribution to that. I have not prepared any estimates on it.

Q. Are your public relations to be handled jointly in the future?

A. No, I have no desire to take over any department of the T. P. & W.

Q. Is the proposal to give the towns served by the T. P. & W. a trunkline service they don't have today?

A. No, I don't know of any plans of a trunkline. I don't know just what that expression would mean. We do not anticipate running Santa Fe trains over the T. P. & W. if you are identifying us as a trunkline as distinguished from the T. P. & W.

[fol. 155] Q. Well, then, the service over the T. P. & W. is going to remain much as it is today.

A. It is going to remain T. P. & W. service.

Q. Then in so far as any one man have had the idea that new trunkline service was to come in as a result of this acquisition, they were misinformed, is that right?

A. No, I don't know whether that is right or not. I don't know whether anyone has such an impression and I don't know how—

Q. (Interrupting) If they did have that impression, they would be misinformed?

A. Not necessarily. They might have misinterpreted it, there is a sharp difference there, you know. Are you implying—pardon me, go ahead.

Q. I am not questioning anyone's veracity or anything. But I am misinformed, in the state of mistaken, shall we say, they are mistaken if they had that impression.

Mr. Thomas: Isn't this pretty much in the nature of assumptions?

Exam. Albus: Do you understand the question, Mr. Gurley?

The Witness: I understand the language, but I don't understand what it means.

By Mr. Cassell:

Q. I sure don't understand your answer, then.

Exam. Albus: Reframe the question, then.

By Mr. Cassell:

Q. If any of the people who are currently being served—first of all, you answered me there was going to be [fol. 156] no new trunkline service, I understood you correctly on that, didn't I?

A. There is going to be no change in the fact that all the service over the T. P. & W. will be given as T. P. & W. service. Now, whether you call that trunkline service or not, I don't know.

Q. But it's the same service they've got today?

A. It may be, but it will be an improved service, but it will be given by the T. P. & W.

Q. Is there any reason why the T. P. & W. with its own resources could give the same improvements?

A. I know of no reason why they couldn't.

Q. So so far as the acquisition is concerned, if it is approved, the service will remain T. P. & W. service just as if is today?

A. It will remain T. P. & W. service. It may not be the same as today.

Q. Well, of course, as you have said, they may make improvements of their own?

A. Certainly they may.

Q. And any that might be made would be of the kind they could make themselves?

A. I should think so. I don't question their ability to do it.

Q. If, although I know you don't like this dilution idea, but isn't it possible that the Rock Island might be able to contribute some ideas to the furtherance of the T. P. & W. system if it were—

[fol. 157] A. (Interrupting) The Rock Island is a very good railroad, I don't doubt that.

Q. But couldn't we contribute to the beneficial ideas for the T. P. & W.?

A. Well, I will say that I think you could make some good suggestions, of course, you are a capable outfit, but I still get back, you just don't want too many suggestions on one property.

Q. Has that always been your opinion, Mr. Gurley?

A. I don't recall ever having had another one.

Q. You have had other opinions but I mean about this particular matter?

A. I am addressing myself to that.

Q. Will there be any single line rates if this acquisition is approved?

A. I think not, but direct that to Duffy, if you don't mind, it is a little more down his technical line than mine.

Q. All right. Would the shippers presently served by the T. P. & W. have access to any markets that are not now accessible to them as a result of this purchase?

A. No, I would think not.

Q. I think the finances of the T. P. & W. at the present time are sufficiently strong that it could survive any foreseeable disaster, such as a bad wreck or a fire or a washout [fol. 158] and continue in operation, aren't they?

A. Well, I doubt that they could afford to carry on without some insurance.

Q. Insurance, did you say?

A. Yes.

Q. That is available to them, isn't it?

A. Oh, truly.

Q. They don't need the Santa Fe or the Pennsylvania in order to procure insurance, do they?

A. I think not.

Q. Well, you eliminate or the Pennsylvania so far as you know eliminate any services as a result of this acquisition?

A. No, we don't plan on eliminating any services.

Q. Will there be the obviation of any capital expenditures so far as you know now as a result of this acquisition?

A. I know of none.

Q. Have you been experiencing any particular delays at interchange points that this will eliminate?

A. No, we have been very well treated, very well handled I think, as I said earlier, that there are some prospects of this through crew business, but I must repeat that you can't be too sure of yourself on that.

Q. There will not be available to the shipping public any more direct routes as the result of this acquisition than exists today, will there?

[fol. 159] A. That is correct.

Q. Do you plan to retain the present corporate machinery in so far as the charter and by-laws of the T. P & W. are concerned?

A. No, not entirely. We intend to keep the same corporate structure but the matter of the Board of Directors will require some changes in their by-laws. Whether it requires a change in their charter, frankly, I don't know, but it would require, I am sure, a change in their by-laws.

[fol. 160] Q. Would there be any change—the only changes you would make, then, I take it, are as to—what kind of changes would be required?

A. Well, I don't know. We looked into it. I think that you can not make the board of directors under the present by-laws of the T. P. & W. under this proposal we have to 2216. I think that takes a change in the by-laws.

Q. So that's the only change you have in mind?

A. That is the only thing I have in mind now. That is the only thing I have encountered as we have gone along with this.

Q. You don't perceive the need of anything else?

A. No, I do not.

Q. Now, you don't need the T. P. & W. ownership that you contemplate in order to place the Santa Fe or the Pennsylvania on a parity in any way with the Rock Island, do you?

Mr. Thomas: This is rather cumulative. I object to it. We have gone into this so much.

Exam. Albus: The objection is overruled.

Answer the question, please.

Read the question, please.

(Question read.)

A. Well, I don't know quite how to answer that. The

Pennsylvania and the Santa Fe are both good railroads, and so is the Rock Island. I should think that all of us would be able to get along pretty well together. I don't [fol. 161] know quite what you mean by entirety?

By Mr. Cassell:

Q. I meant as competitors, you aren't suffering any disability today as against the Rock Island that will be cured as a result of this, are you?

A. Oh, I don't think so. The Rock Island is our competitor but we don't have any quarrel with that.

Q. You have no particular disadvantage against the Rock Island where you need to fit this in in order to cure it, do you?

A. We hadn't approached it at that level of mind. I think the answer is no.

Q. Is yes what?

A. I say I think the answer to your question is no.

Q. You don't need it.

A. Well, I still don't understand quite what we are talking about.

Q. For instance, you have the short line between Kansas City and Chicago today, don't you?

A. That is right.

Q. You are considerably shorter than the Rock Island?

A. That is right.

Q. So you don't need it to help out on that score?

A. Oh, no, it wouldn't affect that movement at all.

Q. Nor are there any other operating conditions or traffic conditions where you are at a disadvantage as against the Rock Island today that this will enable you to meet? [fol. 162] A. Well, I don't know how to answer that, really.

Q. You would serve here in Peoria and we would come into Peoria in a sense as a half owner, so to that extent we would be improved and improve our parity, if that is the way to phrase it?

A. I want to make it clear the Santa Fe doesn't come into Peoria, but we would have an interest in a railroad in Peoria.

Q. Now, this is in a sense repetitive, but I want to be sure about it. The action isn't necessary to standardize the T. P. & W. or to effect grades and curvatures to make it a satisfactory part of a through line, is it?

A. I don't think so.

Q. You don't need the T. P. & W. in order to avoid any relocations, do you?

A. No, I don't know whether it can be done, no.

Q. Is the T. P. & W. facing any financing which it needs your control in order to facilitate?

A. No, I think the T. P. & W. should be able to finance any improvements which I know about.

Q. At the present time you do not contemplate and the purchase is not made for the purpose of reducing any transportation costs, is it?

A. I think the answer to that is no. I keep repeating that exception of what might work out on the crew business.

Q. The Santa Fe did not build east of Kansas City until I believe the year was 1888, isn't that right?

[fol. 163] A. '87 or '88.

Q. And wasn't it the last major trunk line railroad to make a Chicago entrance?

A. I think that is correct.

Q. And it was similarly the last line to make an extension or complete its trackage between Chicago and Kansas City?

A. I think that's right with the possible exception of the Great Western. I am not so clear about my memory on that.

Q. Robert A. Robinson was your chief engineer at the time you made your eastern extension from Kansas City to Chicago, is that right?

A. I don't know.

Q. From your general knowledge it is a fact, isn't it, that all of the major cities presently in existence between Chicago and Kansas City were in existence at the time you extended eastward. Now, I have in mind such towns as Peoria and, well, Fort Madison, Streeter, Galesburg, Keokuk, Joliet, all of those towns were in existence at the time your railroad extended east from Kansas City, weren't they?

A. I think that is correct.

Q. As a matter of fact, these river towns such as Keokuk, Fort Madison and Peoria are some of the oldest towns in the Middle West, aren't they?

A. They have been here quite a while, I will agree with you on that.

[fol. 164] Q. And a town like Peoria was a very important town back in those days, around 1887 and '88?

A. It is a pretty important town yet.

Q. I have conceived that, but I mean even in those days it was—

A. (Interrupting) I think so.

Q. In fact, one of the early days it was one of the big towns in the Middle West, wasn't it?

A. I think that is right.

Q. I have here a book which is entitled "Santa Fe, The Railroad that built an Empire" and was written by James Marshall and published by Random House and copyrighted in 1945. On page 202 I find a statement to the effect that even today the line which you built east from Kansas City gives the Santa Fe the shortest and fastest route between the Missouri River and Lake Michigan. That is a correct statement, isn't it?

A. Yes, the shortest route. I don't know that it is any faster than the new line of the Burlington.

Q. Now, this is one of the other statements I find in there, on the same page, and I am quoting now, "Robinson took a ruler and drew a straight line between Kansas City and Chicago. That was what he wanted, and he almost got it by warning all of his locators not to plan any curves they couldn't account for." That is pretty well how the railroad was built, isn't it, it is a very straight railroad and you get your short line?

A. I would say there is a bit of romancing in that lan-[fol. 165] guage when it comes to certain curves.

Q. As railroads go, though, that is pretty much so, though, isn't it?

A. Well, it is a short line. We have some curves across Missouri we are whittling away on to get rid of.

Q. And on the same page I find, "In the Santa Fe case the straight line proved profitable because most of its

traffic was through haul, anyway and other roads had to base their tariffs on Santa Fe Mileage, although having to haul passenger freight more miles between Kansas City and Chicago." Is that right?

A. Well, I would say the mileage is right. I can't quite subscribe to the balance of that.

Q. Well, weren't the other roads forced to meet your competition?

A. I wouldn't know nor I wouldn't know what the situation was.

Q. It is still true today, isn't it?

A. Well, I don't know. W don't set all the rates between Chicago and Kansas City.

Q. But you still have the short mileage?

A. Oh, we still have the short mileage.

Q. Is there any reason so far as you know now why the Santa Fe couldn't have come east through Keokuk and Peoria in 1887 or '88 if it had chosen to rather than the route it did take?

A. Oh, I simply couldn't answer that question.

Q. You don't know?

A. No, I don't know. I can tell you that very quickly, I [fol. 166] don't know one way or the other.

Q. Well, you have been over—certainly, there was no I.C.C. control in those days?

A. No what?

Q. No. I.C.C. control.

A. I think that came in in 1887, but there was no control over new construction.

Q. Yes, that is what I meant to say, there was no control over new construction at that time?

A. Yes, sir.

Q. So far as the Commission is concerned you could have chosen any route you wanted to?

A. Well, there wasn't any Commission at that time.

Q. Now, you have been over the line between here and Keokuk, haven't you?

A. Yes, sir.

Q. You have seen the physical layout?

A. Yes, sir.

Q. And you haven't seen anything there that would indicate to you that it wasn't physically possible for you to come east through Keokuk and Peoria?

A. Oh, I think from an engineering standpoint almost anything is feasible, or possible, rather, it may not be feasible. From an engineering standpoint you could build a railroad almost anyplace you wanted to.

[fol. 167] Q. There is nothing even unfeasible about that route, is there?

A. I don't know.

Q. You have just been over it, haven't you, and you have been over it on a railroad?

Exam. Albus: The answer is he doesn't know.

A. I don't know whether it would have been feasible to build a railroad down to Peoria or not, I just don't know.

Exam. Albus: All right, that is the answer.

By Mr. Cassell:

Q. Do you know when the T. P. & W. was built between Peoria and Keokuk?

A. Between Peoria and Keokuk?

Q. Yes, sir.

A. Oh, I think it goes back to the '60's, but I am not too sure of myself on that.

Q. If it was possible for the T. P. & W. or its predecessors to do it wouldn't it have been possible for the Santa Fe?

A. I don't know. You are asking me for constructions of before I was born. I don't know, and I have never given it any thought.

Q. You have a great deal of familiarity with railroad construction problems, don't you, in your present capacity?

A. Yes.

Q. And you can look at a piece of ground and see whether or not it is possible to build a railroad over it in a general way, can't you?

Exam. Albus: He has already said it was possible from [fol. 168] an engineering standpoint but he doesn't know whether this particular line would be feasible.

The Witness: That is exactly what I said.

Mr. Cassell: That is all I have, except I would like to make this reservation the same as Mr. Wheeler did, in Mr. Gurley's direct, he made a number of references to items himself and then deferred to Mr. Duffy. I would like to have the same consideration, that if these points are not completely covered by Mr. Duffy we may recall Mr. Gurley.

Exam. Albus: I have talked to Mr. Gurley about that and he assures me that he will be available until Friday.

Isn't that correct, Mr. Gurley?

The Witness: That is correct.

Exam. Albus: If these things can't be cleared up by then, I am not going to hold him over next week.

Mr. Cassell: With that understanding we still have a chance to do some straightening.

Exam. Albus: Your reservation is still good.

Mr. Broker.

[fol. 169] Cross examination.

By Mr. Broker:

Q. Mr. Gurley, when did you decide on the change of traffic policy to put Lomax on a parity with Chicago?

A. Well, since we have embarked upon this plan which is now before the Commission.

Q. Well, do you mean when you first became interested in the property, after you filed the application, can you pinpoint it?

A. No, I don't know as we can. We naturally gave consideration to this thing as we went along. It was a process of evolution. I don't think I could pinpoint it. Naturally, it was, as you probably would surmise around your own place, you talk around a lot. I don't believe I can pinpoint it for you.

Q. Was it at about the time you and the Pennsylvania agreed to buy 52 per cent or was it subsequent?

A. No, it was subsequent to that. It was subsequent to that. I am pretty sure we finally straightened out on the parity it was later than that.

Q. Did the Pennsylvania participate in that position?

A. No, we decided that ourselves.

Q. Do you think the change in policy will be effective and bring results?

A. Yes, sir.

Q. So that by favoring or not favoring a point, then you feel a railroad can influence traffic movement?

A. Oh, I think the traffic solicitor can have the effect [fol. 170] upon traffic movement, yes, sir. They can't control it, as I have said several times, but they can influence.

Q. And then with an interest in the T. P. & W., of course, you will be interested in seeing that prosper, won't you?

A. Yes, sir.

Q. And to see if it gets as much revenue as possible of any traffic that it handles, isn't that true?

A. Well, let's see if we understand each other, to see that it does. They would do their own seeing, they would run their own show.

Q. To do your utmost, let's put it that way.

A. No, I don't think I could go that because our utmost could really be quite tremendous.

Q. Well, then, you are not putting your utmost into the T. P. & W.?

A. No, we are not putting our utmost in. We are putting it in on a parity? You asked me if we put our utmost in, we'd put it in as number one in preference to everything.

Q. I see. Well, you will be interested in such traffic that is routed via Lomax T. P. & W., you will be interested in the T. P. & W. in getting as much revenue out of that as possible?

A. Oh, undoubtedly.

Q. Keeping away from the so-called efficieney point for the moment, did I understand you to testify that the more parties come in the more neutral the railroad will be?

[fol. 171] A. I have that opinion, yes, sir.

Q. But you don't consider such neutrality as necessarily desirable, do you?

A. No, I don't consider neutrality in management to be a desirable thing. Now, let's see what we understand neutrality to mean. I realize you must be neutral in connection with gateways and things of that sort and I have no desire to change that. Maybe neutral may not be the good

word but I think when you get one railroad, oh, who votes one way and blocks another, that sort of neutrality is the thing I object to in a railroad, and in the case of the T. P. & W. in this particular case.

Q. We are back to the efficieney, I see. Your thought is that with this dilution of the railroad too many suggestions are offered and efficieney is lessened?

A. I think that is correct.

Q. Don't you expect these public directors to offer suggestions in addition to those made by your representatives?

A. Yes, I do.

Q. What is the difference?

A. Let me tell you what I think about those directors. I should think that if the railroad people know their business and are fair and square they are going to bring to the board what I would characterize as the technique. I would expect these public people to be more alert to the interests of the line than I would to the actual technique of manag- [fol. 172] ing the railroad. I would expect most of the advice on the railroad technique to come from the railroad people.

Q. You think, then, that the public directors would be more sensitive than the representative of a party that has invested three or four million dollars, is that right?

A. I think that the public directors would be as equally interested as those who had their money, and I think his interest would be what I would characterize as the public interest, whereas I would think the railroad people would be interested in for want of a better phrase the want of technique of an operation.

Q. I gather from your testimony that you don't expect them to make suggestions, is that right?

A. Oh, yes, I expect them to make suggestions. Of course what I am trying to do to you here, to do the best I can to outline my concepts about how the board would function. Naturally, you expect anybody on a board to make suggestions. But the suggestions, it seems to me, should come not from conflicting transportation interests but from coinciding, if that is a good word, transportation interest plus the independent business men.

Q. And yet by having two owners you depend upon a conflict of interest to maintain neutrality, isn't that right?

A. I think that the circumstances I described this morning make a contribution to the fair treatment of the com-[fol. 173] petitors of Pennsylvania and the fair treatment of the competitors of the Santa Fe. I am very sincere in believing that.

Q. What it comes down to, then, you believe that the Santa Fe protects the eastern line and the Pennsylvania protects the western lines?

A. Yes, I think that the interests each have had in the services in their friends is a very influencing factor for good.

Q. And this is based on a natural selfishness and I am not using that in a critical sense?

A. I understand that that is perfectly all right.

Q. What provides the checks and balance when your selfish—and I am not being critical—selfish interests, that is, yours and the Pennsylvania, happen to coincide, what protects the public?

A. I don't completely apprehend your question but I think what protects the public is the same thing perhaps is what protects the public against the Santa Fe in its own territory and the Pennsylvania people in the Pennsylvania's own territory today. There we have the single control yet the public has to get along under those circumstances. Of course, there is always competition.

Q. But you think, then, the checks and balances should be limited to only two parties, that the others, the non participating carriers, if they are non participants should be left to reliance upon the natural actions of just two owners?

A. Yes, I think so. I could extend that answer but that's [fol. 174] good enough, I guess, for the moment.

Q. I have been interested in this thought of inefficiency that you raise. All you railroad presidents are real good friends, aren't you?

A. Well, most of us, anyhow.

Q. Practically all?

A. I think that's right.

Q. And you have to agree from day to day on a host of things, don't you?

A. Unfortunately we do not, that is one of the troubles, we are pretty good friends but we don't agree quite so much.

Q. I wish you would look at Exhibit H-4, the basic maps, now, do I understand the purpose of this exhibit is to show why certain railroads are qualified for ownership and certain railroads are not qualified for ownership?

A. I don't know that that's entirely to show the relationship of the T. P. & W. to these various railroads.

Q. Well, let's take a look at the Wabash for one. That is on Page 9. That would appear to be competitive with the entire line of the T. P. & W., wouldn't it?

A. And, of course, you understand, may I make a preliminary statement, that the Wabash was not included in the T. P. & W. by any action of mine they are one of the intervenors here.

Q. I know and I may say the Nickel Plate is not opposing the Wabash, in fact, believes that every railroad should be [fol. 175] free to come in, but getting back to my question, isn't the Wabash highly competitive with the T. P. & W.?

A. Well, I don't know whether that is completely so or not. There is some competition there, some competition there. There is some competition there.

Q. Now, you disqualified various owners in your testimony for several reasons. Let's take a look at Page 8 of your testimony. It says that the M. & St. L. in the past either favored or advocated discontinuance of service in the western section of the T. P. & W. Now, assuming that's a fact, and I understand it has been challenged by counsel for the M. & St. L., I assume you are putting forth that as a reason why it should not participate in ownership, is that right?

A. I think it would be a factor of influence against it, yes, sir.

Exam. Albus: At this time we will recess until 9 o'clock tomorrow morning.

(Whereupon, at 5:00 p. m., an adjournment was taken until 9:00 a. m., Thursday, February 2, 1956.)

BEFORE THE INTERSTATE COMMERCE COMMISSION

[Title omitted]

Finance Docket No. 18991
Finance Docket No. 19086

Pere Marquette Hotel,
Peoria, Illinois,

TRANSCRIPT OF HEARING—February 2, 1956

Met, pursuant to adjournment, at 9:00 a.m.

Before: Paul C. Albus, Examiner.

APPEARANCES:

(As heretofore noted.)

[fol. 178] PROCEEDINGS

Exam. Albus: The hearing will please come to order.

We will continue with the cross-examination of Mr. Gurley.

Mr. Broker, please.

FRED G. GURLEY resumed his testimony as follows:

Cross examination (continuing).

By Mr. Broker:

Q. Mr. Gurley, when did you leave the Burlington?

A. 1939.

Q. Were you with them prior to 1927?

A. Yes, sir.

Q. Did you come in contact with the TP&W at that time?

A. No, I never did. I never had anything to do with the TP&W. I had assignments which were in an entirely different part of the country. I did not have anything to do with the TP&W.

Q. You indicated at page 66 of the transcript that when you considered the Pennsylvania Railroad as a partner you examined the situation in the light of their previous record of ownership in the TP&W. Is that correct?

A. I don't know that it is.

Q. It is at the bottom of page 66.

A. I have it in front of me and what I said is correct.

Q. In the course of that examination did you learn that the Pennsylvania had once proposed scrapping the western [fol. 179] end of the TP&W?

A. No, I did not.

Q. Have you learned since?

A. Not until you just said it.

Q. Did you learn that the Pennsylvania had said that the TP&W could not be operated profitably as then constituted?

A. No, I didn't know that.

Q. Now, you are aware, I believe, that in view of Nickel Plate's interchange with the TP&W in which the Santa Fe has either a prior or a subsequent haul that the Nickel Plate would bitterly oppose any abandonment of the western end of the TP&W?

A. No, I didn't know what your position would be on it, no.

Q. Yesterday you indicated that the Nickel Plate would have no incentive to develop the eastern half of the TP&W. Now, assuming that is so, and of course we deny it, is that because a railroad would naturally favor its own line where it had a 100 per cent interest?

A. Well, I don't know quite how to answer it that way, but let me say this, I think the Nickel Plate is in such a situation that it wouldn't have any economic interest in furthering the end of the TP&W. That is my opinion.

Q. Why does the Santa Fe oppose the M&StL application? They have offered to enter into all the various conditions that were proposed yesterday. I don't want a lengthy answer, but don't you feel that that is sufficient protection.

[fol. 180] Mr. Wheeler: Mr. Examiner, off the record.

Exam. Aibus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

A. You say you don't want a lengthy answer, and the brief answer is that we prefer to own it.

Q. Don't you feel that you are protected by those conditions?

A. Be that as it may, I prefer to own it, that is the reason I oppose them.

Mr. Wheeler: May we have that question and answer read.

(The question previous to the last question and answer was read, and the answer thereto.)

Mr. Broker: Mr. Thomas, page 1, that is the second no. 1 in Mr. Gurley's prepared statement, there is a quotation from the report of the Commission in Finance Docket 6127, and reference is made to a representation uncontroverted by the applicant in that case. Do you have any objection to similar quotations as to representations by applicants uncontroverted made in other finance dockets, either by any of the parties here or any of the railroads involved?

Mr. Thomas: What do you mean, do I have no objection?

Mr. Broker: Do you have any objection. I notice you put in an application by an applicant.

Mr. Thomas: I suggest if you want to put in any such thing I will look at it and tell you when I see it.

[fol. 181] Mr. Broker: All right.

By Mr. Broker:

Q. Now coming to the question of car supply, do you know whether or not the Nickel Plate follows the AAR recommendations as to car ownership?

A. No, I don't. I don't know one way or the other, frankly.

Q. Do you know whether Nickel Plate's maintenance program on its equipment is up to date or not?

A. No.

Mr. Broker: I don't have any other questions.

Exam. Albus: Mr. Davis?

Mr. Davis: No questions.

Exam. Albus: Mr. Martin?

Mr. Martin: No.

Exam. Albus: Are there any further questions of Mr. Gurley?

Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. Mr. Gurley, will the acquisition of the TP&W by the M&StL exclusively injure or harm the Santa Fe in any way?

A. I don't know that I can answer that.

Q. Do you have any opinion or belief with respect to it?

A. Well, I have the belief that we would prefer to own it just as you have the belief that you would.

Q. Well, that is an expression of preference, Mr. Gurley. Do you have any opinion with respect to possible injury to [fol. 182] the Santa Fe resulting from ownership of the TP&W by M&StL?

A. I really don't know, and I don't know what all the plans of the M&StL may be. They have varied a bit apparently from newspaper accounts, so I can't forecast. I don't know how to make an answer to that question.

Q. In making the determination to purchase the stock of the TP&W, you did not then take into account any possible harm to the Santa Fe resulting from acquisition of that property by the M&StL?

A. Well, I suppose I did, because I preferred to buy it myself rather than the M&StL to buy it, and I was sure that that was better for us than for the M&StL to buy it.

Q. Would it be proper to say, then, to summarize your statement in this manner, that you wanted to have, or you wanted the Santa Fe to have control of the TP&W rather than to have any other railroad have it?

A. Well, if by "control" you mean the application that is here now, I would answer that by saying yes, that is what we want.

Q Now let me ask you one other aspect of that situation, Mr. Gurley. Were you interested in acquiring control of

ne TP&W primarily because you thought the property might pass into the control of the M&StL?

A. No, I don't think I was influenced by quite the way you have put it. As I tried to explain my reasoning on [fol. 183] direct, I had long looked at the TP&W, we had long had an interest in the Lomax route, and I wanted to buy the Lomax route. I did not particularly single out and say I want it rather than having the M&StL get it any more than the Rock Island and these other railroads.

Q. May we get around it this way, Mr. Gurley, weren't you afraid that if the M&StL acquired the TP&W they might abandon the Lomax route which you have stated you wanted to preserve for the Santa Fe, wasn't that one of your principal motivations?

A. No, that wasn't my principal motivation.

Q. Was it one of your motivations?

A. Well, yes, I think I'd say one, surely.

Q. What were the other motivations?

A. I wanted to control the TP&W rather than have the M&StL purchase it. Now, that's it.

Q. That is as far as your thinking went, you didn't consider the various reasons that would cause you to arrive at that conclusion?

A. Well, I arrived at it for reasons that suited myself, and they still do.

Q. Can't you give us those reasons, Mr. Gurley?

A. Well, I wanted to own the railroad because I thought it was to the best interests of ourselves to own it rather than for other people to own it, and I thought it was also in the best interests of the public.

[fol. 184] Q. Let's take the interest of yourself, and I assume there you are speaking of the Santa Fe, what were those interests? What particular interest of the Santa Fe would be prejudiced or needed protection against an acquisition of the TP&W by the M&StL, other than the one you have mentioned, that is, the loss of the possible Lomax gateway?

A. I don't know how to answer your question. I thought it was for the best interests for us to have it rather than the M&StL to have it. I didn't go very far in running out reasons for that conclusion.

Q. Have you any additional reasons or any other reasons in your mind today which should be considered in determining whether or not your application should be granted?

A. I have none to offer, no.

Q. Mr. Gurley, did anyone from the Santa Fe or did the Santa Fe send anyone to Peoria and to the various cities on the line of the TP&W to secure their approval and support of your application?

A. Oh, I think so.

Q. Can you tell me who that was?

A. No, I can't tell you the name of the fellow who may have been down. It was handled through Mr. Bagge's general jurisdiction.

Q. How do you spell that name?

A. B-a-g-g-e.

Q. Is he available in Peoria?

[fol. 185] A. He is once removed from you.

Q. Now, Mr. Gurley, you have stated in your testimony repeatedly that you wanted joint ownership of the TP&W with the Pennsylvania, is that not correct?

A. Yes, that is correct.

Q. And was that the primary or was that—was it joint ownership with the Pennsylvania that you had in mind at all times when you sought to acquire control of the stock of the TP&W?

A. Yes, pretty much. I tried to outline that on direct, pretty much. Ever since 1942 my mind has worked that way.

Q. Mr. Gurley, can you tell us how much the Santa Fe spends on traffic solicitation, incuding advertising, let's say, for 1954 or 1955?

A. Oh, I could. I could look it up. I couldn't tell you offhand.

Q. Could you furnish that figure for the record?

A. I'd be glad to. Would you mind just stating on the record what account you want? That is the best way, tell me the account numbers you want.

Q. Sorry, sir. I can't.

Mr. Thomas: I suggest that Mr. Wheeler talk with me privately and talk with his people and get the account number and we will get it.

Exam. Albus: Very well.

By Mr. Wheeler:

Q. May we have the same information, if you do not [fol. 186] have it in your mind at present, with respect to solicitation offices that you maintain, that is to say, the number and location of them, and how many employees are engaged in solicitation, traffic solicitation.

A. That is not so readily available. It could be prepared, if it is necessary.

Q. Would you undertake so to do.

A. I am not so certain that I care to do that. I can't quite follow the need of putting into this record the employees we have at Los Angeles and how many we have at Portland and what have you.

Mr. Wheeler: Mr. Examiner, I think it is germane to the—

Exam. Albus: May I suggest you talk to Mr. Thomas first and see what you can work out?

Mr. Wheeler: Fine.

Exam. Albus: Any further questions?

Mr. Wheeler: I have just one.

By Mr. Wheeler:

Q. Mr. Gurley, all you know are all the resolutions of the Santa Fe authorizing purchases of the TP&W stock, a part of your application?

A. Yes.

Q. There are no other actions taken by your board which are not shown there?

A. Not that I know of.

Mr. Wheeler: I have no further questions.

[fol. 187] Cross examination.

By Mr. Hoag:

Q. Mr. Gurley, at page 19 of the application of the Santa Fe and the Pennsylvania, at the bottom of the page you state that there is no occasion for imposing protective

conditions for employees. By that, do you mean that you are opposed to imposing protective conditions?

A. Where is that again. I don't find it. Yes, here it is. Well, the entire section reads that way, "Since the present independent management and operation of the TP&W will be continued, there is no occasion to impose terms and conditions under Section 5(2) of the Interstate Commerce Act." That is our opinion.

Q. Is it the position of the Santa Fe and the Pennsylvania now that they are opposed to imposing protective conditions?

A. No. We never really thought it was something to consider.

Q. Are you acquainted with the provisions for protective conditions that have been set forth in the application of the Minneapolis & St. Louis Railroad?

A. No, I did not notice them.

Q. I believe in their application that they state they are willing that the Commission impose the words "Washington job protection agreement". Do you have knowledge of that?

A. No, I didn't notice that.

Q. Would you be opposed to granting like conditions?

A. Not at all.

[fol. 188] Q. You have no objection to imposing job protection?

A. No.

Mr. Hoag: Very well, Mr. Gurley. That is all.

Exam. Albus: In the meantime, Mr. Gurley, would the Santa Fe be interested in acquiring anything less than 50 per cent of the stock of the TP&W?

The Witness: We are not interested in doing it now. I don't know quite how to answer you, Mr. Examiner.

Exam. Albus: I have in mind, suppose the Commission would impose a condition that some other railroads be included in the deal, would you lose your interest in the matter?

The Witness: Mr. Examiner, I think the only fair thing for me to say is I'd have to take a look at it, have to take a good hard look at it at the time.

Exam. Albus: Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. Along that same line, would you also take another look at your proposal to put Lomax on a parity with Chicago in your solicitation if you had to give up or if you had to sell part of this control of stock in the TP&W to other railroads?

A. Well, of course, we'd take a look at it, surely.

Q. Would it be with a view toward cancelling out that policy and continuing to operate as you do now?

A. I made it abundantly clear, I thought, the proposal [fol. 189] to put Lomax on a parity was in contemplation of a 50-50 and if that did not prevail we'd have a changed condition and that's about all I can say to you now.

Q. Mr. Gurley, you spoke yesterday of changing crews at some point, as I understood, on the TP&W, is that correct, that that might possibly be an eventuality?

A. Well, I don't think I outlined it quite that strongly. I said one of the things that could come to your mind, that you might be able to do so, if you could work out a deal with labor and everybody else, it might be advantageous to run crews through into Shopton rather than making the interchange at Lomax.

Q. Now, those would be Santa Fe crews?

A. Oh, I wouldn't know.

Q. These crews are operating between what points now?

A. They operate now between Peoria and Lomax.

Q. Where is this point Shopton?

A. Oh, it is abount 20 miles west of Lomax.

Q. On the Santa Fe?

A. On the Santa Fe.

Mr. Wheeler: Thank you.

Exam. Albus: Are there any further questions? Is there any redirect?

Mr. Thomas: Yes. One question.

Redirect examination.

[fol. 190] By Mr. Thomas:

Q. Yesterday, in referring to the objectives set forth in Section 3 of your agreement with the Pennsylvania, Mr. Wheeler remarked that that agreement was not for the benefit of the other parties not parties to the agreement. Now, in order to make it perfectly clear, what your position and purpose is toward the TP&W, do you think it would be appropriate for the Commission to incorporate those objectives in any order it might enter in this proceeding in granting the application?

A. I would think that is a fine thing to do. Certainly we have no intention and desire to equivocate on those conditions.

Mr. Thomas: That is all.

Exam. Albus: Is there any recross?

(No response.)

OFFERS IN EVIDENCE

Mr. Thomas: May I offer Exhibits H-6 and H-7 now?

Exam. Albus: Is there any objection to the receipt of Exhibits marked for identification H-4, 5, 6, and 7?

(No response.)

Exam. Albus: Let the record show that those exhibits are received at this time.

(Applicant's Exhibits H-4 and H-5, Witness Clutz, and Applicant's Exhibits H-6 and H-7, Witness Gurley, were received in evidence.)

Exam. Albus: May we have the next witness, please.

Mr. Thomas: I will call Mr. Mahoney now.

(Witness excused.)

[fol. 191] J. J. MAHONEY was sworn and testified as follows:

Direct examination.

Mr. Thomas: Mr. Examiner, we have distributed an exhibit containing in its caption reference to Lomax interchange in various years.

Exam. Albus: Yes.

Mr. Thomas: May that be identified?

Exam. Albus: That may be marked for identification Exhibit H-8.

(Applicant's Exhibit H-8, Witness, Mahoney, was marked for identification.)

Exam. Albus: All right, Mr. Thomas.

By Mr. Thomas:

Q. Mr. Mahoney, will you state your name, address and present position with the Santa Fe?

A. My name is J. J. Mahoney. I am general superintendent of transportation of the Atchison, Topeka and Santa Fe Railway System, with headquarters at Chicago, Illinois.

My duties consist of supervising the distribution of passenger and freight cars over the Santa Fe system, supervising all car service matters, including the interchange of traffic and connecting line railroads, coordinating freight train schedules on the four Grand Divisions into through freight train schedules, and setting up the blocking plan of through freight trains in order to hold the switching of [fol. 192] such trains to a minimum at intermediate terminals.

Q. What prior positions have you held with the Santa Fe?

A. I entered the service of the Santa Fe in May 1912 as a switchman at Pueblo, Colorado, and also served in the capacity of an engine foreman, assistant yardmaster and yardmaster. In July 1920 I was promoted to switching inspector of the Western Lines. On November 15, 1920, I was promoted to general transportation inspector cover-

ing the same territory. On December 1, 1924, I was promoted to assistant trainmaster on the Rio Grande Division in New Mexico. On June 1, 1925, I was promoted to assistant to general superintendent of transportation, with headquarters at Chicago. In that capacity I became actively engaged in checking train schedules, make-up of trains, and the interchange of traffic with connecting line carriers over the entire system. I assumed my present position on July 1, 1936.

Q. Mr. Mahoney, was the exhibit that has been identified as H-8 prepared under your supervision?

A. It was.

Q. Will you describe the interchange tracks at Lomax?

A. In 1926, shortly after Mr. McNear purchased the T. P. & W., he made arrangements with the Santa Fe for the joint construction of interchange tracks at Lomax. The interchange tracks were completed in August 1927 and are shown on page 1 of Exhibit H-8. When this work was completed, the delivery track had a capacity of 29 cars. The first interchange of cars was made on August 6.

[fol. 193] During 1928, the first full year after the interchange tracks were completed, 5,961 loaded cars were interchanged at Lomax.

Q. Could I stop you there for a moment, Mr. Mahoney. You explained that was the year 1928?

A. Yes, sir.

Q. You will note that Exhibit H-5, page 8, shows the interchange for 1928 between the Santa Fe and the T. P. & W. as 7,264 cars in column 5.

A. Yes, sir, I am familiar with that.

Q. Will you explain the difference between that figure and the figure you have just quoted?

A. Yes the difference in that figure and the one I quoted is that 1,303 cars that were interchanged at Eureka in 1928.

Q. Thank you. Will you proceed.

A. The volume of cars interchanged steadily increased until in 1935 a total of about 24,000 cars were interchanged of which 14,659 were loads. It became necessary, therefore, to expand these facilities, rearranging and adding additional trackage, as shown on page 2 of Exhibit H-8.

Continued growth of this gateway made necessary further expansion and rearrangement of the interchange tracks at Lomax in 1953. In that year 34,404 loads and 17,370 empties, or a total of 51,774 cars, were interchanged. The trackage west of the depot was enlarged to permit the handling of a total of 146 cars, 72 on the delivery track and [fol. 194] 74 on the receiving track as shown on page 3 of Exhibit H-8. You will note that page 3 of Exhibit H-8 shows the present Lomax interchange as in service in 1954. This reflects the fact that, after the interchange was expanded in 1953, a cross-over between the eastbound main and the interchange tracks was removed. This took place in 1954.

Q. How was the cost of these improvements in the interchange divided?

A. The cost of contruction of the interchange facilities in 1927 and the expansions in 1935 and 1953 were divided between the Santa Fe and the T. P. & W. on a 50-50 basis.

Q. Will you explain how these inmprovements have facilitated interchange at Lomax?

A. The locating and expansion of the interchange tracks west of the depot at Lomax in 1953, besides permitting the handling of a larger volume of traffic, also provided for accomplishing the interchange in less time than when these tracks were located east of the depot. The present track layout provides for a very simple operating in the interchange of cars for both railroads.

Deliveries require an average of from fourteen to eighteen minutes to accomplish. As many as seventy-two cars can be set out at Lomax for the T. P. & W. in one move.

Most of the cars received at Lomax from the T. P. & W. are for western destinations and these cars are, therefore, [fol. 195] picked up by a westbound train. The westbound train selected to make the pick-up operates over the eastbound main line under automatic train control and traffic reversal movements which permits a very simple interchange of cars between the Santa Fe and the T. P. & W. These pick-ups are accomplished within fourteen to twenty minutes, depending on the number of cars handled.

Q. What else has been done to speak interchange at Lomax?

A. In 1952, in order to expedite the interchange of traffic at Lomax, the Santa Fe installed a Recordak system of photographing waybills, which permits transfer of waybills between the Santa Fe and T. P. & W. in less than ten minutes. Under the Recordak system, photographs of each waybill are taken and later the film is developed and station records are prepared from the film instead of the former practice of holding the trains at the station while station records were made from the waybills by hand.

Q. Will you comment on the establishment of perishable schedules through Lomax?

A. In 1930 arrangements were made between the Santa Fe and the T. P. & W. for the establishment of coordinated schedules for the handling of perishable traffic, and the T. P. & W. constructed icing facilities at Peoria to accommodate this traffic. The T. P. & W. has been a part of the through transcontinental schedules for perishable traffic originating in California and Arizona from 1930 up to the present time. In addition to the transcontinental [fol. 196] schedules, we also have in effect coordinated perishable schedules from Texas, Oklahoma, New Mexico, Colorado, Kansas, and Missouri with established cut-off times for the delivery of traffic for through freight train schedules with the T. P. & W.

To further expedite perishable traffic through Lomax, arrangements were made with the T. P. & W., beginning in 1939, whereby heaters placed in refrigerator car bunkers for protection against freezing would be operated from Kansas City to East Peoria and vice versa to avoid the delay of changing heaters at Lomax, the junction point, which is the usual practice among railroads.

Q. Have you other examples of steps taken to speed service through Lomax?

A. Yes. The chief dispatchers for the Santa Fe and the T. P. & W. keep in close contact with the movement of traffic to be interchanged at Lomax. The Santa Fe keeps the T. P. & W. informed as to the approximate arrival and number of cars that will be delivered at Lomax and the T. P. & W. keeps the Santa Fe informed as to the cars that will be delivered by the T. P. & W. With this information at hand each railroad arranges train move-

ments so that cars can be interchanged at Lomax with minimum delay.

Q. Will you describe the present operating schedules through Lomax?

A. 4 and 5 of Exhibit H-8 show the present A. T. & S. F.-T. P. & W. coordinated operating schedules between [fol. 197] Kansas City and East Peoria and East Peoria and Kansas City.

Q. May I interrupt there. Will you indicate what East Peoria is to the T. P. & W., what significance it has to the T. P. & W.?

A. That East Peoria, that T. P. & W., is what we call the east river there, the east side of Peoria.

Q. Proceed.

A. These schedules are self-explanatory. At the present time we have an agreement with the T. P. & W. that the cut-off time for receipts of traffic for their evening trains departing Lomax is 8 o'clock p.m. The cut-off time for receipts of traffic departing in their morning train from Lomax is 7 o'clock a.m.

Footnotes on pages 4 and 5 of the exhibit show the territories on the Santa Fe from which traffic is delivered to the T. P. & W. to meet the 8 o'clock p.m. cut-off and the 7 o'clock a.m. cut-off, respectively.

We receive the largest volume of traffic from the T. P. & W. at Lomax in their evening delivery, which is due to arrive at Lomax at 5:45 p.m. This traffic is handled westward in our expedited schedule on No. 159 and No. 59. The delivery we receive at Lomax at around 4:50 a.m. is generally handled westward in a section of No. 49 or 59, arriving Kansas City the following morning around 5 o'clock a.m.

Q. Will you describe the arrangements made to handle livestock from La Harpe? By the way will you indicate where La Harpe is?

[fol. 198] A. La Harpe is the junction on the T. P. & W. where the route from Lomax and the route from Keokuk converge.

Q. Thank you.

A. In addition to the agreements between the T. P. & W. and the Santa Fe for the handling of perishable freight,

Santa Fe has, for many years, agreed to hold at Lomax until 4:30 p.m. for livestock destined to the Chicago market. Since 1949, at the request of the La Harpe Livestock Shipping Association to permit later loadings at La Harpe, the Santa Fe has arranged to hold at Lomax until 7 o'clock p.m. on Mondays so as to provide early morning delivery at the Chicago market the following day. Last Monday night we picked up five cars of livestock from La Harpe for Chicago.

Q. Will you describe generally the working relationships you have had with the officials of the T. P. & W.?

A. Yes, sir. In working with the T. P. & W. in regard to the interchange of traffic and coordinating freight train schedules through the Lomax gateway very little difficulty has been experienced. It is true that in working out some of these arrangements we have had conferences during which there were some disagreements. That is only natural. But in the end arrangements were made to the satisfaction of both roads.

Q. Do you think the schedules that have been worked out have been satisfactory to shippers?

A. Yes, sir. During my experience with train schedules [fol. 199] that have been worked out with the T. P. & W. through the Lomax Gateway has been that since this service was inaugurated we have had no complaints registered by shippers against the service through this route. We have had some specific complaints, and may receive others about failure to make the schedule with certain specific cars, but we have never received a general complaint from any shipper in our territory on service through the Lomax Gateway.

Mr. Thomas: That is all on direct.

[fol. 200] Exam. Albus: Cross-examination, please. Mr. Wheeler.

Cross Examination.

By Mr. Wheeler:

Q. Mr. Mahoney, I gather from your testimony, and I believe you stated, that you were getting pretty complete

cooperation from the T. P. & W. officers and employees at the present time, so far as your train schedules and billing of the interchange at Lomax and so forth is concerned, is that correct?

A. That is correct, Mr. Wheeler.

Q. Do you think that situation would be changed by the acquisition of control of the T. P. & W. by the Santa Fe & Pennsylvania?

A. Working arrangement through that gateway?

Q. Yes.

A. I don't think it would.

Q. Or the cooperation you are not getting from the T. P. & W. officials, would that be changed, insofar as your operations on the Santa Fe are concerned?

A. No, I couldn't see where there would be any need for any change.

Q. Referring to shipments of livestock from LaHarpe.

A. Yes, sir.

Q. How do those shipments move?

A. They are loaded at LaHarpe and the T. P. & W. moves the cars into Lomax, thence the Santa Fe picks them up [fol. 201] with an eastbound train and moves them into Chicago.

Q. The T. P. & W. does not get the long haul on that movement, then, does it?

A. No, they get the haul from LaHarpe to Lomax.

Q. Can you give me that distance as compared to the haul to Eureka? What is the distance from LaHarpe to Lomax?

A. Well, sir, I haven't got that.

Q. Do you know approximately?

A. I would say it is about between 15 and 20 miles, just offhand. I am sorry I can't tell you the exact mileage.

Q. Do you know what the distance is from LaHarpe to Eureka? Isn't that the junction point of your Chicago branch?

A. Yes, we have a junction at Eureka with the T. P. & W.

Q. What is the distance from LaHarpe to Eureka, approximately?

A. Well, I don't have that mileage.

Q. Would it in the vicinity of 80 miles?

A. I think it would be from LaHarpe to—

Q. Between 80 and 100 miles?

A. About 80 miles. If that isn't very close I will tell you later.

Q. All right.

Mr. Broker: It is 84.4 miles west of Peoria.

A. Mr. Wheeler, will you accept that mileage from that gentleman over there, 84.4?

By Mr. Wheeler:

Q. I will accept it.

[fol. 202] You did not by your testimony with respect to the interchange of traffic between the Santa Fe and T. P. & W. at Lomax mean to indicate, did you, that all of that traffic was influenced or solicited for movement over the T. P. & W. by the Santa Fe?

A. No, I did not. I am not in the sales department, Mr. Wheeler.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassel.

Cross Examination.

By Mr. Cassel:

Q. Mr. Mahoney, on these eastbound trains of perishables, do they terminate at Lomax?

A. No, they don't terminate—do you mean Santa Fe trains terminate?

Q. Yes.

A. No, sir. We make setouts at Lomax and continue on to Chicago or Chillicothe.

Q. Are their schedules entirely set out for the T. P. & W. or do they also have considerations of the needs which they must make at Chillicothe or Chicago?

A. Trains that generally make the setouts at Lomax have cutoff and setout times at other Illinois junctions, such as Nemo, Streeter, Joliet, McCook.

Q. Their schedules, then, are determined not only by the junction at Lomax but also by these other junctions, aren't [fol. 203] they?

A. We have an agreement or understanding at what time we will deliver at all junctions.

Q. Who sets the cutoff time at Lomax, the Santa or the T. P. & W.?

A. I set it. Of course I do that in conference with the T. P. & W. I work those out.

Q. You are able to maintain those connections at the present time because of the cooperation of the T. P. & W. as well as what you do, isn't that right?

A. Yes, the T. P. & W. cooperates with the Santa Fe in providing a through service through that gateway.

Q. And if the T. P. & W. were to fail to meet those cutoff times it would pretty effectively break the connection, wouldn't it?

A. Yes, if they failed to meet the delivery time of the Santa Fe the connection would be broken, naturally.

Q. So it requires the cooperation of both railroads to keep that as an effective service route?

A. That is right. That doesn't only apply, Mr. Cassell, at Lomax, but that applies at any junction where you have a connection with a connecting line carrier.

Mr. Cassell: That is all. Thank you.

Exam. Albus: Mr. Broker, please.

Cross Examination.

By Mr. Broker:

Q. The East Peoria yard referred to on page 4 of your [fol. 204] exhibit, is that the yard that is adjacent to the Farmdale interchange with the Nickel Plate, do you know?

A. I do not know.

Q. Now, these schedules are generally co-ordinated multiply with those of eastern carriers at Peoria, aren't they?

A. I understand that the lines east of Peoria have an understanding and an agreement with the T. P. & W. for the receipt of traffic from them to make certain trains from East Peoria.

Q. And that would include the Nickel Plate as well as other eastern connections?

A. That is correct.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions of Mr. Mahoney? Is there any redirect?

Redirect Examination.

By Mr. Thomas:

Q. Mr. Mahoney, you were asked about this possibility of hauling the livestock from LaHarpe to Eureka and turning it over to the Santa Fe there to reach the Chicago market. Could that kind of service be provided and provide the expedited movements needed to reach the Chicago market on that Monday night train?

A. No, we couldn't provide it on that following day market.

Q. What is that Santa Fe train that this service from LaHarpe connects with, that livestock train, where does it come from?

A. We run a livestock special every night out of Fort [fol. 205] Madison, Iowa, and gather up livestock at all stations along the railroad. That is the only way we can accomplish the next morning market.

Mr. Thomas: That is all.

Exam. Albus: Are there any further questions?

(No response.)

Exam. Albus: You are excused, Mr. Mahoney. Thank you, sir.

(Witness excused.)

Offer in Evidence

Mr. Thomas: May we offer Exhibit H-6?

Exam. Albus: Are there any objections?

(No response.)

Exam. Albus: Exhibit marked H-8 is received.

(Applicant's Exhibit No. H-8, Witness Mahoney, was received in evidence.)

[fol. 206] GERALD E. DUFFY was sworn and testified as follows:

Mr. Thomas: May the map of the United States be identified as the next numbered exhibit?

Exam. Albus: That will be H-9, map of the United States.

(Applicant's Exhibit No. H-9, Witness Duffy, was marked for identification.)

Mr. Thomas: And the blue-covered exhibit.

Exam. Albus: H-10 for identification.

Mr. Thomas: I might say it is GED-2 in the lower right-hand corner.

Exam. Albus: Yes.

(Applicant's Exhibit No. H-10, Witness Duffy, was marked for identification.)

Mr. Thomas: And the single-page map.

Exam. Albus: Single-page map of the principal interchange points of the Santa Fe, Kansas City and East is 11, H-11 for identification.

(Applicant's Exhibit No. H-11, Witness Duffy, was marked for identification.)

Direct examination.

By Mr. Thomas:

Q. Will you state your name, address and position with the Santa Fe?

A. My name is Gerald E. Duffy. I am vice-president of traffic. My address is 80 East Jackson Boulevard, Chicago.

[fol. 207] Q. What other positions have you held with the Santa Fe?

A. Well, I have been attorney, a commerce attorney, assistant to the president, assistant vice-president of traffic, and vice-president of traffic.

Q. And in that capacity, that last capacity, you are in charge of all solicitation efforts as one of your duties are, you not?

A. Yes, sir, I am in charge of solicitation and rates and advertising, both passenger and freight.

Q. Will you describe the exhibit which have been identified as H-9, the map of the United States?

A. The Exhibit H-9 is a map of the Atchison, Topeka and Santa Fe Railway System, map of the United States, on which I have circled in blue certain important junctions between by the Santa Fe interchanges traffic with other railroads.

I want to make it clear that I haven't circled all of the junctions. I think the number of junctions that I have circled are representative. Nor have I attempted to circle junctions on the Pacific Coast, that is, the California interchanges. For the purpose of my testimony I didn't regard it as important, but we do have junctions west of the junctions that I have indicated.

Along that line, Mr. Thomas, I should say at this time for the record that on traffic interchanged at Chicago, between eastern and western railroads by a belt line, there is a charge of $10.90, which is paid by the carrier delivering [fol. 208] the freight to the belt line. I think that is the amount, $10.96.

Q. Then on eastbound traffic the Santa Fe would pay the switching charge?

A. That is right.

Q. And on westbound—

A. Traffic the line delivering to the belt line would pay it.

Q. Will you turn to Exhibit H-10 and comment on page 1.

A. On page 1 I have indicated the carriers with which the Santa Fe interchanges at the various junctions shown on my Exhibit H-9. I think the exhibit is self-explanatory. It is merely a factual exhibit.

Q. Do you also show in Exhibit H-10 the amount of divisions percentage paid to the Santa Fe on traffic west of the junctions shown on Exhibit 9?

A. Yes, on pages 2 and 3 I have shown the divisions accruing to the Santa Fe, both on eastbound and westbound traffic, west of the various gateways indicated between representative points in the east and representative points in the west. Now, when I say accrued to the Santa Fe, I mean that that accrues to any group of western carriers

who haul the traffic. I am assuming that the Santa Fe in this particular case hauled it all the way.

Q. Now, those points that you referred to are shown in the second column on page 2, aren't they, and page 3?

A. Yes, sir. You mean the gateways?

[fol. 209] Q. Yes.

A. In other words, I have restricted the showing in these two exhibits to the so-called Chicago gateways and Kansas City.

Q. Are those gateways shown on Exhibit 11?

A. Yes, sir, they are shown on Exhibit H-11.

On page 4 I have ran out the divisions accruing to the Santa Fe west of the so-called junctions that I have indicated on Exhibit 9 west of Kansas City. Now, I have confined that showing to transcontinental divisions, first of all, because the junctions are quite a bit west, and, second of all, becauses about 50 per cent of the traffic interchanged between the Santa Fe and the T. P. & W. is what might be termed transcontinental traffic. And for the purpose of the case I thought that these divisions would be representative of the situation that we are trying to show.

Exam. Albus: Very well.

By Mr. Thomas:

Q. I call attention to Exhibit H-11 again. Would you state the difference in distance over the Santa Fe between Chicago, on the one hand, and Streeter—let's take them one at a time, Street.

A. Streeter is 90 miles less than Chicago.

Q. Nemo?

A. One hundred ninety miles less than Chicago.

Q. Lomax?

A. 219 miles less than Chicago.

[fol. 210] Q. Kansas City?

A. Four hundred fifty-two miles less than Chicago.

Q. Now, Mr. Duffy, will you describe generally what the solicitation policy of the Santa Fe is?

A. Wel. the general policy is to try and get our long haul. Now, if you will look at the map, Exhibit H-9, it is very apparent that to and from so-called eastern territory

that our long haul, we would consider our long haul Chicago. On the other hand, geographically, when you look at the map, you can appreciate that to and from southeastern territory we would have to be content, generally speaking, with a long-haul through Kansas City or one of the Texas junctions like Fort Worth, depending upon where the traffic originated. I should say that as a matter of fact, and there again I am speaking generally, there are limited number of rates applying from southeastern territory via the Santa Fe through Chicago. The whole point of my showing in this respect is to the effect that the traffic that we are talking about here is generally traffic to and from eastern territory. Now, I am not going to attempt to define that any broader or any more specific because when we talk about southeastern territory and eastern territory in that respect it is very difficult to say where the borderline exists. In other words, the C. & O. has a pretty good line to a part of the southeastern territory and to Chicago and we might get some out of there, but nevertheless [fol. 211] I would say the seven southeastern states are out of the picture, and generally speaking, some of those other states are out of the picture, but there are border points in each where traffic might move Chicago or through Illinois gateways.

Q. That is on east-west traffic?

A. That is on east-west traffic.

Q. Does the Santa Fe always insist on getting the long haul?

A. We not only don't insist on getting the long haul but we are not always able to get the long haul. While we do pretty well at Chicago on the territory east-west, there are a number of shippers for one reason or another based on experience try to keep away from the Chicago gateway. It is obvious from the standpoint of those shippers the Santa Fe can't get a long haul; we either get no haul at all or have to get a haul through interior junctions.

I should mention the fact that not very long ago the New York Central came to us and said they could give better service through Streeter than Chicago. Streeter is a short haul for us, technically speaking, we get better divisions, and asked what we'd do about it. Having in mind that

after all, service to the shipper is paramount and we have to take a little bit less at times, we told the New York Central that from a shipper's standpoint we'd put Streeter so they could work Streeter as well as Chicago. That's an indication of the fact that sometimes you must have to take a shorter haul in order to give the service to the ship-[fol. 212] per, or in order to give the best service to the shipper.

Right along that line I should refer to the fact that a great part of the traffic of the country today moves on bills of lading on which no junctions are shown. In other words, the shipper inserts the carriers but doesn't insert the junction because thereby he places an obligation on the carrier to move it over the route that has the lowest rate.

Speaking along the same line of giving service at a sacrifice of the long haul, I should say that the Santa Fe today on all traffic routed T. P. & W.-Santa Fe without a junction, that the Santa Fe turns that traffic over to the T. P. & W. at Lomax rather than take its long haul around through Eureka.

I merely bring that out to show that sometimes you forego your long haul in order to give service to the shipper.

Q. You do that because you think you are better off in the end, don't you, financially?

A. There is no use cutting off your nose to spite your face. Service is a big factor and service in the long run is something that if the shipper doesn't get he is going to go to somebody else.

Exam. Albus: Mr. Duffy, how much of the Santa Fe traffic is routed by the shipper?

The Witness: Well, I never ran out of percentages, Mr. Examiner, but I would say that the amount of traffic today [fol. 213] that flows over the Santa Fe or any other railroad that is not routed by the shipper is infinitesimal. I mean it is very, very, small.

Exam. Albus: Would it be limited to company material or something like that?

The Witness: Well, even there the railroad to whom the company material is going routes the traffic itself. In other words, they divided their business between various railroads.

Exam. Albus: I understood you to say it is very seldom that the junction points—

The Witness: I didn't say very seldom, I said there is a great proportion of the traffic. I am not in position to say how that divides.

Exam. Albus: I am talking about junction points designated by the shipper; you say that is rare now.

The Witness: I didn't say it was rare. I said there was a substantial part of the traffic of the country on which those junction points are not indicated.

Exam. Albus: That is what I understood you to say.

The Witness: I have never found any way to show the percentages, but I think every railroad man in the room recognizes the fact that the shipper tries to protect himself by not putting in the junction.

Exam. Albus: Thank you.

[fol. 214] By Mr. Thomas:

Q. Are there other factors that influences the shipper besides the service?

A. Oh, yes. While service we always regard as paramount, nevertheless solicitation, friendship, reciprocity, and the desire of a shipper to naturally be on good terms with as many railroads as possible is a big factor in dividing the traffic of the country. In other words, while I think service is paramount, nevertheless there is an appreciable amount of traffic moving in this country today on which service is not the criteria.

Q. Do these other factors sometimes prevent you from getting your long haul?

A. That is the factors I am talking about that prevent us from getting the long haul. I was merely going to emphasize the fact that on that traffic where service is not paramount or of the utmost reasonable importance that you find shippers routing this traffic pretty well all around the country via circuitous routes in order to try to include as many railroads as possible.

Now, the reason for the average shipper in trying to include as many railroads as possible or being on friendly relations with as many railroads as possible and divide

his business up to some degree is the fact that he has ate matters coming up from time to time, and, after all, te matters are a question of judgment, and sometimes if a fellow doesn't have any chips in the pot he isn't very much interested in the rate problems of the shipper. So you [fol. 215] find shippers, generally speaking, like to be on friendly terms with as many railroads as possible.

Q. What has been the attitude of the Santa Fe with respect to the Lomax gateway and the T. P. & W. route?

A. Well, the Santa Fe has always regarded the Lomax gateway as an asset in meeting the competition of St. Louis. While all through the years we have regarded as an asset and cooperated in every respect, service-wise, nevertheless from the very beginning, the T. P. & W. has always understood that we'd try to solicit our long haul via Chicago. It is a fact that the T. P. & W. solicit short hauls on the Santa Fe and traffic that otherwise might move by us through Chicago, and I think that as a whole, while we are not 100 per cent satisfied, and sometimes don't let them get away from it, nevertheless we are a lot more tolerant about those short hauls than we are with respect to short hauls through Kansas City and interior junctions shown on my map.

Q. Why are you more tolerant that way?

A. Well, the reason we are more tolerant is due to the fact that we recognize that the T. P. & W. is one of the few routes that we have that will go out and solicit traffic for the Santa Fe in competition with the St. Louis gateway.

Mr. Wheeler: Pardon me, Mr. Duffy.

May I have that answer read back.

(Answer read.)

[fol. 216] A. Every time that they are successful in obtaining a car over its route that we might get at Lomax, in competition with the St. Louis gateway, we are pretty well off. I don't mean that they solicit the St. Louis gateway for the Santa Fe alone. I mean that they solicit the Santa Fe gateway for their own benefit, and all the railroads that don't happen to reach St. Louis, or even some that do receive the benefit.

By Mr. Thomas:

Q. Do they solicit for the gateway through Keokuk, too?

A. Yes, sir, the T. P. & W., so far as I understand their policy, is that they solicit for the T. P. & W., they play no favorites as to junctions, they don't even solicit their long haul. They are perfectly content to get any haul at any junction, thereby throwing revenue into their coffers.

Q. You were talking about the route via the Lomax gateway as compared with the gateway via St. Louis. Have you some material in your Exhibit H-10 which bears on that in connection with the eastern lines?

A. Yes, sir. If you will refer to pages 5 and 6 you will see that I have indicated the percentage, or division per cent, that the eastern lines receive via the same gateways that are reflected on pages 2 and 3 and between the same representative points.

The facts speak for themselves, except I should say that, generally speaking, the divisions of the eastern lines [fol. 217] through St. Louis is greater than through Chicago, the divisions of the eastern lines through Peoria is better than through Chicago, so that relatively in competition with the St. Louis gateway the Peoria gateway, that is, the T. P. & W., is in a little better position to compete to the extent that the eastern lines have any interest than the Chicago gateway.

Q. Would you take the Nickel Plate just as an example and illustrate how that works?

A. Well, I think the best example, and I think it is the example—it isn't representative because you will find different per cents all the way through, but nevertheless taking Pittsburgh as representative and the transcontinental divisions eastbound as the subject of my discussion, you will see that the Chicago per cent for the eastern lines is 16.5, East St. Louis is 20 per cent to the eastern lines. On the other hand, in that particular case, on transcontinental traffic, Peoria pays the eastern lines the same per cent that St. Louis pays. I bring that out that at least so far as a railroad like the Nickel Plate is concerned and the transcontinental traffic it should not worry too much whether it turns the business over to the T. P. & W. at Peoria or carries it to St. Louis. Now, that isn't true with respect

to other divisions. I said before, generally speaking, there is a difference in favor of the St. Louis gateway but a greater difference under the Chicago gateway.

[fol. 218] Q. What is the relative importance of the Chicago and St. Louis gateways?

A. Well, the Chicago and St. Louis gateways are the two most important gateways in the country because there the greatest number of eastern and western railroads meet. It is true that there are railroads that serve Chicago that don't serve St. Louis, but nevertheless a great number of the railroads that serve St. Louis also serve Chicago, and it is very obvious that the western railroads converging at these two points and having in mind the general terrain and the general geographic situation that these two gateways are the important gateways of the United States.

Along that very line it might be appropriate to say that the Santa Fe, unfortunately, does not serve St. Louis. On the other hand, two of our western competitors in this case, one of who has been very nice about the case, that is the Burlington and Rock Island not only serve St. Louis and Chicago but serve Peoria. Santa Fe only serves Chicago, it doesn't serve Peoria or St. Louis.

Q. What important western railroads which compete with the Santa Fe compete with St. Louis?

A. If you will look at map H-11, you will see that the major railroads that compete with the Santa Fe west of Kansas City, at St. Louis, that serve St. Louis are Missouri Pacific, Frisco, the Katy, the Rock Island, the Burlington, [fol. 219] and the Cotton Belt. Now, I am conscious of the fact that the Wabash and G. M. & O. also serve St. Louis, but their termini is Kansas City, so that they are not actually in competition with us west of Kansas City, although they are in competition with us to Kansas City.

Q. You referred to the Cotton Belt. It isn't identified that way on the map. I thought I might have you point out.

A. St. Louis is L. S. F.—no, I beg your pardon. S. L. S. W.

Q. What is the general policy of these western competitors to the Santa Fe on traffic that moves through St. Louis?

A. Well, leaving aside for the movement the Wabash and G. M. & O. who stop in Kansas City and obviously can't,

go beyond that, the other railroads in competition with us naturally seek to maintain their longest haul. As I said before, a great substantial part of the traffic of this country moves on bill of lading that doesn't show junctions. Now, if any of those railroads have such a bill of lading whereby it is routed Rock Island, Santa Fe, the Rock Island is very much within its rights to carry that traffic to Amarillo. The Katy is very much within its rights to carry that traffic to Fort Worth or some other junction. The Missouri Pacific is very much within its rights to carry that traffic to Pueblo. Now, I use that as representative. To the extent that there are junctions and the traffic flows over our western competitors via St. Louis, Kansas City, Santa Fe, the information of any great flow of traffic in that direction in [fol. 220] the hands of one of our western competitors makes them do just like we'd do under the circumstances and that's send their solicitors out and start working on that traffic and see why they can't get a longer haul on it. So the St. Louis gateway is a gateway that under existing conditions is not a very good gateway for the Santa Fe Railroad.

Q. In your referring to these lines getting their long haul, you had in mind traffic in which the Santa Fe is named as a connection carrier at some junction?

A. Oh, yes, sir.

Q. Is the Lomax gateway important to the Santa Fe in meeting this situation?

A. I think it is very obvious, having in mind that while we work awfully hard through Chicago we need help. As I pointed out there is a little bit better divisional basis through the T. P. & W. and Peoria gateway. With another railroad working for us it is very obvious that they must solicit and obtain traffic that otherwise would move via the St. Louis gateway, some on which we wouldn't receive a haul at all and some on which we may receive an interior junction haul.

Q. When you speak of a railroad working for you, such as the T. P. & W. working for you via the Peoria gateway, just what does that mean?

A. I really mean that they work for themselves, and to [fol. 221] the extent that they work for themselves we work

awfully hard to get that traffic that they have solicited via our gateway, just like the Rock Island would, too. They are not working for the Santa Fe. I don't think any solicitor of the T. P. & W. could go out and work for the Santa Fe in relation to the Rock Island and Burlington, if so, they would be in trouble pretty quickly. The gateway is there and the T. P. & W. solicits, we solicit also.

It is very obvious that we would much rather receive a car through the Lomax gateway from the T. P. & W. than to receive it even from one of our western competitors through the Kansas City gateway, not only because of the money loss but also because of the fact that our traffic is always in jeopardy when it is in the hands of our competitors as a connecting carrier.

Q. There has already been some discussion of what the Santa Fe intends to do traffic-wise if the present application is granted, and that involves securing a 50 per cent interest in the T. P. & W.?

A. Well, on the condition that we obtain a 50 per cent interest in the T. P. & W., it is the purpose of the Santa Fe to advise all of its solicitation force that they will place Lomax on a parity with Chicago in their solicitation efforts. Now, I mean by that that they will tell a shipper with respect to any traffic that moves over the Santa Fe and they [fol. 222] ask what junction we want it for, we will say we will take it either to Lomax or to Chicago. It doesn't mean that we are going to solicit for—period. I will stop right there.

Q. Do you think this will benefit the T. P. & W.?

A. Well, it is pretty obvious that as the resistance of the Santa Fe by placing Lomax on a parity with Chicago lessens to some degree that the T. P. & W. solicitors ought to be in a better position to pick up some traffic that otherwise might move by our line through Chicago. Now, we are not doing this from an eleemosynary standpoint because we figure as an owner of the line we want to build it up to the maximum degree, and for every car that they may short haul us from Chicago, I would say the more the line is used, the more prominent it becomes in the minds of the shippers and in the experience of the shippers, that they are bound to pick up a relative, maybe not exactly the same, but a

relative amount of traffic from the St. Louis gateway, because the more shippers who use this route I am satisfied that the degree of satisfaction will be such that the T. P. & W. will be a more potent force in soliciting traffic not only from Chicago but also St. Louis. I think in the overall picture, we are putting chips in the pot, which will come back to us in dividends.

Q. In other words, there would be both the revenues, dividends, earnings from the T. P. & W. 50 per cent—

A. (Interrupting) That is correct.

[fol. 223] Q. And this other factor?

A. That's right.

Q. In actively supporting the T.P. & W. route, will the Santa Fe work in favor of the Pennsylvania and against the other eastern railroads because of its half interest in the T. P. & W., because of the Pennsylvania's half interest?

A. Mr. Thomas, every railroad man in this room knows that any railroad that attempts to dictate or advise a shipper as to a railroad that he should use beyond his own termini just gets himself in trouble. He has enough trouble trying to solicit traffic over his own line. If I go to a shipper and say that when it gets to Chicago I would like to have you send it over the Erie, he says, "What business is that of yours?" He just doesn't tolerate it. It isn't a fact that we can't do it and don't do it, but we also must maintain neutral friendly relations with all of our eastern connections. It would be suicidal for the Santa Fe to try and pick out one carrier, one eastern carrier and work preferentially with it, because not only—we'd have the whole eastern railroad segment of the industry reciprocating in that respect and hurting us.

Now, you say how would they hurt us. This solicitation business is a rather peculiar business. Our railroad solicitors in the eastern territory must depend on the good will of the solicitors of the railroads that originate traffic in the area, they must depend upon the goodwill of the station [fol. 224] agents of those railroads because they are the railroads that know when traffic is originating and where it is going. We don't know.

Q. In other words, you get information that enables your solicitors to work?

A. We get information, as long as you are friendly the eastern railroads will be helping you in the respect of telling you that here is some traffic you can go out and get. They might not tell the Santa Fe alone because they are playing a neutral game with everybody else. But, if, for instance, the Nickel Plate found that we were favoring the Pennsylvania and hurting the Nickel Plate, I am sure Mr. Lynn White or Mr. Silwit would very promptly see that his solicitors were advised that they should give the cold shoulder to the Santa Fe where we are trying to get business.

Q. Those gentlemen are executives of the Nickel Plate?

A. Yes, sir, and very good ones.

Q. Have you anything further to say about the solicitation policy, Mr. Duffy, before we go on with your testimony?

A. I think I have covered it.

[fol. 225] Q. Let's talk about the other matter that Mr. Gurley said you would discuss, that is, the location of industries on the T. P. & W. First, tell me what is the importance to a railroad of locating industries on its line.

A. I don't know of any factor that is more important to a railroad than to have an industry located on its line. Once the industry is located on its line, it must depend upon that carrier for its car supply, there is daily contacts between its people and the railroads, not only with respect to service, the industry looks to the railroad that serves it for help in rate matters, and if any railroad treats its industry halfway decent, it is bound to receive a linehaul on a preponderant amount of that industry's traffic.

Q. What is the situation of the Santa Fe with respect to industrial land in the Chicago area?

A. Unfortunately the Santa Fe came into Chicago rather late and we came in from the west, and we came through an area where there was very little vacant industrial property. Whatever little property we had is pretty well gone, and the Santa Fe in the Chicago area today really suffers from a lack of industrial property. I think in the Chicago area alone we only have about 60 acres and some of that is pretty well cut up. A large part of it is cut up by the canal property that is owned by the state under which our

title is in jeopardy and it is bisected and makes a rather difficult property to sell to shippers. It's true we have [fol. 226] attempted to or we do have property out at Willow Springs where the General Motors plant is located, property in the neighborhood of 500 acres. That property is pretty far out, and that again pretty well requires an awful lot of work before it's usable by industries, and so far outside the General Motors plant we haven't been able to interest anybody in it. In other words, we are one of the few Chicago railroads, I think that are in a rather poor position with respect to industrial property. Now, we haven't sat on our hands and liked the situation, we have looked around and looked around and tried to find ways and means of acquiring property that we could use, but so far we just haven't come up with the property because it's not in the nature of things to get it.

Exam. Albus: Let us take a 10-minute recess.

(Short recess)

Exam. Albus: The hearing will please come to order. We will continue with the direct examination of Mr. Duffy.

Mr. Thomas, please.

By Mr. Thomas:

Q. Mr. Duffy, we were talking about location of industries. I want to ask you now what will be the attitude of the Santa Fe toward location of industries on the T. P. & W. if the Santa Fe is permitted to acquire a 50 per cent ownership of the T. P. & W.?

A. It will be the attitude of the Santa Fe to try to help the T. P. & W. in every respect to locate industries on its [fol. 227] line. I should say, I should inform the people here, that the T. P. & W. is in the fortunate situation of having large acreages of potential industrial property, not only at Peoria but along its railroad, and they have very few industries on its line. So far as the Santa Fe is concerned, it does it, not only because we are going to be a half owner and accrue benefits, but also the selfish reason we have limited industrial area in Chicago which makes it much more attractive to us to help the T. P. & W.

Q. The result would be you would hope to secure traffic from those industries?

A. Well, there is no question about it, in other words, the industries that we show naturally would be industries, and when I say show, we not only show them in Chicago but at Galesburg and places like that, and those industries that have traffic to western destinations. That doesn't mean they won't have traffic to eastern destinations but we don't get very much enthused about industries that don't have traffic that goes to our territory.

Q. Even as traffic that went to eastern destinations you would benefit, would you not, as a half owner of the T. P. & W.?

A. That is right. I would like to amplify the fact that the Santa Fe has a large industrial department. We have an assistant to the president who is in charge of locating industries and we are constantly in touch with potential in- [fol. 228] dustries that want acreage and there is no question in my mind that if we showed all of the industries that come to us seeking industrial property in which we think that it would be to our interest to show them property to include the T. P. & W. acreage as well as our own acreage that it would benefit the T. P. & W. substantially, particularly as where they have very little local traffic, and where if they develop that local traffic it will add to their stature immeasurably as well as to the revenue that they obtain.

Q. Would you like to say something about car supply as related to the location of industries?

A. Well, I am speaking generally now, and I have no knowledge of how the T. P. & W. has found the situation, but certainly an industry is more interested in locating on a railroad where it may be reasonably assured of a good car supply than locating on a railroad where there may be doubts about that matter, because for a number of years now under certain times of the year cars have been scarce and a railroad that doesn't own the equipment is not in a position to service its industries in the way it should, and industries are very touchy about that situation.

Q. Do you think the policy that Mr. Gurley discussed about car supply in relation to the T. P. & W. if the Santa

Fe was a 50 per cent owner would help the location of industries on the T. P. & W.?

[fol. 229] A. There is no question about it.

Q. Did you want to say something further about an illustration you gave a while ago with reference to the Nickel Plate in discussing solicitation policy?

A. I just want to call attention that my good friends of the Nickel Plate indicated I did them an injustice and I want to correct that immediately. On page 1 of my Exhibit H-10 I did not complete the interchange at Chicago that we have with the Nickel Plate, in addition to the interchange that is shown on the exhibit we also interchange through—with the Nickel Plate through the Illinois Northern, you might indicate that.

Q. Would you simply add the name of the Nickel Plate at the top of that column there?

A. That's right. Where it says Illinois Northern. It says C. & W. I. railroad, Illinois Northern. Where does it say Nickel Plate?

Q. It says via belt railway, it says N. Y. C.

A. It says direct up there, it says C. & W. I. railroad, Illinois Northern. If you put Nickel Plate in there, that means through the Illinois Northern. We also handle perishables with the Nickel Plate, with the I. H. B., Indiana Harbor Belt, and that should be added. I apologize to the Nickel Plate for omitting that.

Mr. Witt: No apology necessary, Mr. Duffy.

By Mr. Thomas:

Q. Is there anything further you have to say, Mr. Duffy?

[fol. 230] A. No, sir.

Mr. Thomas: That is all.

[fol. 231] Exam. Albus: You may cross-examine, please, Mr. Wheeler first.

Cross examination.

By Mr. Wheeler:

Q. Does the Santa Fe experience car shortages at any time throughout the year, Mr. Duffy?

A. Yes, sir, the Santa Fe, like a lot of railroads, as I said before, has experienced car shortages at times throughout the year, but I would like to add to that if all the railroads in the country had brought their car supply up to the AAR requirements and all the car rules, car interchanges rules, had been complied with, the Santa Fe would not have a car supply shortage, because we own enough cars to take care of the requirements of the shippers on this line.

Q. Whether the others followed AAR requirements doesn't give you any more cars—

A. (Interrupting) It certainly does, because as the total cars go up, those lines aren't deficient and won't hold our cars and we will get our cars back in greater numbers.

Q. I think you misunderstood me. It doesn't change the situation as of now?

A. No, sir, unfortunately.

Q. You do have shortages, and regardless of what that is attributable to—

A. (Interrupting) I have so admitted.

Q. (Continuing) —You do have shortages on your line? [fol. 232] A. I have so admitted.

Q. Are you familiar with the situation on the M&StL?

A. No, sir.

Q. With respect to car supply or car shortages?

A. No, sir.

Q. Are you familiar with the situation on the TP&W?

A. Only by hearsay. I understand that at times they have suffered car shortages.

Q. Do you know whether those car shortages were in greater number than the car shortages, average daily car shortages, on the Santa Fe?

A. I do not know.

Q. Do you know what industries located on the TP&W have found this car shortage harmful?

A. I do not know. I assume that any industry on the TP&W that suffered a car shortage would find it harmful.

Q. But do you know specifically any industry?

A. No, sir.

Q. Would it be your policy during a period when the Santa Fe was short of cars to take cars away from industry that was shipping freight over the Santa Fe from Cali-

fornia to Chicago, to take cars away from them and divert them to a shipper on the TP&W that was going to ship, say, from Peoria to Effner?

A. I don't know.

Q. You don't know?

[fol. 233] A. No, sir.

Q. Who would know that?

Mr. Thomas: Mr. Gurley testified about that.

A. Under those particular conditions, I think somebody in the higher echelons in the operating department will have to make that decision. After the consultation of all of us we'd reach the best conclusion we could under all the circumstances that then existed.

By Mr. Wheeler:

Q. You wouldn't tend to favor the shipper that gave you the longest haul?

A. We don't always do that.

Q. Do you normally do that, all other things being equal?

A. I would say that we have no set rule along that line. I say we meet the car shortage situation at every point on our line and in the most equitable and in the fairest way we can and what we do under given circumstances depends upon the circumstances.

Q. What are some of these equitable situations that you mentioned?

A. Division of cars.

Q. On what basis?

A. You are getting me in a situation that you will have to refer to Mr. Jim Mahoney. I know what our general policy is; I know how they do it and how they carry it out, but I would rather have you ask Mr. Jim Mahoney who is [fol. 234] an expert along those lines.

Q. Mr. Duffy, you spoke of location of industry, and you named some place outside of Chicago, Wildwood—

A. Willow Springs.

Q. And you indicated you had some considerable difficulty in locating industry on tracts of land you—

A. I said we had difficulty in locating industry. I didn't say it was attractive land.

Q. I said "a tract of land," t-r-a-c-t.

A. I beg your pardon. The answer is yes.

Q. Why have you encountered difficulty?

A. Well, I don't know that I can answer that question. I would say, first of all, the number of industries that we might have shown the land don't want to go out that far, in relation to the city, that is, the trucking back and forth, a number of industries don't like the access, and there are many factors. I just haven't talked to all industries. The main fact is that we haven't located anyway, let's put it that way.

Q. Is Peoria closer to Chicago than Willow Springs?

A. No, but that doesn't mean that an industry that would not go to Willow Springs would not go to Peoria, because, after all, they are looking at the relationship of the city in respect to trucking and hauling and that sort of thing.

Q. What are these considerations that industries usually take into account when they are thinking about locating a new plant?

[fol. 235] A. Well, I don't like to speak for industry, but I might name a few that occurs to me. First of all, they like an industry that is adjacent to a good labor market, I mean land that is adjacent to a good labor market.

Q. Let's take that now. Is Peoria known to be a good labor market?

A. I don't know.

Q. You haven't investigated that factor?

A. No, sir, I have not.

Q. Go ahead.

A. They like to locate on land where power and water is available. Do you want me to stop when I answer each one?

Q. Yes, sir. Have you investigated that situation with respect to Peoria?

A. No, sir.

They like to locate on land that has good railroad service and good highway service.

Q. Have you investigated that specifically with respect to Peoria?

A. I have not. I have seen the acreage of the lands along the TP&W, but I made no investigation specifically along those lines.

Q. Let me ask you this, Mr. Duffy, do you know whether or not the TP&W has better industrial development land available to it than the other railroads that serve Peoria? [fol. 236] A. Oh, no, I don't know anything about the relative situation. I merely said that they have good lands.

Q. I believe you indicated that you would be interested in an industry, more interested in locating an industry that would ship over your lines than you would one that would ship east, for instance.

A. I don't know that I wanted to leave that impression exactly. I would say that so far as we are concerned, along our own railroad we certainly would not show an industry that had no tonnage over our railroad and only ship east out of Chicago because, after all, it wouldn't mean anything to us. I said that at Peoria we would show an industry land or would show an industry that shipped west land, but I don't want to imply that we wouldn't show an industry that shipped east lands at Peoria, because they were in a little different situation in Chicago because an industry that shipped east at Chicago wouldn't give us anything, but an industry that shipped east at Peoria at least would contribute to the TP&W and we would benefit indirectly. We would prefer to have an industry that shipped in both directions.

Q. I take it from your answer, then, you would be most interested in locating industry at the points on your lines from the point at which you would get the longest haul?

A. Well, you know, you just can't cut it so fine with these industries. You have to look at their total tonnage and [fol. 237] their total potential revenue. It might not be a long haul. They might have quite a bit of tonnage for a short haul. We look at the total over-all picture.

Q. I don't want to quibble about this.

A. No, I am not quibbling with you, either.

Q. Let's take a concrete situation and see if we can nail this down. Supposing you had an industry that was going to ship substantial tonnage to the West Coast, would you be more interested in locating that industry in New Mexico or in Illinois, assuming that you can say to that industry where they could locate?

A. It would be very obvious that we would be more interested in locating the industry in Illinois; but on the other hand, the primary interest is where the industry wants to locate territorially, and that we wouldn't have much to say about.

Q. I understand. But, as a choice of locations, you would prefer and would seek to influence the shipper to settle on the location that would give you the longest haul, would you not?

A. On the basis, as you put it, if we had the choice and we had the industry that would say, "I will either go to New Mexico or Chicago, where would you go?" I would tell them I'd like to have them go to Chicago.

Q. Now, wouldn't the same things be true, I have looked at your divisions and it appears that you get a substantially [fol. 238] greater division to Streeter than to Lomax, is that correct?

A. That is correct.

Q. So that you would rather locate an industry at Streeter than you would to locate it at Lomax?

A. There is no doubt about the fact, I wouldn't quibble with you at all, that if we could locate the industry at Chicago we'd prefer, then, to locate it on the TP&W, but, on the other hand, it must be entirely clear that our ability to locate industries in the Chicago area is limited because of the situation with respect to our industrial property, so therefore we don't always have the choice, and I merely say that industries that are looking for industrial property in the fotal, all the area, we don't want to put our eggs in one basket, we won't put our eggs in one basket, we won't confine it to Chicago, the Chicago area, we show them Galesburg and we show them Peoria.

Q. Now, supposing this industry is located, this new industry or additional, in addition to an existing industry, on your line, is located at Streeter, will you have to divide the revenue with any other carrier that you receive shipments from, say, at an off-line point of yours in California?

A. Pretty obviously we wouldn't.

Q. That would not be the case or not be true of an industry located on the TP&W, would it, other than at Lomax?

A. You mean other than at Lomax, no; if it located on the [fol. 239] TP&W and it shipped to a local point on the Santa Fe, we'd have to divide with the TP&W and part of it we'd get back.

Q. And part of it would go to the Pennsylvania under your proposal?

A. That is right.

Q. So it would be to your greatest economic advantage to locate the industry on your own lines as against the TP&W?

A. I am not quibbling about that fact. I admitted it before. If we had the choice and had a clear-cut ability to locate an industry on our line, we'd try to do it, but I have tried to tell you that we'd be very foolish to put our eggs in one basket in showing potential industries acreages that are available to it because of the fact that our acreage in Chicago is limited, and the industry, if we only show it one, they'd go away and leave it. We'd rather show them Galesburg and Chicago. We want to get them someplace where we'd get revenue.

Q. Mr. Duffy, in view of that fact, why didn't you buy the TP&W by yourself rather than split it with somebody else?

A. Well, that's only one factor, Mr. Wheeler. After all, Mr. Gurley has indicated all the factors that led him to believe that the inclusions of the Pennsylvania would be good. What I am talking about here is just one of the factors that we are indicating by which we can be beneficial to the TP&W as an owner.

[fol. 240] Q. Mr. Duffy, I was left a little confused with respect to your proposed policy with respect to the solicitation of traffic via the TP&W through the Lomax gateway.

A. Yes, sir.

Q. I would like to try to put it in my words—

A. All right, you try.

Q. (Continuing) —to see if we have a meeting of the minds.

Do I correctly understand your testimony to be that if you get 50 per cent ownership of the TP&W you will not solicit Chicago versus Lomax?

A. I will not solicit Chicago preferentially over Lomax, and that is what you mean, I assume.

Q. So that the TP&W's own solicitation would be relieved of the Santa Fe pressures for the long haul for Chicago?

A. Yes, sir. Could I add to that?

Q. I'd like to go one step further.

Mr. Thomas: Let's let Mr. Duffy finish his answer before you ask another question.

Exam. Albus: This is still the question.

A. I may be going beyond it if I answer, but go ahead, I will let my answer stand.

Exam. Albus: Very well.

By Mr. Wheeler:

Q. And another aspect of that is that you will not actively solicit Lomax as against Chicago but only as against Kan- [fol. 341] sas City or other Missouri gateways?

A. Well, I said that we would not solicit Chicago preferentially over Lomax. We won't solicit Lomax preferentially over Chicago. We will solicit both Chicago and Lomax over the interior gateways. If that is what you are getting at.

Q. I'd like to break that down a little more and see if I understand it. You will regard, or you do regard, at the present time the TP&W as an alternative which you can offer to shippers to, for instance, the St. Louis gateway?

A. That is right.

Q. Now, Mr. Duffy—

A. (Interrupting) Of course, we can offer Chicago, too, but we are not too successful at times.

Q. When you can't get them to go to Chicago, then you fall back on—

A. (Interrupting) We fall back on everything.

Q. Now, what about Nemo? First of all, would you please state for the record what Nemo is.

A. Nemo is our interchange with the M&StL, which is indicated on my map.

Q. And that comes into the TP&W interchange with interchange with the TP&W at Peoria?

A. That is correct.

Q. Now, what is your policy with respect to Nemo at the present time?

[fol. 242] A. I think it is greatly the same as it is with respect to the TP&W, approximately the same. I would say the same, if you want.

Q. Now, Mr. Duffy, if your application is granted, Nemo will cease to be on a parity with Lomax, will it?

A. That is correct, so far as I have indicated our solicitation policy.

Q. Yes.

A. Servicewise and every other wise they would be.

Q. I believe you stated that—oh, pardon me. Are you a co-owner of the Belt Line in Chicago?

A. Yes, sir. I think one of 13. I may not be right, but that is my recollection.

Q. So that you participate in any revenues that are paid by the Belt Line?

A. Well, we participate if there is any profit.

Q. You'd have to participate in making up any losses, too, wouldn't you?

A. That is correct.

Q. Do you make any effort to locate industry on the Belt Line?

A. No, sir. Let's put it this way—I beg your pardon. I am too fast—I would say this, that if an industry can't be located on the Santa Fe in Chicago we do show a piece of property on the Belt Line, we would much rather have it on the Belt Line in Chicago than on a competitive railroad.

[fol. 243] Q. There will be a loss to the extent that you divert traffic to Lomax from Chicago, there will be a loss of revenue to the Belt Line, will there not?

A. I think, if you will rephrase your question, I will agree with you, and that is, I say we will not divert it, the TP&W will divert it.

Q. You mean you are not going to solicit for the Lomax gateway?

A. I said we will tell the shipper he can either go to Lomax or Chicago—let's get this straight, when we put ourselves in the position that we will take a shipment either at Lomax or Chicago, we leave open to the TP&W the chance of getting that traffic, the New York Central and all the railroads serving Chicago, the Erie, which doesn't serve St. Louis, we leave open the Nickel Plate, the CM, the L

linois Terminal, everybody in, participating in, the traffic, in other words, we don't have anything to say whether it is going any other railroad beyond Chicago or beyond Lomax, that is traffic that will be solicited by the various railroads serving Chicago and connecting with the TP&W, and those checks and balances will pretty well say whether the traffic goes to Lomax or to Chicago, in other words, the TP&W isn't going to take all of our traffic over the Lomax gateway, because we have these Chicago railroads that are going to see that a great part of it continues to flow to Chicago. I want to get that clear in the record.

[fol. 244] Q. I wish it were clear in my mind, Mr. Duffy.

A. Well, I will be very glad to—

Q. What percentage of your traffic now goes to Chicago?

A. About 60 per cent.

Q. What per cent goes over the TP&W?

A. Well, I have some figures, and I don't want to have you hold me down to them because there are flaws in them, in other words, they were made up by cumulation and some of our people misinterpreted as to what we wanted, but I can give you an approximation.

Q. All right.

A. Our total eastbound and westbound via Lomax, about 10 per cent. I don't want to be held down to these figures as being accurate.

Q. So your approximation would be that of the traffic, the east-westbound traffic, it moves to Chicago now on a ratio of about six to one?

A. That is right.

Q. Over the TP&W?

A. That is right.

Q. Now, to the extent that your present solicitation policy results in the diversion of traffic from Chicago to the TP&W, the Belt Line Railroad will suffer a loss in revenues, will it not?

A. Well, to the extent—let's get this straight, a lot of our [fol. 245] traffic at Chicago is not interchanged through the Belt. If you will look at my exhibits you will find we have direct connections with the—well, right now, as of now, I am not in position to tell you, but I will tell you this, we do have direct connections with a number of railroads in

Chicago and traffic does not flow through the Belt in all cases. Subject to that reservation, I would say that any traffic that otherwise the Belt might get, that would flow over the TP&W because the TP&W does a better solicitation job, the Belt Line would lose that revenue, if that is what you want to know. Incidentally, when we made that agreement with the New York Central it was also made with the Belt to put Streeter on the same parity as Chicago. The same conditions applied, but we did it nevertheless.

Q. Are you familiar with the term "incremental dollar" as used in the railroad industry?

A. Well, I don't know how you use it. I'd rather have you tell me what you mean by it and then maybe I will agree or not agree.

Mr. Broker: Excuse me, Mr. Examiner. We can't hear the questions or answers very well.

Exam. Albus: Let's speak up a little, please.

By Mr. Wheeler:

Q. Are you familiar with the fact that in the railroad industry the last dollar that you take in, that of the last dollar that you take in, a far greater share of it goes to [fol. 246] profit than the first dollar that you take in.

A. Well, you are getting into a stage of economics that I would prefer not to indulge in.

Q. Are you familiar with the fact that if you took revenue away from the Belt Line Railroad, that is, revenue at the top, it would result in a disproportionate loss dollarwise to the Belt already in net revenue?

A. I don't know that I fully agree with you. It may very well be certain economists reach that conclusion, but I am not going to get into that phase of economics or railroad cost accounting.

Q. Mr. Duffy, can you tell me how many cars the Santa Fe interchanges at Chicago, east and westbound?

A. I think roughly, I don't know whether these are through cars or not, but roughly I would say at Corwith and McCook it would be close to 300,000 cars, that is, in 1955.

Q. Now, what is your total interchange at Lomax?

A. I am going to give you another statement where I said, the one I have shows 8.1 and the other one shows 9 per cent, so I took the 10 per cent figure without knowing which one was correct. Based on my reference to the 300,000 cars at Chicago, which indicates that it is—I would say that the number of cars at Lomax is 35,321 in 1955.

[fol. 247] Q. Mr. Duffy, what effect do you think your new solicitation policy will have on the Nemo gateway?

A. I don't think it will have any. When I say "any", I mean, let's put it very little.

Q. Well, then, Mr. Duffy, why did you think your policy will help Lomax?

A. Well, I don't think that the TP&W is going to get any appreciable amount of cars away from the M&StL, and I will tell you why. Any of the cars that you get between Peoria and Nemo come within the category of those factors that I said that develop traffic for a railroad, and that is solicitation and friendship, and I don't think that our placing Chicago, or Lomax on a parity with Chicago, is going to have any effect on the friendship that Mr. Nelson and a lot of the solicitors have with a lot of these industries through which you have persuaded them to give you a share of the traffic. Now, that is not inconsistent, in my opinion, with the theory that we are going to get more cars away from the St. Louis gateway. I think that the cars that I am talking about are the cars that come from these larger railroads, railroads in the West, when you come to a railroad like yours that participates in that east-west traffic, Peoria to Nemo, I think most of it is purely on a friendship basis.

Q. Now, if it is not on a friendship basis but on a solicitation basis—

[fol. 248] A. Well, they are interchangeable in my book.

Q. They are interchangeable, on a service basis?

A. I am not talking about a service basis. I don't think those cars fandamentally are on a service basis.

Q. Well, if you should be wrong, and—let me ask you a qualifying question, Mr. Duffy. Have you ever worked for the M&StL?

A. No, sir.

Q. If you should be wrong and the movement of those cars is on a service basis, don't you believe that your acquisition of the TP&W will adversely affect the flow of cars through the Nemo gateway?

A. If I should be wrong, why, those conclusions follow, but I am pretty certain I am not wrong.

Q. That is competitive traffic?

A. Oh, yes, sir, it is competitive to a degree, yes, sir.

Q. Well, it is all bridge traffic, so it has to be competitive, doesn't it?

A. I am not quarreling with you.

Q. Mr. Duffy, do you have the information with respect to the solicitation forces and the amount of money, revenue that is devoted to the solicitation each year by the Santa Fe?

A. Well, I don't have it handy. I would say this, that if you want to find out where our offices are, all you have to do is look at the Railway Guide, that shows the off-line and division offices of all railroads. If you are talking about [fol. 249] the number of employees that we have in solicitation forces then we get into a quandry, a lot of them are joint, a certain number of passengers only, and in the offices themselves many of them are not solicitors but service agents. We'd have to develop that information. I don't have it handy.

Q. Do you have the annual amount that is spent by you and your department annually and the number of employees that are under you, that are in your department of the Santa Fe?

A. Well, we have it but I don't have it right with me.

Q. Could you supply that for the record?

A. If you will talk to Mr. Starr Thomas.

Mr. Thomas: The Examiner has suggested that we handle this off the record. He is asking for the same thing again.

Exam. Albus: Yes, try to get together on it.

By Mr. Wheeler:

Q. I believe you said in your direct testimony that eastern roads were better off division-wise Peoria as against Chicago?

A. Generally speaking.

Q. That is not true of the Pennsylvania, is it?

A. Are you talking about Effner?

Q. Effner.

A. Well, I think I'd rather have you ask the Pennsylvania questions about that. They have some ideas about it that they will tell you.

Q. Now, you made the statement, I'd like to have—

[fol. 250] A. (Interrupting) Let's get the specific divisions, then we will have it. That's the best way I know. If you are talking specifically, I'd rather have the specific divisions. Where do you want to talk about?

Q. You just made the general statement—

A. (Interrupting) You said generally.

Q. I want to know whether or not the Pennsylvania is an exception.

A. Well, let's take Effner all the way down the line and we will get the facts. Let's take Effner transcontinentally first, versus Chicago.

Q. What page are you on?

A. I am on page 5, eastbound, Effner and Chicago, Chicago is half—if we look at page 5 and take Pittsburgh to transcontinental, you will find that the eastern lines get sixteen and a half per cent through Chicago and sixteen per cent through Effner. Now, I will take any other one.

Q. Just a moment. What is the one right below that?

A. I will take anyone you want.

Q. Is that Peoria?

A. Peoria, 20 per cent.

Q. Would that apply to the Pennsylvania?

A. Not if it went through Effner, they'd get 16 per cent.

Q. Supposing it didn't go through Effner?

A. And it went through Peoria?

[fol. 251] Q. Yes, sir.

A. Any railroad that took it through Peoria or group of railroads would get 20 per cent.

Q. Are you familiar with the fact that the Pennsylvania moves a substantial amount of traffic into Peoria over that route, transcontinental traffic?

A. I am not familiar with the traffic, the flow of traffic, over that route. The Pennsylvania is, and I'd rather have them tell you what it is.

Q. Isn't it the general rule—referring to your page 5, Mr. Duffy, of your exhibit, page 10—isn't it true that with the exception of the transcontinental traffic, the division of the eastern carriers is greater via East St. Louis and via Peoria?

A. Oh, I said that. But I want to amplify that the difference is much greater east St. Louis than Chicago.

Q. And Effner is the lowest in all other instances?

A. Whatever the facts show, I am willing to take.

Q. Referring, Mr. Duffy, again to your other testimony, the primary competition of the T.P.&W. is to the St. Louis-East St. Louis gateway, the Chicago gateway, and the Kansas City-Decatur gateway, is it not?

A. I would say the primary competition—well, let's say yes.

Q. Mr. Duffy, have you discussed—

A. (Interrupting) No, I say the competition is there. I am not saying it is equal: I mean there might be differ-
[fol. 252] ences in shades. That's the reservation I made on it.

Q. All right. Have you attempted in connection with this operation at Streeter, have you attempted to enter into an arrangement with the New York Central for the acquisition of part of that line into Streeter?

A. Oh, no, sir. We just happened to have a good connection there, and we are just maintaining it. The New York Central says they can get better service through Streeter than Chicago, and we say that's what we are for is service, we will cooperate.

Q. Do you have an explanation for your different policy in connection with the T.P.&W. at Lomax?

A. Oh, we are getting into a realm that has no connection one with the other. In other words, in one case we have a situation where the New York Central has a connection, it is a big railroad, it is not for sale, there is no relation with the situation of the T.P.&W.

Q. I believe you said on your direct testimony that you don't, the Santa Fe doesn't now serve Peoria. Now will that situation be changed if your application here under consideration is approved?

A. Well, so far as the Santa Fe itself is concerned I see no difference tomorrow than with the situation that exists

today. I am speaking about the Santa Fe Railroad as an operating railroad.

Q. Do you believe that the T.P.&W. will work, will solicit [fol. 253] more for you, for the Santa Fe that is, if it is controlled by you than it does now?

A. No, sir, I do not. I think the T.P.&W. would there again commit a very—would be lacking in judgment, and we as owners, if we had anything to do with that policy would be lacking in judgment to effect any such thing. The T.P.&W.'s success is founded not only in the traffic of the Santa Fe or the Pennsylvania but it is founded on the fact that it has junctions with the Burlington, with the Rock Island, with the C.I.M., the Illinois terminal, the New York Central, the Nickel Plate, and any time it was guilty of preference, even with its owners under an independent operation, it wouldn't be long before the T.P.&W. would find very little cooperation with any of the other railroads that now interchange with it.

Q. Now, supposing that happened—

A. (Interrupting) Laci of, all right.

Q. Supposing just what you say happens, supposing the T.P.&W. does start soliciting for the Santa Fe and the Pennsylvania much harder than it does now, that would have a detrimental effect on these roads that you have named, would it not?

A. It is hard for me to indulge in that assumption, but if I have to indulge in it the answer conclusively, the answer is yes.

Q. Mr. Duffy, you did not include the M.&St.L. in the list of railroads interchanging with the T.P.&W. Are you [fol. 254] aware of their position with respect to interchange with the T.P.&W. relative to other railroads?

A. Well, if I didn't include them in my over-all statement, pardon me, and I will have it understood that I meant to include them.

Q. You are aware, are you not, that they are the third—

A. Yes.

Q. (Continuing) —largest road from the standpoint of interchange with the T.P.&W.?

A. I apologize. It wasn't intentional.

Mr. Thomas: I think the record ought to be corrected on that.

The Witness: I thought he meant to say I didn't talk or didn't include the M.&St.L. when I mentioned all these other railroads with which the T.P.&W. interchanges.

Mr. Thomas: He asked if you didn't know that the M.&St.L. was the third largest interchange with the T.P.&W.

The Witness: I say whatever the figures are I don't know.

Mr. Thomas: It isn't the fact?

The Witness: If you will show me the figures, I will be very glad to put them in the record. They are in the record, I think.

Exam. Albus: They are in the record.

The Witness: I don't keep it all in my mind.

By Mr. Wheeler:

Q. You state that you don't have favored connections [fol. 255] with other railroads, is that correct?

A. I said we don't have any favored connections with eastern railroads.

Q. Aren't you making one with the T.P.&W.?

A. No, sir, I don't think we are making any with the T.P.&W., any more than we—let's put it this way, if you call—may I withdraw my answer.

If you call placing Lomax on a parity with Chicago, favoritism, then we are favoring the T.P.&W., but we are favoring them under the conditions whereby we are half owner. I said that we don't favor any eastern railroad or any railroad where we have no such ownership.

Q. Now, to the extent, to that same extent you are also favoring the Pennsylvania when you enter into this arrangement, are you not?

A. I am not entirely sure that we do. In other words, as I tried to tell you before, that while the T.P.&W. might solicit more traffic over the T.P.&W., that doesn't mean that it is going over the Pennsylvania. It means it might go over the Nickel Plate, it means it might go over the New York Central through Shelton, it means that it might go through the I. C., or the Illinois Terminal, through the

C.I.M., through Peoria, it will go wherever the railroad has a junction with the T.P.&W. that is able to solicit that traffic as part of the through route.

[fol. 256] Q. Well, at least to the extent that the Pennsylvania participates. Well, in the ownership of the T.P.&W., you are making them a favorite connection by placing Lomax on a parity with Chicago, are you not?

A. Well, I think we are mixing up two things. If you talk about the fact that if we make any profits on the T.P.&W. as to whether the Pennsylvania shares in that, the answer is obviously yes, but that doesn't mean that we are putting the Pennsylvania as a railroad or as a connection in any favorite position over any other railroad.

Q. You say that despite the interchange figures that have been introduced in Effner?

A. Those interchange figures were brought about by the conditions I referred to whereby the Pennsylvania either originated the traffic or is able to solicit it in competition with other carriers, and in conjunction with the T.P.&W. It certainly wasn't due to any effort on the part of the T.P.&W. [illegible]ve preference to the Pennsylvania over the Nickel Plate.

Q. Have you made any estimates of the effect of your new policy on the Lomax gateway?

A. I don't think it is susceptible to an estimate.

Q. Have you made any as to the effect of your new policy on the Nemo gateway?

A. Well, I just told you my opinion about it.

Q. That you have made no estimates or no study of it?

[fol. 257] A. When I say you are not appreciably hurt I don't need an estimate. I can't tell you the number of cars if that is what you mean.

Q. This becomes a guess, does it not?

A. It is informed judgment, a little bit more than a guess.

Mr. Wheeler: I have no further questions.

Exam. Albus: We will take a 10-minute recess. This time we mean 10 minutes.

[fol. 258] Exam. Albus: The hearing will please come to order.

We will continue with the cross-examination of Mr. Duffy. Mr. Cassell, please.

Mr. Cassell: No cross.

Exam. Albus: Mr. Broker?

Mr. Broker: No cross-examination.

Mr. Martin: No cross.

Exam. Albus: Mr. Wheeler?

Cross examination.

By Mr. Wheeler:

Q. Your Exhibit H-10, page 1, shows a direct interchange in Chicago with a number of railroads, as to that direct interchange is any charge incurred?

A. I don't think so. If my answer is wrong, I will tell you.

Q. So it would be the interchange via the belt—

A. (Interrupting) I was talking about the belts.

Q. The belts?

A. Yes.

Q. Mr. Duffy, you testified, I believe, that junction points are not indicated by shippers on a substantial part of the traffic?

A. That is correct.

Q. As to that part of the traffic, as to that traffic, then, there would be your change in solicitation policy would have no effect with respect to the Lomax Gateway?

A. No, because we send it over the Lomax Gateway, any-[fol. 259] way, if it is routed T. P. & W. without a junction.

Q. And if it is not routed T. P. & W., you would take it to Chicago?

A. Well, I would say yes.

Mr. Wheeler: I have no further questions.

Exam. Albus: Is there any further cross-examination of Mr. Duffy?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Thomas: Yes.

Exam. Albus: Mr. Thomas, please.

Redirect examination.

By Mr. Thomas:

Q. Mr. Duffy, I have a couple of questions about car supply and car shortages. Do you know whether or not car shortages tend to appear on the Santa Fe and T. P. & W. at the same time or different times?

A. I think when you have car shortages, the car shortages are pretty well spread over the country and I would say the same time.

Q. How about the grain movement or—

Mr. Wheeler: Mr. Examiner, I object to this question on the ground that Mr. Duffy has previously stated that he has made no study as to the times when the car shortages—

Mr. Thomas: I will withdraw the question.

Mr. Albus: Thank you.

[fol. 260] By Mr. Thomas:

Q. Mr. Wheeler asked you some sort of hypothetical question which assumed that Nemo received its traffic, as I understood it, in relation to Lomax, its interchange business with the Santa Fe as in relation to the T. P. & W.'s business with the Santa Fe at Lomax, that was the point under discussion, and I think he said if that's not solicitation but service that results in Nemo getting the traffic that it does get today, and in that hypothetical situation he asked you whether the change in Santa Fe policy in solicitation in putting Lomax on a parity with Chicago would affect the traffic moving through Nemo. Now, is the service, as far as the Santa Fe is concerned, going to be changed, Nemo versus Lomax, under our policies?

A. No, sir.

Q. So the service would be the same?

A. That is correct.

Q. And our solicitation policy wouldn't have any bearing on service?

A. Well, if the—

Q. (Interrupting) That is a different subject, isn't it?

A. It is a different subject. In other words, if you are talking about service as a factor, therefore there is no change.

Q. In other words, if Nemo gets its business or a service basis and the service isn't changed, would you expect Nemo to lose business?

A. It's hard for me to see that.

[fol. 261] Mr. Thomas: That is all.

Recross examination.

By Mr. Wheeler:

Q. As I view the Nemo-Lomax situation, Mr. Duffy, don't you solicit the longest haul you can get on the Santa Fe?

A. Subject to the qualifications that I have mentioned and other qualifications—

Q. (Interrupting) Subject to qualifications I mean.

A. That's right.

Mr. Sheeler: That is all.

Exam. Albus: Thank you very much. You are excused, Mr. Duffy.

(Witness excused.)

OFFERS IN EVIDENCE

Mr. Thomas: I offer Exhibits H-9, H-10 and H-11.

Exam. Albus: Is there any objection?

(No response.)

Exam. Albus: They are received.

(Applicant's Exhibits Nos. H-9, H-10 and H-11, Witness Duffy, were received in evidence.)

Mr. Thomas: I have two exhibits which is to bring up-to-date, or up to November 1955, certain information that was included in the Santa Fe-Pennsylvania application and is required by the Commission's regulations with respect to such applications.

Exam. Albus: Very well.

[fol. 262] Mr. Thomas: They are one relating to the Santa Fé including a general balance sheet and income account, may that be identified?

Exam. Albus: That will be identified as Exhibit H-12.

(Applicant's Exhibit No. H-12, Mr. Thomas, was marked for identification.)

Mr. Thomas: The other relates to the income and general balance sheet of the T. P. & W.

Exam. Albus: That will be H-13 for identification.

(Applicant's Exhibit No. H-13, Mr. Thomas, was marked for identification.)

Exam. Albus: And if there is no objection, they will be received at this time.

(Applicant's Exhibits Nos. H-12 and H-13, Mr. Thomas, were received in evidence.)

Mr. Lucas: Mr. Examiner, the next witness will be Mr. Symes, President of the Pennsylvania Railroad. May we take a minute to distribute the two exhibits that he has?

Exam. Albus: Yes.

James M. Symes, was sworn and testified as follows:

Direct examination.

Exam. Albus: Before we proceed with the testimony of Mr. Symes let the record show that the two exhibits to be [fol. 263] introduced through him will be marked, first of all—

Mr. Lucas: The blue book first, if you please.

Exam. Albus: That will be Exhibit H-14.

(Applicant's Exhibit No. H-14, Witness Symes, was marked for identification.)

Exam. Albus: And the single sheet will be H-15.

(Applicant's Exhibit No. H-15, Witness Symes, was marked for identification.)

Exam. Albus: You may proceed, Mr. Lucas.

By Mr. Lucas:

Q. Mr. Symes, will you give your full name and business address for the record, please?

A. James M. Symes, President of the Pennsylvania Railroad, headquarters at Philadelphia, Pennsylvania.

Q. When were you elected to the position of president of the Pennsylvania Railroad Company?

A. May 1, 1954.

Q. And prior thereto you were executive vice-president of the Pennsylvania?

A. For several years prior thereto.

Q. And prior to that, Mr. Symes, what was your experience, particularly with reference to allotment of time in the Chicago area?

A. Well, from 1916 to 1928 I occupied—or 1927—I occupied a number of positions throughout the railroad as clerk, statistician, car tracer, car distributor, movement director. Then in 1928 I was appointed superintendent of the passenger transportation of the Western Region at Chicago. [fol. 264] Then December 1, 1929, a similar job, in the Eastern Region in Philadelphia, and in 1934 chief of freight transportation for the system, and in October 1, 1935, I was furloughed for three and a half years to serve as vice-president operation and maintenance of the Association of American Railroads in Washington, returning to the Pennsylvania on February 1, 1939, as general manager of the Western Region at Chicago, 1942 vice-president of the Western Region at Chicago, and 1946 I moved to Philadelphia as vice-president of operations.

Q. Can the narrative that you have just given be summarized as saying your experience is predominately in the operating departments of both the railroad and the A. A. R.?

A. That is right.

Q. You mention the A. A. R. during your furlough from the Pennsylvania Railroad. Have you had any other outside connections or assignments that had to do with the railroad industry generally?

A. Well, in 1932 Mr. Eastman then federal coordinator of transportation appointed me along with two other railroad officers in the east to study the seven party consolida

tion plan and I served in that capacity for about six months, and then the following year he appointed me as chairman of the New York Harbor Coordinating Committee, which I divorced myself from railroad duties and served in that capacity for about six months.

Q. And in both of those capacities you might say it was industry-wide?

[fol. 265] A. It was.

Q. Your sojourn three and a half years with the A. A. R. was, of course, an industry-wide assignment, is that correct?

A. That is correct.

Q. Mr. Symes, you have prepared some testimony for presentation in this proceeding here today?

A. I have.

Q. Will you proceed with it, please?

A. Mr. Gurley has presented the long term history of the T. P. & W. Railroad. For me to do so would burden the record repetitiously. But I do think it necessary that the position of the Pennsylvania Railroad be clearly understood with respect to its interest in the T. P. & W. Railroad. I believe I have been associated with each and every consideration of the matter insofar as the Pennsylvania Railroad has been concerned during the last 15 years.

The T. P. & W. Railroad has been successfully operated over a period of many years, and that has been particularly so since the ending of World War II. Why has it been a success? The answer is simple—because of the heavy interchange of traffic with the Pennsylvania Railroad at its extreme east end at Effner, Indiana, the Santa Fe interchange at its extreme west end at Lomax, Illinois, plus a very able, aggressive and independent management in the middle of the property at Peoria, Illinois.

[fol. 266] Insofar as the Pennsylvania Railroad is concerned, we would have preferred the railroad remain in its independent status and ownership. But apparently the trustees of the controlling owner estate deemed it advisable to dispose of the property. I have been told that their reason for wanting to dispose of it was because they believed the estate would be better served by a diversity of investment holdings rather than concentration in this one venture.

The Pennsylvania Railroad was approached by the trustees as to our interest in the property. I told them what I have just said—that we would prefer it remain in its present independent status and ownership—but if it was decided to dispose of the property, we should be interested, along with the Santa Fe, in acquiring ownership at a fair and equitable price.

But if they had in mind negotiating with us and others for the purpose of raising the price of the stock, I would appreciate being told this as I did not want to waste my time or to be involved in any part of such an arrangement.

I also discussed the matter with Mr. Coulter, President of the T. P. & W., along the same lines I have enumerated. A little later on I met Mr. Coulter in New York and he told me of the considerations on the part of the trustees and why they thought the property should be sold. I advised him that in the light of all considerations, it seemed to me the sensible thing to do would be for the Santa Fe and Pennsylvania to each acquire 26 per cent of the stock ownership from the McNear Estate. That would [fol. 267] leave the estate as the largest holder of the stock.

In that way the estate could raise money for diversification of investment, but, of more importance, with the two railroads that contributed so largely to the success of the property having an ownership therein, it would better insure its future as a good investment for the estate. Apparently the trustees at the time thought so too—as evidence by the agreement made with them at the time to carry it out and which they later indicated (on advice of counsel) was not a legal and binding agreement on the part of trustees. But I am not here indicating that they were right in their position. That is another matter, and I understand is not an issue in the proceedings before this Commission.

The the issue before the Commission is a simple one—is it in the public interest that ownership of the T. P. & W. be vested equally in the Santa Fe and Pennsylvania—or exclusively with the M. & St. L.—or divided up among a number of additional interests? It seems to me the answer is perfectly obvious, and that answer, in my opinion, is Santa Fe-Pennsylvania Railroad.

As I have said, it is the heavy interchange of traffic with the Pennsylvania on the east and Santa Fe on the west, plus capable and aggressive independent management at Peoria, that is responsible for the success of the property. The Pennsylvania and Santa Fe advocate a continuance of that independent management at Peoria plus continu-[fol. 268] ance of other working and traffic conditions presently in effect with all other railroads connecting with the T. P. & W.

In considering the possibility of control of the T. P. & W. by other carriers, let me first refer to considerations, which, from a railroad viewpoint, have relation to the Minneapolis and St. Louis.

Does anyone believe that if the M. & S. L. owned the property, they would keep that independent management here in Peoria? I know that in prior considerations of a merger of the M. & S. L. and T. P. & W., it was thought by the former management of the M. & S. L. that the headquarters of the merged roads should be in Minneapolis. Would that be in the public interest? In my judgment, it definitely would not be.

Does anyone think that the M. & S. L. would continue the heavy interchange with the Santa Fe at Lomax, rather than attempt to concentrate it through Nemo 29 miles away? In my opinion, it would attempt to control its movement of the traffic through Nemo. If so, could the future operation of the T. P. & W. west of Peoria be economically justified? In my judgment, it would not.

In past considerations of a merger of the T. P. & W. with the M. & S. L., I know that the prior management of the M. & S. L. thought it would be possible, and desirable, to abandon the west end of the T. P. & W. Would that be in the public interest? I think not.

[fol. 269] Now as to the Nickel Plate.

Do you think the Nickel Plate would promote the T. P. & W. taking the long haul to Effner, Indiana, and turning the traffic over to the Pennsylvania, or would they advocate moving the business over their own competitive line from Peoria to the east—thereby taking the long haul themselves? Might not such an arrangement result in discontinuance in the eastern half of the railroad? If the latter

became a reality, would that be in the public interest? I say it would not.

As for the Rock Island—while it has a connection with the T. P. & W. at Keokuk, it also connects at Peoria; in fact, it connects there with two lines, one from the main line at Bureau and the other coming down from the main line at a point a short distance west of Rock Island. These two lines converge on Peoria, one from Chicago on the east and the other from Rock Island on the west. It is quite understandable that the Rock Island would favor interchange with the T. P. & W. at Peoria. But that doesn't help the T. P. & W. on its portion of the line west of Peoria.

Finally, as to multiple ownership.

If you were to find the T. P. & W. owned by a number of conflicting interests—some attempting to promote the expansion of the property through modernization and better service—others attempting to weaken it by lack of mod- [fol. 270] ernization and inferior service, would that conflict of objectives by the owners best serve the public interest? I do not think so.

I should add here that the Pennsylvania Railroad is making an investment in the T. P. & W. Railroad because we believe that joint ownership in the property with the Santa Fe (the two Roads that have been primarily responsible for its success in the past), makes it a solid long-range investment—and it would be to our best interest to do so. If additional allocations of ownership are made, I can assure you that we are going to take another look at the situation—because it would be difficult for me to recommend to my directors acquisition of stock ownership in a company that is also owner by other interests who might not have the same feeling towards its future as we do.

You will remember what the T. P. & W. was from the standpoint of earnings, service, and so forth, before 1927 when the Pennsylvania's long-time working alliance was supplemented by a similar working alliance on the part of the Santa Fe—evidenced by the establishment of the Lomax interchange—and by the active off-line solicitation program inaugurated by George P. McNear, Jr. These causes of the success of the T. P. & W. might, if now disrupted, result in its failure—and that should be considered carefully.

the light of the overall public interest, in a situation of that kind.

Q. Mr. Symes, you referred to your experience under the Office of Defense Transportation. You heard Mr. Gur-
[fol. 271] ley's testimony yesterday that he had had some conversations or inquiries as to whether the Santa Fe on the west of the T. P. & W. might cooperate in connection with the welfare of the T. P. & W. Did you have any conversations with Mr. Eastman on the situation east of the T. P. & W.?

A. I did.

Mr. Wheeler: Mr. Examiner, to which we object.

Exam. Albus: On what ground?

Mr. Wheeler: It is hearsay.

Mr. Lucas: Mr. Examiner, it was not objected to yesterday and it is offered—it is part of a communication received from an office, an official of the government, Mr. Eastman then occupying the Office of Defense Transportation, which he took up in his official capacity the matter of having the T. P. & W. possibly participated in by the Pennsylvania Railroad on the east just as Mr. Gurley had testified there was a similar conversation with reference to the T. P. & W., or the Santa Fe on the west.

Mr. Wheeler: Mr. Examiner, I not only object but I want to have physically stricken from the record the remarks of counsel. He is not only seeking to get hearsay in the record through his witness, he is seeking to get it in through his own mouth. This is the sheerest kind of hearsay, the fact that it emanated from a man who occu-
pied a position in the government makes it none the less [fol. 272] hearsay. Unfortunately Mr. Eastman cannot be produced as a witness here. We cannot have an opportunity to examine on all the considerations that were present in his mind when he wrote this important letter or communication.

Mr. Broker: I am going to concur in the objection, Mr. Examiner.

Exam. Albus: The objection is overruled.
The witness may answer.

A. Well, it was in 1942, I believe, when I was general manager at Chicago, or vice-president, I am not sure which,

it was around that time, that I had a phone call from Mr. Eastman in Washington, at the time of the threat of the strike on the T. P. & W. before the appointment of the federal manager, asking me if I would consider operating the east end of the T. P. & W., and I told them no, I would not be interested, because of the labor troubles, I just could not get myself involved in them. That's all there was to it.

By Mr. Lucas:

Q. Mr. Symes, will you look at your exhibit that has been marked for identification H-14 and just briefly state what page 1 consists of, the map?

A. Well, page 1 is a map of the Pennsylvania Railroad as now constituted and indicates, being one of the later maps, our new regional plan of organization that was set up on November 1 last year, indicating the headquarter cities for the new regions.

Q. The system is here shown complete except for the lower right-hand portion where the line extends down to and serves Norfolk, is that correct?

[fol. 273] A. Yes, the line on the extreme east goes down the Delaware peninsula to Cape Charles, which is probably 30 miles beyond what is shown on the map.

Q. The division into the regions shown on this map had some relationship to more local autonomy with respect to the Pennsylvania Railroad, did it?

A. That was the primary purpose.

Q. Is there some connection in your opinion between that new effective setup on November 1 and the purpose of the applicants here in respect to the T. P. & W.?

A. Very similar.

Q. Will you take the second map, or the map on page 2, and very briefly comment on that?

A. Well, the map on page 2 is what is known as the Peoria branch of the Pennsylvania Railroad running from Peoria, Illinois, to Terre Haute. Actually it runs to Farrington and then uses the main line of our old panhandle into Terre Haute. It serves a local territory. There has been some comment in the testimony the last two days that this was a competitive line with the T. P. & W. through

Effner. In so far as it being located on the map is concerned I think you probably could say that it is, but as a practical matter it is not competitive even though a few of freight do move over it. It is a light rail line, 85 pound rail, it is a 30 mile speed restriction on it. It has numerous [fol. 274] railroad crossing at which you must stop. The grade lines are bad. There are light bridges. We operate over several railroads. To use it we have to use the P. P. & U. to get out of Peoria and the Nickel Plate from Farmdale and we get down to Decatur and have to use the Illinois Central. So all in all from the standpoint of a service route it is not competitive with the T. P. & W. If you would start a car out of Peoria on the T. P. & W. and start it down here at the same time 30 hours later, you would find a car 300 miles farther east than the car that moves this way (indicating). As I say, it serves a local area, to Indianapolis, west to Effingham, and this general west area, yes, it is, and it is also used to the east, but certainly not competitive in any sense of the word even though a few cars move that way.

Q. Mr. Symes, at pages 3, 4 and 5, may I direct your attention to the fact that there are two sections, section A beginning on page 3, headed "Capital Expenditures", and then section B is on maintenance under "Extraordinary Expenditures" on page 5. Will you comment first on section A of pages 3, 4 and 5?

A. Well, it is indicative of the line of railroad that we operate from Logansport to Effner, Indiana, to connect with the T. P. & W. Since 1927 we have been bringing the railroad along. We have gone from the old 60 and 70 pound rail to 85, and from 85 to a hundred, over the period of time, and I assume we will soon be going to 131, maybe 133, [fol. 275] but it does indicate we have been taking care of our rail requirements pretty generally. We have a 45 mile speed limit on the branch for freight lines, and that's incidentally 5 miles slower than the fastest freight line we have on the Pennsylvania Railroad, the New York Division, in fact, so we are considering and have been keeping this on a competitive basis. We have also increased the weight of some of our bridges. We put a little extraordinary maintenance in it as indicated on page 5, item B in the

middle, which is over and above normal maintenance, of course. So we have over the period of time been bringing this railroad along and modernizing it as conditions require, the same as we do all of our other properties.

Q. Mr. Symes, you have heard the testimony of both Mr. Gurley and Mr. Mahoney as to the improvements at Lomax, starting with the establishment of that connection with the T. P. & W. in 1927?

A. I have.

Q. And on page 3, the first entries there shown are an expenditure for capital improvements of over $350,000?

A. Page 3, yes.

Q. Will you comment now, please, on page 6?

A. Well, page 6 indicates the capital improvements, expenditures for capital improvements at Effner, Indiana, where we perform the interchange with the T. P. & W. We are like Mr. Gurley, we have one of the cornfield interchanges which is quick and cheap, and they bring the traffic in to us, they make one classification, as I recall it, perish- [fol. 276] able freight only, so we can handle it quickly. The train comes in, they cut off, we put an engine on, away we go. It is the quickest thing in the world. It is just the changing of an engine and crew, so it takes very little in the way of facilities to provide interchange. As a matter of what in railroad language we call main tracking them quite often.

Q. The amount shown here is capital expenditures and of course there has been maintenance expenditures additional to the amount shown here?

A. Oh, yes.

Q. Whatever amount has been expended Effner is now an efficient interchange for the schedules in effect and for the tonnages moving through that point?

A. Yes.

Q. Have you any comment on page 7? That, I believe, is the speech you made here in Peoria at the time of the luncheon and with the announcement of the filing of the application, was it not?

A. That is correct.

Q. Generally speaking, did you point out at that time the same considerations that are in your application and that you are still supporting here today?

A. I pointed out at that time the same considerations that are in our application and I reiterate, we have not changed our mind one bit as of today.

[fol. 277] Q. Having announced your purposes and your program to the public did you also alert your staff, as shown on page 8?

A. Yes, sir.

Q. And there set forth the same conditions with instructions to pass them on to the supervisory force under the staff, is that correct?

A. That is correct.

Q. Have you any comments on pages 9, 10 and 11?

A. No, except to indicate that in prior considerations of consolidation of railroads that the T. P. & W. was more or less either divided or the part east of Peoria allocated to the Pennsylvania in practically every plan, and, as a matter of fact, going back to the beginning, it was built from Logansport to Effner, Indiana, in 1857, was built the same year as the T. P. & W. from Effner west, it was simultaneous, it was all part of a plan.

Q. Taking up Exhibit H-15, that summarizes and shows somewhat pictorially the track improvement, does it not, to which you have already referred in connection with your previous exhibit?

A. What one?

Q. H-15, the single sheet.

A. Oh, yes, it indicates what I have already said that we have been taking out the older and lighter rail from time-to-time to improve conditions on our Effner branch, between there and Effner and Logansport, taking out the 60 and 70 and then later the 80 and putting in a hundred, and then, as I say, we will eventually start on another [fol. 278] program when that hundred is worn out to put in heavier rail.

Mr. Lucas: That completes Mr. Syme's direct testimony.

Exam. Albus: We will now take a recess until 2 o'clock.

(Whereupon, at 12:30 p.m., a recess was taken until 2 o'clock p.m. of the same day.)

[fol. 279] AFTERNOON SESSION 2:00 p.m.

Exam. Albus: The hearing will please come to order.
Do you have anything further from Mr. Symes on direct?
Mr. Lucas: Nothing further on direct, but, Mr. Examiner, it might be of value to counsel to say that Mr. Symes will be followed by Mr. Carpi, our vice-president in charge of traffic.
Exam. Albus: Thank you very much.
We will continue with cross-examination.
Mr. Wheeler, please.

Cross examination.

By Mr. Wheeler:

Q. Mr. Symes, on pages 1 of your written statement you attribute the success of the T. P. & W. to the heavy interchange of traffic with the Pennsylvania and the Santa Fe plus the management of the property at Peoria.
A. That is correct.
Q. Do you intend by that statement to take credit for the heavy interchange of traffic at Effner between the Pennsylvania and the T. P. & W.?
A. Partially.
Q. Why?
A. Because, if you will go back to the days before Mr. McNear took the property over, it was pretty well run down. The volume of traffic on it was rather light, in fact so light that you couldn't justify the service that was required to put it on a par with other gateways. After Mr. [fol. 280] McNear took over and established the interchange with the Santa Fe at Lomax with our interchange at Effner plus the service that we provided at each end, he was able to go out and solicit traffic through those two gateways plus the better railroad that it was competitive, which has made the T. P. & W. the railroad that it is today.
Q. I think you have covered my point. You said, as I recall, that Mr. McNear, and I assume in using his name you are using the entire force of the T. P. & W.?

A. That is right.

Q. Referring to that?

A. That is right.

Q. It was his solicitation effort?

A. Plus our service.

Q. Plus the fact that you afforded them an interchange?

A. A good service outlet.

Q. Does that interchange benefit the Pennsylvania or does it benefit solely the T. P. & W.?

A. It benefits both.

Q. Had the benefit been solely for the T. P. & W. would you have put that interchange into effect?

A. Solely the T. P. & W.?

Q. Yes, sir.

A. Well, if it was going to cost us money probably we wouldn't.

Q. Does the Pennsylvania solicit traffic via Effner as [fol. 281] against St. Louis?

A. No, we do not.

Q. As against Chicago?

A. Effner as against Chicago?

Q. Yes.

A. No, we do not. However, we do not object to the T. P. & W. soliciting it that way.

Q. It would be fairly difficult for you to object to it, would it not?

A. Well, the only way you could object would be to have the service, and we have the service, which makes it possible.

Q. Mr. Symes, you are aware, are you not, that the solicitation of M. & St. L. contributes to that interchange at Effner, does it not?

A. I assume that it does, yes. I hope it does.

Q. Mr. Symes, would your solicitation policies be changed in the event you acquire a 50 per cent interest in the T. P. & W.?

A. Well, I prefer that Mr. Carpi answer that, but as president of the company I wouldn't think they would substantially change because the service now and for some years as between St. Louis, Chicago and Effner has been par. We certainly haven't objected. If somebody asked

me in Philadelphia, I am going to ship a car of freight to California, I would say St. Louis, if you couldn't do it there but could at Chicago I'd say do that, if you couldn't do that at Chicago, give it to us at Effner, I'd say give it [fol. 282] to us. I don't think it would change very much.

Q. The Pennsylvania owns 99 per cent of the common stock of the Wabash, does it not?

A. Yes.

Q. And it owns a substantial part of the preferred stock, does it not?

A. Yes.

Q. And it has been authorized by the Interstate Commerce Commission to control the Wabash, has it not?

A. Oh, yes.

Q. Are you familiar with the conditions that were imposed by the Commission in connection with that authorization of control?

A. Yes, it is practically what we have agreed to in connection with this property if we get it. It has worked out beautifully. I don't know anybody who is dissatisfied with it.

Mr. Wheeler: May I have the answer read?

(Answer read.)

By Mr. Wheeler:

Q. Are you familiar with the representations that were made by officers of the Pennsylvania in connection with that control case?

A. Well, as a blank check, no, I was not involved in the case.

Mr. Wheeler: Mr. Examiner, we have taken excerpts from the testimony given by officials of the Pennsylvania and the Wabash in Wabash Railroad Company Control, Finance Docket No. 13235. We have had a photostat of [fol. 283] that testimony certified to by the secretary of the Commission. We would like to have this made a part of the record here, introduced as an exhibit, and we have copies for distribution.

Exam. Albus: Is there any objection?

Mr. Lucas: Yes, Mr. Examiner, I don't think he should ntroduce exhibits on cross-examination.

Exam. Albus: I don't think so either.

Could it be just as well handled on your direct?

Mr. Wheeler: Yes, sir.

Exam. Albus: I would like for you to reserve it until hen, if you will, please. Of course you can inquire of Ir. Symes in connection with this examination about it.

Mr. Wheeler: I just thought it might be helpful to Mr. ymes in connection with my cross-examination.

Exam. Albus: Yes.

By Mr. Wheeler:

Q. In your administration of the Pennsylvania Railroad its chief executive officer have you in mind the fact that e Pennsylvania witnesses in that case testified that the ennsylvania had joined with the Wabash in opening up a st freight route to the East, particularly to New York?

A. No, I am not familiar with it.

Q. Would you agree that that is the effect of the control the Wabash by the Pennsylvania?

A. That is the effect of the control?

ol. 284] Q. Yes, sir.

A. No, I know they have such a route.

Q. You would agree that it was a fast route?

A. Oh, yes. It is a competitive route.

Q. And it is a joint route with the Pennsylvania?

A. Not to the extent I'd like to see it. They interchange re traffic with Lackawanna at Buffalo than their ten in- changes with the Pennsylvania.

Q. Are you familiar with the physical interchange at gansport?

A. Yes.

Q. Is it true, could it be said with respect to that that more time is consumed there than those necessitated ere engine and crew changes are made?

A. No.

Q. What is the fact?

A. They come into Logansport, the cars come in on the bash, they break them up then switch to the Pennsyl- ia interchange track and then we take them to our yard

and put them in a train, so the physical interchange with the Wabash at Logansport as compared with TP&W at Effner is actually five and six times as long actually in making the interchange.

Q. How long does the connection take at Logansport?

A. About two hours and a half.

Q. Do you know any reason why Mr. F. C. Wilkinson [fol. 285] would have testified to the contrary?

A. No.

Q. Are you familiar with Mr. Wilkinson?

A. He is dead.

Q. Were you familiar?

A. Yes.

Q. What position did he hold with the Pennsylvania?

A. Oh, he was sort of assistant chief engineer in charge of research.

Q. Would you disagree with the statement that the Pennsylvania Railroad offers the Wabash wide markets in the east on account of the diversity of important eastern points served by the Pennsylvania Railroad?

A. No, I would not disagree with it. We offer the same to TP&W.

Q. Would you agree that the arrangements with the Wabash has been beneficial to both roads?

A. The Pennsylvania and Wabash?

Q. Yes.

A. Yes, I would say they were and not detrimental to anyone else.

Q. I believe you heard Mr. Gurley testify. Would you agree with his statement that the Wabash route was competitive with the TP&W route?

A. The Wabash route competitive with the TP&W?

Q. Yes, sir.

[fol. 286] A. Yes, it is.

Q. Interpolating for a moment, Mr. Symes, are you familiar with the fact that after the strike shortly, immediately after the strike on the TP&W, that the Pennsylvania initiated a general policy so far as its solicitation was concerned of telling shippers that the route, their route to Peoria, was as good a service route as the Pennsylvania's route via Effner?

A. I am not familiar with any such statement but I do know that during the strike in order to keep the Peoria gateway open we established a service from Peoria to Terre Haute, which was very little used, at least the shippers didn't believe it was competitive, and the amount of traffic moved over it was very light. As to what our solicitors might have said I do not know.

Q. Do you know whether or not your solicitors generally were given such instructions by the main office in Philadelphia?

A. No, I do not.

Q. After the strike?

A. After the strike?

Q. Yes.

A. No, I do not. If they were I didn't know anything about it.

Q. Did you disagree with the statement in the Wabash control case by Mr. Arthur K. Atkinson that, and I quote "As the Commission is aware, the Wabash line by way of Decatur, Illinois, and the Hannibal Bridge provides an [fol. 287] efficient alternative transcontinental route that avoids the Mississippi River crossings at St. Louis. This ling is particularly useful in times like the present when speed is vital and delay is serious."

A. Would I disagree with that?

Q. Yes.

A. No.

Q. Would you agree with it?

A. I would be inclined to agree with it.

Q. There was also testimony given at that time that the Pennsylvania would work to—if it got control of the Wabash would work to effect further improvements in the traffic handling over the Wabash ~~route between~~ Logansport and Kansas City. Can you tell me what steps have been taken to carry out that promise?

A. We have, with the Wabash at Logansport, close connections with eastern service in the same manner as we have with the TP&W at Effner. Apparently the over-all picture of the Wabash has materially improved as reflected by the volume of business they are handling and the earnings they are making, and it is a very good railroad. It

is entirely independent of us, I will tell you that, we haven't any voice in its management, they are independent. They are working under rules, and so far as I know those rules are being carried out.

Q. Do you feel that your continued control of the Wabash, is that advantageous to that railroad?

[fol. 288] A. Well, it certainly hasn't been harmful.

Q. But you wouldn't say that it was advantageous?

A. Oh, I would think it would be somewhat advantageous.

Q. In what particulars?

A. We have close working arrangements with them. We don't interfere in any way with their policies or capital expenditures or things of that kind. They are handled by, I would say, an independent Board of Directors. While we own the stock, it is an independently managed road the same as we would expect the TP&W to be if this authority were granted. As I said, as far as I know it has not worked out adversely to any interest.

Q. Do you think it has helped them traffic-wise?

A. Our being in there?

Q. Your being in control of their company.

A. I don't know whether it has or not. I sometimes think so when I see their figures.

Q. If you had the choice, assuming you have a 50 percent ownership in the TP&W, if you had the control of routing traffic of a particular shipment beyond Logansport, as between the TP&W and the Wabash, which way would you route that traffic?

A. I think I would maintain a neutrality in that case. I'd probably be desirous of getting the longer haul maybe, but I wouldn't be very much one way or the other on that.

Q. Don't you feel that you have a duty to the Wabash arising out of the statements that were made at the Wabash [fol. 289] control hearings and the Commission's decision in that case to route such traffic over it?

A. No, I don't believe so, not as against other routes.

Q. Would you feel any commitments to the minority stockholders in the Wabash to do so?

A. The minority stockholders in the Wabash are legal minority, minority. We are about about like Ivory soap, we have all of it.

Q. I was thinking momentarily of the preferred.

A. Well, they are pretty well taken care of.

Q. You feel that you don't owe them any obligations?

A. Under that particular traffic, no, I wouldn't, in that case.

Q. How about to your own stockholders?

A. What?

Q. Since it would put more dollars ultimately, or would bring more dollars ultimately to the Pennsylvania Railroad wouldn't you feel an obligation to your own stockholders?

A. It would take short—it would take a lot of figures at Logansport as compared with the long haul at Effner as to who had the most at the end.

Q. But you would route the traffic—

A. (Interrupting) We don't route it.

Q. To give you the total, taking my assumption now.

A. All right.

Q. To give you the greatest total revenue for your stock [fol. 290] holders, would you not?

A. Not necessarily.

Q. Why not?

A. They are more interested in net than they are in gross.

Q. What is that?

A. They are more interested in net than they are in gross for their benefit.

Q. Don't you bring down your gross to net?

A. It depends on where it is. Sometimes we can take less gross and produce more net than we can with more gross and produce less net.

Q. Would that be the case here?

A. I don't know. I'd have to study it.

Q. What would lead you to doubt that it would be the case?

A. You take a car at Logansport, the division in the rate, how much you'd get for hauling it to Effner and compare it with the expense.

Q. As against Kansas City?

A. What is that?

Q. As against to Kansas City?

A. Well, that's Wabash and we are not, of course, interfering with the Wabash in any way.

Q. But you do through your practically 100 per ownership?

A. I would say this, as a practical matter, using a car in your case, going west, solicited by the TP&W through [fol. 291] Effner, do you mean to infer that we might very well influence their routing the traffic through Logansport in order to give them the long haul to Kansas City, we wouldn't.

Q. I don't think that is the example.

A. I mean as a practical matter that is what you are talking about and we wouldn't do it, and we wouldn't here either.

Q. When you say you wouldn't here?

A. Well, against Chicago, if the TP&W solicit traffic through the Effner gateway and we see it going there we certainly wouldn't endeavor—

Q. (Interrupting) I am not talking about TP&W soliciting traffic.

A. I know you are talking about the Wabash, it is the same principle.

Q. I am talking about traffic over which you have the predominant influence, let's say traffic originating on the Pennsylvania. Now, how would you route that traffic if it was going to Kansas City?

A. We'd probably take it to St. Louis.

Q. You'd take it to St. Louis?

A. Probably. If it was our routing, but it isn't our routing, that is what I am trying to tell you.

Q. Would you seek to influence, let's put it that way—

A. (Interrupting) What is that?

Q. Would you seek to influence routing? You'd first seek [fol. 292] to influence the routing to St. Louis?

A. Yes, I think I would.

Q. As a second preference would you seek, if the shipper did not want it there, would you seek to route it via the Wabash?

A. No, I'd probably try for Chicago.

Q. You'd try for Chicago?

A. If it was an open route.

Q. And now as to your third preference?

A. I'd probably take Effner.

Q. You'd take Effner?

A. I probably would.

Q. As against the Wabash?

A. Yes, I probably would.

Q. Now, why would you do that?

A. Take the long haul. The Pennsylvania, of course, that's the railroad I am responsible for running, not the Wabash.

Q. I see. And you feel no responsibility to the Wabash?

A. Not along the line you are talking. I think they can very well take care of themselves. Under the rules prescribed I think it is working out very well.

Q. Mr. Symes, you state on page 1 of your testimony the Pennsylvania was approached by the trustees as to our interest in the property. Now, would you please tell me who of the trustees approached you?

A. Well, I don't know. It was Mr. Chinn and Mr. Ban-
[fol. 293] croft of the Wilmington Trust Company.

Q. Can you tell me when this was?

A. I can't give you the exact date, but it was, as I remember, the early part of '55.

Q. The early part of '55?

A. I think it was the early part.

Q. January?

A. I can't tell you exactly. It was around then.

[fol. 294] Q. You say they approached you, asking you to buy stock in the TP&W?

A. No—well, I would say this, they approached me and said they were considering the sale of the property.

Q. Did they tell you that anyone else had evidenced interest in the purchase of the stock?

A. I don't believe so.

Q. Now, according to your statement you told them you would prefer to have the TP&W remain independent railroad, is that correct?

A. I did.

Q. Owned by, controlled by the McNear estate?

A. Present ownership—their ownership.

Q. But that if that was not feasible you, along with the Santa Fe, would be interested in buying it?

A. I couldn't say that for the Santa Fe. I thought that we and the Santa Fe would be the logical ones to own it, if it were going to be for sale.

Q. That is the interpretation we should be interested along with the Santa Fe at acquiring ownership at a fair and equitable price.

A. That is right.

Q. What was the next time that you discussed the purchase of that stock with anyone connected with the Wilmington Trust Company?

[fol. 295] A. Well, that was the first direct time that I discussed it with anybody with the Wilmington Trust Company. I think following that that our Financial Vice President discussed it with them, at which time I was not present. And then there was another meeting, I believe, in April that it was discussed with them.

Q. What did you discuss it with Mr. Gurley?

A. Well, Mr. Gurley and I have talked about it. As I remember, he called me as late as, well, it was the Fall of '54, probably November, talking about the rumors that the TP&W might be for sale and so on, and naturally because we believed and agreed that we were responsible for the success of the TP&W and it meant so much to us and was part of a transcontinental, very important transcontinental gateway that we had an awful lot of stake in this thing and we were going to watch developments.

Q. Did the rumors that he related to you include a reference to prospective purchase by the M&StL?

A. I don't believe it did.

Q. When was the first time that you became acquainted with the fact that the M&StL might be interested?

A. I can't tell you exactly, but, as I remember it, as I read it in the newspaper.

Q. About when?

A. Well, it was about then, when this proxy fight was going on or something. I could be mistaken but I believe [fol. 296] I read it in the Chicago Tribune.

Q. Would this be in the fall of '54?

A. It was about that time, fall or winter. I can't tell you exactly. It was certainly rumored around. It was pretty much gossip around. As I tell you, I am pretty sure I saw it in the newspaper.

Q. Let me ask you this, did you discuss this question of purchase at any of your board meetings?

A. Oh, I got their authority.

Q. When was that?

A. I believe it was the April board meeting. I am not sure of that.

Q. Had you had any discussions that raised the question of acquisition prior to that April meeting?

A. Not formally.

Q. Informally?

A. I think I have discussed it with several members of our board informally.

Q. On or after the board—

A. On.

Q. That is, during the course of the board meeting?

A. Oh, no, on the side. We meet every once in a while, get together.

Q. What board members?

A. What board members?

[fol. 297] Q. Yes, did you discuss it with.

A. Oh, I think I mentioned it to Walter Franklin, who was our former president; I think I mentioned it to Clement, who was our former president; and, as I recall, I probably mentioned it to Mr. Ingersoll, who is one of our Philadelphia directors. I can't say exactly, but I know I have talked to two or three of them.

Q. Did you ever discuss it with Phil Clarke?

A. I have, yes.

Q. About when did you have your discussion with him?

A. Oh, I couldn't say exactly. Sometime during that same period.

Q. Around in the latter part of '54 or '55?

A. In '55, I would say.

Q. Did he tell you that the M&StL was interested in buying it?

A. I don't know whether he told me or I told him. It was very much rumored around by that time.

Q. Did Mr. Clarke mention acquisition or mention the—

A. (Interrupting) Mr. Clarke.

Q. (Continuing) —of the TP&W?

A. I might have mentioned it to him.

Q. At any rate, it is quite possible that it was covered in your conversation?

A. Yes, because that was pretty much common gossip, too.

Q. When you say it was pretty much common gossip, to what do you refer?

[fol. 298] A. About the Monon, it has been common gossip, as far back as I know, 1945.

Q. Is that the M&StL?

A. The TP&W and the Monon.

Q. You mean the M&StL?

A. What?

Q. You mean the M&StL?

A. No, the TP&W and Monon.

Q. The combination of those two roads?

A. A connection between the two roads.

Q. Were you opposed to a connection between those two roads?

A. I was and still am.

Q. I think you said your financial vice-president took over the negotiations.

A. He didn't take them over, but he happened to be in town that day. I am not sure I was, but he discussed it with the Wilmington Trust one day there. I think it was March. I am not exactly sure.

Q. Now, at this time had you and Mr. Gurley arrived at an understanding or tentative agreement or anything of the kind with respect to the joint venture to buy the TP&W?

A. Oh, yes, we had talked about that, as I say, even in '54.

Q. Did you have any understanding as to who would make, who would do the buying of the stock?

A. Oh, no.

[fol. 299] Q. Whether it would be you or the Santa Fe?

A. No, sir.

Q. But you say as early as '54 you generally reached an understanding?

A. We didn't reach an understanding. We discussed it, and the possibility of what was going to happen with all of these rumors going on.

Q. You were in agreement that it would be beneficial to the two roads for you to own it?

A. Beneficial to everybody. My interest was to preserve what we had. As I say, I preferred it being what it was, then when it wasn't going to be that, then what is the best thing you can do to preserve what you have, and then I think the application we have before the Commission is that. It is just that simple with me.

Q. You state on page 2 of your testimony: "In that way the estate could raise money for diversification of investment, but, of more importance, with the two railroads that contributed so largely to the success of the property having an ownership therein, it would better insure its future as a good investment for the estate." I believe we have covered the question I had in mind there. I believe you have already stated this has not been a one-way street so far as contribution is concerned.

A. That is right. It is just as simple as that. If that [fol. 300] was the problem, diversification, I felt by the Santa Fe getting twenty-six and continuing west, they on the west and we on the east, and preserving what they had, and the two people that made the property and providing the service that made the property with an ownership would better insure the estate an investment, it is just that simple.

Q. In March your financial vice-president entered into negotiations with the Wilmington Trust. Did he have discussions with Mr. Gurley or anyone with the Santa Fe with respect—

A. (Interrupting) Oh, yes. Mr. Marsh was with him that day.

Q. And they arranged for the exchange of letters dated April 15 which are a part of your application?

A. I would say yes, with my approval, so far as the past was concerned.

Q. Did you believe that the acceptance of the letter constituted a binding agreement on the part of the trustees to sell Pennsylvania 23,400 shares of stock at a hundred dollars a share?

A. I thought so, yes.

Q. Did you believe that by reason of the letter of April 15 you incurred any liability to the trustees beyond the sum of $100 a share?

A. Did I?

Q. Yes, sir.

A. Any liability on the part of the trustees for selling it [fol. 301] beyond a hundred dollars?

Q. Any liability on the part of the Pennsylvania—

A. (Interrupting) Not for the 26 per cent, no.

Q. Did you believe that if you entered into a subsequent contract with the trustees directly that it might prejudice your claim to get the 23,400 shares at $100 a share in accordance with the letter of April 15?

A. No.

Q. You didn't?

A. I could clear that up very easily without a lot of questioning.

Q. O. K.

A. We made what we thought was an agreement to buy 26 per cent of the stock with the trustees at a hundred dollars a share. Apparently the trustees—well, I will tell you very plainly, on the advice of counsel they told me that they did not consider what we thought was a legal and binding agreement, was binding on their part of it. Our counsel thinks it is. But that is not before the Commission, that is something else that has to be decided. So I would say, on advice of counsel to them, it isn't; and on advice of counsel to us, we think it is.

Q. Whether or not your counsel advised you that if you entered into another contract directly with the Wilmington Trust of Monon—

A. (Interrupting) He did not.

[fol. 302] Q. (Continuing) —it would prejudice your case—

A. (Interrupting) He did not.

Q. (Continuing) —your claim against them for the the 23,000 shares at $100 a share?

A. He did not so advise me and I never asked him. Perhaps if I had asked him he might have advised me that way, but I didn't.

Q. Do you know whether any such advice was given to your financial vice-president?

A. No. He advised me we had an agreement.

Q. Were you surprised when—well, let me ask you this, did the trustees after April 15 call you with respect to buying shares in the TP&W?

A. They did.

Q. Now, when did that happen?

A. Well, it was in May. I can't tell you the exact day. I think it was the 24th of May or thereabouts. It was the same day they called Mr. Gurley. I was looking at it yesterday when he was testifying, whatever that day was.

Q. What was the substance of the conversation?

A. Well, I was told that on advice of counsel it was not considered that it was a legal and binding agreement on the part of the trustees.

Q. Is that all you were told?

A. Well, no. I was also told that if we wanted it we'd [fol. 303] have to match the price.

Q. What price?

A. One hundred thirty-three and a third dollars, as I recall it.

Q. Did they tell you who had made that offer?

A. I don't know whether they did or not, but I knew.

Q. What was your information?

A. M&StL. I don't know whether they told me that, but I certainly assumed it. I knew what had taken place with Mr. Heineman.

Q. What was your reply?

A. I don't think that would be good for the record. I didn't like it, I will say that.

Exam. Albus: That is fine. That will take care of it.

The Witness: Does that answer it?

Exam. Albus: Yes, that answers it.

[fol. 304] Q. Have you pursued your claim against the trustees for the 23,400 shares?

A. In what way?

Q. To try to get them to deliver the stock to you?

Mr. Hamilton: I object to that question, Mr. Examiner. I have been very patient. It seems to me that counsel for

the M&StL is trying to inject in this case a matter that is purely judicial. There is no dispute in this lawsuit between the people on each end of that claim. It is a matter, if it is not adjusted between my clients and the Pennsylvania, for the courts. It has in no way been pertinent to any issue before this tribunal.

Exam. Albus: Do you have anything to say to that, Mr. Wheeler?

Mr. Wheeler: Only that there is a specific reference to it in their application.

Exam. Albus: I will overrule the objection and permit the witness to state whether or not he pursued his claim against the trustees.

A. I turned it over to our legal department.

Exam. Albus: All right.

By Mr. Wheeler:

Q. Are you familiar, Mr. Symes, with the whereas clause that is inserted in the agreement between you and the Santa Fe under date of January 28, 1955, Exhibit 7-D to your application?

[fol. 305] A. 7-D?

Q. Yes, sir.

A. What page is that?

Q. Page 59.

A. I read it.

Q. Is the purpose as you understood it as president of the road to protect your claim against the trustees?

A. Well, as a lawyer, I don't know, but I say it is a fact, but I assume—

Q. (Interrupting) That is what I want to know.

A. Yes, I would assume that.

Q. When was the first discussions after May 26 that you had or any other officer of the Pennsylvania had with the Santa Fe regarding the stock?

A. Was the 26th Thursday?

Q. Yes.

A. The next day.

Q. That was the—

A. (Interrupting) 27th.

Q. What was the substance of those?

A. I saw Mr. Gurley in Washington. We were at an AAR meeting and we had a little discussion about it and we decided we were going to discuss it later.

Q. Did you have at that time any discussion as to price?

A. No, sir.

[fol. 306] Q. When were your next discussions?

A. Oh, it might have been a week or two weeks after that probably. It was very near it. Not more than two weeks, I don't believe.

Q. And you just continued your discussions until you arrived at the contract which is—

A. That is right.

Q. Which is Exhibit 17?

A. Right here.

Q. Was there at any time any substantial disagreement between you with respect to the terms and conditions?

A. Well, if there were we ironed them out. No, I wouldn't say there was.

Q. I believe you stated that you had some discussions with Mr. Heineman, Mr. Ben W. Heineman, the Chairman of the Executive Committee of the M&StL. regarding the acquisition of control of the TP&W.

A. I had one conference.

Q. Had you had discussions prior to that conference with any other officer or director of the M&StL regarding the acquisition of the TP&W by the M&StL?

A. I would say not for perhaps nine or ten years.

Q. Were those discussions with Mr. Sprague?

A. They were.

Q. During the course of those discussions did you not [fol. 307] tell Mr. Sprague that you thought that he and Mr. McNear should get together and join their properties?

A. I did.

Q. That is, the M. & St. L. and the TP&W?

A. I did.

Q. Didn't you tell the same thing to Mr. McNear?

A. I did. It didn't do much good, they didn't speak to each other.

Q. Didn't you tell Mr. Sprague that you regarded the merger of the M. & St. L. and the unification of the M. & St. L. and the TP&W as a natural arrangement?

A. I don't know how I told it to him. I told him we certainly wouldn't object to it.

Q. Didn't you at that time feel that it was a logical or natural arrangement of flow between the two roads?

A. Well, I could see at that time the possibility of the M. & St. L. traffic Nickel Plate at Peoria going to the Pennsylvania at Effner, to be perfectly frank with you.

Q. Could you answer my question?

A. That is the answer.

Q. The answer is yes.

A. That is the answer.

Q. Mr. Symes, didn't you have, not just one, but a number of conversations with those two men and other officers of the M. & St. L. or the TP&W in which you expressed that view?

[fol. 308] A. Oh, I wouldn't say a number. In fact, I went up to Minneapolis and rode over the M. & St. L. and Mr. Devins and Mr. Ward and several people to see what kind of railroad they had.

Q. You did express the view at that time?

A. I assume they did. There wasn't any secret about it as far as I was concerned then.

Q. That it was the logical—

A. (Interrupting) Well, not logical. I wouldn't oppose it. I spoke to Mr. McNear about it.

Q. Didn't you say that the Pennsylvania—pardon me, I didn't mean to interrupt you.

A. Yes, I spoke to Mr. McNear about it.

Q. Did anyone discuss with you in 1954 whether or not you would oppose, that is, the Pennsylvania would oppose the acquisition of the TP&W by the M. & St. L.?

A. Did anyone?

Q. Yes, sir.

A. I don't believe so.

Q. Including officers of the TP&W?

A. It may well be that Mr. Coulter asked me that question but I couldn't swear to it.

Q. Well, in any event what answer did you give?

A. Well, as I say, I am not sure I was asked, so the answer would have to be in the same boat.

Q. In the fall of 1954 had you had such a conversation, [fol. 309] what would your answer have been?

A. Well, it all depends under conditions. It was very much changed conditions in the consideration I gave in '45 when I made that statement as compared with what I understood was the situation in '55.

Q. '54, please, now.

A. '54.

Q. What was the change?

A. Well, I knew that the M. & St. L. had changed hands, I knew that, at least it looked like, they were trying to get the TP&W, and I knew it was rumored by this so-called outer, outer belt, and it would change the whole complexion as far as I was concerned.

Q. Well, now, Mr. Symes, isn't it a fact that during 1954 and before you became aware of these rumors with respect to this outer outer belt around Chicago, to which you refer, that you still adhered to your earlier position that the acquisition of the TP&W by the Monon, or by the M. & St. L., pardon me, was a natural move?

A. I wouldn't say a natural move but I could very well have said I didn't see any objection to it or something like that. I am not sure that I did that but I wouldn't say that I didn't.

Q. Can you tell us now for the record what this outer outer belt around Chicago would consist of to which you [fol. 310] made reference?

A. Well, the thought was first we might as well know that the Monon does not connect with the TP&W. It crossps our railroad, Pennsylvania Railroad, at Reynolds, oh, about 10 or 12 miles east of there. It was always Mr. McNear's ambition to get trackage rights over our railroad to connect with the Monon at Reynolds which would enable him to move north on the Monon all the way to Michigan City and connect with every east-west trunk line in that territory. Naturally, we were opposed to it. That plan was revised by Mr. Heineman on the outer outer belt. I understood I might be wrong but at least I understood that he

was buying into the Monon, and that was the purpose of it, and I am opposed to it.

Q. And that's when you became opposed to the acquisition—

A. (Interrupting) The whole uncertainty of the thing. When the thing was coming on the block my purpose was to preserve that TP&W Railroad as it was operating and this was the best way of doing it. That is my interest in it.

Exam. Albus: I think we have covered that sufficiently.

Q. Didn't you state, just to culminate this thing, in May of 1955, that you had changed your view with respect to the acquisition of the TP&W by the M. & St. L. in order to, or because of the stories you had heard of the plans to merge the M. & St. L. and TP&W with the Monon?

A. Well, I don't know whether it was May, but I will tell [fol. 311] you story. Mr. Heineman asked if he could see me. It might have been May. I don't know the exact date. It was around April or May, and I told him I'd be delighted to, and then he and Mr. Devins called at my office, and as I recollect, Mr. Heineman said he felt very derelict in his duties because he had not come to see me earlier because he had always understood that I favored a merger of the M. & St. L. and the TP&W, now he understood we were in there trying to buy it. He also went so far as to say, as I recollect, that if the thing that is bothering you is because the M. & St. L., or I mean the TP&W, would be figuring on tying in with the Monon I could probably agree with you that that probably would not be done, would that change your position, and I said it would not change my position, because I had made a commitment, and we were going forward to carry it out, and in addition what would the agreement mean if the M. & St. L. builds or the TP&W what is going to prevent the Monon from building over here, I mean it was all conditions that had changed and I changed with them.

Q. Perhaps you have indicated this by your past statement, but to make the record clear, during the course of that discussion did Mr. Heineman not tell you that he was prepared to have not himself but his associates sell all of his stock in the Monon in order, because the TP&W was so important to the M. & St. L.?

A. I don't recall that. I do recall him saying that he [fol. 312] would make an agreement that he would not do that but I don't recall it being that way.

Q. Referring to page 3 of your written statement, Mr. Symes, you say, "Does anyone believe that if the M&StL owned the property, they would keep that independent management here in Peoria? I know that in prior considerations of a merger of the M&StL and TP&W, it was thought by the former management of the M&StL that the headquarters of the merged roads should be in Minneapolis. Would that be in the public interest? In my judgment, it definitely would not be." Would you tell me the reasons for that conclusion?

A. I think the TP&W, as I have said all along, because they have an interchange plus an independent management located on the property here at Peoria, and I think that Peoria, as large as it is, is a city, and it is more or less a Peoria railroad, the headquarters largely should be here rather than removed, and by the same token if the M&StL and the TP&W merge, I think it would be logical that they would move their headquarters to Minneapolis and it is just that simple, but I don't think it would be in the public interest from the standpoint of the TP&W to move their headquarters out of here.

Q. Now, Mr. Symes, refer to your Exhibit H-14, and the map that is contained therein.

What is the total tonnage in the revenue and the track miles in the division of the Pennsylvania that connects with [fol. 313] the TP&W at Effner?

A. You mean that region?

Q. Yes, sir.

A. Oh, we have that. I could give it to you. It is a matter of record, and I would say that we in dividing up these regions had a number of factors, the amount of tonnage involved, the number of employees involved, the number of tracks involved, the importance of the community to the Pennsylvania Railroad, they were all factors, and I would say that northwestern region which has the Effner line is not quite as big, of course, as our Pittsburgh region, but is a very important factor. All of those things had to be considered.

Q. You wouldn't have a general idea as to what the revenues of that northwestern region are?

A. Well, if you were to divide it up on a ton-mile basis, I would guess they would probably be around a hundred million a year, probably, eighty to a hundred, I'd say.

Q. Do you see anything against the public interest in having the headquarters of that region in Chicago?

A. Yes, I think it is very much in the public interest they do that.

Q. Would it be more in the public interest to have it at Fort Wayne?

A. No.

Q. Or Grand Rapids?

[fol. 314] A. No.

Q. Well, how do you acquaint that with the fact that a merged M&StL-TP&W ought not to have its headquarters in Minneapolis?

A. It is rather far removed from this east-west line, as I have indicated, and they have been here, and you take them away, if it is an independently operated railroad, such as we propose they would be maintained here.

Q. Isn't Chicago at the extreme western end of the northwestern region?

A. Yes.

Q. It is not located centrally at all, is it?

A. No.

Q. How is it more in the public interest for the TP&W, for the M&StL-TP&W operation, to maintain its offices in Peoria than it is for the Pennsylvania to maintain its headquarters of its northwestern division in Fort Wayne? It would seem to be right at the center of that operation and interseeting the north and south—

A. (Interrupting) There is quite a difference. The big part of our northwestern region is Chicago, both from the standpoint of operation, volume of traffic, contact with the shippers, contact with the interchanging railroads, it is all right there, and that is where it belongs, and Peoria to the TP&W is in about the same status, even though it is in the middle of that property, it is a bigger city, it is more [fol. 315] in the interchange, in the middle of it, and it is on the property.

Q. Well, would it be as against—would it be the most important interchange point as against Minneapolis if it were a combined operation, the TP&W and the—

A. (Interrupting) I don't know what the interchange is at Minneapolis.

Q. Would you say that the standards of public interest that you refer to in having Peoria as the headquarters of or of not having Minneapolis the headquarters of a merged M&StL-TP&W were consistently carried out in your various regions on the Pennsylvania?

A. They couldn't be entirely consistently carried out because of the size.

Q. As a matter of fact, there isn't much consisteney in the location of the headquarters of your various regions, is there?

A. Yes, I think there is, if you will analyze the traffic and the employees in the importance of the railroad, you will find we hit the nine spots pretty well.

Q. Those are the elements that are important in determining the public interest?

A. That is right.

Q. Let me ask you something, what is the extent of the autonomy of these divisions that you refer to?

A. Well, each region is in charge of a regional manager, [fol. 316] and the case of two of them he was also a vice-president, Pittsburgh and Chicago. They have, under their jurisdiction, all matters pertaining to the running of that railroad within their area from the standpoint of operation, maintenance, solicitation of traffic, real estate, industrial development, passenger sales and services, in other words, the regional manager is responsible for the whole railroad operation within that territory. He will have his own set of accounts.

As to the revenues he takes in, the expenses paid out, and we expect after it is ironed out that we will have a pretty complete fine setup here within the system, fine regional headquarters.

Q. What is the purpose of this regional regionalization, if I may use the term, of the Pennsylvania?

A. We feel it will strengthen us from the standpoint of efficient operation as well as in the solicitation of traffic.

Q. The smaller operations will be more efficient?

A. We believe so, with the delegation of authority to these regional managers, and we hope it will.

Q. Ultimately, of course, those regional managers are responsible to you?

A. No, not directly. We have, of course, our system staff consisting of a number of vice-presidents in charge of various departments and will co-ordinate the activities as between the departments in the regions.

[fol. 317] Q. What is your smaller district in terms of gross revenue, or region, I should say?

A. I believe it would be the southwestern.

Q. Can you tell me about what that is?

A. Oh, I believe that would be sixty million, maybe.

Q. And your largest would be the Pittsburgh?

A. Yes.

Q. And what would the size of that be?

A. That might very well go to two hundred, maybe a little more.

Q. With all of these managers having this autonomy, what is your role in the Pennsylvania now?

A. I still can't get away. Well, my role is to try to co-ordinate the activities as between my staff and this group.

Q. And they in turn are responsible to you and you in turn are responsible to your Board of Directors? Mr. Symes, you referred to the speed of the interchange at Effner. Would that be in any way affected by acquisition of the TP&W by the M&StL?

A. Would it?

Q. Yes.

A. I really don't know. It depends to what happens to the traffic on the east end of the branch. If it grew a lot, we'd probably have to put in more. If it diminished, we'd probably have to pick some up.

Q. You would be glad to see it grow a lot, wouldn't you?

A. Yes, I would.

[fol. 318] Q. Mr. Symes, you state in following down in your testimony on page 3, "Does anyone think that the M&StL would continue the heavy interchange with the Santa Fe at Lomax, rather than attempt to concentrate it through Nemo 29 miles away?" What is the reason for your statement?

A. I would think if the M&StL owned the two routes rather than having one through Nemo and Lomax, the logical thing to do would be to develop it from the standpoint of economies. Again discussion I had with Mr. Sprague was that if he did it he was going to abandon the west end of the TP&W at Peoria and do the very thing I say there.

Q. So the reason there might be an economy resulting from an abandonment, is that correct?

A. Perhaps plus an economy from the standpoint of traffic.

Q. You are aware, of course, that that could not be done without the Commission's approval?

A. I am.

Q. Has the Pennsylvania been engaged in a program of abandoning unprofitable operations in recent years?

A. We have, and services.

Q. Do economies control the Pennsylvania decisions?

A. What?

Q. Do the economies to be effected control the Pennsylvania?

A. The economies and practicalities.

Q. I am not sure that I know what you mean by practicalities.

[fol. 319] A. I know what you are referring to here, and if all the traffic was concentrated through one and there wasn't very much left you might very well justify the abandonment of the railroad because there wouldn't be enough there to support it without the through traffic, which might be detrimental to the communities but would be a business proposition from the standpoint of the management of the property.

Q. Don't you take public relations in relation to shippers and other such matters into account in determining whether to abandon a given line?

A. It is one of the factors against the weight of economies.

Q. You have no reason to believe that the M&StL wouldn't take those into account, do you?

A. That is what I am saying, I think they would.

Q. Do you think it would be in the public interest for the Pennsylvania and Santa Fe if they got control of the TP&W to abandon the Lomax-Peoria line?

A. Do I?

Q. Yes, sir.

A. No.

Q. How about the Lomax-Effner line?

A. No. You mean Effner and Peoria?

Q. Yes, sir.

A. No. It is a very important transcontinental gateway, whether you like it or not, and should be encouraged and [fol. 320] not diminished. I think it is too important to our future economy to transportation in this country.

Q. Would the Pennsylvania follow any hostile or discriminatory practices against the TP&W and the M&StL, if you were to acquire the property?

A. We don't become hostile with friendly connections.

Q. At page 4 of your testimony you refer to the causes, you state that the causes of success of the TP&W might, if now disrupted, result in its failure. Now, you have previously referred to—

A. (Interrupting) Where do you read that?

Q. At the bottom of the page.

A. Oh, yes.

Q. Those causes that you have referred to, first of all, past long-time working alliance. If I understand you correctly, a previous answer, that would not be affected one way or the other by Pennsylvania-Santa Fe control or, on the other hand, M&StL control?

A. Here is what I was trying to drive there. We are a stub end railroad coming into the TP&W at Effner and the Santa Fe, on the other end. I said when I got in here we have set up a wonderful service, competitive with any other gateway, plus the rehabilitation since McNear's regime and put it on a competitive basis. We are giving this service. Let's assume a lot of interests in here that is not [fol. 321] their best case to promote the continuance of it. As I mentioned, Nickel Plate, don't you think very likely they would like to take the long haul to Buffalo instead of taking it over to Effner and giving it to the Pennsylvania. I think I would, if I were them. But we think what is pre-

posed here will promote it. This, as Mr. Gurley said, this diluting and diluting at the Effner interchange would bring about a situation that we just couldn't make out from Logansport and give them that service. That is what I mean when I say we made it, if anything here does harm to it, we could destroy it. That is not a threat, I don't mean it that way but I could very well do it from the standpoint of economics. What I say again is we are trying to continue the TP&W as it is. M&StL, I would think, would gain, but that is matter of opinion.

Q. Well, Mr. Symes, I take it this is all addressed to the question of dilution primarily rather than acquisition by the M&StL?

A. We are trying to preserve what it is now there. We preserved it, continued with the service of the TP&W, we want to continue it and we think this is the best way to do it. You divide it up and you get an interest in there that don't have the same situation or same feeling toward the TP&W, you could start diminishing it and we at the other end would have to do it economically.

Q. You don't have any doubt about the friendly feeling [fol. 322] of the M&STL toward the TP&W, do you?

A. No, I don't.

Q. It would be to their direct interest to promote this Peoria gateway as they always have?

A. Don't you think the M&StL would take the long haul?

Q. What is that?

A. Don't you think the M&StL would take the long haul?

Q. What would the long haul?

A. Oh, the TP&W would Effner.

Q. So we would promote?

A. Yes.

Q. So our interest and theirs would coincide?

A. The reality of the situation, we think, the two are really not competitive transcontinental route with it at each end, instead of bringing in everybody else, might have the effect of destroying it as compared to the other two, and it would. It is just a natural of these two areas, all you have to do is look at the map.

Q. In any event, Mr. Symes, if the M&StL gained control of it the past-working alliance at the east end, which is one

of the causes which you cite on the bottom of page 4 of your statement, would not be interfered with one way or the other, would it?

A. Well, it depends on what the M&StL would do.

Q. Can you tell me what the M&StL might do with the TP&W?

[fol. 323] A. If the M&StL had the TP&W and operated it independently as of now I don't think we would change our situation one bit at Effner, but if that condition changed we might very well change our condition at Effner, not by way of a threat but in the way of reality, but in effect the two logical railroads to own it are the Santa Fe and the Pennsylvania.

Q. I understand you feel that way about it, Mr. Symes, but I don't understand how the M&StL, how you would economically or otherwise be impelled to take any action with respect to your eastern connection with the TP&W at Effner if the M&StL gained control of the property?

A. Let's assume that the M&StL did gain control of the property, the first thing they probably would want is trackage rights over our railroad to Reynolds. They have announced that.

Q. Where was that announced?

A. Well, you talked to me about it.

Mr. Lucas: You are pointing to Mr. Heineman?

The Witness: What?

Mr. Lucas: You said "you".

A. Yes, we talked about it. It has been a dream.

By Mr. Wheeler:

Q. What did Mr. Heineman say to you?

A. He said what's bothering you is I am going to connect the TP&W up with the Monon and I would be willing to withdraw from that and make an agreement to that effect.

Q. That's what's bothering you?

[fol. 324] A. It would bother me, yes.

Q. Assume that's not in the picture.

A. What?

Q. Assume that's not in the picture.

A. How do I know it won't be?

Q. Assume for the purposes of my question that it is not in the picture.

A. Well, I will say this, if the TP&W could continue to operate as it now does, with that interchange at Effner, we will go and get it.

Q. Even though owned exclusively by the M&StL?

A. We'd have to.

Q. Mr. Symes, on page 4 of your prepared statement you made reference to a situation that might prevail when or if there were multiple ownership of the TP&W, you stated that others attempting to weaken it by lack of modernization and inferior service, can you more specifically identify whom you meant by others?

A. Well, the Santa Fe and the railroad owning the TP&W as part of a transcontinental system and its importance to us are naturally going to see that it is a pretty good route from the standpoint of a railroad. Now, somebody else coming in as an owner, along with us, might very well have another viewpoint on it, instead of the long haul going across. Maybe one railroad would say, why don't we take the long haul, which would deprive the TP&W of [fol. 325] traffic, than as you would deprive the TP&W of traffic you might very well destroy it, at least from the standpoint of earnings to do the modernization that is required in making a good railroad, and you get too many in there and if they don't go for the same common cause it could be very destructive in my opinion.

Q. That destructive effect would result from the competition of the other railroads with the TP&W?

A. That is right.

Q. Are you familiar, Mr. Symes, with the par value of the stock of the Wabash?

A. Par value?

Q. Yes, sir.

A. I don't know whether it has a par or not, to tell you the truth.

Q. Do you know what your investment in the Wabash amounts to?

A. I don't have it here. It is all a matter of record.

Q. You think it is a matter of record in that docket?

A. No, not in this docket. I say it is all a matter of record. I can get it for you.

Q. Would you furnish that for the record, please?

A. All right.

Q. I would also like to know what the market value of that is, too, at the time that is furnished.

Mr. Lucas: Mr. Wheeler, is that the par value of the [fol. 326] Wabash common stock?

The Witness: And the preferred?

Mr. Lucas: And the preferred?

Mr. Wheeler: Yes.

Mr. Lucas: And the market value as to the first two dates that information was furnished.

Exam. Albus: And the investment.

Mr. Lucas: What do you mean by investment?

Mr. Wheeler: The cost of the Pennsylvania.

Mr. Lucas: Our holdings?

By Mr. Wheeler:

Q. Did you, or any one on the Pennsylvania have any discussion on the Wabash prior to the initial discussions with the trustees for the McNear estate regarding the purchases of the TP&W stock?

A. I did not, and I don't believe anyone else did.

Q. Were any subsequent discussions had with them?

A. Yes.

Q. What was the substance of those discussions?

A. Well, Mr. Atkinson talked with me about the Wabash coming into this case, and I told him that he was on his own—that the Wabash is on their own and whatever he felt was necessary to best protect the interests of the Wabash Railroad it was up to him, I didn't have anything to do with it.

Mr. Symes, are you familiar with the fact that the [fol. 327] Wabash was a party in the Illinois terminal case?

A. I am.

Q. The Pennsylvania was a derivative party to that case, too, were they not?

A. How do you mean derivative?

Q. I mean out of relationship of the Wabash.

A. We gave our consent to the Wabash doing it, which we had to do legally, as I understand it, we were not in any way taking a position.

Mr. Lucas: Mr. Examiner, there was a separate application filed for the indirect effect of the Pennsylvania.

Exam. Albus: I think I remember it.

Mr. Lucas: I think you are familiar with it.

Exam. Albus: Let's take a 10-minute recess.

(Short recess.)

[fol. 328] Exam. Albus: The hearing will please come to order.

Before proceeding with further cross-examination of Mr. Symes, Mr. Martin has a statement to make for the record.

Mr. Martin: Mr. Examiner, to help speed my departure from this congenial company and pursuant to my request at the opening of the hearing, I would like to get two or three things straight, if I may.

First, from you, do I understand that the intervening petition of the Burlington has been received, and likewise that the verified statement in support of the conditional request for participation offered as Exhibit H-1 likewise is in evidence?

Exam. Albus: That is in the record.

Mr. Martin: From each of the counsel for carriers present I would like to ask whether I am correct in my understanding that each of them has approved the list of suggested conditions which was attached to our intervening petition as supplemented by the statement on the record by Mr. Thomas. I understand that to be so, but I would like to go down the line.

Mr. Wheeler, is that correct as to the M&StL?

Mr. Wheeler: Yes, sir.

Mr. Thomas: Yes, as to the Santa Fe.

Mr. Lucas: It is correct as to the Pennsylvania Railroad and as to the Pennsylvania Company.

Mr. Cassell: Yes, as to the Rock Island.

[fol. 329] Mr. Broker: As to the Nickel Plate, yes.

Mr Davis: As to the Wabash, yes.

Mr. Martin: I want to go down the line again and ask whether or not it will be necessary so far as those parties are concerned for me to call down to this hearing the witness who verified the exhibit H-1 or whether it may be treated as evidence without cross-examination.

Exam. Albus: Mr. Wheeler?

Mr. Wheeler: No need so far as the M&StL is concerned.

Exam Albus: Mr. Thomas?

Mr. Thomas: No need as far as the Santa Fe is concerned.

Exam. Albus: Mr. Lucas?

Mr. Lucas: No.

Exam. Albus: Mr. Cassell?

Mr. Cassell: None for the Rock Island.

Exam. Albus: Mr. Broker?

Mr. Broker: No, for the Nickel Plate.

Exam. Albus: Mr. Davis?

Mr. Davis: No.

Mr. Broker: May I ask with respect to Exhibit 2, that was the Nickel Plate Exhibit H-2, as to general information concerning its financial picture, do any of you want to call Mr. Weneman for verification?

Mr. Wheeler: No, sir.

Exam. Albus: Mr. Thomas?

[fol. 330] Mr. Thomas: No.

Exam. Albus: Mr. Lucas?

Mr. Lucas: No.

Exam. Albus: Mr. Cassell?

Mr. Cassell: No.

Exam. Albus: Mr. Davis?

Mr. Davis: No.

Exam. Albus: Mr. Martin?

Mr. Martin: No.

Exam. Albus: One more. For the Rock Island, the same question, and the same answer?

Mr. Wheeler: Same answer.

Exam. Albus: Thank you very much.

Continue with your cross-examination, Mr. Wheeler.

By Mr. Wheeler:

Q. I believe you had just finished stating that you talked to Mr Atkinson of the Wabash with respect to this case. Is that correct?

A. That is right.

Q. And the question that was discussed, as I recall it, was whether or not the Wabash should intervene, is that right?

A. Yes. I am a director of the Wabash, and at their last meeting I could not be present, and he discussed with me for that reason as to whether or not as a director I had any objection to the Wabash intervening in this case, and I told him that it was up to he and the directors, I [fol. 331] wasn't going to be there, but certainly whatever they felt was the right thing to do was all right with me.

Mr. Broker: Mr. Examiner, I hate to repeat this, but we can't hear all of the questions.

Mr. Wheeler: I will try to speak up.

Exam. Albus: If you will, please.

By Mr. Wheeler:

Q. After you acquired subject to Commission approval your interest in the TP&W stock, did you discuss with Mr. Atkinson, with Mr. Atkinson or anyone else on the Wabash, the protest filed by the TP&W against the petition of the Wabash and other parties to take over control of the Illinois Terminal?

A. No.

Mr. Martin: Mr. Examiner, after Mr. Wheeler's graciousness in response to my request, but I do object that has nothing whatever to do with this case.

Exam. Albus: Yes, what is the purpose of that question, Mr. Wheeler? We are getting a little far afield here.

Mr. Wheeler: The purpose relates to the exercise of control over old companies.

Exam. Albus: The objection is overruled.

You may answer, Mr. Symes.

A. No, I did not.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

[fol. 332] By Mr. Wheeler:

Q. Mr. Symes, does the Pennsylvania Railroad or any of its subsidiaries or the Pennsylvania Company maintain any deposit with the Wilmington Trust Company?

A. I cannot answer. I do not know.

Q. Can you ascertain that?

A. Yes.

Q. Will you furnish that information for the record?

A. My opinion would be they would, but I don't know as a fact.

Q. If you will furnish that information and the amounts, I would appreciate it.

A. All right.

Q. Is Mr. Lammot DuPont Copeland, shown in your application as a director of the Pennsylvania Railroad, also a director of Wilmington Trust?

A. I do not know.

Q. Will you ascertain that fact?

A. Yes.

Mr. Lucas: Mr. Wheeler, are you asking Mr. Symes a question that he should develop whether Mr. Copeland is a director of the Wilmington Trust Company?

Mr. Wheeler: Yes, sir.

Mr. Lucas: I beg your pardon?

Mr. Wheeler: Yes, sir.

Mr. Lucas: Why don't you develop that information from [fol. 333] the Wilmington Trust Company?

Mr. Wheeler: This man is a director of the applicant company. I should think that information most properly should come from him.

Mr. Lucas: I don't see why that information should not be developed by your witness.

Exam. Albus: Mr. Symes said he would supply it.

Mr. Lucas: Mr. Examiner, I am not objecting to a question which I think is entirely irrelevant to what is going on here.

Exam. Albus: I appreciate that.

Mr. Wheeler: Mr. Examiner, I might note I didn't object to a lot of hearsay in the direct testimony, too.

Exam. Albus: Very well. Let us proceed, please.

By Mr. Wheeler:

Q. Would you please at the same time supply the name or names of any persons who are directors, officers or directors, of Pennsylvania Railroad Company's subsidiaries

and also officers or directors of the Wilmington Trust Company.

A. Yes.

Mr. Lucas: Mr. Examiner, Mr. Wheeler has representatives of the Wilmington Trust Company here. Why can't he develop that information in his own case?

Exam. Albus: Maybe it will come out later. I don't know. If it doesn't, Mr. Symes will furnish it.

By Mr. Wheeler:

Q. Mr. Symes, does the Pennsylvania Railroad or the Pennsylvania Company own any bonds of the Wabash?

fol. 334] A. Bonds?

Q. Yes, sir.

A. I will have to let you know on that, too.

Q. Mr. Symes, or would Mr. Carpi know, be better informed on the total traffic derived from the DuPont Company?

A. I think he would be better qualified.

Q. Mr. Symes, in your exhibit, H-14, you set forth some excerpts from various consolidation plans for the railroads of the country. Those consolidation plans were proposed in connection with a section, a paragraph of Section 5, which is no longer in the statutes in the Interstate Commerce Act, isn't that correct?

A. I understand that is right.

Q. Do you know whether or not these were all of the plans that were considered by the Commission?

A. I can't answer as to whether there were others or not. I think it is, all that were formally considered, but I couldn't say.

Q. Do you know whether or not, in essence, with respect to any of these plans that are shown in your exhibit?

A. The sense?

Q. Yes, sir.

A. I assume they were, although I am not familiar with the details.

Q. Are you familiar with the fact that—well, does the Pennsylvania Railroad control any companies that were

fol. 335] allocated to other systems by any of the con-

solidation plans to which you adverted in your exhibit, H-15, that is, the Pennsylvania, the Railroad or the Pennsylvania Company?

A. I don't believe I can answer that. I don't recall any, but I could be mistaken.

Q. Do you know whether the Wabash was allocated to the Pennsylvania in any of the plans which you have referred to here?

A. Yes, I know it was in the two-party plan.

Q. I refer to page 11, the middle paragraph, reference there to the Wabash Seaboard System.

A. Yes.

Q. Mr. Symes, wasn't it a fact in those proceedings the TP&W objected to being included in a system to which the Wabash was allocated, irrespective of which system it was?

A. My recollection is that I think that is right.

Mr. Wheeler: I have no further questions.

Exam. Albus: Thank you very much.

Mr. Cassell?

Mr. Cassell: May our normal order be reversed and the Nickel Plate go first?

Exam. Albus: Yes.

Mr. Broker.

Cross examination.

By Mr. Broker:

Q. Turning to page 3 of your statement, reference is there made to the Nickel Plate and the suggestion is made [fol. 336] that we would favor eventually the discontinuance of the eastern half of the TP&W. In making that statement, you are considering the situation as if the Nickel Plate were the sole owner of the TP&W, is that not so?

A. Not entirely so. I should think that if they were a part owner that they would still be very much interested in taking the long haul on the traffic through Peoria rather than going to Effner.

Q. How could the Nickel Plate as a part owner with the Pennsylvania possibly promote abandonment of the east half of the TP&W?

A. They could certainly, if they were successful in getting a large part of the traffic through Effner and drying that up, it would automatically follow that the east end of the TP&W might not be economically justified. My intention there was to show that the conflict of interests of the Nickel Plate as a part owner as compared with the Pennsylvania could very well be apparent, which doesn't promote harmony.

Q. And you don't think there is any conflict of interest between the Pennsylvania Railroad and the TP&W?

A. Conflict of interest?

Q. Yes.

A. No, I don't. Very, very little.

Q. Not through your ownership in the Wabash?

A. Well, not entirely, no. As I say, we are working under orders of the Wabash that are being carried out where we don't interfere with them in any way, all the routes and [fol. 337] divisions. That is a good example of what we are proposing here, I think. The same fears were expressed there, but they haven't worked out, it is working out beautifully.

Q. But you already have your interest in the Wabash?

A. I know, but I say, isn't it working out all right? I think it is. I think everybody else thinks it is working out all right. The fears were not there.

Q. Let's assume for the moment that it is.

A. Yes.

Q. The fact is, though, you have that interest in the Wabash today, don't you?

A. We do.

Q. And doesn't that interest conflict with the TP&W?

A. No, I don't think so. They are competitive, sure.

Q. That is just what I mean, aren't they competitive?

A. They are.

Q. And you'd have 100 per cent ownership

A. (Interrupting) And we are, too, we are competitive with the Wabash.

Q. I know that. I have advocated that in a case once.

Q. You don't feel you have a conflict of interest, then, with the TP&W. Why, then, do you advocate the long haul to St. Louis, if you can get it?

A. Well, I think, to be perfectly frank about it, if we have this fifty-fifty ownership in the TP&W as it is proposed I won't be too much concerned whether it goes Effner or St. Louis. It is only natural that you look at the long haul, but I don't think I would be too much worried about it. I think you would put all the gateways on a parity with service and certainly wouldn't interfere very much with a solicitation.

Q. Aren't they on a parity of service today?

A. Generally, yes.

Q. But you will do everything possible to equalize them?

A. I would say that we have today three gateways, principal gateways, to the west, which is this one, Chicago, St. Louis. If we had a 50 per cent ownership in the TP&W I think it would make us sort of put them all on a par. It wouldn't make much difference to me one way or the other. You get a little more money on the long haul, and it is true you get, you have a little less expense in the short haul.

Q. Those gateways compete today, don't they?

A. They do. All three of which handle a substantial volume of traffic. We want to preserve it. We think it is important that this gateway be preserved and we don't know a better way of doing it than what we propose.

Q. In your speech made here in Peoria on July 8, 1955—that is page 7 of H-14—you made the statement to the members of the public that were present that the two railroads—that would be the Pennsylvania and the Santa Fe—do not compete with the railroads they are acquiring. How does that square with your testimony?

[fol. 339] A. I think it squares all right.

Q. Now, I take it it is the Pennsylvania's policy today to promote the long haul to Effner whenever possible?

A. To do what?

Q. Promote the long haul to Effner over the TP&W.

A. Coming east?

Q. Yes.

A. Well, I wouldn't say that. I don't think we favor Effner over Chicago or St. Louis.

Q. I am talking about traffic which is moving over the TP&W. Your primary interest is in the long haul movement to you at Effner, isn't that true?

A. Oh, sure.

Q. Won't that continue to be your policy as a part owner?

A. I would think so. We don't want to change what is going on now, as a matter of fact. That is the reason we are even ready to stipulate all these things.

Q. You indicated earlier in your testimony that the best thing you can do to preserve what you have is by ownership. Do you recall that testimony?

A. Yes.

Q. And that would apply to all lines, wouldn't it?

A. Well, no, I don't believe it would preserve what you have. The two lines that want to preserve what they have [fol. 340] are the ones that are really responsible for the TP&W as it is, and if you get a lot in there with minor interests and some with objectives which might not be to the interests of the TP&W, you might not find it so with that sort of ownership.

Q. Are you a director of the Wabash?

A. I am.

Q. May I ask you how you voted on the Wabash petition?

A. I was not present, as I explained.

Q. Were the other directors of the Pennsylvania present?

A. I cannot answer that. We have two other ones on there, but whether they were present I do not know. The discussion with me was as a director, by the president, was there any objection on my part because of me not being present to their doing it, and I told them it was absolutely not and it was up to them to do what they wanted to do.

Q. Wouldn't that promote the further dilution?

A. No, the Wabash, as I understand it, are in here to protect what they now have, as we have stipulated, and the only reason they would want an ownership is because you would get one or somebody else, but I think the Wabash petition indicated, as I recall it, their appearance in the case, if there are interchanges, divisions, working arrangements are continued in effect and only the Santa Fe and Pennsylvania own it, that is satisfactory with them. I think that is correct.

Q. In other words, the Wabash is not opposing the Penn- [fol. 341] sylvania in this case?

A. They are only in there to protect and preserve what they now have, and in the event additional ownerships are allocated, they want one, too.

Q. What ingredient do the additional owners have—

A. What is that?

Q. What ingredient do the additional owners have that jeopardizes the position of, let us say, the Wabash?

A. Well, you and the Wabash and the Nickel Plate are pretty competitive, and it's only natural that these competing lines feel that if you get it I want it, and if you get a lot of interests in there there isn't any doubt about it, as it has been said, you get too many cooks in the broth and it isn't any good, and I am fearful that is what could happen here. We want a united front to continue this property as it is, and the Santa Fe and the Pennsylvania can furnish that and I don't believe it can be furnished with a group of owners.

Q. In other words, through ownership a competitive advantage may be gained, is that right?

A. I wouldn't say so much gained as it would preserve what we have.

Q. Well, you say the Wabash wants to come in because—

A. (Interrupting) Well, the Wabash naturally wants to come in to protect themselves. They have a couple of trackage arrangements and I think three interchange points, and they want to see that those things are preserved, not [fol. 342] that they are fussing about we and the Santa Fe owning the stock, at least I don't think so. They will have to speak for themselves. That is as I recollect.

Q. What we come down to, then, is ownership provides the best protection that you can have, is that right?

A. I think the ownership of the Santa Fe and Pennsylvania best provides the continuance of the TP&W as an important transcontinental route than any other arrangement.

Q. I know your position. What I am trying to find out is whether or not you think the element of ownership provides protection to a railroad above and beyond non-ownership.

A. Oh, I guess realistically you would have to say yes to that. It is not the intention to do it, but that is why we have rules that the Commission stipulate in cases of that kind.

Q. You feel that you people, then, are logical owners because you are on the east and west end?

A. Yes; we are stub end to them as part of a transcontinental route.

Q. But you have a line in Peoria?

A. We do have a line in Peoria and it is true there is certain eastbound traffic that moves that way, and I don't know why, because we cannot compete servicewise with that route. I indicated this morning if you start two cars out of Peoria at the same time, one this way (indicating) and [fol. 343] one that way (indicating) and one that way (indicating), the one that goes through the Effner gateway is three hundred miles east 30 hours after it leaves of the other one. It is true, the TH&P or the Terre Haute branch to Terre Haute gets a little further, not much, it is important to the community it serves, and Decatur is in the middle.

Q. It connects with your main line at St. Louis, does it?

A. At Terre Haute.

Q. That main line gives pretty good service, I assume?

A. The same as Effner and the same as Chicago, but you can't get it down to it.

Q. What were the factors, again, that prevented this from being a service route? You said there was a speed restriction, if I recall, a 30-mile speed restriction.

A. Yes, our track.

Q. Who imposes that speed restriction?

A. Who does what?

Q. Who imposes that speed restriction?

A. The operation people of that division.

Q. Is it because of the quality of the track?

A. Partly the track.

Q. What would be the other reasons?

A. Light bridges, curves, general construction of the railroad.

Q. What about crossings of other railroads?

A. The same thing. There are numerous crossings, some [fol. 344] of which we have to stop under the law, others are interlocked and we don't.

Q. There is no thirty-mile restriction on the part of the Nickel Plate you travel on now, is there?

A. No; that is a pretty good railroad.

Q. Forty-nine miles, isn't it?

A. I don't know. I would say yes.

Q. In other words, just about every factor that you mentioned was within the control of your company to correct, isn't that right?

A. Yes, but why should we spend the millions of dollars involved to do it when there is another line through Effner that provides the same thing?

Q. The point is, you could do it?

A. I doubt it. We are 67 miles longer that way, and that is a pretty good handicap.

[fol. 345] Q. A little better than two hours on a 30-mile restriction?

A. If you made it, but you can't run, I don't think, no matter what you do to that place.

Q. How long was the Pennsylvania once in control of this property jointly with the Burlington, do you know?

A. No. It was many, many years. I don't know exactly how long.

Q. Thirty-three, wasn't it, 1893 to 1926?

A. I would say that is about right.

Q. During that period of time did the property prosper?

A. No. Oh, there might have been a few years.

Mr. Lucas: Mr. Examiner, may I say the receivership started in 1917.

Mr. Broker: I understand that, but you still retained directors on the Board of Directors, didn't you?

Mr. Lucas: It was in receivership. I think that makes a totally different picture.

Exam. Albus: Do you know whether or not they maintained directors?

The Witness: No, sir.

By Mr. Broker:

Q. Then you were in control 20 years prior to receivership?

A. Well, we were involved in it, yes, as part owner.

Q. Do you know whether or not the Pennsylvania Rail-

road ever advocated the scrapping of the west end of the line?

[fol. 346] A. I do not. I heard it here this morning but I didn't know it.

Q. Do you know whether they ever made any representations that the property could not be operated profitably as an entirety?

Q. That is just what I mean.

A. No, I don't know whether they did, but I say if they did they were wrong.

Q. Can you have your records searched to see whether in the proceedings at the time of the receivership sale you people ever advocated anything like that publicly or otherwise?

A. I don't think it means anything here to go back that far. We are not talking about what happened—

Exam. Albus: I am not going to require him to furnish that information.

A. I think you are talking in the past.

Exam. Albus: That is too remote.

Mr. Broker: This party comes in and states it is the logical owner. It was an owner for 33 years, and I think it is quite relevant.

Exam. Albus: You can put that in your brief. Isn't that information available to you?

Mr. Broker: No, sir.

The Witness: How do you know it, then?

Exam. Albus: Just looked for it.

It is too remote, Mr. Broker. We have gotten an awful lot of things in here, but you have to put a stop someplace. [fol. 347] What is information you are asking for?

Mr. Broker: Whether or not the Pennsylvania ever advocated scrapping the west end of the line.

Exam. Albus: You want Mr. Symes to search the record to find out whether that has ever been done?

Mr. Broker: I don't want to go on a fishing expedition, but maybe there is somebody in his railroad who knows.

The Witness: I will try to find out.

Exam. Albus: I am not going to require it.

The Witness: It might be right, but I don't know whether it is or not.

By Mr. Broker:

Q. I don't want to put a burdensome task on you. It is not a fishing expedition, believe me. The point is, though, why, after such a record, even aside from the question of the scrapping of the road, which has not been established as a fact, should other parties such as the Nickel Plate come in and rely on representations as to logical ownership?

A. I think the facts speak for themselves. Look at that map there. It shows you very clearly why we feel that way.

Q. You are a part owner of many other roads, aren't you, with this multiple ownership?

A. It depends on what you call many. Yes, we have a part ownership in the DT&I, the RF&P, a lot of terminal companies.

Q. Lehigh and Hudson River?

A. Yes.

[fol. 348] Q. Do you consider them efficient companies?

A. The DT&R, of course, is a recent acquirement of the stock, I think 1950, which is approved by the Interstate Commerce Commission, again under certain stipulations. I don't think anybody can find fault with them. I think they are working out beautifully, the same as here. The L&H that was built was a bridge line built to serve New England by a certain group of railroads. As to whether it is efficient or not I don't know. I have never been too closely associated with the property.

Q. RF&P, do you consider that efficient?

A. Yes, I would say they are efficient, and it is very much a parallel to what we are talking about here, the B&O and Pennsylvania are the two principal connections on the north and the Seaboard and the Coast Line on the south. I mean that is the heavy volume. There is a bridge line between us.

Q. There are six railroads interested in that?

A. Six in the State of Virginia. There are seven ownerships. But the principal business on it is the B&O and Pennsylvania on the extreme east and the Pennsylvania and Coast Line at the extreme south end, very much like what we are talking about here.

Q. And there are six owners in the Lehigh and Hudson.

A. I think so.

Q. Jersey Central, Reading, Pennsylvania, Lackawanna, Erie and Lehigh Valley, that's about it, isn't it?

A. Yes; I thought there were six or seven, but if you [fol. 349] have it there, that's right.

Mr. Broker: No other questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Symes, you said there was a difference of 69 miles, I believe, between the two routes by use of the TP&W and by use of your own railroad into Peoria?

A. Sixty-seven, I think I said.

Q. That was between where and where?

A. Well, the first competitive point, I would say, would be probably Columbus, Ohio, and it is 67 miles longer from Peoria by Terre Haute than it is over the TP&W through Effner and Logansport. That is where they come to the common point.

Q. All right, how much difference in time on a shipment, starting out from Columbus and going via the TP&W against the one going via Terre Haute?

A. To where?

Q. Peoria.

A. A day.

Q. A day's time?

A. Yes.

Q. And you think that a day's time is enough to prevent that from being a competitive route?

A. These days it certainly is.

Q. And any other railroad similarly situated would not [fol. 350] be competitive either?

A. What is that?

Q. Any other railroad similarly situated would not be competitive?

A. Oh, you could call it competitive. I didn't say we weren't. I say we were slightly competitive, but as a reality, because of our service efficiency, we were not.

Q. It is either competitive or it isn't?

A. You can't be really competitive unless you match the service and we don't match it by a day.

Q. If you were told that the Rock Island took a day or more on its route from the west into Peoria via Silvis as against the Keokuk gateway, you would make the same answer, would you?

A. If it took—

Q. If it took the Rock Island a day or took longer as against the Keokuk Gateway, you would make the same answers, then, wouldn't you?

[fol. 351] A. I would have to. You would not be truly competitive with that service handicap.

Q. We would be competitive just as much as you are on the east end, isn't that right?

A. That is probably right.

Mr. Cassell: That is all.

Exam. Albus: Are there any further questions on cross-examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Lucas: No redirect, Mr. Examiner.

Exam. Albus: Thank you very much. You are excused.

(Witness excused.)

OFFERS IN EVIDENCE

Mr. Lucas: May I now offer Exhibits H-14 and H-15.

Exam. Albus: Let the record show that Exhibits marked H-14 and H-15 are received at this time.

(Applicant's Exhibits Nos. H-14 and H-15, Witness Symes, were received in evidence.)

Mr. Lucas: Mr. Examiner, if we might now have the exhibits of Mr. Carpi distributed, who will be our next witness.

Exam. Albus: Very well.

FRED CARPI was sworn and testified as follows:

Direct examination.

Mr. Lucas: Mr. Examiner, he has just the one exhibit, [fol. 352] the blue book, which we will ask be marked for identification.

Exam. Albus. Let the record show the exhibit to be introduced through Mr. Carpi is marked for identification as H-16.

(Applicant's Exhibit No. H-16, Witness Carpi, was marked for identification.)

Q. Mr. Carpi, will you state your name and your position and your business address with the Pennsylvania Railroad Company?

A. My name is Fred Carpi. I am vice-president of freight sales and services and my address is Philadelphia, Pennsylvania.

Q. Will you state, please, for the record, within reasonable brief compass, but never the less so that we will have some basis of your traffic experience?

A. I have held an official position with the Pennsylvania Railroad since 1929, and my duties during that period have taken me into rate construction, solicitation, both freight and passenger, and industrial development and matters of that kind including administrative matters.

Q. Your present position, you have stated, is under the reorganization referred to in Mr. Symes' Exhibit?

A. Correct.

Q. But prior to the November 1, 1955, date you were vice-president in charge of traffic?

A. That is correct.

Q. And how long have you occupied that position?

[fol. 353] A. About six years.

Q. And prior to that what was your total experience in the traffic field?

A. About 20 years.

Q. Was there prepared under your direction an exhibit which has been marked for identification as H-16?

A. Yes, sir.

Q. Will you take up the exhibit before you give your testimony and just take each page and very briefly state what the page consists of?

A. Page 1 of my exhibit shows the distance and transit time from Peoria to Columbus via the Effner route and our Peoria branch. Note that the distance which is shown in the center of the page via the Effner route is 66 miles shorter, and the transit time almost 11 hours faster. This difference in transit time is obviously controlling in the movement of traffic.

Q. Mr. Carpi, may I interrupt, would you just take the exhibit and explain the lines on the left and on the top between the arrows?

A. Well, the line on the top is T. P. & W. to Effner, thence our line to Logansport, thence our line to Bradford and continuing to Columbus.

The line on the south is our Peoria branch to Farrington where it connects with our panhandle division, thence the main line clear into Columbus, through Indianapolis and Richmond.

[fol. 354] Page 2 is another illustration of the disability of the Peoria Branch. The distance from Peoria over the Peoria Branch to Farrington is 54 miles greater than from Peoria to Effner via the T. P. & W.

Mr. Symes has already elaborated on the physical disabilities of this route and I will not cover that.

Page 3 shows the short-line mileages between representative points via Chicago, Peoria and East St. Louis. It will be noted that to the central part of the West, the Effner route is generally shorter. I am referring now by Central west to Omaha and Kansas City which would apply with equal force to points like Denver and San Francisco.

Page 4 shows the distance via various routes between Peoria and selected eastern cities served by the Pennsylvania. I shall treat more fully on this later in my testimony.

Page 5 is a comparative statement of traffic handled in connection with our line via the Peoria Branch and the Effner Route. It will be noted that on beyond traffic that is competitive, the volume via the Peoria Branch is only 12 per cent of the total handled via the two routes. More specifically I refer to item 6 which shows that under the

Peoria—caption "Peoria Branch" the competitive traffic is 492 cars as contrasted with the column headed "Via T. P. & W.-Effner" which shows a figure of 25,735 cars.

Page 6 shows the freight schedules in effect via the route. [fol. 355] They provide a fully-competitive service. There is no counterpart to this via the Peoria Branch. Generally service via our Peoria branch is one to two days longer than via the Effner Route.

Page 7 reproduces letters from the general traffic manager of our company to his staff, outlining the position of the Pennsylvania with respect to competitive traffic insofar as the T. P. & W. is concerned. The general traffic manager of the Pennsylvania reports to me.

Pages 8 to 11, inclusive, reproduces an interchange of correspondence between myself and the vice-presidents in charge of traffic of the Wabash and the D. T. & I. These are self-explanatory.

Q. Now, Mr. Carpi, will you take up and proceed in your own way, please, your general testimony additional to your exhibit?

A. For years St. Louis and Chicago have been our principal gateways on traffic to and from the West. By the West I mean practically all the territory west of the Mississippi River except the extreme northeastern and southeastern portions. Both gateways have been used extensively on transcontinental traffic. St. Louis is particularly important on southwestern traffic, and Chicago on northwestern traffic.

Peoria has always been an important gateway for some lines, but not much of a factor to our company because of operational problems and, to a lesser extent, circuity. More- [fol. 356] over, certain segments of our Peoria Branch are not under our direct control. Our Peoria terminal facilities are on the Peoria & Pekin Union, and we must pay this carrier rental and trackage charges, as well as switching charges, to and from all industries and all interchange connections. Our access into the P. & P. U. East Peoria Yard is by trackage rights over the Nickel Plate route from Farmdale. From Maroa south to Hervey City it is joint with the Illinois Central. The first 15 miles to Decatur is by trackage rights over the I. C., and trackage rights are used to reach many Decatur industries. South of Decatur

for the seven and one-half miles to Hervey City the track is jointly-owned by our company and I. C. In view of the conditions described, it must be fairly apparent that it is not possible to make our Peoria Branch a competitive route on through East-West business.

During the time the T. P. & W. was strike-bound, we attempted to experiment with the possibility of making our Peoria Branch competitive. We established through train service. While we obtained some additional business, purely because of the strike situation we could not match competing services, and when the T. P. & W. resumed operations the new business that we had developed disappeared.

Upon acquisition of the T. P. & W. by Mr. McNear, a determined effort was made to capitalize on the potential of this route, particularly in bridging two important end-to-end carriers, namely, the Santa Fe and the Pennsylvania. [fol. 357] Such effort has been successful from the very moment Mr. McNear obtained our pledge of cooperation and armed with this pledge then proceeded to work out the connection with the Santa Fe at Lomax. It is also pertinent to point out that there has been quite a transition in the economy of the West, which had a direct bearing on the growth of traffic via the Effner-Lomax Route. For many years Chicago and St. Louis were the wholesale or marketing centers of the West. It is only within the last 25 years that through rates have been in effect between a large part of the West and the East. The former practice of moving through traffic on combination rates undoubtedly gave Chicago and St. Louis great advantages over Peoria. St. Louis and Chicago could transit all kinds of traffic at no extra charge. This caused those two routes to be preferred. In the past, our company has at times been handicapped through Chicago because of congestion. The Effner Route (T. P. & W.), lying athwart St. Louis and Chicago, offered us an additional and much-needed gateway. The rapid development of natural resources in the West, the influence of World War II, particularly the Pacific phases, the dispersion of industry with the consequent increase in population and production of goods, and the other factors previously mentioned have indicated quite clearly our need

for an additional gateway that can provide competitive service. The Effner Route (T. P. & W.) supplies this need. Financially, our company fares just about as well on traffic via the Effner Route via Chicago. Traffic over the Effner [fol. 358] Route has shown a remarkable growth over the years, and the business interchanged by the T. P. & W. with the Pennsylvania and Santa Fe is the keystone of its continued success.

The Pennsylvania would not be interested in promoting the growth of traffic via the Effner Route if there were an alien ownership or a division of the ownership beyond the two applicants, namely, P. R. R. and Santa Fe.

Up to now, we have maintained a friendly neutrality toward the T. P. & W. Provided we obtained a line haul, we never objected to the inclusion of the T. P. & W. as an intermediate or bridge line. Stated differently, there was no counter-solicitation against the T. P. & W. If we acquire half-ownership as proposed, we intend to change our policy. We intend to recognize Effner as one of our principal interchanges and place it on a par with Chicago and St. Louis. We will as heretofore, solicit via the gateway giving us the longest haul, but if other considerations such as time in transit, transit privileges, or shipper inclination favor another route, we will not work against Effner.

With large resources at our command, we believe we can help the T. P. & W. in many ways. For instance, we have had an industrial survey made of the line, from which we have concluded that there are opportunities for industrial development. We have a large and trained staff engaged in this important field, and our facilities would be made available to the T. P. & W. At present, only 28 per cent [fol. 359] of the traffic handled by the T. P. & W. originates and terminates on the line. We think and believe that this local traffic can be substantially increased through the development of new industries, with the assistance of our company and the Santa Fe.

It is very advantageous for the T. P. & W. to be owned by the two carriers with which it interchanges most of its traffic. Sixty-four per cent of the revenues derived by the T. P. & W. comes from the traffic interchanged with the Pennsylvania and the Santa Fe. The overhead traffic be-

tween these two roads is the only substantial volume on which the T. P. & W. obtains its maximum haul. A friendly attitude from these two carriers is obviously essential to its continued success. Such an atmosphere cannot be expected if the T. P. & W. should fall into alien hands or if the control were diffused. In the latter instance, there would be a case of everybody's business being nobody's business.

With diverse ownership, it would simply be unrealistic to expect the T. P. & W. to obtain from any one owner the type of support necessary to insure the continued growth of its business. With acquisition of the T. P. & W. by the Pennsylvania Railroad and Santa Fe, the T. P. & W. can be expected to maintain the aggressive sales and service policies which it has found so successful in the past. It will, as heretofore, continue to solicit available traffic by all of [fol. 360] its existing routes. It is obviously in the interest of the T. P. & W. that all of its existing channels be kept open, and this policy will in no-wise be affected or changed if our application is approved.

Mr. Lucas: Mr. Examiner, that completes Mr. Carpi's direct testimony.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Let the record show that we will recess until 9 o'clock tomorrow morning in this room.

(Whereupon, at 4:43 p.m., an adjournment was taken until 9 o'clock, a.m., Friday, February 3, 1956.)

[fol. 361]

BEFORE THE INTERSTATE COMMERCE COMMISSION

[Title omitted]

Pere Marquette Hotel,
Peoria, Illinois.

TRANSCRIPT OF HEARING—February 3, 1956.

Met, pursuant to adjournment, at 9:00 a.m.

Before: Paul C. Albus, Examiner.

APPEARANCES:

(As heretofore noted.)

[fol. 363] PROCEEDINGS

Exam. Albus: The hearing will come to order.

We will continue with the testimony of Mr. Carpi. Have you completed the direct, Mr. Lucas?

Mr. Lucas: I said the direct had been completed. I have a couple of questions and Mr. Thomas has a few questions which would be considered as direct testimony.

Exam. Albus: Very well.

FRED CARPI resumed his testimony as follows:

Direct Examination (Continuing).

By Mr. Lucas:

Q. With respect to traffic that is routed by a shipper Pennsylvania Railroad-TP&W, how is that handled in respect to the junction?

A. Our people are instructed to route that traffic via Effner rather than via our Peoria branch.

Q. Have you developed any figures, perhaps, since you were on the stand yesterday, as to the split between or the proportion of our PRR traffic that is delivered to the TP&W?

A. Page 5 of my exhibit H-16 shows in line 6, column 1, that we interchanged 492 cars at Peoria. That includes interchange with all lines, but only 140 cars in that total went to the TP&W, so that when you consider the total traffic interchanged with the TP&W, so far as Peoria is concerned, it shows that about 99-plus per cent is handled by Effner.

[fol. 364] Q. Have you anything else to add as far as my inquiries are concerned, Mr. Carpi?

A. No, sir.

Mr. Lucas: Mr. Thomas.

Direct Examination.

By Mr. Thomas:

Q. Mr. Carpi, do you have any information on the interchange between the Pennsylvania and the Wabash at Logansport in connection with traffic the Wabash receives from or delivers to the Santa Fe?

A. Yes, sir.

Q. Could you comment on the volume of that interchange.

A. Well, it is really insignificant. I had our people make a study sometime ago of the traffic that we receive from the Wabash at Logansport and I asked specifically to determine what portion came from the Santa Fe with the Wabash as a bridge line. It runs around less than 50 cars a month.

Q. You say from the Santa Fe. Would it be to or from?

A. Both directions.

Q. Both directions.

A. There is really very little business at all from the Pennsylvania to the Santa Fe or the Wabash, we couldn't find any of that, so it was all eastbound.

Q. In your testimony you referred to a study of industrial sites along the TP&W.

A. Yes, sir.

[fol. 365] Q. By whom was that study made?

A. Well, shortly after—I should say it was made by Mr Cox head of your industrial department, I think he is assistant to the president, and Mr. Haffner, who is man-

ager of our industrial department in the Northwestern Region.

Q. What was the scope of that study?

A. It was very extensive. Shortly after this petition was filed I got in touch with the Santa Fe people and we agreed to make an intensive survey, industrial survey, of the TP&W. Every community was checked as to its potentialities, to the extent of its natural resources, such as gas, water, all utilities, also the labor market, as well as other factors that enter into industrial development. I have a copy of the study here. It is a very extensive study.

Q. Does it indicate whether or not the TP&W has some good potential sites for industry?

A. Oh, yes, particularly the Peoria area. It has tremendous possibilities.

Q. Mr. Carpi, I want to ask you this, suppose the traffic coming to the Pennsylvania off the TP&W-Effner were almost entirely or entirely from the Santa Fe through the Lomax interchange, as long as it got all that business, would the Pennsylvania be satisfied?

A. Oh, no. We have a very substantial interchange with the Rock Island, which we would want to preserve under [fol. 366] all conditions.

Q. That is true, I presume, of both the junctions that the Rock Island has with the TP&W.

A. I am thinking of the long-haul junction, Keokuk as well as Peoria. I believe we interchange more business with the Rock Island than any other road using the Peoria route.

Mr. Thomas: That is all I have.

Mr. Lucas: That completes the direct examination, Mr. Examiner.

Exam. Aibus: Thank you very much.

Cross-examination, please, Mr. Wheeler.

Cross Examination.

By Mr. Wheeler:

Q. Mr. Carpi, on page 2 of your prepared statement you state that in the past our company has at times been

handicapped at Chicago because of congestion. Will you please tell me when that occurred.

A. It occurred during the war and it occurred a couple of years ago. It occurs almost every time you have severe weather or a great volume of traffic.

Q. Was your company as handicapped at that time as a company, as a railroad, that does not have a connection with the TP&W?

A. I don't understand your question.

Mr. Wheeler: Read the question.

(The last question was read.)

A. I really don't understand what you mean by your question.

[fol. 367] Q. I gathered from your testimony you were indicating that the TP&W affords you an alternate route to Chicago.

A. Not to Chicago, no; to the west.

[fol. 368] Q. What is the pertinence of your statement, then, that your company has at times been handicapped through Chicago because of congestion?

A. That is the very point. We are trying to get to the west, or from the west to the east, and when Chicago is congested or in operating difficulties the Peoria route is very helpful to us.

Q. A railroad that does not connect with the TP&W does not have that alternative, does it, in times of congestion?

A. Oh, yes. There are many routes available.

Q. Well, just how? It could not connect with it except over some other railroad's lines, could it?

A. That is right.

Q. It could not go over its own line and go through the TP&W gateway, Peoria gateway, unless it had its own connections, could it?

A. No, that is not right.

Q. So as against you—

A. (Interrupting) No, I don't agree with your question.

Q. I am not asking you to agree with my question, I only said I want you to answer it.

A. I said I don't agree with your question, my answer is no to that.

Q. Your answer is no?

A. No, correct.

[fol. 369] Q. That the TP&W does not afford you an alternate gateway and not afford a road that doesn't connect with the TP&W and an alternate gateway to Chicago?

A. Any road that doesn't connect with the TP&W directly may have other routes which make the TP&W part of the route. There are thousands of routes available. A line doesn't necessarily have to connect with the TP&W to use that line.

Q. Are there any large eastern carriers that do not have, let us say, good routes via the TP&W that normally move their traffic through Chicago, or the bulk of their traffic through Chicago?

A. Yes, I would think that there is at least one line that I would think has a choice like that.

Q. What line is that?

A. The Erie Railroad.

Q. Now, Mr. Carpi, the TP&W has been and is presently available to you as an alternate route, is it not?

A. Yes, sir.

Q. And it will continue to be available to you regardless of who controls it, is that not true?

A. Yes, sir.

Q. Now, Mr. Carpi, on traffic moving to the west do you not also have during these periods of congestion at Chicago the alternate route over the Wabash to Kansas City and points west, available to you?

[fol. 370] A. Yes, but we don't use them.

Q. It is available to you, is it not?

A. It is available, yes. I'd like to make that clear. There's probably a couple of thousand routes available from, say, New York to Kansas City, in fact, as I recall it, there's ten thousand routes between New York and Dallas.

Q. How many gateways are there?

A. Speaking of Dallas destination?

Q. Yes, sir.

A. There is not less than 50.

Q. Not less than 50?

A. That is right.

Q. All right, those principal gateways, Chicago, Peoria, Decatur and St. Louis, East St. Louis?

A. Not to Dallas. They are important gateways.

Q. Dallas you have starting from Potomac yard, that is, Washington, working west, just to name the principal ones, you have Louisville, Cincinnati.

Q. I am thinking now of these midcontinent gateways.

A. If you speak of Kansas City, so far as we are concerned it would be Chicago, Effner and St. Louis.

Q. What about Decatur?

A. We don't interchange any traffic at Decatur to speak of with anybody.

Q. Let's talk in terms of the Wabash, then.

[fol. 371] A. I don't know what the Wabash interchanges at Decatur. Our interchange with the Wabash at Decatur is not very large.

Q. You interchange with the Wabash?

A. Oh, yes.

Q. What do you consider the Wabash gateway, Logansport?

A. Well, I like to consider it St. Louis.

Q. On their direct route, Mr. Carpi, between Logansport and Kansas City, what do you consider the gateway?

A. St. Louis.

Q. On the Wabash?

A. Yes.

Q. Then is that your alternate route when Chicago is congested?

A. Yes, we try to force it through St. Louis.

Q. Mr. Carpi, Mr. Symes testified that you owned 99 plus per cent of the Wabash, is that correct?

A. That is substantially correct, yes.

Q. And you tell me now that you do not solicit traffic or route traffic via the Wabash when you are congested at Chicago, is that correct?

A. I didn't say that at all.

Q. Will you please tell me what you did mean to indicate?

A. I said in time of congestions, if Chicago was congested, we would naturally try to force the business via St. Louis with the Wabash or any other carrier.

[fol. 372] Q. You do not give the Wabash the long haul between Logansport and Kansas City during those periods?

A. Not if we can help it.

Q. So you solicit against the Wabash?

A. Yes, sir, we do.

Q. And against their route, their long-haul route between Logansport and Kansas City?

A. Yes. I might say, Mr. Wheeler, Logansport is not their long-haul route. Buffalo is the Wabash's long-haul route and they are always trying to get the business to us at Buffalo and we try to get it to them at St. Louis.

Q. Mr. Carpi, did the Pennsylvania, or has the Pennsylvania benefited by the opening up of a fast freight service over the Wabash between Kansas City and Logansport?

A. I would say that it has benefited, yes, sir.

Q. Much?

A. Not too much because our solicitation forces always complain that we short haul ourselves when we opened the Logansport route. They always complained that we insist on business coming to us at either Chicago or St. Louis.

Q. So that any benefit that you derive or any benefit that is derived derives solely from the activities of the Wabash in soliciting traffic over that route as against St. Louis, is that correct?

A. Yes, sir, statistics show that.

[fol. 373] Q. Has your arrangement with the Wabash traffic-wise changed any since you acquired control of it?

A. I would say generally speaking no.

Q. The traffic arrangements are of long standing, is that correct?

A. They are the product—they are the evolution of over a period of years.

Q. And they are determined by the inherent economies of the long haul for the individual routes, is that correct?

A. Very much so.

[fol. 374] Q. I believe you said—there has been testified of record, and I wondered if you agree with it, that the T. P. & W. offers a competitive route to the Wabash between Kansas City and eastern ports.

A. Mr. Wheeler, the term competitive has many meanings, and it all depends on which side of the fence you are looking at.

Q. Let me change it. Would you regard the T. P. & W as a competitor of the Wabash?

A. Limited competitor, yes.

Q. But a competitor?

A. But a competitor, that is correct.

Q. You would have no doubt, however, that your Effner Gateway is competitive with the Chicago and St. Louis

A. Yes, sir.

Q. When you said yes, sir, you mean yes, sir, you have no doubt?

A. Yes.

Q. As between the Wabash and the T. P. & W. which will you prefer as a traffic arrangement?

A. It all depends what traffic you are talking about

Q. I am sorry.

A. It all depends on what traffic, what movement, you are talking about.

Q. I am talking of a movement to Kansas City from points, eastern points, on the Pennsylvania.

[fol. 375] A. Kansas City, we prefer the Wabash to St Louis, if we had our choice.

Q. Eliminating St. Louis for the movement. I am speaking of the Wabash Gateway between Logansport and Kansas City.

A. We would prefer the Effner route.

Q. You would prefer the Effner route?

A. Yes, sir.

Q. During the period following the strike on the T. P. & W. to which you adverted in your testimony, were no instructions issued to Pennsylvania traffic solicitors to state to shippers that the Peoria branch was competitive with Effner, the Effner Gateway?

A. I don't recall, but I would think we did. Subsequent events proved we were wrong.

Q. You say here the developments in recent years have indicated quite clearly your need for an additional gateway that can provide competitive service. Are you speak

ing of competitive service with Chicago and St. Louis or what?

A. I am speaking of the need for greater opportunities to meet the requirements of the shipping public.

Q. Well, when you say competitive, what do you mean, do you mean competitive with other gateways or other carriers?

A. Other carriers.

Q. What particular carriers did you have in mind?

A. All of them that operate in the east.

[fol. 376] Q. Again, Mr. Carpi, this Peoria Gateway is available to you whether you control it or not, is it not?

A. Yes, sir.

Q. Now, Mr. Carpi, if the Peoria Gateway is important to you, as you have indicated, why wouldn't you support it, even if the M. & St. L. controlled the T. P. & W.?

A. Well, we might if we could have the proper understanding, sir.

Q. What do you have in mind by proper understanding?

A. Well, we know, for example, with the T. P. & W., we know what their sphere of influence is, and we know that they are not working against us, and we have, every once in a while we sit down and discuss with them mutual problems, how we can best cooperate with each other.

Q. Does the M. & St. L. work cooperatively with you?

A. Yes, they have.

Q. You have had no problem on that score of lack of cooperation, have you?

A. No, I cannot say that we have.

Q. As a matter of fact, do not the Pennsylvania and the M. & St. L. solicitors cooperate in the solicitation of movement?

A. They do.

Q. Mr. Carpi, I am not quite clear what you intended to convey by this sentence in your testimony, "traffic over the Effner route has shown a remarkable growth over the [fol. 377] years and the business interchanged by the T. P. & W. with the Pennsylvania and Santa Fe is the keystone of its continued success." Did you mean to indicate by that that if you do not control the T. P. & W., you would close your Effner interchange?

A. I don't know what we'd do, but I do say this, that if the T. P. & W. lose that particular traffic, it would be in very serious difficulties.

Q. Well, that interchange business has been primarily the result of the solicitation efforts of the T. P. & W. and other connecting lines, such as the M. & St. L. in the past, has it not?

A. Largely with a benevolent attitude on our part.

Q. In the way of service?

A. Service and no counter solicitation.

Q. No counter solicitation?

A. Yes.

Q. Mr. Carpi, when you say no counter solicitation, does that take into account your prior statement that you do solicit for the St. Louis and Chicago first?

A. No, no. What I meant, Mr. Wheeler, was when your salesmen call on shippers and find that business is routed, has been committed, to the T. P. & W., we do not interfere with it.

[fol. 378] Q. Now, you have this statement, Mr. Carpi, which I am not clear about: "We will, as heretofore, solicit via the gateway giving us the longest haul, but if other considerations such as time in transit, transit privileges, or shipper inclination favor another route, we will not work against Effner." Does that mean that if a shipper does not favor another route you will work against Effner?

A. No, sir.

Q. Could you clarify that?

A. Well, what I meant by that was that left to our own resources we will try to get a St. Louis haul, otherwise I am going to put Effner on a parity with Chicago.

Q. You dealt with the question of industrial development on the TP&W, Mr. Carpi, you indicated that your facilities would be available to the TP&W. Would that be true as against a location on your line, that is, on the Pennsylvania Railroad?

A. Well, it wouldn't be a solicitation that, because we have no industrial sites to speak of in Illinois and consequently we would be in a position to really help the TP&W to a larger extent than most carriers.

Q. Supposing there was a choice by a potential shipper, a manufacturer, of a site in eastern Indiana as against a site in Illinois, the site in eastern Indiana being on the Pennsylvania Railroad and the site in Illinois being on the TP&W, which would your industrial development prefer?

[fol. 379] A. You say eastern Indiana?

Q. Yes, sir.

A. I can't conceive of a situation like that arising.

Q. Why not?

A. Because industry localizes its desired location much closer than that.

Q. Well, let's take western Indiana then.

A. Well, we have no sites in western Indiana.

Q. None in western Indiana?

A. Not beyond Logansport, no. Even there we are not too well situated.

Q. Wouldn't you, Mr. Carpi, prefer to locate a plant on your main line than on the TP&W line?

A. We certainly would.

Q. And that would be true after you obtained ownership of the TP&W as well as now?

A. Yes, but I want to emphasize what I said in my direct testimony, that the TP&W has a great potential for an industrial development in an area we don't serve, and we are going to really work hard for them. If we served that area, the situation might be a little different, but we have all the reason in the world to work with the TP&W.

Q. Getting back to eastern Indiana versus eastern Illinois—

A. Yes, sir.

Q. (Continuing) —is it your experience in connection [fol. 380] with the location of plants that industries do not consider locations as widely separated as that, if one has a greatly more desirable characteristic, one location, than another?

A. Generally speaking, industry, and industries that know their business, will pinpoint their selection within a radius of 10 miles. It is largely based on transportation costs, and they study their markets—we help them, we do a lot of that work ourselves.

Q. You think transportation costs is the most important single element in determining where an industry will locate?

A. It's one of the most important, yes, sir.

Q. And that is the experience of the Pennsylvania?

A. Well, I have been spending many years in industrial development, and from that experience I have found out that transportation cost is in many cases the controlling factor.

Q. Rather than the source of raw materials, labor and the like?

A. Well, the source of raw materials has something to do with the transportation costs.

Q. Then when you say transportation costs you are thinking of the incoming as well as the outgoing product?

A. Absolutely.

Q. In that connection, Mr. Carpi, how do you explain the location of many new plants in the Texas area since the war?

A. The very thing I have been describing, now, the transportation costs in the Texas area are very low. They have [fol. 381] the choice of water transportation to the eastern seaboard, they are able to reach the growing markets of the Pacific Coast.

Q. The same thing would be true of industrial development in the southern states?

A. Yes, sir.

Q. What about the Wabash now, Mr. Carpi, on your industrial development department facilities available to the Wabash?

A. Yes, sir.

Q. Does the Wabash use them?

A. At times.

Q. Do they work to get locations on the Wabash?

A. Well, when we find that we can not locate an industry we will tell the Wabash about it and ask them if they have any site to take and offer.

Q. Now, as between the Wabash and the TP&W, to which would your industrial development department refer such a potential shipper?

A. It would depend on the particular location the ship-

per was interested in, or the manufacturer, rather, was interested in.

Q. Let's say he was interested in a site in Illinois.

A. You have to define it a little more specific than that. I have never heard of anybody coming to me and saying I want to put a plant in Illinois.

Q. Let's say that we have two equivalent sites from the standpoint of transportation costs, now, which one are you going to recommend?

[fol. 382] A. Well, that is highly improbable. I can't conceive of a situation like that.

Q. Well, assume it with me in any event.

A. I don't want to answer on speculation.

Q. Assume with me that you have two such locations, which will your traffic department recommend, the site on the Wabash or the site on the TP&W.

A. Today?

Q. Yes, sir.

A. On the Wabash. Tomorrow if we get the TP&W, I'd have to consider all factors, and if I found from a shipper's, from a manufacturer's standpoint, the Wabash was more favorable, I'd support that, if the TP&W was more favorable, I'd support that. I want to repeat, I can't conceive a situation like that ever arising.

Q. Would the fact that you own 99 per cent of the Wabash and only 50 per cent of the TP&W influence your decision?

A. No, sir.

Q. Would the fact that you have a much larger investment in the Wabash influence your decision?

A. No, sir.

Q. Would the fact that the total line haul on a combination Pennsylvania-Wabash route influence your decision?

A. No. I think we'd be better off if it was on the TP&W.

[fol. 383] Pennsylvania Railroad.

Q. Supposing the total transportation bill that this industry would pay in a year would be paid in greater proportion to the combination Pennsylvania-Wabash Railroad than to combination Pennsylvania-TP&W Railroad, would that influence your decision in the location of that industry?

A. It probably would, yes.

Q. Mr. Carpi, you say it is very advantageous for the TP&W to be owned by the two carriers with which it interchanges most of its traffic. Can you tell me why that is true?

A. Because the Pennsylvania and the Santa Fe have the greatest potentials in the traffic in the country.

Q. Then that would mean that that would exclude the M&StL from ownership, would it not?

A. I would think M&StL ought to get on the bandwagon.

Q. Well, do you mean by that that the M&StL should be sold to the Pennsylvania?

A. Well, I think it would be a help to both of us.

Q. And that the M&StL should be excluded from acquiring another carrier if that other carrier happens to be excluded from acquiring another carrier in competition with a larger carrier than the M&StL.

A. Oh, I don't take that position. But I reiterate that with the Pennsylvania on the east, the largest originator of traffic in the country, with its huge captive traffic, and [fol. 384] the Santa Fe on the other side, developing a remarkable rate pace, it would be only natural for anybody to tie up with them, if they could.

Q. You think that the mere amount of traffic interchanged would be a determining factor?

Mr. Lucas: May I interrupt? May I have Mr. Carpi's last answer read back.

(Answer read.)

By Mr. Wheeler (continuing):

Q. —should be the determining factor, is that correct, Mr. Carpi?

A. I should think it would be the most important factor because, if anything, it establishes public convenience and necessity.

Q. That is a rather broad statement, Mr. Carpi. What do you conceive, what terms, in what connection are you using that term?

A. The use of the route indicates that it is a very popular route and a desired route. I don't know anything else

to establish a standard of public convenience and necessity but to show a value.

Q. Well, I thought you previously indicated, though, that the route would be available to you and the Santa Fe whether you controlled it or not?

A. It would be available but I am not sure that it would be available to us in a manner that we would like.

Q. Now, you are speculating in so stating, are you not? [fol. 385] A. At this time I am, because you are asking me to deal with unknown factors.

Q. And, Mr. Carpi, you have nothing in your past experience to indicate that that speculation that you have indulged in has any real basis?

A. Well, there's a lot of rumors.

Q. Well, let's get to those. What are the rumors you refer to?

A. I refer to the rumors that have been in the papers about the ambitions and activities of the M&StL. We don't know where they are going. We would like to have a firm understanding.

Q. So that's the primary consideration, then?

A. That is one of the considerations.

Q. And that is the one to which you referred in connection with this public interest, convenience and necessity?

A. No, no, Mr. Wheeler, I say this, the volume of traffic moving via any gateway indicates the importance and value of that gateway to the public at large.

Q. Yes, sir, and in that I don't think we are in disagreement, Mr. Carpi. But what we were talking about was the control of that gateway, not its mere existence, and you had said that the control of that gateway should be passed in all instances to the railroads that interchanged the greatest amount of traffic with that gateway road?

A. I would say that ought to be the first consideration. [fol. 386] Q. And you indicated that you didn't think the M&StL should have it because of rumors as to its ambition?

A. Oh, no. I said that is one of the reasons.

Q. That is one of the reasons?

A. Yes.

Q. What are the other reasons?

A. The other reason is that if you get more than two

owners of this property the ownership will become diffused and I don't think the property would pull together with the rest of them.

Q. Did you understand that the M&StL application is for multiple ownership?

A. I don't know what the M&StL's position is.

Q. We have asked for sole ownership so that multiple ownership isn't a factor so far as we are concerned—

A. (Interrupting) I still think the best interest of the TP&W would be by the approval of this application.

Q. I understand that, I am trying to get at the reasons for those conclusions.

A. I gave them to you.

Q. You have no others?

A. No, sir.

Q. Do you think a good reason, one reason for denying it, is rumors that the M&StL may be seeking to expand into Pennsylvania territory?

[fol. 387] A. No, I didn't say that.

Q. Well, what did you say?

A. I said one reason I'd hesitate to say to you what might happen in the future is because of those rumors.

[fol. 388] Q. You mean that if rumors continued to prevail—assume that the Commission approved the application of the M. & St. L. and rumors continued to prevail that the M. & St. L. was going to acquire the Monon, the Pennsylvania would then cut off its interchange at Effner?

A. We wouldn't cut off anything. We would probably revalue our solicitation activities.

Q. Your solicitation activities?

A. Yes, sir.

Q. Solely on the basis of rumor?

A. No. I suppose if that point was achieved, we'd certainly have a meeting with you and develop just what was in the wind.

Q. Mr. Carpi, you are aware, are you not, that the M. & St. L., the T. P. & W., or any other road cannot acquire control of another, such as the Monon, without Commission approval, are you not?

A. I am thoroughly aware of that.

Q. Do you believe that the Pennsylvania should seek to preclude the M. & St. L. from acquiring another railroad?

A. It all depends.

Q. Why do you say it all depends?

A. I don't know what you have in mind. I can't give you a blanket answer here.

Q. Don't you think that that problem should be, the question of whether or not the M. & St. L. or any other rail-
[fol. 389] roads should control another should be left to the Commission rather than to the dictates of the Pennsylvania or any other railroad?

A. Why, certainly, the Commission will decide it, but we have an opportunity to express our views about it to the Commission.

Q. Certainly. Now you say 64 per cent of the revenues derived from the T. P. & W. comes from traffic interchange with the T. P. & W. and the Santa Fe. Doesn't this traffic include that solicited by the M. & St. L. and other carriers?

A. Yes, sir.

Q. Now, you say a friendly attitude from these two carriers, referring to the Pennsylvania and the Santa Fe, is obviously essential to its continued success. Such an atmosphere cannot be expected if the T. P. & W. should fall into alien hands or if the control were diffused. Taking first the alien hands, did you have anybody, any railroad, in mind—

A. No.

Q. (Continuing) —in making that statement?

A. No, I didn't.

Q. If the M. & St. L. should acquire control of the T. P. & W. and continues its policy, its present and past policy of cooperation with the Pennsylvania in the solicitation of traffic, would your friendly attitude toward the T. P. & W. be changed?

A. I don't know.

Q. Why not?

A. Well, we'd want to think about it.

[fol. 390] Q. Well, what would you want to think about?

A. I'd want to think about it, when I talk with our Santa Fe or our connection at—on the western end at Lomax.

Q. Are you suggesting that if the M. & St. L. acquired it, you and the Santa Fe might boycott the T. P. & W. route?

A. I am not suggesting anything. I know there is a tremendous amount of traffic that moves between the Pennsylvania and the Santa Fe, for years it moved via Chicago, and a good bit of it now is moving via Lomax and Effner, and we value that traffic, and we are going to protect that traffic. Now, what we'd do, I don't know. We'd have to think it over.

Q. You value it and you want to protect it, and you said earlier that this gateway was important, particularly at times in congestion?

A. Yes, sir.

Q. All of those factors would weigh heavily, I assume, in your determination?

A. Yes, sir.

Q. Now, when you say if the control were diffused, I assume you refer to the fact that there would be multiple ownership?

A. Yes, sir.

Q. By multiple ownership you mean ownership by more than two?

A. Yes, sir.

Q. Now, you say with diverse ownership it would be unrealistic to expect the T. P. & W. to obtain from any [fol. 391] one owner the type of support necessary to insure its continued growth. When you say type of support, what do you have in mind?

A. The type of support that we would give, if we obtained this control.

Q. Does it again come back to this business, everybody's business being nobody's business?

A. Pretty largely, yes, sir.

Q. Do you have any reason to believe that acquisition of the T. P. & W. by the M. & St. L. could not be expected to maintain aggressive sales and service policies that have been successful in the past with respect to the Peoria Gateway?

A. No.

Q. Mr. Carpi, do you know what per cent of your total gross revenue is derived from cars interchanged with the T. P. & W.?

A. Of our total revenues?

Q. Yes.

Mr. Lucas: You mean total freight revenue?

Mr. Wheeler: Total freight revenues.

A. It would be less than half of one per cent.

By Mr. Wheeler:

Q. Do you have information as to the amount of money that is spent per annum by the Pennsylvania in advertising and solicitation?

A. Oh, I have a rough figure in my mind per annum.

Q. What is that figure?

A. That would be around—that includes passenger, it [fol. 392] includes the cost of printing tariffs, and things like that, and industrial development, it would run around $15,000,000 a year.

Q. Fifteen million?

A. Yes. But allocated to freight service it would be less than half of that, it would be less than a cent on a dollar of revenue. I think that is the lowest in the country, incidentally.

Q. Do you know what per cent of the M. & St. L. gross revenues is derived from interchange with the T. P. & W.?

A. No, I don't.

Q. Do you anticipate that your total traffic will be increased if you are given control of the T. P. & W.?

A. Total traffic via Effner?

Q. No, just total traffic of the Pennsylvania.

A. No.

Q. Mr. Carpi, you indicated earlier that some rumors concerning the proposed activities or expansion by M. & St. L. might have in the past and might in the future affect your attitude toward the M. & St. L. vis-a-vis the T. P. & W. Supposing the M. & St. L. were merely, supposing you were convinced that the M. & St. L., wanted to acquire only

the T. P. & W. in order to establish better service routes in connection with its own operation and that, and the lines of the T. P. & W., would that fact, that is, the establishment of those additional service routes caused you to be opposed to acquisition of the property by M. & St. L.?

[fol. 393] A. Oh, I'd want to consider those factors.

Q. I am not quite sure that I follow you.

A. I couldn't answer yes or no to that. I'd have to study them.

Q. Might it depend on where those service routes extended to, into what territory?

A. That would be one of the considerations, yes, sir.

Q. Mr. Carpi, has the Pennsylvania had car shortages during the past year?

A. Yes, sir.

Q. Serious ones at times?

A. Yes, I would say they were serious, particularly on certain types of cars, such as coal cars. Now, we did fairly well on boxcars because we terminate so much traffic.

Q. How do you stand on this A. A. R. formula that Mr. Gurley testified about? Are you up to snuff on that?

A. Well, there is some dispute between ourselves and the A. A. R. on that.

Q. But you have not complied with all the recommendations of the A. A. R.?

A. We think we have.

Q. But the A. A. R. doesn't agree?

A. That's right. That hasn't been resolved yet. It's in the process of discussion with the A. A. R.

Q. You had car shortages through a substantial part of 1955, did you not?

[fol. 394] A. Yes, I would say beginning with the middle of the year until the end of the year.

Q. How many solicitation officers do you have, traffic solicitation officers?

A. Officers?

Q. Offices.

A. Oh, I don't know.

Q. Can you furnish that information?

A. Yes.

Mr. Lucas: It's in the railway guide, is it not, Mr. Carpi?
The Witness: Yes, sir.
Mr. Lucas: Available for anybody to read?
The Witness: Yes, sir.
The official guide, you mean?
Mr. Lucas: Yes.
Mr. Wheeler: Can we refer to the official guide for that information?
Mr. Lucas: I see no objection to it.
Mr. Thomas: The Santa Fe information is on the back of Mr. Duffy's Exhibit H-9.
Exam. Albus: Very well.

By Mr. Wheeler:

Q. How many employees are so engaged?
A. In soliciting?
Q. Yes, sir, freight solicitation.
A. I don't know, because a good many of them divide [fol. 395] their time between freight and passenger, but I would judge it is—exclusively on freight it would be less than three hundred.
Q. And how many would fall into the joint category in addition thereto?
A. I don't know.
Q. Approximately?
A. I don't even know approximately.
Q. Could you ascertain that?
A. Oh, that could be ascertained.
Q. And supply that information for the record?
A. If counsel agrees to that.

Mr. Lucas: Mr. Wheeler, may I ask Mr. Carpi a question that will probably clear that up?
Mr. Wheeler: Yes.
Mr. Lucas: The offices listed in off-line in the railway guide, do some of them include both passenger and freight?
The Witness: Yes, sir.
Mr. Lucas: But is the listing there complete as to both services?
The Witness: Yes, sir. But it is rather difficult, Mr. Lucas—

Exam. Albus: The number of employees aren't listed. That is the question now.

The Witness: Not only that, Mr. Examiner, but some of these employees some days spend all their time on pas-
[fol. 396] sengers and some days all their time on freight. It is pretty hard to define.

By Mr. Wheeler:

Q. I understand that.

A. What do you want?

Q. I just want all the employees who spend all or part of their time in freight solicitation.

Mr. Lucas: Mr. Examiner, I wonder if Mr. Wheeler would submit that to us in writing. We'd like to be very clear as to what he wants and be very sure we supply what's asked for.

Exam. Albus: Will you do that, Mr. Wheeler?

Mr. Wheeler: I certainly will.

Exam. Albus: Thank you.

[fol. 397] By Mr. Wheeler:

Q. If you acquire control of the TP&W, will you advise your traffic solicitors that Effner is to be placed on a parity with St. Louis and Chicago with respect to active solicitation of freight?

A. Yes, sir.

Q. Despite the fact that your long haul is to St. Louis?

A. Yes, sir.

Q. How long does it take to make a direct interchange in Chicago between the Santa Fe and the Pennsylvania?

A. How long?

Q. Yes, sir.

A. I don't know.

Q. Isn't that a very fast interchange?

A. I assume so, but I am not familiar with the terminal phases at Chicago. We have a direct connection with them if that is what you have in mind.

Q. Mr. Carpi, will you also place the Wabash route between Logansport and Kansas City on a parity with the route via Effner?

A. No, sir.

Q. You will not?

A. No, sir.

Q. Why not?

A. Because it doesn't give us as much revenue as we obtain by the other routes. Let me say this to you and perhaps it will help clear up a few things. Our inter-[fol. 398] change with the Wabash at Logansport in the year '54 was 20,000 cars; of that 20,000 cars—21,000, no, 20,000, almost 18,000 were eastbound, so it leaves a little over 2,000 westbound. A lot of that is traffic that is local to the Wabash. There is hardly any business interchange with the Wabash, competitive business, westbound, to Logansport.

Q. Well, Mr. Carpi, doesn't St. Louis give you a longer haul than Effner?

A. It certainly does, and our people will try under certain conditions to get the business via St. Louis.

Q. But you said a moment ago that if you owned the TP&W—

A. Yes, sir.

Q. (Continuing) —controlled it, 50 per cent interest in it, you would solicit Effner on the same basis as St. Louis and Chicago.

A. No, no. I said that we would classify Effner on the same basis as Chicago and St. Louis, but I repeated several times to you this morning, and also in my direct testimony, that left to our own resources we will try St. Louis.

Mr. Wheeler: That is all.

Exam. Albus: Does that complete your examination?

Mr. Wheeler: That is all. Thank you.

Exam. Albus: Very well.

Mr. Cassell: May we interchange order again?

Exam. Albus: Yes.

[fol. 399] Cross examination.

By Mr. Broker:

Q. Left to your own resources, Mr. Carpi, what does that mean?

A. If we can control the traffic.

Q. In other words, you will favor St. Louis over Effner?

A. Yes, sir.

Q. If you succeed in your application here?

A. Yes, sir.

Q. Is that right?

A. That is right.

Q. You said earlier during the cross-examination that if another railroad should get control of the TP&W that the routes, your routes, might not remain available in the way you would like. What do you mean by that?

A. I don't remember saying that. Will you ask me the question that you want?

Q. Well, do you think that if another railroad gets control and you are excluded that the routes might be available in the way you would like?

A. Well, the routes will always be available. It is a question of whether we will foster the route.

Q. Well, what wouldn't be available if the route is open?

A. I don't know.

Q. Service?

A. I don't know. I don't know what you have in mind.

Q. I am trying to find out what you had in mind. Why [fol. 400] then, do you object to the M&StL. getting control of this railroad?

A. Well, the reasons I stated in my direct testimony.

Q. I didn't understand that your direct testimony was framed with the M&StL. in mind.

A. I think it was framed with everybody in mind.

Q. I am trying to find out the reason why control by the M&StL. would not be satisfactory to the Pennsylvania, despite concurrence by that railroad and conditions.

A. I stated the reasons in my direct testimony. I will stay by them.

Q. Could you specify where in your direct testimony you cover that? You have a copy of it, I am sure.

A. Well, the last paragraph, if you wish, and a couple other places.

Q. That covers diverse ownership. I am talking about sole ownership by the M&StL.

A. Well, diverse is the same thing.

Q. Oh, diverse ownership is the same as sole ownership?

A. Yes, I consider it so. "Diverse" in the sense I use it there covers any and all.

Q. Any and all that you don't participate in, you mean?

A. Yes, that is right.

Q. What is the purpose in your acquisition, is it to protect what you have?

A. Mr. Broker, I can't express it any better than our president did yesterday. We were perfectly happy the way [fol. 401] things were going, but when we learned that that situation couldn't continue we thought we ought to protect our interests.

Q. So you are in there to protect your interests?

A. Yes.

Q. How is your interest protected if the Nickel Plate is in the picture?

A. That is also covered in my direct testimony.

Q. What I am getting at is if you are only seeking to preserve what you have, why do you object to the Nickel Plate coming into the picture?

A. For reasons stated in my direct testimony.

Q. Will you point out the reasons, please?

A. Well, the last part of page 6 and keep on reading to the end.

Q. I have only three pages.

A. Well, mine was double-spaced, I guess. Begin with the paragraph—

Mr. Cassell: That is all all of us got.

By Mr. Broker:

Q. Where would that be, which paragraph?

A. I am trying to find it for you. Beginning with about the middle of the first paragraph on the top of page 3.

Q. "The overhead traffic between these two"?

A. No; that sentence "Such an atmosphere cannot be expected if the TP&W should fall into alien hands or if the control were diffused."

Q. Are we an alien?

[fol. 402] A. No, but I say you are diffused.

Q. That contention there goes to the efficiency of opera-

tion, doesn't it, rather than to the question of protecti of what you now have?

A. No, I wouldn't limit that to that.

Q. You would not?

A. No.

Q. The diffusion of ownership does not protect you, that right?

A. We don't think it does.

Q. Now, why not?

A. Because we don't think it does. It is a matter of—

Mr. Broker (interrupting): I think I can have a bett answer than that, Mr. Examiner.

Exam. Albus: That answer will stand. I think the re ord is clear on what they mean by "diffusion", by "diver ownership".

Mr. Broker: I would like to find out what element t Nickel Plate adds that lessens the protection of the Pen sylvania and what it now has.

Exam. Albus: Can you answer that question?

The Witness: Yes.

A. As I understand it, there are quite a number of ca riers in the same position as the Nickel Plate, they wan to get into this thing, and we believe that it is not for th best interests of the TP&W or the applicants to have tha [fol. 403] control diffused.

By Mr. Broker:

Q. Does it lessen your protection in what you now have

A. We think so, yes.

Q. Would you turn to Exhibit H-5, which I understan is a basic exhibit for all Pennsylvania and Santa Fe wi nesses.

A. All right, sir.

Q. Page 16.

A. Yes, sir.

Q. If you will look at columns 5 and 6, it shows that th Santa Fe cars interchange to the PRR during the yea ended June 30, 1955, totaled 12,526 cars. That is right isn't it?

A. I assume so.

Q. Well, there is no question as to the accuracy of it.

A. No; I mean, I didn't work the figures up, but I assume they are correct.

Q. I am assuming they are correct, too.

Mr. Broker: They are correct, aren't they, Mr. Lucas?

Mr. Lucas: Yes.

Exam. Albus: There is no doubt but that is what the exhibit shows.

Mr. Lucas: We stand on those figures.

By Mr. Broker:

Q. Now, the Nickel Plate, just below that, in the year ended June 30, 1955, handled 9,890 cars, that is right, isn't it?

[fol. 404] A. Yes, sir.

Q. Now, it is only a difference of 2,636 cars, is that right?

A. If you have figured it out, I will take your word for it.

Q. Don't you think the Nickel Plate has a substantial interest in the TP&W, too?

A. I think it has.

Q. And don't you think it is entitled to be protected?

A. It will be.

Q. But if this element of ownership adds something, how will we be protected?

A. Well, we have announced that condition under which we would accept if this application was granted.

Q. But you won't accept the M&StL with the same conditions, will you?

A. No, sir.

Q. Why?

A. I have stated the reasons why.

Q. Is it because ownership adds something to the protection of a party?

A. Well, ownership adds a sense of security, which is very important to us.

Q. It is important to us, too.

Now, just what percentage of the through Santa Fe-TP&W-PRR traffic, what does that bear to the total number of cars handled by the TP&W, do you know?

[fol. 405] A. Well, I guess we could figure it out. I don't

have it here. I don't have it. I will have to supply it to you, if you want it.

Q. Will you turn to page 5 of this same exhibit, H-5.

A. Yes, sir.

Q. Column 10, first line. Traffic bridge between the Santa Fe and the PRR for the year ended June 30, 1955, a little less than 11 per cent, isn't that right?

A. A little more than 1 per cent.

Q. 10.82?

A. No. I am looking at 11.8.

Q. 11.08?

A. Yes, sir.

Q. Well, that is not the traffic that moves through Lomax and Effner—

A. (Interrupting) I beg your pardon. You are just talking about column A or line A. Yes, ten eighty-two, that is correct.

Q. Santa Fe, Lomax-TP&W, Effner-PRR, that is just a little under 11 per cent of the total traffic, isn't it?

A. That is correct.

Q. And the Nickel Plate is not too far behind in that, is it?

Mr. Lucas: Wait a minute, Mr. Broker—

Mr. Broker: Go ahead.

Mr. Lucas: Percentages and cars don't mix very well. Are you contending that the figure you pointed out previously of 9,890 is to be compared with the percentage of the traffic bridged?

[fol. 406]

By Mr. Broker:

Q. Well, what I am getting at essentially is that we have made a contribution to the TP&W, too.

A. I haven't denied that.

Q. As a matter of fact, earlier you testified about industrial development and you said that the TP&W had property in the Peoria area.

A. I did.

Q. Where is that located?

A. Well, I have a map I'd like to show you if you'd like to look at it.

Q. Are you thinking of East Peoria particularly?

A. And West Peoria.
Q. Yes.
A. I guess you'd call it West Peoria.
Q. Is some of that around Farmdale, the Farmdale interchange between the Nickel Plate and the TP&W?
A. Well, I wouldn't know. I have the map showing the property if you'd like to look at it.

Exam. Albus: We will take a 10-minute recess.

(Short recess.)

[fol. 407] Exam. Albus: The hearing will please come to order.
We will continue with the cross-examination of Mr. Carpi.
Mr. Broker, please.

By Mr. Broker:

Q. Mr. Carpi, to shorten these questions about industrial development, do you know whether or not the Nickel Plate is presently cooperating with the T. P. & W. in the development of property in East Peoria?
A. No, I don't.

Mr. Broker: We will cover that on our direct testimony to shorten this.
Those are all the questions we have.
Exam. Albus: Thank you very much.
Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. What are the principal junctions of T. P. & W. west of Peoria with western lines?
A. West of Peoria?
Q. Yes.
A. Keokuk and Lomax.
Q. How about Bushnell and Canton?
A. Well, I don't believe—I don't know.
Q. Well, don't they have a connection with the Q?

A. Oh, yes.

Q. At Bushnell and Canton?

A. Yes.

Q. Isn't your division the same on traffic that comes [fol. 408] through the Effner Gateway regardless of which one of those junctions the traffic comes on or goes out on the T. P. & W.?

A. Substantially so, yes.

Q. Don't the division break over Peoria?

A. Yes, but it depends upon a destination beyond.

Q. I mean assuming the same destination.

A. Oh, yes, yes.

Q. So it doesn't make any difference which one of those junctions are used, your division is the same if it is going the same place?

A. That is right.

Mr. Cassell: That is all.

Mr. Wheeler: Mr. Examiner, I have a couple of questions I want to ask before I forget.

Exam. Albus: Very well.

Further cross examination.

By Mr. Wheeler:

Q. Mr. Carpi, you gave us some information with respect to the interchange with the Wabash at Logansport.

A. Yes, sir.

Q. Can you give us the same information with respect to Fort Wayne?

A. Fort Wayne, we received—this is '54—4,214 cars and delivered 3,350.

Q. How about Toledo?

A. Toledo, well, we don't have that, Mr. Wheeler. The [fol. 409] reason for it is that we do not have a direct interchange with the Wabash. The interchange is made through the Toledo terminal or Nickel Plate.

Q. Do you know approximately what it is?

A. Oh, I would say it would run about 25 hundred cars each way a year.

Q. How about Buffalo?

A. Buffalo, we receive from the Wabash 7,568 cars and deliver to the Wabash 713 cars.

Q. Decatur?

A. Decatur, we receive from the Wabash 785 cars and deliver to the Wabash 1,100 cars.

Q. How about Detroit?

A. Detroit, we receive from the Wabash 530 cars and deliver to the Wabash 94 cars.

Q. Lakeville, Indiana?

A. Lakeville, Indiana, 157 cars both ways.

Q. Have we now covered all of the important ones?

A. Well, there is Walcotville.

Q. All right.

A. Walcotville is 997 cars. Chicago, didn't have Chicago. Do you want Chicago?

Q. Yes, I'd like Chicago.

A. Chicago is 2,713 cars received from the Wabash, 3,247 cars delivered to the Wabash.

[fol. 410] Q. Now, is that traffic that moves on that—where would that traffic be coming from and going to?

A. What interchange are you speaking of?

Q. Chicago.

A. That could be western traffic. It could be central Illinois traffic, speaking of one end of the line.

Q. Yes.

A. It could be even southwestern traffic.

Q. Do you know whether or not it is predominately western or southwestern traffic?

A. I would think it would be predominately Illinois traffic.

[fol. 411] Q. At points west of Decatur?

A. No, I would say all of Illinois would be a natural gateway for that traffic.

Q. Now, could we have the figure for St. Louis or East St. Louis, whichever you have?

A. St. Louis or East St. Louis we receive from the Wabash 3,536 cars and deliver to the Wabash 4,374 cars.

Q. Those are all of the substantial interchanges?

A. They are all, and those figures I gave you are for the year 1954.

Q. On your Exhibit H-16, page 3,

A. Yes, sir.

Q. Refer to the note at the bottom on the right-hand side of the page. It says, "Indicates shortest distance between points shown." Now, that is not the short line mileage so called, is it?

A. Yes. Not the working mileage, the short-line mileage.

Q. Is it the shortest line mileage?

A. The shortest mileage on which rates are made but not necessarily the working route.

Q. Do you have the mileages for Omaha and Kansas City via the Wabash?

A. No.

Q. Why did you omit those?

A. Why, Mr. Wheeler, this doesn't show the mileage via [fol. 412] any route. These are the short-line mileages using the shortest route irrespective of conditions or operating conditions. This is merely intended to show the relation of the TP&W route with respect to these other gateways.

Q. It doesn't mean, then, the Pennsylvania line?

A. Oh, no, no. Well, let's take from New York to Chicago, shown 890 miles. That may be made up of three routes.

Q. None of which might include the Pennsylvania?

A. Right.

Q. Now turning to the next page, what are those mileages via competitive routes between Peoria, Illinois, and selected eastern cities on the Pennsylvania Railroad designed to show?

A. Well, they are designed to show that our Peoria branch is a circuitous route. One of the reasons that we advanced is to show that it is not a competitive route.

Q. Now, as to Indianapolis it is not the circuitous route, then?

A. Well, it is pretty near so. You see, Indianapolis New York Central is 211 miles.

Q. So far as you are concerned it is not, though, is it?

A. No.

Q. So far as the Pennsylvania is concerned?

A. No.

Q. Mr. Carpi, will you turn to page 7.

A. To 7?

[fol. 413] Q. Yes, sir.

A. All right, sir.

Q. Refer to the second paragraph of the letter signed by Mr. W. Mel. Pomeroy.

A. Yes, sir.

Q. Wouldn't this letter have been much less ambiguous if the words, and I quote, "When conditions justify," were omitted?

A. No; no, indeed.

Q. What do you believe those words mean as used in this—

A. (Interrupting) Uncertain conditions traffic couldn't move that way, either, because the shippers didn't want it or there was some peculiar thing associated with the movement.

Q. This could mean a thousand and one things, could it not?

A. It could.

Q. Who is Mr. Pomeroy?

A. He was at the time these letters were written general traffic manager. He is now retired.

Q. Are you familiar with the industrial properties that the Wabash has on its line?

A. No, not generally.

Mr. Wheeler: I have no further questions.

Exam. Albus: Thank you very much.

Is there any redirect?

Mr. Lucas: Just a few questions, Mr. Examiner.

Exam. Albus: Very well.

[fol. 414] Redirect examination.

By Mr. Lucas:

Q. Mr. Carpi, the shortest distance between points that Mr. Wheeler asked you about, is that not the customary formula used by the Commission in rate cases, the shortest possible route over which carload traffic could be transferred or could be transported theoretically without transfer of lading?

A. Yes, sir, I tried to make that clear. Apparently I didn't.

Q. And that is what you said that that is on what the rates are based?

A. Yes, sir.

Q. The statistics that you gave of interchange between the Pennsylvania and the various interchange points with the Wabash, did those statistics, did those carload figures include switching?

A. Yes, oh, yes.

Q. Mr. Wheeler asked you about a statement in your direct examination of traffic over the Effner route has shown a remarkable growth over the years and the business interchanged with the TP&W with the Pennsylvania and the Santa Fe is the keystone of its continued success. That was your direct testimony, and I thought his questions seemed to try to confine it to the M&StL. That statement was not confined on your direct testimony to the M&StL. only, was it?

A. No, sir.

[fol. 415] Q. I mean there are other connections there that have contributed with the TP&W, I mean.

A. Yes.

Q. In addition to the M&StL?

A. Oh, yes, certainly.

Q. There has been evidence on the part of one or two witnesses as to the importance of this gateway at times of congestion at Chicago. Is there also an importance as to the potential defense of the country in having this gateway available?

Mr. Wheeler: Mr Examiner, I object. I think this goes beyond anything on direct or anything on cross.

Exam. Albus: I will sustain the objection.

Can you reframe the question, Mr. Lucas, please.

By Mr. Lucas:

Q. Does the existence of the Effner and the Peoria gateway have any value from the standpoint of the furtherance of the transportation policy in respect to public defense?

A. Yes, sir.

Q. Might it also—

A. (Interrupting) That was demonstrated during the war.

Q. Exactly, that's right. And it could be demonstrated again in the event of unfortunate conditions in the future, could it not?

A. Definitely so.

Q. Might it also be available if there were some strike [fol. 416] conditions that would affect either St. Louis or Chicago?

A. Yes, sir.

Mr. Broker: Excuse me, is there any issue here about the closing of the gateway?

Mr. Lucas: No, just the reverse, Mr. Broker. I mean my questions are intended to have the implication of facts, as a matter of fact, of just the reverse, its availability under emergency conditions.

Mr. Broker: But it is available now, you agree to that.

Mr. Lucas: That is correct. That is right.

Exam. Albus: My only objection is the questions are too leading.

Mr. Lucas: Well, I think I have heard a few before.

Exam. Albus: Oh, definitely, sure. That is the only reason we have made as much progress as we have.

Mr. Lucas: I don't wish to offend in that respect, Mr. Examiner.

Exam. Albus: No, that is all right.

By Mr. Lucas:

Q. Mr. Carpi, there has been quite a little discussion as to the value of the M&StL singled out alone what would be the value to the M&StL if the applicants have control, in your opinion.

A. If we obtain approval of this application I think the M&StL will materially benefit because of our policy to place Effner on the same basis as Chicago.

[fol. 417] Q. Will you turn, please, to Exhibit H-5.

A. Yes, sir.

Q. Turn, please, to page 16 to which Mr. Broker directed your attention.

A. All right, sir.

Q. In 1955 he pointed out in respect only to Santa Fe cars connecting with the TP&W, there was 9,890 Nickel Plate cars compared with 12,526.

A. That is correct.

Q. Now, will you turn, please, to page 43.

A. All right.

Q. And in the last bracket on the right-hand side, column 8, where do you find the Nickel Plate in that setup in respect to the TP&W gross revenues?

A. Pennsylvania ranks first and Nickel Plate ranks sixth.

Q. So that there is a substantial difference, is there not, between revenues and cars interchanged, if you take the total revenues of the TP&W, than if you take only the Santa Fe cars?

A. It is very substantial. Ours is five times greater.

Q. What is the situation with reference to the M&StL as to where its traffic reaches the TP&W?

A. At Peoria.

Q. So that the haul—is in what respect as compared to the Santa Fe-PRR haul?

[fol. 418] A. Of course the Santa Fe-PRR is end to end and M&StL is right in the middle.

Mr. Lucas: That completes the redirect.

Mr. Thomas: No, I have a question or two.

Redirect examination.

By Mr. Thomas:

Q. Mr. Carpi, you testified at some length about the policies as to location of industry on the TP&W if this plan goes through.

A. I did.

Q. Do you think that plan will benefit the Pennsylvania?

A. Yes, sir.

Q. In what way?

A. If we succeed in locating some industry on the TP&W, particularly at Peoria, it will produce additional traffic to the Pennsylvania.

Q. And you would expect that that traffic would move or at least you would hav an opportunity to get that traffic through the Effner gateway?

A. I would certainly hope so.

Mr. Thomas: Thank you.

Recross examination.,

By Mr. Wheeler:

Q. That would only be on eastbound traffic?

A. Yes.

Q. You didn't mean to indicate by your testimony on this defense or strike business that if the Pennsylvania [fol. 419] would close the Effner gateway in the event it was not successful in gaining control of the TP&W?

A. No, I didn't intend that.

Mr. Wheeler: That is all.

Recross examination.

By Mr. Broker:

Q. You don't suggest that we all wouldn't be interested in national defense?

A. No, sir.

Exam. Albus: I think that is all, Mr. Carpi. Thank you very much. You are excused.

(Witness excused.)

Exam. Albus: Is there any objection to the receipt of Exhibit H-16 for identification?

(No response.)

Exam. Albus: It is now received.

(Applicant's Exhibit No. H-16, Witness Carpi, was received in evidence.)

Mr. Lucas: Mr. Examiner, I would now like to call Mr. Craig, please.

[fol. 420] R. V. CRAIG was sworn and testified as follows:

Direct examination.

By Mr. Lucas:

Q. Mr. Craig, will you state your name and the company with which you are connected and the capacity in which you are connected with that company.

A. My name is R. V. Craig. I am general traffic manager of Allied Mills, with headquarters in Chicago, at 141 West Jackson Boulevard.

Q. Will you state for the record the number of plants that Allied Mills has and their several locations, please.

A. I don't remember the number of them, Mr. Lucas, but we have plants at Cozad, Elm Creek and Darr, Nebraska. Those are alfalfa meal plants.

At Omaha, Nebraska, that's mixed livestock feed and soybean meal.

Mason City, Iowa, which is mixed feed.

Peoria, Illinois, which is mixed feed and a two million bushel elevator.

Taylorville, Illinois, soybean plant.

East St. Louis, Illinois, mixed feed plant.

Fort Wayne, Indiana, mixed feed plant.

Greenville, Ohio, which is a small flour and cereal unit.

Buffalo, New York, mixed feed plant.

Portsmouth, Virginia, mixed feed and soybean meal plant.

[fol. 421] And then we have plants at Memphis, Tennessee, and Gainesville, Georgia.

Q. Are you in the process of opening any new plants or are there any in prospect?

A. Yes. We are opening a new plant the 15th of March at Eversea, Pennsylvania.

Q. That is near what point, may I ask, Mr. Craig?

A. It is 40 miles southeast of Pittsburgh.

Q. And located on what railroad, please?

A. Joint on the B&O and Pennsylvania.

Q. Have you anything else to add as to the plant setup, so to speak, of the company?

A. No, I don't think so.

Q. Now, will you give us briefly, if you please, your traffic experience. How long has it existed?

A. Well, it is about 39 years, 28 of which have been in the grain and grain products and soybean processing business, or rather 36 of which. I have had my present position for 28 years and for eight years before that I was traffic commissioner of the Buffalo Corn Exchange at Buffalo, New York.

Q. Are you a member of any committees, executive committees or otherwise?

A. I have been a member of the executive committee of the National Industrial Traffic League since 1928 and a member of its outlook and policy committee since 1944. I [fol. 422] am also a member of the traffic executive committee of the American Feed Manufacturers Association; and the same, that is, in the traffic committee of the National Soybean Processors Association.

Q. Have you in the years past at any time served as a consultant for the Offices of Defense Transportation?

A. I was a consultant for the Offices of Defense Transportation from January 5, 1942, until the last of 1948, and then I was a consultant for the—I have forgotten the name of it, but Mr. Knudsen was director during the Korean incident.

Q. In connection with the six years or so under the Offices of Defense Transportation, that was at the time of the administration of Commissioner Eastman?

A. Commissioner Eastman.

Q. And did you have there any contact with matters of movement of traffic and car supply?

A. I had three assignments there, that is, WLC assignments. I never was fulltime with them. And I was consultant for the Division of Traffic Movement. That was rail traffic movement which had to do with the movement of traffic by rail and a car supply. And I was a member of a formalized ODT committee handling the movement of alcohol for synthetic rubber and black powder and was an over-all consultant for Mr. Eastman, later Colonel Johnson, handling all transportation matters except busses, airplanes and intracity transportation.

[fol. 423] Q. Mr. Craig, in the course of your 28 years in your present position and as the traffic expert of the company, do you serve in any capacity in connection with the location of plants, selection of industrial sites?

A. Yes. Our business is operated about 90 per cent under what is called milling and transit arrangements or mixing and transit arrangements. Therefore, the transportation charges are extremely important. I have the responsibility for locating the area and the city in which we will locate and the railroad on which we locate.

Q. Are you familiar with the application of the Santa Fe and the Pennsylvania Railroad in this proceeding?

A. Well, in a general way, yes.

Q. Do you have some views that you would care to express to the Examiner and the Commission with reference to the application of those two companies for acquisition of control of the TP&W?

A. Well, Mr. Lucas, I want to say at the start that I am not interested insofar as this proceeding is concerned in the Pennsylvania Railroad or the Santa Fe Railroad or the Nickel Plate or the M&StL or Rock Island or any of the rest of them. I am interested in the TP&W Railroad and I am interested in that because of the importance of that railroad to Allied Mills' Peoria operation, particularly, and the importance of that railroad to our other operations, [fol. 424] particularly Fort Wayne, Buffalo, and Portsmouth, and because of that I am in favor of the, or rather I think it is in the best interests of the TP&W Railroad that the application here be granted to the two applicants that have purchased, as I understand, the control of the stock.

We have three different types of business which is routed via the TP&W Railroad: (1), and the biggest portion of it is the outbound business going to points east of Peoria. Over 90 per cent of that is routed in connection with the Pennsylvania Railroad, over 90 per cent of the outbound business that we give the TP&W here is routed in connection with the TP&W Railroad at Effner.

The next interest we have in routing traffic via the TP&W is business originating in the south, which is molasses and super phosphate, originating in Florida and

Tennessee, and that will come in connection with various roads, then TP&W into Peoria.

The third is overhead or bridge traffic, and in our particular case it consists mainly of alfalfa meal from our plants in Nebraska, going to Buffalo, Fort Wayne, and Portsmouth. The division of that traffic between the applicants outbound, that is, east of Peoria, is about 50-50 between the Pennsylvania and the Nickel Plate; inbound it is Santa Fe, Lomax, and Rock Island, Keokuk, and the TP&W, on the west end of it.

I don't have any figures or any idea how that divides.

[fol. 425] I would like to say two other things, I think. One is that during the time that the TP&W had a strike and were not operating Allied Mills, lost a number of their accounts in northwestern Indiana because we couldn't get the service over any other railroad that we could get the TP&W-Pennsylvania, and we lost them to people who were trucking out of Chicago. The amount of traffic that we route via the TP&W has increased steadily ever since 1947. I didn't take either '45 or '46 because '46 was affected drastically by the strike, and if my memory serves me right '45, a portion of that was, but in 1954 the Allied traffic routed via the TP&W was five times what it was in '47 and twice what it was in 1951.

I think I should say further that insofar as our business, and I want it understood that I am talking only about the things that come within my own knowledge, which is Allied Mills business, the Pennsylvania Railroad since 1947 has not solicited eastbound business from me, that is, the eastern business, rather, direct via the Pennsylvania. We do route some business direct here out over the Pennsylvania; and that is southern Indiana or it is on the Pennsylvania Railroad.

I think that is all I have, Mr. Lucas.

Q. And that last was addressed to Peoria particularly, Mr. Craig?

A. I am talking about Peoria, yes.

Mr. Wheeler: May I have the last question and answer read?

[fol. 426] Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Is there any further direct examination of Mr. Craig?

Mr. Lucas: Yes.

By Mr. Lucas:

Q. Mr. Craig, did I understand you to say that that co cluded what you desired to present here today?

A. That is right.

Mr. Lucas: That concludes it, Mr. Examiner.

Exam. Albus: Cross-examination, Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. I gather, Mr. Craig, Allied Mills has plants on t Pennsylvania and on the Santa Fe?

A. No plants on the Santa Fe.

Q. No plants on the Santa Fe?

A. That is right.

Q. But plants on the Pennsylvania?

A. One, Fort Wayne, Indiana.

Q. How about this Everson plant?

A. That is a joint Pennsylvania-B&O operation, and has not started operations.

Q. Did the Pennsylvania solicit the location of the plan at Everson?

A. Yes, so did the B&O.

Q. Mr. Craig, would it be fair to summarize your state [fol. 427] ment by saying that you are interested in service

A. Well, I am certainly interested in service. I certainl am interested in service.

Q. You have no plants located on the M&StL, do you

A. No.

Q. And you are not familiar, therefore, with the servic that the M&StL now provides on their line?

A. Well, I am familiar with the service that the M&St provides, as an illustration, from Minneapolis to Peoria because we give them business.

Q. You are familiar with the fact that that is a goo fast service, are you not?

A. It is a good fast service, yes, sir.

Q. Do you have any reason to believe, Mr. Craig, that the service that the M&StL would provide on the TP&W would be other than good fast service if it were to obtain control of that property?

A. I can't see where the M&StL would have any interest in maintaining the TP&W west of Peoria.

Q. And that is the basis upon which you believe that the Pennsylvania-Santa Fe application should be preferred?

A. Yes.

Q. You have no question about the competence or ability or the management of the M&StL to provide fast, efficient service, do you?

[fol. 428] A. I have none. They have good service.

[fol. 429] Q. If it were shown that service to, that improved and faster service routes, would result from the acquisition of the T. P. & W. via the M. & St. L., might that alter your opinion with respect to its acquisition by the M. & St. L. as against the Pennsylvania-Santa Fe?

A. Well, it wouldn't alter my opinion that Allied Mills needs the T. P. & W. and needs a strong and financially healthy railroad there, and that will best be accomplished by the Santa Fe-Pennsylvania. That is my present opinion.

Q. That is your present opinion?

A. Yes.

Q. And no testimony with respect to improved service and routes that was introduced by the M. & St. L. would alter that, is that correct?

A. You mean as to what you contemplate doing?

Q. Yes, sir.

A. I don't think testimony as to what you contemplate doing would change it, no.

Q. Have you discussed with the M. & St. L. their plans with respect to the operation of the T. P. & W. in the event they acquire control of it?

A. No, sir.

Q. Mr. Craig, what reason do you have to believe that the financial condition of the T. P. & W. would in any way be impaired if it were controlled by the M. & St. L.?

[fol. 430] A. Oh, that's your statement, not mine.

Q. You didn't so intend to—

A. (Interrupting) I didn't say that.

Q. Well, I thought you indicated that the financial condition of the T. P. & W. was an important consideration in your judgment.

A. I do, I said that.

Q. But you did not consider it, consider what the financial condition of the T. P. & W. would be if it were acquired by the M. & St. L.?

A. I did not.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Craig, T. P. & W. now is a railroad having some 16 connections with other main line railroads, doesn't it?

A. That's as I understand it.

Q. And do you find the fact that it connects with those 16 railroads of value to you in your business, having all those gateways available, routes?

A. Not all of them, Mr. Cassell, but in a general way the answer to your question would be yes.

Q. The T. P. & W. at the present time is an independent railroad not owned by any other railroad, isn't it?

[fol. 431] A. That is correct. And I would prefer that it stayed in that way but that doesn't seem possible.

Q. Well, there has been a good deal of testimony that a number of people have that same preference. That being so at the present time it cooperates equally with all of those connections, so far as you know, doesn't it?

A. In so far as the ones we use that is true, yes, sir.

Q. Are you familiar with the fact that the Rock Island has a connection at Keokuk with the T. P. & W.?

A. Yes, sir, we use it regularly.

Q. And the Santa Fe has a competitive connection at Lomax?

A. Well, they have a connection at Lomax. You are probably in a position to know how competitive it is better than I am

Q. I expect we experience it more directly than you do. But from your experience as a traffic man, and there is a map behind you that might assist you in refreshing your recollection, it shows the Santa Fe system west of Peoria in red, and I think you have a general knowledge of the location of the Rock Island Railroad. Isn't the Santa Fe and the Rock Island, aren't they in competition on business to and from the east and west?

A. No, you remember, I confined myself to those things within my own knowledge, which is Allied Mills' business, and I would say that that competition was pretty small as far as Allied Mills' business is—

Q. (Interrupting) I mean just generally. You are qualified, which we all know, as a traffic man of very wide experience, and I believe you are generally familiar with the two systems, the Rock Island and the Santa Fe, aren't you? [fol. 432]

A. Yes, in a general way.

Q. And wouldn't you say from your experience and knowledge of traffic matters that those two railroads are in competition?

A. I would say in certain areas they are, yes.

Q. And that would apply to the Lomax and Keokuk Gateways?

A. Depending upon your origins.

Q. Do you specify junctions on your routing?

A. Yes, sir.

Exam. Albus: Is that more or less general in your particular type of business?

The Witness: In our type of business it is general, Mr. Examiner.

Exam. Albus: Is there any reason for your doing that?

The Witness: Well, there are two reasons for doing it, and the one—I am talking not only about this proceeding but overall is the question of your milling in transit privileges, or mixing in transit privileges. The other, which would apply to everyone, would be your question of service.

Exam. Albus: Thank you.

By Mr. Cassell:

Q. I take it from the questions you have already answered the reason you are appearing here is primarily for the purpose of preserving the service to you that you now have available, isn't that right, via the T. P. & W.?

[fol. 433] A. I think I answered that in answer to Mr. Wheeler, Mr. Cassell, and I don't know as I care to elaborate on it.

Q. Isn't that a fair statement?

A. I said that I was interested in a very strong and financially healthy T. P. & W. Railroad that could give us service on both our business, both to and from Peoria and our overhead business, yes, sir.

Q. You don't see any reason why the T. P. & W couldn't continue to give you that service today, do you, with its present management and resources?

A. They have done very well up to now.

Q. You don't see any reason why they couldn't continue to give that service, do you?

A. I don't. Under present management you said?

Q. Yes. Now, since the Rock Island connects with the T. P. & W. at Lomax, or rather at Keokuk, it certainly would have no reason for being otherwise interested than in maintaining the railroad as strong as possible east of Peoria, it needs that as a junction and gateway, doesn't it?

A. Will you read that, please?

(Question read.)

A. East of Peoria; yes.

By Mr. Cassell:

Q. And similarly it needs it west to maintain its service route from Keokuk to Peoria, doesn't it?

A. Well, Mr. Cassell, as I say, I am going by our own [fol. 434] business, and I check back nine years and we had never routed a car of freight via—coming into Peoria via Rock Island-Keokuk and the T. P. & W., they had all come into Peoria Rock Island direct. Conversely, every car that originated west of the Mississippi River, if it was Santa Fe, it come in Lomax and the T. P. & W. I am not saying that is typical. I am saying that is our experience.

Q. Do you know whether or not the Santa Fe has any service route direct into Peoria other than Lomax, T. P. & W.?

A. Well, they reach Pekin.

Q. That isn't a service route, though, is it, to Peoria?

A. I don't know.

Q. In those locations where you do have Rock Island service, have you found it generally a railroad interested in giving good service and with an active, alert, progressive management?

A. The Rock Island?

Q. Yes.

A. Well, I think the Rock Island is improving every month, and I think that you could now say that they are giving good service, yes, sir.

Mr. Cassell: That is all.

Exam. Aibus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. The location in Peoria is on the T. P. & P. U., isn't it?

A. That is correct.

[fol. 435] Q. Do you get good service from the P. & P. U.?

A. Yes, sir.

Q. And your location at Buffalo is on the Nickel Plate?

A. That is correct.

Q. Do you get good service there?

A. Very good service.

Q. Thank you. Now, the prosperity of the T. P. & W. has been based on a neutrality, hasn't it, plus an aggressive management? Do you know?

A. I don't know. I have a slightly different idea, but I don't know.

Q. Would you consider that the continuance of neutrality among its connections would be important?

A. Yes, sir. I would consider it would be important that those connections be kept open and the same service that

is being provided now for those connections continue to be provided.

Q. Did you hear testimony expressing opposition to neutrality by any of the applicants or weren't you here, Mr. Craig?

A. No, I just came in this morning. I had an occasion to read some testimony last night as a matter of curiosity, but it didn't have anything to do with neutrality.

Mr. Broker: I have no other questions, thank you.

Exam. Albus: Any further questions of Mr. Craig? Mr. Cassell.

Further Cross examination.

[fol. 436] By Mr. Cassell:

Q. Mr. Craig, don't you have a substantial volume of overhead business that routes Rock Island, Keokuk, T. P. & W. and east?

A. Well, yes, we have a regular movement of it. How substantial it is I don't know.

Q. And the business which you spoke of which came in Rock Island direct was local to Peoria, it was not the overhead business?

A. It was local to Peoria, yes. Overhead business Rock Island, Keokuk, all goes Rock Island, Keokuk and out over the Pennsylvania and the Nickel Plate, depending on where it is going.

Q. Could you tell us what the origins are of that business that comes in Rock Island direct rather than through the Keokuk Gateway?

A. Well, it will originate at Cozad, Elm Creek and Darr, Nebraska, and it will originate at Des Moines and Cedar Rapids, Iowa, and Minneapolis, Minnesota.

Mr. Cassell: I am much relieved. Thank you.

Exam. Albus: Are there any further questions?

(No response).

Exam. Albus: You are excused, Mr. Craig. Thank you very much.

(Witness excused.)

Exam. Albus: Do you have a short witness?

Mr. Bagge: Yes.

[fol. 437] I would like to call Carl Abernathy.

Exam. Albus: Mr. Abernathy, please.

[fol. 438] Carl M. Abernathy was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Would you state your name, please.

A. Carl M. Abernathy.

Q. And where do you reside, sir?

A. 916 East Fairbanks, Peoria, Illinois.

Q. What is your business or occupation?

A. I am assistant traffic manager of the Keystone Steel & Wire Company at Peoria.

Q. Have you had any professional training in the field of traffic management?

A. I studied four years at the University of Maryland. I was awarded a Bachelor of Science Degree in 1951.

Q. How long have you been associated with Keystone?

A. Five years.

Q. Mr. Abernathy, would you describe the location of Keystone in a general way.

A. Our plant is located at Bartonville, Illinois, near Peoria, on a site comprising about 913 acres, of which 40 acres are leased to other companies. The plant includes steel mills, wire mills, machine shop, administration building, power house, which together have an aggregate floor area of more than 1,391,280 square feet. It is a steel plant.

Q. Would you describe the nature of the business.

[fol. 439] A. The Keystone Steel & Wire Company is engaged in the manufacture of steel by the open hearth process. Our finished steel is manufactured from purchased scrap iron and pig iron. Included in our steel plant are four 175-ton open-hearth furnaces, soaking pits for reheating ingots before rolling, blooming and billet mills for rolling steel into billets of various sizes, and a con-

tinuous nineteen-stand, multiple-strand rod mill for rolling rods from which wire is drawn. The wire mills include buildings which house facilities for cleaning, drawing, annealing, galvanizing, bundling and fabricating wire. Capacity is sufficient to draw into wire the entire output of the rod mill, and there is ample fabricating equipment to process all the drawn wire produced into finished products.

Q. How large an increment does Keystone represent here in Peoria?

A. Approximately 35 to 40 million dollars.

Q. Would you describe in a general way, Mr. Abernathy, the percentage of your total outbound and inbound traffic which moves either by truck or by rail?

A. Our outbound traffic at present is divided roughly as follows: 55 per cent via rail, 45 per cent via truck.

Q. On inbound movements, would you describe that, please.

A. You just want via rail and truck?

Q. Yes.

[fol. 440] A. Our inbound material is almost 95 per cent by rail.

Q. Would you describe briefly what you might characterize as your truck markets and your rail markets.

A. Our shipments via truck are primarily those within the states of Ohio, Indiana, Michigan, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, North and South Dakota. I would like to say that all of our shipments into this territory do not move by truck.

Q. I see. Is it fair to say that you are to a large extent dependent upon rail service, particularly for the inbound movement of your raw materials and for the distribution of your products?

A. That's a fair statement.

Q. Would you describe the extent to which you use the TP&W as an originating, terminating or intermediate carrier.

A. During 1954 we shipped 346 carloads via the TP&W and received 703, for a total in 1954 of 1,049 carloads.

We shipped 278 carloads and received 440, for a total of 718 during 1955.

Q. How long a period of time has Keystone made such use of the TP&W?

A. According to our records, we have used the services of the TP&W Railroad in excess of 40 years.

Q. What particular factors motivate you to route traffic via the TP&W?

[fol. 441] A. We use the TP&W primarily as a fast service carrier. For example, we maintain a warehouse in Los Angeles, California, and the best service to Los Angeles that we have found is via TP&W-Santa Fe.

Q. Are you familiar with the application of the applicant Santa Fe and Pennsylvania Railroads, in this proceeding?

A. I am.

Q. Are you acquainted with it, have you read it?

A. I have.

Q. Would you state what the position of Keystone is in connection with the application pending before this Commission, what your position is?

A. I am personally and my company, as an industry, is very definitely in favor of the application of the Santa Fe and the Pennsylvania Railroads to acquire control of the TP&W.

Q. Would you state the basis for your position.

A. When we were informed of the application of the Santa Fe and the Pennsylvania Railroads to acquire control of the TP&W we asked for a copy of the application. After a careful consideration of matters presented in their application and other relevant factors, we recommended to our executive committee that we support the application. We were so directed by our executive committee. Since we are engaged in selling our products in the national market, we are interested in a sound transportation system. Control of the TP&W Railroad by the Pennsylvania [fol. 442] and the Santa Fe railroads would certainly strengthen the transportation economy as a whole. In addition I believe that control of the T. P. & W. by the Santa Fe and Pennsylvania railroads is a natural, since the major portions of the T. P. & W. was carload freight and revenues are derived from traffic interchanged with one or both applicants.

Another reason we support the applicants is their promise to retain the T. P. & W's local management. Easy access to the T. P. & W. people is of inestimable value to us. We

are fearful that our service via this route would suffer if the local management were eliminated.

Q. Are there any other reasons for your support of the position of the applicants?

A. We are interested in the continued stability of the T. P. & W. Railroad and the shippers' assurance of this continued stability.

Q. With reference to the position of the other railroad intervenors in this proceeding, Mr. Abernathy, let me state this first: Was your company and were you familiar with the position of the applicant M. & St. L. Railroad at the time that you took this position?

A. We were.

Q. And were you familiar with the position of the other railroad intervenors seeking a partial ownership?

A. Not at the time we decided to support the applicants.

Q. Has that knowledge since that time come to your [fol. 443] attention and come to the attention of your management?

A. It has.

Q. And has your position changed in this connection?

A. No, it has not.

Q. Has the matter been fully discussed since the first time the position was taken by your board?

A. Yes, it has.

Q. Now, would you state, having in mind that your two basic needs which you have stated is a preservation of direct access to local management, and having in mind further the fact that your second need was to provide for the stability of the T. P. & W. as a separate operating entity, would you state whether or not these needs would best be served by the position taken by any of the other railroad intervenors?

Mr. Wheeler: Mr. Examiner, I think this is getting far too leading.

Mr. Cassell: Yes, I think the witness ought to do a little of the testifying.

Mr. Wheeler: Mr. Examiner, I should like to state at this time, while I am not going to object with respect to this witness, if the Santa Fe is going to produce witnesses

with prepared statements, I think they should comply with the Commission's rules and distribute them.

Exam. Albus: I agree with you.

Mr. Bagge: I withdraw the question.

[fol. 444] Exam. Albus: Thank you.

By Mr. Bagge:

Q. What is your position, having in mind, these two objectives, what is your position with regard to the other railroad intervenors?

A. We feel that our needs can best be obtained by the application here under consideration.

Q. Now, in connection with your use of the T. P. & W. as a bridge or originating carrier, did you or has your company ever had occasion to route traffic over the T. P. & W. and then over any other carriers, east or west?

A. There are occasions.

Q. Particularly with reference to Keokuk, has your company ever routed traffic to either the Rock Island or the Burlington at Keokuk, Iowa, from the T. P. & W.?

A. We have.

Q. Is there any reason for you to believe that that gateway would be prejudiced in any respect by the granting of this application?

A. I can see no reason.

Q. Why?

A. If the Keokuk Gateway is eliminated, we have Rock Island service available at Peoria. We can use the C. B. & Q. from Peoria. There are other service routes from Peoria which probably aren't quite as satisfactory for our needs. But I think that answers the question.

[fol. 445] Q. The fact of the matter is that—

Exam. Albus: Let him tell you what the facts are.

Mr. Bagge: All right.

By Mr. Bagge:

Q. Is the same condition true, Mr. Abernathy, with respect to other carriers whom you might interchange from the T. P. & W. on the east?

A. They are.

Mr. Bagge: Thank you.

That is all I have of this witness.

Exam. Albus: Let the record show a recess until 1:30.

(Whereupon, at 12 o'clock, noon, a recess was taken until 1:30 of the same day.)

[fol. 446] AFTERNOON SESSION 1:30 p.m.

Exam. Albus: The hearing will please come to order.

We will continue with the cross-examination of Mr. Abernathy.

Mr. Wheeler, please.

Cross examination.

By Mr. Wheeler:

Q. Mr. Abernathy, did the Santa Fe approach you in connection with their application?

A. They explained to us what they proposed in their application.

Q. Did they ask you to support it?

A. They did.

Q. Did they give you any information with respect to the M&StL application?

A. None that I recall.

Q. Did they indicate to you any of the plans of the M&StL with respect to the TP&W?

A. No.

Q. They made no statements with respect to the M&StL?

A. No, they didn't.

Q. Did they tell you that M&StL planned to abandon the west end?

A. No.

Q. Was your conclusion or the conclusion of your company based in any part on such thinking?

A. No, it wasn't.

[fol. 447] Q. Did you look at the M&StL application?

A. I have seen portions of it.

Q. Where did you obtain those?

A. I don't recall where it came from. It was received in our office, either in our executive department or in the traffic department.

Q. Do you know whether or not that was sent to you or handed to you or brought in there by the Santa Fe?

A. No, I don't.

Q. It just appeared there?

A. That is right.

Q. Did you contact any M&StL official with respect to this application?

A. No, I didn't.

Q. Or their plans with respect to the TP&W?

A. No, I haven't.

Q. Do you know whether anyone in your company has made such contact?

A. Not to my knowledge.

Q. You do ship over the M&StL, do you not?

A. We do.

Q. Has their service been satisfactory?

A. It has.

Q. Do you have any reason to doubt the ability of the M&StL to operate the railroad with good service, good [fol. 448] public service, rate service?

A. No, I don't.

Q. Mr. Abernathy, as I recall your testimony, it showed a sharp decrease in the use of the TP&W in recent years?

A. No, I don't—there was a decrease last year but that was competition—I mean other forms of transportation.

Q. That is what I am talking about. You are making a good many shipments or receiving materials at your plant by barge now?

A. That is right.

Q. You are making far more extensive use of barges than you did heretofore?

A. There has been an increase.

Q. Isn't it a sharp increase with respect to tonnage?

A. Yes, I would say it considered sharp.

Q. And I believe you testified you make extensive use of trucks?

A. Yes, we do.

Q. Do you have immediate access to the top management of the Santa Fe Railroad in connection with your shipments to the West Coast?

A. To the top management?

Q. Yes.

A. No, we don't.

Q. Does lack of that immediate access to them interfere with the service you receive from them?

[fol. 449] A. Most of our shipments to the West Coast are routed TP&W-Santa Fe.

Q. Yes.

A. And on those shipments we have access to the top management in Peoria of the TP&W, and they in turn, I presume, have access to the top management of the Santa Fe.

Q. But you, do you have it?

A. No, we don't.

Q. And you don't know whether or not they in connection with each of your shipments contact top management of the Santa Fe, do you?

A. No, I don't.

Q. And you have never had any trouble with service on the Santa Fe as a result of that?

A. No.

Q. Now, you stated that you thought it was in the interest of sound transportation system for the Pennsylvania and the Santa Fe to acquire control of the TP&W. Now, I assume that that system that you refer to includes both truck and water transportation as well, is that correct?

A. That is right.

Q. Is it your opinion that it would be in the interest of sound transportation system for the M&StL to be severely weakened traffic-wise and revenue-wise?

A. Would you repeat that, please?

[fol. 450] (Question read.)

A. I don't see that that's involved.

Q. Well, could you answer the question, though? Assume with me that it is involved, and could you then answer the question?

A. I would say that it isn't, if such is the case.

Q. Would you disagree that a sound transportation system is furthered by strengthening the smaller or weaker railroads?

A. Yes, that is a safe assumption.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross-examination.

By Mr. Cassell:

Q Mr. Abernathy, I believe you said two things that influenced your system, one was local management and the other was volume of interchange?

A. Volume of interchange?

Q. Yes.

A. That is right.

Q. Were those the reasons you gave?

A. The two principal reasons.

Q. What other reasons?

A. The strengthening of the TP&W by ownership by two of the country's largest systems.

Q. Isn't the TP&W in pretty good shape right now?

A. Yes, they are.

Q. Haven't they been able to provide all the service you need?

[fol. 451] A. That is right.

Q. Do you see any reason to believe that they are going to be in financial difficulty or not be able to meet their transportation commitments?

A. No, I don't.

Q. You know of no financial reasons, then, for their needing strengthening?

A. Not at the present time.

Q. You don't foresee any, do you?

A. No, I don't.

Q. You said at the time your company made its original decision you were not aware of the intervention of either the Rock Island or the Nickel Plate, that that came after your original decision. Do you know what the plans of the Rock Island are in regard to this acquisition?

A. No, I don't.

Q. As a matter of fact, what you are interested primarily in is transportation for your company, isn't it?

A. That's right.

Q. And the preservation of that in its present form, isn't that right?

A. That's right.

Q. And if the Rock Island were intent on preserving the TP&W in its present form, that would be what you'd want, isn't that right?

[fol. 452] A. We are interested in having the TP&W maintain in its present form, that is correct. It is our opinion, it is my opinion and the opinion of my company, that that can best be done by the applicants in this proceeding. Does that answer your question?

Q. No, I don't think so. If the Rock Island were going to retain the present management and leave the TP&W corporation intact with all of its officers as they now have today and fully subscribe to that just as has the Santa Fe and Pennsylvania, wouldn't that give you what you want?

A. I still think that my answer to the question should be sufficient.

Q. If the management remains intact, that is what you want, isn't it?

A. Well, we were thinking more of the natural connection of the TP&W.

Q. Now, let's just talk about the management end of it first. That was one of the two things you had in mind?

A. That is right.

Q. If that were left intact and the corporation preserved and the present officers were here that's what you want, isn't it?

A. That is one of the things, yes.

Q. So as far as that is concerned it wouldn't make any difference to you who the stockholders of the TP&W were so long as that condition remained, isn't that right?

[fol. 453] A. If the TP&W were maintained in its present condition that's right.

Q. Neutral and independent with the local management?

A. That is right.

Q. So you wouldn't care, then, who the stockholders were

A. That is correct, under those conditions.

Q. Now, the other thing that concerns you is the question of interchange. Did you hear the testimony here the last two days?

A. No, I did not hear it all.

Q. What was the source of your information in regard to the volume of interchange of the TP&W?

A. I don't know the number of the exhibit. It was the data introduced by Mr. Gurley.

Exam. Albus: It was Exhibit 4 or 5.

Mr. Thomas: H-5 it was.

By Mr. Cassell:

Q. Did your company know what the volume of the interchange was when you made your decision to support this?

A. We didn't have the exact statistics but we had in a general way we knew what the conditions were.

Q. One of the facts which appeared in the testimony of the Santa Fe was that it solicited against the Lomax gateway and for its long haul on Chicago and as a result all the traffic that moves through the Lomax gateway is the result of the TP&W's own efforts, did you know that?

[fol. 454] A. No, I didn't.

Q. Wouldn't that make a difference in your decision as to this interchange business?

A. As I understand it, the Santa Fe, Mr. Gurley has entered into the record, that they will solicit via Lomax as well as via Chicago.

Q. That's for the future, but I am talking about the past now, what they have been doing.

A. What they have been doing?

Q. Yes. Now, you said you based it on the premise they have the big interchange today?

A. Yes.

Q. Isn't that right?

A. That's right, that's their predominant move.

Q. That didn't come by the Santa Fe's efforts but in spite of it. Now, does that make any difference to you in your opinion?

A. No, it doesn't matter to us at all.

Q. Then why does it make any difference to you what the volume of interchange is?

A. Well, since that's where the major portion of the [illegible]'s revenue is concerned it would seem to us that that's where their major field of interest lies.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

Cross examination.

[fol. 455] By Mr. Broker:

Q. You are interested in maintaining a strong neutral railroad, aren't you?

A. That's right.

Mr. Broker: No other questions.

Exam. Albus: Are there any further questions on cross examination?

Mr. Wheeler: I have nothing.

Exam. Albus: Redirect.

Mr. Bagge: Yes.

Redirect examination.

By Mr. Bagge:

Q. Mr. Abernathy, what in your opinion would be the effect on the two objectives which you have indicated with the basis of your decision for supporting us by the acquisition of several of the railroads involved in this proceeding and ownership in the TP&W, that is in terms of stability of the two points that you raised?

A. I think multiple ownership in this case would have the resulting dilution of management control on the TP&W people. We would not have the direct access to the top management, they would not have the authority to make decisions. I think that is our primary objective.

Mr. Bagge: That is all I have.

Exam. Albus: Is there anything further?

Mr. Broker: Yes, sir, this brings in a new thing.

Recross examination.

[fol. 456] Mr. Broker: First of all I don't think it is clear on which railroad they are located.

Exam. Albus: You may ask him.

A. We are served by the P&PU, the Peoria Terminal and the C&NW.

By Mr. Broker:

Q. You testified, if there were numerous owners, more than two that you would not have access to the management?

A. Well, we would have the direct access to management, that's true, but I don't think under multiple ownership more than two owners, I don't think that local TP&W management would have the authority that they have now or that they would have under this proposal.

Q. You think that the Pennsylvania and Santa Fe would delegate more authority than would many owners, in other words?

A. I believe that's right.

Q. You are served by the P&PU. That is owned by five or six railroads, isn't it?

A. That is right.

Q. It is an efficient railroad, isn't it?

A. It is.

Q. Do you have any trouble having access to Mr. Willingham, let's say?

A. None whatsoever.

Mr. Broker: No further questions.

[fol. 457] For the record, he is president, I believe, of the P&PU.

Further redirect examination.

By Mr. Bagge:

Q. Mr. Abernathy, in your mind is there a distinction of character of railroad involved in the P&PU and the TP&W?

A. There is quite a distinction. The TP&W is a line haul railroad and the P&PU is a switching railroad.

Mr. Bagge: That is all.

Further recross examination.

By Mr. Cassell:

Q. What difference does that make?

A. There is a considerable difference, I would imagine, in providing line haul service and switching service.

Q. What's that got to do with management and their independence?

A. Not being a railroad man I don't know.

Q. Then do you wish to withdraw your statement.

Exam. Albus: No, the statement will stand. Do you want to continue to argue with him?

Mr. Cassell: No.

Exam. Albus: Thank you very much, Mr. Abernathy. You are excused.

(Witness excused.)

[fol. 458] Mr. Bagge: At this time, Mr. Examiner, one of the intervenors, for purposes of convenience, would like to appear.

Exam. Albus: Very well.

Mr. Safford: My name is Verle Safford and I am appearing as an attorney for the Peoria Association of Commerce. I should like to present Herbert Johnson, Executive Vice-President of the Peoria Association of Commerce, as our witness.

Exam. Albus: You have entered your appearance?

Mr. Safford: Yes, sir, I have.

HERBERT N. JOHNSON was sworn and testified as follows:

Direct examination.

By Mr. Safford:

Q. You may state your name, please.
A. Herbert N. Johnson.
Q. Where do you reside, Mr. Johnson?
A. I reside at 800 West Melbourne. Our office is located at 307 First National Bank Building.

Mr. Thomas: May I interrupt to make a suggestion that the counsel take my place so that the witness may then look toward this direction.

Exam. Albus: I think that would be better, so that the witness will face the reporter.

By Mr. Safford:

Q. What is your official position with the Peoria Association of Commerce?
A. I am executive vice-president of the Peoria Association [fol. 459] tion of Commerce, an intervenor in the proceeding, under action of the Interstate Commerce Commission permitting leave to intervene dated August 2, 1955.
Q. How long have you been on the staff of the Peoria Association of Commerce?
A. I have been on the staff of the Peoria Association of Commerce since May 1, 1953.
Q. Prior to that date, Mr. Johnson, with whom were you associated?
A. For a little more than 10 years prior to that date I was personnel and community manager for R. G. LeTourneau.
Q. During that period of 10 years that you have testified about, Mr. Johnson, were you active with the Peoria Association of Commerce as a member of the Association?
A. Yes, I have been active in the affairs of the Association of Commerce for about 15 or 20 years. I served as a director for 3½ years, vice-president for a year, as chairman of a number of their committees and chairman of their

public affairs council before being employed as a staff member.

Q. Mr. Johnson, will you state the number of members, the object of your association and its chief activities in this community.

A. Our Association of Commerce is represented by approximately 2,875 members representing industry, various professions and business. The general objective is to serve the civic, economic and social welfare of the entire Peoria [fol. 460] area citizenry. We have two activities in which we are very much interested. One is industrial development. The other is annexation and the growth of the city of Peoria.

Q. And where do these activities rate in importance as far as the Association is concerned?

A. On a poll of our membership, industrial development rates second.

Q. Mr. Johnson, I should like at this time to have your testimony as relates to the geographic location of the city of Peoria and a statement as to the business interests represented here in our community.

A. Peoria is located on the Illinois River, approximately equidistant from St. Louis and Chicago, at an altitude of 488 feet. It is 160 miles northwest of the center of population of the United States, which is a significant feature in our retailing activities, since we draw upon a 16 county area. We have 108,000 employees in the metropolitan Peoria area, which covers two counties, Peoria County and Tazewell County. They are employed in approximately 200 industries throughout the metropolitan area and also employed in business and self-employed.

Peoria is the eighth largest hog center in the world and also has a very active livestock market. During 1954 the saleable receipts amounted to over seventy-two million dollars.

We also have a tremendous grain market for use by local [fol. 461] industries, and in 1955 15,473 cars of grain were received in the area.

We, therefore, in carrying out the objectives of our association, are very much interested in the source of raw

material and the distribution of our manufactured products.

Q. Mr. Johnson, going back to your organization, just state for the record how it is governed or controlled, by what type of body.

A. We have a board of directors composed of 18 people representing the professions and industry and business. In addition to 18 directors, we have 5 officers who are elected by the board. Then, we have ex-officio directors that serve on the board. So we have a total number at the present time of 27 people. The vice-presidents each serve various departments within our organization and this body is responsible for policy of the Association. I am directly responsible to the Board of Directors for the administration of the Association.

Q. And any action taken by the Association of Commerce, City of Peoria, for and on behalf of its membership is taken by this governing which you have just testified about?

A. Yes, except that our committees are permitted to take any action that's within the objectives of the Association.

Q. Calling your attention to the month of July, 1955, I will ask you whether or not the matter of the application of the Santa Fe and Pennsylvania Railroads directed to the [fol. 462] Interstate Commerce Commission for leave to acquire the capital stock of the TP&W Railroad was brought to the attention of your board of directors.

A. Yes. At their meeting of July 18, 1955, the board approved a petition to the Interstate Commerce Commission for leave to intervene in full support to the application of the Santa Fe and Pennsylvania Railroads for approval of their joint acquisition of control of the TP&W through the purchase of their capital stock.

Q. And pursuant to that action, what did you do, as executive vice president, relative to preparing an intervening petition?

A. We prepared the petition, since I was directed to do that by the board, and it was filed on July 22, 1955.

Q. I will ask you whether or not the position that the Association of Commerce took relative to the application of the Santa Fe and Pennsylvania Railroads was stated in your petition to intervene.

A. Yes.

Q. I will ask you to state for the record what were the motivating reasons for the stand or position which your Association took.

A. Well, the officers and directors, after considerable study and inquiry, used as a basis for the position which they took the factors contained in the application of the Santa Fe, the Pennsylvania, which appears in Exhibit 7-D. [fol. 463] Section 3. I will be glad to read those, if you would like.

Exam. Albus: No. They are already in the record.

By Mr. Safford:

Q. You testified a moment ago that your Association was exceedingly interested in industrial development for the city of Peoria and environs. Is that correct?

A. Yes, sir.

Q. What was the position of the Association of Commerce as relates to its industrial development from the standpoint of the application pending at this time?

A. Well, the position of the Association, Mr. Safford, is divided into three different parts. The first part, and I read from our petition: Under joint ownership by Santa Fe and Pennsylvania, the TP&W, as an independently operating railroad, can continue its active role in support of the Association of Commerce program for the industrial development and growth of the greater Peoria area and central Illinois.

Q. Just develop that stand further, if you will, Mr. Johnson.

A. Well, the reasons for this petition, as brought out in the discussions in coming to this position, is (1) that the TP&W has approximately twenty-seven hundred acres of industrial land and (2) that Mr. J. Russell Coulter, president of the TP&W, serves on our Association's industrial advisory council.

Q. Pardon me, I would like to interrupt you there, Mr. Johnson. Just state for the record the function of this committee to which you are now referring.

[fol. 464] A. The Association of Commerce industrial advisory committee is composed of some twelve to fifteen individuals representing finance, banking, realtors, warehousing, utilities and transportation. This committee is subject to call at any time that we feel it necessary, which is quite frequent, to discuss the proper approach to an industrial development prospect, and we seek their counsel and advice.

As brought out, one of the reasons here, it was felt with the TP&W management represented on this committee that it would be very helpful and useful.

Q. Has Mr. Coulter and top officials of the TP&W cooperated in this regard with the Association?

A. Yes, very much so.

Q. Is the Association of Commerce interested in seeing the TP&W continue to operate in Peoria as an independent agency?

A. Yes, Mr. Safford. We are interested in industrial development, we certainly are interested in maintaining the home office of the TP&W in Peoria, with over six hundred employees.

Q. And you have, as you stated, gotten invaluable assistance from the TP&W and its officials in your rezoning of industrial land and in the matter of acquiring industrial properties, helping in acquiring industrial properties?

A. Yes, and they also substantially contributed to our industrial development survey and also assisted in its preparation by furnishing information. They also took a [fol. 465] very active part by appearing before the Peoria County zoning board of appeals in an effort to have over 6,000 acres of ground rezoned for industrial use.

Another point for the board taking the position which I have outlined is that we in Peoria are very interested in maintaining Peoria as the second city in Illinois.

Q. Mr. Johnson, how, in the opinion of your association, will the joint ownership of the TP&W Railway by the Santa Fe and the Pennsylvania insure continued growth of your industrial area?

A. Another position that we took, as stated in our petition, is ownership of the TP&W by the Santa Fe and Pennsylvania insures continued growth of through traffic and

permits stronger interest in industrial development in the area.

Q. Develop that answer further, if you will, please.

A. One of the reasons was that it provides through traffic from coast to coast.

The second reason is the reputation of the Santa Fe and the Pennsylvania and the success they have met in industrial expansion in other areas.

The third one is the reception and interest we have received when calling upon their representatives in connection with our industrial development activities.

Q. Have those two roads assisted you in your industrial development activity?

A. Well, our industrial development plan isn't too far [fol. 466] along, but on our first contact and subsequent contacts they have been very cooperative.

Q. What effect do you feel would be had upon the TP&W Railway without the prospective ownership by the petitioning railways to this application?

A. Would you repeat that question, please.

(The last question was read.)

A. I don't quite understand that question.

Q. Do you contemplate that the TP&W would be adversely affected by failing to receive assistance from the Pennsylvania Railway and the Santa Fe Railway?

A. Yes.

Q. And you feel that the ownership by these two roads would be of material aid to the present TP&W Railway as operated?

A. Well, another one of the points that, the reason for the board taking this position, from the traffic interchanged by the two roads with the TP&W, it would appear that the TP&W without this assistance wouldn't be quite as successful.

Q. And that conclusion is reached by facts and data which you have studied, which relates to freight transportation?

A. I haven't studied it myself. I am trying to outline herein various points that I observed in discussion by the board and officers in coming to these positions.

Q. And are there any other reasons why the position that you have been testifying about was taken? If there are, you [fol. 467] might state them.

A. Well, of course, the Association of Commerce, Mr. Safford, is very much interested in industrial development in the area. They embarked upon this program a little over two years ago. We are now in the third year. When we first engaged in this program we established an industrial development department. We then studied other cities throughout the United States by personal visit and through correspondence to try to pick up what factors we might best use and which ones we might delete. It was at that time that we came to the conclusion that we lacked industrial land and embarked upon a program to secure more land zoned for industrial use. As I mentioned earlier, the TP&W appeared before the zoning board, along with ourselves, and I do want to bring out that most of the railroads in the area were cooperative with us, very cooperative, in securing information in connection with that program.

We then prepared an industrial survey of the metropolitan area. We are now in the process of distributing this information and making various contacts.

Now, we are primarily interested in industrial development because we are looking ahead to 1960 and thereafter when the largest group of marriageable and workable people will come over the market. We also have a surplus of female skilled labor that we could put to use. We are interested in a 50-mile area, not just the city of Peoria, and [fol. 468] the facilities that might be available in this 50-mile or more area. I won't limit it just to 50 miles.

Another one, as a final reason, I observed, in the board taking this position, that is, the three roads, the Santa Fe, the TP&W and the Pennsylvania, are complementary, one to each other, which would provide this straight-line through traffic from coast to coast, and it seemed quite apparent to them that with the 50 per cent interest in the TP&W they would do everything within their power to maintain that road.

Q. Mr. Johnson, since the action of your board of directors taken on or about the 18th of July 1955, has your

board kept informed as to developments pertaining to the pending application?

A. I wonder if I might read the third position of the board before we get into that.

Q. All right.

A. The third position taken with the petition was giving full support of the Santa Fe and Pennsylvania Railroads to the Interstate Commerce Commission for approval of their joint acquisition for control of the TP&W through purchase of its capital stock.

Now, in answer to your question, Mr. Safford, the subject was brought to the attention of our board on September 22, 1955, when I presented to them a report prepared by our traffic department outlining all of the intervenors and all [fol. 469] of the action that had been taken on this case from July 8, 1955, to September 11, 1955. The matter was again brought to the attention of our board of directors on January 12, 1956, and the board approved legal counsel to be represented here at this hearing.

Again it was brought to the attention of the Board on January 26, 1956, when in my executive vice-president's report I informed the board of the work that we had done, the fact that you had volunteered to serve in that capacity, and that the hearings would commence here on February 1, 1956.

Q. And there has been no change in position brought to your attention by any member of your board of directors or any official of your Association to the present time as relates to the application of the two railways desiring to purchase the stock of the TP&W?

A. That is correct.

Q. And had there been a change of position, it would have been brought to your attention, Mr. Johnson?

A. I am sure it would, because I have attended every one of our board meetings, and as secretary of the board I must keep minutes of what goes on, and I am not aware of any call for any special board meeting to consider this matter.

Q. Mr. Johnson, you have interviewed and discussed with representatives of the Santa Fe Railway and the Pennsylvania Railway the matter of their application being heard at this time, have you not?

[fol. 470] A. Yes.

Q. And you have discussed with them the benefits that you feel will come to the City of Peoria and community by their joint ownership of the TP&W Railway?

A. Not in great detail. Mostly discussed with them the procedure here since this is my first experience in a matter of this kind.

Q. You are not a paid witness, are you, Mr. Johnson?

A. I am not paid to testify. I am on the payroll of the Association, at least I hope so.

Q. That is, the Association of Commerce?

A. Yes.

Exam. Albus: Incidentally, you are doing all right, too, Mr. Johnson.

By Mr. Safford:

Q. And you are not on the payroll of any of the parties interested in this proceeding, are you, Mr. Johnson? I mean, the industry, transportation industry, railways.

A. No, sir.

Q. And it was the opinion of your Association on July 18, 1955, and it is now the opinion of your Association on February 3, 1956, that the best interests of the city of Peoria and environs will be served by the granting of the application and relief sought here by the Santa Fe and the Pennsylvania Railways to acquire the capital stock of the TP&W Railway?

A. That is correct.

Mr. Safford: No further examination, Mr. Examiner.

[fol. 471] Exam. Albus: Cross-examination, please, Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. Mr. Johnson, do you know Mr. Frank Clausen, the former head of the Minneapolis Chamber of Commerce Industrial Development Department, now head of the M. & St. L. Industrial Development Department?

A. Yes, sir. I met him, oh, sometime during the month of January in our office.

Q. You had not met him prior thereto in your association work?

A. Not that I recall. I believe that was the first time that I met him.

Q. Mr. Johnson, is it the policy of your association to take sides in a controversy before hearing both sides?

A. No, sir.

Q. I believe you said you filed your supporting petition to intervene on July 8 or 18, which was it?

A. We filed it on July 22, 1955.

Q. Which was only 11 days after the application filed by the Pennsylvania-Santa Fe was verified, is that not correct?

A. I don't know when it was filed.

Q. Where did you get a copy of their application?

A. I don't recall that.

Q. When were you first apprised of it?

A. I believe you are asking me personally when I was first?

[fol. 472] Q. You or anybody else with the association.

A. Well, I can't speak for our officers and directors as to answer to that question, so I will answer it personally. The first I heard about it was at a meeting here in Peoria at which it was announced the plans of the Santa Fe and Pennsylvania to purchase the T. P. & W.

Q. Was that meeting adressed by officers of the Santa Fe or Pennsylvania?

A. As I recall, I believe both the president of the Santa Fe and the Pennsylvania and also the president of the T. P. & W. were present.

Q. Are you aware, Mr. Johnson, that the M. & St. L. has as its sole eastern terminus the City of Peoria?

A. I am not familiar with traffic matters. I am unable to answer that.

Q. Are you aware, Mr. Johnson, that the M. & St. L. for generations has advertised itself as the Peoria Gateway railroad?

A. I believe I can say that I am aware of the fact that they have advertised themselves as such but not for

generation. I just have recently noted that, in the last year or two, perhaps since I became a staff member of the association of commerce. Before that I had no interest.

Q. Do you know of any other railroad that so advertises?

A. Oh, I don't know what the trade-mark is of the other railroads.

[fol. 473] Q. Do you know of any railroad that gives Peoria as much advertising, nation-wide advertising, as the M. & St. L.?

A. I am not familiar with any advertising of the railroads.

Q. You didn't undertake to make any study of that fact before making the recommendation to the association?

A. It may have been that our officers and directors are familiar with that. I set forth the position they took and the reasons I observed in their discussions in coming to this position. Whether or not their consideration of the advertising of railroads took part in it, I don't know, it was not brought up, to my knowledge.

Q. Do you know the aggregate interchange of the M. & St. L. at Peoria?

A. No.

Q. Was that ever discussed at any of the association meetings when this question was before them, to your knowledge?

A. Not to my knowledge.

Q. Were the plans of the M. & St. L. with respect to its proposed ownership of the T. P. & W. ever discussed at any of the meetings of the association that you attended?

A. To my knowledge it was brought out that the M. & St. L. had an interest and what their interest was, yes.

Q. What was that interest that you refer to?

A. To acquire control of the T. P. & W.

Q. Approximately when was that first brought out in the discussions?

[fol. 474] A. I think it was first brought out at the board meeting July 18, 1955.

Q. And did the board issue an invitation or otherwise offer the M. & St. L. an opportunity to present their views to the board in respect to their plans?

A. They did not, neither did they extend any invitations to any others.

Q. And to this date the board has not done that, is that correct?

A. Not as a board not officially as a board, no.

Q. Or individually?

A. Individually, I can't speak for them.

Q. You don't know of any individual member who has sought out the views of the M. & St. L., do you?

A. No.

Q. Mr. Johnson, is this a normal policy of the association if a controversial matter comes up, does the association seek out the views of the parties to the controversy before taking a position or not?

A. We take so many different positions, we always find ourselves on one side or another of a controversy in about everything that we do, I would say everything, and the approach to each individual subject that comes before the board is not a written policy, 1, 2, 3, 4, 5, as to how you are going to consider it. It is different as the cases might be.

[fol. 475] Q. Was there during the course of the deliberations on the action to be taken by the association, was there mention of the size of the Santa Fe and Pennsylvania as compared to the M. & St. L.?

A. I don't recall that. Neither did I state it in any of the reasons here for taking this position.

Q. Did any discussion occur or were any statements made indicating that the M. & St. L. would abandon the west end of the T. P. & W.?

A. I don't recall any discussion along that line.

Q. Now, Mr. Johnson, I believe you stated you made a considerable study of this problem before you made your recommendations to the association, is that correct?

A. That is not correct.

Q. Well, who made the considerable study that you referred to?

A. I said our officers and directors had conducted inquiry and studied the situation.

Q. Do you know whether any of them ever got any information with respect to the plans of the M. & St. L. from any official of the M. & St. L.?

A. I do not.

Q. Wouldn't you formally expect that in making a study of a situation such as this that course would be pursued?

Mr. Safford: I object to that, Mr. Examiner. He stated he didn't know of any such individual inquiry being made.

Exam. Albus: He may answer, if he knows. The objection is overruled.

[fol. 476] A. I do not know, but I assume that they knew whereof, what they were doing, because we have a very fine group of representative citizens, all independent thinkers, and certainly do not express themselves on policy matters of the association without knowing what they are doing. I have a great deal of respect for each and every one of them.

By Mr. Wheeler:

Q. But that's the sole information that you have with respect to the information that they had regarding the plans of the M. & St. L., is that correct?

A. Will you repeat that question.

(Question read.)

By Mr. Wheeler:

Q. You relied, in other words, on your faith in their judgment?

A. Well, understand my position, Mr. Wheeler, I am responsible to the board. They took some action. The action that they took is stated in the petition. And I have set forth the reasons that were discussed from time-to-time at the board meetings for coming to this action.

Q. And you do not know what study, if any, underlayed that action?

A. No.

Q. Now, you referred to coast-to-coast traffic, Mr. Johnson. Was it your impression from the discussions in the association that they believed a new coast-to-coast service [fol. 477] would be inaugurated when the Pennsylvania and the Santa Fe took control of the T. P. & W.?

A. I don't believe that they had in mind a new service. It was to preserve the service that does exist, and it was their feeling, as I gathered it, that it had a better chance of being maintained, as this link being occupied by the T. P. & W., was half ownership by the Santa Fe and half ownership by the Pennsylvania to preserve that link.

Q. Do you know whether or not they had any information which indicated that the coast-to-coast service that you have described, as you have described it, would be discontinued by the Pennsylvania or the Santa Fe in the event they did not obtain control of the property?

A. I will have to have that question repeated.

(Question read.)

A. I have no information, no.

By Mr. Wheeler:

Q. Mr. Johnson, were you aware that both the Pennsylvania and the Santa Fe solicited against the T. P. & W. and the Peoria Gateway?

A. I don't recall that being discussed as a factor in coming to our position.

Q. Now, in the discussions of the association with respect to interchange of traffic, was there any statement made that this interchange traffic resulted from the solicitation of the Santa Fe or the Pennsylvania?

[fol. 478] A. Well, Mr. Wheeler, they didn't get into any discussions that I can recall concerning matters such as that. I have set forth the position and the reasons that I recall of their taking that position, and that is not included.

Q. Does it boil down to this, on examination of this exhibit, exhibit 7-D of the application, the board concluded to support the Pennsylvania-Santa Fe application?

A. Yes, that was set forth in the petition, Mr. Wheeler, that the two applicants committed themselves to paragraphs A through E in Exhibit 7-D, Section 3 in their application.

Q. Mr. Johnson, do you think it is logical if the M. & St. L. spent $12,000,000 for the T. P. & W. that they would not seek to further its interests?

A. Well, that wasn't a factor that was discussed, and I am only representing a position of the board and the reasons they set forth and that was not one of them.

Q. Mr. Johnson, hasn't the M. & St. L. been cooperative with the association in connection with its industrial survey?

A. They have been very cooperative.

Q. Mr. Johnson, I believe you solicited contributions from various industries and railroads in the Peoria area to help the association in making an industrial survey; is that not correct?

A. Yes, sir.

Q. Did any of the railroads not respond to your request for a contribution?

[fol. 479] A. Well, Mr. Wheeler, the survey cost a little over $12,000, and we received contributions from $15 on up for it, and I can't remember who gave and who didn't. I know a number of the railroads did contribute towards it. Which ones did and which ones didn't, I can't remember all of them. I believe the M. & St. L. did make a contribution to the industrial survey.

Q. Do you recall whether the Pennsylvania made a contribution?

A. No, I do not.

Q. Or the Santa Fe?

A. I do not recall.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Johnson, I believe your action was taken in July in regard to this position you now have before the Commission?

A. July 18, 1955.

Q. At that time your association had no information as to the Rock Island's interest in this case, did it?

A. I believe that is correct. I believe at that time the only one that the board was aware of was the M. & St. L.'s interest. However, it was brought out at the board meeting

that there, no doubt, would be other railroads taking an interest in the matter.

Q. But you had no information as to the Rock Island?

A. No, sir.

[fol. 480] Q. I was interest in one of the remarks you made, that you felt that the service via the T. P. & W. would be adversely affected if the application were not approved. In what way? What is going to happen? Is there any trouble on the T. P. & W. today?

A. I don't recall saying that the service would be adversely affected.

Q. You made a remark on your direct examination that the T. P. & W. was, I gathered, either unable by itself to complete its commitments, did you mean to imply that?

A. No, I don't recall saying that either.

Q. Isn't it a fact that the T. P. & W. is in about the soundest financial condition it ever has been today?

A. I assume it is, yes.

Q. Well, do you know?

A. I looked at its statement that they presented. I haven't compared it with prior years.

Q. Well, it is a pretty good one, isn't it?

A. Yes.

Q. And from your knowledge here in the City of Peoria of the community and having looked at that statement, do you have any doubt as to the ability of the T. P. & W. to continue to provide to Peoria?

A. You mean as a separate unit?

Q. Yes, if it were left alone, none of us came down here as here today.

[fol. 481] A. I certainly think it would, yes.

Q. So you didn't mean to imply that there was any danger of the continued efficiency and good service by the T. P. & W. if this application were not approved?

A. And the trustees would decide not to sell?

Q. That's right.

A. I think that's correct, yes.

Q. The Rock Island had one of its men on your committee for industrial development, did it not, last year?

A. Well, we have about somewheres between sixty-five and seventy-five people on our over-all industrial develop-

ment committee. I am inclined to think that probably most of the railroads in the area here are represented on this committee. If not, they should be.

Q. I take it one of the things that the City of Peoria is particularly interested in is the preservation of the T. P. & W. as a separate corporation with its local officers and plant as it is today, isn't that right?

Mr. Broker: Excuse me. He is not speaking for the City of Peoria.

By Mr. Cassell:

Q. I mean the Chamber of Commerce?

A. Yes.

Q. And if that were to be maintained in the future, that would meet your requirements, wouldn't it?

A. Well, it would depend upon what assurance we'd [fol. 482] have and how that would be maintained. After all, it has been brought, I am sure, to the attention of our officers and directors various possibilities that exist at the present time in that the trustees of the T. P. & W. wish to dispose of their capital stock and the other interests and they have taken a position and have steadfastly held to it.

Mr. Cassell: That is all.

Cross examination:

By Mr. Broker:

Q. Mr. Johnson, is the Nickel Plate a member of your association?

A. I think I can safely say yes. I believe all of the railroads in the area belong to the association of commerce.

Q. You are not purporting to speak for them at this hearing?

A. Sir?

Q. You are not speaking for them at this hearing, are you?

A. Speaking for who?

Q. I say you are here for the members—we are members—you are not speaking for us, are you?

A. I am speaking for the Peoria Association of Commerce, according to the policy of our board in action that they have taken and directing me to represent them here at the hearing and to set forth their positions and the reasons that I have gathered for their positions.

Q. Now, that board relied on Section 3 of Exhibit 7-D, is that right?

[fol. 483] A. Yes, that is set forth in our petition.

Q. They discussed that section of the contract?

A. I am sorry--

Q. (Interrupting) Did they discuss that section of the contract, Section 3?

A. As I recall, the petition was directed to be written in conformity to that section, yes.

Q. You understand it specifically says all these conditions are not for the benefit of anybody other than the Pennsylvania and the Santa Fe?

A. Well, I don't know whether—I can't speak for the officers and directors, whether they knew that or didn't know that in coming to this action.

Q. Now, one of the factors you relied upon was the development of through traffic, I understand, is that correct?

A. Yes.

Q. And did you hear the testimony of the applicants about favoring their long-haul?

A. Oh, I have been in and out, I don't know whether I heard that or not. I was primarily interested in the reasons that were set forth in the position and tried to listen to those who were testifying along that line.

Q. Do you know, for instance, that the Nickel Plate, according to Exhibit H-5 in the 12 months period ended June 30, 1955, interchanged 13,590 cars with the T. P. & W.

[fol. 484] A. No, I don't know that.

Q. Do you know that the Pennsylvania, according to its Exhibit H-16, page 5, moved only 7,277 cars in and out of Peoria?

Mr. Lucas: Mr. Examiner, those figures are not correct. The exhibit will speak for itself.

Exam. Albus: The exhibit will speak for itself, yes.

Mr. Broker: I am not reading a correct figure?

Mr. Lucas: No, the way you put that question you are not.

Exam. Albus: All right, restate the question, then.

By Mr. Broker:

Q. I am changing that from 7,277 to 10,410, is that correct now?

Mr. Lucas: No, I am not at all sure it is.
Will you read the question to me, please.

(The question was read as follows:
"Q. Do you know that the Pennsylvania, according to its Exhibit H-16, page 5, moved only 7,277 cars in and out of Peoria?")

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.
Ask the question.

Mr. Broker: Will you please read the question again?

Exam. Albus: Reframe the question, will you, please, Mr. Broker. Will you ask the question again, please.

By Mr. Broker:

Q. Do you know that the Pennsylvania Railroad transported via its own line 10,410 cars in and out of Peoria?

[fol. 485] Mr. Lucas: That is correct.

Exam. Albus: All right.
What is the answer, sir?

A. No, I don't know.

Exam. Albus: Next question, please.

By Mr. Broker:

Q. Why would your organization favor the handling of that Nickel Plate traffic in through movement from Lomax, let's say, to Effner without interchange at Peoria?

A. I don't know why they would. I don't think I said that they would.

Q. You said one of the reasons they favored this was because of the through traffic, through traffic potentialities.

A. I set forth the position of the board of directors that they took on July 18, 1955, and the reasons that I observed for that taking this position. There is a lot of information that has come out since then that has been brought to the attention of the board, their position hasn't been changed. Primarily it is in the interest of industrial development, in which we have a link of one railroad on one end and the other on the other end by buy the T. P. & W. and own it 50-50, and I am sure it is the board's feeling that the link would be better preserved by these two roads.

Q. You base part of your reasoning on the through traffic. Maybe you could explain that again? In other words, I am anxious to find out why your organization would favor a [fol. 486] plan that would take switching business and railroad business away from the City of Peoria?

A. Well, that isn't the basis that I have stated. It is to preserve the link between—no, that is not correct. It is to preserve the services of the T. P. & W. and the position of the association was that this could best be done by acquisition by the Santa Fe and the Pennsylvania.

Q. Don't you think the Nickel Plate is interested in maintaining the T. P. & W.?

A. Oh, I imagine they are or you wouldn't be here.

Q. And do you think it is important that that railroad remain neutral among its many connections?

A. Yes, I would say so.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions of Mr. Johnson?

(No response.)

Exam. Albus: You are excused, sir. Thank you very much.

(Witness excused.)

[fol. 486-A] Exam. Albus: May we have the next witness, please.

Mr. O'Hern: Mr. Examiner, my name is C. V. O'Hern, Jr., attorney appearing for Illinois Central Light Company, an intervening petitioner.

At this time I would like to call as our witness Mr. Earl Edwards.

EARL D. EDWARDS was sworn and testified as follows:

Direct examination.

By Mr. O'Hern:

Q. Will you please state your name and address?

A. I am Earl D. Edwards and I live at Rural Route 4, Galena Road, Peoria, Illinois.

Q. By whom are you employed and in what capacity?

A. I am employed by the Central Illinois Light Company as operating vice-president and I am a director of the company.

Q. What is the general character of your company's business?

A. Public Utility engaged in the production and distribution of electricity and steam heat and the distribution of gas.

Q. In what areas does your company operate?

A. We operate in the Peoria area, Springfield, Illinois, area, the Lincoln and Toledo area.

Q. To what extent is your company affected by the operation of the TP&W Railroad?

A. The TP&W Railroad handles our coal into our major [fol. 487] generating station.

Q. Where is that major generating station located?

A. That is located in East Peoria, Illinois.

Q. That is just across the river from the metropolitan area?

A. That is correct.

Q. What is the name of that station?

A. That is the Wallace Station of the Central Illinois Light Company.

Q. Tell us something of the size and capacity of that station.

A. The Wallace Electric Station has an installed capacity of 250,000 kilowatt, and at the present time we are engaged in expanding this to 350,000 kilowatt.

Q. Approximately how many turbines and generators do you have there?

A. This plant has operating at the present time six turbo-generators and we are installing the seventh.

Q. In the operation of this plant you consume coal, do you not?

A. That is correct.

Q. Can you give us some idea of the amount of coal consumed at this plant?

A. In 1955 this station consumed 650,000 tons of coal. In round figures 600,000 tons of coal were delivered by the TP&W Railroad, and again in round figures some 400,000 ton of this coal originated on the TP&W. The remaining [fol. 488] 200,000 tons were delivered by connecting lines to the TP&W and then to the electric station.

Q. Your company is a consignee of shipment over the TP&W Railroad, are they not?

A. That is correct.

Q. In terms of tonnage do you have any opinion how you rank as a consignee over the TP&W?

A. Well, I assume that we are the largest consignee.

Q. Have you ever investigated that assumption to verify it?

A. No, sir.

Q. What part have you personally had, Mr. Edwards, in your company's relationships with the TP&W Railroad, and over how long a period and in what capacity?

A. I was part o f the construction force starting in 1924, engaged in the building of the electric generating station. I was a part of the operating force of the power plant until January of '26, when I took over as chief engineer. I have been connected with the operation and expansion of the station continuously from that time until the present. A power plant is dependent upon a railroad for its supply of coal and also for the materials used in the construction and maintenance of facilities. Scheduling of fuel for a power plant is important and dependable delivery is an absolute necessity if reasonable coal handling costs are to be maintained. During my 23 years of connection with [fol. 489] this station we have had periods of good service, periods of poor service, and periods of no service. The best

service we have ever enjoyed started with the administration of Russell Coulter and continues to this day.

Q. Explain how the future operation of the TP&W Railroad will affect the future operations of your company.

A. The demand for coal at the East Peoria station, Wallace station, will increase for the next few years and will level off at about 800,000 tons per year. This tonnage will vary, as new plants are developed at other locations, but at intervals of three years will reach its maximum as usage of about 800,000 tons. We contemplate a new station south of Peoria on the Illinois River and our present thinking is that this station will be served by the TP&W Railroad. This location has not finally been determined and is subject to change dependent upon soil conditions, water supply, and rail service. This new plant will consume about 300,000 ton of coal per year, which will increase to 500,000 tons of coal per year after a three-year period.

Q. Now, your company, the Central Illinois Light Company, has filed its petition as an intervenor in this matter, asking that this Interstate Commerce Commission approve the acquisition of the TP&W by the Santa Fe and the Pennsylvania Railroad on the basis of their petition. Since the filing of your company's petition to intervene, there have been other petitions filed and other railroads have stated [fol. 490] their positions more fully in this matter. Are you familiar with the positions and the statements made since the filing of your company's petition?

A. Well, I believe I am. I haven't checked the petitions in detail, but I have been present at some of these hearings and heard the statements made here.

Q. Has your company's position changed in any manner as a result of these later petitions and statements?

A. No. We still feel that the approval of the Santa Fe and Pennsylvania petition for acquisition of the TP&W is definitely to our best interest and that of the public which we serve.

Q. Why?

A. Well, we are a public utility committed to providing the best service possible to our customers. The railroad service we get from the TP&W is vital to our operations. In addition to our need for a constant and reliable route

for the delivery to us of our coal, there are these other reasons why we favor the Santa Fe and Pennsylvania plan for acquisition of the TP&W. As the principal interchange railroads at the east and west ends of the TP&W the Santa Fe and Pennsylvania appear to us the logical owners and our greatest assurance that the entire line will continue to be operated as in the recent past.

Secondly, the plan gives us confidence in the maintenance of local management with which we are familiar, which gives us assurance of the type of service vital to us. The [fol. 491] TP&W cuts through 37 miles of Central Illinois Light Company territory, therefore this railroad is bound to play an important part in the industrial development and the service of the territory in which our company is so vitally interested and from which will come most of our future customers. Also the TP&W actually owns or controls a number of very important industrial sites, the future use of which means a great deal to us.

Q. If the application of the Santa Fe and the Pennsylvania Railroads in this matter for acquisition of the TP&W Railroad on the basis of the plan proposed by them should not be approved by the Interstate Commerce Commission, what effect would that have on your company's plans for the foreseeable future?

A. In that case the tentative plans that we have made would have to be completely reviewed and re-evaluated by us.

Mr. O'Hern: You may cross-examine.

Exam. Albus: At this time we will take a 10-minute recess.

(Short recess.)

Exam. Albus: The hearing will please come to order. We will continue with the cross-examination of Mr. Edwards.

Cross examination.

By Mr. Wheeler:

Q. Mr. Edwards, I gather what you are primarily interested in is service, is that not correct?

A. Yes, sir.

Q. Were you aware when you filed your petition of the application of the M&StL for control of the TP&W?

[fol. 492] A. I wasn't.

Q. You were not?

A. No.

Q. Have you ever had an opportunity to observe the service that is rendered to its shippers by the M&StL?

A. No, sir.

Q. Mr. Edwards, you said you had made some plans. I gather those were the plans with respect to the new plant.

A. Yes, sir.

Q. When were those plans commenced?

A. Oh, we started about a year or a year and a half ago.

Q. And when did you conclude those plans?

A. We haven't concluded them.

Q. You have not concluded them?

A. No, sir.

Q. Were those plans when they were made dependent upon the continued present ownership of the TP&W?

A. No, sir.

Q. Did they take into consideration, that is to say your deliberations on those plans, the ownership of the TP&W?

A. Well, it was one of the factors in the study.

Q. Well, was it really the ownership of the TP&W or the service rendered by it?

A. The service rendered by it.

Mr. Wheeler: I have no further questions.

[fol. 493] Exam. Albus: Thank you.

Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. The TP&W is presently able to provide all the service you need, isn't it?

A. Yes, sir.

Q. And so far as you know, they have the ability to continue to provide that, haven't they?

A. Yes, sir.

A. That is located directly below the approach, that is, the Cedar Street Bridge, the south side of the Cedar Street Bridge, it is south of the Cedar Street Bridge, I would say south, located directly back of the Caterpillar, fronting along the river.

Q. Now, the city of East Peoria has supported this application of the Pennsylvania and Santa Fe Railroads, have they not?

A. That is correct.

Q. Were you present at the meeting where they decided to support the application?

A. I was.

Q. Have you read this application?

A. Yes, sir.

Q. And have you read the contents of the application of both the Santa Fe and the Pennsylvania Railroad?

A. Yes, sir.

[fol. 514] Q. Have you read the application of the M&StL Railroad?

A. Vaguely. I read a part of it, a very small part of it.

Q. Where did you obtain that copy?

A. From you, from the attorney.

Q. Now, Mr. Phillips, do you favor the purchase of the Toledo, Peoria & Western Railroad by the Santa Fe and Pennsylvania Railroads?

A. Yes, sir, we do.

Q. And are you in favor of the purchase of the TP&W by the M&StL?

A. No, sir.

Q. Would you care to state why?

A. Well, one good reason is, opposing that, they didn't make any deposition as to what disposition that might be made of their present facilities now located in East Peoria. They didn't state, that I read in their application, that those things would be maintained as they are now. That was one of my objections to their application.

Q. Have you any other objections that you could recall, Mr. Phillips?

A. Well, I can't see why, other than favoring the Santa Fe and Pennsylvania. Those connections are more direct than the M&StL.

Q. So there wasn't any need for the approval of this application to make that service continue to be available to you? You didn't intend to imply that, did you?

A. Read the question.

(Question read.)

A. This application to intervene, is that what you are referring to?

Q. No, to acquire the TP&W.

A. I don't get the—

Q. As you said, the same remarks that Mr. Wheeler's questions were addressed to about your plans in the event this application were not approved, doesn't the TP&W have all the financial resources that might be necessary to continue the service that you need in the future?

A. To the best of my knowledge they have.

Q. So that the approval of the plan which you have men-
[fol. 494] tioned isn't necessary to provide you that service?

A. Well, in planning a power plant there is a major investment and the location is determined by several factors, fuel supply, the freight rate, water supply, and the location with reference to the delivery of the electric power to the ultimate customers. They all are factors in the determination of a plant site.

Q. That is right. But you would have no hesitancy in relying on the TP&W as it is today, would you.

A. No.

Q. Then I take it just as you have said, your interest is in the continued availability of that railroad service to you?

A. Yes.

Q. What is your coal service?

A. Fulton County, so-called Fulton County Field.

Q. How far west is that?

A. It lies immediately adjacent to Canton, it is about 40 miles to the west of Peoria.

Q. Your coal originates on the TP&W and is delivered as a local movement?

A. Four hundred thousand tons of it originates on the TP&W, or six hundred thousand.

Q. The Rock Island is a railroad operating through a part of your distribution territory, too, isn't it?

Q. Are you acquainted with the location of the M&StL, in general, that is, and the TP&W Railroad, particularly west of Peoria?

[fol. 515] A. Well, in looking the thing over, I believe they parallel somewhere in the west, but I can't recall just exactly where that parallel is, but they do parallel in some parts of Iowa, I believe, and the West.

Q. Would the fact that they parallel have any influence upon your decision?

A. Well, personally, no, but for the benefit of the general public, yes. That part of it might be used as one line, where they parallel.

Q. Now, Mr. Phillips, you have been advised that the Rock Island and the Nickel Plate has also intervened in this case, have you not?

A. I have heard it, but I have never read any of their application or anything of that kind.

Q. Do you have an opinion as to how you would feel if they were permitted to join as parties, party purchasers?

Mr. Cassell: I object to that. He says he doesn't know anything about their application.

Exam. Albus: This is a direct question as to his opinion as to what he thinks about them being included. The objection is overruled.

You may answer, sir.

A. Well, I think that with those two roads, along with, if the other four roads or two roads are implicated, I'd think [fol. 516] you'd have a confusion there, from our standpoint, as a city, to converse with the officials of those four roads rather than the one. Is that clear to you?

Exam. Albus: Is that opinion expressed as an officer of the City of East Peoria?

The Witness: Of the city welfare, yes, sir.

Exam. Albus: Thank you.

By Mr. Stiers:

Q. You have talked with the other council members, have you?

A. Yes, sir.

A. Yes, sir.

[fol. 495] Q. And you said that you were a public utility committed to the public service?

A. That is right.

Q. Isn't the Rock Island a public utility devoted to the public service like you are?

A. I assume so.

Q. That is a fact, isn't it?

A. I imagine the fact that it is operating it is a fact, yes.

Mr. Cassell: All right, that is all.

Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. You are aware of the heavy interchange of traffic between the Nickel Plate and the TP&W that comes from the western end of the TP&W's line, aren't you?

A. No, sir.

Q. You believe, don't you, that the Nickel Plate is very much interested in maintaining the line of the TP&W?

A. I have no technical knowledge of railroading, but I would assume from a general matter of information that they would be interested in having it operated.

Q. And don't you think that any railroad with a consignee of your importance would be interested in rendering the best possible service for you?

A. I would assume that any railroad handling that tonnage would be vitally interested in rendering us good service.

[fol. 496] Mr. Broker: Thank you, that is all.

Exam. Albus: Are there any further questions on cross-examination?

(No response.)

Exam. Albus: Any redirect examination.

Mr. O'Hern: No redirect.

Mr. Bagge: I have a question on cross.

Mr. Cassell: On cross?

Mr. Bagge: Yes, this gentleman is an intervenor. I think I have a right to cross-examine the intervenor.

Mr. Cassell: In support of the application?

Mr. Bagge: Yes.

Exam. Albus: Go ahead and ask the questions.

Cross examination.

By Mr. Bagge:

Q. The second and related reason, I take it, for which you are supporting the application of the applicants was, as you stated, the fact that as a public utility supplying electricity to this area that you are vitally interested in industrial development, is that not correct?

Mr. Wheeler: I object.

Exam. Albus: I sustain the objection.

You may ask him what his reasons for supporting the applications are but please don't tell him.

By Mr. Bagge:

Q. In addition to the reason which you stated to Mr. Cassell, are there any other reasons for which you take [fol. 497] the position of the applicants in this proceeding?

A. Our main reason for supporting the applicant is that we think that it will permit us the service that we have been getting in the last few years, and that to us is very important.

Q. Are you also interested in industrial development?

Mr. Wheeler: Mr. Examiner, I object.

Mr. Cassell: I object.

Mr. Wheeler: He is putting words in the witness's mouth.

Exam. Albus: Sustained.

By Mr. Bagge:

Q. Do you have any other related reasons?

Mr. Wheeler: I object, Mr. Examiner, he has asked that question and gotten an answer.

Exam. Albus: If he has any more reasons I will listen to them.

Do you have any further reasons, Mr. Edwards, why you support this application by the Pennsylvania and Santa Fe?

The Witness: I think they have been expressed, we are interested in the community as a public utility and we are interested in the industrial development of the area, and we are interested in a coal supply on a railroad that gives us good service and who is so located as to give us good rates.

Exam. Albus: Very well.

Anything further?

Mr. Bagge: Yes.

[fol. 498] By Mr. Bagge:

Q. What effect, in your opinion, would the inclusion of the other railroads in ownership of the TP&W have on the potential for industrial development in this area?

Mr. Cassell: I object to that. He hasn't shown any qualification.

Exam. Albus: He asked for his opinion, though. If he has an opinion, I will hear it.

Q. Would you repeat the question?

(Question read.)

A. Well, it seems to me that the industrial development will be furthered by these two major railroads rather than half a dozen railroads who are hauling from several different directions.

Exam. Albus: What is the reason for that answer, Mr. Edwards? Do you have any particular reason why it would be better to be under the control of two than six railroads?

The Witness: Yes, these particular two, for this reason, that the city of Peoria and our area is located on a major north and south haul on a waterway, and we are asking for ownership of two major railroads with east and west hauls, it seems to me that that is a point where it crosses to be developed.

the cooperation that you are now getting from the TP&W management, is that what you wish to—

A. That is what I—I have got to have those things down in black and white. Promises don't mean anything.

Q. You have to have them down in black and white?

A. I say, if the promises doesn't mean anything to us we have had cooperation and we know how we get along with those people over there.

Q. Well, now, Mr. Phillips, do you understand that the Pennsylvania and the Santa Fe have an application here to buy control of the TP&W?

A. Yes, sir.

Q. What leads you to believe that they are going to con- [fol. 520] tinue the present management of the TP&W in office?

A. They have said so in their application. They have assured us that they would.

Q. Isn't that just a promise?

A. Well, it is in writing. I'd call that rather a binding agreement.

A. That is right.

Q. Supposing there is testimony given under oath here to the Commission, would you regard that as a binding agreement?

A. Well, I'd have to, if it was under oath.

Q. Now, Mr. Phillips, do you have any reason to believe that the M&StL would not completely cooperate with you in the operation of the TP&W?

A. Well, I have no reason to believe that they wouldn't, but since you have already tried out the present management and you know what they will do, that is like trading a horse for one that will pull for one that won't. You know what this fellow will do.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Phillips, I think the TP&W management should be very gratified with what you have said this afternoon.

Exam. Albus: Thank you very much.
Anything further.
Mr. O'Hern: Redirect, if I may, just one.
[fol. 499] Exam. Albus: Yes.

Redirect examination.

By Mr. O'Hern:

Q. Mr. Cassell asked you whether your primary rea
on was the question of service. On your direct testimony you referred to the question of local management. Did you intend to include in the term in referring to the importance of the service the question of local management?

Mr. Wheeler: Mr. Examiner, I object again. This is very leading testimony.
Exam. Albus: Sustained.
Mr. O'Hern: I have no other questions.
Mr. Cassell: Mr. Examiner, if we may.
Exam. Albus: You may.

Recross examination.

By Mr. Cassell:

Q. Why wouldn't one of the other railroads which have asked for inclusion promote that interest in the east and west traffic just as much as the Santa Fe and Pennsylvania
A. Well, I assume that any railroad that has an east and west haul would be interested in the location at Peoria with a terminal on a waterway.

Mr. Cassell: That is all.

Recross examination.

By Mr. Broker:

Q. Don't you think that a railroad that has a terminus in the city of Peoria would be interested in industrial de
[fol. 500] velopment here?
A. I certainly think so.

and if the Rock Island gave you the same assurance as the Santa Fe and the Pennsylvania have as to the continuance [fol. 521] of that management, continuance of Mr. Coulter in office, and the maintenance of the present corporation and structure all just as it is today, just the same way as the Pennsylvania and Santa Fe have said, that is what you want, isn't it?"

A. Did you say, as a promise?

Q. Yes, if we gave you the same assurance as they have.

A. I'd want it in writing.

Q. I said if we would give you the same assurance.

Exam. Albus: That would be in writing.

If you had it in writing, would you be satisfied, Mr. Phillips?

The Witness: Well, I don't know, because of our co-operation that we have had over there, I don't believe we could better ourselves.

Do you understand me?

By Mr. Cassell:

Q. You want that same management retained, isn't that right?

A. That is right, that is correct.

Q. If we gave you the same assurance that the Santa Fe and Pennsylvania have as to the continuance of that management, that is one thing you want, isn't it?

A. That is one thing that we do strive for and that is what we want.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

fol. 522 Cross examination.

By Mr. Broker:

Q. Suppose the Nickel Plate gave you the same assurance.

Exam. Albus: In writing.

A. This reminds me of this "I will, too" stuff.

Q. Why, then, wouldn't the Nickel Plate be equally interested in industrial development in this area?

A. Well, I think that you are talking about a technical question now. I am not in a position to say what the Nickel Plate's interests would be in industrial development in this area.

Q. Well, you indicated that the TP&W would be impeded in some way if it had more than two owners. Presumably you meant that the additional owners would prevent industrial development. Was that the owner of your testimony?

A. I didn't intend to give that impression. I do think, however, that the efficiency in the operation of the railroad would be handicapped by more than two owners.

Q. The P&PU is owned by many railroads, isn't it?

A. That is correct.

Q. Including the Pennsylvania, the Nickel Plate, and others?

A. That is correct.

Q. And that is considered a very efficient railroad, isn't it?

A. To the best of my knowledge it is.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

(No response.)

Exam. Albus: You are excused, Mr. Edwards.

(Witness excused.)

[fol. 501] Exam. Albus: Next witness, please.

Mr. Bordes: United Coal Electric Company, Mr. Examiner.

JOHN M. MORRIS was sworn and testified as follows:

Direct examination.

By Mr. Bordes:

Q. Will you state your name and address, please?

A. John M. Morris, 60 North Park Road, La Grange, Illinois.

Q. What is your occupation, Mr. Morris?

A. I am vice-president and director of the United Elec
tric Coal Companies.

Q. And where is your business located?

A. Well, the main office is 307 North Michigan Avenue
Chicago. We have two mines in Fulton County, Illinois
one in Perry County, Illinois, and one in western Kentucky

Q. Will you describe the nature of the business, please

A. Well, we mine and produce and prepare coal for de
livery to a variety of consumers, principally the publi
utilities and large industries and railroads up until two o
three years ago.

Q. What has been your experience in the coal industry?

A. Well, I have been with this present company, th
United Electric Coal Company, since 1928, about 27 years
Prior to that time I was with the Saline County Coal Com
pany in southern Illinois as a salesman on the road. All o
my work has been in sales entirely.

Q. How large an investment does your business repre
sent?

[fol. 502] A. In the neighborhood of eighteen to twent
million dollars.

Q. Will you tell us how much coal your company move
by rail, approximately?

A. You mean a hundred per cent by rail?

Q. Yes.

A. By rail about two and a half million tons a year.

Q. A year?

A. Yes, sir.

Q. Now, you are dependent, are you not, to a large exten
upon the rail service for distribution of your coal?

A. Yes, about 70 per cent of our total production move
that way.

Q. Would you describe the extent to which your busines
uses the T. P. & W. as an originating or terminating car
rier?

A. Well, we operate a mine in Fulton County about seve
miles west of Canton, which is located on the T. P. & W
originates about 350,000 tons a year that goes to the Cen
tral Illinois Light Company. That was the tonnage that h
mentioned that was moving into his plant via the T. P. & W

Q. You are speaking of Mr. Edwards now?

A. Of the Central Illinois Light.

Also from that mine we ship probably twenty-five or thirty thousand tons west into Keokuk.

Q. About how many cars would you say that you ship on the T. P. & W.?

A. Well, say 400,000 tons would be roughly, depending [fol. 503] upon the size of the car, somewhere in the neighborhood of seven thousand, seventy-five hundred, whether they were seventy ton cars or fifty ton.

Q. What is your position, Mr. Morris, with reference to the application of the Santa Fe and the Pennsylvania Railroad Company to acquire control of the T. P. & W.?

A. Well, our position coincides, has to coincide, with the position of the biggest customer we have in this area, the Central Illinois Light Company will buy this coal from us on a long-term contract, and you have heard their testimony on their wishes and desires in the matter, and it just seems to me that we as the seller to them are naturally tied to them in that regard. I do feel beyond that that based on what I have heard and I know that it just seems logical the Santa Fe and the Pennsylvania would be the best owners for that particular railroad because of their past performance with them and what they have announced they plan to do for the future. Furthermore, we are very interested in this possibly additional plant that the Central Illinois Light Company proposes to build. We are interested in the present management and seeking that—in the hope that the railroad will continue as a separate unit, be operated in that manner, and that the management that there is there now will continue to be located close to us in Peoria. I think those are practically the same reasoning that our good customer has stated here themselves.

[fol. 504] Q. Do you feel that the acquisition of this T. P. & W. road by the Santa Fe and the Pennsylvania Railroad would insure an adequate car supply for your needs?

Mr. Wheeler: Mr. Examiner, I think before this witness is asked anything about that he ought to be qualified as to whether or not he knows anything about the car supply. He has testified that his experience has been solely limited to the sale of coal.

and we will prove this by direct testimony, that the TP&W and the Nickel Plate are cooperating in the development of that property.

The Witness: Well, that question I'd have to answer that I don't know.

Exam. Albus: That is all right. It was just a statement, Mr. Phillips.

[fol. 525] The Witness: Yes, sir. Thank you.

Exam. Albus: Is there any further questioning of this witness, Mr. Phillips?

(No response.)

Exam. Albus: You are excused, sir. Thank you very much, indeed.

(Witness excused.)

[fol. 526] JOHN W. KEAYES was sworn and testified as follows:

Direct examination.

By Mr. Stiers:

Q. Will you state your name, please?

A. John W. Keayes.

Q. And where do you reside, Mr. Keayes?

A. East Peoria.

Q. You are an official of the City of East Peoria?

A. I am.

Q. And you are the mayor of the City of East Peoria, are you not?

A. That is correct.

Q. Mr. Keayes, you were present at a council meeting when a resolution was passed, were you not, pertaining to the entrance of the City of East Peoria into this case?

A. I was.

Q. Do you have that resolution with you?

A. I have a copy of it.

Q. Is that a true and correct copy of the original one?

A. It is.

Exam. Albus: Do you know anything about the car supply, Mr. Morris?

The Witness: I must know about it, because before I go and sell coal I have to go and find out whether I am going to have any cars to load it in.

Exam. Albus: You may answer.

A. What was the question again, please?

(Question read.)

A. Yes, I think it would, because they are two big railroads. They have a lot of cars, and I believe Mr. Gurley testified that he would place industries and coal mines on the T. P. & W. on a parity with industries and other shippers.

Mr. Wheeler: I move that this witness's testimony be stricken. Mr. Gurley testified no such thing.

Exam. Albus: The last part may be stricken about what Mr. Gurley testified.

The Witness: Maybe Mr. Gurley didn't testify to it, but I heard it from some source that we would be placed on a parity.

[fol. 505] Mr. Wheeler: I object to this witness testifying to what he heard.

Exam. Albus: I will sustain that objection.

A. Well, I will answer it in a different way, then.

Exam. Albus: If you will, please.

A. It just seems to me that those two big railroads acquiring control of the T. P. & W. Railroad would naturally provide them with cars for the shippers on that line, and that is an important thing to us, of course, to be assured that we will get cars. Now, we have been getting plenty of cars from the T. P. & W. for the business we have on their line up to now, and I think we should be able to continue to get plenty.

Mr. Wheeler: May I have that answer read, please?

(The answer was read as follows:)

Q. Would you read it into the record, please?

Exam. Albus: How long is it?
Mr. Stiers: Very short.
Exam. Albus: All right.

A. Copy of resolution taken from the city minute record [fol. 527] page no. 161. Resolution no. 22.

Offered by Commissioner John Phillips.

"Whereas, an application has been filed with the Interstate Commerce Commission for approval of joint ownership of the T. P. & W. Railroad by acquisition of the corporate stock of said railroad by the Santa Fe and Pennsylvania railroads, which assures continued operation of the T. P. & W. Railroad as a separate entity under its present management with headquarters in the City of East Peoria; and

"Whereas the acquisition and control of the said T. P. & W. desired is to the best interests of the people of this community and the industrial expansion will be best served by continuing the T. P. & W. as a strong and independent railroad.

"Now therefore be it resolved by the city council of the City of East Peoria, Illinois, that the anticipated acquisition of the joint ownership of the T. P. & W. Railroad by the Santa Fe and Pennsylvania railroads is deemed in the best interests of the City of East Peoria and the city attorney Fred V. Stiers is here and directed to intervene in the proceedings before the Interstate Commerce Commission requesting that a hearing be held in Peoria and urgently recommend the approval of the application."

This is just an affidavit.

By Mr. Stiers:

Q. Mayor, when was that resolution adopted?
A. July 26, 1956, at their regular meeting.

[fol. 528] Exam. Albus: 1955, wasn't it?
The Witness: 1955, that is right.

"A. Now, we have been getting plenty of cars from the T. P. & W. for the business we have on their line up to now, and I think we should be able to continue to get plenty."

Exam. Albus: Does that complete the direct?
Mr. Bordes: That is all.

Cross examination.

By Mr. Wheeler:

Q. Would you think, if the M. & S. L. acquired control of the T. P. & W. that the coal car supply at your mine will be any less than it is now?

Mr. Bordes: I object to that, Mr. Examiner, he didn't make that statement.
[fol. 506] Exam. Albus: Objection overruled.

A. Well, I have no reason to believe they wouldn't give us cars, I don't know anything about it.

By Mr. Wheeler:

Q. Do you know how many coal cars the T. P. & W. has at the present time?
A. No, I do not.
Q. Do you know how many coal cars, what the coal car ownership of the Santa Fe is?
A. No, I do not.
Q. Do you know what the coal car ownership of the Pennsylvania is?
A. I know it is rather large, but I don't know exactly, no.
Q. Do you know whether or not they have had severe shortages of coal cars in the Illinois coal fields?
A. I know everybody has had shortages in Illinois, Pennsylvania, Ohio.
Q. And including the Pennsylvania?
A. Including the Pennsylvania, yes.
Q. Aren't you aware that the M. & St. L. has kept its Fulton County mines supplied with coal cars?
A. They are competitors of ours, I know that, they have.

Q. Mr. Morris, you know no reason to believe that if the M. & St. L. acquired the T. P. & W. it would not render an adequate service to your mines, do you?

A. No, I have no knowledge one way or another.

[fol. 507] Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Morris, wouldn't the inclusion of the Rock Island even make more cars available to you?

A. Well, the Rock Island has mines on their line, too, and it is possible that a division of those cars between those mines and mines on the T. P. & W. might stretch the cars out more.

Q. How about the Pennsylvania, hasn't it got more mines than anybody else in the country?

A. It has, that is true.

Q. Might it not syphon off cars from you to help those mines?

A. All I can say, up to now we have had plenty of cars, and I feel that the ownership of the two roads would naturally see to it that we had plenty of cars.

Q. Wouldn't the inclusion of another road with its cars even make more cars available to you?

A. That might be true. That might be true.

Mr. Cassell: That is all.

Cross examination.

By Mr. Broker:

Q. Whose cars do you use now?

A. The cars are supplied by the T. P. & W. Railroad that are placed in there. What ownership they are, I don't know. Some of them are theirs, I presume, some are probably secured from other railroads.

[fol. 508] Q. Did you hear Mr. Carpi's testimony this morning about the shortage of coal cars on the Pennsylvania?

A. Yes, I did.

Q. Do you know that the Nickel Plate has an adequate car supply of coal cars?

A. I don't have any knowledge of the Nickel Plate situation.

Q. You indicated that part of your opinion was based on past performance of the owning lines, is that right?

A. Do you mean the—

Q. (Interrupting) Of the prospective—of the applicants, let's put it that way.

A. Yes, they have given a lot of traffic, so I understand, to the T. P. & W. Railroad that's been beneficial to them.

Q. Do you know anything about the record of the T. P. & W. during previous Pennsylvania ownership?

A. What period do you mean by that?

Q. 1893 to 1926.

A. No, that's too far back for me to know anything about.

Q. You don't remember that?

A. No.

Mr. Broker: No other questions.

Exam. Albus: Is there any further cross-examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Bordes: No.

[fol. 509] Exam. Albus: You are excused, Mr. Morris. Thank you, sir.

(Witness excused.)

[fol. 510] Exam. Albus: Next witness, please.

JOHN PHILLIPS was sworn and testified as follows:

Direct examination.

By Mr. Stiers:

Q. Will you state your full name, please.

A. John Phillips.

Q. And where do you reside, Mr. Phillips?
A. 150 Urbandale, East Peoria.
Q. You are an official of the City of East Peoria?
A. Correct.
Q. And in what capacity, Mr. Phillips?
A. Commissioner of Public Health and Safety.
Q. You are one of how many commissioners?
A. Four, and five with the mayor.
Q. And the City of East Peoria is organized under the commission form of government law in the State of Illinois, is that right?
A. Correct.
Q. How long have you been a commissioner in East Peoria?
A. Well, for the past almost five years at this time and four years previous.
Q. And where is the City of East Peoria located?
A. In Tazewell County directly east from Peoria, Illinois, across the Illinois River.
Q. The Illinois River?
A. Yes.

[fol. 511] A. Well, we are a little over twelve thousand.
Q. You are acquainted with the principal industries of the city, are you not?
A. That is right.
Q. Would you state them briefly.
A. Caterpillar Tractor Company, Herschel Manufacturing Company, Altorfer, TP&W, and P&PU.
Q. Does the TP&W Railroad Company maintain its principal offices and yard and shops in the city of East Peoria?
A. They do.
Q. And they have for quite some time?
A. That is correct.
Q. Do you, that is, the City of East Peoria, and the railroad have interests that may coincide other than being a resident or doing business there?
A. Well, yes, they have quite a lot of ground there that's available for industry, or those things, and we are interested, of course, in bringing industry there, and with the cooperation of the TP&W we are planning on getting industry there.
Q. Mr. Phillips, City of East Peoria and the TP&W Rail

road and its president, Mr. Coulter, have worked quite close together for the past several years, is that correct?

A. That is correct.

Q. And that is as to the development and growth of the City of East Peoria?

[fol. 512] A. I would like to add one thing, if I may.

Q. Go ahead.

A. Always if there is prospects of an industry, the City Council has been assured that we would always be consulted in regard to the type of industry that would be placed in and around East Peoria. Thank you.

Q. That pertains to the desirability of the type of industry that might seek to locate?

A. That is correct.

Q. Are you acquainted with the number of acres of industrial ground that are available for industrial development in the city of East Peoria and owned by the TP&W Railroad?

A. Well, I would say somewhere around 360 acres or something like that.

Q. And do you know their locations approximately?

A. Yes, directly along the new bridge highway is quite a bit of ground and at their office out on the Washington Road there is 80 acres, and somewhere around about that many acres directly below the Cedar Street Bridge.

Q. Now, the one that you described as the site of the new bridge, you were referring to that territory almost opposite the metropolitan district in Peoria?

A. That is correct.

Q. And that borders on the river, with river frontage, is that correct?

[fol. 513] A. Correct.

Q. And the portion down near the Cedar—

Exam. Albus (interrupting): Let the witness testify, will you, please.

Mr. Stiers: Yes.

By Mr. Stiers:

Q. And the other portion of the railroad property that you described as by the Cedar Street Bridge, where is that?

Q. Do you know what their opinion is?

A. From what I can find out, their opinion will concur with mine along the same things as to the benefits that we would derive from the thing, from this particular deal through the Santa Fe and the Pennsylvania gaining control.

Exam. Albus: Did the city council take any official action in this matter?

The Witness: Yes, sir.

Exam. Albus: What did they do?

The Witness: We passed a resolution recommending that the Santa Fe and the Pennsylvania petition be granted.

Exam. Albus: How many men are on that council?

The Witness: Four commissioners and the mayor.

Exam. Albus: What was the vote?

The Witness: Unanimous.

[fol. 517] Exam. Albus: Thank you.

I am sorry to cut in on you.

Mr. Stiers: That is quite all right.

Exam. Albus: Proceed.

Have you finished?

Mr. Stiers: Yes, sir.

Exam. Albus: Cross-examine, Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. Mr. Phillips, if the M&StL plans to not only adopt, to continue the yards of the TP&W in East Peoria, but to expand those yards materially so as to make them their yards as well, would that change your view with respect to the acquisition of the TP&W by the M&StL?

A. Well, that sounds a little off, because in their part that I read, about the only thing that I can get out of it was they was going to economize the thing, which might mean economizing in East Peoria, and the TP&W, we want to keep that there as a taxpayer.

Q. Well, your taxes are based, in part, are they not, on the amount of land that is employed in those yards?

A. That is right.

Q. So you would have an interest at least taxwise in having those yards expanded and increased in size, would you not?

A. Mister, if you will pardon me, I want to say that our interest is that we want this held as an individual railroad, [fol. 518] as it is. Both the Santa Fe and the Pennsylvania assured us of that fact.

Q. Now, I want to get back, Mr. Phillips, to my question.

A. Yes.

Q. If the M&StL. were to increase, if it acquired control of the TP&W, and increase, if it acquired control of the TP&W, and increase the size of the yards of the TP&W in East Peoria, would that not benefit East Peoria?

A. Yes, it would, sure.

Q. And since it would benefit East Peoria, would you not favor that action?

A. Well, we haven't had any assurance that they would do that. It is a matter of what they said in their application. They didn't say that they would do these things, that I read.

Q. Now, Mr. Phillips, supposing the testimony in this hearing is to the effect that the M&StL. if they acquire control of the TP&W, will abandon their present yard and transfer all of their operations to the TP&W's East Peoria yard, would not that be in the best interest and beneficial to East Peoria?

A. If that was done, but we have no assurance that it will be done.

Q. If that were done, would you reconsider your position with respect to this application?

A. I don't think so, for the simple reason that the present management in East Peoria cooperate and work together, [fol. 519] and those are two things that are vitally interested in East Peoria, is the maintenance of the present management and that particular area for development and we have been assured that those things would be taken up with the council before any industrial plant of any kind was set in there.

Q. So you would rather have the present management maintained in control of the TP&W than have many other benefits flow to the city of East Peoria, is that correct?

A. I don't think under the present management that any other road could do any better than we have had done in the past year with the management of the TP&W.

Q. You can't conceive of any benefits that would offset

Exam. Albus: If they gave you the same assurance in writing.

The Witness: I'd have to say yes.

By Mr. Broker:

Q. That industrial property in East Peoria, some of that lies alongside the Nickel Plate, doesn't it?

A. I believe so.

Q. So the Nickel Plate has to cooperate with the TP&W in order to develop that fully, isn't that so?

A. Well, I wouldn't think so, since the TP&W owns the ground.

Q. How can they get across the tracks?

A. Well, that is a matter for, to be argued out.

Exam. Albus: If you don't know, just say so.

The Witness: Well, I don't.

By Mr. Broker:

Q. Actually the fact is, though, the TP&W owns some industrial property in East Peoria that lies on the other side of the Nickel Plate tracks, isn't that so?

A. That is right.

Q. Now, the interchange between the TP&W and the Nickel Plate takes place in East Peoria, doesn't it?

A. Correct.

[fol. 523] Q. Have you heard statements by me or questions that would indicate that we are very anxious to maintain that interchange?

A. Well, through your questions and testimony, to that I haven't paid a lot of attention. I imagine you would be, though, interested in maintaining that mutual agreement of exchange through the two railroads.

Q. As a matter of fact, isn't the fact that we are anxious to maintain that interchange at East Peoria the thing that protects your city the best as far as the TP&W is concerned?

A. That I wouldn't know, but I imagine you do.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions on cross examination?

(No response.)

Exam. Albus: Any redirect?
Mr. Stiers: Yes.

Redirect examination.

By Mr. Stiers:

Q. Mr. Phillips, regarding the multiplicity of ownership and the industrial development, have you an opinion as to what effect that would have on the city?

A. Well, in having ownership of the particular ground that is very, very vital for industrial purposes, we feel like that through our cooperation with the present management of the TP&W that we have always had cooperation, and to the extent that we—there will never be anything go in there other than what is satisfactory to the city council, [fol. 524] and that means a lot to us.

Q. Mr. Phillips, what would the effect of four or five owners have to possible development of industrial sites?

A. Well, it might have a great deal, for the simple reason that should the property of the TP&W or the majority of the stock be transferred and cut up into three or four different railroads in there, I feel like that the interest wouldn't be as great to the people interested as it would be under the management of the Santa Fe and Pennsylvania with the TP&W maintained as it is at the present time. Is that clear?

Mr. Stiers: Yes, sir; that will be all.

Recross examination.

By Mr. Broker:

Q. Don't you think as a part owner of the TP&W we would be all the more anxious to develop that property in East Peoria?

A. Well, you might. That I wouldn't say yes or no to. You might be.

Mr. Broker: I don't have any questions, but I don't know whether Mr. Phillips will be back, I just wanted to state,

A. That's right.

Q. Now, you say that by the time your Texas, Oklahoma, and southwestern Kansas movement is over ours is just starting and the cars can be unloaded and be sent on to us. Now, I take it that that was a reference to the Santa Fe cars, is that correct?

A. That is right, any southwestern railroad.

Q. Now, what month are you talking about then when these cars can be sent forward to you?

A. Well, normally our season starts any time after the 4th of July and runs up to about the 15th of August.

A. That's right, depending on our season.

[fol. 548] Q. Now, Mr. Morris, are you familiar with the fact that daily freight car shortage on the Santa Fe was higher after the 26th week of 1955 that before that and that it grew progressively higher, going through the 45th week of 1955?

A. No.

Q. Mr. Morris, don't you think it would have been advisable for you to find out definitely with respect to this information with respect to the freight car shortages on the Santa Fe before appearing here and saying that they would have cars to move north for your use when your movement or your needs for cars began?

A. No, I don't. We ship a lot of other grain besides just small grain. Small grain in our locality is a small part of our business.

Q. It is a small part, now?

A. That is right.

Q. All right, what is the big part?

A. Soy beans.

Q. When do you have the big movement in soy beans?

A. Any time from the first of September to the middle of November.

Q. Do you know what the shortage of cars is due to on the Santa Fe during that season?

A. No, sir.

Q. Do you have any reason to believe that you would get cars from the Santa Fe during that time?

[fol. 549] A. The Pennsylvania and the Santa Fe have

told us that they will pool their cars with the TP&W for available cars during our grain season.

Q. Did they tell you they would pool their car shortages or pool their cars?

A. Their car supply.

Q. Now, how can they pool cars that they don't have when they are already short on their own lines, Mr. Morris?

A. Well, they can't be any shorter than the TP&W is now, can they?

Q. Did you try to ascertain that fact?

A. I beg pardon?

Q. Did you try to ascertain that fact as to whether or not the shortages were greater on the TP&W than on the Atchison, Topeka and the Pennsylvania?

A. The Pennsylvania can furnish a few cars during that time, can't they?

Q. Mr. Morris, you are on the witness stand here and not I. I want to ask you that question.

Exam. Albus: Just answer the question, Mr. Morris, please.

By Mr. Wheeler:

Q. Did you attempt to ascertain whether or not the Pennsylvania could carry out the promise they made to you?

A. Sure.

[fol. 550] Q. What did you find out?

A. If they get it, they will throw their supply of cars in the deal, too, for us.

Q. But, Mr. Morris, if they are already short of cars now, during the period when you require them, how can they give them to you? Did you attempt to ascertain that fact?

A. Well, we couldn't be any worse off than what we are now, if they haven't any cars either.

Q. Mr. Morris, are you aware that the M&StL is a per diem credit railroad?

A. May I have that question so I can understand it.

Mr. Wheeler: Would you read the question to him.

By Mr. Stiers:

Q. And you were present at that meeting?
A. I was.
Q. What was the vote on that, Mr. Mayor?
A. Unanimous.
Q. You have heard the testimony given by Commissioner John Phillips, who just testified ahead of you, did you not?
A. I did.
Q. And is that also your opinion?
A. It is.
Q. For the sake of brevity I won't enlarge on that unless you have something you'd like to add, Mr. Mayor.

Exam. Albus: Thank you.

A. No, we go along the same lines, the whole council.

Mr. Stiers: Thank you.
Exam. Albus: Cross-examination?
Mr. Wheeler: If he agrees with Mr. Phillips, I have no cross-examination.
Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Keayes, the meeting you had on July 28—
A. (Interrupting) 26.
Q. July 26, that was before you had heard anything about [fol. 529] the Rock Island's interest in this case, wasn't it?
A. I didn't hear anything about it.
Q. And it wasn't discussed at your meeting, was it?
A. No.

Mr. Cassell: That is all.

Cross examination.

By Mr. Broker:

Q. Did you know about the Nickel Plate's intervention?
A. No.
Q. If I asked you on cross-examination the same ques-

tions as Mr. Phillips was asked, you would give approximately the same answers?

A. Yes, about the same answers.

Mr. Broker: Thank you.

Exam. Albus: Is there anything further from the mayor?

Mr. Stiers: I would like to ask him one on redirect, Mr. Examiner.

Redirect examination.

By Mr. Stiers:

Q. You learned that the Rock Island and Nickel Plate had filed petitions afterwards, is that right?

A. That is right.

Q. Is your position the same knowing those petitions have been filed?

A. I haven't changed any.

Mr. Stiers: That is all.

[fol. 530] Recross examination.

By Mr. Cassell:

Q. Do you know what the Rock Island plans are?

A. No, I don't, just hearsay.

Mr. Cassell: That is all.

Exam. Albus: You are excused. Thank you.

(Witness excused.)

JOHN L. MAYBERRY was sworn and testified as follows:

Direct examination.

By Mr. Stiers:

Q. Will you state your name, please?

A. John L. Mayberry.

Q. And where do you reside, Mr. Mayberry?

A. I live at 13 East Edmond Street, East Peoria.

Q. You are also one of the commissioners of the City of East Peoria?

A. I am.

Q. You were present at the meeting of July 26, 1955, when the resolution offered by the mayor was passed, were you not?

A. I was.

Exam. Albus: I understood the resolution to be offered by Commissioner Phillips?

The Witness: That is right, but we were all there.

Mr. Stiers: They were all present.

Exam. Albus: All right.

By Mr. Stiers:

Q. And did you vote in favor of that?

[fol. 531] A. I did.

Q. If you were to testify, Commissioner, would your testimony be along the same lines and same beliefs as Commissioner Phillips has testified to?

A. It will be.

Mr. Stiers: I believe that is all.

Cross examination.

By Mr. Wheeler:

Q. That would apply to both direct and cross-examination?

A. That is right.

Mr. Wheeler: That is all.

Cross examination.

By Mr. Cassell:

Q. And the same as to my questions, and I would like also the question I put to Mr. Keayes, your response would be the same?

A. That is right.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker?

Mr. Broker: No questions.

Exam. Albus: Thank you very much. You are excused, Mr. Commissioner.

(Witness excused.)

Mr. Stiers: That is all the City of Peoria has.

Exam. Albus: Thank you, Mr. Stiers.

[fols. 532-533] JOHN E. MORRIS was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Will you state your name, please?

A. John E. Morris.

Q. Where do you reside, Mr. Morris?

A. Bushnell, Illinois.

Q. What is your business or occupation?

A. I am president and general manager of Good Hope Elevators, at Good Hope, Illinois.

Q. Would you describe where this elevator is located?

A. Well, we have three elevators: Two located at Good Hope and one at Scottsburg Sidings. The Good Hope Elevators are about 70 miles west of here on the TP&W Railroad.

Q. You are served by the TP&W Railroad, is that correct?

A. Yes, sir.

Q. How large an investment does your business represent, Mr. Morris?

A. About $100,000.

Q. Would you describe approximately what percentage of your outbound traffic moves by rail as compared with truck?

A. Well, that all depends a whole lot the condition from outlying territories. If there is a drought area in a short distance from us they will truck it out. Normally, under normal conditions it all goes out by rail. I think last year [fol. 534] about 90 per cent went out by rail and 10 per cent by truck, and that all went into drought areas in southern Illinois and southern Missouri, short hauls.

Q. Would you describe briefly what might be described as your area of rail market?

A. Places we ship?

Q. That is correct, sir.

A. Chicago, Peoria, St. Louis, Decatur, Bloomington, small points, but those are our main shipping points, of course, we get coal in from southern Illinois, all points in southern Illinois.

Q. You are dependent on rail service, is that correct?

A. That's my bread and butter.

Q. Are you also particularly dependent upon TP&W rail service?

A. That's the only one I've got there.

Q. How long a period of time have you been making this use which you describe of the rail service afforded by the TP&W Railroad?

A. Well, I have owned and controlled the Good Hope Elevator since 1951 and prior to that, I think the first elevator was built in 1900.

Q. Approximately how many carloads of grain and other products do you ship each year?

A. Approximately 300 cars outwardly.

Exam. Albus: How about coal inbound?

The Witness: Fifteen to twenty cars.

[fol. 535] By Mr. Bagge:

Q. You stated, did you not, that you are served at Good Hope exclusively by the TP&W Railroad?

A. That is right, Good Hope and Scottsburg, both.

Q. Will you tell us what your experience has been in the past, served as you are by the TP&W Railroad, with respect to car supply?

A. I have been short.

Q. For how long a period of time have you as a shipper experienced this shortage?

A. During all our flush seasons we are always short, which about all the local railroads in this locality all have a shortage of boxcars during our peak seasons. That is one thing, if the Santa Fe or the Pennsylvania would get it, the Santa Fe, their peak season of grain movement is over by the time ours starts.

Q. Would you tell us a little more about that.

A. Well, we all know that the grain season in the southwest starts in Texas any time after the 25th day of May and works gradually this way. Well, by the time your Texas, Oklahoma, and southwestern Kansas movement is over ours is just starting, and the cars can be unloaded and be sent on to us. Of course they'll need some cars, too.

Q. By "ours" do you mean this marketing area which you serve or the area which you serve as a shipping point, is that correct?

[fol. 536] A. That is right. Either me or any other elevators that is on the TP&W line.

Q. Is it your thought, therefore, that the Santa Fe would make such cars available to the TP&W, is that correct.

A. Yes, sir.

Q. Now, would you state what effect the inclusion of several other railroads in the ownership of the TP&W may have on your need for additional car supply?

A. Well, if five or six railroads had a hand in the TP&W railroad I can't see why any of them would give the TP&W any assistance.

Q. Why is that?

A. They probably want to fill their own needs first, and they wouldn't have enough invested to justify them to give us any additional cars.

Q. Do you feel that the Santa Fe and Pennsylvania railroads by having a 50 per cent investment each in the capital stock of the Toledo, Peoria and Western would be a sufficient investment to justify such action?

Mr. Broker: Excuse me, what action?

Mr. Bagge: The action to which the witness has just referred.

Mr. Broker: I'd like it defined, please.

By Mr. Bagge:

Q. In justifying making cars available to shippers located on the T.P.&W.

[fol. 537] Exam. Albus: Do you understand the question?

Mr. Broker: I object. This witness can't testify to what motivates railroads to furnish or not furnish cars.

Exam. Albus: He might have an opinion about it.

By Mr. Bagge:

Q. What is your opinion as a business man and as a shipper having used railroad service, what is your opinion?

A. Well, I know good and well if I owned 50 per cent of something I would at least give them a break and give them some cars, and if I owned 20 per cent of it I'd just let them go.

Q. All right, sir, what effect, in your opinion, would the granting of ownership of the Toledo, Peoria and Western Railroad, granting that ownership to the M&StL have, on the availability of an additional, or additional cars to you?

Mr. Wheeler: Now, just a moment, Mr. Examiner. This witness hasn't been qualified, so far as I know, with respect—

Exam. Albus: He is getting a little beyond his qualifications.

Mr. Bagge: I withdraw that question.

By Mr. Bagge:

Q. Now directing your attention to the question of service which you have described, do you have any particular problem in connection with the physical location of your property, and in connection with your operation, which necessitates frequent switch moves and frequent pickups and deliveries to your siding?

A. We are unfortunate only to have a three-car siding [fol. 538] with two elevators. Normally during our peak season we have had to be worked three times in twenty-four hours. If we didn't have a lot of trains going by our door we wouldn't get that service. I know that the TP&W railroad has stopped a number of their fast trains and gave us that service so we could keep our doors open. We haven't too big a storage and we can fill up pretty quick.

Q. And what would be the effect of that on your operations, Mr. Morris?

A. Well, you just close your doors until you get more room.

Q. Sir, in your opinion what would be the effect of the granting of this application as regards your needs for frequent service and for switch movements?

A. Well, if the TP&W and the Pennsylvania is granted the rights to take over the ownership we know we will still have those trains running by our door, and they say that we are going to have the same management, so there is no reason why they should change their ways of doing business.

Q. In your opinion do you anticipate an increase in the volume of traffic moving that way?

A. By rail?

Q. Yes, sir.

A. Well, up until the Santa Fe and the Pennsylvania got blocked by the M&StL railroad I was planning on building a government warehouse that would hold about 300,000 [fol. 539] bushel of corn at our Scottsburg siding, but I got that blocked right in the face.

Q. How do you mean?

A. Financially they said no, that until we find out who is going to furnish you cars we won't go along with you. The bank in Peoria did that. And until, I think, that you can see the records over at the TP&W office—I have been trying to buy this ground for the last two or three years from the TP&W and I was just granted that privilege about the same time that the Santa Fe and Pennsylvania took over and then the M&StL intervened in the deal.

Q. What effect would the granting of ownership to the M&StL have on your plans for expanding your facilities at Scottsburg?

A. I am not going to build if they get it.

Q. Why is that?

A. They haven't got any more cars than the TP&W has.

Mr. Broker: What was that last answer?

(Answer read.)

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Let the record show an adjournment until 9 o'clock Monday morning in this room.

(Whereupon, at 4:28 p.m., an adjournment was taken until 9:00 a.m., Monday, February 6, 1956.)

[fol. 540]

BEFORE THE INTERSTATE COMMERCE COMMISSION

[Title omitted]

LaSalle Room,
Pere Marquette Hotel,
Peoria, Illinois.

TRANSCRIPT OF HEARING—February 6, 1956

Met, pursuant to adjournment, at 9:00 a.m.

Before: Paul C. Albus, Examiner.

APPEARANCES:

(As heretofore noted.)

ADDITIONAL APPEARANCE:

J. B. Reeves, AT&SF General Office Building, Ninth and Jackson, Topeka, Kansas, appearing on behalf of the Atchison, Topeka and Santa Fe Railway Company, Applicant.

[fol. 542] PROCEEDINGS

Exam. Albus: The hearing will please come to order. I understand at this time there is an additional appearance to be entered.

Mr. Reeves: Mr. Examiner, please, J. B. Reeves, appearing on behalf of applicant, the Atchison, Topeka and Santa Fe, in Docket No. 18991. I am an attorney admitted to practice before the Commission. My address is AT&SF General Office Building, Ninth and Jackson, Topeka, Kansas.

I would also like to enter the same appearance as intervenor in opposition in Docket No. 18996.

Exam. Albus: Are there any further preliminaries?

Mr. Bagge: I have a statement, Mr. Examiner. It has been called to our attention that the roads are very slick this morning. Several of our appearances who were to

be here cannot get here until 10 or 11 o'clock. However, we will arrange to fill in the entire day.

Exam. Albus: Thank you very much.

We will continue with the cross-examination of Mr. Morris.

You may proceed, Mr. Wheeler.

JOHN M. MORRIS resumed the stand and testified further as follows:

Cross-examination (continued):

By Mr. Wheeler:

Q. Mr. Morris, since you appeared here on the stand on Friday have you discussed your testimony with anyone?

[fol. 543] A. Sure.

Q. With whom did you discuss it?

A. Santa Fe, Pennsylvania, a number of competitors at home.

Q. With whom from the Santa Fe and the Pennsylvania did you discuss it?

A. Paul Bagge, Harold Hemphill.

Q. Can you identify the last man whom you named? Do you know what his position with the Santa Fe is?

A. I beg pardon?

Exam. Albus: Can you identify the last man you named?

The Witness: May I mispronounced his name.

Exam. Albus: Is he in the room? Do you see him in the room?

The Witness: No.

A. Carl Bagge can describe him for you.

Mr. Wheeler: May we have a statement on the record, Mr. Bagge, as to who he is?

Mr. Bagge: He is general freight agent in charge of sales in the Illinois territory.

Exam. Albus: What is his name?

Mr. Bagge: Harold Hemphill. H-e-m-p-h-i-l-l.

Exam. Albus: Thank you very much.

By Mr. Wheeler:

Q. Did you talk to anyone else about your testimony?
[fol. 544] A. Not of any importance.

Q. Mr. Morris, you made a statement with reference to the car ownership of the M&StL. What was the source of that information?

A. Well, you know yourself that during the flush seasons you never have any cars on your own railroad the same as we do—

Q. (Interrupting) Now, Mr. Morris, I asked you a question and I'd like an answer to that question. If you want to explain your answer after you give it, all right, but I would like an answer to the question first.

What was the source of your information with respect to the car ownership of the M&StL, specifically?

A. You either have to own cars or have them when your shippers want them, don't you?

Q. Specifically, now, did anyone, did you talk to anyone with respect to the car ownership of the M&StL?

A. No, but I just took it for granted you didn't have any.

Q. You took it for granted?

A. Yes.

Q. You didn't make any investigation?

A. You never have any wherever—

Q. (Interrupting) Did you discuss it with Mr. Bagge?

A. I did not.

Q. Did you discuss it with any other representative of the Santa Fe?

[fol. 545] A. I did not.

Q. Did you discuss it with any officer or employee of the P&W?

A. No, sir.

Q. Did you inquire of any officer or employee of the M&StL?

A. No.

Q. Now, Mr. Morris, you knew when you made this statement yesterday that the M&StL didn't have any more cars than the TP&W has that you were under oath, did you not?

A. You can't supply them if you have them.

Q. Well, now, Mr. Morris, how many cars does the TP&W own?

A. Grain cars?

Q. All cars.

A. I don't know. I am not interested in anything except grain cars.

Q. All right, how many grain cars do they own?

A. Approximately 50.

Q. But you have no knowledge as to the total number of cars, of grain cars, that are owned by the M&StL?

Q. Not specifically numbers, no.

Q. Now, what experience have you had with respect to the furnishing of cars by the M&StL to its O-line shippers?

A. I am in direct competition with one of my elevators with two elevators that is located on your railroad.

Q. Which ones?

A. Which ones?

[fol. 546] Q. Yes, sir.

A. The elevator at Burwick, and the Farmers Elevator at London Mills.

Q. The name of those are the Farmers Elevator—

A. Yes, sir, at London Mills, and the Farmers Grain at Burwick, Illinois.

Q. At London Mills?

A. Yes, sir.

Q. Now, I believe your testimony was that the seasons, and I suppose your are referring to the harvesting seasons, start early in the south and grow later as you progressively move north, is that correct?

A. That is right, in your small grain season.

Q. In your small grain season?

A. That's right.

Q. And that is what you are primarily concerned with is small grain?

A. Well, any grain operator has to contend with small grain and soy beans and corn.

Q. When you said we all know that the grain season in the southwest starts in Texas and works gradually this way, were you referring to small grain or large grain or what?

A. Small grain season.

Q. All right. Now, dealing solely with the small grain season, then, is it not true that the harvesting season grows [fol. 547] progressively later as you move northward?

By Mr. Wheeler:

Q. If you don't understand any term I use, please t
me.

A. That is just what I asked you then.

Q. Are you aware that the M&StL receives more mon
each year for the rental of its cars than it pays out f
the rental of other railroads' cars?

A. What good do those cars do your shippers—

Exam. Albus: No, just answer the question.

By Mr. Wheeler:

Q. Just answer the question first, Mr. Morris.

A. I did not.

Q. Are you aware, Mr. Morris, that the M&StL own
approximately three hundred more cars than it ever h
on its lines at any one time during the year 1955?

[fol. 551] A. No.

Q. Are you aware that during the 1955 season t
M&StL was called upon to supply cars for other railroa
that is, grain cars for other railroads, and move cars
its lines and onto other railroads to meet shortages
other railroads?

A. No, I didn't know that, but I can't see why you wou
when your own shippers need them.

Q. Do you know that the Santa Fe had more frequent a
greater car shortages in 1955 than did the M&StL?

A. Do I?

Q. Yes.

A. I know nothing about the Santa Fe shortages.

Q. Would your answer be the same with respect to t
Pennsylvania Railroad?

A. During their grain season?

Q. Yes, sir.

A. I know nothing about their grain season either.

Q. Do you know the percent of bad order cars on t
Pennsylvania Railroad?

A. I am no car repairman.

Q. You would give the same answer, I take it, wi
respect to the M&StL?

A. That is right.

A. That is right.

Q. And is Santa Fe—well, the same answer would apply to the Santa Fe, would it?

[fol. 552] A. Sure.

Q. So that during 1955 many elevator operators on the M&StL constructed large additional facilities on the M&StL?

A. That was customary on all railroads.

Q. What is that?

A. That was customary on all railroads, if you could get the money to do it.

Q. Irrespective of the car supply on that railroad?

A. I wouldn't know about that.

Q. Do you think the car supply has anything to do with the construction of new or additional elevators on the line of a particular railroad?

A. I know it did with me.

Q. You know it did with you?

A. Yes.

Q. Do you think that other companies would construct elevator facilities on a railroad that did not have an adequate car supply to take care of the current needs of their current elevators?

A. Oh, that would just depend on the financial backing and how much service they would have to require to move their grain and at the time they wanted it moved.

[fol. 553] Q. I don't believe that is an answer.

Would you read that last question, please?

(Question read.)

By Mr. Wheeler:

Q. Can you answer that question for me, please, Mr. Morris?

A. I wouldn't know why, if anyone wanted to build storage and had their own money to do it, whether it would make any difference to them or not.

Q. Wouldn't make any difference whether they could get the car supply on that railroad, was adequate or inadequate, is that right?

A. That is right. Normally, this grain car movement, I don't know whether you are acquainted with the farmer

or not, he is a very peculiar man to do business with, he likes to have the elevator man carry him for six months with credit, but the minute he comes in and seals that bushel of grain he wants his money right there, and we in turn have to ship that grain out before we get any money, and under your storage agreement, the bulk of it is handled through the government or under warehouse receipts, and the market goes up where that they can clear themselves they come in and want to sell it right now. If the market goes up, there is many of a time you will by maybe fifteen, twenty, maybe thirty thousand bushels of grain in the day. Well, not having very much money in your pocketbook like I am I have to go to the bank and borrow it, and in turn [fol. 554] I have to have grain cars immediately to operate on. The farmer don't wait on us for six months like we have to wait on him, so that is why that we have to have grain cars for movement of grain.

Q. So I take it your answer would be that a sound elevator operator would not construct an elevator had he a choice on a railroad—strike that question.

I take it that your answer is that a sound elevator operator would not construct additional elevators on a railroad that was unable to afford him good service and a good car supply?

A. That's right.

Q. What is the capacity of your elevators?

A. On the T. P. & W. we have approximately about 80 thousand bushels of storage.

Q. How many elevators?

A. Three.

Q. I believe you testified that you had a very limited siding?

A. That is right.

Q. Why is that?

A. I wasn't the engineer that put the siding there.

Q. Have you asked the T. P. & W. to enlarge that siding?

A. No.

Q. Why not?

A. Well, under the present service I don't need it.

Q. I understood you to say that it was very inconvenient to you that you had this small siding and that you had

[fol. 555] have the locomotive stop and switch your cars frequently?

A. That is right.

Q. If the railroad built you a larger siding, that would not be necessary, would it?

A. Well, if they want to set around with switch engines and switch cars all day, it might not be.

Q. What did you mean when you said we are unfortunate to only have a three-car siding?

A. It would be a lot better if we had a bigger one, wouldn't it?

Q. Mr. Morris, if you say so, I will take your word for it. But what I was asking you was why you didn't get the T. P. & W. to build you a larger siding.

A. I never asked them, I never thought I needed it as long as they have the service that they have.

Q. You didn't feel your situation was unfortunate until Friday when you testified, is that correct?

A. I beg your pardon, I have.

Q. Now, you said that you were planning to build a government warehouse that would hold about 300,000 bushels of corn until the M. & St. L. filed its application in this proceeding, is that correct?

A. That is right.

[fol. 556] Q. When did you originally make your plans to build that elevator?

A. When?

Q. Yes, sir.

A. I gave an O.K. to buy the property to put it on for the last two years.

Q. Two years ago?

A. That is right.

Q. Now, that would be February 1954?

A. I think you misunderstood my answer.

Q. When did you get the property to build this on?

A. I said I have been trying to buy that property for the last two years.

Q. You haven't bought it yet, then?

A. No, sir.

Q. Why not?

A. I want to know who is going to run by my door and what kind of service I am going to get before I do any more expanding.

Q. Mr. Morris, do you want to know or does the bank want to know?

A. Both of us.

Q. Both of you?

A. That is right.

Q. Now, tell me, please, what bank.

A. Farmers-Merchants State Bank at Bushnell, Illinois.

Q. Farmers what is that?

[fol. 557] A. Farmers & Merchants State Bank.

Q. Is that a branch of a Peoria bank?

A. No. It is a corresponding bank with the Peoria banks.

Q. What is the bank in Peoria that you referred to on Friday that refused you a loan on the basis that the M&StL had filed an application to take control of the TP&W?

A. Well, now, I will tell you about that.

Q. Can you just answer my question and then explain. I asked you what bank you referred to in Peoria.

A. I don't know. The banks in Peoria, I don't know what bank they figured on working through. Before I—

Q. (Interrupting) Wait a minute, Mr. Morris. Let's get this town before you get into your explanation. You say the bank in Peoria did that in your testimony at page 539. What bank were you referring to?

A. I don't know.

Q. Who told you that a bank in Peoria refused on the ground—

A. (Interrupting) All they told me was—

Q. (Interrupting) Who is this?

A. The Farmers-Merchants State Bank of Bushnell, Mr. Vice-President Perine.

Q. He is the Vice-President of the Farmers-Merchants State Bank in Bushnell?

A. Right.

Q. Now, what did he tell you?

[fol. 558] A. Well, I went to him—

Q. (Interrupting) When did you go to him?

A. I think about in May I received a letter that they were willing to sell this ground to me and I went to them and

told them that I could buy this ground and wanted to build a storage, and they said well—

Q. (Interrupting) Just wait one moment. You first said that they told you that they could sell you the land. Did they own the land?

A. No, sir.

Q. Who did own the land?

A. TP&W Railroad, and they still do.

Q. TP&W owned the land?

A. That is right.

Q. All right. You went to the bank and told them you could buy the land?

A. That is right.

Q. And asked them to loan you the money to do so?

A. Well, to buy the land wasn't what I needed the money for. It was to build the storage.

Q. And they told you what?

A. To go ahead, that—well, we messed around for a couple, three, four weeks until after the Santa Fe and the Pennsylvania we thought, had purchased the stock and everybody was pretty well tickled about it, knowing that [fol. 559] we could get more cars than what we have already in the past.

Q. When you say you knew that you could get more cars, that is based on evidence that you previously testified to regarding your knowledge of the Santa Fe's car supply? Is that correct?

A. Santa Fe and Pennsylvania cars, yes.

Q. Now, go ahead, please.

A. So they told me that I had to be able to get cars before they would go along with me and OK a loan for me. So we went along and the M&StL intervened in this deal and they called me in one day and told me that we had to get some agreement on cars before they'd go along with me, that they thought the deal was all set up for the car supply between the Santa Fe and the Pennsylvania Railroad. So I asked them about—

Q. (Interrupting) You say some deal on cars. What did you mean when you said that?

A. Well, you know for yourself that with the supply of cars at the Santa Fe and the supply of cars that the

Pennsylvania Railroad have, we would be bound to get a few more cars than we are in the present conditions.

Q. I assume that statement is made on the basis of the previous testimony you have given, so we won't have to go back over all that again, is that correct?

A. That is right.

Q. Did you understand the bank to mean that you should [fol. 560] determine from the M&StL if they got control they would be able to furnish you cars? Did you?

A. Well, we know that your elevators on the M&StL don't get any more cars than we on the TP&W get.

Q. Now, you know that only by somebody having told you that, do you not?

A. I know when I buy stuff from those elevator areas and ask the farmers why they are bringing to us in place of taking to their own elevators they tell us their local elevators haven't the cars and the elevator is full.

Q. That might be a case of too small an elevator, might it not?

A. Well, the average elevator in Illinois don't hold too much grain.

Q. Now, I ask you again, did the bank indicate that you should go to the M&StL and determine whether or not they could give you an adequate number of cars to meet your need if they got control of the TP&W, did the bank so indicate to you?

A. Well, no, they did not.

Q. Did they suggest that you go to the Pennsylvania and the Santa Fe and ask them if they could give you written assurance that they would furnish you cars adequate to meet your needs?

A. Everybody took it for granted that we'd get more cars than we have been getting in the past with the two bigger railroads.

Q. I see. And the bank told you that when the M&StL intervened in this proceeding they could not make you a loan?

[fol. 561] A. That is right, until they were sure we could get a supply of cars.

Q. Did the bank mention the M&StL specifically?

A. Sure, they did. We in Bushnell know what your service has been up on your line running northwest out of here.

Q. You did not go to the M&StL, I believe you previously testified—

A. That is right.

Q. (Continuing) —to ascertain what their car supply was?

A. That is right.

Q. Had you ever encountered difficulty before in getting credit from the bank?

A. Have I?

Q. Yes, sir.

A. Not very often.

Q. Have you at all?

A. No.

Q. You have never made a request for a loan that has been denied?

A. Up until this time, no.

Q. Do you know whether or not Mr. Perine made any inquiry with respect to the car shortage situation on the Pennsylvania and the Santa Fe?

A. I wouldn't know about that.

Q. Is this Mr. Perine available in town?

A. Yes, sir.

[fol. 562] Q. In Bushnell or in Peoria?

A. No, he is in Bushnell.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Morris, way back when you were on direct examination I believe one of the things you said you were interested in was the retention of the present management of the TP&W.

A. That is right.

[fol. 563] Q. They have given you good service and you like their policies?

A. That's right.

Q. And any scheme that would preserve that management and keep those policies intact, that's what you want, isn't it?

A. Well, to the extent of ownership, yes, sir. You can't have five or six different owners and keep things intact as far as I am concerned.

Q. Well, you know now that they are not owned by any particular railroad, is that the fact?

A. That's right.

Q. And you like the management that it now has, and Mr. Coulter, I think you like the policies that he has in force, is that right?

A. That is right.

Q. What you want to see is Mr. Coulter left in charge of that railroad with his present officers and his policies? Isn't that what you want?

A. I want it but I want to know who is going to own the railroad, too.

Q. What difference does it make to you who owns it so long as you get that service? You are not a stockholder in the T. P. & W., are you?

A. No, sir.

Q. So what you are interested in is the service, isn't that right?

[fol. 564] A. Well, you know yourself—

Q. (Interrupting) Just answer my question, isn't it?

A. It is the service, yes, sir.

Q. And you think that can best be provided by the present officers of the corporation, isn't that right?

A. That's right.

Q. And so long as you continue to have that service available to you, that's what you want, isn't it?

A. I don't want to trade—

Q. (Interrupting) Can you just answer that yes or no, you want the continuation of the service, isn't that right?

Exam. Albus: He has already said that.

Mr. Cassell: That is all.

Exam. Albus: What difference does it make who owns the stock of the railroad as long as you get good service?

The Witness: Well, I will tell you, there are a lot of times we want to talk to someone in respect to grain cars. You know how it is if five or six people own something and they pass the buck here and there and all around. That is just the way I feel it would be if five or six people owned the T. P. & W. Railroad.

Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. You think, then, a corporation is more efficient with fewer stockholders?

[fol. 565] A. Beg pardon?

Mr. Broker: Would you read the question, please.

Exam. Albus: Do you think the corporation is more efficient with fewer stockholders?

A. Sure.

By Mr. Broker:

Q. Do you think that is true of corporations generally?

A. Well, there are some corporations that have a big number of stockholders, but if you have to pinpoint anything down to—if you have any questions or anything that you want to ask, you would want to go direct to someone that knows something besides having to run to five or six to get one answer.

Q. Would you expect to run to the Santa Fe about cars for your elevator?

A. No. But if I called up the T. P. & W. and needed cars and needed them bad and they'd say, well, I will have to see that the Nickel Plate or the M. & St. L. or the Pennsylvania, you know they might say, well, the Santa Fe didn't have any. Well, the Pennsylvania will ship them to me, or the Nickel Plate will ship some, the buck will be passed all the way through.

Q. Do you understand that the T. P. & W. will be so operated that its management will have to go to the Santa Fe and the Pennsylvania for things like this?

A. No, I didn't know that.

Q. I am asking you whether you know that.

[fol. 566] A. I did not.

Q. Wasn't that the tenor of your statement before, that the T. P. & W. would have to go to its owners to find out whether it could have an adequate car supply?

A. If the Pennsylvania had cars available they sure as the world would send them to the T. P. & W., wouldn't they? I am asking you.

A. I would say they would, yes.

Q. If they had them available?

A. That's right.

Q. Wouldn't more owners have more cars available?

A. Well, I imagine that the more owners they will take care of their own needs first.

Q. Don't you think the Pennsylvania will take care of its own needs first?

A. I imagine.

Q. So that if there are any cars left over, it is only after they fulfill their own needs?

A. If they own 50 per cent of the T. P. & W. Railroad, I imagine they'd have enough interest to give us some cars, too.

Q. Suppose they owned 100 per cent in another railroad, do you think they'd be more interested in furnishing that railroad with cars?

A. I don't know about that.

Q. Don't you think they would be more interested in [fol. 567] giving, let's say, the Wabash cars where they have a hundred per cent interest, than in a railroad where they've only got a fifty per cent ownership?

A. I am not in the railroad business, I don't know.

Q. So you don't know, then, what controls or motivates a railroad to furnish cars to another railroad, do you?

A. It is mostly your connections, you figure on getting them back.

Q. In other words, you furnish a car if you think you can get a haul out of it, is that right?

A. To a certain extent I'd think they would, yes.

Q. You think that that impels a railroad more than the ownership that it has in a railroad, the fact that the supplying line may get a haul out of it?

A. I'd think it would help, yes.

Q. Well, which do you think is more important, owning a railroad or getting a haul from the traffic?

A. Owning a car, I'd say.

Q. Why?

A. Well, you know you are going to get part of that haul if you own it.

Q. Why is that, because they can control the flow of traffic on the line that they are getting control of?

A. Situated the way I am in Goodall with one railroad, I have to depend on that one railroad for cars.

[fol. 568] Q. I understand.

A. And regardless where the cars go, whoever gets the railroad will get that haul.

Q. In other words, the owner of the railroad, of the T. I. & W., will get the haul?

A. That's right, the first haul. We ship a lot of studd over your railroad.

Q. I understand. Is the service good on the Nickel Plate?

A. The delivering carrier, I think so.

Q. But by and large the owning railroad would get first call on the traffic, particularly if it furnished the cars, is that right?

A. We are going to have to have—somebody is going to have to furnish the cars before we load them.

Q. Do you know whether—do you know anything about A. A. R. recommendations as to car ownership?

A. No, sir.

Mr. Broker: No other questions.

Exam. Albus: Is there any other cross-examination?

Mr. Wheeler: Yes.

Exam. Albus: Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. Mr. Morris, you say you like the policies of Mr. Coulter. Do you like his policies with regard to the purchase or failure to purchase grain cars?

[fol. 569] A. I don't know too much about that part about it. They have always been able to have quite a few cars. Where they got them I don't know.

Q. They have been able to have quite a few cars?

A. That's right.

Q. They have taken care of you pretty well, is that right?

A. About like everybody else.

Q. Well, I want to know whether you feel you have been taken—well taken care of by the T. P. & W. with respect to purchase of grain cars?

A. We have had a car shortage but we aim to get along some way.

Q. So you don't think you are badly off now, is that correct?

A. Under the present conditions?

Q. Yes.

A. A lot of times we are, but normally we can get along some way. We have had to shut the doors.

Q. You are content with respect to the policy pursued now by the T. P. & W. with respect to their ownership of grain cars, is that correct?

Mr. Wheeler: Read the question to him, please.

(Question read.)

A. No, sir.

By Mr. Wheeler:

Q. You are not?

A. No, we need more cars than what they've got, sure.

Q. Have you acquired that land that you spoke of for [fol. 570] the construction of an elevator from the T. P. & W.?

A. No, sir.

Q. Have they agreed to sell it to you?

A. Well, I never followed it up when I found out I couldn't build.

Q. Has it been offered to you?

A. Yes, sir.

Q. Has the price been fixed?

A. The approximate price, yes, sir.

Q. Now, Mr. Morris, if the Santa Fe owned 100 per cent of the T. P. & W. instead of 50 per cent, as proposed in their application, do you think they would be more likely to furnish you cars, be more likely to furnish you cars?

A. Than the way we are now?

Q. No, sir. The Santa Fe in their application, you understand, proposes to acquire 50 per cent stock ownership in the T. P. & W.

A. That's right.

Q. Do you think if they were to acquire 100 per cent of the stock in the T. P. & W., they would be more apt to give you cars as you need them from off their lines?

A. I do.

Mr. Wheeler: I have no further questions.

Mr. Broker: Mr. Examiner, that is somewhat along the [fol. 571] lines of some questions that I asked, I wonder if I could just follow up on that 100 per cent ownership?

Exam. Albus: If you want to.

[fol. 572] Further cross examination.

By Mr. Broker:

Q. Why do you think the Santa Fe would be more likely to give the TP&W cars if it had a hundred per cent ownership than if it had a fifty per cent ownership?

A. She'd have everything invested, they'd own the whole thing and they'd want to keep their investment up, I'd think.

Q. So if you have a hundred per cent you are more apt to work more closely with the railroad than if you have only a 50 per cent ownership, is that right?

A. I'd think so.

Q. Don't you think the Pennsylvania, then, would work more closely with the Wabash than with the TP&W?

A. I don't know their connections.

Q. Suppose I told you that the ownership of the Pennsylvania and the Wabash is practically 100 per cent today, and its proposed ownership in the TP&W is 50 per cent, as you know, what would your answer be then?

A. It would be to everybody's advantage, I'd think, to give all the grain cars they possibly could to everyone.

Q. Rather than the line to which they have a hundred per cent interest?

A. A grain car is a grain car to me whoever owns it.

Q. Just one more question. Do you think that the TP&W. should be operated in a neutral manner?

A. What do you mean neutral manner?

[fol. 573] Q. Neutral among all connections, all connecting railroads.

A. You are going right back to the same question with five or six owning it again.

Q. You don't think it should be neutral?

A. No, I don't.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

Mr. Wheeler: May I have just one, I just want to be clear on one thing.

Further cross examination.

By Mr. Wheeler:

Q. Mr. Morris, I am not sure you stated but I believe you did that Mr. Perine did not name the bank in Peoria to which you referred in your testimony on Friday?

A. That is right. Here is what he told me, he said he would not O.K. the loan to go any place else, that they would have to be the financial man if I got support some place to build these buildings they would still have to loan me the money to buy these warehouse receipts when I needed them and I would definitely have to have money to do that with besides the construction.

Exam. Albus: Are there any further questions?

Mr. Bagge: Yes.

Exam. Albus: Redirect, please.

Redirect examination.

By Mr. Bagge:

Q. Mr. Morris, when you related the fact that it was [fol. 574] your opinion that certain cars might be more available to you from the Santa Fe because of the seasons,

the seasonal movement of the harvest, to what commodities did you have reference?

A. Well, soy beans is one grain that's raised on the farm that the average farmer doesn't have any storage for, and he has to move that. When the weather is right he wants to market, and in place of the olden days, threshing machine days that it took a month to bring a crop in, they like to bring their crop in immediately, you either have to have a world of storage or be able to get a sufficient amount of boxcars.

Q. With regard to soy beans, is it a fact, sir, or is it not a fact that the soy bean harvest in the area in which you operate comes subsequent to the harvest in a territory served by the Santa Fe Railroad?

A. That's right.

Q. During your fall season your southwest harvest is all over with?

A. Yes.

Q. Now, sir, were there any other commodities that you had in mind?

A. We move a little oats and wheat but soy beans is normally when we run into trouble.

Q. You made a statement with respect to the car ownership of the M&StL. Would you state for the record pre- [fol. 575] cisely where you obtained the basis for your information concerning this, Mr. Morris?

Mr. Wheeler: Mr. Examiner, I object. The witness stated he didn't have any information.

Exam. Albus: Do you know anything about the M&StL. car supply, Mr. Morris?

The Witness: Only for their service they give the elevators.

Mr. Wheeler: Mr. Examiner, I object to that. This witness has testified that he doesn't have any elevators on the M&StL and that all he can testify to is pure hearsay.

Exam. Albus: What are you going to say, Mr. Bagge?

Mr. Bagge: I simply want to ask him what the basis for his information was. He has just made a statement; I would like to be permitted to do so.

Exam. Albus: All right, the objection is overruled.

You may answer the question.

A. Like I told you earlier this morning we are in direct competition to their elevators. During your bean harvest they normally are plugged full of beans.

Mr. Wheeler: I object to that, Mr. Examiner, and move the answer be stricken on the ground this man doesn't know.

Exam. Albus: The objection is overruled.

By Mr. Bagge:

Q. Mr. Morris, do you come into contact with this competitor of yours at London Mills, do you come in contact [fol. 576] with him from time to time?

A. Sure, I do.

Q. Are you familiar with his operations on the M&StL?

A. Yes, sir.

Q. And do you know of your own knowledge what his experience with respect to car supply on the M&StL has been?

A. Sure, he has had to truck a lot of grain out.

Q. How much grain?

Mr. Wheeler: Mr. Examiner, I object. This is information that this man cannot know of his own personal knowledge. It is perfectly evident it is pure hearsay.

Exam. Albus: I think we have gone far enough into that phase of it.

Mr. Bagge: All right, sir.

Exam. Albus: Any further questions?

Mr. Bagge: Yes, Mr. Examiner.

By Mr. Bagge:

Q: Mr. Morris, were you ever contemplating an expansion of your operations on any other railroad?

Mr. Wheeler: Mr. Examiner, I object to this as going beyond the scope of the direct examination and covering nothing that was raised on cross.

Mr. Bagge: The question to which this relates on cross-examination is his opinion concerning whether or not it is

necessary for a railroad to have available a car supply before an individual would locate a grain elevator.

[fol. 577] Exam. Albus: You may answer.

A. I'd want to know for sure who was going to furnish me grain cars before I ever built any elevator.

Exam. Albus: Restate the question, please. Ask the question again.

By Mr. Bagge:

Q. Mr. Morris, did you at any time in the past ever contemplate the expansion of your facilities to a point on another railroad?

A. Yes, sir.

Q. And what railroad was that, Mr. Morris?

A. M&StL.

Q. And when did you contemplate such a movement?

A. '51.

Q. And did you make any inquiries from your associates who are located on the M&StL to determine the availability of car supply on the M&StL at that time?

A. Yes, sir.

Mr. Wheeler: Mr. Examiner, I object. This is hearsay.

Exam. Albus: Objection is overruled.

The answer is yes.

By Mr. Bagge:

Q. And what was the conclusion which you drew as a result of your investigation of the facts at that time?

A. They didn't have any more cars than anybody else so I didn't want to invest any money and build on the M&StL.

Q. What was the particular point at which you were [fol. 578] contemplating this expansion?

A. A little town by the name of Hermon, Illinois.

Mr. Wheeler: What is the name?

The Witness: Hurron. It is an unincorporated spot.

Mr. Wheeler: Herman?

The Witness: H-u-r-r-o-n.

By Mr. Bagge:

Q. Now, that is a point on the M&StL, is it?
A. That is right.

Mr. Wheeler: Mr. Examiner, I object to these leading questions.
Exam. Albus: I will sustain that objection.
Mr. Bagge: I withdraw that question.

By Mr. Bagge:

Q. Now, Mr. Morris, does Mr. Perine—is that how you pronounce his name?
A. Yes, sir.
Q. Does Mr. Perine of your local bank of Bushnell come into contact with farmers and with shippers located on the M&StL Railroad?

Mr. Wheeler: Mr. Examiner, I object, I certainly object to that question.
Exam. Albus: I will sustain the objection.

By Mr. Bagge:

Q. Well, do you know as a matter of fact whether or not competitors of yours located on the M&StL do their banking at your bank?

Mr. Wheeler: Mr. Examiner, I object to that. This is [fol. 579] hearsay on hearsay that we are getting into.
Exam. Albus: No, he may know somebody who is located on the M&StL that comes into the Bushnell bank.
Mr. Wheeler: Mr. Examiner, how can this witness know, he is not an officer of the bank, how does he know they bank there?
Exam. Albus: He can see them go into the front door.
Mr. Wheeler: Certainly, he can see them go in the front door but how does he know they bank there?
Exam. Albus: You are not going to get me into this argument.
What is your answer to that?

A. There is no elevator directly that banks at Bushnell but there is a number around the surrounding territory and I know that to be a fact.

Mr. Wheeler: I object to the answer on the ground that is unresponsive to the question.

Exam. Albus: The objection is overruled.

What is the next question?

By Mr. Bagge:

Q. Mr. Morris, do farmers who would otherwise deal with competitors of yours located on the M&StL ever come to you—

A. Sure.

Q. (Continuing) —to dispose of their grain and wheat?

Mr. Wheeler: Mr. Examiner, I object to this.

[fol. 580] Exam. Albus: Why? That is a fair question, Mr. Wheeler.

Mr. Wheeler: How does he know?

Exam. Albus: He talks to them.

Mr. Wheeler: Well, all he can know is what they tell him.

Exam. Albus: That's right.

Mr. Wheeler: That is hearsay. That is why I object.

The Witness: Is it hearsay when you know their elevators is plugged, and they have grain on the outside waiting to be unloaded, is that hearsay?

Mr. Wheeler: Yes, sir.

Exam. Albus: I had better not get into that argument, this is between those two.

Do farmers come to you when elevators are plugged on the M&StL?

The Witness: That's right.

Exam. Albus: That was your question?

Mr. Bagge: Yes, sir.

Exam. Albus: All right, may we have the next question, please.

Mr. Wheeler: Did I get my objection in on that?

Exam. Albus: We will give you credit for an objection on that. Of course you understand it was overruled.

Mr. Bagge: Thank you, Mr. Morris. Those are all the questions I have.

Exam. Albus: Mr. Wheeler.

[fol. 581] Recross examination.

By Mr. Wheeler:

Q. Mr. Morris, you said the Santa Fe movement of soy beans was in a territory south of Illinois, is that correct?

A. I didn't understand. The movement of beans on the Santa Fe?

Q. Yes.

A. There are very few beans raised in the southwest.

Q. Very few beans raised in the southwest?

A. That's right.

Q. Where are those beans raised, in Illinois?

A. Illinois and Iowa raises the greatest part of them, yes, sir.

Q. Does the Santa Fe operate in Illinois?

A. Yes, sir.

Q. Did you seek a bank loan in order to build this elevator from any other bank other than the Farmers and Merchants State Bank?

A. I asked them about coming to Peoria and they said they wouldn't O.K. the loan, they told me they wouldn't recommend the loan, and they told me there is no use to come over there. They always O.K. all the loans before I can get any money.

Q. So on the basis that they wouldn't O.K. a loan—

A. A stranger can't go very many places and borrow money unless he is recommended by his local bank.

Q. Do you know whether or not the TP&W is a depository in the Farmers and Merchants State Bank?

[fol. 582] A. I am not in the banking business.

Exam. Albus: Just answer the question. You don't know that, do you?

A. No.

Exam. Albus: All right, that is the answer.

By Mr. Wheeler:

Q. Did you inquire of that fact from Mr. Perine?

A. Why should I?

Q. Just answer my question, please.

A. No.

Q. Did you inquire whether the Santa Fe was a depositor in the Farmers and Merchants State Bank?

A. No. Why?

Q. What? I just asked you whether you did.

Exam. Albus: The answer is no.

By Mr. Wheeler:

Q. Did you discuss with Mr. Coulter or any officer or director of the TP&W the refusal of the Farmers and Merchants State Bank to loan you the money?

A. No, sir.

Q. Did you discuss that fact with an officer or director or employee of any other railroad?

A. No, sir.

Q. Did you discuss it with any officer or employee of the Santa Fe?

A. No, sir.

[fol. 583] Q. Now, the sole people with whom you talked on the M&StL in your whole experience with respect to the M&StL I believe you testified is in connection with the Farmers Elevators at London Mills in Burwick, Illinois, is that correct?

A. I have talked to a number of fellows at grain conventions on the M&StL and they all have the same answer, no cars.

Q. Can you give me specifically the names of any others, other than these two?

A. Tim Ricketts at the elevator at Keithsburg is one man.

Q. Wait a minute, let's get his name.

A. Tim.

Q. Ricketts, R-i-c-k-e-t-t-s?

A. That's right.

Q. And where is he?

A. Keithsburg, Illinois.

Q. Keithsburg?

A. Keithsburg.

Q. Now, whom did you talk to at the London Mills, the Farmers Elevators at London Mills?

A. Barr is the manager.

Q. Barr?

A. That is right.

Q. And at Burwick?

A. I have talked to two or three managers that they have had up there. A fellow by the name of Roy Rogers was there in '54.

[fol. 584] Q. Who is the latest one?

A. I don't know what his name is. He is just a young fellow.

Q. The present one?

A. Yes. I don't know what his name is.

[fol. 585] Q. Have farmers ever found your elevator plugged?

A. Sure, they did.

Q. And where did they take their grain?

A. Took it home.

Q. Did they ever take it to the farmers' elevators at London Mills or Burwick?

A. Sure, because they are always full before we are.

Q. You say they never have?

A. That is right.

Q. Did you inquire of either Mr. Barr or the manager at Burwick whether or not they had ever had farmers who had been turned away from your doors come to theirs?

A. Well, they never fill up, Mr. Wheeler, until after we are full, because we have a lot more storage than they have.

Q. I just asked you the question. Did you ever inquire of Mr. Barr or this man at Burwick, Illinois, whether or not farmers had left your doors and come to them?

A. No, sir, I have not.

Q. Now, these are small elevators, are they, at London Mills and Burwick?

A. That is right.

Q. Smaller than yours?

A. That is right.

Q. And the smaller the elevator, the sooner it gets plugged?

A. If you only hold ten thousand bushel, when you ge [fol. 586] ten thousand bushel in you are full.

Q. If you had a larger elevator, Mr. Morris, your car supply requirements would be spread out over a longer period of time, would they not?

A. No.

Q. Why not?

A. Because I couldn't get the money to fill it up full of grain to pay for it.

Q. Assuming you had adequate capital, that would be true, would it not?

A. Well, the average individual elevator don't have that, the average operator don't have that much money.

Q. You mean he doesn't have enough money to carry the grain in his elevator?

A. If you just keep piling it up and don't ship any.

Q. Isn't your elevator ever full?

A. Is it? Yes, sir, it has been full, but if I built more storage I'd have to have more money to carry that inventory, wouldn't I?

Q. Then, Mr. Morris, is your storage presently adequate?

A. No, it isn't, but as far as my pocketbook, it is.

Q. So you don't have at the present time working capital to handle more grain, a greater grain storage capacity than you have at the present time, is that correct?

A. That's right.

[fol. 587] Q. And despite that fact, you sought to build an additional elevator, is that correct?

A. If I could get the money to build it, I would.

Mr. Wheeler: I have no further questions.

Exam. Albus: Are there any further questions?

Mr. Bagge: No, sir.

Exam. Albus: You are excused, Mr. Morris. Thank you, sir.

(Witness excused.)

Mr. Lucas: May I state that we have had a message from Watseka and there were five witnesses coming together in a car and they cannot make it, the roads are too icy. I am simply supplementing that and perhaps the M&StL can get ready to go forward in case our list breaks down.

Exam. Albus: All right, sir. Others are available?

Mr. Lucas: We have some others available. Mr. Hunter is out now trying to bring in a couple of others who were scheduled for tomorrow.

Mr. Bagge: We are trying to do the same thing with respect to the west end. I would like to call Mr. Uhler to the stand, please.

JAMES C. UHLER was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. What is your name, sir?

A. James C. Uhler.

[fol. 588] Q. Where do you reside?

A. Los Angeles, California.

Q. What is your business or occupation, sir?

A. I am traffic manager of Sunkist Growers, Incorporated.

Q. Would you describe what Sunkist Growers, Incorporated, is.

A. It is a cooperative marketing organization with over twelve thousand grower members, growers of California and Arizona citrus fruits.

Q. Would you state briefly what your traffic experience has been and what associations or traffic organizations you are a member of.

A. Well, I came with Sunkist in 1935. Prior to that I was with the Pacific Fruit Express Company in Los Angeles. I was assistant traffic manager in 1953 and traffic manager January 1 of this year.

Q. Do you belong to any traffic organizations of national or local character?

A. You mean committees?

Q. Committees.

A. The Refrigerator Car Committee and the National Fruit & Vegetable Claims Committee and the Los Angeles Chamber of Commerce Committee, which is local, of course.

Q. What are those two committees you mentioned, the perishable committees, are they committees of some national organization?

A. Yes, the United Fresh Fruit & Vegetable Association [fol. 589] is the Refrigerator Car Committee and the Na-

tional Claims Committee is a national organization not affiliated with anybody else.

Q. I see. In connection with the operations of Sunkist, would you describe briefly what the truck markets and the rail markets of Sunkist Growers are.

A. The shipments we make east of the Mississippi go practically 100 per cent rail. The area west of the Mississippi, of course, is very competitive with trucks, so we have brought rail and truck shipments to that area.

Q. Are you dependent to a large extent upon rail service or for the distribution of produce?

A. Yes, we are, to the East and eastern Canada, long haul traffic.

Q. Would you describe the extent to which Sunkist uses the TP&W as an intermediate carrier.

A. Well, last year over thirteen hundred of our shipments were routed over the TP&W.

Q. Could you give an approximation of the number of cars which Sunkist routed over the TP&W in the last few years.

A. Well, starting in 1949 and '50 it was approximately a thousand. Each season begins November 1 and ends October 31 the following year. 1950-'51 it was over thirteen hundred. The next season had dropped below a thousand. '52-'53 was above twelve hundred. And the last two seasons have been above thirteen hundred.

[fol. 590] Q. For how long a period of time has Sunkist been making such use of the TP&W?

A. Well, for quite a period. We will say at least 10 years. It has been longer than that, but I don't know offhand.

Q. Then, as shippers go on the TP&W, Sunkist probably constitutes, does it, one of the largest shippers?

Mr. Wheeler: Mr. Examiner, I object.

Exam. Albus: I sustain the objection.

Mr. Bagge: I withdraw the question.

By Mr. Bagge:

Q. What factors motivate Sunkist to route this perishable traffic via the TP&W?

A. We like to diffuse—a great many of our shipments start out without a sale—they are "rolling", as we call them—and we like to use as many routes as possible, so we will have our cars diffused because daily orders are coming in from various markets on the basis of being available, and the more we fan our cars out the more likely we are to have a car in the vicinity of the possible sale, so we have quite an interest in having a lot of routes available.

Q. In using those routes with this purpose in mind, do you use principally service routes in that connection?

A. Entirely, if they are available.

Q. Is the TP&W in its use by you as a bridge carrier considered a service route?

A. It is.

[fol. 591] Q. In connection with that, what specific routings do you use in connection with the TP&W?

A. Well, first I'd have to explain we put out thirteen, our traffic department puts out 13, different routing circulars to packing houses located on various lines, they are tailormade to that particular line, like, for instance, the Union Pacific has a routing sheet, the SP has one for Arizona, southern California, and so does the Santa Fe, so each packing house gets a routing sheet. It is a circular consisting of about 14 pages, and if any order received doesn't specify to some routing to the contrary, they go to this particular routing sheet and use it.

Q. I see.

A. With that in mind, I have a notation here to answer your question of how we use it; Arizona, central and southern California we use Santa Fe, TP&W and Nickel Plate, to Buffalo, Cleveland, Kokomo, Lafayette, Indiana, Lorraine, Ohio, and we use Santa Fe, TP&W, Nickel Plate, Lehigh Valley and New Haven, Hartford, East Hartford, Connecticut, and New Britain, Connecticut, from Arizona we use Santa Fe, Nickel Plate, DPOW, Scranton—these are just indications.

Q. Yes?

A. In our Arizona, southern California, in other words, in three routing sheets we use Santa Fe, TP&W, Pennsylvania to Logansport and Pittsburgh—Pittsburgh, of course, [fol. 592] is an option. And from the same points we use

the Santa Fe, TP&W, NYC to Champaign and Bellefontaine, locally.

Then, we also give each district manager, of which we have, I believe, fifty, fifty-one—it is a company employee located at various points, for instance, Peoria and Chicago—give them standing route instructions to markets beyond their particular point, so that we can quote and give a disposition at the same time.

Q. Yes.

A. And, in that connection, several of these routes are also used, for instance, right from Peoria here to Denver, Pennsylvania, or Lebanon, Pennsylvania, we use TP&W-Penn-Reading system. I think that gives you a general idea.

Q. Is it a fact, then, sir, that you use the TP&W as a connecting carrier with several other lines, is that correct, sir?

A. Oh, yes.

Q. Approximately how many cars have moved over these routings which you have just mentioned during the past few years?

A. I don't have a breakdown, TP&W, Nickel Plate, NYC, Pennsylvania, and the figures I gave are the total.

Q. The total figures?

A. So I have nothing more to add to that.

Q. Now, does the foregoing facts which you have stated indicate that the TP&W is an important carrier to Sunkist?

A. It is.

[fol. 593] Q. Have you read the application of the Santa Fe and Pennsylvania railroad as contained in Finance Docket 18991?

A. Yes, I have.

Q. Are you familiar with it?

A. Reasonably.

Q. What is your position and the position of your company with reference to the application of the applicants in this proceeding?

A. We favor it.

Q. Now, what specific reasons do you have for supporting the application of the Santa Fe and Pennsylvania railroads to acquire the T. P. & W.?

A. We have over 50 packinghouses located directly on the Santa Fe and have come in very close contact with them, of course, as the originating carrier over the years, and their performance has been such as to give us complete confidence in them to perform the things they hold out in this application to perform. But the strongest point in our opinion is the fact that just pure self-interest would indicate that they would perform or carry out the performance because the T. P. & W. supplements the Santa Fe and, of course, the Pennsylvania, and in our opinion self-interest is a pretty strong motive and a pretty good assurance of performance.

Q. Now, what specific representations did you have in mind when you stated that the self-interest would assure [fol. 594] that they would be promoted, or would be fulfilled?

A. Well, it is stated on page 19 of the application that the applicants propose to continue their present independent management in the operation of the T. P. & W., and the consummation of the proposed transaction will bring about no change in the T. P. & W. as a route open to all carriers on an equal basis, and we predicated the whole thing on that being true, and existing interchange points are to be kept open and maintained, existing routes and other traffic arrangements would continue to be in effect. I wouldn't be here unless I thought that would be true.

Q. In other words, are you primarily concerned with that—

Mr. Wheeler: I object.

By Mr. Bagge:

Q. Are you concerned with that phase of this proposal?

A. We are concerned with the T. P. & W. in general as a gateway route, and we want all the present connections kept open.

Q. I see. You have said that it is in the self-interest of the applicants to maintain them open. Why is it in the self-interest of the Santa Fe and the Pennsylvania railroads through their ownership of the T. P. & W. to maintain these present connections with the other carriers?

Mr. Wheeler: Mr. Examiner, I object. I don't think this witness ought to be testifying as to the motivation of the Santa Fe or the Pennsylvania. He can talk about his [fol. 595] own motives, perhaps, but not about those of the applicants.

Mr. Bagge: Mr. Examiner, I have attempted to qualify the witness as a traffic expert, and I think that he has the background to state why in his opinion the economics of the relationship are such that as a business man, as a user of the T. P. & W. as a bridge carrier, having this interest in maintaining these gateways, he feels as a shipper that he would be adequately protected by Santa Fe-P.R.R. ownership.

Mr. Wheeler: Mr. Examiner—

Exam. Albus: Mr. Wheeler?

Mr. Wheeler: I have no question as to this man's qualifications as a representative of a shipper. I would have no objection to testimony elicited from him as to what motivates Sunkist oranges, but he has not been qualified as an operating railroad executive, either in their freight department or the traffic department or in any other department of the railroad, and I therefore submit that he is not qualified and cannot know what the specific self-interest of a railroad as distinct from a shipper.

Mr. Bagge: Mr. Examiner, having Mr. Wheeler's point in mind I would be perfectly willing to have this witness qualified based solely on his experience as the traffic manager of one of the largest shippers in the country.

Mr. Wheeler: Mr. Examiner, a man can't testify outside of his competence.

[fol. 596] Mr. Bagge: The basis on which I submit—

Exam. Albus: I have heard enough.

Mr. Uhler, do you have the question in mind?

The Witness: The question?

Exam. Albus: Yes, the question all the firing is about, all the shooting.

The Witness: I think the original question, if I recall it now, was what made me believe that it would be to the self-interest of the Santa Fe to keep these routes open, and I think that is material and I think we are interested in that.

Exam. Albus: Do you have an opinion on that?

The Witness: Yes, I do.

Exam. Albus: All right, you may express it.

The Witness: One thing that would probably keep these routes open through self-interest is the fact, for example, if the S. P.-Rock Island, Keokuk, T. P. & W. or Nickel Plate route were not maintained, the Rock Island, the S. P.-Rock Island would go right to St. Louis, they could also go straight to Peoria or to Chicago, and the same thing is true on the Burlington, you can go Union Pacific, C. B. & Q., east St. Louis, Nickel Plate, you can do the same thing via Peoria or Chicago. So if any of these routes that are now open by the T. P. & W. are closed, there would be too many alternatives open to the shippers and the carriers, primarily the shippers I am talking about.

[fol. 597] Exam. Albus: Are there any further questions?

Mr. Bagge: Yes.

By Mr. Bagge:

Q. In connection with the use of the alternative routes which you have described would the T. P. & W. or the Santa Fe or Pennsylvania railroads derive any revenue through such an alternative route?

A. Not if they aren't included in a route. Excuse me, I will answer your question a little bit better than that. I have given the routes, and on the routes I have given, of course, they would not participate at all, have no revenue.

Q. Is that true with the Rock Island traffic which is presently interchanged with the T. P. & W. at Keokuk?

A. That is true, yes.

Q. Is it true with respect to the Burlington traffic that is present?

Mr. Wheeler: I object. That is a leading question.

Exam. Albus: I will sustain the objection.

By Mr. Bagge:

Q. Is that fact true with respect to all of the carriers with whom you connect via the T. P. & W.?

Mr. Broker: He doesn't connect via the T. P. & W. He ships over it.

Exam. Albus: Yes, there is no connection there.

By Mr. Bagge:

Q. Well, is this point true with regard to the several carriers which you have mentioned whom you specify in connection with the T. P. & W.?

[fol. 598] Mr. Wheeler: I object. This is leading again.

Exam. Albus: It is obviously true, yes, it is.

By Mr. Bagge:

Q. All right, sir, in view of the foregoing, in your opinion do you believe that it is necessary for each of the connecting lines of the T. P. & W. to participate in ownership in order to protect their present connection?

Mr. Wheeler: May we have the question read, please.

(The question was read as follows:

"Q. In view of the foregoing, in your opinion do you believe that it is necessary for each of the connecting lines of the T. P. & W. to participate in ownership in order to protect their present connection?")

Mr. Wheeler: Mr. Examiner, it seems to me this is argumentative, arguing with the witness on direct as well as being highly leading.

Exam. Albus: The witness may answer.

A. Obviously if the Santa Fe keeps the promise made in this application, ownership would not be necessary, because they offer to keep all routes open and they don't propose ownership of the other carriers.

By Mr. Bagge:

Q. Do any other factors lead you to that conclusion?

A. To the conclusion that the routes would be kept open?

Q. Yes, that it isn't necessary for them to participate in ownership.

[fol. 599] A. Oh, definitely because they have these alternatives to them and open to the shippers.

Q. Now, if the Keokuk routing which you have mentioned were not maintained, would you substitute Santa Fe-T. P. & W. on traffic presently moving via Keokuk?

A. No, sir. We make a practice of giving the originating carrier a long haul. In this case, of course, the Rock Island is not an originating carrier but they are a preferred over the originating carrier and we wouldn't short haul them.

Q. Is that a general policy of Sunkist?

A. That is the general policy.

Q. Are you familiar with whether or not that is the policy of any other overhead shipper?

A. No, sir, I am not.

Q. All right, sir. What is your attitude regarding the possible ownership of the T. P. & W. Railroad by the M. & St. L.?

A. Well, I am not here really in opposition to any particular railroad. We use all the railroads and we need all the railroads, and we want to keep as many routes open as we can, but obviously the T. P. & W. couldn't get into the ownership and still follow this petition. I think this petition sets forth probably the strongest, in our opinion, the strongest combination of railroads in whom movement-ship could be vested.

Q. And is it your opinion that that would be best serving your interest, that the granting of this petition would serve [fol. 600] your interest?

A. I think it would involve two carriers who would have a very, very definite interest in developing this route, and that, of course, would serve our best interests.

Q. How would you compare your experience with service via the M. & St. L. as compared with that of the T. P. & W.?

A. Well, in October 1953 the M. & St. L. withdrew their guarantee of their schedule on cars routed Nemo-M. & St. L.-Nickel Plate to all points, Buffalo and west, and as a result, of course, we had to discontinue using them to route Cleveland, which is an option and other points, they'd continue to maintain it east of Buffalo on account of the way connections were made, so at the present time the T. P. &

W. is more of a service route with a wider guarantee than the M. & St. L.

Q. Does this experience and the experience of Sunkist with regard to the M. & St. L. lead you to any conclusion regarding the ownership of the T. P. & W. by the M. & St. L.?

A. Well, possibly, if the M. & St. L. took over the ownership, they might reestablish their guarantee and do a very good job indefinitely, but it would be a lot of conjecture. Right at the moment we have an operating route that is operating and working and I think that the proposal would even further trengthen it without any conjunction, so that is why I would favor this proposal.

Mr. Bagge: Thank you.

That is all I have of this witness.

[fol. 601] Exam. Albus: We will take a 10-minute recess.

(Short recess.)

[fol. 602] Exam. Albus: The hearing will please come to order.

We will continue the cross-examination of Mr. Uhler.

Mr. Wheeler, please.

Cross examination.

By Mr. Wheeler:

Q. Mr. Uhler, do you understand that the M&StL proposes to close any of the existing routes with the TP&W if it obtains control of that property?

A. No, I don't.

Mr. Cassell: I am sorry, I couldn't hear either the question or the answer, Mr. Examiner.

(Question and answer read.)

Mr. Cassell: Thank you.

Exam. Albus: You are welcome, sir.

By Mr. Wheeler:

Q. Do you believe that the Santa Fe-Pennsylvania would not keep their word with respect to keeping existing routes and schedules open if it were not in their self-interest?

A. Well, our past dealings with the Santa Fe would indicate to us that they could be pretty well trusted. But I think the strongest assurance of that is their self-interest.

Q. Now, you spoke of service over the M&StL. Eliminating for the moment from consideration the run between Nemo and Peoria on the M&StL, what service, what kind of service, have you obtained on the M&StL of your shipments over its other lines?

A. Well, we use it quite often up to Minneapolis and we [fol. 603] get very good service.

Q. Now, Mr. Uhler, wasn't your service prior to 1951 on the Nemo-Peoria run of the M&StL very good?

A. It was very satisfactory.

Q. And it was subsequent to 1951 that the service became not as good, as I understand it, as that afforded by the TP&W?

A. Actually it was October '53.

Q. October '53?

A. Yes.

Q. Now, that was the date that they withdrew their guarantee?

A. In connection with the Nickel Plate at Peoria, yes.

Q. Now, what is that guarantee to which you refer?

A. They were getting into Peoria at 1:30 p. m. and the Nickel Plate connection was out at 2:30, I believe, just offhand, at 2:30 a. m., and that was too tight for them to guarantee that particular schedule, however, they could pick up a train around 11 o'clock which would work all right over Buffalo over points east of Buffalo, but to Buffalo and Cleveland and points west they couldn't guarantee the 2 a. m. which was required in order to make the markets to those points.

Q. What is this guarantee you are talking about?

A. Well, the guarantee is the agreement to pay claims on failure to perform the schedule.

Q. That is, it is a guarantee by the railroad to Sunkist that if they fail to make schedule and you, and any damage [fol. 604] results to Sunkist, they will pay for that damage, is that correct?

A. It is a published schedule to all shippers.

Q. Well, I am speaking just of Sunkist.

A. Yes. If the Cleveland market is seven days and they fail to make the seventh morning sale and there is a loss of market on the eighth day they would stand the difference.

Q. That is, the M&StL would stand the difference in that case if they failed to make it?

A. Yes.

Q. Are you familiar, Mr. Uhler, with the fact that there was a change in an interchange service between the Santa Fe and the M&StL before and after 1951 or thereabouts, '51 to '53?

A. Well, I am familiar with this, that the delivery to both the TP&W and the M&StL is for 8 p. m.

Q. Off the Santa Fe?

A. Off the Santa Fe, yes.

Q. Are you familiar with the fact that before that—that is the present delivery, is that correct?

A. Yes.

Q. Are you familiar with the fact that prior to 1951 the Santa Fe set off the fruit blocks at Nemo, right off of their direct run to Chicago?

A. Well, the principal point—well, no, to answer your question.

[fol. 605] Q. Are you familiar with the fact that they now set them off at Shopton and deliver them by a local to Nemo, or subsequent to 1951 they engaged in the present practice?

A. How is your question again?

Q. Are you familiar with the fact that the Santa Fe changed its practice from setting off the fruit blocks at Nemo out of their transcontinental train prior to 1951, that subsequently they altered that practice, set off the fruit blocks at Shopton and delivered them to Nemo by a local train?

A. Yes, I am familiar with the fact that their delivery is later to the M&StL than it had been.

Q. Than it had been?

A. Yes.

Q. Are you familiar with the fact that that made it exceedingly difficult, or that that was the reason why the M&StL felt it could not continue to guarantee delivery into Peoria?

A. Yes. Of course they get the cars at the same time as the TP&W does.

Q. Are you familiar with the fact that the TP&W also gets cars off the Rock Island and the Burlington for that eastbound movement with the cars off of the Santa Fe?

A. Yes.

Q. You are familiar with that fact?

A. At Keokuk?

Q. Yes.

[fol. 606] A. Yes.

Q. And that the M&StL has no such opportunity at Nemo?

A. Yes, that's right.

Q. Do you have any reason to believe that the M&StL would discontinue or impair in any way the service now rendered by the TP&W to you between Lomax and Peoria, if it gained control?

A. We have no reason to believe that it would. Well, we have no particular reason to believe that they would—

Q. (Interrupting) It would be in the self-interest of the M&StL as the controller of the TP&W to continue to get that revenue, would it not?

A. Well, it gets another factor in there—

Q. (Interrupting) Can you answer my question first and then give any explanation.

(Question read.)

A. Oh, definitely, yes.

By Mr. Wheeler:

Q. Do you move any traffic over the Santa Fe through the Chicago gateway?

A. We do.

Q. Is that a large movement as compared to the TP&W or not?

A. Yes, much larger.

Q. Much larger?

A. Yes.

Q. Does the Santa Fe prefer that long haul movement to the shorter haul movement?

[fol. 607] A. We have never had any solicitation against the TP&W.

Q. But you have had solicitation for Chicago from the Santa Fe?

A. No, we have never had any comparison made by any Santa Fe representative, or anything done to sway us one way or the other.

Q. They do not solicit for Chicago?

A. They solicit for Chicago but they don't draw a comparison.

Q. Are you solicited by the Pennsylvania?

A. Yes.

Q. Do they solicit for the St. Louis gateway?

A. They like the St. Louis gateway.

Q. It gives them the longer haul, does it not?

A. Well, from our own experience, we have never had the Pennsylvania suggest that we primarily route via St. Louis as against Chicago or Effner. They have solicited, in general, but they have never asked specifically that we route cars via St. Louis.

Q. Railroads in general prefer their long haul, do they not, if they can get it?

A. As a general proposition, yes.

Q. Does the Wabash solicit traffic from you?

A. Yes.

Q. Do they solicit it from Kansas City?

A. Yes.

Q. Do you deliver more traffic to the Pennsylvania [fol. 608] through Chicago than you do through Effner?

A. Yes.

Q. Do you deliver more traffic—

A. (Interrupting) Wait a minute. Actually it is a close question. I just don't have the figures here. My impression would be that it was not too far apart, one way or the other.

Q. How about St. Louis, a comparison with St. Louis versus Effner and Chicago?

A. To answer your questions I would kind of have to make an estimate of how many came out of Arizona on the Santa Fe and S.P. and also Tulare County. Some of these routes call for the Pennsylvania at St. Louis and some Santa Fe-TPW-Penn, and others Santa Fe-IHB- Penn through Chicago.

Q. Then you could not tell us whether or not the Pennsylvania, that more of your traffic moves over the Pennsylvania through St. Louis than moves over the Pennsylvania at Effner or Chicago, is that correct?

A. It is substantial in all the places and undoubtedly one of those gateways will get more than the other but I couldn't, right offhand, no.

Q. Considering movement over all lines, is Chicago your most important gateway of the three?

A. Yes, I'd say more move via Chicago. It takes all of southern Canada.

Q. Wouldn't movement through Chicago be quite a bit [fol. 609] greater than through Peoria, for instance?

A. It would. Total movement you mean all carriers in and out?

Q. Yes.

A. Yes.

Q. Where would St. Louis, East St. Louis, rank, ahead of Chicago?

A. No, behind Chicago.

Q. But ahead of Peoria?

A. Yes.

Q. Again by a substantial margin?

A. By a good margin, yes.

Q. Do you truck a substantial quantity of your fruit through the Midwest area?

A. Yes, we do.

Mr. Wheeler: I have no further questions.

Exam. Albus: Thank you.

Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Uhler, who solicits the traffic that moves, the Sunkist traffic that moves, over the TP&W today, is that primarily obtained by the TP&W solicitors?

A. Yes.

Q. I believe that you are familiar with the fact that the Southern Pacific is the Rock Island's connection to get into California, isn't that right?

[fol. 610] A. Well, from our standpoint, you do get out of California, yes.

Q. Don't you send a good deal of your produces via the Southern Pacific?

A. Yes, we do.

Q. And doesn't the Rock Island figure in the movement of that traffic that comes east?

A. A very substantial amount, yes.

Q. And I believe the Keokuk gateway is used for that too, isn't it?

A. Yes.

[fol. 611] Q. In fact, the Keokuk-Rock Island-Keokuk, TP&W-Peoria is the guaranteed route through the Peoria gateway using the Rock Island, isn't that so?

A. Are you talking now just about the Peoria gateway?

Q. Peoria gateway to the east.

A. Yes, that is right.

Q. I believe one of the things you thought would be desirable would be the continuation of the present management of the TP&W, isn't that right?

A. Yes.

Q. Do you know the position of the Rock Island in regard to that?

A. No.

Q. If the Rock Island gave you the same assurance as the Santa Fe of the continuation of the present management in exactly the same shape and form as the Santa Fe has said it wanted it, wouldn't that suit you, then, in regard to what you wish?

A. You are talking about management?

Q. I am talking about management now.

A. Well, yes, we'd believe the Rock Island.

Q. Since the Rock Island is a link and this is important traffic to it, wouldn't it have the same motives as the Santa Fe in keeping the routes open?

A. Well, the more people you include in the ownership, the smaller the percentage each one would own, naturally. [fol. 612] Q. That is right, but wouldn't Rock Island have—

A. (Interrupting) So carrying the thing a little further, carrying the Rock Island and adding possibly a few more would give much more incentive going via another gateway, because no one carrier would have enough ownership going via Peoria as against another gateway.

Q. Don't you think an investment of three million dollars is enough to cause someone some concern?

A. If you are going to get one-fourth of the revenue over that gateway and one hundred per cent over another, I doubt if it would offset it.

Q. In any event, wouldn't the Rock Island have the same motives as the Santa Fe in regard to this property, isn't it similarly situated in regard—

A. (Interrupting) They'd have the same motive; if the Rock Island went into it the Santa Fe would even have less motive.

Q. I take it, however, that one of the things you would be interested in would be preserving the Rock Island route via Keokuk?

A. We wouldn't be here if we didn't believe the assurance of the Santa Fe that they'd keep all the routes open. We definitely want that.

Q. You don't believe that by having another carrier subscribing to the same conditions that there would be any less likelihood of having those routes open, do you? [fol. 613] A. Possibly not, but there would be less incentive to build up that particular route because nobody would have a big enough stake in it.

Q. Aren't those routes preserved today without any ownership in the TP&W by any of these railroads?

A. Yes, through the solicitation of the TP&W.

Q. Does the Rock Island appear in your routing sheets today that you have mentioned?

A. Oh, definitely. You mean in connection with the TP&W.?

Q. Yes.

A. Yes, very extensively.

Q. Do you know relatively the volume that probably originates on your railroad on the Santa Fe versus the Southern Pacific?

Mr. Broker: On his railroad, what do you mean?

Mr. Cassell: I mean of your company, that originates on the Santa Fe versus the Southern Pacific.

A. I would say the Southern Pacific, particularly with its affiliated carriers, as Visalia Electric and so forth, originates more than the Santa Fe.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. Your primary interest, as I understand, is to keep the present service and all connections and gateways open, is that correct?

[fol. 614] A. That is certainly a primary requirement as far as we are concerned.

Q. And you believe that there should be some strict neutrality observed in the maintenance of those routes and channels of trade, I assume, is that correct?

A. You mean whoever had the ownership would keep those routes open?

Q. And would exercise neutrality among the various connections.

A. Do I understand you to mean—

Q. (Interrupting) Do you believe that the owner of the railroad should exercise neutrality among all the connections of the TP&W?

A. Well, I think the owners should keep all the routes open.

Q. And should maintain the service as it is today?

A. And maintain the service via all the available routes that are available today, yes, sir.

Q. Now, should he favor any one over another? There is a distinction, you understand—well, do you understand there is a distinction between keeping a route open and being neutral among the various connections?

A. I don't quite understand your neutrality, what you mean exactly by "neutrality". You mean in solicitation?

Q. Do you think the TP&W solicitation force should continue its present practices of solicitation?

A. Yes.

[fol. 615] Q. Do you know what those practices are?

A. Well, they solicit TP&W routing.

Q. Yes, and they are not particularly concerned with the junction points so long as they are in on the haul, is that right?

A. Well, they do prefer the haul to Effner because of the reason it takes in more of its line.

Q. But they don't oppose the interchange, say, at Peoria to the Nickel Plate?

A. That is right.

Q. If they can get the car as far as Peoria and give it to the Nickel Plate there, that is perfectly satisfactory?

A. That is right.

Q. Do you think the owners should maintain that attitude?

A. Well, I think they should do nothing to impair the routing via the Nickel Plate, for example, at Peoria; if they wanted to put out a plus effort on some other route over and above what they now exert, I would certainly not be against that, provided they didn't do anything to actually block another open route.

Q. Do you think that railroads can affect the movement of traffic by the plus or minus effort?

A. Well, there are an awful lot of people working for railroads who aren't doing much of a job if they can't to some extent

Q. So railroads do influence routing?

A. Yes; they have a sales force.

[fol. 616] Q. Don't you think that the Nickel Plate is

interested in maintaining the TP&W particularly since it lost this so-called guarantee, Nemo, M&StL, Peoria and Nickel Plate?

A. Don't I think the Nickel Plate is interested in maintaining that gateway, you mean?

Q. The TP&W and the Peoria gateway.

A. Well, they certainly—we have never had any solicitation against that gateway from the Nickel Plate.

Q. They have always been neutral among their gateways, haven't they?

A. Well, we have never had them try to sell us one gateway over another.

Q. Do you think the Nickel Plate could make a contribution to the TP&W?

A. You mean through ownership?

Q. Yes.

A. Well, I'd have to answer the same way, I am not sure that—just as a general proposition, a matter of principle, as a general principle, rather, it is just to me quite obvious the more people who are in a particular deal the more pieces of pie you have to cut and the less interesting any particular piece is to any particular participant.

Q. It is all based, then, on self-interest?

A. I think that is a good foundation, self-interest. When you reduce self-interest you have a tendency to reduce the effort.

[fol. 617] Q. Before we pursue that, I want to come back to something else. You talked earlier about the plus effort, for instance, that might be made by the Pennsylvania to influence routing via Effner. You recall your testimony there?

A. Yes.

Q. And you also recall your testimony that the TP&W today does not favor one interchange over another, at least doesn't oppose, let's say, movement Peoria Nickel Plate, do you recall that?

A. They certainly don't oppose it; they certainly do try to get a longer haul, if they can.

Q. Do you see that the advent of the Pennsylvania in the ownership would constitute a change in the traffic policy of the TP&W?

A. I don't think so, because the interchange of the Pennsylvania has always been their long haul.

Q. And they will continue to favor their long haul, you would assume?

A. I would think so, but not to block the other hauls.

Q. Don't you think that their self-interest would affect them in soliciting or intensifying their solicitation via Effner?

A. Well, intensifying, they already want that haul via Effner. I don't know how they could really intensify it if they are doing a good job now.

Q. Suppose the Pennsylvania and the Santa Fe had a [fol. 618] joint self-interest in promoting the long haul over the entire route of the TP&W, let's say, from Lomax to Effner, do you think that by reason of their ownership they would influence such routing in their own self-interest?

A. They'd try to, but I don't see how they could hurt, for instance, the Nickel Plate. If, for instance, our Cleveland option is on the Nickel Plate, now, we certainly wouldn't split the haul up and then short-cut east of there because you are under the CA routing guide, as you are aware, so our normal tendency is the destination delivery desired.

Q. Do you route over the Erie to New York City, to New York?

A. To New York City?

Q. Yes.

A. Yes, to New York City, and also to Penn.

Q. They have a common facility in New York now, don't they?

A. Yes, they do.

Q. And those are both service routes, aren't they, to New York, I mean?

A. Yes.

Q. Do you think it would be in the self-interest of the owners to change schedules, let's say, it was indicated that the Santa Fe did, in respect to the M&StL?

A. Well, I wouldn't, any change they made— this M&StL TP&W deal, the delivery is the same, on the fifth night. if they made a change of schedule in order to close a now [fol. 619] existing service route, I'd say they have broken

the things they held out in here (indicating) to do, we'd naturally then oppose it. It is our belief that they won't do that that causes us to favor their application.

Mr. Broker: Thank you.

Exam. Albus: Mr. Uhler, on what portion of your traffic do you prescribe the routing?

The Witness: We prescribe all the routing—we will get a request for a delivering line and that's about as far as it goes. Safeway Stores prescribe some of their routes, but other than that, by and large, we give all the routing.

Exam. Albus: It is practically 100 per cent, then?

The Witness: Yes.

Exam. Albus: Do you designate junctions?

The Witness: We designate junctions. When without a junction a car could move over any one of two junctions. We want to know where the car is in transit.

Exam. Albus: Thank you.

Are there any further questions of Mr. Uhler?

Mr. Wheeler, please.

Further cross examination.

By Mr. Wheeler:

Q. Mr. Uhler, do the Rock Island and the CB&Q, with respect to the Rock Island and the CB&Q, does the bulk of your traffic over those roads move through Chicago on the eastern movement?

[fol. 620] A. Yes.

Q. Do they solicit Chicago as against Keokuk?

A. Well, I really don't know what their practice is, in general, but with us I have never had anybody make a pitch for any particular gateway.

Q. Do you have a belief the Santa Fe solicitation of you is going to change as a result of this application, if their application here is granted?

A. Well, I really couldn't say. I will say this, that no matter what the solicitation, I don't think it will have too much effect on the results.

Q. They indicated to you that their solicitation policy would change vis-a-vis this gateway versus Chicago?

A. Naturally, with a substantial interest in this, they could solicit Peoria and that would be all right with us.

Q. That is not quite my question, Mr. Uhler. Have they told you that they would solicit Peoria as against Chicago in the event that their application here was granted?

A. Well, as I understand it, it wouldn't be Peoria over Chicago, it would make them practically even. It would be immaterial to them whether they went Chicago or Peoria.

Q. Didn't you indicate in answer to an earlier question by me—

A. (Interrupting) I just indicated that we ourselves—I don't know what their general policy is—had them object to using TP&W.

[fol. 621] Q. I think you went further than that, I think you said they do not actively solicit you for the Chicago movement as against the Peoria movement.

A. That is right.

Q. Have they told you or indicated to you in any way that they would change that policy as a result of their acquisition of control of the TP&W?

A. No.

Mr. Wheeler: I have no further questions.

Exam. Albus: Is there any further cross-examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Bagge: Yes, sir.

[fol. 622] Redirect examination.

By Mr. Bagge:

Q. As a substantial shipper on the TP&W, what is your opinion regarding the relative interest of the M&StL as owner of the TP&W on the west end of the line as compared with the interest of the applicants in the event this application is granted?

Mr. Wheeler: Excuse me a moment, please, may I have that question read.

Exam. Albus: Read the question, please.

(Question read.)

Mr. Wheeler: Mr. Examiner, I object to the question as having nothing to do with any cross-examination, and even going beyond the scope of the direct.

Mr. Bagge: Mr. Examiner, the question to which this was directed was raised on cross related to a question he never allowed the witness to finish, the question was, in your opinion, it was something along this line, in your opinion is it to the self-interest of the M&StL to maintain service on the west end, he never allowed the witness to finish at that time, here he'd like the opportunity.

Exam. Albus: Here we go again. The objection is overruled.

The witness may answer.

A. It was rather an involved question.

By Mr. Bagge:

Q. May I simplify it?

A. Please.

fol. 623] Q. Is it a fact that you support—

Mr. Wheeler: I object. This is a leading question.

By Mr. Bagge:

Q. What is your opinion regarding the relative interest of the M&StL Railroad in maintaining service via the west end of the TP&W as compared with the interest of the applicants in this proceeding?

Mr. Wheeler: Mr. Examiner.

Exam. Albus: That is the same question to which an objection was overruled.

Mr. Wheeler: I have further—I want to know what he means by applicants in this proceeding.

Exam. Albus: I am sorry. Very well.

Mr. Wheeler: I believe there are three, at least.

Mr. Bagge: The applicants, Santa and Pennsylvania Railroads.

Exam. Albus: Very well.

A. Well, as a general proposition the M&StL would be running a service somewhat parallel to the west end of the TP&W, whereas the TP&W would form really the only

direct route that the Santa Fe has into Peoria. So I would say as a general proposition, that with all your eggs in one basket you would push it a little harder than you would with two.

Mr. Bagge: That is all.
Exam. Albus: Recross.

Recross examination.

By Mr. Wheeler:

Q. Did you take into account in that answer the fact that [fol. 624] the Santa Fe enters the Chicago gateway and the M&StL does not?

A. Well, I was confining it to the Peoria gateway.

Q. Did you take into account that the Santa Fe would have only a 50 per cent interest in this line, whereas the M&StL would have a hundred per cent interest?

A. Well, the Santa Fe's percentage of interest in the line would be somewhat comparable to the amount of mileage west of Peoria and maybe east of Peoria. I don't think that's quite true, but they'd have a substantial interest in it, and they would only be serving the western part of it. If you see what I am getting at, that the percentage of interest and the percentage of mileage would become somewhat nearer to making it a Santa Fe deal as far as Peoria.

Q. Now, isn't the Nemo-Peoria route a direct run for the Santa Fe to Peoria?

A. Isn't what?

Q. The Nemo-Peoria route of the M&StL a direct route for the Santa Fe into Peoria, just as the Lomax-Peoria run is?

A. Oh, yes.

Q. I believe you have already stated that you are aware that the Pennsylvania has access to the St. Louis as well as as the Chicago gateway and to the Kansas City gateway through its control of a subsidiary, the Wabash, did you not?

A. Well, I held it down to St. Louis, the ones served by [fol. 625] the Pennsylvania proper.

Q. Would you expect a railroad company having a 50

per cent ownership in a property to push the routes of that railroad property to a great extent than the routes of a railroad, of another subsidiary that it owned a hundred per cent of?

Mr. Bagge: Would you read the question, please, Miss Reporter?

(Question read.)

A. No, but I would expect the Pennsylvania to push this particular gateway harder than they do without any ownership at all.

Mr. Broker: Would you read the last answer, please?

(Answer read.)

Mr. Wheeler: I have just one more question.

By Mr. Wheeler:

Q. Did you protest to the Santa Fe the change in their operating policy with respect to Nemo in 1951 or thereafter?

A. Well, whenever an operating practice is changed that affects the guarantee, we take it up with the carriers involved, and I can't recall right offhand 1951—you mean 1953?

Q. '51 or '53 or—

A. (Interrupting) Whatever the date happens to be, I would say from our normal practice I would expect that we had. I just don't have the file here.

Q. Anything that might interfere with your guaranteed service—

A. (Interrupting) We are against.

[fol. 626] Q. (Continuing) —you would be opposed to?

A. That is right.

Mr. Wheeler: I have no further questions.

Exam. Albus: Are there any further questions?

Mr. Bagge: No, sir.

Exam. Albus: You are excused, Mr. Uhler. Thank you very much.

(Witness excused.)

Mr. Bagge: At this time, Mr. Examiner, an intervenor, a municipality, who is taking the position of supporting the applicants would like to appear.

Exam. Albus: Very well.

[fol. 627] Mr. Fort: Lyman Fort, I am the city attorney for the village of Lomax, an intervenor in this matter in support of the petition filed by the Santa Fe and Pennsylvania Railroad.

I would like to call Mr. Everett Pence to the stand for testimony.

Everett Carl Pence was sworn and testified as follows:

Direct examination.

Exam. Albus: May we have your full name?

The Witness: Everett Carl Pence.

By Mr. Fort:

Q. Where do you live, Mr. Pence?

A. Lomax, Illinois.

Q. How long have you lived there?

A. Born and raised there.

Q. Do you hold any elective office in the village of Lomax?

A. President of the village board.

Q. Village trustees?

A. Yes, sir.

Q. Where is the village of Lomax located?

A. About three miles from the Mississippi River, about halfway between Burlington, Iowa, and Fort Madison, Iowa.

Q. On the Illinois side of the river?

A. On the Illinois side, yes.

Q. Are there any railroads running through the village of Lomax?

A. With the T. P. & W. we have three.

[fol. 628] Q. What are the two other railroads?

A. A branch of the C. B. & Q.

Q. What are the others?

A. A. T. and Santa Fe.

Q. Have you looked over the application which has been

made by the Santa Fe to the Interstate Commerce Commission in this matter?

A. I have.

Q. Have you made any examination of the application of the M. & St. L. in this matter?

A. Only what Mr. Bagge gave me.

Q. Those were excerpts on it?

A. Yes, sir.

Q. When did the trustees of the village of Lomax decide to intervene in this matter?

A. I think I brought it up before the board in the September meeting.

Q. Of 1955?

A. 1955.

Q. And when was the petition filed?

A. I think October 5, 1955.

Q. 1955?

A. Yes, sir.

Q. What reasons did the trustees have to intervene in this matter?

[fol. 629] A. Well, as the Santa Fe is a big taxpayer in our town, the T. P. & W., too, they thought it was best to go along with the Santa Fe.

Q. Is the village of Lomax customarily referred to as the western terminal of the T. P. & W.?

A. Well, it is the western end of the T. P. & W., the interchange is Lomax.

Q. The Santa Fe and the T. P. & W. interchange—

A. (Interrupting) At Lomax, yes, sir.

Q. When the village board of the village of Lomax acted to intervene in this matter, had any representative of any railroad discussed this matter with you or the other members of the board?

A. Neither party.

Q. No one had discussed it with you?

A. No, sir, neither party.

Q. Have you since taking your action discussed the proceeding with any railroad concerned here?

A. Have I what?

Q. Have you ever discussed this case with any—

A. (Interrupting) I did with Mr. Bagge on January 26, 1955. He is the only party.

Q. Did anyone request that you come here as a witness today?

A. None other than the village of Lomax.

Q. How do you feel or what are your reasons for being opposed to the petition of the Minneapolis & St. Louis Railroad in this matter?

[fol. 630] A. Well, I am opposed to it. I think the present setup has been all right down there. As far as changing to the other fellow, I don't know what the future would be.

Q. You're primarily concerned with keeping the west end of the route open, are you?

A. That is right, yes, sir.

Q. Do you have any reason to believe that the west end of the route, that is, the route from Peoria on west, would not be left open?

A. Well, it would be if M. & St. L. got it, their interchange might be at Nemo instead of Lomax.

Q. What reason do you have for—

A. Well, that would take all of that business out of Lomax.

Q. You are primarily concerned with the interest of Lomax today, are you not?

A. That is right. If the Santa Fe and Pennsylvania get it, we have a chance for expansion down there.

Q. Is anyone compensating you for coming as a witness today, Mr. Pence?

A. None other than the village board, out-of-pocket money.

Q. Do you have anything else you want to say before the Commission?

A. I do during the war that was a vital link in wartime. I was born and raised there, and there was an awful lot [fol. 631] of war material traveled over that shortcut.

Q You feel that it might have some advantage in the case of war again?

A. I do, yes, sir.

Q. Mr. Pence, you have lived in the village of Lomax since 1920 probably sometime, have you not?

A. Yes, sir, I was born in 1905.

Q. Then you perhaps were living there when the interchange was made between the Santa Fe and T. P. & W. in 1927?

A. Yes, sir, I have seen it grow to its present state, from the beginning when they connected with the Santa Fe in '26, I believe it was.

Q. Has it increased substantially?

A. Yes, yes.

Q. Have the facilities which are located in the village of Lomax for the traffic interchange increased?

Mr. Broker: Excuse me, what was that question?

Exam. Albus: Have the facilities at Lomax by the interchange increased?

Mr. Broker: There was another word in there, I thought.

Exam. Albus: Read the question, please.

(Question read.)

A. Facilities?

By Mr. Fort:

Q. The yards.

Exam. Albus: Railroad facilities.

[fol. 632] A. Oh, yes, they have expanded those yards considerable from the beginning.

By Mr. Fort:

Q. When that took place, did that affect your assessed valuation in your village, taxes?

A. Yes, it did.

Q. It increased it?

A. Yes, sir.

Q. Your reason for being in favor of the Santa Fe and Pennsylvania application—

Exam. Albus: Let him tell us the reason, don't you tell him.

What other reasons do you have for this acquisition, Mr. Pence?

The Witness: Well, not knowing whether—I have never had no application or anything from the M. & St. L. for

what they might do, I don't know. We know what the T. P. & W. and the Santa Fe and Pennsylvania has done. In my opinion I think it would be better to go along with them that way.

Exam. Albus: Have you been here since the hearing started?

The Witness: This is my first day.

Exam. Albus: Thank you.

Any more questions?

Mr. Fort: That's all the questions, sir.

Exam. Albus: Cross-examination.

Cross-examination.

[fol. 633] By Mr. Wheeler:

Q. I believe you indicated that you did not—when did you get a copy of the application of the Pennsylvania-Santa Fe?

A. January 23, 1956.

Q. January 23?

A. Yes, sir.

Q. And from whom did you get that?

A. Mr. Bagge and Mr. Hemphill.

Q. Who is Mr. Hemphill?

A. Well, I suppose he is a Santa Fe man. I don't know what capacity he holds.

Exam. Albus: I think I've got his card here.

By Mr. Wheeler:

Q. Isn't he from the Pennsylvania Railroad, Mr. Pence?

A. He might be, I don't know.

Exam. Albus: That is all right, if you don't know, Mr. Pence, just say so.

By Mr. Wheeler:

Q. They gave you a copy of the application of the Santa Fe? Was it a complete copy?

A. I think it was.

Q. Was it one of these blue backed—

A. (Interrupting) Yes, sir.

Q. Did they give you what purported to be some excerpts from the M. & St. L. application?

A. Yes, sir.

[fol. 634] Q. Do you know what parts of that application they gave you?

A. No.

Q. It wasn't a complete application, though, was it?

A. I don't know. You fellows have never come out with your plant, I don't know.

Q. You don't know whether it was part of our application or part of a petition we filed?

A. I don't know what it was.

Q. Were those documents read by the board prior to the time you filed your petition in this matter?

A. We didn't have no applicant or nothing. We had never been solicited by nobody when we acted on this.

Q. When did the board act?

A. In September.

Q. And at that time you had no application or anything before you?

A. No, sir, no, sir.

Mr. Wheeler: No further questions.

Exam. Albus: Thank you very much, Mr. Wheeler. Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Pence, is your town of Lomax located on the main line of the Santa Fe?

A. Yes, sir.

Q. The rails of the Santa Fe, then, go through your town?

[fol. 635] A. Yes, sir.

Q. Is the connection with the T. P. & W. actually inside your town or out in the country?

A. Right in town.

Q. There are no carload shippers of freight in Lomax, are there?

A. Carload shippers of freight?

Q. Yes.

A. That's farm products, just anything to make a carload?

Q. Is there anything in Lomax that ships out freight carloads of freight?

A. Why, yes, the Santa Fe ships a carload of freight.

Q. What industry is that?

A. Grain elevator.

Q. Do you have any industry in Lomax other—

A. (Interrupting) I am a farmer.

Q. I beg your pardon?

A. I am a farmer.

Q. But you are speaking for the village, aren't you?

A. That is right.

Q. Does the village, and your farm with it, aren't you?

A. Yes.

Exam. Albus: He has lived there since 1905.

By Mr. Cassell:

Q. What is the population of Lomax?

A. 1950 census was 490.

Q. Other than the grain elevator are there any other [fol. 636] industries in Lomax?

A. Well, we have a canning factory, tomato factory.

Q. Does it ship out over the T. P. & W. or the Santa Fe?

A. I think they use the Q. and truck.

Q. The Q. and truck?

A. I think so.

Q. And that is all you have in town?

A. Yes.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. Do you remember when the C. B. & Q. had a connection at that point with the T. P. & W.?

A. When the T. P. & W. started, then run on the C. B. & Q. tracks at Iowa junction into Burlington, Iowa.

Q. So they did have a direct connection in the vicinity of your viliage?

A. That is right.

Q. Do you remember the condition of the T. P. & W. prior to the installation of the connection between the Santa Fe and the T. P. & W.?

A. You mean before the connected to the Santa Fe?

A. Yes, I remember, the trains practically stopped.

Q. It was not in good condition, was it?

A. That is right. The Santa Fe and the Pennsylvania [fol. 637] has put it in the condition it is now, in my estimation.

Q. I will come to that. Was it in that bad condition as far back as you can remember?

A. Yes.

Q. That would be since you were a small boy, let's say?

A. That's right.

Q. And you know you have testified now that the Pennsylvania and the Santa Fe have improved the T. P. & W., isn't that right.

A. That's right.

Q. Now, what has the Pennsylvania done, to your knowledge, to improve the T. P. & W.?

A. Well, I imagine the main factor in improving the T. P. & W. is this through train service around Chicago.

Q. You mean to avoid Chicago?

A. That's right.

Q. Do you know whether a lot of that traffic moves Santa Fe-T. P. & W. and Nickel Plate?

A. I don't know what those are routed.

Q. So you don't know, really, whether or not the Nickel Plate has contributed its share to the building up of the T. P. & W.?

A. I don't know what per cent, no, I wouldn't know.

Q. When your village reached its position in support of the application, did you know about the Rock Island, the Nickel Plate—

A. I did.

[fol. 638] Q. (Continuing) —coming in and seeking its share?

A. I did.

Q. But you hadn't seen the petition?

A. No, sir.

Q. Your primary interest is in keeping that west end open and active, isn't it?

A. That's right, yes, sir.

Q. Don't you think that the Nickel Plate would be very much interested in maintaining that west end?

A. Well, that might depend on how much interest they've got.

Q. Suppose they had an ownership interest, don't you think they'd have a greater interest than they have today?

A. Well, I don't know. Are you pertaining to a quarter interest?

Q. Well, whatever the Commission might approve. There are seven or eight railroads, I believe, now, that have sought a share.

A. In my opinion the way that has done business down there and the volume of business it does that I don't see why you want to bother, fool with it, why not Santa Fe and Pennsylvania have it?

Exam. Albus: Railroading doesn't work that way, Mr. Pence?

The Witness: Doesn't it? Well, if you get too many parties interested or wrapped up in one thing, why, you are headed for trouble.

By Mr. Broker:

Q. Oh, you think, then, that an organization shouldn't have very many parties, is that right?

[fol. 639] A. Not over two.

Q. You have heard of corporations, though, who have had more than two stockholders, who have been successful?

A. Oh, yes. After they take a while to thrash out things, I suppose, they come to some decision.

Q. Did you hear the testimony by the vice-president of the Pennsylvania that they would still favor the St. Louis route over the T. P. & W. even though they had a half interest in it?

A. No, I didn't.

Mr. Broker: Thank you.

Exam. Albus: I believe you say you just came in this morning, is that correct?

The Witness: I came in last night on the train and stayed over.

Exam. Albus: Is there any further cross-examination of Mr. Pence?

Are there any further questions?

(No response.)

Exam. Albus: You are excused, sir. Thank you very much.

(Witness excused.)

[fol. 640] Exam. Albus: Next witness, please.

Mr. Bagge: Mr. George Bertolino.

I would like to state that the City of Bushnell is an intervenor in this proceeding and their city attorney, who would otherwise be here this morning representing him, is unable to be here and that in his stead I shall interrogate the representative from the city.

Exam. Albus: Very well, Mr. Bagge.

George Bertolino was sworn and testified as follows:

Direct examination.

Exam. Albus: May we have your full name, please?

The Witness: George Bertolino.

By Mr. Bagge:

Q. Would you state your name, please?

A. George Bertolino.

Q. Where do you reside, sir?

A. Bushnell, Illinois.

Q. What is your business or occupation?

A. I am a manager of a lumber yard in Bushnell.

Q. Now, in addition to your business, do you occupy any other position in the community?

A. I am an alderman in our city.

Q. Did the city council of the City of Bushnell take any action in connection with the application of the Santa Fe Pennsylvania Railroads, which is presently pending before [fol. 641] this commission?

A. Yes, they did.

Q. What was that action?

A. I believe on October 3rd a resolution was adopted in the council favoring the petition of the Santa Fe in the acquisition of the stock of the T. P. & W. at that time. I believe that was October 3, 1955.

Q. After the passage of the resolution did the city take steps to do anything else about expressing their attitude before this body?

A. Well, to the extent that a petition was instituted, yes.

Q. I see. Would you describe briefly what the population of the City of Bushnell is and tell us something about the business interests which support the community?

A. We are a community situated on the cross-roads of the main C. B. & Q. line going south out of Galesburg and intersecting with the T. P. & W. going westwardly; a community of approximately 4,000 people in the last census; predominantly an agricultural and small industrial area; serving a radius of, I presume, somewhere in the neighborhood of 15 to 20 square miles. Predominantly hog raising farmers and grain farmers, as I believe Mr. Morris, who was on before, testified. We have numerous small industries in the town, manufacturing. When I say numerous I am acting as a chamber of commerce a little bit. We have about four, really. We seem to think that we have a repre- [fol. 642] sentative midwestern community.

Q. I see. What position does the City of Bushnell take with respect to the application of the Santa Fe and Pennsylvania Railroads in this proceeding?

A. We are very much in accord with the petition. We are in hopes that that's the way the thing will be settled by the Commission.

Q. Would you tell us briefly why?

A. Well, yes, and I am repeating the consensus of opinion of the people on our council. We feel that if the ownership of the T. P. & W. passes to these two great lines, the Santa and the Pennsylvania, not that there are not other great

lines, but those two being in question now, we feel that our chances of possibly inducing people to come in and locate along our lines industries of other nature, would be enhanced possibly more, at least we feel so, than if it didn't.

The other reason, we feel very much this particular reason, now we are on a main line, we are on the T. P. & W., it is a main line in itself, it is an entity unto itself. If the ownership should pass to the Minneapolis, St. Paul, as an example, we feel then we would be on a competing line for the reason that Nemo is just a short distance from Bushnell and we would have two lines running in the same direction, and we don't think it would be to their advantage; I say I personally don't think it would be to their advantage, that this western line from Peoria on over be maintained in its present state, consequently we are in hopes that the Commission sees the thing favorable for the Santa Fe and Pennsylvania.

(fol. 643)

Exam. Albus: In your answer there you mentioned Minneapolis and St. Paul. Did you mean Minneapolis and St. Louis?

The Witness: Excuse me, Minneapolis and St. Louis Railroad.

By Mr. Bagge:

Q. When you spoke of the fact that you supported us, among other things, for the reason that you thought the opportunity of bringing in industry would be enhanced, what factors led you to that conclusion?

A. Naturally we are interested and we kind of watch the papers and we see where small factories locate in various parts of the community. We have an organization that tries to bring these people into our town, and we like to talk to them, and we find ever once in a while where the Santa Fe is doing quite a little bit towards fostering the movement of these small businesses or businesses in their infancies into some of our smaller towns.

We noticed the other day, as an example, in Galesburg the Santa Fe made known they had some land available for industrial purposes, and we are in hopes the same thing would be applicable to our small town.

Q. You indicated your position with respect to the application of the M&St.L Railroad, is that correct?

A. That is correct.

Q. If you were assured or if your community were assured by the representatives of the M&St.L that [fol. 644] they would agree to the imposition of conditions by this Commission requiring them to maintain service over that end of the railroad, over that segment of the T.P.&W. in which you are most interested, would your attitude regarding the M&St.L be changed?

A. If the Commission requested them, sir?

Q. No, sir. If the M.&St.L. agreed to the Commission imposing a requirement requiring that they maintain service on the west end of the T.P&W, would the position which you have taken with respect to their application be changed?

A. No, I don't think so, not if the Commission, not if they had to go to the Commission—in other words, if the Commission had to be the whipping boy to keep service through Bushnell on the T. P. & W., even though the Minneapolis owned it, I wouldn't be in favor of that; I don't believe I would.

Q. Why do you say that?

A. Well, I don't think that that is a feasible way to operate business, for a directive to be given by the Interstate Commerce Commission telling them that they had to maintain service along that line.

Q. Well, of course, you know that—strike that.

It would take the form of an agreement by them—this is an assumption—

Mr. Wheeler (interrupting): I object.

Mr. Broker: Wait a minute.

[fol. 645] Exam. Albus: I sustain the objection.

Mr. Bagge: All right.

By Mr. Bagge:

Q. Mr. Bertolino, are you aware that the Rock Island and Nickel Plate Railroads and the Burlington and the Wabash Railroads have intervened in this proceeding?

A. I am.

Q. Are you aware of the fact that they have requested to be permitted to participate in ownership with the Santa Fe and Pennsylvania?

A. I am.

Q. What is the position of your community with reference to the desires of these other railroads?

Mr. Cassell: I object to that. There is nothing in the record as to any position of their community.

Exam. Albus: I will sustain the objection. I don't think this gentleman is in a position to—

Did you know those facts at the time your board took action in this case?

The Witness: In October, I don't believe those facts were in evidence at that time. I did later on, naturally, because we read it in the papers.

Exam. Albus: Do you have an opinion as to what disposition should be made of their request to be included? Have you formed an opinion with respect to that?

The Witness: It would be a personal opinion. It wouldn't [fol. 646] be an opinion expressed by our council. Is that what you mean, sir?

Exam. Albus: Yes, that is right

The objection is sustained.

Mr. Bagge: All right, sir.

By Mr. Bagge:

Q. Have you anything further to say on behalf of the City of Bushnell?

A. No, except possibly to reiterate the point that we hope that this thing devolves down to where the ownership is possibly included under a few heads rather than large numbers, because we don't think then that we will be again on a main trunkline, we will be merely on a subsidiary line of a group of competing agencies and I don't feel that we will get the service that we hope we will get under the new agreement.

Mr. Bagge: Thank you.

That is all I have of this witness.

Exam. Albus: Cross-examination.

Cross examination.

By Mr. Wheeler:

Q. Mr. Bertolino, do you believe that you will be on the main trunkline of the Santa Fe if their application is granted?

A. Things being equal I do feel that way, and I believe we all feel that way.

Q. You say your council took action on October 3, did you have a copy of the Santa Fe application before you at that time?

[fol. 647] A. No, sir.

Q. Did you have a copy of the M & St. L. application before you at that time?

A. No, sir.

Q. On what did you base your action? I mean did you have some document. How did this thing come to your attention?

A. I think the first we knew of that, sir, was when we saw the printed evidence in the paper that the Santa Fe was going to make an effort to obtain the stock of the T. P. & W. Railroad.

Q. Did, well, had anybody from the Santa Fe been to see you prior to that time?

A. No, sir.

[fol. 648] Q. Do you believe that the Santa Fe would seek to locate an industry in your town, assuming they had a 50 per cent ownership in the TP&W rather than to locate an industry on their own lines of which they own a 100 per cent?

A. I would think they would at least give it some consideration.

Q. Don't you think they'd have more interest in locating it on their own line if they had a 100 per cent ownership there?

A. I would agree to that.

Mr. Wheeler: No further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Bertolino, isn't your plant located on the Burlington Railroad?

A. When you say my plant, I presume you refer to the lumber yard that I manage, sir, is that correct?

Q. Yes.

A. It is located on a siding of the CB&Q Railroad.

Q. So your service is derived from the Burlington rather than the TP&W in the first instance, isn't that right?

A. Primarily, sir, that the CB&Q does own the siding that sides to our lumber yard.

Q. I think you are familiar with the general layout of the TP&W, aren't you, how it runs across Illinois and its western connections.

A. Yes, sir.

[fol. 649] Q. Bushnell is in that segment of the TP&W between Peoria and LaHarpe, isn't it?

A. Yes, sir.

Q. And at LaHarpe the TP&W forks, one fork going up to Lomax and connects with the Santa Fe, is that correct?

A. That is correct.

Q. And then there is a longer line that goes on down to Keokuk, Iowa?

A. That is right.

Q. And the Rock Island connects with it at that point?

A. I believe that is correct. I am not cognizant of the connections on the one spur that you mentioned, although it does show it in the map, but I believe you are correct.

Q. Then you were not familiar with the fact, then, until you saw the map today, is that right?

A. Oh, no, sir. I have lived there 15 years, and naturally this question, not necessarily this question of ownership of the two, has been discussed, a good many times.

Q. Has been discussed a good many times. Are you generally familiar with the fact that the Rock Island connects with the TP&W at Keokuk, Iowa?

A. That is right, sir.

Q. Then you have the situation of the Santa Fe having its connection at Lomax and the Rock Island having its con-

nection at Keokuk, and those two lines converging west of [fol. 650] you at LaHarpe and then both of the connections then goes by Bushnell, is that right?

A. I believe that is right, sir.

Q. Isn't the position of the Rock Island geographically the same as that of the Santa Fe in relation to the TP&W?

A. Paralleling its self, I would think, yes.

Q. And then wouldn't the Rock Island have the same interest in the TP&W that the Santa Fe has?

A. On what line, sir?

Q. On the line that goes through Bushnell.

A. That was an ambiguous question on my part. I believe to a certain extent, yes.

Q. Wouldn't it be just the same, they both have a western connection at one of these two lines and then they join and go through Bushnell?

A. That is correct, they do, both of them do that.

Q. So their interest would be the same as far as the TP&W is concerned, wouldn't it?

A. I don't believe I could answer that in the light that you want. I don't know which interest you are referring to, sir.

Q. I mean the interest in retention of the TP&W as a route through Bushnell, to and from the East.

A. Well, we have never been informed of that by the Rock Island, sir. As far as our council is concerned we don't know that.

[fol. 651] Q. I see, but just looking at the map.

A. Geographically looking at the map?

Q. Yes. Let me show you this, Mr. Bertolino.

The Witness: I don't know what he is trying to establish, sir.

By Mr. Cassell:

Q. Mr. Bertolino, this is a map prepared by the Santa Fe and Pennsylvania, and it is Exhibit 4, and on page 1 of that there is a black line showing the route of the TP&W across Illinois, and you will see that your town of Bushnell is located on the TP&W between Peoria and LaHarpe, and then there is the line that goes up to Lomax where it

connects with the Santa Fe and the other line where it comes west to Keokuk and joins with the Rock Island, then both of those railroads have their own lines beyond. Now, wouldn't the Rock Island's interest in maintaining the main line of the TP&W through Bushnell be the same as that of the Santa Fe?

A. I would presume that it would, but we have no evidence of it. We have never been assured that that would be the fact.

Q. Assuming, then, that the Rock Island stated that it would maintain the present management and policies of the TP&W and subscribe to the same principles as to service to the public with the TP&W as the Santa Fe has, that would give you what you want in Bushnell, wouldn't it?

A. Possibly.

Q. What would cause you to doubt it, if they gave the [fol. 652] same promises as the Santa Fe?

A. Well, assuming that the other companies, the other two companies are also instrumental in owning a part of it then I would be afraid we would have too much divulgence of ownership.

Q. Too much divulgence of ownership?

A. You would be competing, Rock Island-Santa Fe, would be competing, theoretically, assume they would be competing—

Q. (Interrupting) There is no theory about it, it is a fact.

A. Then they would be joining up to use a common carrier across our town and I am afraid there might be some repercussions.

Q. Since they join at LaHarpe and have a common stream by Bushnell, that would benefit you, wouldn't it, with the traffic of both railroads going through Bushnell?

A. Who is going to be owning the line, sir?

Q. We hope the Rock Island is going to participate in it with the Santa Fe and Pennsylvania and such other railroads as may wish to participate. And, of course, the line through Bushnell would be used by the traffic that goes to either the Santa Fe or the Rock Island, isn't that right?

A. Under a joint ownership, possibly. At the same time there might be considerable friction, in, we will say, La

Harpe on through Bushnell, that phase of the line that is owned by the two who had competed previously for this shipping, we will call it, then putting it on their own common carrier at that particular point, I am afraid—I don't [fol. 653] know the machinations of the railroads but I would presume that that would cause friction. You are asking me, sir, I believe to adjudge something that I am not qualified to adjudge.

Exam. Albus: That is an honest statement, if I ever heard one.

Mr. Cassell: With that statement I think I will have no further questions.

Exam. Albus: Thank you very much.

Mr. Broker.

Mr. Broker: I would like to ask a question.

Cross examination.

By Mr. Broker:

Q. You said earlier you didn't think business ought to be operated under the compulsion of a government directive that they had to maintain service, is that right?

A. I think the statement that I tried to answer was that would I be satisfied if the Minneapolis and St. Louis were directed by the Interstate Commerce Commission to maintain traffic over the western end of the TP&W, what is now the present TP&W Railroad, and my answer at that time was I didn't think I would be personally in favor, and I don't think the community of ours would be in favor, of a government directive, being a government body directive, being the Interstate Commerce Commission, directing them to maintain service over that end of the line, I don't believe we would be in for that, sir.

Q. Do you understand the Pennsylvania and Santa Fe [fol. 654] have proposed some sort of condition that would require them to maintain service over the line?

A. I would presume that all railroads are under a directive to maintain a certain phase of service.

Q. Then what is the difference between that and the M&StL situation?

A. Well, one you would—my version, I presume that is what you are asking, sir?

Q. Yes, please.

Exam. Albus: That is correct.

A. We have a competing line of the Minneapolis and St. Louis just a few miles to the north of the line that we are going to try to maintain just a few miles to the south running east and westwardly. Consequently I don't think the Minneapolis and St. Louis would be totally operating the total lines efficiently. As I say, I am trying to answer questions.

By Mr. Broker:

Q. I understand. Do you think any competitor of the TP&W would be interested in maintaining its line?

A. Insofar as the competition would be favorable to the competitor, yes.

Q. Do you know whether or not the Pennsylvania competes with the TP&W today?

A. No, sir, I don't know.

Q. Do you know whether the Santa Fe competes with the TP&W today?

[fol. 655] A. I don't know that, sir.

Q. If they did compete do you think it would be harmful for them to become owners of the TP&W?

A. If they removed the competition by becoming the owners then I would say it wouldn't be harmful.

Q. Suppose they continued that present competition, do you think that then it would be harmful?

A. I don't believe I can answer that, sir.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

Mr. Bagge: No, sir.

Exam. Albus: You are excused, sir. Thank you very much.

(Witness excused.)

Exam. Albus: Do you have another witness?

Mr. Bagge: At this time, if the Examiner please, I would like to suggest that we adjourn for lunch, if that is permissible. We are not entirely clear as to who can come in for this afternoon's session to testify.

Exam. Albus: We will take a recess until 2 o'clock.

(Whereupon, at 12:15 p.m., a recess was taken until 2:00 p.m. of the same day.)

[fol. 656]

AFTERNOON SESSION

2 p.m.

Exam. Albus: The hearing will please come to order. May we have the next witness, please.

Mr. Bagge: Mr. Matthews.

HARRY O. MATTHEWS was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Would you state your name, sir.

A. Harry O. Matthews.

Q. Where do you reside, Mr. Matthews?

A. 65 Longcommon Road, Riverside, Illinois.

Q. What is your business or occupation?

A. I am general manager of transportation and distribution for Armour & Company. In that position I am responsible for the routing of all traffic.

Q. Are you the chief traffic officer for Armour?

A. I am.

Q. Would you tell us briefly what your traffic experience has been and tell us about what traffic organizations of which you are a member.

A. I have been in my present position since January 1, 1952. Prior to that I was transportation manager for [illegible] years for Standard Brands, Incorporated, in New York.

Q. Are you a member of some national traffic organizations, committees?

[fol. 657] A. The Traffic Club of Chicago, the National Industrial Traffic League. I think that is all pertaining to traffic.

Q. Now, Mr. Matthews, would you describe briefly the location and the nature of the business which Armour performs.

A. Armour is engaged in several businesses, but primarily it is that of fresh meat and packinghouse products, which results in the slaughter of live animals on or near the Missouri-Mississippi River and the movement of the finished products to primary markets in the East.

Q. Would you describe a little more about the location of some of the branches of Armour's.

A. Our main plants are located, in addition to Chicago, at Kansas City, Missouri, St. Joseph, Missouri, Sioux City, Iowa, St. Paul, Minnesota, Fargo, North Dakota, Huron, South Dakota, and Grand Forks, North Dakota.

Q. Would you describe in a general way what might be characterized as your truck markets as compared to your rail markets would be markets we would reach with relatively short hauls where the products we manufacture are delivered direct to customers from our manufacturing or processing plants.

The rail markets are the ones where there is a much longer haul involved and where our products are transported from our manufacturing facilities to our branch houses in New England, New York and the Southeast, in general.

Q. Is Armour dependent to a large extent upon rail ser-
[fol. 658] vice for the distribution of your products?

A. It is.

Q. Would you describe the extent to which Armour uses the TP&W Railroad, either as an originating, terminating, or as an intermediate carrier?

A. Our use of the TP&W Railroad is essentially that of an intermediate carrier, what we call so-called "bridge service", that is, shipments originating beyond the western terminus of the TP&W Railroad, routed over its lines to

destinations east of the eastern terminus of the railroad. We have very little service originating on the railroad.

Q. I see. Now, for how long a period of time has Armour & Company been making such use of the TP&W?

A. To my personal knowledge, it was before I came, and I don't know how much longer before that, which was dated prior to January 1, 1952.

Q. What factors motivate Armour to route traffic via the TP&W?

A. Our primary use of any routing is for the most expeditious service of perishable goods. We have found it to our distinct advantage to use the routing via the TP&W from certain origins to certain destinations in order to take advantage of the more direct route and avoid the congestion of other gateways, such as Chicago.

Q. Does Armour have a plant located in the Peoria area or in the area served by the TP&W Railroad?

[fol. 659] A. We have a plant in Peoria.

Q. Would you describe that, please.

A. Actually there are two plants adjacent to each other, and they are on the P&PU Railroad insofar as direct service of that railroad is concerned. Those plants also ship products to these eastern primary markets, and in that case the TP&W is used as the first line-haul of that shipment.

Q. The TP&W is then used as an originating carrier in that connection?

A. In such case it is an originating carrier.

Q. Does Armour & Company generally specify routings?

A. Armour & Company specifies all routings.

Exam. Albus: How about junctions?

The Witness: The routing itself would, for the most part, insofar as I know, take care of the junction. If it didn't, the junction would be identified.

Exam. Albus: Thank you.

By Mr. Bagge:

Q. Well, in that connection, does Armour & Company specify junctions in connection with any traffic which you now move Rock Island, then TP&W?

A. So far as I know, they do. There might be an example in the case of so-called dead freight which did not, but perishables we do.

Q. And in such a route, which junction would be specified?

A. The junction at Lomax or Keokuk, whichever one applied.

[fol. 660] Q. I see. Mr. Matthews, have you seen a copy of the application which the Santa Fe and Pennsylvania Railroads have filed with this Commission?

A. I have.

Q. Are you in a general way familiar with the contents of that application?

A. Insofar as pertains to our business, I am.

[fol. 661] Q. What is your position and the position of Armours with reference to the application of the Santa Fe and Pennsylvania Railroads to acquire control of the TP&W?

A. We are in favor of it

Q. What specific reasons do you and does Armour have for supporting the applicants in this connection?

A. Both of the railroads involved are used a great deal by Armour & Company for originating and destination shipments, and we feel that such service is definitely to our advantage to have two roads such as that participate in the ownership of a bridge service such as the TP&W is for us.

Q. Now, you have stated that Armour ships products from Santa Fe origins to Pennsylvania destinations. Does Armour use the TP&W in connection with any other routings, Mr. Matthews?

A. They do.

Q. Would you describe that, please.

A. Well, routing from St. Paul by way of Rock Island, as an example—

Q. Yes, sir.

A. (Continuing) — to the appropriate western terminus, either Lomax or Keokuk—I am not familiar without looking at the map exactly which it is—would be used, and thence to the Pennsylvania at Effner, if it was a Pennsylvania destination, or to the other connections such as Peoria on the Nickel Plate or Shelton on the New York Central.

[fol. 662] Q. Do you utilize the services of any other western connecting carrier in shipping movements to the TP&W?

A. Yes, we have used the Burlington.

Q. And what junction do you specify in connection with the routing of Burlington-TP&W?

A. I believe we specify Peoria in that particular connection. It could be that we use others.

Q. Do you know whether or not you ever have occasion to use Keokuk in that routing?

A. We have, yes, for certain of our products.

Q. Now, in connection with your routing of movements from the TP&W to eastern carriers, what eastern carriers do you use in volume?

A. We use fairly well divided between the Pennsylvania, New York Central, Erie and Nickel Plate, with B&O participating for a sizable amount of our traffic.

Q. Is it fair to state, then, sir, that Armour & Company has a significant economic interest in the maintenance and preservation of the rail connections of the TP&W Railroad?

A. We have a definite interest in maintaining all the connections we use at present.

Q. In your opinion what effect would the granting of the application of the Santa Fe and Pennsylvania Railroads have on these rail connections which you have mentioned?

A. As I read the application it doesn't have any effect, [fol. 663] the gateway is to remain open to all connections, both ends.

Q. Why do you feel that?

A. It is stated in the application, as I read it, that the Santa Fe and Pennsylvania propose to leave these gateways open for free movement of all carriers to use them and all shippers.

Q. Are there any other reasons for your believing that these routes and gateways would be maintained?

A. I don't see how it could be otherwise, they'd have to be maintained, if the TP&W, operated as an independent road, further stated in the application, is to be a fact, in order to make it operative independently with free solicitation of traffic the gateways would have to be maintained.

Q. Are there any alternatives available to you as a
ipper having these routings in mind in the event that
e or any of these gateways were not maintained?
A. We have alternate routes we can use for almost all
the originating traffic.
Q. Would that include the routing from the Burlington
d Rock Island Keokuk to the TP&W?
A. Yes, we could route on the Rock Island-Burlington
rough Chicago if the gateway were not maintained for
m.
Q. Does that pertain also to the junctions you have
ntioned including the TP&W-Nickel Plate or New York
ntral?
A. That is right.
Q. Or any other connections in the East?
l. 664 A. All of those roads have eastern connections
Chicago.
Q. In view of that, Mr. Matthews, in your opinion do
u believe that there exists a need for the connecting
il carriers to have stock ownership in the TP&W to
aintain these connections?
A. No, I do not. It is our feeling that we would be best
rved by ownership such as proposed rather than a multi-
ownership. Our experience in gateway operation, such
this is, is that multiple ownership we have difficulty in
ving any one road assume responsibility to make the
eration work efficiently at all times. Where there is a
per cent ownership as proposed by these two roads,
e, we would not experience any difficulty.
Q. Mr. Matthews, what is the position of Armour &
mpany and your opinion with respect to the applica
n of the M&StL. Railroad to obtain control of the
P&W?
A. We would feel that there is a great possibility that
ce there is essentially duplicate service between Peoria
d the western termini that one of them is likely to be
andoned or certainly not promoted, and we therefore
ve objection to that application for that reason.
Q. Have you anything further to say, Mr. Matthews?
A. Only this, that our experience with the two roads,
ch as the two propose to purchase, has been such that

we receive the service and attention that we must have in [fol. 665] the shipment of products such as fresh meat, which is on a very close schedule, requires a very great deal of attention, and avoidance of delays. We feel that we get a service from these two roads in connection with this gateway that will be better than any of the other proposals that I know of that exists in that case.

Mr. Bagge: That is all I have of this witness, sir.
Exam. Albus: Cross-examination, please.
Mr. Wheeler.

[fol. 666] Cross examination.

By Mr. Wheeler:

Q. Mr. Matthews, don't you ship a substantial volume of your products over the M. & St. L.?

A. M. & St. L. originate traffic for us at Mason City.

Q. Would you describe that operation, your opinion at Mason City?

A. Mason City is one of our larger plants. They ship products largely east, southeast, and south. The routing of the traffic is to the junction point, the general routing of that traffic is to the junction point, about 18 miles from Mason City to the Illinois Central, thence to other roads, as may be necessary. There could be some northbound which the M. & St. L. would take on out.

Q. Northbound the M. & St. L. would take on out. What about your St. Paul plant, doesn't a fair amount of the product of that plant move out over the M. & St. L. lines to Albert Lea?

A. As far as I know we have no shipments from Albert Lea to St. Paul. If it is, it would be a very small percentage. The movements of our traffic from south St. Paul in volume of traffic is divided between six roads. On a weekly basis the M. & St. L. is not one of them.

Q. Is the Illinois Central one of those roads that participates in that movement?

A. In St. Paul?

Q. From St. Paul to Chicago.

A. The Illinois Central doesn't serve—

[fol. 667] Q. I understand; but you know the Illinois Central connects with the M. & St. L. at Albert Lea, do you not?

A. No, they do not participate in that movement at St. Paul to any consequence at all. There could be routing on it for emergency reasons, and there could be somewhat we class as dead freight or nonperishable freight, might be a better expression for it, on that routing. However, to my knowledge, there isn't. It would depend on destination.

Q. Does the M. & St. L. serve your Mason City plant exclusively?

A. Yes, sir.

Q. What kind of service do you get from the M. & St. L.?

A. Very good.

Q. Very fine?

A. Very fine.

Q. Mr. Matthews, are you familiar with the fact that the M. & St. L. application just as the Pennsylvania-Santa Fe application provides that all existing routes, gateways, shall remain open?

A. I am not familiar with the exact wording of it. I understand it could be so ordered.

Q. Have you ever found in your dealings with the M. & St. L. that they failed to keep their word? Would you have any reason to doubt a statement made by the M. & St. L. to the Commission in good faith?

A. I haven't had any occasion.

[fol. 668] Mr. Wheeler: I have nothing further.

Exam. Albus: Thank you.

Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Matthews, I understood you to say one of the things you are interested in is the preservaion of all your connections on the T. P. & W. as at the present time?

A. That is right.

Q. And you'd like the service, the neutral service today, no particular connection favored over another, isn't it?

A. I don't know that neutral is exactly what we mean. We are interested in all connections, gateways, remaining as they are today, open to us.

Q. And the T. P. & W. today does not prefer any particular connection or gateway over another, does it?

A. Not that I know of. T. P. & W. today are independent and solicit for traffic over their railroad, and as I understand it they will continue to do so under this application.

Q. And that present situation is one of the things you want preserved, isn't it?

A. That is right.

Q. Incidentally, your service over the T. P. & W. is satisfactory today, isn't it?

A. Yes.

Q. And you don't see any reason why that should de- [fol. 669] teriorate if they should remain as a separate corporation and nobody bought them, do you?

A. No.

Q. So there isn't any need to approve the transaction in order to give you the service you need?

A. I start with the understanding that the T. P. & W. were to be sold.

Q. Assuming it wasn't sold at all, it doesn't have to be sold, in order to give you the service you want, does it?

A. Not that I know of.

Q. I believe you said in your direct examination that you used both the Santa Fe and the Rock Island in connection with the shipments which move over the T. P. & W. through the western gateways of Keokuk and Lomax, isn't that right?

A. That is right.

Q. As a matter of fact, you use those two railroads equally, don't you?

A. Not through that gateway. It depends on the originating point. The Santa Fe, for example the Santa Fe and Rock Island do not originate traffic for us to St. Paul, the Rock Island does and the Santa Fe does not.

Q. As to, for instance, your Kansas City-St. Joseph operations, you have them at those two points, don't you?

A. That's right.

[fol. 670] Q. I believe both carriers participate about equally on the traffic that comes out of those points and doesn't that go through Keokuk and Lomax?

A. Not all of it. I can't tell you exactly how that is routed daily. It is my recollection at this time that the Rock Island traffic is routed through Chicago mostly, at this time, out of those plants. Also it is my recollection that they do not participate equally in those particular plants. Would you mind my clarifying that just a little?

Q. Not at all.

A. There is a pattern of traffic routing of which all plants are taken in consideration and all of our regular carriers we use. When one plant is pinpointed or two, it isn't quite fair to all the roads participating because it highlights one over the other and any plant taken and any road taken would receive the same treatment.

Q. I see. Perhaps I can make what I am getting at more definite by reframing my questions in this way: Isn't there about an equal volume of freight coming off the Santa Fe for you through Lomax as that from the Rock Island through Keokuk?

A. I think there is more from the Santa Fe.

Q. Isn't the Rock Island an important connection to you, railroad to you, in connection with the T. P. & W. service?

A. Yes.

Q. Would you like to see that service retained in its [fol. 671] present volatile form?

A. Yes, that is the point I make, gateways open to all routings.

Q. Don't you believe that the Rock Island would be as interested as the Santa Fe in maintaining the route east of the western terminus as from Keokuk or from Lomax in operation?

A. In my opinion the interest depends on the percentage of ownership involved.

Q. Well, apart from the percentage of ownership involved, assuming they both had the same per cent, whether that was a hundred per cent or fifty per cent, wouldn't the reaction of the two railroads so far as you can see be about the same?

A. If it were not less than 50 per cent, I think it probably would.

Q. And you would have no objection to the Rock Island if it was to have 50 per cent?

A. I don't think so, except that it is not as great a traffic carrier to us at that point as the Santa Fe is.

Q. It isn't as big a railroad as the Santa Fe?

A. That is correct.

Q. Then would it be fair to state from that that, generally speaking, you have no particular objection to the Rock Island as such, and you think it could do an equally good job as the Santa Fe?

A. From what I know I think they could. I would like to qualify. You see, we deal with all railroads in our [fol. 672] efforts to move our traffic, all of the larger roads particular, the western roads participate in it, and we do our best to treat them all fairly commensurate with the service they offer us and time schedules, and so forth. I have no knowledge of the ability or inability of the Rock Island to perform in connection with our question.

Q. So it is not on that account in any event that you have taken the position you have?

A. That is right. I am concerned on a 50 per cent ownership at least.

Q. And your only reason on that is that you think that a carrier with something less than 50 per cent wouldn't have its whole heart in it, is that it?

A. That's been our experience in the Chicago Gateway.

Q. How about the T. & P. U. here in Peoria?

A. We originate such a small amount of rail traffic out of here that we haven't had any—

Q. Isn't it used as a connecting carrier on some of your traffic?

A. I don't believe it is. It originates at our plant and delivers to a line haul carrier. It is a T. P. & W., and it could be, for example, the big four.

Q. Do you have any operations that get as far east so that you would use the Richmond, Fredericksburg and Potomac Railroad?

A. We may have. That is not a normal routing, north [fol. 673] and south at the eastern seaboard, it is not a

normal traffic routing for us. No doubt there is traffic moving over it.

Q. Do you know anything about that railroad?

A. I only know that it is jointly owned by several railroads, and I don't know how many.

Q. That is an efficiently operated railroad, isn't it?

A. So far as I know.

Q. Now, this carrier that you talk of that you have had some not entirely satisfactory, at any rate, experience, that is a terminal carrier, isn't it?

A. It is the harbor.

Q. Isn't that a terminal carrier?

A. As far as we are concerned it is a bridge carrier between the western and eastern railroads.

Q. It doesn't have any line haul operations, though, does it?

A. I don't believe they are classed as line haul, but they are used as a connection.

Q. Just within the Chicago terminal area, isn't it?

A. I believe that is right.

Q. So to that extent it is different from the T. P. & W., isn't it, which is a line haul carrier going across the State of Illinois?

A. It performs the same service for us.

Mr. Cassell: That is all.

Cross examination.

[fol. 674] By Mr. Broker:

Q. You think the interest a carrier has on a particular line depends, then, upon the percentage of ownership?

A. That is the position I take, yes, sir.

Q. And that would hold true for any railroad, including the applicants?

A. That is the position I take.

Q. Now, the applicants, let's take the Pennsylvania has alternate routes, too, just as much as any other carrier, isn't that so?

A. That is right.

Q. At St. Louis and at Chicago?

A. That is right.

Q. And the Santa Fe has the same alternate route, doesn't it, to Chicago?

A. That is right.

Q. And they have 100 per cent interest in those lines, don't they?

A. Yes. You mean as far as the line haul carrier is concerned to Chicago, for example?

Q. To a particular gateway, that is right.

A. That is right.

Q. You ship to New England, of course?

A. Yes, sir.

Q. You ship all over the United States?

A. Yes, sir.

Q. And in movements to New England do the cars move [fol. 675] over the L. & H. R., Lehigh and Hudson River?

A. Yes, there are some movements in there to certain of our destinations. I couldn't tell you what the final destination is that we use them on.

Q. You don't have any particular trouble with that route do you?

A. No, because the volume used over it is not in any way comparable in so far as we are concerned.

Q. To the T. P. & W.?

A. That is right.

Q. But to the extent that you use it it is an efficient railroad?

A. Yes, there are very few cars involved in it.

Q. Now, this local traffic that comes out of Peoria from the P. & P. U., is that all routed east over the T. P. & W.?

A. Pretty generally that's true. There could be on the southeast, it could go out over the big four to Indianapolis and Cincinnati.

Q. And the bridge traffic that comes from the west, that could move over numerous combinations, say, Santa Fe, Effner, P. R. R., or Santa Fe, T. P. & W., Peoria and Nickel Plate?

A. That's right.

Q. And those routes are reasonably efficient, aren't they?

A. That's right.

Q. And they worked out—let's take the Nickel Plate route via Peoria—a very close schedule, too, aren't they?

[fol. 676] A. That's right.

Q. So the Nickel Plate would be very much interested, wouldn't it, in maintaining that close tight schedule and the service on the T. P. & W.?

A. That is correct.

Mr. Broker: That is all.

Mr. Carr: May I ask a question, Mr. Examiner?

Exam. Albus: What is your name, sir?

Mr. Carr: C. A. Carr.

Exam. Albus: Yes, sir.

Cross examination.

By Mr. Carr:

Q. Do you have a plant in South Dakota?

A. Yes, sir.

Q. Do you ship in carload lots east of Chicago?

A. Yes, sir.

Q. Do they go through Chicago or Peoria?

A. They go through Chicago.

Q. They do not go through Peoria?

A. No. The plant is served exclusively by North Western Railroad.

Q. You don't ship Great Northern?

A. Not out of there.

Q. Do you ship dairy products in carload lots to the east coast?

A. A limited amount by comparison, yes, sir.

Q. And those go through Chicago?

[fol. 677] A. I wouldn't say for sure that all did. They generally would, yes, but there could be routing through Peoria of those dairy products that come out of some of those creamery locations in South Dakota and Minnesota.

Mr. Carr: Thank you.

Exam. Albus: Are there any other questions of Mr. Matthews?

(No response.)

Exam. Albus: Apparently not. You are excused, thank you very much, Mr. Matthews.

(Witness excused.)

[fol. 678] Mr. Hunter: I will call Mr. Dale Tammen.

DALE W. TAMMEN was sworn and testified as follows:

Direct examination.

Exam. Albus: May we have your full name, please.
The Witness: **Dale W. Tammen.**

By Mr. Hunter:

Q. And where do you reside?
A. At LaHogue, Illinois.
Q. Where is LaHogue?
A. That's about 80 miles east of Peoria.
Q. What is your business?
A. I am owner and operator of a grain business.
Q. Would you briefly describe the nature of your grain business.
A. Well, I buy and sell grain from farmers on a brokerage basis.
Q. And whom do you sell the grain to?
A. Well, I sell to different brokers, most of it—well, I said most of it, part of it moves east and some of it moves into Peoria.
Q. What railroad are you served by, Mr. Tammen?
A. The TP&W.
Q. Do you have any other rail service directly?
A. Not directly, no, sir.
Q. Is there any other railroad in LaHogue?
A. No, sir.
[fol. 679] Q. Approximately how many cars a year do you ship?
A. Oh, approximately a hundred.
Q. When you ship the cars do you specify the routing?
A. Not generally.
Q. Is a routing specified?
A. Sometimes. Sometimes I do send it, most generally, I should say, I send it by the way of the buyer.

Q. What routes are generally used by you in your principal movements?

A. Well, it would only be the TP&W coming into Peoria, and moving east, why, it is the New York Central and the Pennsylvania.

Q. Do you have any other substantial rail shipments, other than those you have just described?

A. No, not too many. I do ship a few to Chicago.

Q. How long have you been in this business?

A. In LaHogue I have been in business since 1946.

Q. Were you ever in the grain business in any other location?

A. Yes, sir.

Q. Where was that, and for what years?

A. Well, I was—when I started in the grain business I was in Gilman for nine years, and from there I was at my present location for three years, and in 1942 I was at Oakland, Illinois.

Exam. Albus: Is Gilman in Illinois?

The Witness: Yes, sir.

[fol. 680] By Mr. Hunter:

Q. What rail lines were you served by in Oakland?

A. The Pennsylvania and the Nickel Plate did run through Oakland.

Q. Has your service by the T. & W. been satisfactory?

A. Very, outside of a few times when cars are short.

Q. Was your service by the Pennsylvania satisfactory in Oakland?

A. Very good.

Q. Mr. Tammen, have you read the application of the Santa Fe and Pennsylvania Railroads in this case?

A. Part of it, sir.

Q. Are you familiar with it?

A. Well, I know they are applying to purchase it.

Q. As a shipper, are you interested in that application?

A. Well, I would think so.

Q. What is your position relative to that application?

A. Well, as my stuff moves east, why, I would be more or less interested in the Pennsylvania, as quite a little bit of mine is routed that way, to Indianapolis.

Q. What reasons do you have for favoring the application of the Pennsylvania and Santa Fe Railroads?

A. Well, I suppose we all have selfish reasons. I would think that boxcar situation, why, we may have a chance to get a few more boxcars.

[fol. 681] Q. Does your previous experience with the Pennsylvania Railroad lead you to that conclusion?

Mr. Broker: I object. That is kind of remote, isn't it?

Exam. Albus: He can tell why he has that opinion.

Mr. Broker: All right.

A. Well, we receive quite a few cars from, load Pennsylvania cars, and being on the east end, why, I would think they would serve some back to the TP&W, in the past, because they get the haul to Indianapolis.

By Mr. Hunter:

Q. Have you had occasion, Mr. Tammen, to contact the general offices of the TP&W in Peoria?

A. A few times.

Q. What occasions were those?

A. Boxcar shortages.

Q. Did it do you any good?

A. Yes.

Q. Was it convenient for you to be able to contact the general office?

A. Yes, it has been.

Mr. Lucas: Mr. Examiner, may I ask a question off the record.

Exam. Albus: Yes. Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

By Mr. Hunter:

Q. Mr. Tammen, going back, are cars which leave your [fol. 682] elevator actually routed when they leave the elevator?

A. Sometimes. Most of the time.

Q. Are those routings in accordance with shippers' in-

structions or receivers' instructions?

A. Receivers' instructions.

Mr. Hunter: No further questions.

Exam. Albus: How was the contact made with the general offices of the TP&W?

The Witness: By telephone.

Exam. Albus: Cross-examine, please. Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. Mr. Tammen, did you see the application of the M&StL filed in this proceeding?

A. No, I didn't.

Q. Did you make a study of the car-ownership of the Pennsylvania Railroad?

A. No, I didn't.

Q. Or the Santa Fe?

A. No, sir.

Q. Or the M&StL?

A. No, sir.

Q. Did you attempt to determine their relative car shortages during the last several years?

A. Well, I guess they didn't have enough cars.

Q. But you didn't make any particular effort to determine that?

[fol. 683] A. No.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Tammen, just to have it located, LaHogue is about 35 miles west of Effner?

A. How many miles?

Q. Thirty-five or thereabouts.

A. Thirty-five?

Q. Thirty-five.

A. I would say about that.

Q. And Gilman is just east of LaHogue?

A. Right.

Q. What was the other town you spoke of and where is it located?

A. Oakland, Illinois, in the southern part of the state.

Q. How big a town is LaHogue?

A. Well, I suppose about 70 people live there.

Q. Your elevator is the only railroad shipper in town, isn't it?

A. That is right, sir.

Q. One of the things you are interested in is the retention of these offices that you can call up over here in Peoria?

A. I would think so, yes, close at hand.

Q. A setup that has those offices available to you is what you want, isn't it?

[fol. 684] A. That's right.

Q. And I take it that you are not interested in the service west of Peoria, is that right?

A. That would be right.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. Do you know if the Nickel Plate becomes a part owner it will propose to keep those offices in East Peoria?

A. No, sir, I don't.

Mr. Broker: No other questions.

Exam. Albus: Are there any further questions?

Mr. Wheeler: May I ask one question?

Exam. Albus: Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. I understand you contact these offices by telephone. Mr. Tammen.

A. I have, yes.

Q. That is your usual method of communicating with them?

A. No, not too often in the Peoria office because we have a local agent.

Q. Mostly you contact the local agent?

A. Mostly, yes.

Mr. Wheeler: No further questions.

[fol. 685] Exam. Albus: Are there any further questions?

Mr. Hunter: No, sir.

Exam. Albus: Apparently not.

You are excused, Mr. Tammen. Thank you.

(Witness excused.)

Exam. Albus: Next witness, please.

[fol. 686] ALBERT STAMPER was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Would you state your name, sir?

A. Albert Stamper.

Q. Where do you reside, Mr. Stamper?

A. Burlington, Iowa.

Q. What is your business or occupation?

A. I am vice-president and general manager of Interstate Wholesale, Incorporated.

Q. Would you describe briefly what Interstate Wholesale, Incorporated is?

A. It is a wholesale lumber concern, brokering lumber direct from mills in the Pacific Northwest, and also carrying inventory for retail lumbermen and industry in the market of these locations being in East Peoria, Illinois, Fort Madison, Iowa, and Bettadorf, Iowa.

Q. How large an area do you serve in the wholesale marketing of lumber?

A. Approximately 75 miles surrounding each of the locations which I have named.

Q. Would you describe briefly the manner in which you are dependent on rail service in the operation of your business?

A. One hundred per cent.

Q. Would you describe that briefly?

[fol. 687] A. Our lumber originates in the Pacific Northwest, which makes it 100 per cent—it is necessary for us to ship all this lumber in boxcars to the market we serve and our yards.

Q. Would you describe to what extent Interstate Wholesale utilizes the services of the T. P. & W. Railroad, either as an originating, terminating or bridge carrier?

A. With our plant located in East Peoria a good bulk of our or all of our inventory shipped into this market to be distributed to retail lumbermen is unloaded in East Peoria.

Q. I see.

A. Of course there are some retail lumbermen east of Peoria and west of Peoria which is served by the T. P. & W. points.

Q. Now, I take it that there are other available routes for getting this merchandise to your plant at East Peoria, is that correct?

A. Yes, there is.

Q. What factors motivate you to route this over the T. P. & W.?

A. Primarily because we are located on the—not primarily, because we are located solely on the T. P. & W. Railroad, served solely by the T. P. & W. Railroad.

Q. Now, is it a fact, however, that to get your merchandise to that warehouse that you can use other railroads to each of them?

A. That is correct.

Q. For the line haul, is that correct?

A. That is correct, sir.

[fol. 688] Q. Are you familiar with the application of the applicants in this proceeding, the Santa Fe and Pennsylvania Railroads?

A. Yes, somewhat.

Q. You have availed yourself of having read portions of it?

A. Yes, sir.

Q. Would you state what your position and the position of Interstate Wholesale is in connection with the application of the Santa Fe and Pennsylvania Railroads to acquire the TP&W?

A. We are familiar with operations of the Santa Fe Railroad and their efficiency in which they operate. Service with us is a great factor. We know what the Santa Fe can do. Again we feel that if this application were granted it would be of great service to our organization, it would be helpful, very helpful.

Q. In other words, I take it, that your position in this proceeding is in favor of it because you feel that this would serve your needs, is that correct?

A. That is right, and possibly open up some new markets east of Peoria for us on an outbound transit arrangement, out from Peoria.

Q. Would you describe that, please.

A. Loading cars of 36,000-pound minimum possibly and serving retail lumbermen, oh, in western Indiana possibly. If something like that could be instigated here, and this application were granted, it could very possibly open a new market for us.

[fol. 689] Q. It is something, I take it, which hasn't happened before, is that correct?

A. That is correct.

Q. You stated that there are other alternative routes available to you. Would you describe what routings you use in connection with movements moving to the TP&W Railroad? Let's take a car of lumber from the west.

A. All right. From an area south of Portland it generally moves, the lumber generally starts on the Union Pacific or Southern Pacific Railroad, and they will pull it to the Mississippi River, or their junction points, excuse me, their junction points, at which time it generally comes into the Peoria market via the Santa Fe or the CB&Q Railroad, and from there via the TP&W to East Peoria.

Q. I take it, therefore, that you are interested in maintaining and preserving this gateway at Keokuk, is that correct?

A. It has been very satisfactory.

Q. Are you interested in maintaining it in its present form?

A. Yes, sir.

Q. And you have a direct interest in that, do you?

A. Yes, sir.

Q. What effect do you believe the granting of the application of the Pennsylvania and Santa Fe Railroads will have if they are granted ownership of the TP&W on the maintenance of the Keokuk gateway?

[fol. 690] A. I feel that it will, as I have stated, under Santa Fe management will be—the management will be improved, consequently service will be improved, new industry will probably be drawn to the territory, which will be of help to the area.

Q. Are you interested in that factor?

A. Being in the building material business we are very interested, yes, sir.

Q. Would you go on? I didn't mean to interrupt you.

A. The Lomax gateway tying in with the Santa Fe and TP&W is of great value to us. We balance our inventory in that manner, and again the Keokuk gateway is of value.

Q. Do you believe or is it your opinion that if this application were granted that service via the Keokuk gateway would be affected in any way detrimentally?

A. No.

Q. Why do you say that?

A. Well, again, the service which the Santa Fe Railroad can afford and the way their cars are handled we would always know where our cars were located, and it would be of great help to us.

Q. Is there a possibility that you would use alternative routes if this gateway were not maintained?

A. Yes, there is.

Q. Would the TP&W participate in such a routing?

A. No.

Q. Would the Santa Fe derive any revenue if you used [fol. 691] an alternative routing?

A. No.

Q. Would the Pennsylvania derive any revenue if you used an alternative routing?

A. No.

Q. Is it fair to say, then, that it is to the self-interest of the applicants to maintain that gateway?

A. I would say so, yes.

Mr. Bagge: That is all I have of this witness, sir.
Exam. Albus: Cross-examine, please.

Cross examination.

By Mr. Wheeler:

Q. Do you believe the Lomax or Keokuk gateway will be closed in the event the Santa Fe-Pennsylvania application is denied?

A. No, I wouldn't think so, no.

Q. Do you request the routing on this lumber that is coming east to you or is that routing given by the shipper?

A. We never request it—the only thing we request is final destination, generally.

Q. So that it is immaterial, really, to you whether it goes over the Q or whether it goes over the Santa Fe, is that correct?

A. No, I generally see to it that there is a fair amount of distribution.

Q. But your service over the one is about as good as it is [fol. 692] over the other, is it?

A. Yes.

Q. Have you seen the application of the M&StL in these proceedings?

A. No, sir.

Q. Do you have any business from the Pacific Northwest, that is, any shipments of lumber come in via Minneapolis, the Minneapolis gateway?

A. Yes, we do.

Q. How does that come into the TP&W?

A. Generally by the CB&Q, sir.

Mr. Wheeler: No further questions.
Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Stamper, you said most of your shipments originate in the Pacific Northwest?

A. Yes, on the Pacific Coast, the lumber producing areas out there, yes, sir.

Q. That is north of California, isn't it?

A. That is correct.

Q. Now, I specifically ask as to shipments coming into Peoria. Most of those are routed over the Burlington, aren't they?

A. From California?

Q. Well, immediately prior to the TP&W.

A. Will you state your question again?

[fol. 693] Q. As to those shipments from the Pacific Northwest that you have been mentioning, which are destined to your East Peoria location, and are delivered by the TP&W, as I understand they all are, isn't that so?

A. Yes, they have to be.

Q. Don't practically all of those come into the TP&W via the Burlington?

A. Coming out of northern Washington, Idaho, and Montana, there is no other way to get in here.

Q. How many cars would you say you ship a year or what percentage of your shipments into Peoria have any, and I am speaking only of Peoria, either in percentage or number of cars, either way you wish to express it, have any Santa Fe routing?

A. Do you want a percentage figure?

Q. Yes, of the cars that are destined to Peoria?

A. Twenty per cent.

Q. Where does the Santa Fe get a haul on those Pacific Northwest cars?

A. They get very little, they just can't.

Q. Where would their junctions be?

A. Well, I am not much of a railroad man. We have a traffic department. You ask where the junction points coming out of what region now?

Q. Well, your lumber in the Northwest.

A. You are talking about Washington and Oregon?

[fol. 694] Q. Yes, that is where you said it came from.

A. Well, Kansas City, Denver, whenever possible.

Q. Do you ever use the Rock Island on those shipments?

A. No, we never have.

Q. Do you know why not?

A. Well, when this lumber is rolling we try to keep it going to junction points on railroads where we can serve the market where our salesmen are traveling and we are consequently tied down because of that.

Q. Then it is a question of marketing that influences your routing?

A. Marketing is a big factor, yes, sir.

Q. You mentioned you would like to have some sort of a transit arrangement here in Peoria. Couldn't that be effected with the present railroad facilities you have today with the TP&W?

A. It hasn't been satisfactorily.

Q. I mean there is nothing physically that has to be done, you don't know of any new facilities that is going to be put up?

A. Not as far as I know.

Q. It is just a question of somebody making the decision, isn't that it?

A. Possibly.

Q. Have you been told that if the Santa Fe gets control they will put in that transit arrangement?

[fol. 695] A. No, but they are pretty aggressive people as far as I know.

Q. Aren't the TP&W aggressive?

A. To a certain extent.

Q. We have heard a good deal about their management here, don't you consider it a well managed railroad?

A. Yes, I do.

Q. You said one of the things you were interested in seeing the management improve, now, just what is lacking with its present management that you think ought to be improved?

A. Well, not being a railroad man I wouldn't want to make any suggestion—

Q. (Interrupting) Well, just what is lacking with its present management that you think ought to be improved?

A. Well, it is important that you know when your cars are going to get to your yard. Unloading of lumber is quite a factor. If we would be advised of where these cars are at all times, we know about what time they are going to be in the yards, it helps us to get them unloaded.

Q. Doesn't the TP&W do that for you?

A. Oh, we have never asked them to.

Q. If you do, couldn't they?

A. I suppose, yes, I suppose they have facilities for that.

Q. Then you don't need to have this transaction approved to trace your cars, then, do you?

A. Oh, no, not wholly, not entirely.

[fol. 696] Q. What else do you need it for?

A. Well, our general office is in Fort Madison, Iowa. We have had a lot of dealings with the division point in Fort Madison. By our general office being there it would be awful easy for us to pick up the phone in our own home town and ask where our car was, and whether it was east or west of the Mississippi River, it would make a difference, they could probably tell us right then.

Q. It is because of your location in Fort Madison, then, that you would like to see this approved, is that it?

A. That is one of the factors.

Q. Who serves Keokuk today, the Santa Fe?

A. No, sir.

Q. What railroads do?

A. CB&Q and TP&W.

Q. Did you ever hear of the Rock Island?

A. Yes.

Q. Now, I was interested in your statement that you thought that the tracing services of the Santa Fe and so on would help out Keokuk. The Santa Fe doesn't serve Keokuk, though, does it?

A. I don't quite get your point.

Q. I didn't get yours. That is why I am asking the question. You said something about Keokuk and the Santa Fe. I didn't know the Santa Fe had anything to do with Keokuk

[fol. 697] A. They don't have.

Q. What did you mean to imply that would happen to Keokuk in regard to the Santa Fe?

A. Well, we use Keokuk via the—

Q. (Interrupting) Burlington?

A. (Continuing) —Burlington Railroad.

Q. Well, then, what would the Santa Fe have to do with Keokuk?

A. Absolutely nothing.

Q. You are over in East Peoria on the TP&W?

A. That is right.

Q. Isn't the reason why you get all your deliveries by the TP&W—is there any reciprocal switching available to you in East Peoria?

A. Yes—no, no; there isn't.

Q. There is not? If you came in over any other railroad then you would have a penalty on your rate, isn't that right?

A. Yes.

Q. Doesn't that influence your routing?

A. TP&W routing?

Q. Yes.

A. Yes, it does.

Q. Whose property are you located on over in East Peoria?

A. TP&W property.

Q. Do you know what the proposal of the Rock Island is in this proceeding?

[fol. 698] A. No, I don't, sir.

Q. Has anyone ever discussed that with you?

A. No, sir.

Q. Who talked to you about this case?

A. Oh, I have talked to Mr. Hemphill and Carl Bagge.

Q. Did they tell you anything about the Rock Island's position in this case?

A. No, they didn't.

Q. Then you have no opinion in regard to what the Rock Island might or might not do?

A. No, I haven't.

Mr. Cassell: That is all.

Cross examination.

By Mr. Broker:

Q. Would those same answers apply to the Nickel Plate?

A. We don't have any reason to use the Nickel Plate to a great extent. I don't know a great deal about it.

Q. You don't understand, though—let me put it this way. You said you were interested in Santa Fe control because it would improve the tracing of cars, is that what you said?

A. Yes, that would be one of the factors that would certainly help, I would think.

Q. Haven't you read their representations that this will be operated as an independent railroad?

A. Yes, I have.

[fol. 699] Q. If it is independent, how does the ownership come into play in tracing the cars?

A. Well, it is hoped that possibly some changes can be made to improve the situation.

Q. Do those changes need to be made on the TP&W or on the Santa Fe?

A. Well, I would say on the TP&W, definitely, because of its location.

Q. What it comes down to, then, to shorten this, is that you would like to see the Santa Fe management come in, is that right?

A. I can't help but think it would improve.

Mr. Broker: Thank you.

Exam. Alous: Are there any further questions?

Mr. Wheeler: Yes.

Further cross examination.

By Mr. Wheeler:

Q. How many cars did you receive in your East Peoria yard last year?

A. Oh, about 240, sir.

Q. Do you know how many cars of Interstate Wholesaler's, destined Interstate Wholesaler's came east over the M&StL?

A. It would be a guess, sir, and I wouldn't venture a guess. I wouldn't know, not being involved in the routing where the shipper routes.

Q. Would your service over the M&StL be with a par of [fol. 700] the services you have received on other routings?

A. I do know that there has been little or none go over the M&StL, so I wouldn't know, but I know it is a good railroad.

Mr. Wheeler: I have no further questions.

Further cross examination.

By Mr. Broker:

Q. I am not sure that this question was answered, although I believe it was asked, have any of the applicants held out that you would receive a transit at East Peoria?
A. Absolutely not.

Mr. Broker: That was my understanding.
Thank you.
Exam. Albus: You are excused, Mr. Stamper. Thank you, sir.

(Witness excused.)

[fol. 701] Exam. Albus: Next witness.
Mr. Bagge: May I call Mr. Roark, Mr. Examiner.

James R. Roark was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Would you state your full name, please.
A. James R. Roark.
Q. Where do you reside, Mr. Roark?
A. Bushnell, Illinois.
Q. What is your business or occupation?
A. I am a partner in a men's and boys' clothing establishment.
Q. Do you hold any offices in a civic organization in Bushnell?
A. I am President of the Chamber of Commerce in Bushnell.
Q. Would you tell us something about the Chamber of Commerce in Bushnell.
A. The Chamber of Commerce in Bushnell attempts to improve the customer and the business relations with the farmers, with industries, and attempts to bring new industries to town and just more or less oversees the, well, the whole setup of the town.

Q. Have you anything to add to the comments—Mr. Bertolino made reference to the fact that he sounded like a chamber of commerce—do you have anything to add to that speaking, as president of the chamber of commerce of Bushnell?

A. Well, nothing except we would like to see more industry come to town, and we feel that we have the pos- [fol. 702] sibilities there for the labor situation and the land available for industry.

Q. In your opinion, would the granting of the application of the Santa Fe and Pennsylvania Railroads—

Mr. Broker: (Interrupting) Excuse me. Why don't you put it this way, what would be the effect of the granting of the application. I object to the leading question.

Mr. Bagge: All right, sir.

Exam. Albus: Objection sustained.

By Mr. Bagge:

Q. What would be the effect on your organization of granting the application of the Pennsylvania and Santa Fe Railroads to acquire control of the TP&W Railroad?

A. We feel, as an organization, I feel personally, that more or less the merger—it is not called a "merger", I know, but the joint purchasing of the TP&W Railway by the Santa Fe and the Pennsylvania Railways will help to further the TP&W Railroad, make a better railroad of it.

Q. Would it do anything beyond furthering the TP&W Railroad?

A. Well, I believe with more or less a transcontinental hookup there between the two large railroads, the Santa Fe and the Pennsylvania, with the bridge on the TP&W, that it would help to establish trade both east and west.

Q. From Bushnell?

A. Yes.

Q. Has your organization taken a position in connection with this application?

A. Last October, I believe it was, that the Chamber went [fol. 703] on record as saying, at a regular meeting, that they favored the sale of the railway to the Santa Fe and the Pennsylvania.

Q. And did they authorize you to intervene in this proceeding at that time?

A. At that time, why, I was not president, but it was voted that we would intervene.

Q. And you did file an intervening petition, is that correct?

A. That is correct.

Q. What position does your organization, the Bushnell Chamber of Commerce, take with respect to the application of the M&StL Railroad to acquire control of the TP&W?

A. Well, we feel that, being that the two railroads, the Santa Fe and the Pennsylvania, hook on to both ends of the TP&W, that they would do all in their power to maintain the railroad and expand it and improve it.

Q. Let me restate my question. What position has your organization taken with respect to the application of the M&StL to acquire control of the TP&W?

A. We did nothing—there was no action taken on the M&StL, other than we did desire that the Santa Fe and Pennsylvania purchase the railroad.

Mr. Wheeler: I object.

Exam. Albus: Proceed.

Mr. Bagge: I was about to say—

By Mr. Bagge:

Q. Was the—

[fol. 704] Mr. Broker: He said his organization took no position, period.

Mr. Bagge: And I am trying to—

By Mr. Bagge:

Q. In taking this action, Mr. Roark, did the members of the organization consider the position of the M&StL Railroad?

Exam. Albus: He may answer that.

A. It was discussed at the meetings that the M&StL, the Rock Island and the Nickel Plate were also desirous of

buying the TP&W, and even after discussion we felt that the Santa Fe and the Pennsylvania were the best railroads to have it.

Q. And that information was available to you, was it, when you took this action?

A. Well, it has been discussed off and on since last October, yes.

Q. In your discussion concerning the possible ownership of the TP&W by the M&StL, what position did your organization take in those discussions?

Mr. Wheeler: I object. This is repetition.

Exam. Albus: That has been answered. They have taken no position, he said.

Mr. Bagge: All right, I will withdraw the question.

Exam. Albus: Is that correct, Mr. Roark?

The Witness: We just felt it was better that the Santa Fe and the Pennsylvania acquire the railroad.

[fol. 705] Exam. Albus: In other words, we didn't pass a resolution against that.

The Witness: No, we did not.

By Mr. Bagge:

Q. Is it fair to say that on the basis of your—

Mr. Wheeler: I object.

Exam. Albus: Sustained.

Mr. Bagge: That is all. Thank you, Mr. Roark.

Cross examination.

By Mr. Wheeler:

Q. Mr. Roark, did you have the application of the M&StL before you or before your organization when you passed the resolution in October of 1954?

A. We did not.

Q. Did you have the application of the Santa Fe-Pennsylvania before you when you passed that resolution?

A. We did not.

Q. What did you have before you?

A. We had just the knowledge from the newspaper and so forth that the Santa Fe was attempting to buy the TP&W.

Q. What newspaper?

A. I don't recall that. It was in the Peoria, the Macomb, the Chicago paper.

Q. And on the basis of those newspaper stories you took your action, is that correct?

A. Well, it was fully discussed.

Q. You mean the articles were fully discussed?

[fol. 706] A. Well, the proposition of the Santa Fe buying the TP&W Railway.

Q. Did you understand what the provisions of the agreement between the Santa Fe and the Pennsylvania and the trustees of the McNear estate were?

A. No, we didn't have the application at that time. But it was understood that the McNear estate desired that the Santa Fe buy it.

Q. Supposing the Santa Fe and the Pennsylvania had been buying it in order to abandon it because it was competitive with another route, would your association of commerce have taken the same position?

A. No.

Mr. Wheeler: I have no further questions.
Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. At the time you took your action with the chamber of commerce did you have—what was the source of your information about the Rock Island?

A. The Rock Island, the Santa Fe and the Pennsylvania were the only ones that were brought up at that time—they came in later.

Q. You had no information about the Rock Island, then, at that time?

A. No.

[fol. 707] Q. Then, your chamber has taken no position in regard to the Rock Island, has it?

A. It has been discussed, and that is all.

Q. It has taken no position?
A. No.
Q. You don't make any carload shipments in your own business, do you?
A. No.
Q. You have no use for carload shipments at all by rail?
A. No, sir.
Q. Your merchandise all comes in by truck?
A. Yes, it does, by truck and parcel post and express.

Mr. Cassell: That is all.
Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. Did your organization take a position in respect to the Nickel Plate?
A. No, sir.

Mr. Broker: No questions.
Exam. Albus: Any further questions?

(No response.)

Exam. Albus: You are excused, Mr. Roark.

(Witness excused.)

[fol. 708] Mr. Lucas: I will call Mr. McKey.

Paul W. McKey was sworn and testified as follows:

Direct examination.

By Mr. Lucas:

Q. Mr. McKey, will you state your name and your residence for the record, please?
A. Paul W. McKey, Gridley, Illinois.
Q. Are you engaged in some business capacity at Gridley, Illinois?
A. Yes, sir, in the grain.
Q. In what capacity, please?
A. Grain business. We operate a grain elevator.

Q. And in addition to the business that you carry on there are you a representative of the village of Gridley?

A. I am one of the village trustees.

Q. What is the setup of the administration of the village of Gridley? Is there a mayor and a board of trustees?

A. There is a mayor and six trustees.

Q. And you are one of the six trustees?

A. Yes, sir.

Q. And how long have you acted as a trustee of the village of Gridley?

A. Well, six or seven years. It is my second term.

Q. The village of Gridley filed a petition of intervention in this proceeding, did they not?

A. They did.

[fol. 709] Q. You had hoped or thought you would have your village attorney here today, did you not?

A. He was unable to attend.

Mr. Lucas: Mr. Examiner, I am pinch hitting for the village attorney, if I may.

Exam. Albus: Very well, proceed.

By Mr. Lucas:

Q. How long have you conducted your business, Mr. McKey, at Gridley?

A. Ten years.

Q. How large, by the way, is the village of Gridley?

A. Approximately eight hundred.

Q. And during the 10 years you have operated there it has been on what railroad, please?

A. The T. P. & W. Railroad.

Q. What is the form of your operation, corporation or partnership?

A. We have a partnership.

Q. And your partner is who, please?

A. Mr. L. E. Roegge.

Q. What service do you employ generally beyond the T. P. & W. railroad service?

A. Well, we ship grain to various points in the United States. Most of it goes south, southeast, and east. Approximately two-thirds of our business is transacted by

rail, one-third by truck, and we use—we ordinarily take the shipper's instructions on billing. Much of our grain has gone out over the Pennsylvania and the Wabash and [fol. 710] N. Y. C. to southeastern points.

Q. How far west of Effner, Indiana, is Gridley?

A. I should say approximately 70 miles. I don't know the exact mileage.

Q. The movements through Effner, of course, is in conjunction with the Pennsylvania Railroad beyond the T. P. & W.?

A. That is right?

Q. And the movement that you have referred to over the New York Central is through Sheldon?

A. Yes, sir.

Q. Mr. McKey, I just talked with you a few minutes ago; did I not, outside the hearing room?

A. Yes.

Q. I found you had undertaken to set down some things that would give the Examiner and the Commission a little idea of your business and so on. Will you just take your own notes and proceed, please.

A. We have an approved warehouse licensed under the Illinois Commerce Commission for 285 thousand bushels. We have a contract with the Commodity Credit Corporation for grain storage in the same amount. We ship from seven hundred fifty thousand to one million bushels of grain per year. Last year we loaded out 385 boxcars, grain cars. We brought in 21 cars of fertilizer. We have just recently completed a shipment of 27 cars of oats, Quaker Oats Company, at Akron, Ohio, over the P. R. R. at Effner. [fol. 711] Last November we shipped 175, approximately 175, cars of Commodity Credit corn with destination at Baltimore and Philadelphia via the Pennsylvania.

During the extreme shortage we contacted officials of the T. P. & W. We also worked with the officials of the Pennsylvania. We talked to Mr. Plummer in Chicago. We talked to the Logansport office, using every method we could to secure cars for these shipments.

Q. Does that complete your notes?

A. Yes.

Q. In connection with the eastbound movement of your cars have you had good service on the part of the T. P. & W. and the Pennsylvania Railroad?

A. Yes, with the exception of car shortage, and everybody experiences the same.

Q. And has it coordinated schedules as far as you have been shipping T. P. & W.-P. R. R. and given you good service?

A. I think that is all right.

Q. Do you have anything else to add, Mr. McKey?

A. No, sir.

Mr. Lucas: That completes the direct.

Exam. Albus: Cross-examination, Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. In connection with your cars and other service from the T. P. & W. do you contact the local agent?

[fol. 712] A. Yes, sir.

Q. And I believe you said you contacted the Pennsylvania officials by telephone?

A. That is right.

Q. You don't have any trouble using the telephone to contact these officials, do you?

A. Not very much.

Q. I believe you said you had no particular complaint about the car supply that has been furnished you by the T. P. & W.?

A. Well, generally, like right now it is all right, but in periods of great shortage, why, all the lines experienced about the same thing, I think.

Q. Have you had occasion to check the M. & St. L. to determine whether or not they had the elevators on their lines, had any shortages for any length of time in car supply during the 1955 season?

A. No, sir.

Q. You don't know, I gather, what the car shortage situation on the Pennsylvania was during 1955?

A. They had a car shortage, too.

Mr. Wheeler: I have no further questions.
Exam. Albus: Mr. Cassell?
Mr. Cassell: No questions.
Exam. Albus: Mr. Broker?
Mr. Broker: No questions.
[fol. 713] Exam. Albus: You are excused, Mr. McKey. Thank you.

(Witness excused.)

Mr. Bagge: Mr. Examiner, I think I informed you earlier about our problem in regard to the witnesses today. We have two here in the city. We are expecting the Peoria Junior Chamber of Commerce and the City of Peoria through the Mayor to appear later. It will be approximately ten or fifteen minutes. If I could ask that we adjourn right now—
Exam. Albus: We will take a short recess.

(Short recess.)

[fol. 714] Exam. Albus: The hearing will please come to order.
May we have the next witness, please.
Mr. Cation: Mr. Schwarzloss.

Thomas Schwarzloss was sworn and testified as follows:

Direct examination.

By Mr. Cation:

Q. Would you state your name, please.
A. My name is Thomas Schwarzloss.
Q. Where do you reside, Mr. Schwarzloss?
A. I live at 124 Ridgemont Road, Peoria, Illinois.
Q. What is your business or occupation?
A. I am sales manager of Traders' Realty Corporation.
Q. Are you a member of the Peoria Junior Chamber of Commerce?
A. I am the President of the Peoria Junior Chamber of Commerce.
Q. Will you please state to the Examiner the number of members of your organization.
A. We have approximately 400 members.

Q. What is the age group of these members?

A. The age group is 21 through 35.

Q. What are some of the activities of the Peoria Junior Chamber of Commerce?

A. We carry on a lot of activities, a lot of projects, each year. All of these are designed to improve and better our community. That is what we are most interested in. We are a group of young men who are interested in the future of Peoria.

[fol. 715] Q. Was a petition for leave to intervene filed by your organization in Finance Docket No. 18991?

A. Yes, it was.

Q. What is the basic position of the Peoria Junior Chamber of Commerce with respect to the application of the Santa Fe and Pennsylvania Railroad Docket No. 18991?

A. Our organization has gone on record as endorsing the petition of the Santa Fe and Pennsylvania Railroad.

Q. What specific reasons does your organization have for supporting this application of the Santa Fe and the Pennsylvania?

A. Our organization is most interested in the offices and the management of the TP&W remaining with us in the Peoria area. We also are certainly aware of the civic willingness and civic-mindedness of the management of the TP&W, particularly Mr. Coulter, its president, and Mr. Egbert, its chief engineer, and we certainly feel it would be a great loss to our city to see either of these men or any of the management of the TP&W moved from Peoria, from the Peoria area.

We are also extremely interested in the industrial development of our community. As young men looking into the future and having a stake in our community, that is most important to us. And again Mr. Coulter, president of the TP&W, and Mr. Egbert, who is chief engineer of the TP&W, we know, have been very active in industrial development, and we feel that they, working with the industrial development resources of the Santa Fe and Pennsylvania [fol. 716] can certainly make great strides in the future in the industrial development of our community.

Q. I am sure you are aware, Mr. Schwarzloss, that certain other railroads have petitioned to intervene in this case, have requested to participate equally with the Santa

Fe and the Pennsylvania. What is the position of your organization with respect to this intervention in joint of multiple ownership?

A. We are opposed to multiple ownership. We feel that it would be economically unsound for more than the two railroads, the Santa Fe and Pennsylvania, to own the TP&W. It is certainly true, I believe, that the greater the investment the more interest that the railroad is going to have. Certainly with the two, with the amount of investment that they would have, they would certainly be more interested in the industrial development along the lines of the TP&W than would three or four railroads who had lesser investments.

Q. Now, admitting that the ownership of or by two railroads is multiple ownership, what position would your organization take with respect to that multiple argument as against the single ownership of the M&StL.?

A. We feel that there perhaps we would look at past experience. The M&StL. has been here for a number of years and I do not know of any industrial development that they have done, and the management of the TP&W has certainly done a lot toward industrial development, and we are interested in them staying here in order that they [fol. 717] can continue that development.

Q. Were you asked by either representatives of the Santa Fe or the Pennsylvania to appear as a witness in this case?

A. We were not asked to appear as a witness. We were asked to intervene in behalf of the Santa Fe and the Pennsylvania. A representative of the Santa Fe appeared before our board of directors. Before our board of directors would take a stand, we felt that it was only fair that both sides should be heard. As a result, we asked Mr. Heineman, Chairman of the Board of the M&StL. to appear before our board and Mr. Heineman was kind enough to come to Peoria. Certainly he has a busy schedule and we appreciated him taking the time to come and appear before our board. After hearing both sides, we felt that a stand should be taken. In order that we did not make any rash or quick decisions, we did not make an immediate decision, but a week after Mr. Heineman's appearance we called a

special board meeting to discuss this matter. After a very lengthy meeting and a lot of discussion the board recommended to the membership that we support the petition of the Santa Fe and Pennsylvania. At our next membership meeting the matter was brought before the membership of the Junior Chamber of Commerce and they decided to endorse the petition of the Santa Fe and Pennsylvania.

Mr. Castion: That is all, Mr. Examiner.

Exam. Albus: Cross-examine.

Mr. Wheeler.

[fol. 718] Cross examination.

By Mr. Wheeler:

Q. Are you aware of the M&StL participation in the industrial work of the association—have you a senior chamber of commerce here?

A. I have been told that they gave money toward industrial survey.

Q. Are you familiar with the fact that an officer or employee of the M&StL serves on the committee of the senior chamber for industrial development?

A. No, sir.

Q. Do you know the facts with reference to the cooperation or the work of the Santa Fe in connection with the industrial development in Peoria?

A. The question is what—

Mr. Wheeler: Read the question.

(The last question was read.)

A. No, sir.

Q. Would your answer be the same with respect to the Pennsylvania Railroad?

A. Yes, sir.

Q. Are you aware of the fact that the Santa Fe derives a substantial amount of traffic from industries in the Peoria area over its lines west of Lomax?

A. I am not a railroad man.

Q. Are you familiar with the fact that industries located in Peoria ship over the Santa Fe west of Lomax?

[fol. 719] A. Again, I am not a railroad man, I am not too familiar with interchange, or with the connection, whatever the terminology is there.

Q. Would your answer be the same with respect to the Pennsylvania?

A. Yes, sir. I am not a railroad man.

Q. Mr. Schwarzloss, don't you believe that the Pennsylvania and the Santa Fe now have an interest and in the past have had an interest in the industrial development of Peoria?

A. Perhaps some, but I would not know to what extent.

Q. Wouldn't you think, as the two end carriers on this bridge line connecting their two transcontinental systems, they would have an interest in the principal city on that bridge line and its industrial development?

A. I would think there should be some interest there.

Q. Do you know of anything that either of those railroads has ever done in connection with the industrial development of Peoria, Mr. Schwarzloss?

A. No, sir.

Q. Now, Mr. Schwarzloss, are you familiar with the absence of industrial property ownership by the M&StL in Peoria?

A. I am sorry, I don't understand the question.

Q. What I asked you is are you familiar with the fact that the M&StL does not own any industrial property in the Peoria area?

A. I do not know whether they might own any or not.

[fol. 720] Q. Are you familiar with the fact that by reason of its location and entry into the town there is no property adjacent to the M&StL lands which could be used for industrial purposes?

A. No, sir, I didn't know that.

Q. Are you familiar with the fact that one of the main purposes for the acquisition of the TP&W by the M&StL was to acquire the industrial development property in the Peoria and East Peoria area?

Mr. Thomas: May I register an objection? Mr. Wheeler is testifying here and the M&StL hasn't stated what its purposes are on the record here.

Exam. Albus: I am sure they will.

Mr. Wheeler: Yes, sir.

Exam. Albus: You may answer, Mr. Witness, if you have any answer to that.

The Witness: What is the question, please?

(The last question was read by the reporter.)

A. I did not know that was one of their main purposes.

Mr. Broker: Just to make it clear, it is not established on the record that it is, is it?

Exam. Albus: No, definitely not.

Mr. Wheeler: We haven't put our case in, I don't believe.

Mr. Broker: I understand.

Exam. Albus: Just because Mr. Wheeler asks the question doesn't make it necessarily so, you realize that?

Mr. Broker: Yes, sir.

[fol. 721] By Mr. Wheeler:

Q. Mr. Schwarzloss, do you know any industry that has been recently—by that, I mean within the past five years—been located on property owned by the TP&W in the Peoria-East Peoria area?

A. I don't believe I am in a position to answer that.

Q. Wouldn't you know whether you did know or you didn't know?

A. I do not know whether there has been any industry located on the property of the TP&W in that period of time.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Schwarzloss, you said you thought it would be fair to invite people who had different points of view or who had propositions to appear before you and express themselves, and you invited the M&StL, is that right?

A. That is correct.

Q. Did you invite the Rock Island?

A. At that time it was our understanding that the M&StL was the only one that had intervened.

Q. Are you taking any position in regard to the Rock Island?

A. Our petition states—or excuse me, we have endorsed the petition of the Santa Fe and the Pennsylvania.

Q. Are you taking any position with regard to the Rock Island?

A. Yes, we are.

Q. Have you ever invited the Rock Island to explain its position to you?

[fol. 722] A. As I stated previously, at the time that we were hearing the M&StL and the Santa Fe we did not know of any other railroads that intervened and a stand was taken after hearing those two?

Q. Then, your stand was taken without knowing what the position of the Rock Island was?

A. Yes, it was.

Q. I take it, one of the things that you are interested in is the preservation of the local management for the benefit of the community that you have already experienced.

A. Yes, sir.

Q. That is Mr. Coulter and the other gentleman whom I believe is also a member of your junior chamber who is their chief engineer, are the ones you are interested in.

A. We are interested in the management of the TP&W, and as stated, Mr. Coulter and Mr. Egbert, in particular.

Q. And you would like to see those men and their staff and their policies preserved?

A. We would.

Q. And a plan which does that is what you want, isn't it?

A. It is.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. The Nickel Plate was not invited, was it, to express [fol. 723] its views before your organization?

A. No, sir.

Q. In response to Mr. Cassell's questions about the formulation of your organization's position, without con-

sidering the Rock Island or without taking a position on the Rock Island, the same is true of the Nickel Plate, isn't it?

A. Yes, sir, that is true.

Q. Now, I believe you felt that the greater the investment in the particular area, the greater the incentive to promote industrial development. Is that right?

A. Yes, sir.

Q. Now, Nickel Plate has had a large investment, has it not for years in this area?

A. I don't know. I assume they have. I am not sure how long they have actually been in the area.

Q. Well, just for the record, since the railroad was the Lake Erie & Western, which was consolidated into the Nickel Plate in 1922, but I take it that is beyond your knowledge?

A. Yes, sir.

Q. Do you know that the Nickel Plate is a part owner of the P&PU?

A. No, sir.

Q. The P&PU has very extensive industrial development, doesn't it?

A. I am sure that they are interested in the industrial development.

[fol. 724] Q. One other question, do you know whether or not the line of the Nickel Plate into Peoria is a good line or a bad line?

A. No, I am sorry, I don't.

Q. Do you know that the Pennsylvania has had a line of railroad into this city for many years, too?

A. I believe they have on a rather—I don't think it has been too active.

Q. Do you know anything about the condition of that railroad?

A. No, I do not.

Q. Didn't you testify that in part your decisions, the position you took was based on past performance, wasn't that your testimony?

A. As far as the TP&W, yes.

Q. But not as far as the Pennsylvania and the condition of its line and the Nickel Plate and the condition of its line, those were not factors taken into consideration?

A. I am sorry, I don't quite understand your question.

Q. It comes down to this, the Pennsylvania has been in here for many years, you are aware of that fact. Would you not have expected a railroad that was vitally interested in industrial development to maintain a grade A, topnotch railroad into this city?

A. I would think there would be a lot of factors to consider there, depending upon the type of traffic, whether it was freight or passenger. I would think there would be a lot of

[fol. 725] Q. Let's assume it is all freight.

A. I still think it would depend—

Q. Well, let me rephrase the question, to speed this up. Wouldn't you expect a railroad's interest in industrial development in this city to be reflected in the character of the railroad that operates into the city?

A. Yes.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

Mr. Cation: Yes.

Exam. Albus: Redirect.

Redirect examination.

By Mr. Cation:

Q. Mr. Schwarzlose, do you think a railroad would show more interest in industrial development along a line that it owned rather than along a line where it merely transported cars?

A. I think so, I would certainly think so, yes, definitely.

Mr. Wheeler: Mr. Examiner, may we inquire what transported cars, what he means by that?

Exam. Albus: Yes, indeed you may.

Mr. Wheeler: I would like to move to strike the question and answer until a definition of "transported cars" is supplied for the record.

Mr. Cation: Not being a railroad man, Mr. Examiner, and not knowing the technical answer that these gentlemen pre-

[fol. 726] fer, I am trying to get from the witness whether or not he wouldn't feel that a railroad would be more interested in development along a line which it actually owned rather than on a line into which it interchanged cars.

Exam. Albus: Or connecting line.
Mr. Cation: Or connecting line.
Exam. Albus: I think that is broad enough.

A. My answer is yes.

Mr. Broker: Could you read the question and answer again.
I thought it called for a yes or no.
Exam. Albus: He answered yes.
Mr. Broker: Or possibly even another answer.

(The last question was read.)

Mr. Broker: Does that mean yes, he thinks that a railroad is more interested in industrial development on a line that it owns?
Exam. Albus: Is that what you mean?
The Witness: That is what my answer would mean, what the yes would be.
Exam. Albus: Mr. Cation.

By Mr. Cation:

Q. Is it not the stand of your organization that the Peoria area would be served better from an industrial standpoint by ownership of the Pennsylvania and the Santa Fe of the TP&W rather than the ownership of the TP&W by the M&StL?

Mr. Wheeler: Mr. Examiner, I object to that on the [fol. 727] basis it is repetitious.
Exam. Albus: I sustain the objection.

By Mr. Cation:

Q. Mr. Schwarzlose, Mr. Heineman spoke before your group, and he did not make mention, did he—

Exam. Albus: Ask the witness what he mentioned.

[fol. 728] By Mr. Cation:

Q. When Mr. Heineman spoke before your group did he mention the plan, proposed plan, of the M&StL as to industrial development along the line?

Mr. Wheeler: Mr. Examiner, I object to the question as being leading.

Exam. Albus: It is a little leading but I am going to permit him to answer.

A. Industrial development was mentioned by Mr. Heineman, but it was, I would say, a secondary point. It wasn't discussed at any length by Mr. Heineman to where we, at least, felt that he was going to do too much about it.

By Mr. Cation:

Q. Do you know whether or not the Rock Island and the Nickel Plate had intervened in this case at the time the decision was made by your organization.

Mr. Cassell: I object to that. That has been asked and answered.

Exam. Albus: I agree with you.

By Mr. Cation:

Q. Was the position of your organization changed after the Rock Island and Nickel Plate intervened?

Mr. Cassell: Same objection.

Exam. Albus: Overruled.

What is the answer to that, Mr. Schwarzlose?

A. Our position was not changed.

Mr. Cation: That is all, sir.

Exam. Albus: Is there any further recross-examination?

[fol. 729] Mr. Cassell: Yes.

Recross examination.

By Mr. Cassell:

Q. As responsive to the last, you have never invited the Rock Island to come in before you, have you?

Mr. Cation: I object to that. He has answered that, sir.

Exam. Albus: He has answered that, too, but he may answer it again.

A. We have not.

By Mr. Cassell:

Q. So you are still without information as to the Rock Island's position, aren't you?

A. We are without detailed information.

Q. What details do you have or information do you have? When was that obtained and from what source?

A. It was not received in an official way by the J.R.'s. Any information that we got after our stand had been taken was from the press.

Q. You took no official action, then, after your original stand?

A. No, sir.

Mr. Cassell: That is all.

Exam. Albus: Are there any further questions?

Mr. Broker: Yes.

Recross examination.

By Mr. Broker:

Q. Is that true on other intervening railroads as well?

[fol. 730] A. Yes, sir.

Mr. Broker: Thank you.

Exam. Albus: You are excused. Thank you very much.

(Witness excused.)

[fol. 731] Mr. Lipkin: The City of Peoria as an intervenor wishes to present a witness.

Exam. Albus: Very well.

May we have a witness, please.

Mr. Lipkin: Mr. Morgan.

Robert D. Morgan was sworn and testified as follows:

Direct examination.

By Mr. Lipkin:

Q. Your name is Robert D. Morgan?

A. That is correct.

Q. And you are the Mayor of the City of Peoria?

A. Yes, sir.

Q. And you have held that position since May of 1953, is that correct?

A. That is right.

Q. You are a resident of the City of Peoria?

A. I am.

Exam. Albus: Let him testify, please.

Mr. Lipkin: Mr. Examiner, I was not aware that these types of questions required his testimony directly.

Exam. Albus: No, it doesn't, but I think he knows them just as well as you do.

By Mr. Lipkin:

Q. Where do you live, Mr. Mayor?

A. 551 West Armstrong Avenue, in the City of Peoria, Illinois.

Q. Are you a professional man?

[fol. 732] A. I practice law, yes, sir.

Q. How long have you practiced law in the City of Peoria?

A. Since 1937.

Q. How long have you lived in the City of Peoria?

A. I was born here almost 44 years ago.

Q. During the time that you have practiced law in the City of Peoria have you had any interest in the industrial and business activities and development of the City of Peoria?

A. I have.

Q. Have you held any official position with any civic or charitable organization in the City of Peoria?

A. I have, several.

Q. Would you tell us just briefly what those are?

A. Well, I served a term on the Board of Directors of the Peoria Association of Commerce after a number of years of service on various committees in that organization. I served as a vice-president of that organization for, I believe, two years. I have been active in a number of charitable organizations, including the Y. M. C. A. and the Community Chest.

Q. Have you held any offices in the Y. M. C. A.?

A. I was president of that organization for six years, yes.

Q. What is the position of the corporate authorities of the City of Peoria with respect to the application of the Pennsylvania and Santa Fe Railroads in this matter?

A. Our city council by unanimous resolution resolved [fol. 733] that that approval of this application was in the public interest.

Mr. Lipkin: At this time, Mr. Examiner, I would like to have identified as intervenor, City of Peoria, exhibit, would it be Exhibit 1?

Exam. Albus: No; we take them in order. It will be H-17.

Mr. Lipkin: Which is a certified copy of the resolution adopted by the city council of the City of Peoria for 1955.

Exam. Albus: Do you have copies for circulation?

Mr. Lipkin: No, I don't, but I can get them.

Exam. Albus: Very well, with that understanding the resolution is marked for identification H-17.

(Intervenor City of Peoria's Exhibit No. H-17, Witness Morgan, was marked for identification.)

OFFER IN EVIDENCE

Mr. Lipkin: Just so I don't forget, I would like to offer this exhibit at this time.

Exam. Albus: Is there any objection?

Mr. Bagge: No.

Exam. Albus: It is received.

(Intervenor City of Peoria's Exhibit No. H-17, Witness Morgan, was received in evidence.)

By Mr. Lipkin:

Q. Mr. Morgan, if you know, what are the specific reasons for this position taken by the corporate authorities of the City of Peoria?

A. Of course I don't know all of the reasons that may have motivated all of the members of the council who [fol. 734] voted for it. I know my own and some of the reasons that have been voiced by other councilmen.

Q. Will you tell us what they are?

A. They are in brief that the T. P. & W. runs through the City of Peoria, across Illinois, and this application represented an opportunity, since the present owners wanted to, the majority owners wanted to, sell out their interest, it represented an opportunity for this road to be owned by a large eastern road that reaches to the east coast and a large western road which seemed to me and to the other members of the council with whom I have talked to represent almost an ideal type of ownership from the standpoint of future development of the T. P. & W. line. The home offices of the T. P. & W. are in Peoria, and, of course, a good many of its employees live in the City of Peoria and in the surrounding area. Any development, expansion, of the service of the T. P. & W. would affect the city in that way.

We were also encouraged by the fact that the application and the contract, as I understand it, between these two petitioning roads provides for independent operation of the T. P. & W., and the control of that road by a board of directors which at all times would have six out of 11 members unconnected with either the Santa Fe or the Pennsylvania. I think just briefly, as I have said, this presents to me a very appealing picture for the future development of the T. P. & W. road and industrial development along [fol. 735] its line, including in and near our city.

Q. What is your position as to the application of the M&St.L. Railroad to obtain control of the T. P. & W. Railroad?

A. Well, I do not believe that would represent near all of the values that I have tried to detail in connection with the Pennsylvania and Santa Fe application.

Q. What is your position as to the request of the Rock Island Railroad and the Nickel Plate Railroad that they participate with the Santa Fe and the Pennsylvania in the ownership of the T. P. & W.?

Mr. Broker: I object. There is no evidence that any action was taken by this city subsequent to the intervention by the Nickel Plate.

Mr. Cassell: I join in that objection as to the Rock Island.

Mr. Lipkin: I would merely like to point out what his position was, not that of the corporate authorities.

Exam. Albus: Very well, the objection is overruled.

Mr. Cassell: That is his personal, private citizen's opinion?

Mr. Lipkin: Yes, sir.

Exam. Albus: Proceed, Mr. Mayor, please.

The Witness: Will you read the question.

(Question read.)

A. Well, it seems to me that broadening the participation of any other roads or interests in the ownership of the [fol. 736] T. P. & W. would tend to water down the interest of any single segment of ownership in building up the road and in developing the area of the road industrially.

Mr. Lipkin: Cross-examine.

Exam. Albus: Mr. Wheeler, please.

[fol. 737] Cross examination.

By Mr. Wheeler:

Q. What reasons are set forth in the resolutions for this council's support of the Santa Fe-Pennsylvania application?

A. As I recall, there are no reasons set forth.

Q. No reasons set forth?

A. That is my recollection. I may be wrong. You have it before you.

Q. If any reasons were set forth they would be the ones on which the council had agreed, would they not?

A. Oh, I think so, yes.

Q. And the other reasons that you have stated here, then, would represent your personal views as distinct from the views adopted by the council by this resolution, Exhibit H-17, is that correct?

A. Well, I think I stated as clearly as I could that what I was recounting here was my own reasons plus those of other councilmen who had voiced them to me.

Q. Now, that would be hearsay, would it not, Mr. Morgan?

A. It would as to other council men.

Q. Yes, sir.

A. But not as to myself, of course.

Q. When did the Pennsylvania-Santa Fe file their application with the Interstate Commerce Commission?

A. I don't remember. I think it was late in the spring, [fol. 738] early summer.

Q. Where did the council get its information with respect to this application?

A. Well, the most detailed information was at a luncheon to which the members of the council were invited. I believe the TP&W Railroad was host and the president of both the Santa Fe and the Pennsylvania were here in this room and detailed at some length their proposal.

Q. I believe the record shows that the application was verified on July 7, and probably filed on July 8, 1955. What day was the luncheon?

A. I don't recall the exact day.

Q. Did the luncheon intervene between the filing of the application and July 19, the date of the resolution, Exhibit H-17?

A. I'd have to check that up, I don't recall.

Q. You did not, at the time the council took its action it did not have any information with respect to the M&StL's position in this matter, did it?

A. Not to my knowledge. I didn't.

Q. The M&StL is not mentioned in the resolution of the council, is it?

A. I don't believe it is, no.

Q. Mr. Morgan, are you aware that the M&StL has for generations been publicizing itself as the Peoria gateway railroad?

A. I am aware of the fact that they have been doing [fol. 739] that for some time. I don't know about generations.

Q. Are you aware that they have for a long time been soliciting the Peoria gateway?

A. I assume they have, yes, I know that.

Q. Are you aware of the fact that they have advertised Peoria and the Peoria gateway throughout the country?

A. Yes.

Q. To your knowledge has the Santa Fe ever undertaken such a publicity drive on behalf of the city of Peoria?

A. Well, I wouldn't like to characterize the M&STL's campaign as on behalf of the city of Peoria, but the answer to the question is no, I know of no similar campaign by the Santa Fe.

Q. Have you seen the M&STL ads?

A. I have seen some of them, yes.

Q. Have you seen their boxcars?

A. Yes.

Q. And the name Peoria appears on those boxcars, does it not?

A. Yes, it does.

Q. Have you seen the stationery employed by the M&STL?

A. I don't recall that I have, no.

Q. Now, do you or don't you believe that advertising the name Peoria, Illinois, is beneficial to your city or not?

A. I would say just publicizing the name is generally beneficial, but it seems pretty nebulous.

Q. How about 4,000 moving signboards around the coun [fol. 740] try, is that pretty nebulous publicity for Peoria?

A. It is certainly publicity. I say the value is perhaps nebulous.

Q. Do you know whether or not the Pennsylvania Railroad has ever advertised the name of Peoria, Illinois, throughout the length and breadth of the country?

A. I have no knowledge that they ever have, no.

Q. Do you know of any other railroad that has done so?

A. Toledo and Western Railroad has done so to some extent.

Q. To the same extent that M&STL has?

A. I would doubt that it is quite the same extent. I don't really know.

Q. And yet in the face of that the Peoria Chamber Council adopted a resolution in favor of a competitive application and takes a position in favor of a competitive application before the Commission without ever hearing the M&StL, is that correct?

A. I don't care to argue with you. I think my testimony has been clear, as clear as I could make it. I am trying to state what I believe, and to the extent that the city council has accounted what the council believes to be in

the public interest of the City of Peoria, and I don't consider I am being a participant in competitive activities between competing railroads, except to the extent that that occurs automatically from my view of what the public interest is.

[fol. 741] Q. Do you believe that the advertising and other publicity that the M&StL has given to the city of Peoria has tended to promote the location of industries in Peoria?

A. I would think it would have that tendency, yes.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Morgan, your Exhibit 17, which is a copy of the resolution of July 19, is that right?

A. That is correct, yes.

Q. Both that exhibit and your petition, then, the action taken in regard to them, was had before the Rock Island had filed its petition in this case, isn't that right?

A. I am quite sure that is true, Mr. Cassell, yes.

Q. And the City of Peoria has taken no official action since the Rock Island has been in this case, has it?

A. It has not.

Q. You expressed an opinion in regard to this application which was your own opinion, I believe, you said as a citizen and just as an individual?

A. I have expressed some of both.

Q. Have you had any railroad experience, Mr. Morgan?

A. Very little, except as a passenger, Mr. Cassell.

Q. Then the answers you gave were not based on any experience you have had in making shipments?

[fol. 742] A. No, they were not.

Q. Or in the management or control of the railroad?

A. I have had no such experience.

Q. So it comes down to the fact that your opinions, then, were based on your observations as a passenger?

A. And as a citizen.

Q. However, I believe you are a lawyer, aren't you?

A. I am.

Q. And as such have some knowledge of corporate affairs?

A. I think some, yes.

Q. Who elects directors?

A. The stockholders is my understanding.

Q. And under the scheme proposed by the—and who controls them?

A. Who controls directors?

Q. Yes.

A. I don't know that anybody controls them after they are elected until the next election. They are sort of like public officials in that respect.

Q. The electorate or the stockholders, as the case may be, has a very definite ability to take care of the stockholders on the next—I mean the directors on the next election, though, doesn't it?

A. That is my understanding.

Q. Then who would elect the board under the scheme, it [fol. 743] would be the Santa Fe and the Pennsylvania, wouldn't it, under the scheme they have proposed?

A. They would have a substantial number of votes between them, yes.

Q. In fact, they'd have all of them, wouldn't they?

A. I don't know who all of the owners are of the TP&W. I understood the contract that brought about this petition involved 82 per cent of the shares. I don't know whether they would or do or may in the future control all of them at all.

Q. Well, assuming that the Santa Fe and Pennsylvania between them owned each 50 per cent of the stock, wouldn't they elect all the directors?

A. Yes, they would.

Q. And they would elect not only the two Pennsylvania and the two Santa Fe directors but also the other directors on the Board?

A. Yes, they would.

Q. So that although you have called them independent, still they would owe their election and choice to the Santa Fe and Pennsylvania?

A. They would owe their election to the stockholder that is correct.

Q. And those would be the Santa Fe and the Pennsylvania?

A. On the assumption that you stated.

Q. Hasn't the Rock Island shown a great deal of interest in

[fol. 744] A. It certainly has.

Q. Not only presently but all through the years, hasn't it?

A. I think it has, yes.

Q. The Pennsylvania comes into the City of Peoria with its own railroad today, doesn't it?

A. Yes, I think it does.

Q. Has it shown as much interest in Peoria as the Rock Island?

A. I must say it has not provided passenger service of the caliber of the Rock Island between here and Chicago.

Q. Nor any place else?

A. Not to my knowledge.

Q. Does it provide any passenger service at all?

A. I don't it does.

Q. Do you anticipate as a result of this application the Pennsylvania will?

A. I don't anticipate that. I can hope, can't I?

Q. Is that one of the reasons why this application is supported?

A. No, I wouldn't say that it was, Mr. Cassell, although I know there is a strong feeling on the part of many people in Peoria that future development might include passenger service of some kind over this road. Whether that is justified or not I have no basis for hazarding a guess.

Q. Don't you think the Rock Island would be interested in continuing the furtherance of the interest of Peoria?

[fol. 745] A. Oh, I feel quite sure it would, surely.

Q. If it were a participant in this acquisition wouldn't it have that interest?

A. I personally would doubt, Mr. Cassell, that obtaining of a one-third interest in the TP&W would increase or decrease materially the interest that the Rock Island Rail

road has shown in this city and in this area. As I stated, I think that any division of the ownership into smaller parts would tend to decrease the interest of any particular owner in the industrial development and in the promotion of traffic along the line.

Q. Now you speak in one-thirds or halves and percentages of ownership, don't you think that the actual amount of the ownership, the investment might have some interest and bearing?

A. Oh, I would think so, yes.

Q. If you put a $100 into a venture and Mr. Rockefeller puts $150 in the venture—

A. (Interrupting) Mine is more important to me.

Q. Similarly on the Rock Island, the Rock Island is offering to put in something in the neighborhood of three to four million dollars, wouldn't you consider that a substantial amount of money?

A. It seems very substantial to me, yes, sir.

Q. Wouldn't you think that would be a rather substantial
fol. 746] interest in any piece of property?

A. Yes, sir.

Q. And, as a matter of fact, might not $4,000,000 to the Rock Island be more important to it than six million to the Santa Fe?

A. Well, I honestly don't know whether it would or whether it wouldn't.

Q. Don't you think that is a factor in the interest that a line might take in the property that is under consideration

A. I think it is one among several, yes.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

fol. 747] Cross examination.

By Mr. Broker:

Q. You stated that division of ownership in smaller parts would decrease the interest of any individual owner. Do you think, therefore, that a company which has one hundred per cent interest in a venture has a greater interest than one with a fifty per cent interest?

A. I think that automatically follows. I don't think that that's only one factor which I don't believe should be controlling. It is not controlling in my view of this case.

Q. But when you get below 50 per cent, then it is controlling, is that right?

A. No, I don't think it alone is controlling at any point of percentage of ownership.

Q. So that this alleged dilution of ownership that we have been hearing about, that necessarily isn't determinative of the problem before the Commission, to the best of your knowledge, is it?

A. Well, please understand me, I am not trying to usurp the authority of the Commission here. I am stating a viewpoint, an opinion.

Q. In the council's consideration of the matter, did you say that they gave consideration to Exhibit D, the contract between the Santa Fe and the Pennsylvania?

A. I don't know how many of the members of the council did. I was aware of that.

[fol. 748] Q. And were you aware of the provision that said that the maintenance of the T. P. & W. was a separate and independent carrier would be solely for the benefit of the Santa Fe and the Pennsylvania and not for the benefit of anybody else?

A. I would assume that would be true.

Q. Why?

A. Well, I think that's one of the principal incidents of ownership, as I understand it.

Q. That a railroad would not necessarily consider another party or non-party?

A. Well, we don't need to talk philosophy, I don't believe. I think any business organization has to consider its customers as well as its owners.

Mr. Broker: No other questions.

Exam. Albus: Is there any further cross-examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Lipkin: No, sir.

Exam. Albus: You are excused, Mr. Mayor. Thank you very much.

(Witness excused.)

Mr. Lucas: Mr. Examiner, one of my colleagues has asked me question that I am not entirely sure I made in the record on the part of Mr. McKey. May I call him back for just a few questions?

[fol. 749] Exam. Albus: Yes, indeed.

Mr. Lucas: Mr. McKey, will you take the stand again, please.

PAUL W. MCKEY was sworn and testified as follows:

Direct examination.

By Mr. Lucas:

Q. Mr. McKey, in the testimony that you have presented earlier this afternoon, was that on behalf of the Village of Gridley as well as your individual business capacity?

A. Yes, sir.

Q. And in the support of the applicants as stated in your petition of intervention, was that also on behalf of you as a business man at Gridley as well as the trustees?

A. Read that, please.

(Question read.)

A. That is correct.

Mr. Lucas: That is all.

Exam. Albus: Is there any cross-examination?

(No response.)

Exam. Albus: You are excused, Mr. McKey.

(Witness excused.)

Exam. Albus: Since there is so little time left before 5 o'clock that it would hardly be worthwhile to start another witness, this case will be adjourned until tomorrow morning at 9 o'clock, in this room.

(Whereupon, at 4:50 p.m., an adjournment was taken until 9 a.m., Tuesday, February 7, 1956.)

[fol. 749a] Secretary's Certificate to foregoing transcript (omitted in printing).

[fol. 750]

BEFORE THE INTERSTATE COMMERCE COMMISSION

[Title omitted]

LaSalle Room,
Pere Marquette Hotel,
Peoria, Illinois.

TRANSCRIPT OF HEARING—February 7, 1956

Met, Pursuant to adjournment, at 9:00 a.m.

Before: Paul C. Albus, Examiner.

APPEARANCES:

(As heretofore noted.)

ADDITIONAL APPEARANCE:

Howard P. Robinson, 11 S. LaSalle, Chicago, Illinois, [fol. 750a] appearing for Elizabeth M. McNear, individually, and as guardian for John W. McNear; William McDowell Frederic and Commercial National Bank of Peoria, as executor of estate of Clinton M. McNear, The Hanover Bank of New York.

* * * * * * *

[fol. 752] PROCEEDINGS

Exam. Albus: The hearing will please come to order.

Before we continue with the witnesses for the applicants Mr. Robinson has a statement to make.

Mr. Robinson.

Mr. Robinson: I am counsel appearing for the McNear interest.

Exam. Albus: Have you entered your appearance yet?

Mr. Robinson: No, I have not.

Howard P. Robinson, member of the firm of Sidley, Austin, Burgess and Smith, appearing for the McNear heirs and the Hanover Bank.

Statement by Mr. Robinson on Behalf of Mrs. McNear and Exceptions Thereto

If the Examiner please, I appear in behalf of certain intervenors who are interested in the stock of the TP&W, either as individual owners or as beneficiaries under the trust created by the will of George P. McNear, Jr., or both. 73,800 shares of the TP&W stock or 82 per cent of the total are held by the trustees under the trust, and Mrs. McNear alone is an income beneficiary as to 50 per cent of the stock held in trust.

So far as the individual holdings are concerned the intervenors whom I represent own a total of 14,373 shares of TP&W stock.

The details as to their ownership of stock and their beneficial interest in the trustees' shares are shown in the intervening petition which we have filed. I mention them at this [fol. 753] point only for the purpose of emphasizing the very substantial interest which these intervenors have in these proceedings.

I also wish to advise the Examiner that we do not intend to call any witnesses or to introduce any documentary evidence at this time. However, I would like permission to make a very short statement of our position in these proceedings.

As the Examiner knows, from the evidence introduced thus far the intervenors whom I represent and the trustees have agreed to sell their stock to the Santa Fe on the terms and conditions which appear in the record. It is our position that the sale of stock contemplated by those agreements is consistent with public interest, that those transactions should be approved by the Commission and that the authority sought by the Santa Fe and the Pennsylvania should be granted. This position is based on several considerations.

The first and perhaps principal consideration is the profound conviction of these intervenors that the best interests of the TP&W and of the entire community which it serves should be furthered by the sale of stock to the Santa Fe and the Pennsylvania—

Mr. Wheeler: Mr. Examiner, I object to this. This is an Ex Parte statement by a lawyer. If he wants to file a brief

in this case I think he ought to do so but I don't think he ought to testify in this regard. This gentleman is from Chicago.

[fol. 754] Exam. Albus: This gentleman isn't testifying. He is making a statement on behalf of Mrs. McNear. It is merely a statement by counsel. That is why he wasn't sworn.

Continue, sir.

Mr. Cassell: He is making a statement purporting to be why this matter is in the public interest, their reasons for it, they aren't here to examine. It seems to me it is wholly improper to put things of this kind in the record.

Exam. Albus: He is stating his position and he may do so.

Mr. Robinson: These intervenors are intimately familiar with the past history and operation of the TP&W.

Mr. Wheeler: Mr. Examiner.

Exam. Albus: Yes, sir.

Mr. Wheeler: I would like to have a running objection to any statement of fact made by this man with respect to the knowledge of any of the parties, as a matter of fact, with respect to any facts that goes into the record. I do not think that they are properly evidence in this case.

Mr. Cassell: I join in that action, Mr. Examiner, please.

Exam. Albus: Yes, Mr. Cassell.

Mr. Broker: And for the Nickel Plate, too. These are not statements of positions, they are statements of alleged fact.

Exam. Albus: They are not being offered as proof, though. The gentleman isn't sworn. He is making just a bare statement as to his representation. I am going to [fol. 755] permit it. Each of you have exceptions to everything that goes in here.

All right, Mr. Robinson.

It is only a short statement. There is only one more page. If we are patient I think we can get this over within a few minutes.

Mr. Robinson: They know the TP&W is essentially a bridge and that the vast majority of the inter-line traffic is received from or delivered to the Pennsylvania. They also know that the opening of the Lomax interchange with

the Santa Fe has been the most direct responsible cause of the prosperity which the TP&W has experienced in recent years and that the traffic handled through that interchange point has increased substantially since the early 1930's, in contrast to the pattern of traffic interchanged with TP&W's other connections. From this these intervenors concluded that a heavy movement of traffic over the TP&W has been found to be to the best interest of the Santa Fe and the Pennsylvania and it certainly is in the best interest of the TP&W. That being so we believe that the ownership of the TP&W stock by the Santa Fe and the Pennsylvania would be consistent with and would promote the future well-being of the TP&W. The advantage to all citizens of the TP&W territory having a successful TP&W operation are very obvious.

A second consideration, which has prompted these intervenors to favor the application in Finance Docket No. 18991, is the fact that the TP&W's relation with the Santa [fol. 756] Fe and the Pennsylvania for the past several years have been most cordial and satisfactory. Mrs. McNear in particular who has been closely connected with the operations of the TP&W appreciates very much the co-operative efforts which helped to build the traffic of the TP&W following the opening of the Lomax interchange. While this spirit of co-operation might well have been influenced by the self-interests of the roads involved. It would appear that that fact would argue well for the future of the TP&W under the control of the Santa Fe and the Pennsylvania.

A third and final fact, which has influenced the position taken by these intervenors is the concern for the future welfare of the personnel which the McNear family brought to the TP&W, these intervenors feel some responsibility for the future welfare of these individuals and are convinced that their future would be best served under the joint control of the TP&W by the Santa Fe and the Pennsylvania.

For these reasons, therefore, we urge approval of the application in Finance Docket No. 18991.

I thank you, sir.

Exam. Albus: You are very welcome.

[fol. 757] MOTION TO STRIKE STATEMENT AND OVERRULING THEREON

Mr. Cassell: Mr. Examiner, I will ask that the entire statement after the statement of the clients whom he represents, who will not be present, be stricken.

Mr. Wheeler: I join in that motion.

Mr. Broker: I concur.

Exam. Albus: The motion is overruled. You still have your exception.

COLLOQUY BETWEEN COURT AND COUNSEL

Now I think we are ready for a witness.

Mr. Cassell: Mr. Examiner—if you will excuse us, please Mr. Bagge—

Mr. Bagge: Surely.

Mr. Cassell: Before the presentation of the first witness I have a document which I would like to present.

Exam. Albus: Oh, surely.

Mr. Cassell: That is, the original of a petition for leave to amend the intervening petition of the Rock Island in Docket 19086. I have the service copies here for all other parties to the proceeding.

Mr. Broker: Mr. Examiner, to expedite this, I have a comparable petition for the Nickel Plate.

Exam. Albus: Very well.

Mr. Broker: I will give service of that at this time.

Exam. Albus: Thank you.

The record will show that the intervening petitions of the Rock Island and Nickel Plate are received at this time.

[fol. 758] Mr. Cassell: I would like to call the Examiner's attention to the fact that we have furnished information in support of the petition of the Rock Island in the Santa Fe's docket, but it does not run to Docket 19086. I should like to request that that information in support of the position of the Rock Island be allowed to serve in Docket 19086 as well as the Santa Fe docket.

Exam. Albus: That will be understood.

Mr. Cassell: I believe you will find the information is applicable to both dockets except in the matter of a board

resolution. Our board is to meet next Monday, and I would like permission to file the resolution as a late-filed exhibit.

Exam. Albus: You may file that within 15 days.

Mr. Cassell: Thank you, sir.

(The document described to be furnished by intervenor Rock Island.)

Mr. Broker: Mr. Examiner, our Exhibit H-2 is entitled "Finance Docket No. 18991." We request that information be deemed applicable equally to 19086.

Our resolution, we believe, is broad enough to cover this intervention or this amendment and request for inclusion in the Rock Island transaction.

Exam. Albus: Very well.

Mr. Broker: But if there is any question about it, our next board meeting is in March and I would request permission, if need be, to file a copy of such resolution as might [fol. 759] be passed by the Board at that time.

Exam. Albus: What time in March?

Mr. Broker: The third Tuesday.

Exam. Albus: Very well, you may have that permission.

Mr. Broker: I am not sure that it is necessary.

Exam. Albus: If you decide it is, then you may file it as a late-filed exhibit.

(The document described to be furnished by intervenor Nickel Plate.)

Mr. Broker: Apparently I said "Rock Island" when I should have said "M&StL".

Exam. Albus: Right. The record will be corrected accordingly. I noticed that, too.

Mr. Broker: Is our petition accepted?

Exam. Albus: Yes.

Mr. Broker: And the exhibit, to make it applicable in this other docket?

Exam. Albus: Yes.

Mr. Broker: Thank you.

Exam. Albus: You are very welcome.

Mr. Lucas: Mr. Examiner, while we are distributing papers, I wonder if it would be agreeable to you to dis-

tribute an exhibit which was not ready until, I think, yesterday really.

Exam. Albus: Yes, sir.

Mr. Lucas: Which is further statistical information.

[fol. 760] Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

The record will show the statistical data now being distributed by the applicants Pennsylvania and the Santa F will be marked as Exhibit H-18.

JOHN JACOB CLUTZ was sworn and testified as follows.

Direct examination.

(Applicant's Exhibit No. H-18, Witness Clutz, was marked for identification.)

By Mr. Lucas:

Q. Mr. Clutz, the document that has been identified as Exhibit H-18, was that prepared under your supervision and direction?

A. It was.

Q. Will you state very briefly, please, the purpose of Exhibit H-18?

A. In Exhibit H-5, on pages 5 and 13, certain data with regard to interchange between the T. P. & W. and its principal connecting carriers is shown, and that applies only to revenue, road haul cars, as noted in the footnote on page 5 cars receiving only switch movements on the T. P. & W. and/or its connections are excluded.

Now, the purpose of Exhibit H-18 is to further break down the figures on pages, rather in column 8 on page 5 and [fol. 761] column 6 on page 13 of Exhibit H-5 to show for, statistically and graphically the interchange by interchange points and by cars received by the T. P. & W. and cars delivered by it to the connecting carrier.

Page 1 of Exhibit H-18 shows this statistically, and will be noted that the total figures for each road shown

column 4 are the same as those in column 6 on page 13 of Exhibit H-5, and in so far as the Pennsylvania and the Santa Fe are concerned can be derived from the figures in column 8 on page 5 of Exhibit H-5.

Page 2 of Exhibit 7 of Exhibit H-18 are maps showing the same information graphically at each interchange point the number of cars received by the T. P. & W. from the connecting carrier and the number of cars delivered by it to the connecting carrier are shown with arrows pointing either toward or away from the T. P. & W. but appropriately with the number of cars shown by a numeral.

Q. And the arrows to which you have just referred will show the cars received and the cars delivered?

A. That is correct.

Q. That is, they are directional arrows, are they not?

A. That is correct. The arrow pointing toward the T. P. & W. are cars received by it and the arrow pointing away from it are cars delivered by it to the connecting carrier.

Q. Is it correct that the seven principal connections only [fol. 762] are shown for road haul freight?

A. That is correct.

Q. What about cars interchanged in switching service?

A. Those are excluded. It includes only cars involving a road haul both on the part of the connecting carrier and the T. P. & W.

Q. I note on page 1 there has been inserted the word "carload"?

A. That is correct.

Q. That you intend to have in addition to the heading?

A. We wish to make it clear this did not include any empty cars.

Q. May we summarize what you have said that this additional statistical data shown on page 1 and pictorially on the additional pages of H-18 is from the same sources as the statistics that appear in Exhibit H-5?

A. That is correct.

Q. And particularly to pages to which you have addressed your testimony?

A. That is correct.

Mr. Lucas: I believe that is sufficient.

By Mr. Lucas:

Q. Beyond that, does the exhibit pretty much speak for itself in your opinion, Mr. Clutz?

A. That is the purpose.

Mr. Lucas: I believe that completes the direct, Mr. Examiner.

Exam. Albus: Is there any cross-examination?

[fol. 763] Mr. Wheeler: I have a question.

By Mr. Wheeler:

Q. Do you have the entire information with respect to the Pennsylvania at Chicago and at St. Louis—east St. Louis Gateways? I had thought I had obtain that information from Mr. Carpi when he was on the stand, but in reading the record I found it was not there and I was wondering if you had that information with you.

A. Interchange with whom?

Q. Your total interchange at the Chicago Gateway and your total interchange at the St. Louis Gateway?

A. I do not have it here, but I think we can get it.

Q. Would you supply that information for the record?

Mr. Lucas: I think probably if Mr. Wheeler will address us in written form so we can be sure we know what he wants and what we supply meets the request.

Exam. Albus: Very well.

Do you have any cross-examination, Mr. Wheeler?

Mr. Wheeler: Only this.

Cross examination.

By Mr. Wheeler:

Q. On page 2 of this exhibit referring to the Atchison, Topeka and Santa Fe you show arrows going both ways out of Lomax. That is intended to indicate that that is the total interchange at Lomax?

A. That is correct.

Mr. Wheeler: Mr. Examiner, addressing myself to my

[fol. 764] previous request, I am just wondering how we

are going to handle this in so far as having it made a part of the record, that that is the interchange figure and the other information that I am going to request of the Pennsylvania by this letter to Mr.—

Exam. Albus: Will that information be presented before the hearing closes?

Mr. Lucas: Mr. Examiner, we will be very glad to develop it as rapidly as possible. If Mr. Wheeler could give me, say, either later in the day or tomorrow his several requests that he has asked for, we will send it immediately, and it might possibly be a late filed tabulation.

Exam. Albus: I know, but I would like to avoid that if it is possible to do so.

Mr. Lucas: We would too.

Exam. Albus: If you will get your request to Mr. Lucas as soon as you can, Mr. Wheeler, and as soon as the information is compiled we will get it in the record before it closes, otherwise, we will make the information a late filed exhibit.

Mr. Lucas: Much detail through Chicago and St. Louis that would mean almost a revenue study. I think we are getting into some pretty voluminous data. But if it can be held down to the limits of this case and some approximation, why, we will be glad to furnish that as quickly as we can.

Exam. Albus: That will be fine. Thank you very much. Mr. Cassell, please.

[fol. 765] Cross examination.

By Mr. Cassell:

Q. Mr. Clutz, on your Exhibit H-18, on page 2—4, I beg your pardon, you have shown the interchange with the Rock Island as item 4, and this is again reproduced graphically, as you say, on page 4, isn't that right?

A. That is correct.

Q. Now, let's turn to page 4 and directing your attention to Peoria where you have two arrows shown above it, do you know whether that traffic went out over the line which angles to the northwest and to which you have nota-

tions C. R. I. & P. R. R. or over the other line to the northeast which has no designation on it?

A. No, sir.

Q. Do you have any information in your figures as to whether or not any of that traffic which is shown coming to and from Peoria via the Rock Island passed through Kansas City?

A. No, sir.

Q. Do you know the origin or destination of any of that traffic which you have shown in those 2 figures and by the arrows at Peoria?

A. I believe we could derive the origin and destination states only.

Q. But at the present time you do not know, for instance, whether that all came from the Pacific northwest or from the east or whether it came from?

A. That is correct.

[fol. 766] Q. So you do not mean to imply that this is competitive traffic?

A. No, this is to show the actual interchange at interchange points.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. You show where the figure is on this exhibit the figure 10896 with arrows pointing in two directions. Do you have a breakdown between that which goes northeast and that which goes southwest?

A. No, sir.

Q. Turning to page 1, Item 5, you have "A" Peoria and "B" Farmdale. If you will turn to page 5 which graphically shows the interchange between the TP&W and the Nickel Plate, the figures 753 and 3037 are the equivalent of "A", are they not?

A. That is correct.

Q. And the 2929 and 6871 are the equivalent of "B"?

A. That is correct.

Q. So that that represents a distinction between Peoria and Farmdale?

A. That is the way the interchange points were reported to us from the TP&W records.

Mr. Broker: Thank you.

Exam. Albus: Is there any further cross-examination?

[fol. 767] OFFER IN EVIDENCE

Mr. Lucas: May we offer the Exhibit, Mr. Examiner.

Exam. Albus: Any objection?

(No response.)

Exam. Albus: Let the record show the exhibit is received.

(Applicant's Exhibit No. H-18, Witness Clutz, was received in evidence.)

(Witness excused.)

Mr. Bagge: At this time, Mr. Examiner, I would like to call Mr. Willis Maley to the stand.

Exam. Albus: Mr. Maley, please.

WILLIS E. MALEY was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Will you state your name, sir.

A. My name is Willis E. Maley.

Q. Where do you reside, Mr. Maley?

A. I reside at 630 Chateau Place, Los Angeles 5, California.

Q. What is your business or occupation?

A. I am general traffic manager for Pacific Coast Borax Company.

Q. Would you describe the location and the nature of the business in which Pacific Coast Borax is engaged.

A. The Pacific Coast Borax Company mines and refines borates. We have our principal mine at Boron, California, with our refinery at Los Angeles Harbor, California.

Q. Would you describe briefly your traffic experience and [fol. 768] tell us what organizations national in character of which you are a member.

A. Well, I have been traffic manager for the Pacific Coast Borax Company since 1946. Prior to that time I was in their traffic department for seven years. I have been most recently Chairman of the Freight Traffic Section of the California Manufacturers' Association, member of the Committee of its Car Service and Transportation Division.

I am Vice-Chairman of the Freight Claims Committee of the National Industrial Traffic League. I am a member of the board of directors of the League and a member of the executive committee.

Q. Would you describe briefly what might be characterized as Pacific Coast Borax's truck as contrasted with its rail markets.

A. Well, our truck traffic is limited primarily to local delivery. Our rail service, I say, is between 95 to 97 per cent of our business, is handled by rail service.

Q. I take it, then, that you are dependent to a large extent upon rail service for the distribution of your products?

A. Yes.

Q. Would you describe the extent to which Pacific Coast Borax uses the TP&W Railroad as an intermediate carrier.

A. We use approximately 450 cars a year over the TP&W.

Q. How long a period of time has the Pacific Coast been making use of the TP&W?

[fol. 769] Q. How long a period of time has the Pacific Coast been making use of the TP&W?

A. To my knowledge, since 1939. It was apparently being used prior to that time.

Q. What specific factors motivate Pacific Coast Borax to utilize the services of the TP&W Railroad as an intermediate carrier in the transcontinental movement of your traffic?

A. Well, it has been our experience that it is one of the fastest connections that we have between the originating and destination carriers of which are the Santa Fe and, to a large extent, the Pennsylvania Railroad. We avoid the Chicago gateway, and in more recent years we have been

dependent a great deal upon prompt passing reports for lease-covered hopper cars which we have in our service and it has been very helpful to us to be able to receive this information promptly.

Q. And those services are available to you, are they, by the use of this routing?

A. That is correct.

Q. Are you familiar with the application which has been filed by the Santa Fe and Pennsylvania Railroads in Finance Docket 18991?

A. I am.

Q. Have you read that application, sir?

A. Yes, I have.

Q. What is the position of Pacific Coast Borax and what [fol. 770] is your position with reference to the application of the Santa Fe and Pennsylvania Railroads to acquire the TP&W?

A. We are in favor of the application.

Q. Now, would you tell us briefly what specific reasons the Pacific Coast Borax has for supporting the positions in Finance Docket 18991.

A. We are primarily a Santa Fe shipper, located on the Santa Fe at Boron, and, using transit services at our refinery, we therefore originate a large portion of our traffic via Santa Fe. The Pennsylvania Railroad is the largest terminating line in the East for us, and it is the most logical situation for us, as far as we can see, to have the two roads that are primarily involved with our traffic interested in the TP&W owning that stock and seeing that the railroad is operated.

We are interested in seeing that the railroad is kept an independent operation with the services provided that they are now providing, or improved services, if possible.

Q. Does the largest volume of your traffic move via the Santa Fe and then the TP&W at Lomax, is that correct?

A. That is correct.

Q. In connection with your routings and your use of the TP&W, are any other routings used other than Santa Fe, Lomax-TP&W, Effner to the Pennsylvania?

A. Yes, we have approximately, I'd say one-third of our TP&W traffic is moving to Lomax, Peoria and C&IM.

[fol. 771] Q. Would you describe that, please? To what destination is that?

A. That is moving primarily into the Ohio regions.

Q. It moves via the TP&W to the Chicago and Illinois Midland, is that correct?

A. Yes, and thence B&O to destinations.

Q. What is the junction to which that traffic is interchanged from the TP&W to the CP&IM?

A. Peoria.

Q. Now, in connection with your routings over the TP&W, are there any other connections which Pacific Coast Borax utilizes?

A. Yes, we use the Keokuk gateway on cars where we have used Burlington or Rock Island DF cars and are giving them a haul because of use of their cars and we want to route with TP&W. We also use frequently Burlington covered hoppers by the TP&W gateway for the same reason.

Q. Is it a fact that in connection with your use of cars that you will route, give the Rock Island or the Burlington its long haul, but you specify Keokuk?

A. Yes, we do.

Q. If you did not specify Keokuk on a routing via the Rock Island Railroad and specify the TP&W, where would the Rock Island take that haul?

Mr. Cassell: I object to that.

Exam. Albus: On what ground?

[fol. 772] Mr. Cassell: No showing that he would be in a position to know what the Rock Island does with it.

Exam. Albus: Objection overruled.

Do you have an answer to that?

A. I don't know of any other connection which the Rock Island could take it to the TP&W on except Peoria. If TP&W was in the routing, as I understand it, it would move over Peoria.

By Mr. Bagge:

Q. Is it not a fact that railroads move traffic via their longest haul?

A. That is correct.

Mr. Broker: I object to that.
Mr. Cassell: I object to this.
Exam. Albus: The objection is sustained on that.
Mr. Bagge: All right.

By Mr. Bagge:

Q. On a movement which you have described from the Burlington Railroad, if you specified Burlington, thence TP&W, without specifying Keokuk as a junction, do you have an opinion as to where the Burlington would interchange that car with the TP&W?

A. It is my understanding they would interchange at Peoria.

Q. Why is that, sir?

A. Because they normally take the longest haul that they can get where the junction isn't specified.

[fol. 773] Q. Now, sir, are you an is Pacific Coast Borax interested in maintaining the gateways which you have described at Keokuk and with the C&IM at Peoria?

A. We are.

Q. What effect would the granting of the application have, that is, the application of the Santa Fe and Pennsylvania Railroads, to acquire control of the TP&W have on service via these gateways?

A. It is my understanding the service would be maintained.

Q. Why do you say that, sir?

A. It would be in the interest of the carriers involved to maintain these routes because, if they didn't, they would then lose a certain portion of the route or the traffic involved which they are now handling, that is, if they didn't maintain the Keokuk gateway, then the cars would normally move to Peoria and they would just then reduce their revenues by that amount.

Q. Which carriers do you mean?

A. The Santa Fe or the interested carrier, the TP&W, the Santa Fe and the Penn.

Q. With regard to the connection with the C&IM would you describe why you believe that that connection would be maintained?

A. Well, if the connection were not maintained via the C&IM the cars could move to Nemo via the M&StL and thence to Peoria and then C&IM.

[fol. 774] Q. Is it a fact alternatives routes are available and those connections were not maintained and service was not continued to be maintained?

A. That is correct.

Q. In view of the foregoing do you have an opinion regarding the necessity for stock ownership on the part of these other connecting carriers to maintain their relative positions in these connections with the TP&W?

A. Because it would be in the interest of the Santa Fe and the Penn to maintain these routes and develop all the possible traffic. I don't believe it would be necessary for other lines to be involved in the stock ownership.

Q. To what extent does Pacific Coast Borax specify the routing, on your over-all traffic, just generally?

A. About 80 to 85 per cent of the traffic we route.

Q. In these routings do you specify junction points?

A. Normally, no, except where we have a hopper car or a DF car where we feel that it is necessary to do that to—

Exam. Albus: Who routes the other 15 or 20 per cent?

The Witness: The customers, it is on customer request.

Exam. Albus: The consignees?

The Witness: Right.

By Mr. Bagge:

Q. Mr. Maley, you are aware of the fact that the M&StL Railroad has petitioned this Commission for authority to acquire the TP&W, are you not?

[fol. 775] A. Yes.

Q. What is the position of Pacific Coast Borax with respect to the possibility of the M&StL acquiring control of the TP&W?

A. We feel that the financial stability of the railroad would be better enhanced by having the two large carriers who are primarily involved in the traffic that is handled between the east and the western parts of the United States owning the railroad, to have a smaller railroad who proposes to introduce economies, handle the railroad, we feel

could very well lead to a reduction in the type of service that we would get over the Lomax gateway, which to us is the normal direct route.

Q. Now, in saying that has Pacific Coast Borax shipped cars over the M&StL?

A. Oh, yes.

Q. Your answer is based, having in mind what your experience has been with them as a carrier, is that correct?

Mr. Wheeler: Just a moment.

Mr. Bagge: I will withdraw the question.

By Mr. Bagge:

Q. Now, Mr. Maley, if you were assured that the M&StL agreed to the imposition by this Commission requiring that service be maintained over the west end of the TP&W would your attitude change with respect to the desirability of the M&StL's acquiring the TP&W Railroad?

A. Well, I feel that it would be better to have a route for service maintained on the basis of its economic ability [fol. 776] to stand on its own rather than on a prescription of the Commission that traffic that was handled that way could very well be handled via Nemo and that the solicitation would be via Nemo since that is the normal route on the preponderance of traffic—

Mr. Wheeler: Mr. Examiner, I move that this answer be stricken on the ground that the witness is now testifying about something he can't possibly know the answer to, and that is with respect to future solicitation policies of the M&StL in the event they acquire this property.

Exam. Albus: That portion of it could be stricken.

Read the answer so far.

(Answer read.)

Exam. Albus: That answer is in response to his experience as a traffic manager. I am going to let it stand. You can take it up with him on cross-examination where he got it.

Are there any further questions?

Mr. Bagge: No, that is all I have of this witness, Mr. Examiner.

Cross examination.

By Mr. Wheeler:

Q. When your traffic moves over the Santa Fe and T. P. & W. where is your interchange point?

A. Lomax.

Q. Didn't you just testify that the normal route was Nemo rather than Lomax?

[fol. 777] A. No, I said that I would assume that the normal route would be Nemo if the M&StL were in control of the—

Q. (Interrupting) Why do you make that assumption?

A. Because the preponderance of traffic on the M&StL now moves over the Nemo gateway in coming from the northern part of the country.

Q. Do you think if the M&StL owned a 100 per cent of TP&W would have no interest in the latter?

A. I think they would have interest but they are saying they would introduce economies, and one of the economies that could be introduced was to handle all the traffic possible via the route where the largest preponderance of traffic is now moving.

Q. Where did you hear this testimony with respect to the introduction of economies by the M&StL?

A. It is named in their application, as I recall, in reading the application, it states that they plan to introduce economies which would be beneficial both to themselves and the TP&W.

Q. Do you know what the nature of those economies are?

A. No, I don't. I am only assuming that they would be—

Q. (Interrupting) Abandonment of the Lomax Peoria route?

A. Not certainly if the Commission prescribed that as a condition of the sale that they were to maintain the service, but they would certainly try to keep all the traffic possible moving via one route.

[fol. 778] Q. And that is the basis upon which your testimony is based, is that correct?

A. It is on that basis.

Q. It is on that assumption?

A. That is one of the bases, yes.

Q. I want to know all the bases. What other bases other than you think they would want to concentrate the traffic between Nemo and Peoria?

A. As I said, prior to that the maintenance of the road by prescription rather than by economic feasibility to me isn't sound. It is better that a route be mantained because it is an economical route and the movement is normally there.

Q. Now, you moved away from your prior testimony. We were talking about economies, the economies that might be effected, and you said that economies might be effected with respect to the Lomax, Peoria gateway, or route, did you not, and that was the reason you thought that the M&StL would move the traffic through Nemo rather than Lomax, is that not correct?

A. I don't recall that I said that.

Q. What is your testimony as to why, if the M&StL acquires the property, your traffic will flow through Nemo rather than Lomax?

A. Will you go back and read my testimony, then?

Exam. Albus: No, the record will show what you said. The thing is what do you want to say now?

[fol. 779] A. My testimony was that we would oppose the, or be opposed to the acquisition of the TP&W by the M&StL even if the agreements was made that, one of the conditions was made that the route via Lomax was to be maintained because we felt that the route should be maintained on an economic basis rather than on a prescription by the Commission. That was the first point I made.

The second was that we felt that if the M&StL acquired the TP&W the tendency would be for the traffic to be solicited via Nemo because the preponderance of the M&StL traffic moves via Nemo to Peoria and if they were introducing economies it would seem logical to us that one of the economies would be to get all the traffic possible moving by a route where they are now handling the volume of traffic.

Q. And those are the bases for your position?

A. That is correct.

Q. In favor of the Pennsylvania-Santa Fe application as against the M&StL, is that correct?

A. Yes.

[fol. 780] Q. You say that at the present time, as to one of your reasons you said, the M. & St. L. now solicits for the Nemo-Peoria route?

A. Correct.

Q. Why do they now solicit for that route?

A. That is their only route.

Q. Why don't they solicit for the Lomax-Peoria route?

A. Because they don't have any interest in it.

Q. Would you expect them to do otherwise?

A. No.

Q. Would you expect, if they owned the Lomax-Peoria route, that they might solicit for that route providing it was an economical route for them?

A. I expect they would.

Q. If it were shown that the Lomax-Peoria route would be highly desirable from an economic standpoint to the M. & St. L. in the event it acquired the T. P. & W. one of the reasons for your conclusions would be eliminated, would it not?

A. But if it were shown then I'd think one of the reasons stated in the M. & St. L. application wouldn't have been necessary, that they agree to the prescription by the Commission in keeping that route open.

Q. Are you aware of the fact that the Santa Fe-Pennsylvania application has a similar agrees to the prescription of a similar condition?

A. I am.

[fol. 781] Mr. Broker: I object. I don't think it agrees to the same condition. So I don't know whether you are asserting that as a fact.

Mr. Wheeler: I asked this witness whether he was aware that there was a similar prescription.

Mr. Broker: Thank you.

A. As you recall the Santa Fe-Penn application has agreed to keep all routes open.

By Mr. Wheeler:

Q. Do you think that the routes which they agree to keep open which are not economic to them they will let deteriorate, that is, the Pennsylvania-Santa Fe?

A. I don't think so.

Q. Wouldn't that be consistent with your prior testimony with respect to what M. & St. L. would do with the Lomax-Peoria run, if it was kept open solely on the basis of prescription rather than economics?

A. Well, many of the other routes which the T. P. & W. is now involved in there are also routes which could result in a lessening of the traffic, the revenue to the railroad.

Q. To what railroad?

A. To the T. P. & W. and by that to the Penn-Santa Fe and their ownership of that railroad.

Q. So it might be to their detriment, it might be to the Santa Fe-Penn, to maintain some of these routes open?

Mr. Bagge: I object to that. That is precisely what he [fol. 782] did not say, Mr. Examiner.

Mr. Wheeler: I have the witness on cross-examination, Mr. Examiner. I think I am entitled to ask him the question.

Exam. Albus: Very well.

Mr. Wheeler: Would you read the question back to him, please?

(Question read.)

By Mr. Wheeler:

Q. Isn't that correct?

A. It might be to their detriment to close them is what I said.

Q. Might it not be to their detriment to keep them open also?

A. No, I can't see where it would be.

Q. You don't think that the preservation of all of these gateways might be against the economic interest of the combination Santa Fe-T. P. W.-Pennsylvania, is that it, is that your statement?

A. I don't think it would be.

Q. And you think that testimony is consistent with your testimony with respect to the operation of the Lomax-Peoria route by the M. & St. L.?

A. Yes, I do.

Q. Would the T. P. & W. be short hauled if traffic were given to the Nickel Plate at Peoria rather than carried to Effner?

A. Yes.

Q. Would it be to the detriment of the T. P. & W. to be short hauled? You answer the question yes or no and then give your explanation.

A. Yes, it would be to the detriment of the T. P. & W. to [fol. 783] be short hauled unless the alternative was that they would not get the traffic at all. In the maintenance of these routes they get a certain amount of traffic which could very well move other gateways and not in connection with the T. P. & W. at all.

Q. The same would be true with respect to the T. P. & W. regarding the Lomax-Peoria route, would it not, if they would not otherwise get the traffic, if they closed that route, it would be to their detriment to close it, would it not?

A. I don't understand the question.

Q. Just as it might be to the detriment of the T. P. & W. to close its gateway or its route with the Nickel Plate because it would lose the entire movement off the Nickel Plate so might it not be to the detriment of the T. P. & W. to close its Lomax-Gateway, might it not?

A. Under what ownership?

Q. Under the ownership of the M. & St. L.

A. No, I don't think so because it could then move via Nemo.

Q. Supposing the traffic did not move via Nemo?

A. Then the traffic could move via any other route if the M. & St. L. were soliciting the traffic via Nemo as compared to traffic via Lomax, I don't see that it would be to the detriment of the T. P. & W. if controlled by the M. & St. L. to have the traffic move over Nemo.

Q. Supposing the Santa Fe solicited the traffic either via Chicago or Lomax and that was the alternative, would it be [fol. 784] to the interest of the T. P. & W. to maintain Lomax Gateways?

A. Yes.

Q. Under control by the M. & St. L.?

A. Providing the traffic was solicited either one gateway or the other, yes.

Q. Now, you say you have shipped over the M. & St. L. Has the M. & St. L. accorded you good service on those shipments?

A. They have.

Q. Do you have any reason to believe that you would get any inferior service from that that you now receive on the M. & St. L. if they acquired and ran the T. P. & W.?

A. No.

Q. And as a shipper you are primarily interested in service, is that correct?

A. Yes.

Q. Would you have a preference—wouldn't you rather see the T. P. & W., instead of having it an independent operation or a joint operation, wouldn't you rather see the Santa Fe absorb the T. P. & W. by itself?

A. No.

Q. Why not?

A. Because they are our major connection with the Pennsylvania Railroad and it is in the interest of the service to have, as far as we are concerned, to have the two major lines involved in the T. P. & W.

[fol. 785] Q. Do you have a preference for having as few, in general do you have a preference for having as few, railroads in your routing as possible?

A. Yes.

Q. So that the introduction of an additional road is the introduction of an undesirable factor in your routing, is it?

A. That is correct.

Q. Have you been satisfied with the service you have been getting from the Santa Fe and the Pennsylvania and their service in connection with the T. P. & W. in the past?

A. Yes.

Q. Do you believe that the T. P. & W. route and service you receive over it will be altered in any way regardless of who acquires the property?

A. Well, I wouldn't be testifying as I have if I didn't believe that.

Q. Now, you have given us what basis for that conclusion?

A. That I felt that the service might be altered if the M. & St. L. acquired the T. P. & W.

Q. And that is the basis that you have previously given with respect—that is based on your testimony with respect to the Peoria-Lomax route, is that correct?

A. Yes.

Q. Wouldn't you prefer to see the Pennsylvania and the Santa Fe take the T. P. & W. and split it equally between [fol. 786] them, merge it into their lines?

A. No, I feel that with the representation and the independent operation of the railroad that we are able to get a more personal service from the route.

Q. A more personal service?

A. A more personal service in obtaining the passings, the information that we need on our covered hopper cars.

Q. You mean you wouldn't get that information from the Santa Fe—you say the Santa Fe controlled or merged the west end of the T. P. & W. into their operation, do you believe you wouldn't get that information from the Santa Fe?

A. Not as personally as we do now.

Q. Where are you located?

A. Los Angeles.

Q. Where is the Santa Fe located? A. Los Angeles.

Q. You believe you would get better personal service farther away than you would closer at home?

A. I didn't say that.

Q. Well, I am asking you.

A. No, I don't think you would.

Q. Will you explain this personal service that you speak of?

A. The T. P. & W. has representatives in Los Angeles who are soliciting that business very actively in connection with the T. P. & W. The Santa Fe would be soliciting it just [fol. 787] as a part of their route, and we are able to, by the personal contact with the representatives of the T. P. & W., to get the information that we need promptly and personally.

Q. It really doesn't make any difference to you, then, whether or not you are contacting a representative of a railroad personally or whether you are contacting the home office personally, is that correct?

A. Well, it has been our experience that we get the better service from having the personal representatives there. I

don't know about contacting the home office of the railroad. We don't contact the home office of the Santa Fe.

Q. But you get adequate service without contacting the home office, is that correct?

A. That is correct.

Q. And that is their representatives?

A. Yes.

Q. If after acquiring the T. P. & W. the Santa Fe-Pennsylvania were to abandon it, wouldn't the Santa Fe get a longer haul to Chicago?

A. Not necessarily. They might then give it to the M. & St. L. at Nemo.

Q. To go into Peoria?

A. Yes, sir.

Q. And thence?

A. Any other connections.

[fol. 788] Q. To the Nickel Plate, for instance?

A. To the Nickel Plate.

Q. Didn't you testify on direct that you intend to give the originating carrier the long haul?

A. Yes, we do.

Q. What percentage of your traffic over the Santa Fe goes to Chicago as compared to Lomax?

A. This will have to be an estimate. I would say comparing the two that the Lomax traffic is about 50 per cent of the traffic that goes to Chicago.

Q. Does that mean that of the total traffic moving over the Santa Fe from your company eastbound that gets to Lomax and goes through the Lomax Gateway?

A. Would you ask that again?

(Question read.)

Mr. Wheeler: I will give you another question.

By Mr. Wheeler:

Q. Does that mean that twice as much traffic from your company moves through Chicago as moves through Lomax?

A. Correct.

[fol. 789] Q. Does the Santa Fe solicit the long haul to Chicago from you?

A. They solicit primarily Illinois junctions. They, of course, express a desire for the Chicago traffic but they don't object greatly to the Illinois junctions.

Q. When you speak of Illinois junctions, are you speaking about Lomax?

A. Lomax, Nemo, Streator.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. You said the Santa Fe solicits primarily Illinois junctions?

A. Correct.

Q. What they are interested in is the long haul west of Illinois, isn't it?

A. That's right.

Q. So they would much prefer the long haul west of Illinois rather than the haul from Keokuk east on the TP&W, wouldn't they?

A. Would you repeat that question?

Q. They would much prefer the long haul west of Illinois rather than trading that for a haul on the TP&W east of Keokuk, wouldn't they?

A. Yes.

Q. And you said your normal gateway is Lomax, isn't it?

[fol. 790] A. Correct.

Q. You are located on the Santa Fe?

A. Correct.

Q. It is only the exceptional shipment that doesn't go out through that gateway, isn't it?

A. That is right.

Q. So you really have no interest in any other east-west gateway, do you, with the TP&W?

A. Other than—

Q. (Interrupting) Rather than Lomax?

A. Yes, we are interested in Keokuk, because we depend on the bridge lines in many cases, that is, the Rock Island and the Burlington particularly to supply us with DF cars and with covered hopper cars.

Q. How many times a year does that occur, those shipments?

A. I can't recall offhand. I know that we are using four, five, maybe ten Rock Island cars, DF cars, a month, and as many Burlington cars. They don't all, of course, move in connection with the Pennsylvania or the TP&W.

Q. I am then going back to one of your questions that you made on direct. I am not sure whether I understood you correctly or you perhaps mis-spoke yourself. You said if the Rock Island got a haul it would interchange with the TP&W at Peoria, didn't you mean Keokuk?

A. If we show the junction, the Keokuk junction, yes, [fol. 791] they interchange at Keokuk, but if we don't show the junction in connection with the TP&W they interchange at Peoria.

Q. How do you know that?

A. It is my understanding they do. I don't know it.

Q. You don't know that?

A. No.

Q. Do they have a service route via Peoria from your origin?

A. I believe they do.

Q. Do you think that a carrier would risk loss of business by moving it over a route which took one or two or three more days in transit time than another route?

A. In handling dead freight I think it is possible they would, yes.

Q. The Santa Fe has an interchange with the TP&W at Eureka, which is about, oh, some miles east of Peoria, wouldn't they then use their Eureka connection with the TP&W fo their eastbound shipment?

A. I don't know. I guess it would depend on what their dividend setup was and what the general economics of the operation were.

Q. The same would apply to the other route, couldn't it?

A. That is right.

Q. You really don't have any information as to that Peoria route of the Rock Island, do you?

A. No, I don't.

[fol. 792] Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. In discussing the M&StL you said that you opposed imposition of conditions as a means of protecting service, is that right?

A. That is correct.

Q. Now, that would apply to any railroad, wouldn't it?

A. Right.

Q. In other words, you are not just singling out the M&StL?

A. No.

Q. Now, why is that?

A. Well, those conditions can be changed at a later date under application to the Commission. It doesn't seem to me it is economical to have to depend on the imposition of the conditions to maintain something, that the service should be maintained on the economics of it rather than on the prescription by the Commission.

Q. Do you think that even without going to the Commission solicitation can be used to direct the flow of traffic or to influence a shipper in the routing of cars?

A. Yes, I do.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions on cross-examination?

[fol. 793] (No response.)

Exam. Albus: Is there any redirect?

Mr. Bagge: Yes, sir.

Redirect examination.

By Mr. Bagge:

Q. What percentage of your total traffic moves Chicago versus Lomax at the present time? Just an approximation.

A. I would say roughly about 20 per cent of our total traffic destined to points beyond the Chicago-Peoria-St. Louis gateways moves via Chicago and about 10 per cent of it moves via Lomax, Peoria.

Q. Now, would you state what you understand the Santa Fe's solicitation policy to be in connection with the present routing via Lomax as related to Chicago?

A. Well, actually the Santa Fe's policy, as I said before, has been to solicit by Illinois gateways, or Illinois junctions, and within the last year or two years I think it is because of the service involved they have tended to lean toward the Lomax gateway about as freely as they do the Chicago gateway.

Q. Now, sir, do you know what the solicitation policy of the Santa Fe will be in the event that they are granted a 50 per cent ownership in the TP&W?

A. We have been informed that it would be the same, they would solicit it Lomax equally with Chicago.

Mr. Bagge: Thank you.

[fol. 794] Exam. Albus: Is there any recross?

Mr. Wheeler: No, sir.

Exam. Albus: You are excused, sir. Thank you very much.

(Witness excused.)

[fol. 795] Mr. Lucas: Mr. Examiner, I will call Mr. Schmidt as the next witness.

Exam. Albus: Mr. Schmidt, please.

C. H. Schmidt was sworn and testified as follows:

Direct examination.

By Mr. Lucas:

Q. Mr. Schmidt, will you give your full name and residence for the record, please?

A. C. H. Schmidt, 5410 Lowell Avenue, Indianapolis, Indiana.

Q. You have prepared a short statement here in support of the application of the Santa Fe and the Pennsylvania railroad to acquire control of the T. P. & W., have you not?

A. I have.

Q. Will you proceed, please, with your statement?

A. My name is C. H. Schmidt and I am General Traffic Manager of Stokely-Van Camp, Inc., with headquarters located at 941 North Meridian Street, Indianapolis 6, Indiana.

After approximately ten years of railroad experience, I became associated with the traffic department of Stokely-Van Camp, Inc., in 1932, and have been Assistant Traffic Manager for twelve years until October 1, 1955, on which date I was appointed General Traffic Manager.

Stokely-Van Camp, Inc. are processors and packers of a complete line of canned fruits and vegetables and own and operate approximately sixty canning plants throughout the [fol. 796] United States. Our products are distributed throughout the country, and we also do a very substantial export business.

In my capacity, I supervise the routing of all of our tonnage and have a first hand knowledge of all available routings to permit movement in the most dispatch manner, which is a very vital factor in the distribution of our various products. Many of our customers operate on a very close inventory and it is, therefore, highly important that our shipments reach destination with the least possible delay.

I have read thoroughly and am familiar with the application of the A. T. & S. F. Railway Company and the Pennsylvania Railroad Company for authority under Section 5 (2) of the Interstate Commerce Act to acquire control of the T. P. & W. Railroad Company by purchase of its capital stock.

One of our large plants is located at Indianapolis, Indiana, and is served by the Pennsylvania Railroad; additionally, we have plants located on the Pennsylvania Railroad at Greenwood, Indiana, Milford Centre and Plain City, Ohio, Trenton, New Jersey, and Rehobeth, Delaware. We also have very large warehouses and plants located on the A. T. & S. F. at Lawrence, Kansas, and on the G. C. & S. T. at Dallas, Texas. Also have a large plant and warehouse at Alameda, California, served by A. T. & S. F. and a warehouse at Los Angeles, California, served by A. T. & S. F. Railway. We accordingly have a very substantial move-

ment between our various eastern plants mentioned above [fol. 797] and our western plants and warehouses, all of which must necessarily move in the most di patch manner.

In addition to the above inter-plant movements, we also ship from the east to various other destinations in the west and southwest where A. T. & S. F. routing is required and ship from our western plants eastbound to our own plants and warehouses, as well as direct to customers. Prompt handling is essential in connection with all of the above movements and we have found that the T. P. & W. has rendered excellent service both eastbound and westbound.

From the above, it will be noted that the most prompt possible service must be maintained in order for us to properly service our customers and our own warehouses, and as we feel that our interests can best be served by continuation of the best service obtainable, we hope that the A. T. & S. F. and Pennsylvania will control the operations of the T. P. & W. We believe that the A. T. & S. F. and Pennsylvania are in much better position to maintain the best service by acquiring control of the T. P. & W. because actually the present schedules will undoubtedly be retained and probably be improved, if at all possible.

According to the application, the revenue the T. P. & W. receives from traffic interchanged at Lomax and Effner with the Santa Fe and Pennsylvania is substantially greater than its entire revenue from other sources. This fact alone should prove that control of the T. P. & W. by the A. T. [fol. 798] & S. F. and Pennsylvania will assure continuance of this fast and dependable service which we require.

We do not see how any other carrier or group of carriers, if they acquired the T. P. & W., could hope to equal the present service which we are enjoying as their geographical location does not place them in the advantageous position enjoyed by the A. T. & S. F. and Pennsylvania.

The tonnage which we are presently routing beyond the T. P. & W. in connection with carriers other than the A. T. & S. F. and Pennsylvania, principally the N. K. P. and N. Y. C. in the east, and the C. B. & Q., C. R. I. & P. and M. & St. L. in the west, will not be affected in any way, but we do feel that the business which must necessarily

be routed via the A. T. & S. F. and Pennsylvania can best be handled if they actually control the intermediate line, the T. P. & W.

For these reasons we trust that the Commission will grant the application of the A. T. & S. F. and Pennsylvania to acquire control of the T. P. & W.

Q. Mr. Schmidt, you have just referred to the extent to which your company makes use of certain connections on the western part of the T. P. & W. Your company is interested in the maintenance of the T. P. & W. and its service and schedules west of Peoria?

A. We are.

Q. You would not wish to see anything happen that [fol. 799] would in any way impair or impinge upon the present setup of the T. P. & W. west of Peoria?

A. Definitely not.

Q. And do you use the M. & St. L., for instance, out of Peoria and up into the northwest, do you?

A. We give them considerable business into that area, yes.

Mr. Lucas: That completes the direct examination.

Exam. Albus: Cross-examination, please.

Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. I note you have shipped over the M. & St. L. Have you gotten good service from them?

A. Very good.

Q. Are you familiar with the fact that the M. & St. L. proposes new and faster time schedules between many origins and destinations on the basis of a unified operation with the T. P. & W.?

A. I understood they do, yes.

Q. From whom did you understand that?

A. From the M. & St. L. representative at Indianapolis.

Q. Would you be interested in the accomplishment of those faster time schedules?

A. Very much so if I could depend that that would be better than the present service.

Q. Haven't you found the past promises of service by the M. & St. L. representatives to be good promises?

[fol. 800] A. Substantially so.

Q. Now, the geographic location and the advantageous position enjoyed by the Santa Fe and the Pennsylvania, I take it that you refer to, are the east and west connections with the T. P. & W.?

A. That's correct.

Q. What about the Pennsylvania's route into Peoria?

A. I have used that very seldom, and I do not—the last time I used it the service was not as good as via Effner.

Q. Does your company have an interest in specialized equipment, specialized cars, railroad cars?

A. We do.

Q. Have you or officers of your company had discussions with the M. & St. L. regarding such specialized equipment?

A. So far as I know they have.

Q. Do you know the program of the M. & St. L. in this regard?

A. I do not.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. Mr. Schmidt, I take it you haven't used the service of the Rock Island very extensively, have you?

A. That is not correct. We do use the service of the Rock Island extensively.

Q. Have you found that service satisfactory?

A. Very good.

[fol. 801] Q. And have you found the management of the Rock Island cooperative, interested in your problems?

A. I have.

Q. And then you wouldn't have any reason to believe that if the Rock Island were included in here, it wouldn't still be interested in your problems, do you?

A. I definitely think they would be interested in so far as destinations or origins are concerned, so far as the Rock Island is concerned, but our business going to the

Santa Fe for points, as I outlined here, is so much greater that we definitely feel that the Santa Fe and the Pennsylvania would be in better position to maintain that service. We sincerely hope that the Rock Island will maintain as good, if not better service, regardless of who acquires it for business going to points on their line.

Q. Then your position is motivated primarily by the fact that you have your plants located in most instances either on the Pennsylvania in the east or on the Santa Fe on the west, isn't that so?

A. That is a tremendous influence in connection with my appearance here.

Q. If there were a shipper who had its plants in the east on the Pennsylvania and plants in the west on the Rock Island, its position would then, if it were similar, would support the Pennsylvania and the Rock Island?

[fol. 802] A. I presume he would, but that's not my position.

Q. I see. Now, you don't have any information, do you, that the Rock Island intends to abandon or impair any of these services if the application is granted to include it, do you?

A. I haven't heard of any, no.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. In response to a question from Mr. Lucas I think you said you were very much interested in the maintenance of the western half roughly of the T. P. & W., is that right?

A. Well, I am anxious to see that present service is maintained.

Q. I see.

A. For the through routing, both east and west.

Q. And do you think the Commission should take every precaution to protect that line of the T. P. & W. west of Peoria?

A. I do.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions on cross-examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Lucas: No redirect, Mr. Examiner.

Exam. Albus: You are excused, Mr. Schmidt. Thank you very much.

[fol. 803] (Witness excused.)

Mr. Bagge: At this time, Mr. Examiner, some of the intervenors from Keokuk, Iowa, would like to be heard, represented by their own counsel.

Exam. Albus: Very well.

Mr. Walker: Mr. Examiner, when I made my appearance here last week, I suggested to you that I was appearing for the Keokuk Chamber of Commerce, the City of Keokuk, the Hubinger Co., and the Bridge Commission.

Exam. Albus: Yes, sir.

Mr. Walker: All of which are intervenors. I have with me today as witnesses that I would like to introduce to your Honor and question the witness for the City of Keokuk, the Chamber of Commerce, and two traffic men from the area. The witness for the intervenor as to the Hubinger Co. unfortunately could not be here until tomorrow nor could Mr. Logan for the Bridge Commission, both of which are intervenors but we have these four gentlemen and with your indulgence I would like to call them.

Exam. Albus: Very well.

Mr. Walker: I will call Mr. Berryhill first.

[fol. 804] George McKinley Berryhill was sworn and testified as follows:

Direct examination.

By Mr. Walker:

Q. Will you state your full name for the Examiner, please.

A. George McKinley Berryhill.

Q. Where do you live?

A. Keokuk, Iowa.

Q. What is your business?

A. I am director of purchases and traffic for the Keokuk Electrometals Company.

Q. For how long have you been associated with the Keokuk Electrometals Company, Mr. Berryhill?

A. Well, directly with them for about 18 years.

Q. And what is your capacity with that company?

A. Director of purchases and traffic.

Q. For how long have you served in that capacity?

A. I have had that title about five years, but I served in that capacity prior to that time.

Q. How long have you been associated with traffic matters in connection with the Keokuk Electrometals Company or other companies?

A. Well, directly with the Keokuk Electrometals Company for about 18 years. I don't think that my prior experience is relevant. I was with the Express Company many [fol. 805] years ago. I always worked for a railroad.

Q. The Keokuk Electrometals Company is in what business?

A. Manufacturer of silvery pig iron.

Q. Will you explain to the Examiner what that really is and what it is used for.

A. Silvery pig iron is a material made of scrap iron, coke and silica rock and contains a certain percent of silicon. In the form of pig iron, that silicon percentage will range anywhere from maybe 10 to 25 per cent. In our particular case, our range is more nearly 16 to 17 per cent. It gets its name from the fact that when it is fractured it has a silvery appearance.

You, I believe, asked me how it is used. Well, I am not a metallurgist, but—

Q. (Interrupting) It is used in the curing of steel, is it not?

A. I understand that it is used in the beneficiation of certain steel. It is largely used in gray iron foundries for two purposes, for the introduction of silicon into the castings, for certain virtues that that has, and also because one of its virtues is the better utilization of other alloys.

Q. Mr. Berryhill, in the production of your product, is it necessary for you to use freight carriers, both into and out of your plant?

A. Yes.

Q. And what type of carrier do you use in that respect?

[fol. 806] A. Well, we use railroads, we use the truck-lines, and we use water carriers.

Q. As to the railroads that you use, do you use the TP&W?

A. Yes.

Q. And can you give me an idea about the number of cars that are shipped by your company over the TP&W yearly?

A. Last year we gave them slightly under fifteen hundred cars.

Q. Well, that was outbound?

A. Both in and out.

Q. In and out?

A. Yes, sir.

Q. You use other railroads, in addition?

A. Yes.

Q. What railroads?

A. There are four railroads serving Keokuk, the TP&W, the Wabash, the Rock Island and the CB&Q.

Q. Are you familiar with the application of the Santa Fe and the Pennsylvania to the Commission for the authority to purchase and operate the TP&W Railroad?

A. I think I am.

Q. You have, then, seen that application—

A. Yes.

Q. (Continuing) Or had an opportunity to examine it?

A. Yes.

Q. Or discussed it with counsel?

A. Yes.

[fol. 807] Q. Are you familiar with the application of the M&StL for the authority of the Commission to purchase the TP&W?

A. Well, I haven't seen the application of the M&StL.

Q. Have you had an opportunity to discuss it with counsel?

A. Not their counsel. I have seen excerpts from their application.

Q. And you have had an opportunity to discuss it with your counsel?

A. Yes.

Q. Will you explain to us in your use of the TP&W as a freight carrier for your products what points you use in that connection on that railroad.

A. Well, we are located at Keokuk, which is a terminal of the TP&W. Actually our plant is situated on the tracks of the CB&Q, who do our switching for us, but there is reciprocal switching in Keokuk and our traffic is routed by any of the four lines serving us.

Q. You would use the TP&W going east?

A. Yes, we might even use it going west, although our shipments to the west, of course, are very few, but from Keokuk to Lomax and Santa Fe on west is a good route if we are going down into the Southwest.

Q. When you say that you would use it going west, you mean that you would use the TP&W from Keokuk over to Lomax to the Santa Fe interchange?

A. That is right. Of course, the great bulk of our busi- [fol. 808] ness moves into the middle west, in what might be called central freight territory, north of the Ohio River, east of Buffalo, and, well, we will say, west of Buffalo and east of Missouri, although we have scattered shipments beyond those places. From our plant at Keokuk—now, we have another plant at Wenatchee, Washington.

Q. If you are shipping east on the TP&W, you would ship to Effner and then via Pennsylvania?

A. It depends on where it is going. We might ship via some near junction point if it was going into Illinois.

Q. Do you ship any of your products on the M&StL?

A. Our business at Keokuk with the M&StL has been comparatively small; however, we did give the M&StL about 150 cars last year for our Wenatchee plant.

Q. You have said, Mr. Berryhill, that you are familiar with the application of the Santa Fe and the Pennsylvania in connection with their desires to purchase the TP&W. Will you explain to the Examiner your position in that connection.

A. Well, of course, I have anticipated that question and I don't consider myself too readily articulate. I have made some notes on the subject.

Q. You are perfectly at liberty to refresh your memory or to read from them.

Exam. Albus: You are doing all right, too, Mr. Berryhill.

A. We were very happy with the TP&W as it was, es- [fol. 809] pecially as it has been operated in the last few years. I think it has an aggressive and progressive management who have shown an interest in the business of my company and the welfare of Keokuk. But since the present owners want to sell, I am glad that the Santa Fe and Pennsylvania want to buy it and hope that they are permitted to do so on the basis they propose. In fact, I think with an undivided financial interest the cooperation of these two fine railroads in the control of the TP&W will give it ever greater potentialities than before. The Pennsy may have slipped a little from its broad position in the world, but I think it is going to come back strong. The Santa Fe, I believe, has always been one of the best.

I don't put too much store in this, but I am a native of Keokuk, and you can tell from my middle name I have spent some years there. But I remember as a boy in hearing older people in the town say that Keokuk missed its greatest opportunity when it failed to induce the Santa Fe to cross the river at Keokuk instead of letting it go to Fort Madison. We still won't be on the main line of the Santa Fe, but they will have an interest in Keokuk that they didn't have before.

More to the point perhaps is the fact that the interests of these two railroads are not opposed to each other and the TP&W is a logical link between them that should make for faster transcontinental service and if developed it could relieve to some extent the congestion in the Chicago area, [fol. 810] which would mean some improvement in service through that gateway. Any doubt that I may have had about this proposal was removed by the assurance of the presidents of the two companies that if they are permitted to buy the TP&W on a fifty-fifty basis they will not discriminate against the TP&W in their own solicitation of traffic. The bulk of the business that the TP&W has enjoyed has been from these two lines.

Now, I understand that it got this business, not because of them, but in spite of them, by its own solicitation. With

continued autonomy of the TP&W, they should continue to get this business plus business that these two lines will now throw their way, because they no longer have as great a selfish interest in keeping it to themselves, since they will profit by the prosperity of the TP&W probably just as much as though they didn't interchange.

On the other hand, I think they have probably been tolerant of the independent solicitation by the TP&W in the past because, being natural connections for the latter, the TP&W has probably been soliciting for them as well as for itself and they have thus gotten business that might have gone to their competition by some other route. Therefore, I think that they have been friendly to the TP&W, and I think it is better to have them for friends than for enemies.

Q. Now, Mr. Berryhill, as I understand it, you as a shipper feel that you would best be served if the Santa Fe and the Pennsylvania were allowed by the Commission to purchase and operate the TP&W as an autonomous unit, is that correct?

A. Yes.

Q. Over any other plan about which you have heard or have any knowledge?

A. That is right.

Q. You are familiar with railroads and railroad practices, Mr. Berryhill, and let me ask you if you are familiar with what occurs on a railroad when a shipment is sent by a shipper from one point to another with a designation of two or three, two or more, railroads and no designation in connection with the interchange point.

A. Lord knows sometimes.

Q. But you are familiar with what happens?

A. Well, generally speaking, I think the originating carrier would treat itself to the biggest share of the cake.

Exam. Albus: Let the record show a recess until 11 o'clock.

(Short recess.)

[fol. 812] Exam. Albus: The hearing will please come to order.

We will continue with the direct testimony of Mr. Berryhill.

By Mr. Walker:

Q. Mr. Berryhill, just before recess I was advising with you about your knowledge of the railroad practice in connection with the hauling of freight where there is another designated carrier but no designated interchange point. You told me that it was your understanding that railroads in most instances carried their freight on their own line as far as possible. I will ask you if you know or have an opinion with regard to what happens to freight eastbound that is designated over the Rock Island and the TP&W if no interchange point is mentioned.

A. I do not.

Q. And do you have any ideas at all as to where the interchange points of the Rock Island and the TP&W are?

A. Well, one is at Keokuk and there is another at Peoria.

Q. But you are not familiar with how they interchange if there is no interchange point designated?

A. No. It would only be speculation on my part.

Exam. Albus: That is all right, Mr. Berryhill. If you don't know, just say so.

Mr. Walker: I think that is all.

You may inquire, Mr. Wheeler.

Exam. Albus: Is there any cross-examination?

Mr. Wheeler: Yes.

[fol. 813] Exam. Albus: Mr. Wheeler, please.

Cross examination.

By Mr. Wheeler:

Q. Mr. Berryhill, you said you shipped over the M&StL. Did you find their service good?

A. Yes.

Q. You stated that you understood from the testimony here that the Pennsylvania and the Santa Fe would not discriminate against the TP&W. I gather you meant in their solicitation?

A. That is right.

Q. Are you familiar with the testimony given by Mr. Symes to the effect that they would solicit it first for their St. Louis-East St. Louis gateway?

A. No.

Q. Did you hear the testimony of Mr. Gurley?

A. No, sir.

Q. So that your statements in that regard were based on something somebody told you regarding that, isn't it?

A. That is right.

Q. Do you understand that the Pennsylvania and the Santa Fe would be, to use your words, enemies of the TP&W if they don't get control of that railroad?

A. Enemies is a rather hard word and I am sorry I used that, it was only to emphasize the contrast between friendly relations and a relationship that might exist if they were competitive. Competitors are sort of friendly enemies.

[fol. 814] Q. In other words, you think their solicitation policy with respect—your testimony is based on your belief that their solicitation policies, that is, of the Pennsylvania and the Santa Fe, would be different if they controlled the TP&W than it is now?

A. Yes, if my understanding of what they have been doing is correct.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell, please.

Cross-examination.

By Mr. Cassell:

Q. Mr. Berryhill, on your direct testimony I understood that you talked with members of the staff of the Pennsylvania and the Santa Fe?

A. I don't believe that I said that exactly. I believe that their attorney asked me something about discussion with counsel. It is true that I have talked with them.

Q. Whom did you talk with?

A. Representatives of these railroads?

Q. Yes, of the Santa and Pennsylvania.

A. Oh, I have talked with their new manager in New York, with their traffic manager in New York, the Pennsylvania that is. I have talked with their local representative Mr. Hemphill of Chicago. Well, I have been around

with them since I got here and I can't recall the people that I have talked to but there are a lot of them.

[fol. 815] Q. Who is the president of your company?

A. G. L. Weisenberger.

Q. Did Mr. Gurley and Mr. Symes come over to Keokuk recently?

A. I understand that they did. I don't believe that I was home then.

Q. You weren't in town when they made that trip?

A. I am not sure but I don't believe I was there.

Mr. Walker: Who is this you are speaking of?

Mr. Cassell: Mr. Symes and Mr. Gurley, the presidents of the two railroads.

By Mr. Cassell:

Q. Do you know whether Mr.—is it Wisiger?

A. Weisenberger.

Q. (Continuing) —Weisenberger was in town at that time?

A. No, I don't.

Q. Have you talked this case over with Mr. Weisenberger?

A. Yes.

Q. And do you know whether or not he has had any conversations with representatives of the Santa Fe and Pennsylvania?

A. Yes, I know of at least one conversation, and I suspect that there have been others. I think he has met, I am sure he has met Mr. Gurley and Mr. Symes, but one conversation that I know of.

Q. Was that since this application was filed?

A. Yes. When this whole thing became a problem for us to decide what our attitude was to be we were naturally [fol. 816] interested in knowing as much about it as possible.

Q. That is right.

A. And, may I—

Q. Surely.

Exam. Albus: Yes, finish your answer.

A. As a part of informing ourselves we had talked with representatives of the TP&W, the Pennsylvania, the Santa Fe, I wanted the other side of the story. Now, the M&StL people had not called on me so I made a long distance call to Minneapolis. I talked to their general solicitor, Mr. Musenbrock, I believe, to find out what the M&StL had to say about this. I talked to Mr. Capron, vice-president of the CB&Q, as to what he thought about it, and it was at that time that Mr. Weisenberger called the attorney of the Santa Fe, Mr. Starr Thomas, is it?

By Mr. Cassell:

Q. Yes, he is one.

A. (Continuing) —to find out if there had been any further developments and if he had anything to add to our little store of knowledge at the time.

Q. You said you called the officials of the Burlington and the M&StL in their home offices. Did you make similar calls to the Rock Island?

A. No. At that time I didn't know that the Rock Island was interested.

Q. Why did you call the Burlington?

A. Because the Burlington is a railroad that we count as [fol. 817] a friendly line since we are on their lines, they do our switching, we have a lot of dealings with them beyond the mere routing of cars, and I thought that since I hadn't heard them mentioned in connection with an interest in this thing that they might be able to give me sort of an objective point of view as between the one side and the other.

Q. Has it ever been suggested in any of these conversations, Mr. Berryhill, that one of the new directors of the TP&W would be located in Keokuk, to manufacture a term, could hope that there might be one, but I don't think that there has been any promise made to that effect or any mention made of that other than this statement in the contract between the Pennsylvania and Santa Fe that they would select some representative citizens along the line.

Q. Do you know whether or not any offer or intimation of a directorship has been made to Mr. Weisenberger?

A. I do not.

Q. It has not?
A. I do not know.

Exam. Albus: He doesn't know.

A. I might embellish that just a little bit. When I reported to Mr. Weisenberger I told him that I thought that that little part of the proposal was more or less to influence favorable response on the part of the people along the railroad that actually the owners are going to select [fol. 818] the directors, as they do in any other business, and the directors are going to be responsible to the owners. However, I qualified it in this manner, that there is no telling what a good man might do in such a position, and I think we can point to a couple of instances right here in this room. I was going to point to Mr. Heineman, whom I thought I recognized from his pictures, but I see his place is vacant there.

Exam. Albus: He is still taking a recess.

A. Mr. Coulter of the TP&W, I think there are cases of men in their positions who have done good jobs. I think even though a director is a representative selected to sort of feel the pulse of the or represent the pulse of shippers along the line, although he might be something of a figurehead, if he is a good man he might have some influence, anyway.

By Mr. Cassell:

Q. In any event, you do know there has been some hope raised over in Keokuk about directorships?
A. Well, it was never a hope on my part.
Q. How about the others that you know of.
A. I heard it mentioned, and I have seen it in the contract, and I suppose you could figure that we would be proud to have a representative on the line.
Q. Mr. Berryhill, do you expect that the service in and out of Keokuk will be any different if the Santa Fe and Pennsylvania are granted this application without the inclusion of anyone else than it would today?
[fol. 819] A. Well, I think it has potentialities for even greater service.

Q. Do you expect to be put on any transcontinental routes?

A. No. We are little bit off the main line of the Santa Fe, and it will be more or less backwash as far as we are concerned.

Q. In that regard you said you had made some shipments out of Keokuk over to LaHarpe and then Lomax and the Santa Fe and you said that was a good schedule. As a matter of fact, wouldn't it take about a day in transit to get from Keokuk over to Shopton, which is just north of Keokuk?

A. Well, I think the service by Lomax is due to certain schedules that wouldn't apply via Shopton.

Q. Isn't the service that goes from TP&W and which leaves Keokuk at 6:44 p.m., is in LaHarpe at 7:32 p.m. and that is about 28 miles away, and then leaves there at 4:30 a.m.?

A. I don't know those times.

Q. You don't know the times?

A. No.

Exam. Albus: He doesn't know the schedule.

By Mr. Cassell:

Q. Do you know how long it takes to get from Keokuk to Shopton?

A. Well, from the time the train starts rolling it hadn't ought to be over an hour.

Q. If you were told that it would take a day's time to get over to Shopton would you consider that good service?

A. No, I wouldn't consider that good service. We made a [fol. 820] shipment recently by the TP&W, I believe it was to Flint, Michigan. I think it got out of Keokuk in the evening and was in the customer's plant around 2 o'clock the second day.

Q. Did that go out over Lomax?

A. No.

Q. How did that move?

A. I think that moved TP&W, I believe C&O.

Q. How many cars have you routed at TP&W, Lomax, Santa Fe?

A. Oh, it would be very few. We don't have too many shipments west out of Keokuk.

Q. If you used the Rock Island out of Keokuk westbound you would be in Kansas City within 24 hours' time with your shipment, wouldn't you?

A. I don't know that schedule either.

Q. Do you ever ship via the Rock Island?

A. Oh, yes.

Q. The Santa Fe's connection is at Lomax, isn't it, with the TP&W?

A. Yes.

Q. And if the Santa Fe is to participate in any long haul traffic, it has to move that via Lomax, doesn't it?

A. From Keokuk?

Q. No. If the Santa Fe on any shipment is going to have a long haul and move a part of that shipment over the [fol. 821] tracks of the TP&W, in order for the Santa Fe to participate in that it has to move out over Lomax, doesn't it?

A. Well, if I understand that question correctly, I don't see how else it could move. That is the only interchange point.

Q. That is the only interchange point they have on the west end. They have one over east of Peoria or Eureka. On business to or from the West we will speak of now, if they are to get a haul, if they are to get any haul at all it has to go out over Lomax, doesn't it?

A. Yes—well, you mean if the Santa Fe gets any haul at all?

Q. Yes.

A. In connection with the TP&W?

Q. That is right.

A. Well, I'd think that would be true, yes, unless they were going to put another line in there.

Q. Yes. Now, if it goes out over Keokuk, will the Santa Fe be the next carrier west?

A. Now, it is coming from the east?

Q. From the east going through Keokuk to the west, will the Santa Fe be the next carrier?

A. No, it couldn't be.

Q. The Rock Island, however, has a connection at Keokuk to the west, doesn't it?

A. That is correct.

Q. Which do you think would have the most interest in [fol. 822] the preservation of the Keokuk gateway, the Santa Fe or the Rock Island?

A. Well, that is a question that I don't think can be answered just one or the other. I think it depends upon the terms of ownership.

Q. Well, assuming they had equal ownership, which would be the most interested in?

A. You mean Santa Fe and the Rock Island had equal ownership?

Q. Yes.

A. You mean those two lines via the TP&W instead of the proposal of the Pennsylvania and the Santa Fe?

Q. Supposing you cut the Rock Island in for a third of that, of the two lines which do you think would have the most interest?

A. I think the two carriers that have applied for purchase, the Pennsylvania and the Santa Fe, make an ideal partner—

Q. (Interrupting) I didn't ask you that. I am asking about the Rock Island and Santa Fe now.

A. All right, if I have to confine myself to that, I'd simply say this, that too many cooks spoil the broth.

Exam. Albus: That has been mentioned before here, too.

Mr. Cassell: It has somewhat of a familiarity.

By Mr. Walker:

Q. You heard that, didn't you, Mr. Berryhill, before this hearing ever came about.

Exam. Albus: All right, let's have the next question, [fol. 823] please.

By Mr. Cassell:

Q. Will you answer my question in regard to which the Santa Fe or the Rock Island would have the greatest interest in Keokuk, I wasn't asking about culinary now, let's talk about Keokuk.

A. Well, I've got to come back to what I said at first, there is just more than the interchange of business at Keokuk that would affect this situation. The interchange at Keokuk is not going to keep the TP&W alive.

Q. Aren't you interested in keeping the Keokuk gateway alive, though?

A. I will say I am.

Q. Now let's come back to my question, which do you think would have the greater interest in Keokuk, the Rock Island or the Santa Fe, in keeping it alive?

Exam. Albus: Do you have any opinion as to that?

A. I can't divorce the Keokuk gateway from the welfare of the rest of the TP&W.

By Mr. Cassell:

Q. Aren't you primarily interested in Keokuk?

A. Yes, and I think that our interest lies in the whole welfare of the TP&W.

Q. Let's just settle Keokuk alone.

A. I can't do it for you.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker, please.

[fol. 824] Cross examination.

By Mr. Broker:

Q. Do you ever route TP&W and Peoria and Nickel Plate?

A. I beg pardon?

Q. Do you ever route your traffic TP&W, Peoria, Nickel Plate?

A. Yes, we do.

Q. How is the service?

A. Very fine.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions on cross-examination?

Mr. Wheeler, please.

Further cross examination.

By Mr. Wheeler:

Q. What proportion of your inbound traffic and outbound traffic is carried by barge and truck as compared to rail?

A. Truck, I think would represent perhaps half of one per cent of our dollar volume. We are substantial shippers by water. Some of our largest customers take their material by water. But regardless of the fact that substantial tonnages are shipped that way, some 95 per cent or better of our customers are served by rail.

Q. What proportion of your tonnage moves by water?

A. That has varied and water movement is a comparatively recent development, I'd say 1952, although there had [fol. 825] been shipments made by boat on the Great Lakes prior to that time by shipping rail to Chicago and transferring. It was about 1952 that we really got into barging direct from Keokuk, up the Ohio, down the Mississippi, up the Illinois and on the Great Lakes, and a variety of circumstances have mitigated against the optimum development of water transportation. Well, in the first place, you have to wait for the river to unfreeze, and that means that our customers probably can't wait for a boat to get there so they have to have some rail. But as we get into this thing we stockpiled some customers with an inventory that will last them through from the end of the navigation season to the beginning of the next. That has varied considerably for that reason, and I would say that in the past year perhaps a third of our total tonnage, not our customers, as I said before, but our total tonnage moved by water.

Q. And that represents a sharp increase in recent years, then, from 1922 to date—1952 to date, I should say?

A. Well, it has been up and down in those years. There have been years when more tonnage moved by water. There has been years when less tonnage moved.

Q. I believe you stated prior to 1952 you moved practically none by water, is that correct?

A. All the way through, no.

Q. And now a third of your tonnage moves by water?

A. That is right.

[fol. 826] Q. The general trend of the water movement is upward?

A. Yes. That's, of course, because—we'd like to see the railroads competitive with water because you don't get customers every day that can take a 5,000-ton boatload of material and you are at a distinct disadvantage with your competitors who maybe have a better rail rate who can ship a car or a few cars, as may be desired, so I'd very much like to see more of that business returned to the railroads.

Mr. Wheeler: I have no further questions.

Exam. Albus: Are there any further questions of Mr. Berryhill?

Mr. Walker: Yes, I would like some redirect.

Exam. Albus: Very well.

Redirect examination.

By Mr. Walker:

Q. Mr. Berryhill, just one or two questions. In the first place Mr. Cassell was interested in this matter of directorship in the TP&W as planned in the program of the Santa Fe and the Pennsylvania. Before I ask you anything further in that connection, tell me something about the size of the business of the Keokuk Electro Metals in the ferro silicon business in the country?

A. Now we are introducing a new term. I said that our manufacturer at Keokuk was principally silvery pig iron. Did you say ferro silicon or ferro alloys?

Q. Either one.

[fol. 827] A. That usually includes higher percentages of silicon starting above 25—

Q. (Interrupting) Let me limit it this way, Mr. Berryhill, what I am interested in is having you tell the Examiner the comparative size of the business—

A. All right.

Q. (Continuing) —of the Keokuk Electro Metals Company as to whether or not it is a small business or a large business or what kind of a business it is.

A. I guess it is kind of a middle-sized business, but we have 800 employees at Keokuk. Actually we are the largest

manufacturers of this particular commodity, silvery pig iron. Our freight bill will run pretty close to $4,000,000 a year.

Q. All right, now, then, Mr. Weisenberger is the president of that company, is that correct?

A. That is right.

Q. At the risk of putting you on the spot to answer to Mr. Weisenberger, do you think he would or would not be a competent man to serve as a director of any corporation that you know of?

Mr. Wheeler: What has these to do with the issues in this case?

Mr. Walker: It has to do with the cross-examination of Mr. Cassell who has suggested that Mr. Weisenberger has been promised a directorship on this railroad.

Exam. Albus: What is the answer to that, Mr. Berryhill? [fol. 828] A. I think he'd be a wonderful man in any business capacity.

Exam. Albus: All right.

By Mr. Walker:

Q. Mr. Berryhill, you testified on cross-examination that you felt that a strong TP&W Railroad was necessary to your plans, not just a strong connection between Keokuk and LaHarpe, but the entire railroad was and its strength was important to your plans as you saw them. Will you explain that in more detail, please.

Exam. Albus: I think that's been covered, Mr. Walker.

Mr. Walker: I thought that he missed, Your Honor, I thought he missed the explanation of why he thought it was necessary for the entire railroad to be strong and not just the Keokuk to LaHarpe branch. Now, if I am wrong—

Exam. Albus: I will permit him to answer if it is going to be brief—

Mr. Berryhill, please.

A. Of course we feel it is better to have a number of railroads represented in our community, that there is better service and better co-operation than if there is competition between them. The TP&W service has been very

good. While they do not get the largest share of our business, for other reasons we do feel that their good service has kept their competition on its toes, and that is helpful to us.

Now, the Wabash is a branch line from Bluffs to Keokuk and we have deliberately given them considerable business [fol. 829] in order so that they could afford to maintain that branch line and thus continue the service of a number of railroads into Keokuk.

Mr. Walker: I have no further questions.

Mr. Broker: I have a question now that you brought that out.

Recross-examination.

By Mr. Broker:

Q. Do you route from Keokuk east over the Wabash?
A. Do we?
Q. Yes.
A. Yes.

Mr. Broker: That is all.

Exam. Albus: You are excused, Mr. Berryhill. Thank you.

(Witness excused.)

[fol. 830] James F. O'Brien was sworn and testified as follows:

Direct examination.

By Mr. Walker:

Q. Your name is James F. O'Brien?
A. Yes.
Q. Where do you live?
A. Keokuk, Iowa.
Q. What is your business, Mr. O'Brien?
A. I am Mayor of the City of Keokuk.
Q. Do you have any other interest or business?

A. I have an abstract and title company and a loan office.

Q. Mr. O'Brien, have you had an opportunity to examine the application of the Santa Fe Railroad and the Pennsylvania Railroad in what is known as Finance Docket No. 18991?

A. Yes, I have.

Q. And have you had an opportunity to give that matter some study and to examine the proposals and the programs that have been suggested?

A. Yes, we have given it quite a bit of thought in the City Council.

Q. You say the council. You are speaking now as the Mayor and the head of the City Council in Keokuk?

A. Yes.

Q. On the basis of what your information has been, will you tell us and the Examiner your feelings about the ap- [fol. 831] plication Santa Fe and the Pennsylvania for the purchase of the TP&W?

A. Well, speaking for the City of Keokuk, we have been very well satisfied with the operation of the TP&W. We are very proud of the way they have improved their service in the last few years and they have become a very important part of our community. So we feel we are not intervening against any railroads, we are intervening for the TP&W. What we wanted is the best thing for the TP&W, not only a matter of pride, but a matter of finances. We own the bridge across the Mississippi that the TP&W and the Wabash have to use and it is a very important source of revenue for the city, so we do have a selfish interest from that standpoint.

But aside from that, in our studies of the thing, of course, we were contacted by the Santa Fe and presented with their plan. That is the only contact that has been made with the City Council that I know of. It might be all right to have a whole bunch of railroads in, but we do know what the Santa Fe proposes to do. We would like to see the TP&W left alone and operate in the way they have in the past. We have the word of both the Santa Fe and the Pennsylvania that that's what they will do. Now, of course, the Santa Fe doesn't go through Keokuk, but it's within a very few miles of us, and the Santa Fe has always been a

good neighbor to Keokuk. While these are simply promises, they are not binding probably, but we do put faith in them, but I think, not only, that if they don't keep their promises, [fol. 832] we will certainly remind them.

Q. Are you familiar with the fact that both Mr. Symes and Mr. Gurley, presidents of the respective railroads, Pennsylvania and the TP&W, have under oath here said they plan to continue the autonomous condition of the TP&W?

A. No, I wasn't aware of that.

Q. Are you familiar with the plan that has been proposed by the M&StL for the purchase of the TP&W?

A. Well, I read about it in the newspaper. I have heard it discussed at various times. That is about it. We were never directly approached on it.

Q. Well, you have discussed the matter with me, have you not?

A. Yes, I have talked it over with you.

Q. And I have given you a brief resume of what the application included?

A. Yes.

Q. On the basis of your knowledge of what that application included, from what I told you and from your knowledge of the application of the Santa Fe and the Pennsylvania for the purchase of the TP&W, do you have an opinion as to which of the two plans would be to the best interests of the City of Keokuk?

Mr. Wheeler: Mr. Examiner, I object to this. This is clearly hearsay. This is a man testifying on the basis of information turned over to him, furnished by him, by his lawyer which was only partial and a purported summary of [fol. 833] a document that the gentleman hasn't ever seen.

Mr. Walker: I don't know, Mr. Wheeler, how you define that as a purported summary, unless you want to examine this witness as to what I told him, but I have only asked him whether or not he has an opinion.

Mr. Wheeler: You so stated.

Exam. Albus? Wait a minute. He may or may not. He may express his opinion as to how the relative applications may have affected his community. There is no question about that.

Mr. Wheeler: If he has seen the applications, I would agree, but he says he hasn't seen the applications.

The Witness: I read the newspaper story.

Exam. Albus: He says he has an opinion. He can get an opinion outside the application.

You may proceed, Mr. O'Brien.

A. Well, of course, the reason we are over here intervening would be enough evidence of what we think of the various plans suggested. We know what the Santa Fe and Pennsylvania say they will do. We have not been promised anything by anybody else. We are interested in the TP&W. So why would we make any other decision? It just can't be done, that is all.

By Mr. Walker:

Q. Now, have you had an opportunity to discuss the matter or become informed about the matter of whether or not the TP&W should be owned by the Santa Fe and the Pennsylvania as opposed to the Santa Fe, the Pennsylvania [fol. 834] and the other railroads who have now made application to become a part owner?

A. Well, of course, I have discussed that several times with the council, too, and we arrived at the conclusion—

Mr. Broker (interrupting): Excuse me. I have to interrupt, I am sorry. But I understand that this petition was filed by you on the 28th of July. Do you know whether the Nickel Plate was in the case at that time?

The Witness: It wasn't filed by me on the 28th of July. I wasn't mayor until January 23. That was filed by the former mayor.

Mr. Broker: Has the city taken any formal action—

Mr. Walker (interrupting): Wait a minute. You can take this man on cross-examination in a few moments.

Mr. Broker: I know I can take him on cross-examination, but he is talking here for the city and I want to know what official action was taken by the city in respect to the Nickel Plate application.

Exam. Albus: Can you answer that, Mr. Mayor?

The Witness: That is the last thing that has been done on it officially by the City Council, on July 28.

Exam. Albus: Continue with the direct.

By Mr. Walker:

Q. Now, Mr. O'Brien, you know of the Nickel Plate's position today, do you not?

A. Yes.

Q. And your testimony is on the basis of having knowl-[fol. 835] edge as to their present position?

A. Yes.

Q. I understood you to say that you had taken the position and your Council had taken the position that the sale of the TP&W to the Pennsylvania and the Santa Fe would be advantageous over a sale to all of the railroads together. Can you give me your reasons for reaching that conclusion?

Mr. Broker: I have to interrupt again. I don't mind him giving his personal opinion, but to give the official opinion of the council on this point, I believe is objectionable.

Mr. Walker: Let me limit it to the opinion of the council as of the time you became mayor and head of the city government.

Exam. Albus: It will be his opinion. Let him state the reasons.

Mr. Broker: Excuse me, Mr. Examiner. He said the council had taken no official action since last July. How can he express an opinion on behalf of the council?

Exam. Albus: This is going to be the Mayor's opinion, not the council's.

What reasons do you have for feeling that way, yourself now, not necessarily the council.

A. Although I might add, we only have three elected officials—there are two commissioners and the mayor—and we have discussed it several times.

[fol. 836] Exam. Albus: Let's have your reasons for prefering the Santa Fe application.

A. My opinion is the less you cut up the road the better off you are going to be. I mean, just common sense kind of puts that on you. Of course, like I said before, we would be very happy if the TP&W would run just as it is running now. However, since the McNear estate wants to divest

themselves of their property, that is all right, but we feel everything possible should be done to protect the TP&W and keep it running as the TP&W and not another system. We do know what the Santa Fe and Pennsylvania propose, so it is an acceptable plan so far as I am personally concerned. Therefore, I am wholeheartedly in favor of it.

By Mr. Walker:

Q. Let me ask you one more question, O'Brien. Is the testimony you have given here today the opinion of the present City Council of Keokuk?

Mr. Broker: I object.
Exam. Albus: Objection overruled.

A. Yes, it is.

Mr. Walker: That is all.
Exam. Albus: Mr. Wheeler may cross-examine.
Mr. Wheeler: I have no questions.
Exam. Albus: Mr. Cassell?

Cross examination.

By Mr. Cassell:

Q. Mr. O'Brien, doesn't the city derive revenues from [fol. 837] the bridge used over the Mississippi by the TP&W?

A. Yes.

Q. And do you know where the cars come from and go to that are using that bridge, that are hauled over it?

A. Well, I am not too much of a railroad man myself. I do know the revenue from the bridge is considerably more now since the TP&W got active in the last few years, more active than it was before. I also realize that most of the cars that cross the bridge at Keokuk don't get there because this line wants to put it across, the other line wants to put it across, it is business that has been kind of created by the TP&W themselves.

Q. Does the Santa Fe come into Keokuk?

A. No.

Q. Does the Rock Island come into Keokuk?

A. Yes.

Q. Would the Santa Fe create any revenue for that bridge?

A. Well, I don't think either the Santa Fe or the Rock Island ever go out of their way very much to create business. What we get is by accident, you might say.

Q. Whether it is accident or not, doesn't all the revenue that that bridge gets, if it comes from either the Santa Fe or the Rock Island, all come from the Rock Island on traffic interchanged with the TP&W?

A. Yes, I imagine most of it does.

Q. And if traffic is diverted away from the Rock Island, [fol. 838] won't the bridge revenue suffer then?

A. We have given that serious consideration, I can tell you that.

Q. Isn't that a fact?

A. We arrived at a conclusion the chances are if business holds about like it is we will be lucky. We don't look for a big spurt regardless of who gets it, but I imagine they will manage to hold their own if they operate the way they have in the past and operate their own company.

Q. You are speaking of the TP&W, then?

A. Yes.

Q. Let's consider the Rock Island, if the Rock Island were to lose business moving through the Keokuk gateway, wouldn't that hurt the bridge revenue?

A. If that were true, it would, yes.

Q. And I understand what your primary interest is in, then, is maintaining the service on the TP&W, this good service you have had in the last few years?

A. Yes.

Q. You said you have had certain promises from the Santa Fe and Pennsylvania as to the maintenance of the present operation corporation and its officers, is that right?

A. Yes.

Q. And that's one of the things that has induced you to take this position?

[fol. 839] A. Yes; at least we know what their intentions are.

Q. If you were given a similar promise by the Rock

Island you would have no occasion to doubt that, would you?

A. No, we wouldn't, except you are getting back to the multiple ownership again.

Q. Too many cooks spoil the soup?

A. Well, I wouldn't phrase it quite that way.

Q. I almost asked you why not. Now, your interest is primarily, isn't it, in Keokuk?

A. Absolutely.

Q. As an elected official of that city, that is your duty, isn't it?

A. That is right.

Q. You are not a shipper yourself, are you?

A. Not a bit.

Q. And don't move carloads of abstracts?

A. No, nor money, either one.

Q. You weren't here yesterday, were you?

A. No, I wasn't.

Q. Do you know who Mr. Bagge is?

A. Yes, I have met Mr. Bagge.

Q. He is the attorney for the Santa Fe?

A. Yes.

Q. I have in front of me here the stenographic report of the hearing yesterday and on page 663 I will read you [fol. 840] part of the questions and answers. Question by Mr. Bagge: "Are there any alternatives available to you as a shipper having these routings in mind in the event that one or any of these gateways were not maintained?

"Answer: We have alternate routes we can use for almost all of the originating traffic.

"Would that include the routing from the Burlington and Rock Island Keokuk to the TP&W?

"Yes, we could route on the Rock Island-Burlington through Chicago if the gateway were not maintained for them."

Now, does that indicate to you that alternative would be in the best interest of Keokuk?

A. Well, not necessarily, no, but like I have stated before, a matter of this nature is a very important thing to the City of Keokuk. The only thing we could do was to look

into it and make up our mind on what we thought was the best on the long haul for the City of Keokuk itself. We made our decision based on that idea.

Q. You would prefer not having traffic routed via one of these alternative routes, wouldn't you?

A. In a way, when we make our decision we are faced with what is the lesser of two or three or four evils, you might say, too.

Q. Would you consider that an evil to have traffic routed via Chicago rather than Keokuk?

A. No.

[fol. 841] Q. Wouldn't you lose revenue on the Keokuk bridge?

A. Well, we are concerned about that, I will tell you that frankly, we are very concerned about losing revenue over the bridge at Keokuk, but by the same token, I don't think the Rock Island or Nickel Plate or anybody else would guarantee so many freight cars across that bridge, either.

Q. Don't you think the Rock Island would have, its connection at Keokuk would be interested in maintaining that gateway?

A. Yes, I think probably they would be. It is another gateway for them.

Q. Don't you think it would be more interested—have you heard the questions here this morning?

A. Yes, I was here all morning.

Q. And you heard that the Santa Fe would not participate immediately as a carrier west of Keokuk if traffic is routed TP&W Keokuk?

A. That is right, couldn't.

Q. And it would, if it were routed TP&W Lomax?

A. We realize that. I mean, they made no attempt to hide that from us at all. They are doing it now.

Q. Don't you think the Rock Island would have more interest in Keokuk than the Santa Fe, then?

A. Well, it is a matter of conjecture. The Rock Island, for instance, could put a lot more cars across Keokuk, if they wanted to, but they put across what they have to, [fols. 842, 843, 844] evidently. I mean, you have your own bridge, too.

Q. That is right, but just the two gateways, the Santa Fe

and the Rock Island, don't you think the Rock Island would have more interest in Keokuk than the Santa Fe?

A. Well, why should they? The business that our bridge gets from the Rock Island Road is business that is sent by request probably that way, most of it. They have their own bridge across the Mississippi. They have their choice. They are hauling across farther north than our bridge, farther south, wherever they want to cross that.

Q. Just take Keokuk-Lomax, the Santa Fe and the Rock Island, the Santa Fe is going to get a long haul west if it goes through Lomax, isn't it?

A. Yes.

Q. And the Rock Island would get a long haul west if it went through Keokuk, wouldn't it?

A. Yes.

Q. Don't you have any opinion as to who is going to have the greater interest in Keokuk?

A. Well, we know that the Santa Fe isn't going to make that their main line, we realize that. We also realize that the Rock Island aren't, either. We looked into this problem as best we could, and like I say, we come up with this decision that we were for this plan because we knew what they intended, they didn't hold any punches on it, they told us [fol. 845] that Lomax would be their chief interchange point, so we knew that. We also realized that as long as the TP&W can operate and operate as a private road they will get their share of business and we will continue about the way we are now.

Q. If the Rock Island made the same assurances as to the independent operation of the TP&W with its present management, would that change your mind any?

A. Well, of course, there you are back to the multiple ownership. If you had come to us and said the Rock Island and Pennsylvania are going to buy it, the two of you, it would look like a good deal, too, then, but when you start getting mixed up with this multiple ownership again, and if something does go wrong and we have to dicker with somebody after the deal is all through, we don't want to have to be dealing with every railroad in the country in order to get anything accomplished. It is much easier to talk to one or two than five or six in getting them to agree on something.

Q. Wouldn't you just talk to the TP&W if it is going to be separate and independent?

A. The guy that's got the money is the guy that's going to run it, in the final analysis.

Mr. Cassell: That is all. Thank you.

Exam. Albus: Mr. Broker.

Mr. Broker: I have no questions. I just want to make an observation unrelated to the witness's testimony. Ref- [fol. 846] erence is made throughout this proceeding to Logansport, Terre Haute, Chicago, Nemo, Lomax and Keokuk as gateways. Now, the only gateways that any talk has been given about at the hearing, true gateways, as I understand it, are Chicago, Peoria or St. Louis. The others are interchange points. Maybe a traffic man here can confirm that, just so that the record is clear.

Mr. Walker: It isn't any of my business, but may I suggest if a traffic man is going to do it he'd better do it under oath.

Mr. Broker: A traffic man, in any event.

Exam. Albus: I think everyone realizes that they are connection points, Logansport and all the others. I don't know what the distinction is, myself, between a connecting point and a gateway.

Mr. Broker: We will develop it in our case, then, Mr. Examiner.

Exam. Albus: That will be fine.

Redirect examination.

By Mr. Walker:

Q. First of all, Mr. O'Brien, some reference has been made by the counsel for the Rock Island here with regard to what your position would be if you had had any offers from the Rock Island. I want you to tell this Examiner whether or not you have had any offers from the Rock Island of any kind.

A. No.

Exam. Albus: I think that has been mentioned two or three times.

[fol. 847] By Mr. Walker:

Q. Secondly, I read you from the record of yesterday that Mr. Cassell read to you from Page 663, it was the record of Mr. Matthews from the Armour Company with respect to how he felt about this matter, and I will read you what Mr. Matthews said and I will ask you whether or not that is or is not your position. "Question: "In view of that, Mr. Matthews, in your opinion, do you believe that there exists a need for the connecting rail carriers to have stock ownership in the TP&W to maintain these connections?" And Mr. Matthews says, "No, I do not. It is our feeling that we would be best served by ownership such as proposed rather than a multiple ownership. Our experience in gateway operation, such as this is, is that in multiple ownership we have difficulty in having any one road assume responsibility to make the operation work efficiently at all times. Where there is a 50 per cent ownership as proposed by these two roads, why, we would not experience any difficulty." Now, is that your position?

Mr. Cassell: Just a moment before we go on. I would object to that on a number of grounds. First of all, there has been no showing that this man has any qualifications that would enable him to have an experience or opinion on gateway operations.

Secondly, leading and suggestive. If that isn't enough, why—

Mr. Walker: Mr. Examiner, that is what I am doing, all I am doing is reading.

[fol. 848] Exam. Albus: It is my turn to object now. We are not going to have any more reading from this record. I have heard it go in the first time and it is just taking up a lot of time.

Mr. Walker: I was just reading on the next page from Mr. Cassell. It seems to me, the excerpt that was read there is exactly what this gentleman was trying to say.

Exam. Albus: Is that your opinion, Mr. O'Brien?

The Witness: Yes.

Exam. Albus: Objection is overruled.

Mr. Walker: That is all.

Recross examination.

By Mr. Cassell:

Q. That opinion you just expressed concerned gateway operations, didn't it?

A. Well, I have had experience of operating a bridge.

Q. Is that a terminal railroad?

A. We are on the terminal end of the TP&W.

Q. How long have you had that experience?

A. Well, I have only been mayor a month and a half.

Q. Is that the extent of your experience?

A. No, not exactly. I have been active in civic affairs about 17 or 18 years.

Q. As a shipper?

A. I am not expert on railroads. I told you that.

Q. How many connections and how many miles of track does that operation have?

[fol. 849] A. Which one?

Q. This terminal operation that you are speaking of.

A. Are you talking about the TP&W?

Q. No, I am talking about the terminal operation that you are talking about.

A. I am not talking about any terminal operation at all.

Q. You don't know anything about any terminal operation at all, is that it?

A. No.

Mr. Cassell: That is all.

Exam. Albus: Are there any further questions?

(No response.)

Exam. Albus: You are excused, sir, and thank you.

(Witness excused.)

[fol. 850] Exam. Albus: May we have the next witness, please.

Mr. Walker: Yes, Mr. Ward.

D. C. WARD was sworn and testified as follows:

Direct examination.

By Mr. Walker:

Q. State your name, please.
A. D. C. Ward.
Q. What is your business, Mr. Ward?
A. I am traffic manager for Hoerner Boxes, Inc., at Keokuk, Iowa.
Q. Where do you live?
A. In Keokuk.

Mr. Wheeler: Mr. Examiner, to shortcut this a little bit I'd be perfectly willing to stipulate that this gentleman would testify substantially in the same manner that the preceding one testified when he was on the stand, if that will be agreeable to his counsel.

Mr. Walker: Mr. Wheeler, I am not sure I understand what you mean, the preceding witness but one—

Mr. Wheeler: What was his name?

Mr. Walker: Mr. O'Brien and Mr. Berryhill.

Mr. Cassell: Mr. Berryhill you have in mind?

Mr. Wheeler: Yes. Mr. O'Brien was a city official.

Mr. Cassell: I would so stipulate.

Mr. Walker: There is one or two questions I would like to ask this gentleman. I will try to limit it. There [fol. 851] are one or two matters that would pertain to his business alone that would not appertain to Mr. Berryhill's business.

Mr. Wheeler: Would his opinion be any different really?

Mr. Walker: I think so in respect to the amount of his shipping.

Exam. Albus: Let's proceed.

By Mr. Walker:

Q. Mr. Ward, I am going to try to limit my examination of you in accordance with these gentlemen's wishes—

Mr. Cassell: No.

Mr. Walker: O.K. We will go all the way. It is all right with me. I have all the time in the world.

By Mr. Walker:

Q. Mr. Ward, where do you live?

A. In Keokuk, Iowa.

Q. And you are the traffic manager of the Hoerner Boxes?

A. Hoerner Boxes, Inc.

Q. What is the Hoerner Boxes, Inc., will you explain that to the Examiner, please?

A. I am traffic manager in the general office of Hoerner Boxes, Inc. We operate eight corrugated fiberboard shipper container manufacturing operations in the middle west, one of the larger is in Keokuk.

Q. You say fiber boxes, those are the boxes that are made that are used as carrying cases for various products?

A. They are shipping containers.

Q. Mr. Ward, what percentage of your business is han-
[fol. 852] dled by rail?

A. About 95 per cent inbound and about 80 per cent outbound. I will qualify that, let me say about 70 per cent outbound.

Q. Where do you find your markets from your Keokuk plant, which way do you ship generally when you are shipping outbound?

A. Well, we ship generally in the Illinois, Iowa, Missouri area.

Q. How do you generally ship in that connection, that is, by what rail?

A. Via the route?

Q. Yes.

A. Well, generally our shipments into Iowa are northwesterly out of Keokuk and they will go out Rock Island or C. B. & Q.

Q. You are speaking of westerly shipments?

A. Yes.

Q. Easterly how do you ship?

A. Easterly we will ship T. P. & W. or possibly C. B. & Q.

Q. Where do you ship to going easterly?

A. Our markets are generally in the northern part of Illinois, northeastern part of Illinois, and the southeastern part of Wisconsin.

Q. How do your shipments get to their destination when they go into northern Illinois and southern Wisconsin area?

A. Either C. B. & Q. or T. P. & W. and then a connecting line.

Q. If they go C. B. & Q., how do they go?

A. Mostly C. B. & Q. direct.

Q. Direct?

[fol. 853] A. Yes.

Q. If they go T. P. & W., how do they go?

A. Well, they can pick up the connections anywhere along the line of the T. P. & W. into that territory.

Q. If you have a shipment of boxes going to southern Wisconsin, as an example, how do you generally ship it if you ship it via T. P. & W.

A. We have a marked movement to Milwaukee thence T. P. & W. Watseka or—excuse me, that is T. P. & W. Webster-Milwaukee.

Q. Where is Webster, incidentally, with relation to Effner?

A. It is very near the eastern end of the T. P. & W. I don't know the mileage from Effner.

Q. Do you have or can you give us any estimate of the number of cars that you ship annually over this route into northern Wisconsin and northern Illinois and the Madison area?

A. In connection with just the T. P. & W.?

Q. Yes.

A. Around 400 cars a year.

Q. Do you have any other way of shipping that on the same parity, that is, in the sense of service?

A. No, that's the best service, that is the reason we use it.

Q. When you speak of the best service route as compared to the next best service route, how much faster is it?

A. Well, we have found that it has been at least two days faster than other routes.

[fol. 854] Q. Two days faster?

A. Mr. Walker, on the last answer, I mean that isn't a standard two days every time, but it has been as high as two days faster.

Q. I see. Now, are you familiar with the application of the Santa Fe and the Pennsylvania to buy the T. P. & W.?

A. I have read the application.

Q. And are you familiar with the application of the M. & St. L. to buy the T. P. & W.?

A. I have never seen the application. I am just generally familiar with it.

Q. Have you had an opportunity to discuss it with other people?

A. Yes, sir, I have discussed it with counsel and other shippers.

Q. Are you familiar with the application of the Rock Island and the Nickel Plate to become part owners with the Santa Fe and the Pennsylvania in the T. P. & W.?

A. Just to the extent you expressed it, that's all.

Q. Will you give us your attitude and ideas about these applications and which one you favor and why?

A. Well, we favor the Santa Fe-Pennsylvania application. I'd like to preface that by saying we would like to see the T. P. & W. operate independently, because they give us very good service and we have very good close contacts with them. They do an exceptional job of solicitation and follow up on all business they get. The Santa Fe and Pennsylvania has guaranteed that they will keep [fol. 855] that type of personnel, or rather not the type but keep the personnel and keep the operation as a separate entity, and we feel because we know that we think it is a good thing for our company.

Q. Do you have any or have you formed any ideas in connection with the application of the M. & St. L. so far as the purchase of the T. P. & W. is concerned?

A. They made no guarantees of any kind so far as our particular usage of the T. P. & W. would be, so we can't favor something we don't know anything about particularly.

Q. Have you had any such offers or explanations from the Rock Island or the Nickel Plate?

A. We haven't discussed it, no.

Q. All right, now, on the east end of the T. P. & W. is it necessary for you, if you are going to continue to have the same splendid service that you have had in the past, that the T. P. & W. continue to operate as a strong railroad in the area?

A. Well, you just held that to the east end. Don't you mean—I take it to mean the entire railroad. We want the entire railroad to be strong. That is my expression on the thing.

Q. Well, I understand that, but what I am interested in is whether or not you feel that it is necessary for the Milwaukee to have an interest in it in order for you to have a gateway?

A. Oh, no.

Mr. Cassell: I didn't understand the Milwaukee was in-
[fol. 856] volved in this proceeding.

Exam. Albus: I didn't either.

The Witness: Am I out of order in—

Mr. Cassell: Let your counsel—

By Mr. Walker:

Q. Go ahead, anything you want to say is all right with me.

Exam. Albus: You may explain your answer, if that is what you want to do.

A. I think counsel was asking me about the Milwaukee because the Milwaukee is a very important interchange point for us at Webster.

Mr. Walker: I was thinking in terms of multiple ownership that is all.

That is all Mr. Ward.

Exam. Albus: Mr. Wheeler.

Mr. Wheeler: No questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Ward, I take it all you are interested in is assuring the future service you have been enjoying, isn't that right?

A. Primarily as a company representative we have to be assured that we are going to have a future good service, yes, sir.

Q. And the service you have had with the T. P. & W. in the past has been satisfactory, hasn't it?

[fol. 857] A. Yes, it has.

Q. And the thing that appeals to you is the present management, is that right?

A. Yes, sir.

Q. And what appealed to you about the Santa Fe and the Pennsylvania was the assurance that that present management and policy would be maintained, isn't that right?

A. Yes, sir.

Q. Would you have any reason to doubt the assurance of the Rock Island if they gave you like assurances?

A. I wouldn't call you a liar, no, sir. I mean why do you ask me that?

Q. Because I want to know.

A. Well, we certainly would trust the Rock Island. I think we have had a good experience with them. We'd trust them as fully. However, I don't know how they'd be approaching me on their assurance, as a sole owner?

Q. If we gave you the same assurance as the Santa Fe and the Pennsylvania have as to—

A. (Interrupting) On what basis, sir?

Q. As to the continuance of the present management and policies, would you have any reason to doubt that the Rock Island would fulfill those promises any more than the Santa Fe or Pennsylvania?

A. I don't know what basis you would be approaching us [fol. 858] with those assurances. Would you explain that? Would you be approaching us as a sole purchaser, as one of a group—

Q. (Interrupting) Just take any basis your want at all.

would you have any reason to doubt the Rock Island any more than you would the Pennsylvania or Santa Fe?

A. Yes, sir, if there were, say, six railroads involved, and I hate to bring this back into the thing, but I don't believe that your assurances would be as strong to me if you were involved with one of the group, as if you were involved all by yourself.

Q. Would you have the same confidence or lack of confidence with the Santa Fe and Pennsylvania under similar circumstances?

A. Their interest would decline, I am sure.

Q. So it isn't that you think that these assurances, then, are either good or bad, depending on how many members are in it?

A. As what their interest in the purchase would be. It is not how many are in there. Now, it seems to me that the Santa Fe and the Pennsylvania have a very strong economic interest in continuing the T. P. & W. as a strong railroad.

Q. Yes.

A. Now, I can't see where any other railroad right now in this particular application has that interest particularly.

Q. Now, then, let's just take economic interest for a moment. The Santa Fe operates west of Keokuk, doesn't it—I mean of Lomax, right?

A. Yes, sir.

[fol. 859] Q. And if the Santa Fe is to get any haul at all, long haul on a shipment that is moving over the T. P. & W. it has to move out via Lomax, doesn't it?

A. Or Eureka.

Q. Or Eureka. Now, if the Rock Island is to participate in T. P. & W. shipments, its connection is at Keokuk, isn't it?

A. Or Peoria.

Q. Of those two carriers which would have the greater economic interest in the Keokuk Gateway?

A. Well, if the Rock Island could get it at Peoria, they certainly would have the least amount of interest, I mean if that's where they wanted to get it. Now, they may go ahead and get it at Keokuk—

Q. (Interrupting) Let's just talk about Keokuk now.

A. We are talking about railroads and the Rock Island isn't just in Keokuk.

Q. Mr. Witness—

A. (Interrupting) I am sorry.

Exam. Albus: That is all right.

By Mr. Cassell:

Q. I am talking just as to the Keokuk Gateway, which of the two railroads, the Santa Fe or the Rock Island, do you believe would have the great interest, economic interest, in the maintenance of the Keokuk Gateway?

A. I'd like to answer you directly, sir.

Q. I'd like to have a direct answer.

[fol. 860] A. I know you would, and I come back to the same thing, on what basis of ownership in the T. P. & W. each line would have as to how their interest would be?

Q. On any basis of ownership.

A. I don't think you would have as much interest if you were one of the six lines owning the T. P. & W., no, sir.

Exam. Albus: Supposing both of them had the same interest?

The Witness: If they owned 50 per cent each?

Exam. Albus: Yes.

By Mr. Cassell:

Q. Who would have the greatest interest in Keokuk, the Rock Island—

Mr. Walker: (Interrupting) I have sat here and never said a word.

Exam. Albus: I have noticed that.

Mr. Walker: These people now are trying to put words in this man's mouth. This is incompetent.

Exam. Albus: All he has to say is he doesn't know.

Mr. Walker: Well, if he will say that, I will be satisfied.

Mr. Cassell: Now who is putting words in his mouth?

Exam. Albus: This has been going on since last Wednesday.

The next question.

By Mr. Cassell:

Q. But you did know a little earlier when you were talking about the Santa Fe, didn't you?

A. I can't remember.

Q. You don't remember?

A. No, sir, that is true, I don't recall exactly what I said. [fol. 861] Q. Don't you know a little earlier when you said the Santa Fe would have greater economic interest in the T. P. & W. than the Rock Island?

A. If I said greater, I may have misphrased it. I thought they would have a great economic interest along with the Pennsylvania.

Mr. Cassell: I give up.

Exam. Albus: Very well.

Mr. Broker.

Cross examination.

By Mr. Broker:

Q. Do you route traffic T. P. & W.-Santa Fe up to Chicago?

A. No, sir, we route it that way to Galesburg.

Q. What is the junction between the Santa Fe and the T. P. & W.?

A. Lomax.

Q. Do you route any eastbound over the T. P. & W. and then Eureka, Santa Fe?

A. No, sir.

Mr. Broker: No other questions.

Exam. Albus: Are there any further questions?

Mr. Wheeler.

Cross examination.

By Mr Wheeler:

Q. I believe you said you are a businessman?

A. I said I was traffic manager of Hoerner Boxes, Inc.

Q. You have a strong economic interest in maintaining a [fol. 862] business competitor, another box company, for instance?

A. Normally I wouldn't think so, however—well, I wouldn't think so.

Exam. Albus: They all belong to an association.

By Mr. Wheeler:

Q. Your economic interest is to the contrary, is it not?
A. As an employee of the company my economic interest is naturally with that company.
Q. As against a competitor?
A. Normally, yes, sir.

Mr. Wheeler: I have no further questions.
Exam. Albus: Are there any further questions?
Mr. Walker: No questions.
Exam. Albus: You are excused, Mr. Ward. Thank you very much.

(Witness excused)

[fol. 863] Mr. Walker: Mr. Darrell Wright.
This is our last witness today, Your Honor.
Mr. Wheeler: Can we stipulate this witness?

Darrell Wright was sworn and testified as follows:

Direct examination.

By Mr. Walker:

Q. State your name, please.

Mr. Walker: If you want to stipulate with regard to Mr. Wright we can stipulate as to him as to Mr. O'Brien's testimony which might save time.
Mr. Broker: What is the name of the witness?
Mr. Walker: Darrell Wright.
Mr. Broker: Who is Mr. Wright?
Mr. Walker: He is with the Chamber of Commerce from Keokuk. His testimony would be substantially the same as Mayor O'Brien's.
Mr. Cassell: Oh, the mayor.
Mr. Broker: Go ahead and stipulate.
Mr. Cassell: I will stipulate.

Exam. Albus: Very well.

Mr. Walker: I guess we have all agreed, Your Honor.

Exam. Albus: That is fine.

You are excused. Thank you very much indeed for coming over.

(Witness excused.)

[fol. 864] Mr. Walker: Those are the only witnesses I have today, Your Honor.

Exam. Albus: Thank you very much, Mr. Walker.

Do you have a short witness for direct?

VINCENT A. O'BRIEN was sworn and testified as follows:

Direct examination.

By Mr. Hunter:

Q. Will you state your name and address for the record, please?

A. Vincent A. O'Brien, Watseka, Illinois.

Q. What is your business, Mr. O'Brien?

A. Automobile dealer.

Q. Do you hold an official position with the Watseka Chamber of Commerce?

A. Retiring president of the Chamber of Commerce.

Q. How long have you been a member of that organization?

A. Approximately 11 years.

Q. Will you describe that organization briefly?

A. Why, it consists of 118 members representing 61 businesses, all types of business, professional and retail.

Q. Are you authorized to speak for the governing body of the Chamber of Commerce?

A. The city administration, yes.

Q. Are you authorized to speak for the governing body of the Chamber of Commerce?

[fol. 865] A. Yes.

Q. And did you say that you were also authorized to speak for the mayor of the city of Watseka?

A. That is correct.

Q. Did he ask that you testify on his behalf in this hearing?

A. Yes.

Q. Will you briefly describe the location, size, and nature of the business in Watseka?

A. Well, Watseka is situated approximately 80 miles due south of Chicago, 100 miles east of Peoria and 12 miles from the Indiana line. The population is approximately 5,000 people, situated in an agricultural community in Iroquois County, the third largest county in the state of Illinois.

Q. Are you familiar with the fact that the city of Watseka has filed a petition of intervention in this proceeding?

A. Yes, I am.

Q. Does that petition represent the view of the city of Watseka relative to the application of the Pennsylvania and Santa Fe railroads in this proceeding?

A. In speaking with members of the council and directors of the Chamber of Commerce it does.

Q. Is that petition in favor of the application of those two railroads?

A. Yes, it is.

Q. Are the reasons that are set forth in that petition [fol. 866] your understanding of the reasons for supporting that application?

A. Yes, it is.

Q. If I were to ask you the reasons would you testify in the same way as they are set forth in that petition?

A. On that basis, yes.

Q. What railroads are in Watseka?

A. North and south CE&I, and east and west TP&W.

Mr. Hunter: No further questions.

Exam. Albus: Is there any cross examination?

Mr. Wheeler: Yes.

Cross examination.

By Mr. Wheeler:

Q. Who drew up the petition of intervention that was filed?

A. The city attorney.

Q. Do you know whether he had any help in that?

A. That I couldn't answer.

Q. Would the Chamber of Commerce be interested in improved and faster service through Watseka in connection with the C&EI?

A. With the C&EI?

Q. Yes, sir.

A. We have no complaints against the CE&I in their service. Of course, naturally we are always ready for improvement in anything.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

[fol. 867] Cross examination.

By Mr. Cassell:

Q. Mr. O'Brien, I take it that what you are interested in, according to the petition of the city of Watseka, is, first, that the TP&W will be maintained and improved, is that right?

A. That is correct.

Q. And it will be operated with a separate and independent, as a separate and independent carrier, with responsible local management, is that correct?

A. That is correct.

Q. And that it will have directors interested in the community?

A. That is correct.

Q. And that the present independent management of the TP&W should be maintained as outlined in the application of the Santa Fe and Pennsylvania for the tenure of employees and offers the best in uninterrupted employment for such employees, is that right?

A. That is correct.

Q. Now, what you want is a plan that will give you those assurances, isn't that right?

A. Well, from past experience independent operation has proven very well with the TP&W and our experiences have been very, very good. We could always contact them locally and get immediate action on anything we might need.

Q. And a plan, any plan, which would continue that in [fol. 868] existence would be satisfactory to you?

A. Well, our main interests, we already know the people that are operating, and I understand the present management and so on, type management, will be continued, and

the TP&W has grown along with our own community, and we would like to see it operate on that same basis.

Q. And any plan which does that is what you want?

A. That is what we need.

Mr. Cassell: Thank you.

Exam. Albus: Mr. Broker.

Cross examination.

By Mr. Broker:

Q. In looking at the petition filed by the city, in paragraph "D" the statement is made that you favor denial of the petitions of competing lines to participate in the purchase. Are you aware of the fact that the Pennsylvania and the TP&W compete. Would you state your question.

A. Would you state your question again, please?

Q. Do you know whether or not the TP&W and the Pennsylvania railroad compete?

A. Not through our community.

Q. And your opinion and the decision of your city is based on the lack of competition between that line of railroad of the TP&W and the Pennsylvania railroad?

A. Well, there would be no reason for competition through our community east and west.

[fol. 869] Q. Do you know that the Pennsylvania has its own direct line into Peoria?

A. Not through our community.

Q. I know that.

A. We are primarily interested in a strong railroad east and west. We have one north and south, and we want to continue the one we have.

Q. Are you aware that the Pennsylvania competes through St. Louis as well as Chicago?

A. Not through our community.

Mr. Broker: No other questions.

Exam. Albus: What is the population of Watseka?

The Witness: Approximately 5,000.

Exam. Albus: Thank you.

Are there any further questions?

(No response.)

Exam. Albus: You are excused.

(Witness excused.)

Exam. Albus: Let the record show a recess until 2 o'clock.

(Whereupon, at 12:30 p.m., a recess was taken until 2:00 p.m. of the same day.

[fol. 870] AFTERNOON SESSION 2:00 p.m.

Exam. Albus: The hearing will please come to order.

At this time Mr. Wheeler requests that he be afforded an opportunity to put on a special witness who can be here only at this time.

So, if you will proceed, Mr. Wheeler.

Mr. Wheeler: I want to call Mr. Bhear.

FRANK BHEAR was sworn and testified as follows:

Direct examination.

By Mr. Wheeler:

Q. Will you please state your full name, Mr. Bhear?
A. Frank Bhear.
Q. And your address?
A. London Mills, Illinois.
Q. And your occupation, Mr. Bhear?
A: Manager of the Farmers Co-op, London Mills Farmers Co-op.
Q. And that is a grain elevator?
A. Yes, sir.
Q. At London Mills?
A. Yes, sir.
Q. On what railroad is your elevator located?
A. M&StL.
Q. Is it served by any other railroad?
A. No, sir.
[fol. 871] Q. What is the capacity of your elevator?
A. Around 15,000 bushels.
Q. And how many carloads did you ship last year?
A. Forty-eight.

Q. What was your 1955 volume through the elevator, approximately?

A. Oh, I just can't give you that offhand.

Q. Were you supplied with all of the cars you required during the 1955 season?

A. Yes, sir.

Q. Was your elevator ever plugged during the 1955 season?

A. No, only long enough to get grain doors in the car.

Q. Mr. John Morris of Bushnell stated here on Monday that during 1955 farmers that ordinarily deal with you found your elevator plugged and came to his elevator. Do you have any—came to his elevator at Goodlow, do you have any comment on that statement?

A. I don't think so, for it is about 30 miles from us.

Q. Well, were any farmers turned away from your elevator because it was plugged in 1954?

A. Not that I know of.

Q. Well, you would know whether they were turned away, wouldn't you?

A. Yes, I'd think so.

Q. Mr. Morris also stated that you told him that your [fol. 872] elevator was plugged during the last season. Do you have any comment to make on that statement?

A. No, I did not tell him that.

Q. You did not tell him that?

A. No.

Q. Do you know other elevators on the M&StL?

A. What?

Q. Do you know the operators of other elevators on the M&StL?

A. Yes, there is Burwick and Rappatee.

Q. Do you know whether any of them were plugged during 1954?

A. Not that I know of.

Q. Have you had any recent conversations with Mr. John Morris of Bushnell?

A. Sunday night was the first time.

Q. Where was that conversation?

A. At my home.

Q. What was the gist of that conversation?

A. Well, he was wanting to know if I had any grain car shortage.

Q. Grain car shortage?

A. Yes.

Q. And you told him you did not?

A. I told him I did not last year.

Q. Had you ever met or talked with Mr. John Morris of Bushnell prior to Sunday night?

A. No, I did not.

[fol. 873] Q. Have you received any other recent inquiries with respect to grain car supply on the M&StL?

A. Yes, a commission man out of Bushnell. That was Saturday afternoon.

Q. What was his name?

A. Larnex, I think is his name. He is manager for the Coal Grain Company.

Q. Will you tell me of that conversation?

A. He asked me about the car shortage.

Q. On the M&StL?

A. Yes.

Q. And you told him—

A. (Interrupting) The same thing as I told Morris.

Q. Have you found the general railroad service of the M&StL to your satisfaction?

A. Yes, sir.

Q. Do you know whether or not Mr. Morris, John Morris, of Bushnell, Illinois, has any specialized equipment for the handling of grain or the moving of grain?

A. Well, I know he's got some truck. He has one semi is all I know anything about.

Q. Is that a truck especially equipped to haul grain?

A. Yes.

Q. And where have you encountered that truck?

A. I saw it on the road.

[fol. 874] Q. To Peoria?

A. Yes.

Q. In Peoria?

A. No, not in Peoria, I saw it out on the highway.

Mr. Wheeler: I have no further questions.

Exam. Albus: Cross examination, please.

Mr. Bagge.

Cross examination.

By Mr. Bagge:

Q. Mr. Bhear, I noted in your reply to Mr. Wheeler's questions that you were dealing with the 1955 season, is that correct?

A. Yes, sir.

Q. Would you state whether or not your elevator was ever plugged in a 1954 season?

A. No, I wouldn't say that for we had to wait sometimes on cars but not too long.

Q. How long did you have to wait on cars during the 1954 season?

A. Well, not over a day, anyway.

Q. Did you ever have to wait on cars during the 1953 season?

A. Yes, I have at some times. Everybody else did.

Q. On the M&StL?

A. Well, no, not only on the M&StL but all other roads.

Q. Well, did any of your competitors from other shipping points on the M&StL have to wait during the 1954 season?

[fol. 875] A. Well, I couldn't say to that.

Q. Well, you just stated that everyone else had to wait, too, who were you referring to when you stated that?

A. Well, on the Q I had complaints from Fairview; said they didn't have to wait.

Q. Is it your position that you never met Mr. John Morris prior to meeting with him last Sunday night?

A. No, sir, I never knowed him.

Q. Did you ever make a statement to anyone prior to making the statement here today that your elevator was plugged—

A. No.

Q. Just let me finish this question.

Exam. Albus: That's right, you may finish.

By Mr. Bagge:

Q. Did you ever, on any occasion, prior to making the statement here today, have occasion to talk to anyone at any time—

A. No.

Q. I don't want to confuse you, I just want to finish this question. I will tell you when I finish it.

Did you ever have occasion at any time prior to your appearance here as a witness to say to anyone that you had experienced a car shortage or that your elevator was plugged during the 1954 season?

A. No.

Q. Don't you discuss your business experiences with any-
[fol. 876] one in the community?

Mr. Wheeler: Mr. Examiner, I object. He is arguing with the witness now.

A. No.

By Mr. Bagge:

Q. You do not discuss your business affairs with anyone in the community?

A. No.

Exam. Albus: The objection is overruled.

By Mr. Bagge:

Q. Do you discuss your business experience with members of your family?

A. No.

Q. All right. Directing your attention to the 1953 season in which you stated a car shortage on the M&StL. did you ever at any time say to anyone that you had a plugged elevator during the 1953 season?

A. I can't say that I have.

Q. Well, tell me this, when farmers came to your grain elevator during 1953 or 1954 and saw that they couldn't bring their grain to your elevator because it was plugged, isn't it a fact that they would desire that information that way?

Mr. Wheeler: Just a moment, Mr. Examiner. I think this is argumentative. There is no evidence of any kind to support the basis of the question that is being addressed to the witness here.

Mr. Bagge: I believe first of all that there is a basis.
[fol. 877] If the witness says he hasn't told anybody about it, I am simply trying to establish that by the very nature

of this experience, if he did experience a car shortage during those two seasons, that it would come to the attention certainly of the shippers with whom, or the farmers with whom he is dealing.

Exam. Albus: The witness may answer.

(Question read.)

Mr. Wheeler: Mr. Examiner, that very fact has not been established here as a predicate of this question is that he ever turned away farmers from his elevator. Until that fact is established I think this is an improper question.

Mr. Bagge: I think he did establish the fact that he did experience a—

Exam. Albus: All right, let the witness answer.

By Mr. Bagge:

Q. Would you want the question repeated?

A. Yes.

(Question re-read.)

A. Yes, they would derive at that information that way.

Exam. Albus: Any further questions of Mr. Bhear?

(No response.)

Exam. Albus: You are excused, Mr. Bhear. Thank you very much.

(Witness excused.)

Exam. Albus: Now, we will resume with the applicants.

[fol. 878] Mr. Hunter: We will call Mr. Sterrenberg.

H. J. Sterrenberg was sworn and testified as follows:

Direct examination.

By Mr. Hunter:

Q. Will you state your name and address for the record, Mr. Sterrenberg?

A. H. J. Sterrenberg, Crescent City, Illinois.

Q. What is your business, Mr. Sterrenberg?
A. I operate a grain elevator.
Q. Where is Crescent City located?
A. It is in Iroquois County between Gilman and Watseka.
Q. Is that in the eastern part of Illinois?
A. Yes.
Q. What is the approximate size of Crescent City?
A. Three forty-two, I think is the figure on the board outside of town.
Q. Will you describe what your grain business consists of in a general nature?
A. Why, we just operate a general run country elevator. I retail fertilizers and grain, fuel and a few other items, coal.
Q. Do you ship by rail?
A. Yes, we do.
Q. What is the nature of those rail shipments?
A. Well, east and west railroad, our grain normally should go east, but in the last year or more considerable of it has been coming west.
[fol. 879] Q. What railroad is your business located on?
A. On the TP&W only.
Q. Is there any other railroad that serves your community?
A. Not our community, no.
Q. Approximately how many cars did you ship in 1955?
A. I am not sure but I imagine around 150.
Q. Mr. Sterrenberg, have you ever had occasion to call in person at the general offices of the TP&W railroad?
A. I have.
Q. Was that on business?
A. On business, yes.
Q. Was it convenient to you to be able to call at the head offices of the TP&W railroad?
A. It was, yes.
Q. Have you read the application of the Pennsylvania and Santa Fe railroads to assume control of the TP&W railroad?
A. I have, yes.
Q. Are you in favor of that application?
A. Very much so.
Q. What are your reasons, Mr. Sterrenberg?

A. Well, as a shipper I am naturally interested in a good supply of boxcars, and according to the contract, which the Santa Fe and Pennsylvania have entered into, one of the articles is that they agreed to increase the number of
[fol. 880] cars to the recommended requirements of the industry and to help us secure additional cars from the pool.

Mr. Wheeler: May I have that answer read, please.

(Answer read.)

By Mr. Hunter:

Q. Is your present service satisfactory?

A. Well, it is satisfactory inasmuch as the boxcars we get are handled very satisfactorily, but we don't get enough cars in the harvest time and other times when we need them bad.

Q. Does that apply to movements in both directions, Mr. Sterrenberg?

A. Movement in both directions.

Q. What are the general destinations of your eastbound movements?

A. Right now it is Baltimore, Norfolk, export corn.

Q. What is the destination generally of your westbound movements?

A. Peoria, Decatur.

Mr. Hunter: No further questions.

Exam. Albus: Cross examination, please.

Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. You are interested in car supply, is that right?

A. That is right.

Q. Have you checked the car supply figures on the Penn-
[fol. 881] sylvania for any recent year?

A. No, I haven't. I did know that we load a lot of Pennsylvania boxcars, though.

Q. But you don't know whether or not they were short of boxcars in 1955 or not?

A. No, I am not familiar with that.

Q. Did you make any inquiry with respect to the Santa Fe on car shortages?

A. I do remember reading in the heart of the car shortage last fall I remember reading an article in the Wall Street Journal in which some big official in the Santa Fe quoted that there was no boxcar shortage on his lines.

Q. That was in the newspaper?

A. It was in the Wall Street Journal right in the heart of the bean harvest.

Q. About what time of the year was that?

A. It was right in the bean harvest because I cut the article out. I mailed it to Mr. Eslinger of the TP&W in Peoria and asked him to get on the Santa Fe's tail to help us get some more boxcars.

Q. You say it was in the middle of the bean harvest. I am trying to place it in a month.

A. October.

Q. October?

A. Yes.

[fol. 882] Q. Are you relying on that fact, is that one of the reasons you support that application here, because you believe that the Santa Fe didn't have a shortage at that time?

A. Well, I do know the Santa Fe owns a lot of boxcars, and I do know in the fall of the year the Santa Fe doesn't have the harvest in the southwest like we do. I mean their big harvest is in the summer, in the wheat harvest It is my opinion that they should be able to share more boxcars with us in the fall.

Q. The fact that they have a large pool in and of itself may not mean very much, does it?

A. No, but the more cars they have the better chance we have to get them.

Q. But the greater demand they have on their line for those cars the least chance you have to get them, isn't that correct?

A. Well, could be.

Q. Well, don't you think that is correct?

A. They have a far more—

Q. (Interrupting) You say what?

A. They have a larger pool to draw on. That's for sure.

Q. Well, but they serve a larger area than the TP&W. too, do they not?

A. But they must be doing a good job or he couldn't write that in the Wall Street Journal.

Q. You can issue statements about your business, too, can you not?

[fol. 883] A. I could, yes.

Q. The important thing would be whether the statement was correct or not, wouldn't it?

A. Well, I have no reason to doubt it.

Q. And that is what I say, you relied on that?

A. Yes.

Q. Have you checked to see whether or not the M&StL had any freight car or grain car shortages during 1955?

A. No, I haven't.

Q. Have you checked to determine what the relative ownership as against cars on line was for the Pennsylvania, Santa Fe, M&StL?

A. No; I do know I load very few M&StL boxcars. I have loaded a few of those grain cars of M&StL but very few.

Q. Do you understand how the boxcar pool operates or is supposed to operate?

A. Well, I am not too familiar with it, no.

Q. How many TP&W grain cars have you loaded?

A. I imagine about five.

Q. Where in the contract between the Pennsylvania and the Santa Fe does it specify that they will increase the number of cars owned by the TP&W?

A. I don't remember just exactly but it was in some of the literature that I read.

Q. Where did you get that literature?

[fol. 884] A. It was mailed to me by Mr. Hunter.

Q. Who is Mr. Hunter?

A. I imagine he is an attorney for the Pennsylvania.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Sterrenberg, Decatur is southeast of Peoria, isn't it?

A. Right.

Q. The shipments you made west to Decatur, then, would have been an intrastate shipment and would have turned off the TP&W somewhere east of Peoria, wouldn't they?

A. I would say as a rule not, because most of our shipments to Decatur go to A. E. Staley Manufacturing Company and they specify practically all Peoria I.C. routing.

Q. At any rate, it wouldn't have gone west of Peoria?

A. No.

Q. So you didn't have any shipments west of Peoria, then?

A. No, not shipments. I had some receipts. I get fertilizer from New Mexico and from Kansas.

Q. I see. Substantially, though, your interest is east of Peoria?

A. Right.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

[fol. 885] Cross examination.

By Mr. Broker:

Q. Are you familiar with the supply of boxcars on the Nickel Plate?

A. I am not, no.

Mr. Broker: No questions, thank you.

Further cross examination.

By Mr. Wheeler:

Q. I believe you testified you had a car shortage in '55?

A. Yes, we did.

Q. Was your elevator plugged?

A. No, I maintained some trucks in order to keep it from being plugged. If I didn't have the trucks it would be.

Exam. Albus: Are there any further questions?

(No response.)

Exam. Albus: You are excused, Mr. Sterrenberg. Thank you very much.

(Witness excused.)

Mr. Hunter: I have a witness who is representing the mayor of Shelton, and I believe he would testify as to Shelton much the same as Mr. O'Brien has as to Watseka. Where applicable we would be willing to stipulate.

Mr. Wheeler: We so stipulate.

Exam. Albus: Is everybody agreeable to the stipulation?

Mr. Broker: May I just look at their petition, please.

For my own information is there any other railroad in [fol. 886] Shelton?

Mr. Hunter: New York Central.

Mr. Broker: I have no questions. I will stipulate.

Mr. Cassell: I will stipulate.

Mr. Hunter: Do you want me to give the name of the witness?

Exam. Albus: If you will, please.

Mr. Hunter: Mr. Gordon Snow of Shelton, Illinois, representing the mayor and trustees of the Village of Shelton.

Mr. Cassell: Is he in the hearing room, Mr. Hunter?

Mr. Hunter: Yes.

Exam. Albus: Let the record show that all counsel agrees with the stipulation.

Thank you, Mr. Snow.

[fol. 887] Mr. Bagge: At this time, with your permission, I would like to call on Senator James Mayor.

James C. Mayor was sworn and testified as follows:

Direct examination.

By Mr. Bagge:

Q. Would you state your full name, sir.

A. James C. Mayor.

Q. Where do you reside?

A. LaHarpe.

Q. Would you tell us where LaHarpe is located, since you are the first witness to appear from that community.

A. Well, LaHarpe is about 85 miles west of Peoria. It is at the junction of the TP&W, one branch goes to Lomax and the other to Keokuk.

Q. Would you tell us more about that, sir.

A. Well, that's about all there is to it.

Q. All right, sir: Would you tell us what your present business or occupation is, sir.

A. Yes. I run the elevator in LaHarpe.

Q. Now, in connection with your position in running the elevator, do you have any other business associated with that?

A. None other, no, sir.

Q. Would you tell us about the rail service which is afforded to you at your elevator at LaHarpe.

A. Yes. I expect our maintenance business is the coal [fol. 888] business, but, you know, most of the corn around LaHarpe is fed, as you will find out later when you hear the livestock report, but we do have a pretty big business in soybeans and wheat and we have had car shortages like the rest of them.

Q. Tell me, what railroad serves your elevator at LaHarpe?

A. TP&W.

Q. Is there any other railroad that serves your elevator?

A. No other railroad.

Q. Is there any other railroad that serves that community?

A. No other railroad.

Q. How long have you personally be using the TP&W?

A. Since 1918.

Q. Now, you are familiar, are you not, with the application which is pending before this Commission which is filed by the Santa Fe & Pennsylvania Railroads?

A. Yes, sir, I have read it.

Q. And you are familiar with it?

A. Yes, sir, I think so.

Q. What position do you take with reference to that application, sir?

A. Well, when I read that I thought that LaHarpe might finally have attained security. You know, we have always had an idea there that some day the Santa Fe and some eastern outlet would have the TP&W, and when we heard it was the Pennsylvania, why, we thought possibly it would be in the hands of two of the strongest lines in the country, [fol. 889] and that we'd have a railroad in LaHarpe. You know, there have been times when we thought we might not.

Q. Beyond that reason of affecting stability to the opera-

tions of the TP&W, do you have any other specific reasons for supporting the operation as a shipper?

A. Yes. I think if we were connected with those two lines we'd get a better supply of boxcars to ship grain. We have been plugged when we couldn't ship grain for a week at times.

Q. What effect do you think the granting of this application in effecting ownership of the TP&W to the Santa Fe and Pennsylvania would have on the service to you as a shipper?

A. We have had pretty good service, but I think with them interested in it as they will be, it would better it, if possible. I think that is their intention.

Q. Are you familiar, Mr. Mayor, in a general way with the fact that the M&StL Railroad wants to acquire ownership of the TP&W?

A. Yes, I have heard that.

Q. Sir, what is your position with regard to that possibility?

A. Well, I don't know too much about the M&StL Railroad. I remember once when I was in the Illinois State Senate it was called a monument, they thought it was going to be abandoned at that time and they had a meeting of the Chamber of Commerce to talk it over. I think maybe it was in receivership at that time. That is about all I know about the M&StL. I just heard lately that they were [fol. 890] in better shape than they had been.

Q. What do you think the effect upon your service and upon your car supply as a shipper would be at LaHarpe if the M&StL got control of the TP&W.

A. Well, I couldn't hardly see how the M&StL would be much interested in the west end of the TP&W. They have a connection with the Santa Fe, I believe, at Nemo. I believe that is the name of the town.

Q. That is correct, sir.

A. And that line into Peoria runs just about parallel with the TP&W into Peoria, from LaHarpe.

Q. Now, assuming that the M&StL agreed to allow the ICC to impose a condition providing that the M&StL would provide the continued service on the west end of the TP&W and providing such a condition were entered, would that

change your attitude regarding the possibility of selling the TP&W to the M&StL?

A. It wouldn't change my attitude.

Q. Why, sir?

A. Well, because I doubt that the M&StL have the backing that the Santa Fe and the Pennsylvania have.

Q. What do you mean by that?

A. What?

Q. What do you mean by that? What do you mean by "backing"?

A. Well, they are not the railroad that—the Santa Fe and the Pennsylvania are big systems. The M&StL, as I [fol. 891] understand it, runs from Peoria to Minneapolis. I believe that is right. I didn't think it was much of a system.

Q. You feel that your interest as a shipper and the needs of your community would be more adequately served by ownership of the TP&W by the Pennsylvania and Santa Fe?

A. I think it can be, yes. I think it could be.

Q. Are you familiar with the position of the Rock Island and Nickel Plate Railroads in this proceeding?

A. No, I don't know a thing about them.

Q. Well, are you aware of the fact—

Mr. Cassell: We object.

Mr. Broker: We object. He said he doesn't know.

Exam. Albus: He doesn't know anything about it.

Mr. Bagge: All right.

By Mr. Bagge:

Q. Are you aware that there are other railroads who want to participate in ownership with the Santa Fe and Pennsylvania?

A. I have heard of that, sir.

Q. What is your position regarding that, sir?

Mr. Broker: He said he didn't know anything about the Nickel Plate and Rock Island.

Exam. Albus: He is not talking about the Nickel Plate

and Rock Island now. He is talking about other railroads that want to get into this deal.

You may answer, sir. The objection is overruled.

[fol. 892] A. It is a question of too many owners, in my estimation. I think two could handle it a lot better than half a dozen or more, if they wanted in.

By Mr. Bagge:

Q. All right, sir. Do you have anything else to say to this commission about this application?

A. Why, I don't think so, no.

Mr. Bagge: That is all I have of this witness.

Exam. Albus: Cross examination. Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. Senator Mayor, you said at one part, you used the phrase "like the rest of them", and it was in connection with your car shortage and your plugged elevator. When you used that phrase, I take it you were referring to other elevators on the TP&W?

A. That is what I thought of, yes, sir.

Q. You are not familiar, I take it, with the car shortages on the Santa Fe or the Pennsylvania, are you?

A. Well, I know nothing, of course, about the car shortages on the Pennsylvania. We do hear from Lomax, there is an elevator at Lomax, and they usually get the cars sometimes when we can't.

Q. They sometimes get them when you can't?

A. Yes, I have known them to get them.

Q. And vice-versa?

A. No, I never heard it the other way, and we have [fol. 893] had grain go to Lomax that should have come to LaHarpe if we had had cars.

Q. You are not familiar, I gather, with the car supply situation on the M&StL?

A. No, I have no familiarity with that.

Mr. Wheeler: I have no further questions.
Exam. Albus: Mr. Cassell, please.

Cross examination.

By Mr. Cassell:

Q. You went in business in LaHarpe in 1918?
A. No. I was in business in LaHarpe before that, but I came down to the elevator in 1918.
Q. The TP&W was in receiver hip in those years, wasn't it?
A. Well, I don't believe 1918, was it? It could have been.
Q. A long time.
A. I wouldn't say for sure. I know it was in receivership. I think that probably happened after the Chasworth wreck when they got ruined, I remember that, that wrecked them, yes, sir.
Q. That was 1887, was it not?
A. That was a long time ago, but I remember it, yes, sir. We had some folks at LaHarpe badly crippled in that wreck.
Q. Is that so?
A. Yes, sir.

Mr. Cassell: That is all.
Exam. Albus: Mr. Broker, please.

Cross examination.

By Mr. Broker:

Q. During those years, do you know who owned the [fol. 894] TP&W.

Mr. Lucas: Mr. Examiner, are we going into that remote history? I won't object if he wants to bring it in.
Exam. Albus: Do you know?

A. No, I don't know who owned it, no.

By Mr. Broker:

Q. It wasn't in good condition, though, was it?

A. Sir?

Q. Was it or was it not in good condition?

A. Not, surely not too good, if it was in the hands of a receiver.

Q. When did the railroad come back, do you know?

A. I think the railroad started to come back after Mr. McNear purchased it. You know, Mr. McNear had great dreams about that road. He figured that someday the thing would happen that is just about to happen now, that that road, he told me in the office, "One day you might live to see a double track through LaHarpe, if the Santa Fe and the Pennsylvania ever get interested enough in it to make it that way."

Mr. Broker: That is all.

Exam. Albus: Are there any further questions for the Senator?

(No response.)

Exam. Albus: Thank you very much, Senator. You are excused.

(Witness excused.)

Exam. Albus: Next witness, please.

Mr. Bagge: I would like to call Mr. Clyde Stevens of LaHarpe Livestock Shipping Association.

[fol. 895] Mr. Wheeler: Is there any possibility of stipulating the testimony of this witness would be the same as Mr. Mayor's?

Mr. Bagge: How do you feel about that, Mr. Stevens?

The Witness: I operate a different business entirely.

Mr. Bagge: No stipulation.

CLYDE W. STEVENS was sworn and testified as follows:

Exam. Albus: What is your full name, please?

The Witness: Clyde W. Stevens.

Mr. Wheeler: Mr. Examiner, I want to have a running objection to any more cumulative testimony in this record.

Exam. Albus: Very well.

Direct examination.

By Mr. Bagge:

Q. Will you state your full name, sir.

A. Clyde W. Stevens.

Q. And you are at LaHarpe, is that correct, sir?

A. At LaHarpe.

Q. Would you tell us what your business or occupation is?

A. Shipper of livestock.

Q. Would you describe how the LaHarpe Livestock Shipping Association operates and what your function is with that organization.

A. I am its manager.

Q. Would you tell us a little bit about how they operate.

A. We ship for about 325 various farmers and livestock [fol. 896] handlers. We ship them—we do not purchase them, we ship them to a terminal market, practically all of them to the Chicago market.

Q. And you perform that service?

A. I perform that service for them.

Q. Through the association, is that correct?

A. Through the association.

Q. Is it a fact that you are absolutely dependent upon the—

A. We are absolutely—

Q. Strike that. Tell us about your rail service.

A. We are absolutely dependent upon the railroad that goes through our town because we have no other way of transportation.

Q. How many years have you been making this use of the TP&W Railroad for the LaHarpe Livestock Shipping Association?

A. For the LaHarpe Livestock Shipping Association, they have been in operation 36 years, this is my 24th.

Q. Are you familiar and is your organization familiar with the application of the Santa Fe-Pennsylvania Railroads?

A. We are.

Q. What position do you take with reference to that?

A. At a meeting of the board and several and various members and myself, we have come to the conclusion that it is the only safe way for the shipping association as an organization.

Q. Would you tell us why, sir.

[fol. 897] A. Yes.

Q. Briefly.

A. Long years ago our livestock went East, over the Wabash, to Chicago. We had to load as early as 8 o'clock in the morning. The stock traveled the major portion of the day in the heat, when it was hot, with heavy losses on many occasions.

Q. Yes, sir.

A. Now we load and go over the TP&W to Lomax, which is only about 14 miles, and the livestock goes from Lomax to Chicago on the Santa Fe and it is all overnight. We usually load and are out of there about 4 o'clock with the stock, and in the morning from 4 to 6 it is in Chicago and many times in the yards at that time.

Q. I see.

A. With the result that over the long period from morning until the next morning, with a heavy shrinkage of three to four pounds, that would be the lowest that we could get it in the year's average, and last year, in '55, we got through with a quarter of a pound average shrinkage on our hogs.

Q. And that is certainly a record, isn't it, in terms of moving stock, is that correct?

A. Well, to finish it up or go further with it, over the long haul, as it used to be and the present haul of overnight, our losses have decreased over 50 per cent.

Q. Now, sir, what position does the LaHarpe Shipping [fols. 898-899] Association take on the possibility of the sale of the TP&W Railroad to the M&StL?

A. They don't like it.

Q. Would you tell us briefly why?

A. Yes, I will tell you why. Now, maybe we are selfish. I don't know—

Q. Well, we all are. That's all right.

A. But we think that in long years to come, we figure that the M&StL are interested on the eastern end of the TP&W, and we think the time might come when they'd

ask to abandon the west end. We may be wrong. I would hope if the M&StL gets it that we are wrong, because any other method of shipping, aside from the one we are using at the present time, would be ruinous after we have had the good results we have had in the past few years. Then, we think, again, that the M&StL might want to divert the traffic of our livestock the other way, which couldn't be as short a haul as we have at the present time. And we haven't anything against the M&StL or any of the other intervening lines, but it is just the thing that we think is the most advantageous to us as an organization.

Q. What effect do you believe the dilution of ownership of the TP&W would have upon your interest?

Mr. Cassell: I object to that. He doesn't know anything about dilution of ownership.

Mr. Bagge: All right, I will withdraw the question.

[fol. 900] Exam. Albus: Thank you.

By Mr. Bagge:

Q. What possible effect do you think the inclusion into ownership of the TP&W of the Rock Island, Nickel Plate, the Wabash would have upon your need, your interest?

A. We think it would be disadvantageous to the TP&W and to the other major purchasers of the line's services.

Mr. Bagge: Thank you.

That is all I have of this witness, sir.

Cross examination.

By Mr. Wheeler:

Q. Mr. Stevens, do you believe that your present service, that is, by the TP&W-Lomax, Santa Fe to Chicago, would be discontinued if the Pennsylvania and the Santa Fe application is not granted?

A. So far as we know, it would not be, no, sir. I understand that the M&StL in their ordinance that they would put up, should they be the purchasers of the line, would give the same service that they had before. That we do do not know because they never bothered to bring us a

copy of the ordinance or to say anything to us about it, and neither did any of the other lines, while the Santa Fe and the Pennsylvania did.

Q. Really, what you are interested in, Mr. Stevens, is maintenance of that service?

A. That is right.

Mr. Wheeler: I have no further questions.

Cross examination.

[fol. 901] By Mr. Cassell:

Q. I take it, you haven't been told what the plans of the Rock Island are, sir?

A. I beg pardon?

Q. I gathered from the reasons you made to other questions that you haven't been told what the plans of the Rock Island are. Is that right?

A. Neither the Rock Island or any of the other intervening lines have said anything about it to us or approached us in any manner.

Mr. Cassell: That is all.

Mr. Broker: No questions.

Exam. Albus: That is all, thank you.

(Witness excused.)

Mr. Bagge: I will call Mr. Dale H. Dunn, Mayor of LaHarpe.

Exam. Albus: How about stipulating?

Mr. Bagge: What do you say about that, it it reasonable that the testimony you would give would be pretty much along the line of Mr. Stevens and Mr. Mayor? I just want to make certain I don't stipulate your rights away.

Mr. Dunn: I believe it will be the same.

Exam. Albus: Can you add anything to what they have already said?

Mr. Dunn: No.

Mr. Bagge: As to the interest of the community of LaHarpe.

Exam. Albus: Do all the counsel agree to the stipulation?

Mr. Bagge: The City of LaHarpe is an interyenor in [fol. 902] this proceeding.

Mr. Broker: I will stipulate as to position, but not as to what Mr. McNear said.

I will stipulate, Mr. Examiner.

Exam. Albus: I thank you very kindly.

Exam. Albus: Let the record show the stipulation is agreed to.

Mr. Bagge: We have another witness from LaHarpe, Mr. Harold Miller, of the Golden Rule Club, which is, in effect, the Chamber of Commerce in that community.

Do you wish to stipulate?

Mr. Wheeler: I certainly do.

Mr. Bagge: Let me ask Mr. Miller whether the testimony he is going to give is along those lines.

Mr. Miller: I am president of the Golden Rule Club, which is not the Chamber of Commerce.

Mr. Bagge: It is, in effect, the Chamber of Commerce.

Exam. Albus: Is there anything you can add to what the previous gentlemen have said?

Mr. Miller: No.

Exam. Albus: Thank you very much.

Mr. Bagge: I will agree to the stipulation of what his testimony is.

Exam. Albus: Does everybody agree to that?

Mr. Broker: Yes, sir.

[fol. 903] Exam. Albus: Off the record.

(Discussion off the record.)

[fol. 904] Exam. Albus: On the record.

Mr. Bagge: At this time we'd like the intervenors, the City of Warsaw to present their testimony.

Mr. Lamet: City of Warsaw.

Exam. Albus: You have already entered an appearance?

Mr. Lamet: We have. I entered my appearance here on the opening day of the hearing.

Exam. Albus: What is your name?

Mr. Lamet: Lamet.

Exam. Albus: Thank you.

HAROLD G. PARR was sworn and testified as follows:

Direct examination.

Mr. Wheeler: May I suggest the stipulation that this gentleman's testimony would be substantially the same as that of Mr. O'Brien, the Mayor of—

Mr. Hunter: Representing the City of Watseka.

Mr. Lamet: We don't feel we are ready to stipulate.

Exam. Albus: Proceed.

By Mr. Lamet:

Q. Mr. Parr, will you give your full name?

A. Harold G. Parr.

Q. Where do you reside?

A. Warsaw, Illinois.

Q. And what is your business or employment?

A. I am assistant manager of the Warsaw Brewing Corporation.

[fol. 905] Q. Are you not a member of the Warsaw Chamber of Commerce?

A. I am.

Q. Are you not one of the members of its executive committee?

A. That is right.

Q. Will you state, if you know, what the population of Warsaw is?

A. Approximately 2,000 people.

Q. Where is Warsaw located?

A. It is the farthersmost western point in Illinois.

Q. Is it or not along the Mississippi River?

A. It borders the Mississippi River.

Q. And where is it with reference to the route of the T. P. & W. Railroad?

A. Well, the T. P. & W. runs south from Hamilton to Warsaw, what they call the stub, and really the lifeline of Warsaw.

Q. How long a route is that, if you know?

A. I am getting to that. I would say approximately four and a half miles.

Q. Are you familiar with the investment that the Warsaw Brewing Corporation has at Warsaw?

A. I can approximate it. Seven hundred fifty thousand dollars.

Q. How long has it been engaged in business there?

A. The corporation itself approximately 20 years.

Q. Do you know or have any idea how long the establishment was there in the form of a brewery prior to that? [fol. 906] A. I can't give you an exact answer. I know that the plaque out front says 1860.

Q. Do you know, Mr. Parr, of the approximately number of cars that are either loaded or unloaded at the plant of the Warsaw Brewing Company?

A. About 125 per annum.

Q. Is there not a switch from the T. P. & W. to the plant of the Warsay Brewing Corporation?

A. Yes.

Q. Do you know anything about the period of time or history of service to the City of Warsaw of the T. P. & W. Railroad?

A. You mean about the business of the brewery itself?

Q. No, the railroad, if you will, please.

A. I don't understand the question. Would you read it?

(The question was read as follows:)

"Q. Do you know anything about the period of time or history of service to the City of Warsaw of the T. P. & W. Railroad?"

A. If I understand the question right, the T. P. & W. Railroad was originated at Warsaw, if that is what you mean. I think around the 1860's.

By Mr. Lamet:

Q. And do you know about its development from that point or have you heard any historical facts with respect to it in that regard?

A. We know the railroad, of course, has increased substantially since the McNear family has taken care of it. [fol. 907] Q. Are there any other railroads serving Warsaw?

A. None whatsoever.

Q. And do any railroads pass through Warsaw?

A. The T. P. & W. ends there. That is the only railroad.

Q. Mr. Parr, have you had occasion to familiarize yourself with the petition filed in this proceeding by the Santa Fe Railroad and the Pennsylvania Railroad for the purchase of the T. P. & W.?

A. Yes, I have.

Q. Have you discussed the matter of this petition with the Chamber of Commerce and with the management of the Warsaw Brewing Corporation?

A. I discussed with the Chamber of Commerce, with people individually, not at the meetings because I wasn't a member at that particular time, but the management, of course, has had several meetings in which we tried to decide which would be the better for our particular organization or the City of Warsaw mostly.

Q. What is the position of th Warsaw Brewing Corporation with respect to the petition?

A. We would have to cease operation.

Q. If you will give your complete answer again, please.

A. Well, we'd have to quit producing beer if we didn't have a railroad.

Q. What is your position with respect to the application by the Santa Fe and the Pennsylvania Railroad of the pur-

[fol. 908] chase of the T. P. & W.?

A. Well, we feel that by having a strong east and west traffic that the stub or lifeline to Warsaw could be maintained properly.

Q. And do you feel or not that the acquisition by these two roads would strengthen the T. P. & W. Railroad?

A. I think it will.

Q. Have you or not considered the application of the Minneapolis and St. Louis—

A. We have.

Q. (Continuing) —for the purchase of the T. P. & W. Railroad?

A. We have.

Q. What is your position with respect to that?

A. We still favor the purchase of the T. P. & W. by

the Santa Fe and Pennsylvania in pla e of four or perhaps the interest to the City of Warsaw and to our brewery would not be developed by the four people, if you get what I mean, where the two people are interested, the two parties interested would build the track up sufficiently.

Q. If you will answer again, the question was how do you feel about the acquisition by the M. & St. L. of the T. P. & W. alone?

A. We do not favor that.

Q. And will you state your reasons why that you do not favor it?

A. Well, I probably answered ahead of time there, but we still favor—we don't favor the four organizations or [fol. 909] companies buying the railroad because we don't feel that by having four that the City of Warsaw and our industries, which incidentally is the industrial city of Hancock County, would be properly serviced.

Q. What effect, do you think ownership by the M. & St. L. would have?

Mr. Wheeler: Mr. Examiner, he has asked this question three times.

Exam. Albus: I think so.

Mr. Wheeler: I object to it.

Exam. Albus: I will sustain the objection.

Mr. Lamet: I think that is all.

Exam. Albus: Is there any cross-examination?

Mr. Wheeler: I have one question.

Cross examination.

By Mr. Wheeler:

Q. When does your beer move on the T. P. & W.?

A. I didn't say it did move on the T. P. & W.

Exam. Albus: Does it?

The Witness: It has moved on the T. P. & W.

A. All of our freight inbound is T. P. & W. which we couldn't operate if we didn't have it.

By Mr. Wheeler:

Q. What do you mean inbound?

A. Well, our malt, grits, bottles, cans, everything comes by freight, inbound freight.

Q. But your beer doesn't move out at all?

[fol. 910] A. No, we have no control how the customer orders the beer. If he orders by rail, conditions change as to that. If he orders by rail, naturally we ship by rail.

Q. You don't move any beer outbound by rail?

A. We have, yes.

Q. When was the last movement, shipment?

A. I would have to check it. I would say probably 1951.

Mr. Wheeler: I have no further questions.

Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Warsaw is on the Keokuk branch, isn't it, Mr. Parr?

A. It meets the T. P. & W. at Hamilton and there is a branch that come down to Warsaw.

Q. There are two lines, one up to Lomax and one down to Keokuk?

A. The line goes to Lomax, yes.

Q. The line down to Warsaw doesn't connect with any other line beyond Warsaw, does it, it is the stub end?

A. It isn't the stub end, it is the lifeline of Warsaw.

Q. I mean it doesn't connect with any other railroad?

A. At Hamilton I imagine it does connect with the Wabash, I just couldn't tell you.

Q. What I am driving at, the T. P. & W. Railroad comes down from Hamilton to Warsaw and that is the end of the railroad, isn't it?

[fol. 911] A. That is the end of the railroad.

Q. And it doesn't connect with any other railroad at Warsaw?

A. No, it doesn't.

Q. So your outlet is to the north of the main line of the T. P. & W.?

A. That is it.

Q. And the line which is essential for you to keep in operation is the line from Keokuk to La Harpe?

A. No, the essential line is from, or our particular city, is from Hamilton to Warsaw.

Q. You would be kind of high and dry, though, if you didn't have the line from La Harpe to Keokuk?

A. We would be high and dry if we didn't have it from Hamilton to Warsaw, too.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Mr. Broker: No questions.

Further Cross examination.

By Mr. Wheeler:

Q. How many carloads did you receive over the T. P. & W. in 1955?

A. We will average one hundred twenty-five. I believe you spoke of that.

Mr. Wheeler: That is all.

Exam. Albus: Is there anything further?

[fol. 912] (No response.)

Exam. Albus: You are excused, Mr. Parr. Thank you very much.

(Witness excused.)

[fol. 913] Mr. Lamet: Mr. Sonnerborn.

Frank H. Sonnerborn was sworn and testified as follows:

Mr. Wheeler: Mr. Examiner, may I suggest stipulating the testimony of this witness to be substantially the same as the witness Harold Parr.

Mr. Lamet: We prefer not to stipulate, Mr. Examiner.

Exam. Albus: Why? Is he going to have anything in addition?

Mr. Lamet: We feel that we have a special situation at Warsaw.

Exam. Albus: Very well. All right.

Mr. Lamet: That demands considerable attention.

Exam. Albus: Very well.

Mr. Wheeler: Mr. Examiner, may I ask this of counsel is it you think there is a special situation at Warsaw or is there a special situation that this gentleman will testify that is substantially different than the condition testified to by Mr. Parr?

Mr. Lamet: There is a slight difference. It is not a material difference. We would like to cover something about the industrial plants there.

Exam. Albus: All right, if you are not going to stipulate there isn't anything I can do about it. You may proceed.

Mr. Wheeler: I object to it as being cumulative, Mr. [fol. 914] Examiner.

Exam. Albus: I know it is. These people came in from out of town and they ought to have a chance to say what they think.

Direct examination.

By Mr. Lamet:

Q. What is your name?

A. Frank H. Sonnerborn.

Q. And are you or not the president of the Chamber of Commerce of Warsaw?

A. I am.

Q. And will you state whether or not a petition to intervene was authorized by action of the Chamber of Commerce?

A. Yes, in the September meeting.

Q. Would you state or describe to the Examiner the approximate number of industries that are in Warsaw?

A. Well, we have five major industries. We have a brewery, we have Osgood & Son, that is a manufacturer of clothing, we have Grants' Storage & Battery Company, we have the Hancock Grain Elevator, and we have the Miner-ol Company.

Q. You have heard Mr. Parr's testimony with respect to the population of Warsaw and where it lies generally?

A. Yes, sir.

Q. And are you or not a shipper or receive shipments in Warsaw?

A. Yes, I receive shipments. I do no shipping.

Q. What business is that?

A. Fuel business.

[fol. 915] Q. Would you state whether or not any other modes of transportation serve Warsaw?

A. No, there is no other way I could get my product in, as Mr. Parr stated, I would be out of business in about 30 days without rail shipments.

Exam. Albus: Of course you realize this isn't an abandonment proceeding, don't you?

The Witness: Sir?

Exam. Albus: You realize this isn't an abandonment proceeding, don't you?

The Witness: Oh, yes.

Exam. Albus: All right.

By Mr. Lamet:

Q. Is there an area for possible development in the Warsaw area?

A. Yes, through the Chamber we have made several contacts. Well, I won't say we are assured but we have some very favorable replies.

Q. Now, if the petition filed here for the acquisition of the TP&W railroad by the Santa Fe and the Pennsylvania railroads were allowed what effect do you think it would have, if any, upon the industrial development of Warsaw?

A. Well, I think it would be a betterment for our community because we would have a better outlet both ways, and I think they would work to our interest, mainly where we are located, to help develop us.

[fol. 916] Q. What effect, do you think it would have, if any, upon the strength of the TP&W railroad, particularly with reference to the west end of it?

A. Well, I think it definitely would route more traffic over the west end.

Q. And what effect, would that have, if any, upon the route from Hamilton to Warsaw?

A. Well, definitely from our area—we have an area for about 15 miles for shipping and we have big grain shipments and I think it would increase that tremendously.

Q. You are familiar, are you not, with the fact that a petition has been filed here by the M&StL for the acquisition of the TP&W railroad?

A. Yes.

Q. And what effect would that if, if any, upon the western end of the TP&W railroad, if you have an opinion?

A. Well, my opinion is that they would be interested from Peoria running northeast, or west, I mean, and we would have a better outlet with the through lines connecting on each end of the TP&W.

Q. I suppose you are informed that several railroads have filed petitions here for multiple ownership of the TP&W railroad, and I will ask you to state what your position is on that as president of the Chamber of Commerce.

Mr. Cassell: There is no foundation for the supposition yet.

[fol. 917] Exam. Albus: What do you mean?

Mr. Cassell: He says he supposed he is informed.

Exam. Albus: What is your opinion on multiple ownership?

The Witness: The testimony I heard this morning is about the same thing.

Mr. Lamet: I think that is all.

Exam. Albus: Is there any cross-examination?

Cross examination.

By Mr. Wheeler:

Q. Are you familiar with Niota?

A. The town of Niota?

Q. Yes, sir.

A. Well, I know where it is.

Q. How does its size compare with that of Warsaw?

A. Oh, it is considerably smaller.

Q. Considerably smaller?
A. Yes.
Q. What railroad is it located on?
A. The Santa Fe.

Mr. Wheeler: I have no further questions.
Exam. Albus: Is there any further cross?
Mr. Cassell: Yes.
Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. You mentioned a grain elevator in town.
A. Yes, sir.
[fol. 918] Q. Isn't that a marine shipper?
A. Yes, I think they do. I am not in a position to answer that but I think they ship both ways.
Q. You really don't know?
A. I know they ship some by boat, I definitely know that but how much I couldn't tell you.
Q. The clothing company you mentioned, that ships all by truck, doesn't it?
A. Yes, they ship out by truck but they do have incoming freight by train.
Q. That would be L. C. L. or express.
A. No, it is on—they ship their fuel in by boxcar.
Q. I beg your pardon?
A. They ship their fuel in over the TP&W.
Q. You said there would be more traffic over the west end. Do you think there would be more traffic over that line of the TP&W between LaHarpe and Keokuk?
A. Do I think what?
Q. You said there would be more traffic over the west end, didn't you?
A. Yes.
Q. Would there be more traffic over that part of the TP&W between LaHarpe and Keokuk?
A. I think so.
Q. Where would that be going?

[fol. 919] A. I couldn't tell you. I am not a traffic man, but I think that the merging of the roads would introduce more traffic, and in our area I am sure it would.

Q. Does the Santa Fe connect at Keokuk?

A. No.

Q. Where does it connect?

A. Lomax.

Q. Where would the business, then, be going to and from the Santa Fe?

A. Sir?

Q. How would any business from the Santa Fe get down by Keokuk, then?

A. Well, it would be routed over to the Santa Fe. Now, I am not a traffic manager. I couldn't tell you that.

Q. Well, you really don't know, then, about whether or not there would be any more traffic over the—

A. (Interrupting) No, I don't think any of us know. I think that is just a supposition.

Mr. Cassel: That is all.

Cross examination.

By Mr. Broker:

Q. Do you understand this is a merger?

A. Sir?

Q. Did you say you understood this to be a merger?

A. Maybe I did, I didn't mean it that way. I understand what it is, yes.

[fol. 920] Exam. Albus: I think so, too.

Mr. Broker: No further questions.

Exam. Albus: Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. I forgot to ask you how far it is from Warsaw to Niota.

A. Oh, by road I suspect it is approximately 25 miles.

Q. As the crow flies how far is it?

A. I don't know, I couldn't tell you.
Q. Well, approximately.
A. Probably 20 miles.

Mr. Wheeler: I have no further questions.
Exam. Albus: Are there any further questions?
Mr. Lamet: I have another question.

Redirect examination.

By Mr. Lamet:

Q. How many cars do you receive a year over the TP&W?
A. Oh, between 50 and 60.
Q. Have you lived in Warsaw most of your life?
A. No, I haven't.
Q. What portion of your life have you lived there, would you say?
A. Oh, I have lived there about eighteen and a half years.
Q. Have you ever heard any discussion with respect to the problem of supporting the branch line from Hamilton to Warsaw?
[fol. 921] A. Would you state that again, please?

(Question read.)

By Mr. Lamet:

Q. I will put it this way: Have you ever heard any discussion with reference to the possibility of seeking abandonment of the line from Hamilton to Warsaw?
A. Oh, I have heard discussion, yes.
Q. Do you feel that the allowance of either of these petitions, referring particularly to the petition by the Santa Fe and the Pennsylvania to acquire the TP&W railroad, would so strengthen the west end of that road that it would make it more secure in the respect of maintaining the spur from Hamilton to Warsaw?
A. I do, definitely.

Mr. Lamet: That is all.

Exam. Albus: Are there any further questions?

(No response.)

Exam. Albus: You are excused, sir. Thank you very much.

(Witness excused.)

[fol. 922] Mr. Lamet: Mr. Izard.

FRANK IZARD, was sworn and testified as follows:

Direct examination.

By Mr. Lamet:

Q. Will you give your name?

Mr. Wheeler: May I respectfully suggest to counsel that we stipulate the testimony of this witness as being substantially the same as the testimony of the two preceding witnesses or covered by either one of them?

Mr. Lamet: Mr. Examiner, each of these witness is testifying to, we think, a slightly different situation.

Exam. Albus: In what regard? Not with respect to the opinions they have on grating the applications?

Mr. Lamet: Not necessarily with respect to the opinions but to the importance of the strength of that end of the road, to particularly Warsaw.

Mr. Wheeler: Mr. Examiner, I think this counsel through his two witnesses today has made that abundantly clear and we would not contest that.

Exam. Albus: I think that is true.

If you have anything further from this man on that point, I will permit it to go in, if he is going to relate the same situation with respect to saving that line down there from Hamilton to Warsaw from being abandoned, I think you are amply protected with the record in the shape it is [fol. 923] right now, if I may suggest that.

Mr. Lamet: If I may show the extent of this shipper's use of the line—

Exam. Albus: Yes, that is permissible. Yes, indeed. If he has anything in addition to what has already been said about the two previous witnesses, be sure to bring that in, too.

By Mr. Lamet:

Q. Will you give your name, please?

A. Frank Izard.

Q. What is your business, Mr. Izard?

A. Manager of the Hancock Grain Company.

Q. Will you describe what the Hancock Grain Company is?

A. It is a county grain organization with elevators, six elevators, located in various parts of the county, with the principal elevator at Warsaw, Illinois.

Q. And are you or not in direct management of the elevator of the Hancock Grain Company located at Warsaw?

A. I am.

Q. And how long have you been connected with that elevator through its ownership, various ownership?

A. Since 1945.

Q. And was that elevator or not acquired by the Hancock Grain Company since you have been in management of it?

A. Yes, sir.

Q. How many of the Hancock Grain Company's elevators are located on the T. P. & W. Railroad, if any?

[fol. 924] A. Two.

Q. Where are they located?

A. Warsaw and McCall.

Q. Could you give the Examiner an idea of the volume of business that is done by the Hancock Grain Company elevators on the T. P. & W. with respect to rail shipments?

A. Just rail shipment?

Q. Yes.

A. Oh, I would say approximately 300,000 bushel yearly.

Q. And do those go out of Warsaw and McCall?

A. Yes, sir.

Q. In addition to that do you not engage in water shipments?

A. Yes, sir.

Q. What would be the extent of your water shipments?

A. Oh, approximately 400,000 bushel yearly.

Q. Do you know how long the T. P. & W.'s service has been used by the elevator at Warsaw?

A. I really couldn't answer that. Before my time, anyway, I know that.

Q. Is the elevator served by any other mode of transportation other than the T. P. & W. and water service?

A. No, no other.

Q. In your capacity as manager of the Hancock Grain Company do you have knowledge of the extent of operations of elevators in the county in a general way?

[fol. 925] A. I do.

Q. And would you state how the rail shipments of grain from Warsaw compare with other elevators in the county?

A. I would say they are equal to probably a little more than most other rail elevators in the county.

Q. Which way do your shipments usually go from the Warsaw elevator?

A. They work east and south most of the time.

Q. And what rail facilities do you usually use other than the T. P. & W. in making those shipments?

A. Well, we don't use any other because we haven't any other.

Q. I mean when you are going to any other lines off of the T. P. & W., where do your shipments usually go?

A. To the Wabash at Forest, and the C. B. & Q. at Bushnell, and, of course, at Peoria we go to the I. C. and G. M. & O. It is according to where it is going or the destination.

Q. How great a portion of Hancock County do you feel that your elevator serves?

A. Oh, there's times when we buy grain from a distance of 20, 25 miles, but I would say an area of about 15 miles.

Q. What is the pattern or what governs the portion or your grain that is shipped by rail as distinguished from that that is shipped by water?

A. Well, we use our rail facilities more in the winter time, of course, when the river is frozen over than we do [fol. 926] in the summer, but there isn't any time in the year that we don't use the rail facilities and they are very necessary to our operation.

Mr. Lamet: Mr. Examiner, may I ask this witness the question as to his position on this petition?

Exam. Albus: Ask him if it would be the same as the first two.

By Mr. Lamet:

Q. Mr. Izard, you have heard the testimony of Mr. Sonnerborn, the President of the Chamber of Commerce, and Mr. Parr of the W rsaw Brewery, would your testimony be the same as theirs in respect to your preference of ownership of the T. P. & W.?

A. I think so.

Q. And would your opinion also be the same as theirs with reference to your unfavorable opinion of ownership by the M. & St. L.?

A. Yes.

Mr. Lamet: I believe that is all.

Exam. Albus: Is there any cross-examination?

Cross examination.

By Mr. Wheeler:

Q. Do you have car shortages?

A. Oh, at various times we have had car shortages.

Q. You are interested in a more adquate car supply?

A. Sir?

Q. You are interested in a more adequate car supply?

A. All grain people are, I think.

[fol. 927] Mr. Wheeler: I have no further questions.

Exam. Albus? Mr. Cassell?

Mr. Cassell: No cross.

Exam. Albus: Mr. Broker?

Cross examination.

By Mr. Broker:

Q. You ship these to various other interchange points, don't you, Forest, Bushnell, Peoria?

A. Yes, sir.

Q. And you are very much interested that good service continue to be given at each of those interchange points, aren't you?

A. Yes, sir.

Mr. Broker: Thank you.

Exam. Albus: Nothing further, you are excused, Mr. Izard. Thank you very much.

(Witness excused.)

[fol. 928] Exam. Albus: Does that complete the witnesses from Warsaw?

Mr. Lamet: I have one more, which will be brief. I would like to have the mayor.

Exam. Albus: All right.

HENRY THALMANN was sworn and testified as follows:

Mr. Wheeler: Mr. Examiner, may I move that the testimony of the mayor be stipulated to be the same or substantially the same as the witnesses who have appeared from Warsaw.

Mr. Lamet: Mr. Examiner, we will make this short. We won't go into detail about this. We simply want to show the position of the city of Warsaw.

Exam. Albus: It is going to take longer to get the stipulation straightened out than to have the mayor testify.

Direct examination.

Q. Your name is Henry—

A. Henry Thalmann.

Q. And are you or are you not mayor of the city of Warsaw?

A. Yes, sir.

Q. Was there or not a resolution adopted by the City Council of the city of Warsaw authorizing intervention by the city in this proceeding?

A. Yes, sir.

Q. And would you state about when that was?

A. About September 17.

[fol. 929] Q. Would you state the position of the city of Warsaw with respect to ownership of the TP&W railroad by the Pennsylvania and the Santa Fe?

A. I think it would benefit Warsaw and develop industrially.

Q. Is the position of the city of Warsaw therefor favorable to the allowance of that petition?

A. Yes.

Q. Can you state the position of the city with reference to ownership of the M&StL?

A. Not in favor.

Q. Now, Mr. Thalmann, do you feel that you are qualified to testify with respect to interchange of traffic with other railroads along the routes of these two roads?

Exam. Albus: He may feel it but I don't think so.

Are you a shipper, Mr. Thalmann?

The Witness: No, sir.

Exam. Albus: That takes care of that.

Mr. Lamet: That is the answer I wanted to extract from him and that is the end of the testimony.

Exam. Albus: Is there any cross-examination?

Mr. Wheeler: No, sir.

Mr. Cassell: No, sir.

Mr. Broker: No, sir.

Exam. Albus: Thank you, Mr. Mayor, you are excused.

(Witness excused.)

[fol. 930] Mr. Bagge: Mr. Examiner, if it wouldn't be impertinent that I request that we have a recess at this time. I think we can arrange it so we can arrange for the stipulation of the balance of our witnesses and make it as brief as possible.

Exam. Albus: We will take a recess until 3:40.

[fol. 931] Exam. Albus: The hearing will please come to order.

We will continue with the applicants' witnesses, the Pennsylvania and the Santa Fe.

Mr. McMunn: Mr. Woods, please.

W. Paul Woods was sworn and testified as follows:

Direct examination.

By Mr. McMunn:

Q. Will you state your name, please?
A. W. Paul Woods.
Q. Where do you reside, Mr. Woods?
A. 105 East Myrtle Street, Canton, Illinois.
Q. What is your occupation?
A. I am a die fitter at the International Harvester Company and mayor of the City of Canton.
Q. How long have you been mayor of the City of Canton?
A. I have been a city official, alderman, for 10 years, and mayor going on seven years.
Q. What is the population of the City of Canton?
A. Approximately 12,500.
Q. And where is it located with reference to Peoria?
A. Approximately 30 miles—I mean west and south.
Q. And what railroads is it on?
A. It is on the T. P. & W. and the C. B. & Q.
Q. They cross in Canton?
A. That's right. They cross at Fourth Avenue and Railroad.
[fol. 932] Q. What business and industries are located at Canton?
A. We have the International Harvester Company and overall company, two overall companies, and the elevator.
Q. Are there any strip coal companies in or near Canton?
A. We have strip mines south and west of Canton.
Q. And some of their headquarters are in Canton?
A. That is right. They have headquarters across—headquarters is across from the city building in the City of Canton.
Q. What is by-far the principal industry in Canton now?
A. International Harvester Company.
Q. And how many men do they employ?
A. It varies at times, from seventeen hundred to about twenty-six hundred.

Q. I will ask you if the city council of Canton took any official action as regards filing a petition to intervene in this case?

A. They did, on September, around September 20, 1955.

Q. And what was that action?

A. They instructed you and I to intervene in the case.

Q. Intervene on whose behalf?

A. In behalf of the city council.

Q. What was the position of the council action in regard to the acquisition of the T. P. & W. Railroad by the Santa Fe and Pennsylvania?

A. They unanimously approved them.

[fol. 933] Q. Do you know the reasons for this?

A. They are interested in the survival of the City of Canton and the people because we have seen times before where it has not been too good of transportation through there once before, before Mr. McNear had it.

Q. What was the reasoning of the council—what was the position of the council with regard to the acquisition of the line of the T. P. & W. by the M. & St. L.?

A. They haven't taken any action of the city council because they adopted the resolution, they stayed by it, and they weren't asked for another railroad.

Q. Have you read the petition of the Santa Fe and the Pennsylvania—

A. I have.

Q. (Continuing) — their application in this case?

A. I have.

Q. Have you also read portions or the application of the M. & St. L.?

Mr. Wheeler: Will you clarify it just to indicate whether it is the application or portions.

Mr. McMunn: Portions.

A. I have read portions.

By Mr. McMunn:

Q. Is your position still the same, I mean the official position of the city council that they are favorable towards the Santa Fe and the Pennsylvania—

[fol. 934] A. That's right.

Q. (Continuing) —rather than the M. & St. L.?

A. That is right.

Q. Since the filing of the petition to intervene or rather since the council action of September 20 have you since learned that there are other roads, namely the Nickel Plate and the Rock Island, who have also asked in their petition to intervene, asked to purchase a proportionate share of the T. P. & W.?

A. I have knowledge of that.

Q. Where did you get that information?

A. Mostly, I believe I did receive some communication from the commissioner or somebody, and also through newspaper readings.

Q. Has this matter been discussed in the city council?

A. Informally.

Q. What in your opinion is the position of the city council as regards what has been termed multiple ownership here?

A. Well, personally myself I think most of them I have talked to they are opposed to it on the strength that sometimes it is hard enough to get one ownership to fix a railroad crossing without having to go to several.

Mr. McMunn: That is all.

Exam. Albus: Is there any cross-examination?

Mr. Wheeler: No, sir.

Exam. Albus: Mr. Cassell.

Cross examination.

[fol. 935] By Mr. Cassell:

Q. Did you understand that you were going to have several railroads managing the T. P. & W. if the various plans were approved?

A. I understand that.

Q. And if you were informed that the Rock Island subscribed to the same position as the Santa Fe and the Pennsylvania, that the present management and present officers of the T. P. & W. would be left intact and the present corporation, which is now serving you, be left intact, wouldn't that serve your purpose?

A. It still wouldn't change my position.

Q. You would have only just one person to go to just as today, wouldn't you?

A. I hope so.

Q. If you had that, that would be what you want, isn't it?

A. Well, you have a point there that we like to, when we ask for something to be done, we can go to one individual. I mean it is easier to get anything done. You realize that and I do too.

Q. Surely. If you were assured of that, that's what you want, isn't it?

A. As far as we are concerned we would be interested in one management of it.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

[fol. 936] By Mr. Broker:

Q. Do you understand that you would have occasion to go to the Pennsylvania and Santa Fe if they alone obtained control?

A. Do that, sir?

[fol. 937] Mr. Broker: Would you read the question, please.

(Question read.)

A. If they would obtain control of it, I presume that we'd still be in the position we are at the present time, that we would, instead of under one management, that they'd have this one line, the TP&W, that they wouldn't deprive it of its present management, and that's who I feel like it would be, if I needed to get anything done, that I could get ahold of them.

By Mr. Broker:

Q. Do you understand that if the Nickel Plate were to gain control it would maintain the same organization that presently exists?

A. I do.

Mr. Broker: No more questions.

Exam. Albus: Your only purpose in being here, Mr. Mayor, is to support the application of the Pennsylvania and the Santa Fe?

The Witness: That is right, sir.

Exam. Albus: Thank you very much.

You are excused.

(Witness excused.)

Mr. Ramsey: I will call Mr. Cole.

KENNETH CHARLES COLE, was sworn and testified as follows:

Direct examination.

By Mr. Ramsey:

Q. Would you state your name, please?

[fol. 938] A. My name is Kenneth Charles Cole.

Q. And your address, please?

A. Canton, Illinois.

Q. And your occupation?

A. I am executive secretary of the Canton Chamber of Commerce.

Q. Mr. Cole, how many members are in the Canton Chamber of Commerce?

A. We have 436 members which comprise the business, professional, industrial, manufacturing interests of the city.

Q. And are all types of business and industry represented in the membership?

A. Yes.

Q. Has the Board of Directors of the Canton Chamber of Commerce had an opportunity to meet and officially take any action in regards to the application of the Santa Fe and the Pennsylvania railroads in obtaining control of the TP&W railroad?

A. Yes, on September 9 at our official board meeting the application, or not the application itself, but there was mention made of the application by the Santa Fe and the Pennsylvania to acquire the TP&W, and the Board approved the then president to file a petition to intervene.

Q. And that petition of intervention was filed, is that correct?

A. Yes.

Q. Was this matter discussed officially by the board of [fol. 939] directors?

A. Yes, it was. At that meeting and also subsequent meetings, as other petitions came to our office.

Q. What is the official position of the Canton Chamber of Commerce?

A. The Canton Chamber of Commerce definitely opposes the Santa Fe and Pennsylvania in their application to acquire the TP&W. Canton is a one-industry town, namely, the International Harvester Company, and since business fluctuations cause fluctuations of employment at the International Harvester, these same fluctuations cause fluctuations in the business and economy of the entire city. As it has been mentioned before, the International Harvester employs twenty-four or twenty-five hundred people. The strip mines in the area employ roughly throughout the county another fifteen hundred.

Exam. Albus: What is your position in this case?

The Witness: Sir?

Exam. Albus: What is your position in this case?

The Witness: I am secretary of the Chamber of Commerce.

Exam. Albus: I know, but what position does the Chamber take?

The Witness: We are supporting the position of the Santa Fe.

Exam. Albus: I understood you to say you were opposing.

The Witness: Oh, no. If I did, I didn't mean it.

Exam. Albus: Now, you may continue.

[fol. 940] Mr. Broker: I thought he said that, too, Mr. Examiner.

By Mr. Ramsey:

Q. Your position is—

A. We are definitely supporting the application of the Santa Fe and Pennsylvania.

Q. What is the economic situation of the town by which you have arrived at these decisions?

A. Well, Canton is the largest city in Fulton County. It does an average retail business of $25,000,000 per year. As I was saying earlier, the prime employment is at the International Harvester and the strip mines in the area. There isn't enough employment to go around. The population was approximately 11,000 and today it is 12,300. However, the hypothetical population of today should be about 25,000 people. There are 276 babies born in Canton every year—

Exam. Albus: What's that going to have to do with this case?

The Witness: I want to show the need for increase in industrial development, which is our main point here. I have a point to make, sir.

Exam. Albus: All right, go ahead and make it.

A. There are 156 deaths in Canton every year which leaves 120 people gained. Over a period of 25 years that would mean another 3,000 people. Now, there are 150 new families move into Canton every year and the average family is at least three people and that would be 450 people per year or a gain of 11,250 persons over the 25 years since 1930 to 1955, or adding that to the 1930 population [fol. 941] we should have 25,000 people in Canton but we only had 12,000 because there aren't jobs available.

The average graduating class of the Canton High School was 279 students, 54 of them going to college, 225 are put on the labor market every year and we don't have jobs for them.

The position of the Canton Chamber of Commerce is one or rather our main project is industrial development. We have been working for several years in trying to attract industry to Canton to take up this unemployment. We have one fairly warm prospect right now who is considering Canton providing, of course, that the Santa Fe acquires the TP&W. True, they may decide not to come to Canton even though the Santa Fe does come in, but at least they are considering us now because the Santa Fe is trying to acquire the TP&W.

By Mr. Ramsey:

Q. In other words, it is essential in your opinion and in the opinion of the Chamber of Commerce that the very active and aggressive railroad, east and west, I should say, be obtained or retained through Canton, is that correct?

A. Yes.

Q. And the basis of that would be primarily for industrial reasons?

A. That is right.

Q. Have you had any occasions to examine or learn about the application or portions of the application of the M&StL?

A. I have read the excerpts from it.

[fol. 942] Q. And other railroads who wish to intervene?

A. Yes, I have seen the petitions.

Q. What is the Chamber of Commerce's position with regard to those railroads or any other railroads?

A. It appears to the Chamber of Commerce as far as the Minneapolis, St. Louis railroad is concerned since they run from northwest to southeast into Peoria and for a great portion of that run they parallel the route of the TP&W it doesn't appear to us that the Minneapolis, St. Louis would maintain the western half of the TP&W. It doesn't seem to us that it would be economically feasible for them to do so.

Q. What is your position with regard to the Rock Island, Nickel Plate railroads obtaining interest and control?

Mr. Casseli: I object to that. It doesn't show that the Chamber has taken a position, it shows to the contrary.

Exam. Albus: Has the Chamber of Commerce taken a position?

The Witness: As the petitions came to our office we have looked them over and talked about them several times since our petition was filed and we have discussed—

Exam. Albus: Have they passed a resolution?

The Witness: They haven't passed a definite resolution but we have discussed it.

Exam. Albus: Objection sustained.

By Mr. Ramsey:

Q. Would you state your opinion with regard to that?
[fol. 943] A. I don't believe, like everyone else has talked about it as far as multiple ownership, as far as development purposes the fewer owners the better especially as to economic reasons, the more owners the less economic interest they would have in that particular area.

Mr. Ramsey: That is all I have.
Exam. Albus: Thank you.
Cross-examination, please.
Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. What industry was it that you refer to as coming into Canton only if the Santa Fe came in?
A. I am not at liberty to say.

Mr. Wheeler: Mr. Examiner, I move that his testimony be stricken, then.
Exam. Albus: With respect to that industry—no, it may stand. What difference does it make?
Mr. Wheeler: Mr. Examiner, how can I determine whether or not this witness is telling the truth or not if he won't answer questions with respect to it.
Exam. Albus: Let the record stand the way it is.
Mr. Wheeler: I have no questions.
Exam. Albus: Thank you.
Mr. Cassell.

Cross examination.

[fol. 944] By Mr. Cassell:

Q. Mr. Cole—
A. Yes, sir.
Q. (Continuing) —you are familiar with the petition which your Chamber filed?
A. I have seen it, yes, sir.

Q. Does that correctly state your position in this case?
A. I believe so.

Mr. Cassell: That is all.
Exam. Albus: Mr. Broker.
Mr. Broker: No questions.
Exam. Albus: Thank you.
Mr. Ramsey: I would ike one more, Mr. Examiner.
Exam. Albus: Very well.

Redirect examination.

By Mr. Ramsey:

Q. Can you tell us why you can't disclose the name—

Exam. Albus (interrupting): He doesn't have to do that. I have already ruled on it.
You are excused.

(Witness excused.)

[fol. 945] Mr. Ramsey: I will call Mr. Murphy.

Francis P. Murphy was sworn and testified as follows:

Direct examination.

By Mr. Ramsey:

Q. Would you state your name, please.
A. Francis P. Murphy.
Q. And your address?
A. Canton, Illinois.
Q. What is your occupation?
A. County judge, Clinton County.
Q. Are you holding any official capacity with a corporation called Canton Industries, Inc.?
A. I am a member of the board of directors.
Q. Would you briefly describe the interest and activities of that organization.
A. Canton Industries is an industrial development fund about two years old which has by popular subscription

raised a sum of money in an effort to attract industry to Canton. Canton Industries feels that the future of the town depends very vitally on the diversification of industry in that town, and we feel, with regard to this particular proceeding, we are very much concerned about transportation. One of our problems in the past has been transportation which was not considered to be too good. The TP&W has improved during the past 10 or 15 years. We are on a branch line of the CB&Q. We know very defi- [fol. 946] nitely from contracts in the past that unless we keep or improve the transportation system that we have today that we are not going to get any, probably not going to get any further industry in the town.

Q. Judge Murphy, are you familiar with the application of the Santa Fe and the Pennsylvania Railroads, the application to acquire control of the TP&W Railroad?

A. I have a pretty good knowledge of it.

Q. Has the Canton Industries taken any official position in regard to that?

A. Yes, action was taken last July and a letter was written to the Commission by the then president of the Canton Industries. At an annual meeting about a month ago the matter was again discussed informally, at this annual meeting, and by the board of directors, and I was brought up to date on our position.

Q. Would you state that position.

A. We are in favor of acquistion of the TP&W by the Santa Fe and the Pennsylvania Railroad.

Q. And can you state briefly why.

A. It is our understanding that first of all the TP&W will be left in the hands of the same management that has control at this time. It has, in our estimate, been progressive. In addition to that, although I frankly am not counting my chickens before they are hatched, I feel that if this is part of the Santa Fe, and a little more remotely, of the Penn- [fol. 947] sylvania Railroad, that when it comes to locating industry we are going to get a chance to talk to some of these people, whereas in the past we have had no bids and, of course, there is no interest on the part of the Santa Fe up to this time to come to Canton.

Q. Are you familiar with the application of the M&StL Railroad?

A. Well, slightly, yes.

Q. Or portions of it?

A. Slightly.

Q. Has the Canton Industries, Inc., taken any position in regard to their application?

A. The feeling of the board, Canton Industries board of directors, has been one rather of an opinion based simply on the fact that the M&StL is a few miles north of the TP&W. It is our understanding that it is, the acquisition of the TP&W is, primarily to connect up two interests, and that the west end of the TP&W from Peoria west, at best, would not be promoted and might very well in the future be neglected and leave Canton to die.

Q. Now, are you familiar with the intervention of the Nickel Plate and the Rock Island Railroads?

A. I know that they have intervened.

Q. And have the Canton Industries taken any official action regarding that?

A. I don't think at the time of our last meeting that we were too familiar with their aims, but the general proposi- [fol. 948] tion was brought up, how do we feel about, may I say, multpile ownership, and the feeling there was that if it was expressed too diversely, the very thing that we are after is somebody, for instance, Santa Fe, who might be interested in our city because it was on their line, if the thing is spread out too many places we are going to be lost in the shuffle, and I'd say, without knowing too much of the facts with regard to the other railroads, our feeling is that we'd rather take our chances with the Santa Fe. And I might add this, we are very selfish about it, we don't care about the Santa Fe, we are looking out for us. If somebody comes along with a better proposition, we'd like to hear it.

Mr. Ramsey: That is all.

Exam. Albus: Cross-examine, please.

Mr. Wheeler.

Cross examination.

By Mr. Wheeler:

Q. Have you inquired with respect to the efforts of the Santa Fe Railroad to aid industrial development in towns on their line in Illinois?

A. My answer is no, but let me add this one point, if I may. A few weeks ago a neighboring town got an industry we would have liked to have received, purportedly on the basis that they wanted to be on the Santa Fe. Now, how they got it and what the details were I don't know, but that is the newspaper report. Maybe we'd had a show on that [fol. 949] if we had been on the Santa Fe or tied in with them.

Q. Is that the same industry as referred to by the previous witness?

A. I don't know. I don't think so, but I don't know.

Q. Do you know the name of the industry?

A. Brown Trailer, or something, something or other, from Toledo to Galesburg.

Q. Now, with specific reference to Lomax, do you know what the Santa Fe has done to encourage development at Lomax?

A. No, I don't.

Q. How does Lomax compare in size to Canton?

A. I don't know. It is considerably smaller, but I don't know the population of Lomax.

Q. Yet it is located on the Santa Fe, is it not?

A. That is right.

Q. Have you looked at a map of the Santa Fe and seen the size of the towns located on its line?

A. I have noticed some of them, yes.

Q. Some of them are very small, are they not?

A. Yes, sir.

Q. Are you aware that some of them have no industries at all located there?

A. Yes, sir.

Q. Are you aware that some of the towns that have been on the Santa Fe for many years still have no industries in them?

[fol. 950] A. Yes, sir.

Mr. Wheeler: I have no further questions.
Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Murphy, I take it, then, you are not familiar at the present time with the plan of Rock Island in this case?

A. What little I know is mostly from what's been said here today or, shall I say, suggested. I don't know the details now.

Q. I see. One of your principal concerns is the retention of the present management and the policies of that management, is that right?

A. One, yes.

Q. A plan that would give you that, that's what you want, is that right?

A. Well, I added this other point, that I have been told that this is what will follow. I am not naive enough to believe that it's guaranteed, but if the TP&W becomes a part, a subsidiary, if you want to call it that, of the Santa Fe, I think we may have reason to reasonably expect some consideration from the Santa Fe through their industrial development program. Now, let me put it this way, I have no guarantee, I have been given no assurance by anyone, but certainly from what we have today and the possibilities of the other arrangement, I think we have something to gain. At least, it is a gamble.

[fol. 951] Q. Wouldn't these other railroads have industrial departments equally interested in locating industries in Canton?

A. That is, what other railroads, the ones that have intervened?

Q. The Rock Island, for instance.

A. I don't know why it would. It is quite a ways off.

Q. Isn't the Santa Fe just as far off?

A. The Santa Fe will be interested in the TP&W.

Q. Do you know where the Rock Island connects with the TP&W?

A. At Peoria.

Q. Any place else?

A. I think it connects at Keokuk.

Q. And it connects at the western end just like the Santa Fe, doesn't it?

A. Yes.

Q. So it needs the TP&W to provide a route to the east, doesn't it, just like the Santa Fe?

A. If you are asking needs, I don't know. You may want it, it may be advantageous to the Rock Island, I don't know that it is needed.

Q. Isn't the situation of the Rock Island similar to that of the Santa Fe in this case?

A. Yes, I will agree with the point you are making. The point I am making is, we feel that if the TP&W is identified enough with one major line, in this case the Santa Fe, we are going to be better off than if it is a subsidiary of half [fol. 952] a dozen different railroads.

Q. Do you understand that the Santa Fe service is going to come through Canton?

A. No. I say if the TP&W is identified with the Santa Fe.

Q. Wouldn't the identification with another strong railroad help, too?

A. Yes, it would, providing there aren't too many. Let's put it this way, if there are six of you identified with, interested in, the TP&W, I just wonder how much interest any one is going to have in Canton, Illinois.

Q. Wouldn't you suppose any line that was putting up four million dollars would be pretty interested?

A. Four million dollars where and for who?

Q. To buy in.

A. I don't know that they would be interested in Canton, Illinois.

Q. Wouldn't you think that would be enough to interest them in the line they are buying?

A. Yes, it would. I am not saying that they wouldn't be interested, that they might not do something. I am out in the sticks and I am looking at it from our viewpoint, and we think if it is spread out too much we are not going to have the interest that we might have from one or two. I might say this, under certain circumstances, I would prob-

ably say I'd only want to see one. However, this seems to be a link between two major lines.

[fol. 953] Q. Well, now, let's put it this way, Mr. Murphy, suppose you had $50,000 invested in a company and John D. Rockefeller had $50,000 invested in a company, which of you would have the major interest in that company?

A. Obvious.

Q. Who would that be?

A. Practically or on paper? On paper it would be the same. Practically, I think there might be a little more influence on one side or the other.

Q. Practically which one of you are going to be more concerned about that fifty thousand bucks?

A. I am.

Q. Sure. So it isn't controlled just by the percentage that you have in a company, then, is it?

A. No, that's right, I will agree.

Q. And anybody who puts in four million dollars might be pretty interested in it, mightn't they?

A. Yes, I don't know that their interest is in Canton. Their interest may be in saving their own skin, which is the interest in Canton I am concerned with.

Q. Have you been told that the Santa Fe was just interested in Canton?

A. No.

Q. What about its skin?

A. They are looking after themselves, too, but I think we [fol. 954] have a little more opportunity and, as I say, I don't trust them much more than I trust anybody else, but from a practical standpoint I think there is a little bit more opportunity of getting some consideration from them if they are primarily interested, if they are the big interest holder in the TP&W.

Now, of course, the proposition is two in this particular situation, the Pennsylvania and the Santa Fe, but let's not get too many in here, because we are just going to have a little old tip up through there.

Q. Don't you think that a line which would put in so substantial an amount of money in that would be interested in developing it on your basis, now, your Rockefeller

versus yourself, wouldn't you be a lot more interested in seeing that $50,000 prosper than Mr. Rockefeller?

A. The analogy is perfect except there may be some other reason for that four million dollars. I don't know what it is.

Q. So far as you know, it looks like anybody who would put up four million dollars would be pretty interested in preserving the whole line, doesn't it?

A. For their own advantage.

Q. And that would have to result to yours, too, wouldn't it, the only way they can prosper is by having the railroad prosper, isn't it?

A. I told you I am from the sticks, I don't know all the answers.

[fol. 955] Q. How do you make dividends on an investment?

A. How do you make dividends by an investment?

Q. By making the investment prosper, don't you?

A. That is right.

Q. That's about the only way the Rock Island could make a return on its four million dollars, then, isn't it?

A. Yes.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

[fol. 956] Cross examination.

By Mr. Broker:

Q. How far away did that other industry locate that you sought for your town?

A. About 45 miles. I say we didn't seek it. It was located and the report that I received—remember, I have no facts, shall we say. The report was that they wanted to locate on the Santa Fe.

Q. Your interest apparently is to seek identification of the T. P. & W. with, let's say, the Santa Fe?

A. I think it would help in talking to prospective industry to show that we are connected with two of the major lines.

Q. Now, you seem to look more to the Santa Fe than to the Pennsylvania, is that right?

A. I'd say yes, primarily because of its proximity. Actually there is a problem of location, of a connecting link between the two railroads, which would be advantageous certainly for shipping ease, Santa Fe going west.

Q. You think, then, that the Pennsylvania would be more interested in locating industry near Effner, let's say, than nearer your part of the line?

A. I would think so. I am no expert on it, but I would think so.

Q. The thing that I wonder about is this, is how this identification with these owners squares with the idea of an independent railroad. Could you give me your ideas on that?

[fol. 957] A. I have spent several years in industry, and in the big city, I might say, and I have found that management in the big city the same ~~as in~~ the small town, they are not any smarter and they are influenced, and particularly in the big city, the big name influences management. Now, this is just a general statement. If you go to Chicago or if you go to Toledo or Cleveland or someplace else, what is the T. P. & W.? We take pride in our area and the T. P. & W. because we know twenty or twenty-five years ago what a wreck it was. Today it is something to be proud of. But how many people in the rest of the country know that? If they know that they have what amounts in practice to a direct line starting at the east or any place on the Pennsylvania and riding on through the Santa Fe, missing Chicago, from the people I have known in industry, that would be a very good argument. I personally have talked to people in Chicago, people in industry, talking to them about coming to Canton, and the big problem that always comes up, well, what about transportation, and I get arguments for a few minutes, and in about 15 minutes I stop the arguments. They don't maybe agree but they don't disagree. When they find out what we have, the possibilities. I had one representative of one firm, met him at the convention in Chicago, who told me, he said, "If you had told us about Canton three or four years ago, we might have been interested, but we just got through building a

plant." But he was surprised when I told him the possibilities in transportation.

[fol. 958] Q. You indicated earlier in response to a question from the Rock Island attorney that the Nickel Plate, let's say, might be willing to invest $4,000,000, not because of interest in Canton but for possibly some other selfish reason, is that right?

A. That is right.

Q. And wouldn't that be true of the applicants equally?

A. Sure.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

Mr. Wheeler: Yes, sir.

Exam. Albus: Mr. Wheeler.

Further cross examination.

By Mr. Wheeler:

Q. Don't you think an industry would prefer a location on the Santa Fe's main line to a location on the Santa Fe's secondary line?

A. I would say yes, very definitely. May I make a comment there?

Q. Certainly.

A. We feel that this line has a possibility, and I might say this, Mr. McNear was not the only one to dream.

Q. I don't want you to dream on the record, please.

A. All right.

Q. If you have something concrete, I'd like you to state it.

A. Yes, I have. Will you let me finish, please?

Q. Sure.

[fol. 959] A. If the T. P. & W. becomes an integral part, separate management, but in practice a part of the Santa Fe and the Pennsylvania and a by-pass of a bottleneck, doesn't that amount pretty close to being on the main line? Maybe it doesn't, but I think I could sell it to some people who are interested in an industrial site. Now, again it is a matter of opinion. It isn't as good maybe but I think in this particular situation we have some possibilities with this kind of a setup.

Q. If you had a 50 per cent interest of a business, in one business, and a hundred per cent interest in another, to which business would you devote your most effort?

A. That's the thing I am worried about.

Q. The answer is—

A. (Interrupting) The answer is the one with the hundred percent.

Q. Now let me ask you this, have you counted the number of towns on the main line of the Santa Fe to which that railroad owes its industrial efforts?

A. No, I haven't.

Q. Have you looked at a map of the Santa Fe to get an approximation of how many towns that would be?

A. I have looked at a map. I never stopped to count the towns. Do you want me to?

Q. No, sir. Have you looked at a map of the Pennsylvania?

A. Yes, sir.

[fol. 960] Q. Have you noticed the number of towns on their main line to which the Pennsylvania owes its industrial development efforts?

A. Are you asking me if—

Q. (Interrupting) Can't you just answer that yes or no?

A. No, I can't because I am not too sure I get the question, the thought behind it.

Q. I asked you have you looked at the main map showing the towns on the main lines of the Pennsylvania to ascertain at least in general how many towns the Pennsylvania, towns located on its main lines, the Pennsylvania now owes its efforts toward industrial development?

A. I have made no study in that regard.

Q. You didn't think that was pertinent to your determinations in this case?

A. I answered that question to save time because I don't know what your thought is behind it, so I said I made no study of that problem. I say this on the Pennsylvania—

Q. (Interrupting) Now, wait a minute, can you answer my question, didn't you think that the ascertainment of those facts was important to your determinations with respect to the applications here?

A. Didn't I think that?

Q. Yes.
A. In the past?
Q. Yes.
[fol. 961] A. No, I don't think that.
Q. Do you not think that might have a bearing?
A. It might have a bearing but not an all persuasive bearing.

Mr. Wheeler: I have no further questions.
Exam. Albus: Are there any further questions?
Mr. Cassell: No, sir.
Exam. Albus: You are excused. Thank you, Judge, so much.

(Witness excused.)

Mr Bagge: Mr. Examiner, this concludes the testimony of the applicant railroads as to the eastern and unless I have missed one or two.
Mr. Lucas, is that correct?
Mr. Lucas: No, we had a lot of witnesses, but they are not available. We are willing to let the eastern end of the line be closed.
Mr. Lucas: I wonder if I might clear up something on the record. Mr. Cassell has referred several times to a figure of $4,000,000 as to the potential consideration of the Rock Island and now Mr. Broker has picked up that $4,000,000, which would see to be a third interest. Their petition of intervention certainly indicates rather clearly that they are willing to take an equal part with the applicants or with such other railroads as may be authorized to participate. I would like to ask if they are willing to state on the record whether they are changing their position in the petition of intervention?
[fol. 962] Mr. Broker: That is the maximum amount that we would have to pay, one third of the purchase price.
Mr. Lucas: This is the Rock Island, Mr. Broker, "be included in such purchase on an equal basis with two applicant carriers and such other railroad companies or their subsidiaries as may be authorized to participate in such acquisition."
Mr. Cassell: I think it is perfectly clear.

Mr. Lucas: Twelve million dollars is what is paid for the stock.

Mr. Cassell: Our maximum liability in this case is $4,000,000. That is what we are willing to put up here and that is our stand in this case.

Mr. Lucas: Let's leave it without a dollar tag. Are you seeking a third or a fourth? If the Commission sees fit to include the Nickel Plate along with the Rock Island?

Mr. Cassell: If it sees fit to include the Nickel Plate, we get a fourth.

Mr. Lucas: Is that true of you, Mr. Broker?

Mr. Broker: That is right, a proportionate share with all of those that are included who gain control.

Mr. Lucas: Well, if you include the Wabash and the C. B. & Q., would you cut down to a sixth?

Mr. Cassell: We said equal participation with whoever are in.

Exam. Albus: All right, that clears that up.

[fol. 963] Exam. Albus: Mr. Wheeler.

Mr. Wheeler: I would like to call Mr. Russell Coulter.

J. R. Coulter was sworn and testified as follows:

Direct examination.

By Mr. Wheeler:

Mr. Wheeler: Mr. Examiner—

Q. Would you please state your name and address for the record.

A. J. R. Coulter, Peoria, Illinois.

Q. And your occupation?

A. I am president of the TP&W railroad.

Mr. Wheeler: Mr. Examiner, I am calling Mr. Coulter to the stand as an adverse witness. Mr. Coulter, as he has stated, is president of the Toledo, Peoria and Western, an intervenor in this case in support of the applications of the Pennsylvania and the Santa Fe, and therefor necessarily in opposition of our application insofar as the grant

of the Santa Fe-Pennsylvania would exclude a grant of our application.

I am going to ask Mr. Coulter a very narrow line of questions. I am not offering him as a direct part of our case, obviously as I have stated, he is an adverse witness. I think, however, that the cross-examination of Mr. Coulter should be limited to the examination that he is asked by me. And if anyone else want to call him as a witness in support of their case they are free to do so.

[fol. 964] Exam. Albus: Very well.

Mr. Broker: I would just like to correct or inquire, you indicated that possibly the TP&W was a parity, you mean that Mr. Coulter is a parity individually, don't you?

Mr. Wheeler: No, sir, the TP&W I am referring to.

Mr. Thomas: That isn't correct just to keep the record straight. The trustees have intervened. The TP&W is not a parity in this case.

Exam. Albus: Does that change the situation any?

Mr. Wheeler: I don't believe it does, sir, since the trustee hold the majority of stock in the railroad.

Exam. Albus: Mr. Cassell.

Mr. Cassell: I have a statement which I think should be made before the M&StL starts its case. I think it would appropriately come at the conclusion of the applicants Santa Fe and Pennsylvania, which relates to our own presentation and I would like to ask a question of them now, if I may, I think it would be more appropriate now.

Exam. Albus: Very well.

Mr. Cassell: We have some testimony prepared on passenger operations. However, we have the statements of record of the Santa Fe and Pennsylvania witnesses that no passenger operation is contemplated. If we may have a stipulation that no passenger operation will be conducted over the TP&W, either by the TP&W or through the Santa Fe or Pennsylvania or any other acquiring party, without [fol. 965] a subsequent application to the Interstate Commerce Commission for approval of the institution of that service, we, of course, would have no need for putting on that testimony.

Mr. Broker: What is your suggestion, imposition of a condition to present passenger service?

Mr. Cassell: That is correct and without going to the Commission for approval of the institution of a new service.

Their present position is that none is contemplated.

Exam. Albus: That is right.

How do you feel about that, Mr. Thomas?

Mr. Thomas: I don't feel I could make a stipulation on that until I talk with my executives.

Exam. Albus: Very well. May I suggest that you two get together afterwards. I am sure we are going to be here for a couple more days.

Mr. Cassell: M&StL operation goes either jointly or separately over the TP&W.

Mr. Wheeler: We haven't any contemplation of any at the present time.

Mr. Lucas: For the Pennsylvania I am not prepared to stipulate that in any event. There is some passenger service there now. I don't believe it would be necessary to go to the Commission. I am not sure but if there is independent management, certainly as far as the Pennsylvania is concerned [fol. 966] we are not going to interrupt whatever they may be doing in respect to existing passenger tariffs.

Mr. Cassell: Will you please describe the present—

Mr. Lucas: No, I will not.

Mr. Cassell: You said there was and I am informed that there is not. Is it a fact that there is, am I misinformed?

Mr. Lucas: There are passenger tariffs outstanding, there are passengers that occasionally use the TP&W, that is my understanding.

Mr Cassell: On mixed trains?

Exam. Albus: Let's stop arguing. If you can get together I will accept the stipulation but I can't force anybody to make the stipulation.

Mr. Thomas: Mr. Examiner, I want to say one more thing.

Exam. Albus: Yes, Mr. Thomas.

Mr. Thomas: I don't feel it is appropriate to prevent my cross-examining a witness that this gentleman here calls just by his labeling him as an adverse witness, I don't see why that should restrict me.

Exam. Albus: Well, he just wanted you to be apprised of the fact to keep the cross-examination to the direct, and that is the law of evidence. Of course I will admit we don't follow it.

Mr. Lucas: Mr. Examiner, I want to join Mr. Thomas, if Mr. Coulter is being called now he is a witness of the M&StL.

[fol. 967] Exam. Albus: For a specific purpose.

Mr. Wheeler: An adverse witness.

Mr. Lucas: No, sir, he is not an adverse witness, not in our opinion. He is being called now by subpoena or otherwise, I don't know which, by the M&StL, and we will reserve the right to cross-examine him as a witness of your company.

Exam. Albus: All right, you will have that right. Let's get started so you can find out what he is.

By Mr. Wheeler:

Q. Will you please give a brief statement of your railroad experience, Mr. Coulter?

A. Well, I started with the main Central back in 1925, went to St. Louis, and was employed as a clerk with the St. Louis-San Francisco Company. I stayed there for a little over 20 years. I was chief traffic officer when I left in 1947, vice-president of the Frisco Company Transportation Company, and truck line, vice-president of the Frisco Lines of Texas, and came over as president of the TP&W May 1, 1947.

Q. Mr. Coulter, you have been in the later years in your experience in railroading been concerned to a large extent with traffic matters and traffic solicitation?

A. Yes.

Q. And you have been so concerned as president of the TP&W, have you not?

A. What with building up a railroad and rebuilding one, yes.

Q. You are thoroughly familiar with the TP&W's growth [fol. 968] and history of its traffic?

A. Yes.

Q. Mr. Coulter, of the five railroads, principal railroads involved in this proceeding, that is to say, Santa Fe, Penn-

sylvania, M&StL, Nickel Plate, and the Rock Island, taking into account all competing gateways and other considerations which affect your determinings, which railroad is most competitive with the TP&W?

A. Mr. Wheeler, that is a very difficult chore. I have some ideas and I will explore them.

Q. If you will.

A. If I may go in some detail about these junctions, gateways, and so forth.

I also would like to say that two or three years ago I did say to Mr. Heineman that I catalogued these connections with a degree of competition, and I will stick to that and explain it.

Q. Mr. Coulter, I wonder if you could state, list, the competition in the order that you find it and then make your explanation so that it will be clearer on the record?

A. Well, it seems to me that the Nickel Plate and Rock Island are probably our stiffest competition of the railroads involved in this case, and then I would take the Pennsylvania Railroad, and then to a limited degree the Santa Fe and M&StL.

Q. All right, Mr. Coulter, now, if you will make your explanation.

[fol. 969] A. The Nickel Plate, or rather the Rock Island, are in competition with us because they have a line through St. Louis, to St. Louis from Kansas City, they are in competition with us at Peoria as against our line from Keokuk to Peoria, and they are also getting into the Chicago gateway.

The Nickel Plate has a line from the East into St. Louis in competition with this gateway, and they have a line in Chicago, and they have a very competitive line of the TP&W as affecting the eastern part of our railroad.

The Pennsylvania has a line to St. Louis, has line into Chicago, and it has been testified here they are seeking their long haul to St. Louis, and have up to the application, I think, preferred Chicago to Effner.

The Santa Fe, and by the way the Santa Fe which I think has been the most helpful to the TP&W throughout the years of any railroad, has given us just passive resistance

to the Lomax gateway, but they do have a line into Chicago and they have actively solicited their long haul into Chicago. The M&StL is in competition with the TP&W through Nemo and the Santa Fe as against our connection at Lomax, and they are also in competition with us on some business which we have been handling with the Burlington through Kookuk as against their line into Peoria, of which we would not share at all.

That about explains it.

Q. Has not your competition or the competition of the [fol. 970] M&StL via the Nemo gateway decreased in recent years?

A. Well, I don't want to say that we have done so much better than the M&StL through Lomax than they have through Nemo, although I am aware that they are not guaranteeing perishable schedules, and I think I know that our interchange with the Santa Fe at Lomax is considerably greater than there is at Nemo.

Q. So that of the five railroads that you have mentioned, the M&StL would be the least competitive with the TP&W, is that not correct?

A. Well, it would be pretty close to the Santa Fe. It is a very hard thing to say.

Q. Mr. Coulter, did you have one or more, did you not have one or more discussions with Mr. Symes, the president of the Pennsylvania, about the M&StL acquiring the TP&W, and I am limiting the time now to the fall of, summer or fall of 1954?

A. Yes, I did.

Q. Approximately when was that, when were those conversations?

A. I don't recall, Mr. Wheeler. I remember the year. I think there were probably several running conversations going on throughout that year with Mr. Symes.

Q. Will you state what Mr. Symes said to you with respect to that application, or that proposition?

A. In connection with the M&StL and TP&W?

Q. Yes, sir.

[fol. 971] A. Well, Mr. Symes, as I recall, was always, at that time, favorable in the line a merger or acquisition

of the TP&W by the M&StL or vice versa. He said at that time that he had held that view for a good many years.

Mr. Wheeler: I have no further questions.
Exam. Albus: Cross examination, please.
Mr. Thomas.

[fol. 972] Cross examination.

By Mr. Thomas:

Q. You indicated in answer to a question just now, Mr. Coulter, your discussions with Mr. Symes about the relationship of the T. P. & W. and the M. & St. L. How do you feel about that now?

Mr. Wheeler: Mr. Examiner, I submit this is beyond the scope of the direct examination.

Exam. Albus: If the witness desires to answer, he may do so.

Do you have any reason for not answering that, Mr. Coulter?

The Witness: No, I have no reason for not answering anything.

Exam. Albus: Proceed.

A. In 1954 I shared that view but I do not share it now.

By Mr. Thomas:

Q. Why?

A. From the application of the Santa Fe and the Pennsylvania that home would be a better home for the T. P. & W. than any place I know.

Q. How would it help the T. P. & W.?

Mr. Wheeler: Mr. Examiner, I certainly object to this. This is way beyond the scope of the direct examination, and I think if he is going out into this area, that he should call Mr. Coulter as his own witness.

Mr. Thomas: It seems to me Mr. Wheeler wants to bring this issue into the record. I have a right to develop it.

[fol. 973] Exam. Albus: My only concern is how much leeway you are going to get on these two points that Mr.

Wheeler brought up on direct examination, namely, competition and this deal of the M. & St. L. to take over the T. P. & W. That is the limit of the scope of the direct.

Mr. Wheeler: It was even more limited than that, if I may refresh your recollection, sir. The testimony with respect to the acquisition of the T. P. & W. by the M. & St. L. was limited to Mr. Symes' statement.

Exam. Albus: That is correct. I do remember that now. But I am going to permit him to answer this one more question.

You may proceed, Mr. Coulter.

A. What is the question?

(Question read.)

A. The acquisition by the Santa Fe and the Pennsylvania of the T. P. & W. would give to the T. P. & W. a reservoir of traffic which it hasn't today, and because of the testimony of Mr. Gurley and Mr. Duffy of the Santa Fe that Lomax would be put on the same basis as Chicago, and that the testimony of Mr. Symes and Mr. Carpi that Chicago and Effner would be put on the same basis, a parity of junction points.

By Mr. Thomas:

Q. Would that help the T. P. & W. in competition with the St. Louis Gateway?

A. Very much so.

[fol. 974] Q. What effect do you think it would have on other railroads?

Mr. Wheeler: Mr. Examiner, really—

Exam. Albus: I sustain the objection there.

Do you mean other than the ones in this case?

Mr. Thomas: I will limit it to the ones in this case.

Mr. Cassell: I will object to that, too.

Mr. Wheeler: Mr. Examiner, I still submit this goes way beyond the scope of the direct.

Exam. Albus: All right, objection sustained, with the understanding that he can call Mr. Coulter as his own witness.

Mr. Wheeler: Yes, sir.

By Mr. Thomas:

Q. Mr. Coulter, you were asked to rate these various railroads from the standpoint of their competition with the T. P. & W., and you mentioned particularly their geographical locations. Are there other measures that affect your opinion as to what road is more competitive than another road?

A. Yes. I think that the availability of traffic to a road such as the T. P. & W. is a very important factor and will be a very important factor to the future success or even the maintenance of the T. P. & W.

Q. Is there—I am speaking generally now—anything between the relations of one road and another that give you an indication as to their competitive relationship or their lack of competition, so to speak?

Mr. Wheeler: May I have that question read?

[fol. 975] (Question read.)

Mr. Thomas: Let me rephrase that, will you, please?

Exam. Albus: Restate it, please.

By Mr. Thomas:

Q. In determining whether or not one road is competitive with another or the extent of that competition, is the relationship between the managements of the two roads and their cooperation a factor to be taken into consideration?

A. Yes.

Q. Would you discuss that factor with respect to the Nickel Plate and the T. P. & W., for example? Have they worked with you in coordinating schedules?

A. The Nickel Plate has worked with us in coordinating schedules.

Q. Have they cooperated with you in all other ways? Have there been exceptions?

A. Yes, there was an exception on our industrial property in east Peoria. We approached the Nickel Plate in 1952 to join with us in joint service to land owned by the T. P. & W. in east Peoria, and they turned us down, I think, three times. And we went out and bought a right-of-way to get to this property, at a considerable amount of money,

and then we developed a contact with an industry which we hoped to locate over there, and the name which should be confidential for the time being, but the Nickel Plate knows who they are, and then they agreed to come in on the basis that we suggested in 1952. Well, having kindness in our souls or something like that we said we'd stick by [fol. 976] our 1952 arrangement and they are coming in.

Q. How about the Rock Island, have they cooperated with you in the arrangement of schedules to improve service?

A. Our files show that since 1930 we have been trying to get a daily morning service into and out of Keokuk, and through the thirties there was some indefinite arrangements made along that line and very spasmodic and not appealing to the shippers.

And then in 1948 we were, "we", the T. P. & W., were able to attract some packinghouse products through Keokuk from Missouri River cities and interior Iowa points, and those packinghouse products, traffic rather, demanded a morning service into and out of Keokuk, and the arrangement was for us and the Rock Island to get that traffic once every six weeks, and since that time the Rock Island has a service in and out of Keokuk, in every morning, once every six weeks. Meanwhile our representatives in the west coast have been writing us and we have been trying to convince the Rock Island that they should have a daily morning service into and out of Keokuk for their own benefit and ours. We would like to see them have more competition through Keokuk as against the Santa Fe at Lomax.

Q. How is the Rock Island in working out schedules with you connecting at Peoria as compared to Keokuk?

A. Well, I don't think there is any question but what they prefer Peoria on their traffic and they have worked with us on some schedules out of south St. Paul.

[fol. 977] Q. Via Peoria?

A. Via Peoria.

Q. When traffic comes on the Rock Island and the bill of lading—

Mr. Cassell: Mr. Examiner, I think that we are getting into a very difficult place here. It is apparent that the Santa Fe is making its case in chief and has been for the

several last minutes past. Now, this thing is either going to have to be all thrown open. It is certainly apparent that we are going to have to respond to the questions that are being asked and it looks like to me this is just Santa Fe in chief and has been for some time. I think it has gone way beyond the bounds of propriety, and I certainly object to it going any further.

Mr. Wheeler: Mr. Examiner, we certainly join in that objection. This is going way beyond the scope of the questions that we asked Mr. Coulter.

Mr. Thomas: Mr. Examiner, the question of competition and the relative competitive characteristics of different roads involves all factors that could be considered as bearing on competition. Mr. Wheeler opened it up by asking questions, and I am simply developing some of the factors that are involved in such an opinion.

Exam. Albus: All right, ask your question.

Mr. Thomas: That question was interrupted.

Exam. Albus: I know it. That is what I am waiting for.

By Mr. Thomas:

Q. When traffic is routed over the Rock Island with the [fol. 978] T. P. & W. as the next connecting line, well, for an example, Rock Island, T. P. & W., Pennsylvania, and the junctions are not named in the bill of lading, where does the Rock Island deliver the traffic to the T. P. & W.—

Mr. Cassell: Mr. Examiner—

By Mr. Thomas (continuing):

Q. —at Keokuk or Peoria?

Exam. Albus: Your objection is sustained.

By Mr. Thomas:

Q. Going back to the questions relating to cooperation between railroads in working out schedules, what kind of cooperation have you had from the Santa Fe?

Mr. Cassell: I object to this whole line of questioning. It is nothing more than the case in chief. If the Santa Fe wishes to call the man as its witness, that's its privilege.

Exam. Albus: I am going to permit him to answer that one. He has answered as to Rock Island and Nickel Plate.

Mr. Cassell: I wasn't very happy about it either.

Exam. Albus: I know, I wasn't either, I want it distinctly understood—

Mr. Thomas (interrupting): Mr. Examiner, if there is any feeling about this, I will be glad to withdraw the question.

Exam. Albus: No, there is no feeling. Let the witness answer.

Mr. Coulter.

A. We have had very good coopefation from the Santa Fe on schedules.

[fol. 979] By Mr. Thomas:

Q. Is that true of the Pennsylvania?

A. Yes, sir.

Q. Have you ever been approached by any railroad of its own volition to work out the improvement of schedules? I mean where you haven't had to make the first approach.

A. You mean the railroads represented here?

Q. Yes, that is what we are talking about.

A. I think the reference of meat of packinghouse products from St. Paul was a joint Rock Island-T. P. & W. through Peoria.

Exam. Albus: Did these matters enter into your arrangement with competition of the T. P. & W. as you stated here today?

The Witness: I don't get that, Mr. Examiner.

Exam. Albus: I say these matters you are discussing now.

The Witness: Yes.

Exam. Albus: That entered into determining competition as you solicited it?

The Witness: Yes.

Mr. Broker: I just want to make it clear that there are other railroads involved in this case such as the Burlington and Wabash, you haven't classified them, but I will come to that.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Let the record show that at this time we will take an [fol. 980] adjournment until tomorrow morning at 9 o'clock.

(Whereupon, at 5 p.m., an adjournment was taken until 9 o'clock a.m., Wednesday, February 8, 1956.)

[fol. 980-A]

BEFORE THE INTERSTATE COMMERCE COMMISSION

Finance Docket No. 18991

Finance Docket No. 19086

[Title omitted]

Main Ballroom,
Pere Marquette Hotel,
Peoria, Illinois.

TRANSCRIPT OF HEARING—February 8, 1956

Met, pursuant to adjournment, at 9:00 a.m.

Before: Paul C. Albus, Examiner.

APPEARANCES:

(As heretofore noted.)

[fol. 982] PROCEEDINGS

Exam. Albus: The hearing will please come to order.

At the adjournment of this case yesterday afternoon controversy arose concerning the status of Mr. Coulter as a witness. Mr. Wheeler contended that Mr. Coulter was being presented as an adverse party and that he, Mr. Wheeler, was calling him in that capacity. Mr. Thomas and Mr. Broker challenged the position taken by Mr. Wheeler. Mr. Lucas joined with Mr. Thomas and Mr. Broker in the controversy of Mr. Coulter's status as a witness.

Mr. Coulter on direct examination by Mr. Wheeler testified with respect to two specific matters: First, concerning the competitive situation existing between the TP&W, on

the one hand, and the five principal railroads herein involved, namely, the Santa Fe, the Pennsylvania, the M&StL, the Nickel Plate, and Rock Island, on the other; and secondly, concerning conversations had sometime ago between Mr. Symes and Mr. Coulter in which Mr. Symes expressed the opinion held for a good number of years that the TP&W should be merged or acquired by the Minneapolis and St. Louis or vice versa.

The Examiner being concerned over this controversy accorded the matter considerable thought last night and again this morning. I have had the benefit of inspecting the dockets and a copy of yesterday's transcript. It is the considered opinion of the Examiner and the ruling of the [fol. 983] Examiner at that time that Mr. Coulter presently is on the stand as a witness for the M&StL, that the cross-examination must be confined to the two topics specifically covered on direct, and that thereafter Mr. Coulter will be excused and may be called as a witness for and on behalf of any party to these proceedings.

Counsel individually and collectively have an exception to this ruling.

Are there any questions?

(No response.)

Exam. Albus: We will continue with the cross-examination of Mr. Coulter.

Mr. Thomas.

Mr. Thomas: I have no further questions.

Exam. Albus: Mr. Lucas.

J. C. COULTER resumed the stand and testified further as follows:

Cross examination:

By Mr. Lucas:

Q. Mr. Coulter, it was stated yesterday on the record by Mr. Thomas that the TP&W had not intervened in this proceeding. Can you confirm that as president of the company?

A. Yes.

Q. Did you as an individual file any kind of a petition of intervention?

A. No, sir.

Q. Were you subpoenaed by the M&StL?

[fol. 984] A. No, sir.

Q. When did you first get the request?

A. About three or four days ago.

Q. At that time were you advised that you were being called as an adverse witness?

A. Yes.

Mr. Lucas: That is all.

[fol. 985] Exam. Albus: Mr. Cassell.

Cross examination.

By Mr. Cassell:

Q. Mr. Coulter, isn't it customary among the railroads that the receiving lines set the cutoff time for deliveries?

A. I think that would be true.

Q. And it is true in interchange between the Rock Island and the TP&W—

Exam. Albus (interrupting): Are these questions addressed on a competitive angle of the direct testimony?

Mr. Cassell: Yes, sir.

The Witness: Will you repeat that question, please.

(The last question was read.)

By Mr. Cassell:

Q. Who sets the cutoff time between the Rock Island and the TP&W on the delivering or the receiving carrier?

A. The receiving carrier.

Q. Who sets the cutoff time at Lomax?

A. The Santa Fe.

Q. On both deliveries and receipts?

A. Yes.

Q. You spoke about the Rock Island service into Keokuk and the meat train; that meat train runs once every six weeks, doesn't it?

A. Yes.

Q. That is a special train, isn't it, on behalf of the Rock [fol. 986] Island?

A. I don't know.

Q. You don't know?

A. No.

Q. It is a special train on behalf of the TP&W, isn't it?

A. No.

Q. Isn't it an extra?

A. No, sir.

Q. Not a regular-scheduled train?

A. Regular-scheduled train.

Q. On only those days?

A. We have a train out of there every day, every morning.

Q. Isn't the meat train only once every six weeks?

A. Yes.

Q. Isn't that the only time that train runs?

A. Your train, yes.

Q. How about your train that picks up from the meat train?

A. Every day twice a day.

Q. Then you do know that the train on the Rock Island is run only once every six weeks when we have the meat?

A. That is right.

Q. Do you know how many cars are in that train?

A. Well, the train would run every day and, of course, on Thursdays and Fridays the length of the train or the number of cars in the train would be much heavier than on [fol. 987] Monday and Tuesday.

Q. I am speaking about the train that runs once every six weeks.

A. Your train?

Q. Yes, sir.

A. I know nothing about that.

Q. Do you know how many cars are in the normal train?

A. No, sir.

Q. Do you know whether or not the Santa Fé runs any extras to connect with you at Lomax?

A. They do.

Q. How many?

A. I don't know. Depending upon the flow of traffic. They return a turnaround occasionally from Shopton, down from Fort Madison down to Lomax and back.

Q. How often?

A. I couldn't tell you how often accurately at this time.

Q. Hasn't the Rock Island indicated to you that that train which runs once every six weeks would be put on a regular basis if there were sufficient volume to justify it?

A. Yes.

Q. Then, you don't mean to say it was a straight refusal, then, to consider another train, do you?

A. Well, Mr. Cassell, may I elaborate on that a little bit?

Q. Yes.

A. With transportation people on railroads, when you [fol. 988] want to put on a new service, transportation people say, "Get the business and we will put the train on." Those of us who are on the selling end, who try to get business, say, we have a backlog here or a certain amount of traffic that can go on that train and then we will build it up from there, and I think that is where the difference of opinion is between the Rock Island and the TP&W, there is a backlog to move.

Q. How many cars?

A. We made a study of it. I haven't that here with me, but they convinced us that it would be a paying proposition.

Q. It was a difference of opinion, then, as to how many cars might be available?

A. Yes.

Q. If the Rock Island gives you freight at Keokuk, you get your longest haul and greatest division either to or from the East, isn't that right?

A. That is correct.

Q. From what territories is the Rock Island competitive with the TP&W?

A. Well, I think from all of the territory you tap your competitor with the TP&W.

Q. Twin Cities, Pacific Northwest?

A. Yes.

Q. Chicago?

A. Yes.

[fol. 989] Q. How are we competitive with you on Chicago traffic?

A. We have a line that circumvents Chicago, useless for your long haul for Chicago.

Q. I am not speaking now about the gateways, Mr. Coulter, I am talking about where traffic originates rather than gateways. Certainly we are not competitive with you on traffic originating in Chicago, are we?

A. Yes.

Q. How would you originate traffic in Chicago?

A. We wouldn't originate with you, we would originate with another line which would be competitive with you.

Q. I see. Where would that other line turn it over to you?

A. Well, the Wabash would turn it over to us at Forest, the C N&I would turn it over to us at Watseka. The Illinois Central could turn it over to us at Gilman and you could turn it over to us at Peoria.

[fol. 990] Q. Are all of those other lines in competition with you, too, then?

A. Yes.

Q. Any line that touches Chicago and brings freight to you somewhere along your line east and west through Illinois is in competition with you, then, isn't it?

A. Pretty nearly.

Q. Just the same as the Rock Island, isn't it?

A. There is a variance there between, I would say, the C. N. N. & I. and the Rock Island.

Q. As a matter of fact, Mr. Coulter, don't you have in mind as points of origin that are competitive with you or that the Rock Island might have of the traffic to the southwest, California points?

A. Would you restate that, please, I didn't get it.

Q. Isn't it a matter of fact that the traffic that the Rock Island might get in which it would be competitive with you would be the California and southwestern points?

A. Yes.

Q. Because it might take its long haul to Chicago rather than turning it over to the T. P. & W.?

A. Or St. Louis.

Q. Or St. Louis?

A. Or Peoria.

Q. Or peoria. But if it turned it over to you at Lomax, [fol. 991] would that be competitive?

A. You mean Keokuk, don't you?

Q. I beg your pardon, yes. Keokuk.

A. It wouldn't be competitive with us then. By that I mean we'd get our long haul, yes.

Q. That is right, it would give you the greatest revenue and the longest haul possible on your railroad?

A. That is correct, coming eastbound.

Q. That is right, or traffic off your railroad westbound similarly, isn't that so?

A. That is true.

Q. Would also give you your long east haul and greatest revenue?

A. Yes.

Q. Greater than that town of Lomax, is that right?

A. I would say by and large the revenue through Keokuk was higher or more to us than through Lomax.

Mr. Lucas: May I ask, Mr. Examiner, or is that gross—

A. (Interrupting) I meant divisions.

By Mr. Cassell:

Q. You also have a nice bridge arrangement, too, don't you, Mr. Coulter?

A. We have an arrangement like all railroads have with bridges.

[fol. 992] Q. How many schedules does the Santa Fe have through Lomax westbound, one, with interchanges with you?

A. I wouldn't begin to tell you—I wouldn't know. I think several. They are going through there all hours of the day and night and stopping up our traffic.

Q. Well, don't you know, Mr. Coulter, that they now only have one train which effects connection with you on a regular basis?

A. They have that one train—we call that our connection, but they have this turnaround coming down from Shopton to Lomax that may make several turns a day.

Q. Didn't they formerly have two prior to five years ago?

A. Two trains?

Q. Yes, sir.

A. So scheduled, yes.

Q. And weren't they the ones that broke that connection?

A. Broke the connection?

Q. Yes, sir.

A. With the TP&W?

Q. Yes, sir.

A. Not to my knowledge.

Q. Didn't they take off the train?

A. Not to my knowledge.

Q. We've only got one scheduled connection today, and you said you formerly had two?

[fol. 993] A. I say we have more than two now. We have several connections which are not listed in the time card.

Q. Those are their main line trains that are just going through there, aren't they, anyway?

A. No, they have this turnaround I am talking about coming down from Shopton to Lomax, which comes down, I think, several times.

Mr. Cassell: That is all.

Exam. Albus: Mr. Broker.

Cross examination.

Mr. Broker: I would just like to correct one thing, Mr. Examiner. In making a ruling I believe you meant to refer to Mr. Cassell, but the record will speak for itself.

Exam. Albus: Very well. It is possible. That has happened before.

Mr. Broker: Does your ruling preclude me from asking questions about the Wabash? It is a party in this case.

Exam. Albus: The ruling precludes you from asking about anything that was not in that schedule of competitive situations, and the Wabash is not in there, you cannot ask about the Wabash. That is beyond the scope of the direct. That's the ruling.

Mr. Broker: I will take an exception to that, if I may.

Exam. Albus: Yes, sir, absolutely. Everybody has exceptions to these rulings. I tried to make that clear.

[fol. 994] By Mr. Broker:

Q. Now, in your gradation of the five lines, each of the five lines in that gradation are to some extent competitive with you, aren't they?

A. Correct.

Q. And to the extent that you work with one, let's say the Nickel Plate, you compete against the other, don't you, let's say the Pennsylvania?

A. Yes.

Q. And you have through routes with each, don't you?

A. Yes.

Q. A complete line of through routes?

A. Yes.

Q And those routes are not only competitive on paper but they are competitive as service routes, aren't they?

A. Yes.

Q. Now, have you regarded the Pennsylvania as a strong competitor via Chicago?

A. Yes.

Q. And via St. Louis?

A. Yes.

Q. And you heard the Pennsylvania testify it would still favor St. Louis?

A. Yes.

[fol. 995] Q. So that it will still remain a strong competition via St. Louis?

A. Just via St. Louis.

Q. Don't you feel that this so-called placing of Effner on an equality with Chicago would still keep Chicago as a competitive route?

A. I wouldn't regard—let's see now. I wouldn't regard it so. I think we will take our chances on getting the business. If they put Effner on the same basis with Chicago, we will be very happy.

Q. In other words, if a connection puts its gateways on a parity, then those other gateways are no longer competitive?

A. No, they would be less competitive, Mr. Broker, because the soliciting people would note that the policy of that particular railroad was that they wouldn't interfere.

Q. They would be competitive, though, to some extent, wouldn't they?

A. Very little.

Q. Yesterday you said that the reason why the Nickel Plate was competitive was because it served Chicago and St. Louis as well as Peoria, didn't you?

A. Yes.

Q. And has the Nickel Plate always observed neutrality among its gateways?

A. I don't know.

[fol. 996] Q. Well, if you don't know, how, then, can you say that we are highly competitive by reason of that fact?

A. I suspect that you are highly competitive because you have a line into St. Louis, and it has been the policy of every railroad I know of to solicit for their long haul where they have a service out and you have a service route out of St. Louis.

Q. And we have a service route out of Chicago?

A. Yes.

Q. And out of Peoria, don't we?

A. Yes.

Q. And they are all on a parity? Do you or don't you know that?

A. I don't know that.

Q. But assuming they are on a parity in so far as Nickel Plate solicitation and service is concerned, would you then say that they are only partially, partially competitive with you?

A. I would say they are partially competitive, if you make the statement that all of the Nickel Plate Gateways announced here are on a parity, I would say they would be less competitive to the T. P. & W. than if you said that the St. Louis Gateway, that you are soliciting preferably for the St. Louis Gateway.

Q. We would then not be in any different position, would we, assuming that fact, than the Pennsylvania is in respect to both Chicago and Peoria, assuming it is successful in this case?

A. You would be more competitive than the Pennsylvania.

[fol. 997] Q. Why?

A. Because you have a line into Peoria which is competitive with the T. P. & W., the Pennsylvania-Effner route. You have a line into Chicago that is competitive and you have a line into St. Louis that is competitive while the Pennsylvania would just have two routes, they would have their route with us into Peoria, which would be on a parity with Chicago and St. Louis.

Q. You don't consider the Pennsylvania line into Peoria properly competitive with you?

A. No, sir.

Q. Even though they handled more local traffic out of Peoria over that line than they do via Effner?

A. I am not aware of that.

Q. Let's assume that they handle approximately the same amount of local traffic out of Peoria via their own line than via Effner, would you then say they are competitive?

A. To that degree, yes.

Q. Now, was your evaluation of the competitive relationships based on the volume of traffic which each railroad handled via the competing gateway?

Mr. Wheeler: May I have that question read?

(Question read.)

A. That was part of it.

By Mr. Broker:

Q. Do you know whether or not the Pennsylvania Railroad handles more traffic via Chicago and St. Louis than [fol. 998] via the T. P. & W.-Effner?

A. I would think they would.

Q. More than any other carrier, do you know?

A. No, I wouldn't know that.

Q. More than the Nickel Plate?

A. I wouldn't know that.

Q. Let's get back to this Pennsylvania direct line into Peoria. Is the primary reason why you say that is not competitive because of the physical disabilities of that line?

A. Yes, and the absence of through service. I think, Mr. Broker, if you will pardon me, as we know, our relationship with your line and our relationship with the Pennsylvania that the bulk of the traffic would be overhead traffic, not local at Peoria but through Peoria.

Q. I am aware of that, yes, sir.

A. Thank you.

Q. I think we can agree on that. But never the less competition may arise in the handling of local traffic, may it not?

A. It may, but when the president of the Pennsylvania testifies that we are 300 miles farther east than that line is of theirs for the same traffic, I don't know why a shipper would use that line into a place like, say, New York City.

Q. Time, is that the only element in competition?

A. I think it is a very important thing.

Q. I agree that it is important.

[fol. 999] A. You know that from your own railroad.

Q. Yes, sir. Do you know whether or not most of that disability isn't due to the Pennsylvania's only policies in respect of maintenance of that line?

A. No, I don't. I haven't been over the line, but my limited knowledge tells me that it is not a very good railroad.

[fol. 1000] Q. Now, in discussing this let's just limit ourselves to the five railroads that you referred to, to the extent each one of them, let's say, each western line—

Mr. Broker: I am afraid that question will go beyond the scope of your ruling, so I will withdraw it.

Exam. Albus: Don't ask it, then, please.

By Mr. Broker:

Q. Now, when you listed the Pennsylvania in that gradation, were you thinking of it as an individual or as a system?

A. I don't know what you mean, Mr. Broker. What is the difference?

Q. Were you thinking of the Pennsylvania as an individual corporation or as a family of corporations?

A. I see what you mean. As an individual railroad.

Q. You then did not take into consideration any lines in which it had any ownership?

A. No.

Q. Now, going into the question of alleged competition between the Nickel Plate and the TP&W, as to which you testified, hasn't the Nickel Plate always treated you with strict neutrality on the question of service and coordinated schedules?

A. I would say generally speaking, yes, Mr. Broker, except that I found out that you made a special deal with the M&StL last December and you didn't tell us about it.

Q. So to the extent that the M&StL and the Nickel Plate [fol. 1001] work together, they compete with the TP&W, do you feel?

A. Yes, yes.

Q. But nevertheless, haven't we always been neutral in giving you the same schedules as any other connection?

A. Yes, generally, yes, we have very good relationship.

Q. That we do, and I hope it continues. Do you know whether the Nickel Plate has treated every other western connection, let's say at Peoria, in the same way?

A. I don't know positively, but I suspect they would.

Q. I am limiting myself now to the five that we referred to.

A. Yes, I think you are neutral.

Q. Now, coming to the competitive relationships with the Santa Fe and the Pennsylvania, you indicated that they cooperated to a measure, but has it been a hundred percent, in view of their favoring Chicago or St. Louis, as the case may be?

A. No, I wouldn't say that it was one hundred per cent.

Q. In its competitive relationships with you, hasn't the Pennsylvania always favored its long haul over its own railroad, as opposed to your participation in the movement?

A. Yes, as is true with every other railroad that I know of.

Mr. Broker: Coming back to your ruling, Mr. Examiner, there was some testimony yesterday on industrial development. Is that excluded from the scope of this questioning? If it is, we will bring it out on our own direct case.

Exam. Albus: I would rather you would do it that way, [fol. 1002] Mr. Broker, if you will, please.

Mr. Broker: That is all. Thank you.

Exam. Albus: Are there any further questions?

Mr. Wheeler?

Redirect examination.

By Mr. Wheeler:

Q. Mr. Coulter, didn't you hold the view that the M&StL acquisition of the TP&W was the most preferable, at least up until May 26, 1955?

A. Can I answer it and then elaborate a little bit?

Q. Yes, sir.

A. The answer is yes. But the discussions you must refer to are academic up to that point, because the TP&W was not for sale, and also that there wasn't anybody else who seemed to be interested.

Q. Mr. Coulter, aren't you aware or weren't you aware that the trustees of the estate had approached Mr. Gurley and Mr. Symes and had had discussions with Mr. Heineman regarding the sale of the stock of the—

Exam. Albus (interrupting): That is beyond the scope of the direct. You can ask anything about what Mr. Symes and he talked about, but I am not going to have the trustees or anybody else dragged in here.

Mr. Wheeler: May we go off the record for just a minute?

Exam. Albus: Yes. Off the record, please.

(Discussion off the record.)

[fol. 1003] Exam. Albus: On the record.

Are there any further questions?

Mr. Wheeler: No, I have no further questions. I may want to recall him again on this point. We will try to develop it on another point.

Mr. Thomas: Mr. Examiner, I won't prolong this too much, but I did ask a question yesterday which was overruled, but which I think has demonstrated that it is pertinent by the cross-examination of the Rock Island. The Rock Island brought out or implied in their cross-examina-

tion that there was not enough traffic to support this train through Keokuk that was mentioned.

Exam. Albus: Yes.

Mr. Thomas: They also brought out that the TP&W received its largest divisions on hauls through Keokuk where the whole line is used.

Exam. Albus: All right.

Mr. Thomas: It seems to me it is appropriate for me to ask whether the Rock Island, when junctions aren't specified, delivers to the TP&W at Peoria or Keokuk, because that bears on that issue.

Exam. Albus: All right, you may ask that question.

Recross examination.

By Mr. Thomas:

Q. Mr. Coulter, when traffic is routed over the Rock Island with the TP&W as the next connecting line, well, [fol. 1004] for example, Rock Island, TP&W and Pennsylvania, and the junctions are not named in the bill of lading, where does the Rock Island deliver the traffic to the TP&W, at Keokuk or Peoria?

A. Peoria.

Mr. Thomas: That is all.

Exam. Albus: Are there any further questions?

Mr. Cassell: Yes, sir.

Recross examination.

By Mr. Cassell:

Q. How do you know that?

A. Experience.

Q. How often have you experienced it?

A. Every day of our lives.

Q. Do you say that there is a substantial volume of traffic that is routed via Peoria from the southwest?

A. I wouldn't say substantial, Mr. Cassell, compared to your traffic probably coming down from the northwest. I don't know. I could hardly answer that. I would suspect

that it would be less from the southwest, Rock Island, Peoria, TP&W.

Q. Do you think there is a material amount of traffic? Do you think it is more than comes through Keokuk?

A. I haven't the figures on that.

Q. Do you know just roughly?

A. About the same, I'd say.

Q. You would say they are roughly the same through Peoria as they are through Keokuk?

[fol. 1005] Q. Now, you say you experience the insertion of the Peoria instead of the Keokuk as the junction. How does that come to your attention?

A. We are a small railroad and we examine, we get down to brass tacks, we watch our waybills very closely, subject to a longer haul consistent with service, we observe those things.

Q. Do you know what the service route is for traffic from the Pacific Southwest on the Rock Island?

A. I know what it is through Keokuk.

Q. Do you know whether the service route of the Rock Island is through Keokuk or through Peoria on that traffic?

A. I think once every six weeks it would be better through Keokuk.

Q. Do you know what the difference in service, if any, is through Peoria and Keokuk every day? Not just once every six weeks.

A. I think it would be better through Keokuk.

Q. Do you know how much?

A. No. I know that you are 22 miles longer from Eldon, Iowa, to Peoria, than you are through Keokuk and the TP&W.

Q. How many miles?

A. I think it is 22.

Q. Could you be in error about that?

A. I don't think so. I get 22 miles out of that. Your arithmetic and mine do not agree.

[fol. 1006] Exam. Albus: You can straighten him out when you are putting in your direct case.

The Witness: Maybe I can straighten him out.

Exam. Albus: I hope somebody can straighten somebody out.

By Mr. Cassell:

Q. You said you didn't consider the route of the Pennsylvania into Peoria direct as a competitive route, didn't you?

A. Correct.

Q. What is the difference in the Rock Island route in mileage and time versus that of the Pennsylvania? Let's take the route direct through Keokuk or the route around through Eldon into Peoria, on the one hand, and the route through Effner to Peoria, and the route direct of the Pennsylvania. How does that, how do those, compare?

A. That is a pretty long question. I will try to answer it. I would say that the route over the Pennsylvania's own line, just, and the Rock Island would be much longer than the Pennsylvania—I am talking about service and time—it would be much longer than the Pennsylvania, Effner, TP&W, Rock Island.

[fol. 1007] Q. I guess we don't understand one another. You have said that the route of the Pennsylvania directly to Peoria is not competitive, haven't you?

A. We feel it is not competitive.

Q. Although it comes directly to Peoria?

A. Directly?

Q. Yes, it has its own line into Peoria?

A. They their own rails into Peoria. I wouldn't say they come directly to Peoria.

Q. You have said on the other hand that the Rock Island route where it has its own rails into Peoria is competitive?

A. Competitive with what?

Q. The TP&W.

A. Yes, against our line from Keokuk.

Q. But the Pennsylvania is not competitive as against your line into Effner?

A. That is correct.

Q. Now, is that because of, the Pennsylvania is not competitive because of time-in-transit is greater over their direct line versus the Effner route?

A. Yes.

Q. That is the only reason, isn't it?

A. I would think so. It is not a service route.

Q. What if there was the same difference in time of the Rock Island of the Eldon, Silvis, Bureau, Peoria route [fol. 1008] versus the Keokuk route, would that change your opinion any?

A. If the Eldon route, you mean through Peoria was not in competition with Keokuk?

Q. If the Eldon, Silvis, Bureau, Peoria route had the same difference in time in transit as against the Keokuk route as the Pennsylvania's route does versus the Effner route, would that change your opinion any?

A. This is very complicated, Mr. Cassell. If you could, please, confine your question to the west end and then we will take up the east end. I get confused when you switch over to the Pennsylvania branch line.

Q. I get confused by a lot of things here, too, like the Rock Island being competitive with you from Chicago to Peoria.

You have said that the reason why the Pennsylvania is not competitive with you in your route to Effner is because of time in transit.

A. Right.

Q. Now, if the Rock Island had the same disability on its route, Eldon, Silvis, Bureau, Peoria, which is its direct line into Peoria, as the Pennsylvania has on its direct line versus its Effner connection, and we had that same disability versus our Keokuk connection, would that change your opinion any?

Exam. Albus: If this situation was the same, of course, it would, the answer would have to be yes.

Mr. Cassell: Not necessarily. I think the witness should [fol. 1009] Exam. Albus: Of course, the way you propounded the question demonstrates that. If the same condition exists—

Mr. Cassell: I would like to have that answer from the witness.

Exam. Albus: All right.

A. Yes.

Mr. Cassell: That is all.

Exam. Albus: All right. Are there any other questions?

(No response.)

Exam. Albus: You are excused. Thank you very much.

(Witness excused.)

Mr. Thomas: I want to make a statement regarding the suggestion of the Rock Island yesterday that we accept a stipulation preventing the establishment of service on the TP&W if we should be successful in our application. Our proposal doesn't involve the establishment of any passenger service on the TP&W. We have never represented to anyone in the area served by the TP&W that we had such a plan in mind but we don't feel that we ought to accept a condition which would prevent the passenger service on the TP&W. Under our proposal the TP&W is to be operated as a separate and independent road in its own best interest, and we believe that if we should accept such a condition running on into the indefinite future it wouldn't be consistent with that interest.

Exam. Albus: Very well, thank you.

[fol. 1010] Mr. Lucas.

Mr. Lucas: Mr. Examiner, I stand on what I stated yesterday on page 965 to 966 in the record with respect to passenger service.

Exam. Albus: What about your statement with respect to Mr. Wheeler's letter? I'd like to get that cleared up before we start with the testimony.

Mr. Lucas: Off the record.

Exam. Albus: Off the record.

(Discussion off the record.)

Exam. Albus: On the record.

Mr. Lucas: Mr. Examiner, at several points throughout the past transcripts, particularly when Mr. Symes and Mr. Carpi were on the witness stand, Mr. Wheeler addressed requests for certain information, and at that time I suggested it would be better in the interest of clarity if he could put it in written form so that we could be sure just what was being asked for and that our response could be pertinent. He has very kindly done that, and the document that I have just handed up to you and distributed to counsel is his letter addressed to me of February 7, 1956.

In view of the fact that there are those earlier passages in the transcript could this be put in the record at this point as being what Mr. Wheeler is asking the Pennsylvania to supply?

[fol. 1011] Exam. Albus: Is there any objection to that?

(No response.)

Exam. Albus: It may be placed in the record.

"(1) The deposits of the Pennsylvania Railroad Company and or affiliates or subsidiaries with the Wilmington Trust Company, providing the names of the companies and the amounts of such deposits as of January 1, 1955 and January 1, 1956.

"(2) The par value of the Wabash Railroad Company stock; the Pennsylvania Railroad Company's investment in both preferred and common stock of the Wabash Railroad Company; and the present book value of Pennsylvania's investment.

"(3) State whether Mr. Lammont duPont Copeland, shown in the application of the Santa Fe-Pennsylvania to be a director of the Pennsylvania Railroad Company, is also a director of the Wilmington Trust Company, and the length of time that he has been a director of such companies.

"(4) The name or names of any persons who are officers or directors of the Pennsylvania Railroad Company and or its affiliates or subsidiaries and are also officers or directors of the Wilmington Trust Company.

"(5) The names of directors of the Wilmington Trust Company who are also directors of the E. I. DuPont De Nemours & Company.

"(6) The total number of revenue cars handled for, and the gross freight revenues derived from traffic handled for [fol. 1012] the E. I. Dupont De Nemours & Company for 1954 and 1955.

"(7) The amount of bonds of the Wabash owned by the Pennsylvania Railroad Company and or its affiliates or subsidiaries as of January 1, 1955 and January 1, 1956.

"(8) The number and location of traffic solicitation offices of the Pennsylvania Railroad Company and the number of employees in each office who spend all or a part of their time on freight solicitation.

"(9) The number of revenue cars received and delivered by the Pennsylvania Railroad Company at Chicago, Effner, and St. Louis during each of the past five years."

Mr. Lucas: Mr. Examiner, I wonder if I might, that having been incorporated in the record, I wonder if I might ask Mr. Wheeler for an offer of proof or a statement of purpose as to these two items with the exceptions of number 9, I think number 9 has relevancy in view of the testimony but as to the first eight I wonder if he would give us the benefit of a statement of position on those.

Exam. Albus: Mr. Wheeler, could you do that, very briefly, now.

Mr. Wheeler: I think most of them are self-explanatory. Mr. Lucas, is there one or two in particular? I hate to go through each one of these.

Exam. Albus: Yes, I would rather avoid that myself.

Mr. Lucas: Mr. Examiner, my inquiry goes to the first [fol. 1013] eight topics. I don't know how Mr. Wheeler wishes to handle them, if he wishes to put them collectively it is all right with me or if he wishes to say he can't do it in itemized form, whatever he wants to respond to my request will be all right.

Mr. Wheeler: Mr. Examiner, I can, but it seems to me it is unnecessary.

Exam. Albus: I don't want to prolong this record any longer than it is. I don't want a lot of explanation if—you are willing to furnish the information, aren't you?

Mr. Lucas: As to certain items, not as to one or two of them.

Mr. Wheeler: Can we boil it down to the one or two?

Mr. Lucas: You do not care to give me a statement of purpose as to the first eight items?

Mr. Wheeler: Purely for not prolonging the record.

Mr. Lucas: That is all right, with the possible exception of number 9 the position of the Pennsylvania Railroad is that they have no relevancy or any materiality as to any

issue involved in this proceeding. Subject to that reservation as to all of the information requested in the first item, the first eight items, we are prepared to co-operate with Mr. Wheeler in connection with items 1, 2, 3, 4, 7, 8, and 9.

We are not prepared to co-operate with items 5 and 6. I don't know whether the Examiner wishes to have me make [fol. 1014] any statement with respect to those, but we certainly would want a specific offer of proof on those, and if any such information is to be furnished, it not only violates particularly item 6, our legal obligations as we see them but our policy as we will to report information that might make a disclosure to competitors.

Exam. Albus: Right.

Mr. Wheeler: With respect to item 6 let me make this statement. This calls for the directors of the Wilmington Trust, and 5 calls for the directors of the DuPont Company. This is designed, of course, to show the interlocking relationship between the Pennsylvania and Wilmington Trust, the trustee here, and the Dupont Company. Now, this, of course, is information which can be obtained from the directory of directors, and I had intended to call as a witness, as the Examiner knows, Mr. Bancroft of the Wilmington Trust Company. We had concluded that if we could get this information which is public information on the record here through stipulation that it would make it unnecessary for us to bring Mr. Bancroft all the way from Wilmington. That is the reason I asked for that information, and if Mr. Lucas does not want to furnish it under that situation, why, it may be necessary for us to call Mr. Bancroft.

With respect to the Dupont Company and the total number of revenue cars handled for them, the same situation prevails there. We are endeavoring to show the relation [fol. 1015] ship between the Pennsylvania Railroad and these trustees, namely, the Wilmington Trust, and we believe that this is a significant factor. It is a matter of record already, I believe. I believe Mr. Symes indicated that he knew that one of his directors is a director of the Wilmington Trust Company, and that being Lammont duPont Copeland, obviously another member of the Dupont family of Delaware. It is to show these relationships to have a full disclosure on the record of those relationships that we

ask for this information, and we believe that the Pennsylvania should supply that information.

Exam. Albus: I am not going to require them to supply anything they will not submit voluntarily. So as far as the request goes 5 and 6 are out. Is that understood?

Mr. Wheeler: I will have to recall Mr. Carpi, then, with respect to item 6. I just wanted to let Mr. Lucas know so he wouldn't be surprised.

Mr. Lucas: Mr. Examiner, may I take an exception? Of course, if he wants Mr. Carpi back, Mr. Carpi will be back here when it is appropriate and convenient for the Examiner, Mr. Wheeler, and Mr. Carpi. I can't see any relevancy whatsoever as to the TP&W as to item 6 involving any apparent, assumed, or content co-operation between the attorney and the DuPont Company. If this record ever got into the Attorney General and I was remiss in objecting to it I think I would lose my job.

[fol. 1016] Exam. Albus: Very well, I think I have heard enough argument, let's proceed with the case. That is the ruling.

Mr. Lucas: It is perfectly satisfactory to the Pennsylvania Railroad, Mr. Examiner.

Exam. Albus: To which you may have an exception.

[fol. 1017] Mr. Wheeler: I want to call Mr. Ben W. Heineman.

Ben W. Heineman was sworn and testified as follows:

Direct examination.

Mr. Wheeler: Mr. Examiner, as a preliminary matter may we have these exhibits marked for identification?

Exam. Albus: Very well.

Let the record show that the pro forma

Mr. Wheeler: I think the maps should come in first.

Exam. Albus: All right.

Mr. Wheeler: I think perhaps that the map of the United States of which I show the routes, the lines, of the Pennsylvania, the Wabash, the Santa Fe, the T. P. & W., and the M. & St. L.—

Exam. Albus: That is the large one?

Mr. Wheeler: The large one.

Exam. Albus: It may be marked for identification as Exhibit H-19.

(Applicant's Exhibit No. H-19, Witness Heineman, was marked for identification.)

Mr. Wheeler: I should like to have marked Exhibit H-20 a smaller map, which is a blown up reproduction of the midcontinent section of the larger map H-19.

Exam. Albus: It may be marked H-20 for identification.

(Applicant's Exhibit No. H-20, witness Heineman, was marked for identification.)

[fol. 1018] Mr. Wheeler: I should like to have marked as Exhibit H-21 a map showing the lines of the Rock Island, the M. & St. L., and the T. P. & W.

Exam. Albus: That map may be marked for identification H-21.

(Applicant's Exhibit No. H-21, Witness Heineman, was marked for identification.)

Mr. Wheeler: I would like to have marked for identification as Exhibit H-22 a similar map showing the Nickel Plate-T. P. & W.-M. & St. L. lines.

Exam. Albus: That may be marked for identification as Exhibit H-22.

(Applicant's Exhibit No. H-22, Witness Heineman, was marked for identification.)

Mr. Wheeler: I should like to have marked for identification as Exhibit H-23 the booklet headed "Minneapolis & St. Louis Railway Company and Toledo, Peoria & Western Railroad Company Combined and Pro Forma Financial Data".

Exam. Albus: Very well, that may be marked for identification as Exhibit H-23.

(Applicant's Exhibit No. H-23, Witness Heineman, was marked for identification.)

Mr. Wheeler: Mr. Examiner, all of these exhibits with the exception of H-19, which has previously been off dis-

play in this hearing room, were distributed to counsel last evening.

Exam. Albus: Thank you very much.

[fol. 1019] By Mr. Wheeler:

Q. Mr. Heineman, will you please state your name and address?

A. My name is Ben W. Heineman, my address is 135 South La Salle Street, Chicago, Illinois.

Q. Mr. Heineman, have you prepared a statement for presentation to the Commission in this case?

A. I have, sir.

Q. Will you proceed to give that statement?

A. I will, sir, and if I may at one or two points I may elaborate on the written statement, if the Examiner has no objection.

Exam. Albus: Yes, that may be understood.

A. I am a member of the Board of Directors and Chairman of the Executive Committee of the Minneapolis & St. Louis Railway Company.

The M. & St. L.'s main line extends south from Minneapolis to Oskaloosa and then east and southeast from Oskaloosa to Peoria, this can easily be seen on Exhibit 19. The M. & St. L. is predominantly an east-west railroad, providing a by-pass of the Chicago area through the Peoria gateway. It does not enter any of the major east-west gateways such as Chicago, St. Louis or Kansas City.

The M. & St. L. has a direct interchange with the T. P. & W. and during the last four years interchanged with the T. P. & W. at Peoria an average of 12,995 revenue loads. This constituted an average of 5.9 per cent of the M. & St. [fol. 1020] L.'s total revenue loads and accounted for 8.1 per cent of its total freight revenues.

The interchange of the M. & St. L. with the T. P. & W. is proportionately of much greater importance to the M. & St. L., both in terms of revenue loads and revenue dollars, than is the interchange with the T. P. & W. of any other carrier interested in acquiring the T. P. & W.

The M. & St. L. is essentially a freight hauler in that 96 per cent of its total operating revenues consists of freight operating revenues, with 2.5 per cent being passenger revenues and 1.5 per cent being miscellaneous railway revenues. The M. & St. L. is in excellent financial and physical condition both from the standpoint of its roadway and from the standpoint of its equipment. The M. & St. L. is perhaps the only Class I railway in the United States with no preferred stock and no bonds (other than a small first mortgage upon its general office building). By any formula, the M. & St. L. is a heavy ownership property, owning 3,644 cars as of December 31, 1955, and operating under a long-term lease approximately 250 refrigerator cars and an additional 20 so-called air slide cars.

By Mr. Thomas:

Q. How many did you say air slide cars.

A. Approximately 20. Eighteen, I believe, is the exact figure.

As of December 31, 1955—I am sorry, the average age of the entire fleet is only 10 years.

As of December 31, 1955, 2.1 per cent of the ownership of [fol. 1021] the M. & St. L. was bad order, as against an average of 4.2 per cent for the entire industry, and I might say that the 2.1 per cent is a high figure than has regularly prevailed on the M. & St. L. or has prevailed earlier this year and is due to the fact that we slowed down our rehabilitation or maintenance program on our cars in order to build some specialized work equipment. Ordinarily the bad order on the M. & St. L. is somewhere between one-half per cent and one per cent and in my opinion it will return to that within the next six months.

The heavy car ownership of the M. & St. L. is shown by the fact that for the year ended December 31, 1955, it was a per diem credit road of $318,440. This was true even though the M. & St. L. is a bridge road to the extent of 40 per cent of its total revenue loads. Other witnesses will testify in greater detail with respect to the physical condition of its roadway and of its equipment.

During the last five years, the M. & St. L. has brought down into net income approximately 8.6 per cent of its operating revenues.

As will be seen by reference to the railroad maps, the M. & St. L. operates in a highly competitive territory. It competes with such roads as the Rock Island, Burlington, Great Northern, North Western and Milwaukee, with barges on the Mississippi River and a multitude of trucking companies, and with pipe lines. Its eastern terminus, the Peoria Gateway, is in direct competition with the Chicago, [fol. 1022] St. Louis and Kansas City Gateways.

The M. & St. L. does not possess large volumes of so-called captive traffic.

It is apparent that in the face of this competition and in the light of the prior history of the M. & St. L. which is familiar to the Commission, and with respect to which other witnesses will testify, the M. & St. L. must be alert to maintain and constantly improve its financial condition if it is to survive and render efficient service to the public.

Intensified solicitation of off line traffic, accompanied by improved service, and the intensified development and location of new plants on the line, will all make important contributions. But all of these will be materially aided, and can only be accomplished in full, through the acquisition of the T. P. & W. To the contrary, the acquisition of the T. P. & W. by the Santa Fe-Pennsylvania, or indeed by any of the other interested carriers, would seriously hurt the M. & St. L., without adding any perceptible strength to these roads.

The acquisition of the T. P. & W. by the M. & St. L. is demonstrably of far greater importance to the M. & St. L. than the acquisition of the T. P. & W. would be to any of the other interested railroads.

[fol. 1022-A] In our view, the TP&W is a natural complement to the M&StL, dovetailing almost perfectly into it. The two are both complementary and so closely similar that unification of their operations could easily be done at great saving to the unified roads.

The utility of the TP&W, like the M&StL, is essentially that of a transportation route by-passing the congested areas of Chicago. It also provides an alternate route to

the St. Louis gateway. It is indeed a simple geographical extension of the M&StL.

The M&StL, for more than forty years, has solicited traffic under the insignia of 'The Peoria Gateway.' It has advertised The Peoria Gateway throughout the nation as synonymous with its own identity. Its acquisition of the TP&W would make this identification meaningful and complete.

Like the M&StL, the TP&W is essentially a freight hauler having no passenger revenues. Like the M&StL, its financial condition and physical condition are both excellent. Like the M&StL, it has no preferred stock and only a small bond issue maturing in 1967. It has considerable greater density per mile of road operated than the M&StL, with almost no branch line or secondary line track.

The M&StL is not seeking to acquire the TP&W in order to keep any other road from getting it. It is seeking it for affirmative reasons to strengthen the M&StL and TP&W jointly. The roads are limited exclusively to the Peoria [fol. 1022-B] gateway and would not be in competition with themselves by virtue of competing facilities and competing gateways such as Chicago, St. Louis and Kansas City.

I would like to comment briefly on this element of competition. The Santa Fe offered in evidence maps of the systems of the various interested roads, intending to show thereby that the M&StL was competitive with the western half of the TP&W; that the Rock Island was competitive with the western half, and that the Nickel Plate was competitive with the eastern half of the TP&W. We have prepared a number of maps which I would like to have identified showing the systems of these other roads in relation to the TP&W.

[fol. 1023] Now, the first map to which I would like to refer is Exhibit H-20, which is an inset or blown up cross-section of the large map which has been identified as H-19. Now, the important competition of the TP&W is not the incidental competition of any road with a portion of the TP&W, although even as to that—as will appear—the M&StL is less competitive with the TP&W than the Nickel Plate or Rock Island. The real competition with the TP&W is the competition of other major east-west rate-

ways with the Peoria gateway. Of all the interested carriers, only the M&StL does not enter any major east-west gateway other than Peoria. Let us consider this question of gateways for the moment. The Santa Fe enters the Chicago gateway. The Santa Fe, through the Chicago gateway, is competitive with the TP&W in its entirety. The Santa Fe solicits for its long haul to Chicago.

Plainly, any eastbound traffic, or westbound traffic, delivered or received by the Santa Fe at Chicago, by-passes the TP&W in its entirety. Hence, the Santa Fe's competition through the Chicago gateway is competition to the TP&W in its entirety. Now, plainly no one thinks, and no one from the Santa Fe has testified, that it is going to abandon or materially change its huge facilities at Chicago for the delivery and receipt of east-west traffic.

The Pennsylvania enters both the Chicago gateway and the St. Louis gateway. Plainly, east-west traffic through [fol. 1024] those gateways by-passes the TP&W in its entirety. The Pennsylvania solicits east-west traffic through the St. Louis gateway first, through the Chicago gateway second, and then if it can't get it any other way, it would take it for Effner. This is genuine competition with the entire TP&W system.

In addition, the Pennsylvania's owned and controlled subsidiary, the Wabash, has a high-speed main line directly across the State of Illinois to Kansas City via the Hannibal Bridge, making a connection with the Santa Fe and other roads there, and in direct competition with the TP&W in its entirety.

Turning now to the map of the Rock Island system, identified as Exhibit H-21, it is apparent that the Rock Island enters both the Chicago and St. Louis gateways. The Chicago gateway, of course, in general constitutes the Rock Island's long haul, but both gateways are directly competitive with the TP&W in its entirety, in addition to which the Rock Island enters Peoria on two lines, which the exhibit shows.

Turning now to the map of the Nickel Plate, identified as Exhibit H-22, it appears that the Nickel Plate serves both the Chicago and St. Louis gateways. Each of those lines of the Nickel Plate is competitive with the TP&W in its entirety.

This competition by these four important carriers, plus the Wabash, through east-west gateways other than Peoria, is the genuine competition with the TP&W as a trancontinental route.

The M&StL is the only one of the interested carriers [fol. 1025] having access to no other east-west gateway but Peoria, is the only interested carrier that would have no interest, and no possible incentive, except to maximize the traffic through the Peoria gateway and over the TP&W.

Mr. Thomas: May I interrupt a minute there.

Mr. Examiner, in this kind of testimony, we naturally expect opinion and I haven't objected to it, but I think the next sentence here is going a little bit far in arguing the case. I want to object to it.

Exam. Albus: The objection is overruled.

You may continue, sir.

Mr. Broker: Is that the sentence starting "Conversely"?

Exam. Albus: Yes.

Mr. Thomas: May I have an exception on that?

Exam. Albus: Yes, indeed.

Mr. Thomas: To save time, there are other similar statements which will be understood I object to, which are in the nature of argument.

Exam. Albus: Yes, sir.

Mr. Thomas: Thank you.

Mr. Broker: I will object to that, insofar as it relates to the Nickel Plate.

Mr. Cassell: And I as to the Rock Island.

Exam. Albus: That will be understood.

Mr Lucas: Mr. Examiner, your exceptions run to all [fol. 1026] counsel, do they not?

Exam. Albus: That is right. Under the rules, everybody has an exception.

A. (Continuing) Conversely, these other carriers, in my opinion, are seeking to dominate—

Exam. Albus: Strike the exceptions.

A. (Continuing) —are seeking to dominate the Peoria gateway, in addition to their access to the Chicago, St. Louis and Kansas City gateway, and in my opinion, are

seeking to stifle the one opportunity of the M&StL to compete even more effectively through its only eastern terminus, the Peoria gateway.

The M&StL is no newcomer or latecomer to efforts to acquire the TP&W. This possibility has been under discussion at the M&StL for at least ten years. Actual meetings were held between Lucian Sprague, George McNear and others. It is perhaps due to personality conflicts that nothing further developed at the time. Be that as it may, I feel certain it was the M&StL's negotiations and efforts to acquire the TP&W in 1954 and 1955 that both led the trustees of the McNear Estate into selling the property and resulted in the Pennsylvania-Santa Fe's determination to acquire the property. Moreover, in my opinion, both the Pennsylvania and the Santa Fe, as will appear from my testimony, made their determination to buy the TP&W, not fundamentally for affirmative reasons to benefit the Pennsylvania and the Santa Fe, but for essentially negative [fol. 1027] reasons; that is, to prevent the M&StL from acquiring it.

The efforts of the M&StL and the story of the negotiations to acquire the TP&W are as follows:

Immediately after my election as a member of the Board of Directors and Chairman of the Executive Committee of the M&StL, I met with Mr. Guy A. Gladson, co-trustee of the Estate of George P. McNear, Jr., which estate was the owner of 82 per cent of the capital stock of the TP&W. I met him at his office. I told him that the M&StL was interested in acquiring the shares of the TP&W owned by the trustees and asked whether he would care to name a price.

He stated that there was no particular desire on the part of the trustees or the beneficiaries to sell the stock, and that while he wouldn't say the property was not for sale at a price, he doubted that there was any real interest on the part of the trustees. I offered to buy the stock of the trustees on the basis of $6,260,000 for 100 per cent, so that the trust interest, of course, would be 82 per cent of that figure. Mr. Gladson said that he would let me know.

Under date of June 14, 1954, Mr. Gladson sent me a letter rejecting this offer.

By telephone conversation and letter of June 23, 1954, I retained Judge Hugh M. Morris of Wilmington, Delaware, to represent the M&StL and to conduct such negotiations as might be necessary with the Wilmington Trust Company, [fol. 1028] a co-trustee of the Estate of George P. McNear, Jr. Under date of June 28, 1954, Judge Morris reported to me by letter that he had seen Mr. J. Sellers Bancroft of the Wilmington Trust (a Director of the TP&W), and that Mr. Bancroft told him that he would not say that the property would not be sold if an adequate price were offered.

On July 9, 1954, I met with Mr. Guy Gladson and urged him to state a price or range of prices which would be interesting to the trustees. He consistently refused to do this, although he did say that the property was for sale and that the trustees would give careful consideration to any additional offer that we would care to make. In response to my statement that we would try to work out a purchase which would be best from the standpoint of the trust's tax problems, he said that the trustees would be interested in all cash in a lump sum.

In accordance with my instructions, Judge Morris called on Joseph Chinn, Vice-President of the Wilmington Trust Company, on July 19, 1954, in an effort to find out something about the selling price. Mr. Chinn told Judge Morris that another deal was pending in which the TP&W was involved; that this did not involve the sale of the TP&W, and that the trustees felt that the negotiations for the sale of the TP&W should not be commenced before the consummation of that other deal. I was subsequently informed that the "other deal" to which Mr. Chinn referred was the effort by the TP&W to acquire the Illinois Termi- [fol. 1029] nal.

On or about September 15, 1954, Judge Morris had a further meeting with Joseph Chinn and informed me that if we were to increase our prior bid substantially, they would enter into negotiations with us. Accordingly, on September 23rd, I wrote a letter offering to buy their 82 per cent on the basis of $7,250,000 for 100 per cent of the capital stock.

On October 4, 1954, when in New York, I went in to see Mr. Henry Kelley, an attorney for the Hanover Bank—the bank was an owner of 15 per cent of the capital stock—I informed him of the offer that we had made on September 23rd to the trustees, and I informed him further that if we were successful in negotiating with the trustees, we would buy the Hanover Bank stock at the same price. On October 5, 1954, I confirmed this conversation in writing. I should add that Mr. Kelley was also a Director of the TP&W.

Under date of October 11, 1954, the trustees informed that our offer of September 23rd had been rejected.

Under date of November 12, 1954, I wrote to Harrison Leppo, representing the California heirs and beneficiaries of the Estate of George P. McNear, who owned 25 per cent of the Trust, seeking a meeting to overcome what seemed to be a deadlock in negotiations. Under date of November 15, 1954, he wrote me that I should take the matter up with Mr. Gladson.

Throughout this period, in several telephone conversa- [fol. 1030] tions with Mr. Bancroft, I had been pressing him for a meeting with the trustees to attempt to negotiate a price. Up to this point, all that had happened had been that I had made two bids, the last one being made on the basis of a statement by Mr. Chinn to Judge Morris that if we materially increased our bid, the trustees would probably sit down to discuss the matter. In late November, I had another such conversation with Mr. Bancroft. In that conversation, he advised me that the question of whether or not they would sit down would be decided promptly. He then wrote me a letter dated December 3, 1954, confirming this.

I received the above letter on December 7, 1954, and called Mr. Bancroft. In the conversation I again urged him to sit down and discuss with me the question of price. I pointed out that since cash was involved, the only question was whether we could agree on price, and that this was a matter which we could settle very quickly. He agreed and said again that the next move was theirs.

In December there was a tragedy in the McNear family. On December 27, 1954, Mr. Bancroft advised me that due

to that fact there would be an "indefinite delay" in establishing a meeting.

Thereupon, on December 28th, I wrote Mr. Bancroft a lengthy letter summarizing the negotiations to date and stating that "for a limited period of time we are prepared to buy for cash at a price higher than our last offer all of [fol. 1031] the capital stock of the TP&W" held by the trustees. The same letter was delivered to Guy A. Gladson in Chicago on December 29th.

Under date of January 7, 1955, Mr. Bancroft acknowledged receipt of my letter of December 28th and stated that [fol. 1032] he intended to let me know one way or the other by February 1st as to the meeting with the trustees which I had requested.

Under date of January 26, 1955, Mr. Bancroft wrote me that he had learned that there were others interested in acquiring the T. P. & W. stock.

Now, in my view this letter and the timing of it was of great significance, because on January 20, 1955, six days prior to the mailing to me of the letter from Mr. Bancroft, which is referred to, I, together with friends, had acquired a substantial block of Class A stock voting trust certificates of the Monon Railroad. This had become publicly known almost immediately. I think the same day.

During the fall and early winter of 1954-1955, I had been reliably informed that the Pennsylvania had no interest in acquiring the T. P. & W., and that Mr. Symes had stated that the Pennsylvania had no objections to the acquisition of the T. P. & W. by the M. & St. L. This was confirmed to me in a conversation with Mr. Symes, to which I will testify in a moment.

In February, or perhaps early March, Mr. Coulter called me and said that he had been instructed to arrange a meeting between the trustees of the estate of George P. McNear, Henry Kelley, representing the Hanover Bank, and myself. Tuesday, March 15th, was set as the date of the meeting. Mr. Coulter told me that the purpose of the meeting was to attempt to negotiate a price. On March 15th, Messrs. Kelley [fol. 1033] and Bancroft came to my office. They informed me that Mr. Gladson had taken ill in the morning and was unable to attend, and that they were not there to discuss

price but simply to talk generally. They told me that they were going to see another railroad that day. I told them that we were very much interested in acquiring the T. P. & W. and that we were satisfied that we were prepared to pay the highest price. I discussed times earnings ratios and possible ranges for discussion and gave each of them a sheet of paper showing various capitalizations of the earnings of the T. P. & W.

At the conclusion of the meeting, I was informed that I would hear from them within thirty days.

On April 18, 1955, Judge Morris called my secretary, I being out of town, and informed her that he had been told by Messrs. Chinn and Bancroft of the Wilmington Trust that "we have completed satisfactory negotiations for the sale of the T. P. & W. to another." They did not tell Judge Morris who the purchaser or purchasers were, nor did they give him any other information.

I immediately called Judge Morris and authorized him by memorandum dictated over the telephone, to inform the trustees that the M. & St. L. was then, and at all times had been, prepared to bid competitively for the common stock of the T. P. & W. held by the trustees of the McNear Estate, and that, in my opinion, the M. & St. L. was prepared to pay more than any other person.

[fol. 1034] In this connection, it is important to note that although I had repeatedly told the Wilmington Trust by letter and conversations that we were prepared to pay a substantially higher price than any we had offered, we were not given an opportunity to bid Also, at this particular point, I did not know either the terms of the proposed sale by the trustees, or actually with whom they were negotiating, except that I had begun to believe that the Pennsylvania was at least one of the purchasers.

The next morning, April 19, 1955, I called Judge Morris and dictated an additional offer over the telephone to his secretary which he then delivered in person at 1:25 p.m. on April 19th. Since I was not aware of the price that they had negotiated at that time, my offer was, first of all, to increase the purchase price they had received by 5 per cent, and, second, I authorized the trustees to show my offer to the persons with whom they were negotiating and

if they were prepared to meet or better it—my offer continued—we would be prepared to enter into competitive bidding, either privately under the auspices of the Wilmington Trust, or publicly under the supervision of any court having jurisdiction over the Trust. The same offer stated that we were prepared to offer to all other stockholders of the T. P. & W. the opportunity to sell us their stock at the same price and on the same terms and conditions as we would be agreed upon with the trustees.

Mr. Thomas: Mr. Examiner, I understand there is an [fol. 1035] exception taken but there is a somewhat different objection as to what is coming next. We are going into legal questions about the duties of trustees and Mr. Heineman's opinions as to what those duties are and I object to that as not being related to the issue before the Commission.

Exam. Albus: Very well. The objection is overruled.

Mr. Broker: Mr. Examiner, so it is clear, we haven't entered into any running objection to this on behalf—

Mr. Cassell (interrupting): Nor have we. There was an objection to the one statement made previously but there was no subsequent objection.

Exam. Albus: Very well, that will be shown on the record.

Mr. Lucas: As to the matter of negotiations I think there are several Commission reports on that regarding all the negotiations.

Mr. Broker: Could I ask a question regarding clarification? When you say we made the offer, do you mean the M. & St. L.?

The Witness: Yes, all discussions were by me for the M. & St. L. and all discussions were by the M. & St. L. through me as its agent.

Mr. Broker: Thank you.

Exam. Albus: The objection is overruled.

You may continue, Mr. Heineman.

A. At this time, I felt that the trustees were behaving in a manner wholly unfamiliar to me in the sense that they [fol. 1036] were plainly favoring others, even though this was costing their trust estate money. Accordingly, I sent copies of my offer of April 19th to all the stockholders of

the T. P. & W. and to all the beneficiaries of the estate of George P. McNear, Jr. who were known to me. My thought was that if—as it seemed to me—the trustees were being guilty of a breach of trust, the beneficiaries should perhaps assert themselves.

On April 21, 1955, I was in Washington and asked Judge Morris to arrange a meeting for me in Wilmington with Mr. Edmonds, President of the Wilmington Trust, and representatives of the trust department. Judge Morris called me back and said that Mr. Edmonds had told me that "it would not be worth his carfare", but that if I wished to come he would see me as a matter of courtesy.

I went to Wilmington on April 22, 1955, and met with Judge Morris, his partner S. S. Arsht, George Edmonds, President of the Wilmington Trust, and J. Sellers Bancroft, Vice President in the trust department. I stated to them that I felt that we had been very badly treated, and that as a matter of fact they had not even remotely obtained the maximum amount that was to be obtained for the trust. I said that, although I was not yet informed of the price, I had heard rumors that the Santa Fe and the Pennsylvania were the purchasers of 26 per cent each. I pointed out to them that this left the Trust Estate locked in with a minority interest that by any standards had a substantially [fol. 1037] lower value than the majority interest which they had sold.

I said that I had been informed that the price at which they had sold the 52 per cent was around $100 a share, and that, if that was true, they had sold at a ridiculously low price, while at the same time materially reducing the value of the 30 per cent which they retained. I said that the reason this had happened to the trust was because the trustees had followed unbusinesslike methods and procedures for reasons that I could not understand; that in my experience with corporate trust departments, they had always attempted to find out the maximum price for which they could sell the property.

I showed them a map on which I had drawn the lines of the M. & St. L., T. P. & W. and the Monon, and stated that it was fairly common knowledge that persons friendly to the M. & St. L. had taken a position in the Monon; that I

believed this had also come to the attention of the trustees, and that, in any event, it had certainly come to the attention of the Pennsylvania. I also stated that unless the trustees were interested in helping the Pennsylvania to the detriment of the beneficiaries, they would have realized that they should have tried to find out from us what we would have paid for the property.

I thereupon said that I was prepared to recommend to our Board of Directors that we buy their full 82 per cent of the capital stock of the T. P. & W. on the basis of [fol. 1038] $12,000,000 for 100 per cent. I said that if my understanding was correct, this was an increase of more than $5,000,000 in cash for the estate and an increase of approximately $33 a share, or one-third.

Mr. Edmonds said simply that they had exercised their best judgment and that the matter was closed.

On Monday, May 2, 1955, Mr. Coulter called me and said that Guy Gladson, one of the trustees, had called him that morning from Florida and that he had said he had heard of my 5 per cent offer of April 19th and wanted to know if it was true.

Mr. Thomas: May I interrupt again, Mr. Examiner?

Exam. Albus: Yes.

Mr. Thomas: I have a different objection here in order to make the record clear. This is not hearsay that is coming it is double hearsay. It is what Mr. Heineman said someone told him that someone else said. I object to that.

Exam. Albus: Very well. The objection is overruled.

A. Mr. Coulter told me that he had also informed Mr. Gladson of the offer that I had made on April 22nd of $133.33 a share, and that Mr. Gladson had said that he was shocked to hear about both of these offers because the Wilmington Trust had not informed him of either. Mr. Coulter said that Mr. Gladson had told him that if he should be speaking to me during the day, that is, if Mr. Coulter should be speaking to me during the day, he should tell me that Mr. Gladson was going to call me.

[fol. 1039] Later in the day, Guy Gladson called me from Florida and asked me to confirm the fact that I had offered to buy the 82 per cent on the basis of $12,000,000 for 100

per cent, or $133.33 per share, and again I want to make clear that when my testimony said that I had offered, that is I on behalf of the M. & St. L. I did so, and went over with him the essential details. He said that he was shocked that the Wilmington Trust had not informed him of this, and that he was asking Grier Patterson to participate as his lawyer, and asked whether I minded confirming all this by letter with a copy to Mr. Patterson. I said that I would be glad to do so, and did so under date of May 2nd.

In the meantime, because of information that had come to me and to which I have already testified—that the Pennsylvania's determination to purchase the T. P. & W. arose from the acquisition in hands friendly to the M. & St. L. of a substantial block of voting trust certificates of the Monon, John Devins, President of the M. & St. L., and I determined that we would go to Philadelphia and meet with Mr. Symes, if he would be good enough to do so.

On May 3, 1955, Mr. Devins and I met with Mr. J. M. Symes, President of the Pennsylvania Railroad, at his offices in Philadelphia. I made a contemporaneous memorandum of that conversation. Its substance was as follows

First, I told Mr. Symes that I understood that he and the [fol. 1040] Santa Fe had a deal to purchase control of the T. P. & W. His answer to that was, "Yes", he "thought" so. I said that I had always understood that the Pennsylvania had no objection to the acquisition of the T. P. & W. by the M. & St. L., and that he had said so as recently as last summer and fall. He answered that that was correct and that he had had no objection. He said that he had always regarded the M. & St. L. and the T. P. & W. merger as a natural and that on a number of occasions he had told George McNear and Lucian Sprague that they should get together with their two roads.

Second, I then asked him what accounted for the change in attitude. Mr. Symes said that in January stories of "grandiose" plans to merge the M. & St. L., T. P. & W., Monon and others, had come to his attention, and that the Pennsylvania Railroad had decided that they had better take steps to stop this "nonsense."

Third, I then asked him whether it would be possible to change this attitude on the part of the Pennsylvania if persons associated with the M. & St. L. gave up whatever interest they had in the Monon and abandoned any thoughts of merger of the three roads. I said to Mr. Symes that the M. & St. L. needed the T. P. & W. regardless of the Monon, and that, as a matter of fact, the desire to acquire the T. P. & W. was formulated long before we had ever given any thought whatsoever to the Monon. Mr. Symes said that the best permanent protection for the Pennsyl- [fol. 1041] vania Railroad was ownership of the T. P. & W.

Fourth, I then said to Mr. Symes that I understood from others that the Pennsylvania had never solicited traffic for the T. P. & W. route, and asked whether this was true. Mr. Symes said that it was true.

Exam. Albus: We will take a 10-minute recess.

[fol. 1042] Exam. Albus: The hearing will please come to order.

We will continue with the direct examination of Mr. Heineman.

Mr. Heineman, please.

The Witness: Thank you.

A. Now, if I may digress for a moment, I would like to explain precisely what has happened to our Monon investment. As I said to Mr. Symes, and as I have testified here, the TP&W is of paramount importance to the M&StL. I believed then, and I believe now, that it would have been of great value to the TP&W, to the M&StL, to Peoria, to all communities on the TP&W, and to the shipping public as well, if we had been able eventually to put the M&StL, TP&W and Monon under common ownership and to create and outer-outer belt line to the Chicago area.

Moreover, I felt then and feel now that the properties of such an ultimate consolidation could have been thoroughly threshed out in a subsequent hearing before the Commission, which would of course have been necessary before any such consolidation could have taken place. Nevertheless, because, as I say, of the paramount importance of the TP&W to the M&StL, for reasons wholly independent of the Monon, on or about December 7, 1955, I and all per-

sons associated with the M&StL management sold all of our holdings in the Monon. In order to make the record crystal clear, I would like to state that we sold those holdings for cash, at arm's length, to strangers, and that we [fol. 1043] have no direct or indirect financial interest in or control over the shares that we sold, or any shares of any kind in the Monon.

I would now like to return to negotiations with reference to the acquisition of the TP&W.

On May 5, 1955, I called Harrison Leppo, representing about 25 per cent of the beneficial interest in the McNear Trust. I told him of my offer of April 22 of $133 a share. We talked for about an hour and he expressed great interest in the offer. He said that if, however, a firm deal had been made with the Pennsylvania and the Santa Fe on April 15 by the trustees, probably nothing could be done about it. I told him that my understanding was that there was no firm deal. Quite the contrary. He said that he would see what he could do.

Thereupon, on May 5, 1955, I sent a formal written offer to the trustees, offering to buy their stock on the $12,000,000-basis for 100 per cent and offering to make that offer available to all other shareholders. I sent copies of that offer to all other stockholders of the TP&W and all the beneficiaries of the McNear Trust known to me.

On May 6, 1955, I notified the trustees by telegram and by confirming letter that I was prepared to submit the offer of May 5 to our directors and stockholders at a meeting to be held on Tuesday, May 10, upon advice from the trustees that, if approved, the offer would be accepted, [fol. 1044] otherwise I would adjourn the stockholders' meeting until Friday, May 13. The offer of May 5 by its terms would have expired on May 12.

On Saturday, May 7, 1955, Guy Gladson called me at my home to tell me that he was very much disturbed at the position the Wilmington Trust was taking; that he and the Wilmington Trust were not seeing eye to eye; that he felt we were entitled to the property in view of the contributions we were making to the estate, and he asked me to write him a letter setting out the various offers and steps that I had taken. I sent him a lengthy, detailed letter dated May 7, with a copy to Mr. Grier Patterson.

On Monday, May 9, 1955, I met with Edwin C. Austin, attorney for Mrs. McNear, informed him in detail of all that had transpired, and he expressed himself as being concerned that the opportunity to sell the stock on the much more favorable basis that I had provided would be lost to the estate, and said that he would follow it up.

On May 10, 1955, I telegraphed the trustees that the board of directors of the M&StL had approved the offer of May 5, and authorized that it be submitted to shareholders at an adjourned meeting to be held on Friday, May 13.

On Thursday, May 12, I talked to Mr. Grier Patterson from Peoria. This was the day on which my offer of May 5 of $133.33 per share would expire. He said that he was shocked to learn that there had been no acknowledgment [fol. 1045] of the offer by either trustee, and that he was preparing a written acknowledgment which he was having delivered to my office; and a request for additional time. He then requested that I renew the offer. I told him at that time that this would make the M&StL an uncompensated underwriter; that we had been very badly treated, and that so far as I could see, the only purpose of requesting the additional time would be to carry out additional negotiations with the Pennsylvania and Santa Fe. He said that this was not true; that the trustees were not seeing eye to eye and that a meeting had to be arranged between them. I said that I did not feel that I could extend the offer, and the matter was left on that basis.

When I arrived at my office on the morning of May 13, I found their request for an extension.

I went to Mr. Patterson's office on May 13. He told me again that we had been badly treated, and he said that if I would extend the offer for an adequate period of time to permit the trustees to meet, that he would give me his word that he would do everything in his power as a lawyer to see that the M&StL would have the opportunity to meet anyone else's price. He went on to say that although he could speak only for Guy Gladson, that this would be Guy Gladson's position as well.

Thereupon, I returned to my office and by letter dated May 13, 1955, extended the offer of May 5 to and including May 26. Thereafter, Mr. Patterson called me on several

[fol. 1046] occasions. He told me that the trustees and their counsel were having a meeting in Chicago on Wednesday, May 25; that this was the first time they could all get together. He said that Guy Gladson would undoubtedly be in touch with me. He stated that he, Guy Gladson and Ed Austin were all satisfied that the letter of April 15 with the Santa Fe and the Pennsylvania was not a binding agreement. He repeated to me that he would do everything possible to see that the M&StL had the opportunity to meet any other offer that was made. Also, Guy Gladson telephoned me on two occasions to tell me, as he put it each time, not to be concerned, that he "would not run out on me."

On May 25, 1955, the trustees met in Chicago with counsel. On May 26, Mr. Patterson came over to my office about 11 o'clock in the morning. He told me that the trustees and their counsel had agreed that the agreement of April 15 was not binding by virtue of the terms of the McNear Trust. He said that the trustees were meeting with Mr. Symes and Mr. Gurley in Washington on Friday, May 27.

He handed me a written request dated May 25, signed by both trustees, requesting an extension of the offer of May 5 to June 11. He said again that they felt that I had made a substantial contribution to the estate and that I should have the opportunity to meet any offer. I asked him why the meeting with the Pennsylvania and the Santa Fe was being held the following day. I said that it seemed to me [fol. 1047] that we were again being asked to act as an uncompensated underwriter protecting the estate, while they were negotiating to sell it to the Pennsylvania and the Santa Fe. He said that he didn't think that this was so, but that he didn't want to say anything to cause me to make any change in my course of action. After further discussion along the same lines, I told Mr. Patterson that my reaction was not to extend the offer, but that I would consider and call him at his office.

I called him at his office a half an hour or so later and told him that the offer would expire in accordance with its terms at 5 o'clock.

At a quarter to 5, Mr. Patterson called me and said that the trustees were letting the offer expire.

At about 10 o'clock in the evening, I was informed that the Pennsylvania-Santa Fe, at 4 p.m., had bought all of

the stock and that a contract was being drafted that night in Guy Gladson's law office in Chicago.

A day or two later, I am not clear which and my files do not disclose the date, I called Mr. Kelley of the Hanover Bank and said that the M&StL would be willing to buy, subject to immediate acceptance, the Hanover's 15 per cent at the same price as the Pennsylvania-Santa Fe were paying for the 82 per cent. Mr. Kelley expressed surprise that the M&StL had any interest in a joint participation as he said he understood our basic position was that the M&StL should acquire the TP&W alone. I said that this was true, [fol. 1048] but that we intended to oppose the acquisition before the Interstate Commerce Commission, and that it seemed to me desirable that we acquire the 15 per cent. I pointed out that since the 15 per cent did not constitute control, or anything like it, we should be able legally to close the transaction at once if he wished.

Mr. Broker: May I interrupt, please.

Exam. Albus: Yes.

Mr. Broker: I assume that sentence just read was a legal conclusion by this witness rather than an acclamation of fact.

Mr. Wheeler: I think it is an opinion, Mr. Examiner.

Exam. Albus: That is still an opinion.

Mr. Broker: Thank you.

A. He called me back and said that he talked either to the President or Chairman of the Hanover—I do not remember which—and that they had made an oral agreement with Mr. Gurley on or about May 26, and that he was sorry but there was nothing that he could do about it.

The M&StL's position with respect to the entire TP&W, including the west end, is very clear. First of all, it is our opinion that we need the TP&W and that if it falls into the hands of the Pennsylvania and Santa Fe, or indeed, into the hands of any combination of the interested roads, we would be materially and affirmatively injured. This will be discussed at length by other witnesses.

[fol. 1049] Second, we wish to acquire the TP&W, and I mean the entire TP&W, not merely to protect the M&StL against the serious harm which would follow were the

TP&W to fall into the hands of the Santa Fe and Pennsylvania, but also materially to benefit the unified roads. As Mr. Devins, president and Mr. Schroeder, president of operations and Mr. Provo, comptroller, will testify, the net value after taxes to the M&StL of the acquisition of the TP&W, including savings from unification, elimination of duplicate facilities and the like, and including the retention of vulnerable traffic, would be huge.

Now with specific reference to the west end, I would like to say that Mr. Devins had discussed with me from a purely train operations standpoint the possible advantages of abandoning the west end. Neither Mr. Devins nor I, nor, more important, the Board of Directors or Executive Committee of the M&StL, ever adopted the abandonment of the west end as the M&StL's policy were we to acquire the TP&W, nor is it our policy now. As a matter of fact, while the negotiations to acquire the TP&W were continuing, I asked Mr. Coulter whether the advantages from abandoning the west end of the TP&W would offset the disadvantages. He stated flatly that it would be very undesirable and his exposition was completely convincing so far as I was concerned.

I would now like to refer to a conversation with Mr. Gurley to which he referred incompletely on cross-exam- [fol. 1050] ination. This conversation took place at lunch with Mr. Gurley, the two of us alone, shortly after the May 26 contract.

It had never been clear in my mind as to why the Santa Fe was interested in acquiring the TP&W, as against the M&StL. The M&StL does not compete with the Santa Fe; we have always had, or thought we have had, a friendly relationship; our Nemo interchange is an important interchange to the M&StL, and we had always thought that it was a valued interchange so far as the Santa Fe was concerned. Accordingly, I asked Mr. Gurley if he would not tell me candidly why the Santa Fe had acquired the TP&W; that it didn't make sense to me since it was an obvious short haul of the Santa Fe; and since my understanding was that the Santa Fe had always solicited for Chicago and never for Lomax.

Mr. Gurley told me that the reason that the Santa Fe had stepped in was because he had been informed that if the M&StL acquired the property we proposed to abandon the west end and that—and I recall his words very clearly—he took a dim view of the Santa Fe having access to Peoria solely over the M&StL tracks from Nemo. I told him that I was distressed that we had not had this conversation earlier; that if that was the reason of the Santa Fe, I could have put his concern to rest by any assurances that he would have cared to have. I said that our operating people had considered this from a purely operating standpoint, and that I had discussed it with Mr. Coulter, who had [fol. 1051] advised me that the abandonment idea, sometimes considered by prior management, was not a good one.

I would like to state on the record what I have said often enough off the record; that if the M&StL obtains control of the TP&W, it has no intention or desire to abandon the west end of the property. We have already stated our agreement to appropriate conditions to insure this, and we are not convinced that in any event sound operation would dictate the continuation of, and effective solicitation for, the Lomax and Keokuk gateways.

The M&StL is interested in sole acquisition of the TP&W. There are a number of reasons for the M&StL's position in this regard. First, we believe that multiple ownership tends to be stagnant ownership, and that this is particularly the case of multiple ownership by competing interests. The particular case is an excellent example. If the M&StL were to acquire the TP&W alone, it would be able to advertise and solicit for its new and improved service; we would be able, in our opinion, to divert traffic westbound and eastbound from the Chicago and St. Louis gateways, mitigate further inroads by truck competition, and obtain revenues and traffic that we are not now obtaining. Moreover, we would have every incentive to do this for the reasons to which I have already testified.

I might say that the significance of this investment so [fol. 1052] far as the M&StL is perhaps shown by the fact that we are proposing to invest $12,000,000. Our capitalization at the present time consists of approximately 800,000 shares at $20 a share or $20,000,000, and I am speaking of

our stock capitalization, which perhaps reflects the significance and importance to us of the TP&W. I might say that our revenues are in the neighborhood of $20,000,000. The revenues of the TP&W are $8,000,000. So that the revenues of the combined road, as you can see, would be a very significant factor to the M&StL.

Moreover, if the TP&W were owned by the M&StL and others, which are either competitors with the M&StL or with each other, the TP&W would become neutralized, so-called, which is merely another word for stagnant. These offsetting and conflicting interests would prevent the type of aggressive traffic solicitation which the TP&W has engaged in as an independent operation and which would be continued under unified operation with the M&StL. As a matter of fact, M&StL ownership of the TP&W would be the closest possible thing to a continuation of the TP&W in its present form as an aggressive independent property.

I would like to comment also on the question of management of the TP&W. We believe that the management, from Russel Coulter on down, is excellent, but we do not believe that trade channels or routes should be permanently transferred and controlled on the basis of anything so temporary [fol. 1053] as existing present management. Russel Coulter is mortal like all of us, and, God forbid, could drop dead tomorrow. He could also be promoted by the Pennsylvania or Santa Fe to greater responsibilities elsewhere in their systems, or could ask for his release from his existing contract in order to accept greater responsibilities on another railroad.

If Russel Coulter, for any reason, were to leave the TP&W, who can believe that the Pennsylvania and Santa Fe would replace him with another $50,000 a year executive to run a property having $8,000,000 a year gross revenues? This would throw their entire executive pay roll completely out of line, and in their terms, would be wholly unwarranted.

The question that must be answered, not on a superficial but on a fundamental basis, is what are the conditions that have given rise to this type of management, and to the growth and success of the TP&W? If the underlying conditions are duplicated as nearly as possible, it may be as-

sumed that equal management will be provided on a continuing basis and that the growth and progress of the TP&W will be continued.

The primary condition is plainly the ownership of the TP&W by interests that do not compete through other gateways. This would lead these interests aggressively to solicit for the TP&W through the Peoria gateway with an eye single to the best interest of the TP&W. The TP&W would never have attained its present position had it been owned by two or more large railroads having competing [fol. 1054] gateways which they were bound to favor because of the overriding economic considerations. And let me give you a specific example. It is no accident that the Lomax gateway was never opened up by the Santa Fe when the TP&W was under the joint ownership of the Pennsylvania and the Burlington.

Mr. Lucas: Mr. Examiner, I object. If we are going into history 40 years back.

Exam. Albus: It doesn't make any difference, the objection is overruled. He may state what he has as an example.

A. Immediately after George McNear came into ownership of the TP&W, he went to the Santa Fe, the Santa Fe didn't go to him, he went to the Santa Fe and persuaded the Santa Fe to open the Lomax gateway. That was because his sole interest was in the Peoria gateway.

Exam. Albus: How did you learn those facts, Mr. Heineman?

The Witness: The way, I think, sir, the way most of us learn facts that transpired before our birth, by study, and statements by the TP&W and so forth.

Mr. Lucas: Mr. Examiner, I move to strike the statement that the witness has just made off of his prepared text as being remote, having no evidentiary value and as contrary to the facts of record in this case.

Mr. Wheeler: Mr. Examiner, I don't believe they are contrary to the facts of record in this case.

[fol. 1055] Mr. Lucas: Mr. Carpi testified he came to the Pennsylvania Railroad, too. I think the material is very remote, speculative.

Exam. Albus: The objection is overruled.
Mr. Lucas: Exception, please.
Exam. Albus: Yes, sir.

A. Exclusive ownership of the TP&W by the M&StL, for reasons which I have already stated and which will also appear in other testimony, would most closely compare with the TP&W under present conditions. For the M&StL unified with the TP&W would have no incentive other than to carry on and improve the same type of aggressive solicitation and service that has been provided by the TP&W. Indeed, the unification of the M&StL and TP&W would so strengthen both roads as to enable them both to compete more successfully and to improve their services.

Of equal importance to this question of non competing gateways is the considerable savings from unification which would result from single ownership by the M&StL could not result under multiple ownership. Under multiple ownership, the type of unification which we contemplate and desire would be impossible. This would mean not merely that the M&StL would not obtain the benefits and strengthening effects of this unification, but it would also mean that the transportation industry and shipping public would not obtain the benefits.

[fol. 1055a] I would like to describe the employee policies which the M&StL would follow in the event that it succeeds ~~in acquiring~~ the TP&W. As will appear from the testimony of other witnesses, the unification of the M&StL and TP&W would result in very considerable savings and elimination of duplication, we will observe the "Washington Agreement" of 1936, and we have no objection at all to this being imposed by the Commission as a condition of approval of our control. Moreover, I would like to say that, in any event, and without regard to the Washington Agreement, we would proceed with the most scrupulous care toward the employees of the M&StL and TP&W. To illustrate, on the M&StL at the present time we are making substantial economies due to the mechanization of accounting. When we commenced to do that mechanization job, we established as a policy effective throughout the company, that no employees were to be hired from the outside until any employees displaced by the mechanization program had been

offered employment as vacancies occurred through death, retirement, or normal attrition. Accordingly, I am proud to say that although we have eliminated a substantial number of positions as part of this accounting modernization program, every person who would have been displaced by this program is, in consequence of this policy, working in another position on the M&StL. In two or three instances only, such persons have assumed positions on other railroads.

[fol. 1056] Wholly apart from the Washington Agreement, and in addition to such conditions for the protection of employees as the Commission would impose, we would expect to carry out this policy for the protection of the employees of the M. & St. L. and T. P. & W. in the spirit and manner that I have described.

There is one other matter in connection with employee policy to which I would like to refer. The M. & St. L. has many supervisory non-contract employees in the upper age brackets. Ten are ever 65; four are 65; five are 64; four are 63; four are 62; four are 61 and four are 60. We are in the process of retiring these employees, upon proper pension provisions of course. The unification of the T. P. & W. with the M. & St. L. would provide a fine young management pool as normal attrition of our own supervisory personnel takes place.

In addition, we have among our contract employees in the operating department alone, 104 employees who on February 1st were 65 years of age or older. This again, provides a basis for my conviction that while unification of the M. & St. L. and T. P. & W. will provide great economies through the consolidation of existing positions, the adverse effect upon the individuals involved will be minimal by virtue of the extraordinary attrition to which I have referred, and by virtue of the policies which we propose to follow.

I now wish to discuss the contemplated financing by the M. & St. L. of the acquisition of control. As our applica-[fol. 1057] tion states, the M. & St. L., subject to Commission approval, is prepared to acquire the entire equity of the T. P. & W. at the same price as the Pennsylvania-Santa Fe combination. This a price of $12,150,000.

The M. & St. L. proposes to finance the acquisition in the following fashion: First, we would propose to pay the $150,000 out of our general funds. Second, we would propose to issue and sell competitively $12,000,000. of first mortgage collateral trust bonds of the M. & St. L. These bonds would have an interest rate competitively fixed, but we tentatively estimate that rate today as being approximately 4¼ per cent. The bonds would carry no sinking fund for the first five years of their life, and thereafter, the bonds would carry a sinking fund payable if earned of 4 per cent of the principal amount of the bonds annually. This would amount to twenty-five equal installments of $480,000 each, and would extinguish the bonds at their maturity. The bonds would be secured by a first mortgage upon the M. & St. L., and by the deposit of all of the capital stock of the T. P. & W.

In this connection, I would like to discuss Exhibit H-23, entitled "The Minneapolis and St. Louis Railway Company and Toledo, Peoria and Western Railroad Company Combined and Pro Forma Financial Data." Schedule 1, if I may refer to it, consists of two sheets and is the actual balance sheet as at December 31, 1955, of the M. & St. L. [fol. 1058] and T. P. & W. alone and combined, together with certain pro forma adjustments to reflect the changes in capital stock, long term debt, earned surplus and investment in road and equipment resulting from the sale and issuance of $12,000,000 principal amount of 4¼ per cent first mortgage bonds for a 100 per cent interest in the common stock of the T. P. & W. if it were acquired as of December 31, 1955. Sheet 1 is the asset side of the balance sheet and sheet 2 is the liability side.

The effect of any discount premium or expense with reference to the issuance of the bonds has not been given in the pro forma balance sheet.

Schedule 2 consists of actual statements of income and earned surplus for the M. & St. L. and T. P. & W. for the eight years ended December 31, 1955, alone and combined. The schedule has been prepared only for the eight years ended December 31, 1955, since operations of the T. P. & W. were suspended from October 1, 1945, to June 11, 1947. The schedule contains no pro forma adjustments for the acquisition of the T. P. & W.

Schedule 3 is, in our view, a significant schedule. It takes the combined income and earned surplus of the T. P. & W. and M. & St. L., before fixed charges and taxes on income from Schedule 2, for the eight years ended December 31, 1955, and recasts the fixed charges, the provision for income taxes, the income available for fixed charges, the net income and the earned surplus upon the assumption that $12,000,000 [fol. 1059] of principal amount of bonds bearing interest at the rate of 4¼ per cent had been outstanding since January 1, 1948. The Examiner will observe from column 4 that, if such bonds had been outstanding, the coverage of all fixed charges of the two properties for the eight-year period would have been an average of 6.5 times. I will discuss in greater detail the significance of that coverage later in my testimony. Mr. David Hill, an independent rail analyst and consultant, will also discuss it further.

Schedule 4 of the exhibit is a pro forma schedule of the excess of total depreciation over the long term debt and proposed bond sinking fund requirements. The first four columns, other than the date column, show the long term debt maturities of the M. & St. L. and its depreciation based on the provisions for the year 1955. The fifth column shows the excess of depreciation over the long term debt maturities. The next five numerical columns provide the same information with reference to the T. P. & W. The next three numerical columns combine the information for the two roads. The next to the last column shows the proposed bond sinking fund requirements as I have outlined them earlier. The final column shows the excess of total depreciation over all long term debt maturities and proposed bond sinking fund requirements of the M. & St. L. and T. P. & W. combined.

The Examiner will note that over the life of the bond the excess of total depreciation over long term debt maturi- [fol. 1060] ties and proposed bond sinking fund requirements is in excess of $23,000,000, and the Examiner will also note that this is without regard to the earnings of the M. & St. L.-T. P. & W. combined, which would of course materially increase that amount.

Conversely, however, the schedule does not show funds to be expended for new equipment or additions and better-

ments. Schedule 5 to the exhibit shows the combined statements of operating expenses and ratios for the M. & St. L.-T. P. & W. combined for the eight years ended December 31, 1955. I would like to say that these expenses and ratios are actual, that is to say, they do not reflect any of the economies from unification as to which there will be considerable testimony and with respect to which a separate exhibit has been constructed.

It is apparent that with an average transportation ratio for the eight years of 30.6 per cent and average operating ratios for the same eight years of 73.5 per cent, which reflected—as other witnesses will testify or have testified—adequate maintenance of both properties, the combined roads would be operating on an efficient basis. The benefits from unification will materially reduce both the transportation and operating ratios and make the unified property one of the most efficient in the United States. The details will be presented in exhibit form and by the testimony of subsequent witnesses.

Schedule 6 to the exhibit is a pro forma statement of the debt-stock ratio as at December 31, 1955, on the assumption [fol. 1061] that the two roads were combined and that the bonds of the M. & St. L. were issued in the amounts that I have heretofore stated.

Last May when we were negotiating for the T. P. & W., I discussed with representatives of Halsey, Stuart & Company and Smith, Barney & Co., well known underwriters, whether or not, in their opinion, $12,000,000 of bonds of the M. & St. L. of the kind that I have described could be sold competitively so as to finance the acquisition. In each case the representative of these underwriters said that in their opinion groups would be formed to bid competitively for such bonds, and we will, of course, adduce specific testimony on this subject.

I have recently discussed the question again with representatives of Halsey, Stuart and Smith, Barney. The representative of Halsey, Stuart informed me that in their opinion the bonds could be sold competitively, subject of course to market conditions affecting the coupon, and that Halsey, Stuart was prepared to form a group to bid on the bonds. The representative of Smith, Barney informed me

that while it was Smith Barney's practice not to bid competitively on issues of less than $25,000,000, he believed that these bonds were salable on a competitive basis, and that because of the relative smallness of the issue, there would be a number of competitive groups formed, regardless of whether Smith, Barney decided that it would participate. [fols. 1062-1063] Last May, on the assumption that we would succeed in our efforts to buy the T. P. & W. from the then owners, I took the added precaution of negotiating a standby agreement with five major banks agreed to enter into a standby commitment with the M. & St. L. so that if, by virtue of some disruption of the market or some other reason, we would be unable to sell our bonds temporarily, they would agree to advance $12,000,000 to the M. & St. L. to meet its anticipated commitment to purchase the T. P. & W. in the amount of $12,000,000. This standby agreement was never executed because of the Santa Fe-Pennsylvania purchase.

I have no question, but that should the Commission approve the M. & St. L.'s application, we would be able in a matter of a very few days to produce a standby agreement from the banks in the full amount to enable us to fulfill our commitment, regardless of any temporary changes in the bond market. It would be our intention to sell the bonds competitively, and we have every assurance that we would be able to do so upon reasonable and proper terms. The standby commitment would be merely insurance.

Mr. Wheeler: Does that conclude your direct testimony, Mr. Heineman?

The Witness: Yes, sir.

Exam. Albus: Cross-examination, please.

[fol. 1064] Cross examination.

By Mr. Thomas:

Q. Mr. Heineman, you gave some interchange figures on page 1 of your prepared statement.

A. Yes, sir.

Q. Will you tell me how many of the 12,995 cars listed there involved only a switch haul to the TP&W.

A. I don't know that figure, but I will be happy to provide it later in the day.

Q. Can you tell me what is the total interchange of the M&StL at Peoria during the last four years by years?

A. I cannot tell you by years. I can tell you in the neighborhood of seventy to seventy-five thousand cars, but I will get that figure for you by years, too.

Q. Can you supply it broken down between the roads with which the traffic is interchanged?

A. I am sure we can do that.

Q. Thank you, if you will. On page 4 of your statement you referred to a route by the TP&W to St. Louis.

A. Would you show me where that is, sir.

Q. You referred to the TP&W as providing an alternate route to the St. Louis gateway. Did you mean east and west or north and south?

A. I was speaking specifically, sir, of east and west.

Q. Oh, thank you. On page 9 of your statement you indicated that you made an offer for the stock owned by the [fol. 1065] trustees of the McNear estate, I think your first offer, on June 10, 1954, and that was rejected June 14.

A. Yes, sir.

Q. You quoted a gross figure. Could you express that figure in dollars per share?

A. Well, there were and are 90,000 shares of the TP&W outstanding, and I will be glad to divide six million two sixty by ninety. I think it comes out $69.50 a share or thereabouts.

Q. You didn't really expect to get the stock at that price, did you?

A. No, of course, I did not expect to get it at that price. I wasn't at all clear what price there was going to be fixed on it. I had heard that they were thinking in the neighborhood of seven and a half to eight million dollars, but you are quite right, I did not expect that my first offer would be the final offer.

Q. Then, was your next offer on September 23, you had a figure quoted there of $7,250,000?

A. Yes, sir.

Q. How much was that per share?

A. Very close to $86.

Q. In view of the price for which the stock finally sold, those offers were pretty low, weren't they?

A. Well, I don't know. As I made clear to the trustees, and as I have testified, I was trying to get them to sit [fol. 1066] down and negotiate. They sent me the message that if I would materially increase my first offer that they would sit down and negotiate. I increased it by one million dollars, which I thought was a very substantial increase. In terms of final price at which it finally went, yes, it was a little low, it was quite low, but in terms of the April 15 agreement with the Santa Fe and Pennsylvania at which the trustees had agreed to sell it for a hundred dollars a share, I wasn't too far off for opening bids without any negotiations by the trustees.

Q. After that first offer of $69 a share was turned down—

A. Yes, sir?

Q. (Continuing) —that was four days after the offer was made, wasn't it?

A. Yes, sir.

Q. Then, you retained Judge Morris about a week later?

A. Yes, sir.

Q. A little over a week later?

A. Yes, sir.

Q. Is he connected with the Wilmington Trust Company?

A. Well, as a matter of fact, he is, but my firm—yes, he is. He is a member of the board of directors and, I believe, a member of the trust investment committee, but Judge Morris has retained my firm back as far as 1950 as his lawyers in Chicago and we have retained Judge Morris on all Wilmington, Delaware, matters for over 15 years, and [fol. 1067] he is our only attorney in Wilmington and has been for 15 years.

Q. That takes care of Judge Morris.

A. Yes, sir, and the implication in the question.

Q. Now, Mr. Heineman—you don't need to refer to the page—in the latter part of your testimony you refer to the subject of the west end of the TP&W. Did I understand you to say that you had a talk with Mr. Coulter about that as well as Mr. Gurley?

A. Yes, sir, I remember it well.

Q. Let's go into another subject now. Has the M&StL Railroad been buying its own stock with company funds?

A. Well, the answer is yes, and I don't want to be humorous, but those are the only funds with which M&StL could buy its own stock.

Q. When did the company start buying its own stock?

A. It started buying its own stock in about late May or early June of 1955, at the time that we were discussing the retirement of certain of our senior executive officers and their replacement with younger officers, and the board concluded that we had to be in a position and should be in a position to offer these new officers stock options.

Q. Has the M&StL continued buying its stock since that time?

A. It has, yes, sir.

Q. Is it still buying its stock?

A. Yes, sir.

Q. How much stock has the company bought since this [fol. 1068] program was started.

A. I would say, and we have published the figures—I can't give you the precise figure, but I am sure that I will be quite close.

Q. A general figure would do.

A. The general figure would be, as of December 31, I think, 34,700 shares had been purchased, and since that date, and now I am estimating, I would say we had bought another thousand for company account, another thousand shares for the company account.

Q. How much has the company spent in the purchase of this stock?

Mr. Wheeler: Mr. Examiner, may I object to this line of questioning. I am not sure that I understand what relevance it has to any issue here.

Mr. Thomas: Mr. Examiner, I think it is of importance to the Commission to know from the standpoint of the public interest what dealings and what policies and what plans the people who control an applicant for authority to acquire another railroad have in their minds and in their business affairs.

The Witness: I have no objection to answering the question.

Exam. Albus: Very well, the objection is overruled.

A. Our average price is $22, and we are going to our shareholders at their annual meeting which takes place May [fol. 1069] 8, and also we have had communications with the Interstate Commerce Commission about this, with proposals to option 20,000 shares of that, as an initial option plan, to executives and officers and key employees of the M&StL, from the President-Elect down to, and not including any member of the board, including Ben Heineman.

By Mr. Thomas:

Q. There wasn't any such implication, Mr. Heineman, in my question.

A. I just wanted to make the record clear.

Exam. Albus: That is a complete question.

By Mr. Thomas:

Q. I got the figure per share as the number of shares in the figure.

A. Twenty thousand shares is our proposed option plan, as an initial plan.

Q. No, that wasn't related to my question. My question is how much has the company spent in the purchase of the stock.

Exam. Albus: The average price.

A. I am sorry, sir. I think I started to say and I didn't finish it. The average price per share is $22 or $22-1/8, but very close to $22.

By Mr. Thomas:

Q. How have the purchases been made? Have they been made through brokers on the market or have they been made directly from individuals?

A. They have been made through brokers on the open market, with full notice from the time we started to our [fol. 1070] shareholders that we were, so that all shareholders of the M&StL would be informed of that fact.

Q. Mr. Heineman, the Wall Street Journal of December 19, 1955, and also an item I saw in Business Week, quoted you as saying that the purpose or objective in purchasing

this stock was, (1) for this stock option plan to which you refer, and (2) cause price appreciation in the remaining outstanding shares, is that correct?

A. I don't know how they quoted me. There has been great reliance throughout this hearing on newspaper stories about me and my point of view. I would like to say to you that the reason which guided me, the reason which guided the executive committee, and the reason which guided the board of directors was our conviction that for a small railroad to get the kind of caliber employees that we wanted, we had to be in the position to give them more than just a salary, we had to give them an ownership interest in the property, and provide them with the opportunity to have such ownership interest, because on our board there owned and represented approximately one-third of our total outstanding stock. We felt that we were in a better position than many railroads to go out and buy stock for the purpose of attracting the kind of executives that we thought we ought to have to run the M&StL.

And my answer to you is this, the purpose was, first and foremost, and so far as I am concerned only, to provide a [fol. 1071] continual pool of stock to option, not only to our executives, but I am hopeful, to our employees, and I might say we are stating that in our letter and in our meeting to shareholders, and we are also advising them of the price at which we propose to option them and this is the subject upon which I feel very strongly and have made many speeches.

Q. Do I understand, then, you are denying the other factor?

A. I am denying both the story and any implication that the purpose of purchasing this stock was any kind of a market maneuver, and I would be very happy, if you would care to, to go into still further details on that.

Exam. Albus: I think that is enough.

By Mr. Thomas:

Q. Mr. Heineman, in the course of cross-examination of Mr. Gurley the first day of this hearing, and I am keeping this reference out of the newspaper, Mr. Wheeler referred to you and your associates, so I assume that that expression

has some definite meaning in your operations in connection with the M&StL. I would like to ask you some questions about who your associates are in connection with the M&StL.

Mr. Wheeler: May I inquire, are you speaking of in the operations of the property?

Mr. Thomas: No. Financial associates.

Mr. Wheeler: What contacts?

Mr. Thomas: Financial associates.

Mr. Wheeler: In the ownership?

[fol. 1072] Mr. Thomas: Yes.

By Mr. Thomas:

Q. Who is Mr. Franklin Lyons?

A. Mr. Franklin Lyons is an investor in the city of Chicago who has been a client and close personal friend and associate of mine for a great many years. He was a longstanding shareholder of the Minneapolis & St. Louis Railway. As a matter of fact, he first interested me in it a number of years ago. He is a man of considerable means.

Q. I don't recall, I don't have your application here, is he a director of the M&StL?

A. He is a director and a member of the executive committee and the second largest shareholder, owning some thirty-two thousand shares, as is publicly of record.

Q. He was one of the so-called investors group, of which you were the head, which acquired control of the M&StL as a result of proxy fight in 1954?

A. That is correct, sir.

Q. Did Mr. Lyons—

A. (Interrupting) I said 32,000 shares. It is between thirty and thirty-two thousand. I am not sure which it is.

Exam. Albus: It is in the application.

Mr. Thomas: He is not listed in the application as one of the ten principal shareholders.

By Mr. Thomas:

Q. Why isn't he listed as one of the 10 principal stockholders?

[fol. 1072a] A. His stock is held beneficially, as is the stock of many, many investors, that is to say, the report calls for the record shareholders, but in the proxy material filed annually with the Securities & Exchange Commission and also in all the solicitation materials which were sent out two years ago; that fact was clearly of record and will be of record again in about six weeks when we send out our next proxy material.

Exam. Albus: How about the annual report to the Commission?

The Witness: The reason it is not, sir, the Commission's report calls for the shareholders of record.

Exam. Albus: Very well.

The Witness: And his is a beneficial holding.

By Mr. Thomas:

Q. How does he hold his stock, through a broker?

A. You will have to ask him that.

Q. You don't have that information?

A. I don't know, I do not know.

Q. Did Mr. Lyons head a group which held control of the Alabama, Tennessee & Northern in 1946 and 1947?

A. If you ask me of my own knowledge, my answer is no. He has told me he did and I have heard something about it, yes.

Q. There was some material in your proxy solicitation material—

A. I can say I have no personal knowledge of it.

Q. I don't think we are restricting you to your personal [fol. 1073] knowledge today. Did he sell that stock to the St. Louis-San Francisco Railroad in 1948?

A. I believe so, but I want to say something, Mr. Thomas, that I had no contact with that transaction, I don't think I knew him at the time, although I may have known him, I was not representing him and I really have no personal knowledge of the transaction. Now, I am perfectly willing to answer any question.

Q. Aren't you familiar with the proxy material which bore your name in the proxy solicitation fight in 1954?

A. I was intimately familiar with it at the time, and if you would care to show me a copy I will be glad to identify

it for the record, but if you are asking me to remember the details of his holdings or what was said at that time, I cannot do it now. But I will certainly identify it and authenticate it for you, if you wish, and I was thoroughly familiar with it at the time.

Mr. Thomas: Mr. Examiner, I don't particularly care to offer this as an exhibit, but—

Exam. Albus: Show it to the witness. You cannot offer it as an exhibit unless you have copies for circulation, which I am pretty sure you don't have there.

A. This is certainly one of the solicitations that was sent out.

By Mr. Thomas:

Q. Will you hold it for a minute.

A. Surely.

[fol. 1074] Q. It shows, doesn't it, that he and his associates in that transaction made a substantial profit on the deal, doesn't it?

A. Not only he and his associates, but all of the shareholders of that particular property and bondholders.

Q. That is all I have to do with that.

Does Mr. Lyons own stock in any other railroad?

A. I know of one, and because he has always been interested in railroads, without knowing, I am certain that he owns it in others. I know of one other.

Q. What road is that?

A. Chicago-Northwestern Railroad.

Q. And you think he owns stock in other railroads?

A. I would certainly believe so, but of that I have no knowledge whatsoever, either from hearsay or personal knowledge.

Q. You don't know the extent of his holdings, then, in these other railroads?

A. I don't know the extent, no, sir.

Q. Is he a director or officer of any other railroad?

A. I am sure he is not.

[fol. 1075] Q. Who is John P. Wagner?

A. Mr. John P. Wagner is a very dear friend of mine and a client. He is a man about 63 years old. He lives in

Chicago, he was formerly of Milwaukee. He is a man of considerable means. He is the largest individual shareholder of the Minneapolis and St. Louis Railway, Railroad, and a very dear friend of mine.

Q. Well, I guess that explains what confused me. I gathered that he must hold, then, some of the stock in his own name and some in some other name?

A. Mr. Wagner has many affairs and I honestly do not know how he holds the stock, I can find out if it is germane and I will be glad to.

Q. You have shown him in your application as shown 14,384 shares—

A. (Interrupting) Which application?

Q. Page 6 of your application in this proceeding.

A. You mean as holding that of record?

Q. Yes.

A. Yes, but when I speak of holdings or ownerships, sir—I assumed you were not asking me for record holdings.

Q. That is right.

A. I assumed you were asking me for record and beneficial holdings and I was answering on that basis.

Q. And what was the figure you gave me?

[fol. 1076] A. I did not give you a figure.

Q. Do you know whether his holdings in the M&StL have increased or declined since May 1954?

A. They have increased.

Q. But you don't know their extent?

A. Well, no, you didn't ask me the question, Mr. Thomas.

Q. I asked you that before, I thought.

A. I will be glad to give it to you, to the best of my knowledge, sir—

Q. (Interrupting) All right, my understanding is that he directly and with members of his family own approximately 45,000 shares of the common stock of the Minneapolis and St. Louis Railway, and that is an approximating figure. I do not know the exact figure but it is in that neighborhood.

Q. How about Henry Demeester?

A. Henry Demeester is a man whom I met about three years ago. He was a longstanding shareholder of the M&StL and as a matter of fact had held the original bonds prior to the re-organization. We were brought together by

mutual friends. I know nothing about his business affairs and I know nothing except approximately his holdings in the M&StL which came to me as part of the annual material that we send out to shareholders and to the SEC.

Q. He was in the group, investors group—

A. Yes, sir.

[fol. 1077] Q. (Continuing) —that was involved in the investors group?

A. Yes, sir, he is a retired businessman and lives in Florida.

Q. What are his holdings?

A. Well, there are in the neighborhood of 3,800 shares, I think, but this can be—Mr. Muzenbrack tells me that Mr. Dennecster gave him the figure in preparation of the annual meeting of shareholders and that we will furnish it for the record.

Q. Mr. Arthur Bowes is one of your associates, isn't he?

A. Yes, sir.

Q. Is he a stockholder in the M&StL?

A. A substantial one, yes, sir.

Q. Do you know the amount of his holdings?

A. Yes, I do, I think. Well, it is in the neighborhood of 8,000 shares, I believe.

Q. Would you care to state what the total holdings of M&StL stock are for the amount held by you and your associates?

A. Well, now, the term—

Mr. Wheeler: The men that you have named?

Mr. Thomas: I was asking for a total figure. Perhaps I had better strike that question and ask a preliminary question.

By Mr. Thomas:

Q. Are there other associates—

A. (Interrupting) I was going to say earlier—when you speak of my associates, it may sound like a defined term to you, but as far as I am concerned it isn't a defined term, and I really don't know about whom you are speaking. I [fol. 1078] have many friends, I hope, and business associates, and to what extent they are or are not included in this question I honestly don't know.

By Mr. Thomas:

Q. Well, your counsel used the term. I thought perhaps he had something specific in mind.

A. Well, I can't help that either.

Q. Suppose I ask you what are the total holdings, of you, your associates and your friends?

A. If I were to make an estimate—

Q. (Interrupting) Let me add one more remark to make this clear to you, those that you could reasonably expect to follow your guidance.

A. I honestly cannot answer that question. These men are in no sense of the word controlled by Ben Heineman.

Q. Let's put it this way.

A. I would like to finish my answer.

Exam. Albus: Finish your answer.

A. These men are independent businessmen who have been very successful and many of them are from 10 to 15 to 20 years older than I am, and to speak of them following my guidance in a sense of a failure to exercise an independent judgment on their part is a complete misunderstanding of our relationships.

Q. I am sorry if I implied that in the question, Mr. Heineman, I didn't intend to. The point I was trying to make was a matter of definition. Let's say those for whom you are a spokesman. You certainly do speak for a group of people.

[fol. 1079] Mr. Wheeler: Spokesman in what matters?

By Mr. Thomas:

Q. Well, Mr. Heineman, don't you issue press releases from time to time?

A. I do not.

Q. Didn't you in the proxy fight involving the M&StL?

A. I would like to clarify something, Mr. Thomas. The proxy fight was a proxy fight. It was well publicized. At that time we issued press releases. We were then elected to the board of the M&StL. Old directors who had been on the board were retained on the board, the management was retained. We have functioned as a unified board. I

am no spokesman for a particular group of shareholders. I am chairman of the executive committee of the M&StL and a member of the board of directors, and to the extent that I or any other member of the board speaks for the company we speak for the shareholders.

Q. You do hold press conferences, don't you?

A. I do not.

Q. Didn't you hold a press conference or call the press the day that Mr. Patterson advised you that the trustee stock had been sold, May 26, I believe, didn't you tell him that you were going to call one?

A. Well, now, what questions are you asking me, you said did I and you say didn't I tell—

Q. (Interrupting) The first question.

A. Did I hold one?

[fol. 1080] Q. Yes.

A. I am certain I did not, and I am certain I issued no statement about it, although you can't always remember what you do in the heat of distress, but at least I am morally certain sitting here that I did not.

Q. Well, will you tell me, I guess that broad question I asked, I can't seem to get a successful definition of what you and your associates mean in this connection. You have told me the holdings of each of the individuals I named, I will be satisfied with that.

A. I will try to answer it because I do know what you are talking about, I think. At the time of the proxy fight friends, associates, and I had approximately 205,000 shares out of the 600,000 shares. It is my belief, but I must say that it on incomplete information, I have made no effort to take a census, it is my belief that that same group today holds as much or more stock, but I want to make clear that although that is a belief held in good faith it could be a mistaken belief but five or ten per cent one way or the other.

Q. You know, when you use that broad term did you include some other individuals besides the one I mentioned?

A. Surely, I included my law partner, I included his children for whom he has trusts, I included all kinds. I thought that was what you were asking for.

[fol. 1081] Q. I was. Now, in your prepared statement you made some comments about a substantial interest in the Monon.

A. Yes, sir.

Q. And I wasn't entirely clear, perhaps there is some ambiguity in your testimony, you used the term "we" in one instance and there is an implication, I thought, somewhere else that you were referring to the M&StL?

A. The M&StL as a corporation had no interest in the Monon.

Q. Were those who had the interest in the Monon and were, may I say associates of yours?

A. You may say, sir, anything you wish.

Q. Were they the same persons who were interested in the M&StL that we have been discussing?

A. I would say that they were the basic people that you first described, yes. There may have been one or two small additional people. Well, that is not entirely accurate. I would say that it included persons who are or have been associated with me and the M&StL, yes.

[fol. 1082] Q. You said no stock was held in the name of the M&StL?

A. No.

Q. Were any M&StL funds used?

A. No, sir, they were not.

Q. What was the amount of the holdings of you and your associates in the Monon?

A. We owned—we purchased approximately ninety thousand Class A voting stock certificates—I beg your pardon, voting trust certificates.

Q. I think you told on your direct when the purchase was made.

A. Yes, I think I said. In any event, it was early in January of 1955.

Q. Did all of this group sell their stock when the reports appeared in the papers?

A. Yes, sir.

Q. Every one of them?

A. Every one to my knowledge, yes, sir. Well, as a matter of fact, yes, sir, I certainly think so.

Exam. Albus: The answer is yes.

A. (Continuing) I know of none who didn't, I will put it that way, and it was one transaction and I think I would have known.

By Mr. Thomas:

Q. Do you know who Homer Livingston of the First National Bank of Chicago is? Do you know him?

A. Yes, sir.

Q. Is he or was he connected with the Monon?

[fol. 1083] A. Homer Livingston until January 10, 1956, was one of three voting stock trustees of the Monon.

Q. Did you have discussions with Mr. Livingston last year about selecting a new slate of directors for the Monon to be presented to the stockholders meeting in March of this year after the voting trust expired?

A. At his instance, yes. Now, may I explain it?

Exam. Albus: Yes, certainly.

A. (Continuing) Mr. Homer Livingston, President of the First National Bank of Chicago, Mr. Arthur Leonard, President of the City National Bank, and John Barringer were voting trustees of the Monon. The voting trust was to expire on January 10, 1956. When we acquired our stock, or I should say our voting trust certificates, because we had no power to vote at all, and never did when I owned any stock, Mr. Livingston asked me to come over and see him. We have known each other for a good many years. He said to me that he was delighted we were in the picture because the situation would probably stabilize after the voting trust expired. We had a meeting at which Mr. Livingston, Mr. Leonard, Mr. Barringer, Mr. Harold Smith of then Winston, Strong, Black & Towner, Mr. Howard Greer, Vice-President and Comptroller, I believe, of the Monon, and I and Homer Livingston, of course, were present. He asked me if I would like to go on the Board of the Monon. I said no, that I was on the board of the M&StL and wished to stay there. He asked me if we would [fol. 1084] propose a nominee to go on the board. This was about March of 1955. I said no, sir, that as far as we were concerned we were satisfied with the management of the Monon and I neither wished to go on the board nor propose a nominee. He asked me if it would be all right with me if they left the vacancy open. They had an annual meeting coming up, with the thought that I might change my mind, and I said that was perfectly satisfactory to me. On sev-

identify it. That is all I have with him about it. I have some copies here, not a great many, but I think enough to go around.

[fol. 1106] Mr. Thomas: Mr. Examiner, may these documents be identified so that I can refer to them by number when I ask Mr. Heineman about them.

Exam. Albus: The press release of Sunday, May 9, 1954, is marked for identification Exhibit H-24, and the other one H-25 for identification.

(Applicant's Exhibits H-24 and H-25, Witness Heineman were respectively marked for identification.)

The Witness: I might say, in connection with my conversation with Lynn White, we did not place that as to time and place. So that there could be no misconception as to the conversation to which I have been testifying, that conversation took place at my request in the offices of the Nickel Plate in Cleveland sometime in the early summer of 1955, and both Mr. Hales, President of the Company, and Mr. White were present and I was alone.

By Mr. Thomas:

Q. I asked you earlier if it wasn't on or about July 8.

A. No, you asked me if Mr. Devines and I had had a meeting with them about that time. My answer then was no and still is no.

Q. Mr. Devines was not present?

A. No, sir. I was alone.

Q. Will you examine Exhibit H-24, Mr. Heineman, and tell me if that wasn't a press release that was issued by [fol. 1107] your group during the proxy fight for control of the M&StL.

A. I am sure it was.

Q. Will you take a look at Exhibit H-25 and tell me whether that was not a proxy solicitation letter in connection with that M&StL proxy fight.

A. The only thing I am not clear about, sir, the way it is presented here, and I would have to compare it, and if you tell me, I will accept it, is whether this could be a galley proof; this letter went through a number of preliminary drafts.

eral occasions I was asked whether or not I would participate in discussions with respect to certain policy, this is in the summer of '55, and I said I would not. I was invited to proceed over the road on an inspection trip with the directors and I refused. That was in July of '55.

In the fall of '55 Mr. Livingston asked me to meet with him. I believe Mr. Arthur Leonard was there. We had two meetings, at least. We discussed the problem of the expiration of the voting trust. He expressed concern that a vacuum would exist. He said that he, his board of directors, wished him to get off the board of directors of the Monon, and he said there were a number of persons on the board of the Monon who were on there solely because of him, and that when he got off—and he said he had to get off—I urged him to stay as chairman—I believe he was either chairman of the executive committee, and Arthur Leonard is the other—I urged him to stay. He said his board required him to get off. He asked me if I would sit [fol. 1085] down and work out a slate with him because he was fearful that there would be a vacuum and that if we did not participate, and he expressed some concern, because up to that point I had not been willing to participate, that there would be a vacuum which could be harmful to the Monon. I said I would think about it, and I did think about it. We had one or two other meetings, and to the best of my knowledge I never proposed a director. I did ask him, and he and I discussed whether there was any—and he discussed with counsel—whether there would be any possibility of my going on both boards, and we concluded with very little difficulty that the Commission would not agree to that, and accordingly that was the only conversation, and to the best of my knowledge I never proposed a nominee although requested to, or really discussed the board.

Q. Do you know a Mr. Shaskan of New York?

A. No, sir.

Q. Didn't you tell Mr. Livingston that you would work with Mr. Shaskan in helping pick out a slate of directors for the Monon?

A. No, sir.

Q. To whom was the Monon stock held, that is, who is the beneficial owner today, as far as you know?

Q. This was obtained from the files of the SEC in Chicago.

A. If you tell me that, this is certainly a copy of it.

OFFERS IN EVIDENCE

Mr. Thomas: May I offer Exhibits H-24 and H-25.

Mr. Wheeler: Mr. Examiner, we object to them as being irrelevant to any issue in this proceeding.

Exam. Albus: The objection is overruled.

The record will show that the exhibits marked for identification H-24 and H-25 are received.

(Applicant's Exhibits Nos. H-24 and H-25, Witness Heineman, were received in evidence.)

Mr. Thomas: That completes my cross-examination.

Exam. Albus: Mr. Lucas.

Cross examination.

By Mr. Lucas:

Q. Mr. Heineman, will you turn to page 27 of your prepared statement, please.

A. Yes, sir.

[fol. 1108] Q. I wish to direct your attention to your conversation with Mr. Kelley of the Hanover Bank.

A. Wait just one second, please. Did you say 25, sir?

Exam. Albus: 27.

Mr. Lucas: Yes.

By Mr. Lucas:

Q. 27.

Exam. Albus: The second paragraph.

A. Yes, sir.

By Mr. Lucas:

Q. I notice that you stated that your offer was subject to immediate acceptance, is that correct?

A. I don't have the faintest idea. As I testified, they were sold to strangers. I can tell you who the purchasers were with whom I dealt, and I will be happy to tell you any conversations I had about it, but as to the beneficial owner-
[fol. 1086] ships, I haven't the faintest idea.

Q. Did you see a story in the Chicago Tribune on December 2nd which stated the buying group was headed by Shaskan & Co.?

A. I saw that story and I also saw that it quoted me. The story was inaccurate and the quotation was inaccurate. It was not bought by Shaskan & Company and a public denial was put over Dow Jones wires within a very few minutes after it came out.

Q. Is Mr. Florsheimer the beneficial owner of that stock now?

A. I don't know. Mr. Florsheimer is a brother of Sutro Bros., a New York exchange house. Sutro Bros. was the purchaser of most of that stock. Mr. Walter Florsheimer called me. I never met the man, wouldn't know him if he walked in the room, after the stock was purchased and said that Sutro had bought it for their own account. That is absolutely the extent of my information. I haven't the faintest idea at all whether it was true except that I don't have any reason to doubt the man's word. I don't know what he has done with it since.

Q. Do I understand that in buying and selling this Monon stock you and your associates have acted collectively, that is, as a group?

A. Yes, sir.

Q. Did you write a letter to someone connected with the Monon demanding that the staggered system of electing directors be abolished?

[fol. 1087] A. I would have to check the letter. I remember the letter and I remember what you are directing yourself to and I will be glad to give you my best recollection subject to correction after looking at the letter.

Q. Go ahead.

Exam. Albus: That might save time.

Mr. Wheeler: Do you have the letter with you?

Mr. Thomas: No, I don't have it.

The Witness: I am afraid it is in Chicago, but I can have it mailed down here. The problem of the expiration of the voting trust is a very substantial one. We owned "A" stock. There was a very large group of "B" stockholders who were in no sense connected with me.

Mr. Wheeler: Mr. Heineman, you said you owned "A" stock.

The Witness: I mean voting stock trust certificates. We had no stock at any time. They came out to see me and were incensed over the fact that very recently the voting trustees, without notice to the voting trust certificate holders, had amended the articles of incorporation to provide a staggered system. It was a small board, and under the articles the "B" stock could only elect—there were eleven—the "B" stock could only elect three and the "A" stock eight, and the "B" stockholders felt that with a staggered board, and it was staggered for four years, that is—let me see, three for three years and two to make up the eleven in a fourth year, and they felt that this was a deliberate [fol. 1088] effort to keep them from getting any representation on the board and they felt furthermore that it was a real breach of the voting trust agreement as approved by the Commission and the court, because it was provided there that it should expire at the end of 10 years and be returned to the shareholders, and they felt that for the existing voting trustees to stretch it out for another four years was, if not a breach as a matter of law, it was a breach of the spirit of the voting trustees. I communicated that point of view, and I did not communicate it, now that you mentioned the matter—well, I don't remember whether I wrote it to Warren Brown, President, or whether I wrote it to Homer Livingston. I have forgotten—but I communicated that point of view and said I thought there was a great deal in it, the voting trustees then, Mr. Leonard, Mr. Livingston, Mr. Barringer, eliminated the articles to eliminate the staggered board.

Exam. Albus: Does that complete the answer?

The Witness: Yes, sir.

Exam. Albus: We will take a recess until 2 o'clock.

(Whereupon, at 12:35 o'clock, p.m., February 8, 1956, the hearing was recessed until 2 o'clock, p.m. of the same day.)

[fol. 1089] AFTERNOON SESSION 2:00 p.m.

Exam. Albus: The hearing will please come to order.

Before we continue with the cross-examination of Mr. Heineman I understand he has a correction to make in his testimony.

The Witness: Thank you, sir.

Exam. Albus: Yes, sir.

The Witness: Mr. Thomas asked me if at the time of the expiration of our order of May 5, which offer expired on May 26, had I called a press conference, or had issued a press release. I stated that I had not called a press conference and that I had issued no release. My answer as to the first portion of the question stands, I called no press conference.

I have examined my original files over the lunch hour and found that I issued a release as follows: "For release at 5 o'clock p.m. Thursday, May 26, 1955, Mr. Ben W. Heineman, Chairman of the Executive Committee of the Minneapolis & St. Louis Railway Company today announced that on May 5, 1955, on behalf of the M. & St. L. he offered to buy the 82 per cent of the capital stock of the Toledo, Peoria Railroad Company held by the trustees of the estate of George P. McNear, Jr. for a purchase price of $9,840,000. The offer also stated that upon acceptance by the trustees the M. & St. L. was prepared to purchase the remaining 18 per cent of the capital stock upon the same basis. This would have resulted in an aggregate purchase price of $12,000,000 for 100 per cent of the capital stock of the [fol. 1090] T. P. & W. The offer of May 5 was extended to expire at the close of business today. The trustees of the estate of George P. McNear, Jr. have not accepted the offer and accordingly it has expired by its terms. No negotiations are now pending."

That is the end of the release. Thank you, sir.

Exam. Albus: You are very welcome.

The Witness: Also Mr. Thomas asked for Henry DeMeester's stockholdings. Mr. DeMeester has informed the M. & St. L. in connection with the proposed proxy.

regular routine proxy solicitation for its annual meeting that he holds 3,400 shares of the capital stock.

The other material, Mr Thomas, that you asked for is being prepared.

Cross examination (continued).

By Mr. Thomas:

Q. Do you also want the change your statement that you told Grier Patterson that you were going to hold a press conference or hold—

A. (Interrupting) You withdrew that question? I asked you which question you were asking me and you withdrew that question, sir, so I never answered it.

Q. Would you answer it now?

A. Yes. I did tell Mr. Grier Patterson that we were going to prepare alternative press releases. I have a copy of the alternative here also. And that we would either at 5 o'clock [fol. 1091] issue a release that we had entered into a contract or we would issue a release that we had not.

Q. Thank you.

A. And the alternative is also here.

Q. Is Mr. George E. Barnes associated with you in the M. & St. L.?

A. No, sir.

Q. Is he a partner of Wayne Hummer & Co.?

A. Mr. George E. Barnes is a partner in Wayne Hummer & Co. and a chairman of the Midwest Stock Exchange. He is a member of the board of the 4-Wheel Autodrive Co. of which I have the honor to be the chairman.

Q. He wasn't associated with you in the Monon deal?

A. I thought you said M. & St. L.

Q. I am just asking.

A. The answer is no in either event.

Q. Thank you. Do you know Harold Smith?

A. Yes, sir.

Q. Is he a director of the Monon?

A. Yes, sir.

Q. Was he a director of the Monon last year?

A. Yes, sir.

Q. Does he hold another position with the Monon? Isn't he general counsel?

A. I think that Mr. Smith, that Harold Smith, is execu- [fol. 1092] tive vice-president of the Monon, and I believe that his office, and presumably he, are general counsel. I think his official title is executive vice-president, and I think he is a member of their executive committee and a member of the Board of Directors.

Q. Wasn't he counsel for the Monon? Didn't he hold a position as counsel for the Monon during the past year, up until you—

A. (Interrupting) Are you distinguishing between him and his firm?

Q. No. Perhaps I should say this, does he or do he and members of his firm hold positions as counsel for the Monon?

A. I am sure they do, yes, sir.

Q. Did you tell Mr. Harold Smith last year that he was discharged as counsel for the Monon and removed from the board?

A. Well, I'd have to answer that question, no, but if you will like, I will tell you the story which in general conforms to what you want to know, I think. I told Mr. Harold Smith when he called me and asked me to participate in policy matters with respect to the Monon that his partner, Grier Patterson, who had the office next door to him, had broken his pledged word to me in connection with the M. & St. L., and I said that I did a great deal of business on the spoken word and that I expected to keep my word and that I was at a disadvantage if I dealt with people who didn't keep theirs, and that as far as I was concerned I would not engage as attorneys at any time attorneys in whose integrity and word I did not have confidence, and that following the M. & St. L. [fol. 1093] transaction I had no further confidence in the word or integrity of that office, and that I proposed, assuming that we did come into control, which we did not then have, to engage other counsel in Chicago in whose word I had confidence, yes, sir.

Q. And you told him that you would see to it that if you should come into control he would go off the board?

A. I have stated my exact recollection of the conversation.

Q. Did you talk about that with Homer Livingston?

A. I did, indeed, and to precisely the same effect that I have stated here, except perhaps in greater detail.

Q. Did you and Mr. Devines meet with Mr. Lynnwhite and Mr. Hales of the Nickel-Plate on or about June 8, 1955?

A. I don't recall the date. I remember that it was in the early summer—no, wait a minute. No, sir.

Q. You did not meet with him?

A. No, sir, not if I apprehend your question.

Would you read that again?

(Question read)

A. No, sir.

By Mr. Thomas:

Q. Did you meet with Mr. Lynnwhite at any time to discuss the M. & St. L. situation?

A. By you you mean whom?

Q. Pardon?

A. By you you mean who, me?

[fol. 1094] Q. Yes.

A. Yes, sir.

Q. Did you tell Mr. Lynnwhite that you thought your group could elect at least four directors of the Monon after the voting trust expired?

A. I find that inconceivable because it was always my notion that after the voting trust expired we could elect eight directors, and I would never have had any occasion to say that we could elect four.

Q. Did you head a group which obtained an option to buy 90,000 shares or about 43 per cent interest in the Wisconsin Central last August?

A. No, sir.

Q. Were you associated with such a group?

A. No, sir.

Q. Did you make any statements at any time about such a group?

A. No, sir.

Q. Did you know that there was such an option?

A. Yes, sir. Mr. Thomas, I don't want to stand on technicalities of your question; if you want me, I would much

rather just not hold you to your questions. Your questions don't call for the answer you are seeking. I will be glad to tell you about it, if you wish me to.

Q. Let me ask you this question: did you discuss the Wisconsin Central option in your speech before the New York Society for Security Analysts on September 9, last year?

A. There and elsewhere.

[fol. 1095] Q. Was that option taken out in the name of the M. & St. L.?

A. It was taken in my name with a view of having it examined by the M. & St. L. officials to determine whether or not it would be in the interest of the M. & St. L. to acquire it. The M. & St. L. examined it. We concluded that it was highly competitive in certain areas with the M. & St. L. and accordingly let it lapse. I have consideration to acquiring the option personally with friends, and concluded against it, as I advised the board of the M. & St. L. because of my conviction that if we did acquire it and it turned out very well, some shareholder of the M. & St. L. in the future might complain and say that we should have taken it for the benefit of the M. & St. L., and that if we took it and it didn't turn out well, the loss would be ours, and rather than put myself in any such kind of a position, after officials of the M. & St. L. examined the situation to determine whether or not it was to the advantage of the M. & St. L. to buy it, I permitted the option to lapse.

Q. Has the M. & St. L. entered into an agreement to purchase the outstanding capital stock of the Minnesota Western Railway?

A. It has, sir, subject to the approval of the Commission, of course.

Q. What is the price to be paid for the stock?

A. Well, the price is calculated on two bases which comes out to the same thing. I would say that the price is net [fol. 1096] $306,000 net to the M. & St. L. plus to be adjusted by either earnings or losses subsequent to October 31, 1955.

Q. Is that purchase to be accomplished with cash?

A. That purchase is to be accomplished with cash.

Q. By the M. & St. L.?

A. By the M. & St. L., subject to the approval of the Interstate Commerce Commission.

[fol. 1097] Q. We have to go to the newspapers again, Mr. Heineman.

A. I think you can find a better source of information

Q. Let's see if there is any of this information that is correct.

A. All right.

Q. Are you associated with a group of people who are interested in the Northwestern Railroad?

A. Yes, sir.

Q. Do you own any stock in it?

A. I own some stock.

Q. How much?

A. Approximately 5,500 shares of common stock.

Q. Are any of the group, investors group, with which you were associated in the proxy fight involving M&StL. associated with you in this transaction?

A. One man.

Q. Mr. Lyons?

A. Yes, Frank Lyons.

Q. How many shares of the North Western stock does he hold?

A. He has informed me—I have no personal knowledge of this, except to say that I believe him—he has informed me that he owns or controls, and I am not clear whether that is through his immediate family or elsewhere, some 60,000 shares, of which 54,000 shares are common, he informed me, and 5,000 preferred. I guess it was 59,000.

[fol. 1098] Q. How much stock of the North Western is held by the group of which you were a spokesman in that transaction or in that situation?

A. As of 10:30 this morning approximately 485,000 shares.

Q. Who are the other persons or companies that are involved in that group with you?

A. I will tell you with one exception. Other than to say that with the exception of Mr. Lyons, none of them, so far as I know, have any interest in the Minneapolis and St. Louis Railway. I'd like to make that point.

Now, Mayer Stewarts & Company, an investment banking house and brokers in New York have acquired for its

partnership account for the account of its partners and for two or three customers, I am informed, 133,000 shares of common and preferred. I am not certain of the proportions.

Incorporated Investors of Boston, a large investment trust, has purchased 50,000 shares, and certain other persons whom I would prefer not to name unless it is regarded as germane to this proceeding, and not for any reasons having to do with this transaction, that is, a TP&W transaction, acquired another 50,000 shares.

Q. Is this other person connected with any other railroads, own any stock in any other railroads?

A. One of them has a certain amount—you didn't understand me to say that one person had acquired 50,000 shares, did you?

[fol 1099] Q. I misunderstood you.

A. No. The one person who has other interests in railroads has acquired 10,000 shares of this 50,000 shares.

Q. Are you negotiating for the purchase of additional stock in the Northwestern?

A. We are seeking to buy additional stock, yes, sir.

Q. When you spoke before the Security and Allies in New York last September did you state that the M&StL directors had discussed buying stock control of the Northwestern?

A. No, sir. That was a misquote which went out over the A.P. wire and which was widely circulated. I did not say that. I said that persons associated with me had considered it. They construed that to mean the M&StL and the directors and sent that out. It was all over the country and there was no point in even attempting to correct it. I was going to explain why the reporter made a mistake, why it caused them to make the mistake but I am not sure that is important, although I think perhaps I had better.

What I did say was that one of the reasons that we had, and I had refused to enter into it at that time was because I felt that it would take away too much time from my personal efforts at the M&StL.

Q. That was where they misinterpreted it?

A. He got off on that.

Q. Going back to the sale of that Monon stock, did the [fol. 1100] group that you referred to in that transaction make a profit on the sale?

A. Yes, sir.

Q. Have you communicated with officers or directors of the Northwestern recently?

A. Yes, sir.

Q. Did you talk with Mr. Wells?

A. I met with Mr. Wells and Mr. Goodman. Mr. Wells is chairman of the Finance Committee of the Chicago and Northwestern Railroad. Mr. Goodman is the executive vice-president and the acting chief executive officer.

Q. Have you written a letter recently to the members of the Northwestern Board?

A. I wrote a letter dated January 30 to Mr. Wells and sent copies to members of the board of directors.

Q. Did you ask in that letter that you would like to reach some understanding about a slate of directors for the Northwestern?

A. I did, indeed.

Q. Did you make any reference to the staggered system of electing directors?

A. I did indeed.

Q. Did you suggest that that be changed?

A. I did, indeed.

Q. Did you indicate that you thought your group would [fol. 1101] be able to elect a majority of the directors at the next meeting of the stockholders?

A. I didn't say that, sir, what I did say was that I felt that the people whom I represented in that connection would have a majority of the shareholders attending the meeting—well, I think it is certainly a fair implication from the letter that I also meant or said—that I meant what you asked me, yes, sir.

Q. Did you or anyone on the Northwestern have anything to say about a possible proxy fight for control of the Northwestern?

A. I said we didn't want one.

Q. Did you indicate that there would be one if you weren't satisfied with your discussions?

A. It takes two to make a fight, sir. What I did say to them was that if we could not reach an agreement I proposed to make certain recommendations to the Board of Directors—

Q. I beg—I am terribly sorry.

A. (Continuing) —that I proposed to make certain recommendations to the shareholders. Whether or not that would produce a proxy fight would be a matter that I have no information on.

Q. Did you suggest that if the Northwestern directors spent money for a proxy fight you might hold them personally responsible?

A. I said what I believe, which is that where there has been no examination of the matters of principle to determine whether there is any difference in principle between [fol. 1102] the management and large shareholders that I regarded it as legally and morally indefensible for a majority, I mean for a board of directors to precipitate a proxy fight against their larger shareholders in order to perpetuate themselves on a board of directors, and I added particularly when they had no investment of any particular kind in the company. That is what I said and it is what I believe.

Q. Are you meeting with Mr. Wells and some of the other directors tomorrow?

A. I do not know if Mr. Wells will be present. Mr. Wells was in Florida. I am—because of the exigencies of this proceeding, which I might add are far more important to me and the M&StL than that matter, I am going to remain there, and I do go there it would be in the evening to return the very first thing on Friday morning, and I don't know who the board will designate to meet with them.

Q. Mr. Heineman, let's refer to your direct testimony. You stated that by any formula the M&StL is a heavy ownership property, owning 3,644 cars as of December 31, 1955.

A. Well, I interpolated in there, in the testimony that I gave by any formula known to me. I wasn't trying to cut it down by the formula with which I was familiar and upon which I was basing my belief was that there is gen-

eral agreement that if a railroad owns and operates more cars than are ever on its line on any one day in an operating year that it is fulfilling its obligations as a car [fol. 1103] rier. Now, that was the formula. My written prepared statement was too broad and in putting it in the record I altered it by amending to say any formula known to me. I am sure there are many formulas I don't know anything about.

Q. Are you familiar with the recommendations of the A.A.R. about car ownership?

A. I have discussed them with Mr. Devins of the M&StL. who will testify and he has assured me that we meet those. I am not personally, intimately familiar with them. He will testify, however, immediately following me.

Q. Has the M&StL. purchased any cars since you acquired, your group acquired, control other than the 50 covered hoppers that have been referred to in the paper?

A. We regard those 50 covered hoppers as quite important. We have shippers of cement industry in Mason City who have been asking us to buy covered hoppers for them. There is a covered hopper shortage. The answer is in addition to that, yes—I am not quite clear which way, there was one block of 40 covered hoppers that we bought last May and announced to the shippers in Mason City at a directors meeting that we held in Mason City so that we could all get to know the shippers there. In addition to that we have bought an additional 50 covered hoppers partly for our Mason City shippers and partly for the Des Moines car pool, covered hopper pool, on which [fol. 1104] we expect to get delivery, we have been promised delivery, I believe, on April in time for the cement shipping season, so that my answer to you is yes, 90 covered hoppers, and I might say yes all the recommendations that the operating management have made have been carried out.

Q. Are those purchases financed by equipment obligations?

A. Yes, sir.

Q. When you talked with Mr. White of the Nickel Plate last year did you discuss your plans for the TP&W if you were able to buy it?

A. I do not believe so, sir.

Q Did you tell him that you would move the head quarters from Peoria to Minneapolis?

A. I don't believe I did because that was not the subject of our conversation, but I might say that I will testify on that and there is extensive testimony prepared in any event, as to what our plans are.

Q. I am asking you about the conversation.

A. I don't recall it. It may have taken place.

Q. Would you say that you propose to take up part of the west end of the TP&W—

A. (Interrupting) No, sir.

Q. I haven't finished my question.

A. The answer is no, sir, as far as you have gone.

Exam. Albus: Let's finish the question.

By Mr. Thomas:

Q. (Continuing) —and to effect various economies which [fol. 1105] by this and other means would cut expenses by about $200,000 a year?

A. That is a double question, Mr. Thomas, so you will have to break it up for me to answer it intelligently.

I haven't told him nor did I tell anyone at any time that we propose to take up the west end of the property. We have never proposed to take it up and we think it would be contrary to our best interests.

With respect to the second part of the question, with reference to economies I have no independent recollection of having told Mr. Linnwhite anything at all about the economies we propose. That is not to say that I may not have done so because I have discussed this with a great many people, and I might say that your statement of the economies is a gross understatement of the economies that we believe would result from unification.

Q. That wasn't my statement, Mr. Heineman. I asked you.

A. I don't think it was mine.

Mr. Thomas: I have some material here I want to have marked as an exhibit and I want to have Mr. Heineman

A. Yes, sir, that is my recollection of it.

Q. And a little further down on the page you say that you pointed out that since the 15 per cent did not constitute control or anything like it, you would be able legally to close the transaction at once if he wished to do so, is that correct?

A. I am sure that is what I said to him.

Q. What did you consider to be control of a railroad corporation?

A. Control, sir, cannot be determined by any particular number of shares or percentage. In this particular case rather than enter into any philosophy, I would like to confine myself to the case about which I testified—

Q. That is right.

A. There was an outstanding block of 82 per cent in one hand, in addition to which two large carriers had agreed to buy 52 per cent, or more than a majority. It was then [fol. 1109] my opinion, and I have had no occasion to change it, that under the circumstances of that case 15 per cent could not possibly constitute control.

Q. What if the stock of a railroad corporation were widely scattered, then what would you say as to what constitutes control?

A. That was not the circumstance with which I was faced, and I had no occasion to consider it.

Q. Would you care to answer my question?

A. I have, sir.

Mr. Wheeler: Mr. Examiner, I think this is getting pretty remote to any issue.

Exam. Albus: I do, too. I think he has answered the question, he hasn't considered the matter.

The Witness: I had not at that time.

Mr. Lucas: Mr. Examiner, he is trying to hold his answer down to this particular transaction, this distribution of stock. I am asking him where stock may be otherwise distributed than the percentages here what he considers to be control.

Exam. Albus: What is your opinion on that, Mr. Heineman?

The Witness: Very well, sir.

A. I think the only answer that I can make to you, sir, is that no one can tell that answer until such time as the matter is put to test in a contest. I think plainly that if stock is widely scattered, that so that one may appeal to wide numbers of shareholders on the basis of principles [fol. 1110] which one might should be attractive to them, that then with support from them and others a lesser block than 51 per cent might have a controlling effect. If there are opposing large blocks or if your principles do not appeal to shareholders and what you propose to do is not appealing, then a very substantial block may not be controlling, and there have been very, very good evideaces of that in recent years. The question really is, as a practical matter in each particular case, when the matter is put to a test.

Exam. Albus: And I want to state on the record there is a question for the Commission to determine as to what constitutes control.

Mr. Lucas: I entirely agree with you, Mr. Examiner. I don't disagree with the answer of the witness.

Exam. Albus: All right. Let's have the next question.

By Mr. Lucas:

Q. Mr. Thomas, what I am not clear on is this, and mayb you can state very briefly how many shares of stock you hold in the M&StL.

A. I personally, no, he did not ask me. Ninety-two hun dred shares.

Q. Do you hold any stock additional to that in which you have a beneficial interest?

A. No, I have always answered all questions about ownership in terms of both—I have answered all questions asked me in terms of the beneficial interest regardless of the record holding.

[fol. 1111] Q. So that 9,200 shares of the M&StL is the total stock in which you have an interest direct or indirect?

A. That is correct, sir.

Q. Is that the maximum amount that you have held of that stock at any one time?

A. Yes, sir.

Q. Will you turn to your applicat on, please, the application of the M&StL.

A. Yes, sir.

Q. And look at the directors who are named there. Will you identify the ones that were your group of directors that were elected as a result of your proxy fight in the M&StL.

A. They were all elected as a result of our vote.

Q. All right. Now—

A. (Interrupting) No, I am not quibbling with you, sir. I want to make a real point.

Q. All right.

A. There were 11 vacancies to be filled. We ran a slate of 7 and I will identify those for you.

Q. That is what I want.

A. However, in casting the final ballot, we also cast it for the four directors on our opponents' slate whom we wished to continue in office, and the cumulative effect of their proxy plus ours also elected them.

Q. I understand that from your direct testimony. Now, [fol. 1112] will you give me the answer to my question—

A. Yes, sir.

Q. (Continuing) —the slate that you were prepared to present in the proxy fight.

A. Arthur Bowes, Henry DeMeester, William E. Fay although I should say with reference to Mr. Devins who was then president, that we had announced that, if elected, we intended to continue Mr. Devins, and under Minnesota law the president is required to be a director, so that Mr. Devins could truly have been said to be a member of both slates—William Fay, Ben Heineman, Franklin Lyons, Joseph Nye, Jouett Shouse.

Q. Now, of those seven you referred to, being chairman of the board of the Four-Wheel Drive Auto Company—

A. Yes, sir?

Q. (Continuing) —of those seven, how many are connected with you in that company?

A. Arthur Bowes is a member of the board of directors. I take it, your question is also directed to Mr. Lyons, although it wouldn't quite cover it. Mr. Lyons is not on

the board, not on the executive committee, but he is a large shareholder.

Q. A larger shareholder?

A. Yes, sir.

Q. Is he a director?

A. No, sir.

[fol. 1113] Q. You identified Mr. Wagner in response to some questions of Mr. Thomas as a participant in the Four-Wheel Drive Auto Company.

A. Well, I don't remember whether I did, but he is.

Q. Where is the headquarters of that company, please?

A. Clintonville, Wisconsin.

Q. What was the maximum number of shares that you and your friends or associates had at any one time in the Monon?

A. Approximately ninety thousand shares—well, approximately 90,000 voting trust certificates.

Q. At any time did you get the Commission's approval to hold collectively that number of shares of the Monon stock?

A. You didn't apprehend my answer, sir. I said voting trust certificates. We acquired the stock in January of 1955.

Mr. Wheeler: Just a moment, please. You used the word "stock" again.

The Witness: Well, the voting trust certificates.

Exam. Albus: I think we all understand what is involved in Monon.

The Witness: The voting trust expired January 10.

By Mr. Lucas:

Q. Whatever the number of shares were, did you get at any time Commission approval?

A. No, sir.

Mr. Wheeler: Mr. Examiner, I would like to ask counsel, in view of these questions, and I'd like to have the questions [fol. 1114] withdrawn unless he is prepared to show on the record by subsequent testimony that Commission approval is required to hold the voting trust certificates of

the Monon or any other railroad which is operating under a voting trust.

Exam. Albus: The record may stand the way it is.

By Mr. Lucas:

Q. Mr. Heineman, were you ever interviewed by a Miss Nancy Ford in connection with an article that appeared in the Modern Railroad, September 1955, entitled "The M&StL and Ben W. Heineman"?

A. I was, sir.

Q. Now, I don't want to get into a question of whether you said something or not, but in this article I am going to read something to you and I quote from it, "and it meets" —speaking of, it means the M&StL—wait a minute—I am going to have to go back further. "The TP&W"—"buy it" is the predicate of that—"meets M&StL at Peoria. By building a short line between TP&W's eastern terminus, Effner, Indiana, and Reynolds, Indiana, or some other point on the Monon, Mr. Heineman would have had a vast northwest-southeast route through the Peoria and Louisville gateways"—that closes the quotations from her article. She does not include any within quotes, but did she discuss that concept or that thought with you in connection with that article?

A. She discussed with me my views with reference to the M&StL, TP&W, and Monon, and that happens to be an in-[fol. 1115] complete, but so far as it goes, accurate part of my views. But I want to emphasize "incomplete".

Q. At page 16 of your prepared statement—I don't know whether you wish to refer to it or not.

A. Page 16?

Q. Yes. The first full sentence, the first full paragraph, the last sentence reads: "My thought was that if—as it seemed to me—the trustees were being guilty of a breach of trust, the beneficiaries should perhaps assert themselves." That is the end of the quotation from your prepared text.

A. Yes, sir.

Q. Upon the law of what state were you basing that thought?

A. I was basing my thought on the common law of the law of trusts and I still adhere to it.

Q. What?

A. Common law of the law of trusts. In other words, those principles of fiduciary duties, that so far as I know, are in effect in every state.

Q. Were you as interested in protecting their interest as you were trying to get them to help you with your interest in the matter?

A. Plainly, I regarded it as a case of mutual self-interest.

Q. At page 9 of your prepared statement there is a reference to an offer of June 10, 1954, in the aggregate amount of $6,260,000. That would work out, on the basis of the [fol. 1116] outstanding stock, at about $69.9 per share, would it not?

A. I thought it was 69.5, but my figures may have been wrong.

Q. Maybe your figures may have been wrong?

A. About that. Between fifty-nine and 60 dollars.

Q. On the next page, page 10, September 15, 1954, the offer was an aggregate consideration of $7,250,000. Would that be about $80 per share?

A. Yes, sir.

Q. Were your offers, those two offers, made on a basis of all the stock outstanding?

A. I think I understand you, and the answer—well, let me try to clarify it. These prices were based on 100 per cent, so that to determine what the estate would get, you would have to take these prices and multiply them by 82 per cent, representing their ownership, but if you mean was my offer conditioned on getting the full 100 per cent, the answer is no. I stated that I would make the offer available to all shareholders, but I was perfectly content to have them sell the M&StL the 82 per cent.

Q. In connection with those two particular offers, will you point out where in your testimony you said you would buy any other stock? May I just tell you what I have in mind, so that on each instance you are careful to say, you are careful to use that term 100 per cent. Am I right about that?

A. I made the offer—if there is any misapprehension, [fol. 1117] let me testify that the offers were made on the basis of the trustees' stock because I thought that they

would have an interest in making certain that they didn't sell their stock and leave certain of their beneficiaries who also held shares in the situation. I in each case told them that we would make the same offer to all shareholders so that those beneficiaries of the trust who held stock independently of the trust would have the opportunity to sell if they desired.

Exam. Albus: At the same price?

The Witness: At the same price, on the same terms and conditions. That was my uniform position and in every written offer I made I expressly so stated and in my instructions to my agent, Judge Morris, of which I have the originals here, I also so stated.

By Mr. Lucas:

Q. All right. Now, Mr. Heineman, I come back to page 9, and in the last line of the first full paragraph, doesn't that state on the basis of $6,260,000 for 100 per cent?

A. I was expressing—

Q. (Interrupting) Can't you answer that is what you testified?

A. If that is what is here, I don't have to testify.

Exam. Albus: That is what is there, Mr. Lucas.

Mr. Lucas: I understand, Mr. Examiner.

By Mr. Lucas:

Q. On page 11, at the end of the full paragraph at the top, did you get an acceptance from Mr. Kelley of your offer to buy the 15 per cent of the Hanover Bank stock?

[fol. 1118] A. Yes. I will tell you precisely what he said. He said that he was very grateful that I had come in to see him, that he had heard of my offer to the trustees, that he did not know whether it included him or the Hanover Bank, he said that he would let me know what the views of his executive officers were. I confirmed it in writing on whatever date I said, October 5, and within a matter of several days Mr. Kelley called me back and said that if the trustees sold their stock to me, or rather to the M&StL, that he would be pleased to sell the Hanover Bank

stock at the same price and on the same terms and conditions.

Q. Did you get a firm acceptance of your proposal from Mr. Kelley, I mean other than the way you expressed it just now?

A. Mr. Lucas, I made a conditional offer, conditioned on acceptance of my offer by the trustees. He accepted it in precisely the way I made it, yes, "If the trustees sell, we will sell", that was the only offer he had from me, and I got a firm acceptance from him of the offer that I made, yes, sir.

Q. Did you get a firm acceptance, however, by the Hanover Bank that they would sell you, regardless of any contingencies, the stock that they held of the TP&W?

A. Mr. Lucas, I made—

Mr. Lucas (interrupting): Mr. Examiner, I think that can be answered yes or no.

A. I made no such offer. He couldn't accept an offer [fol. 1119] regardless of any contingencies.

By Mr. Lucas:

Q. You didn't get a firm legal acceptance? You are a lawyer, you know what I mean?

A. I also know there can be no acceptance unless there is an offer.

Exam. Albus: All right, let's keep it quiet.

Mr. Lucas: I beg your pardon.

Exam. Albus: I mean, let's continue.

A. The answer is, I got a firm acceptance of the offer I made, yes, sir.

By Mr. Lucas:

Q. And the same way, that yours was a firm offer?

A. Precisely.

Exam. Albus: Now, gentlemen, you understand each other.

Mr. Lucas: That is all I have, Mr. Examiner.

[fol. 1120] Exam. Albus: Are there any further questions on cross?

Mr. Hoag: I have a few questions.

Exam. Albus: Mr. Hoag, please.

Cross examination.

By Mr. Hoag:

Q. Mr. Heineman, referring to page 34 of your prepared testimony—

A. Yes, sir?

Q. (Continuing) —in regard to the matter of employees.

A. Yes, sir?

Q. You can appreciate the fact that I am vitally concerned as far as employees are concerned?

A. I can, and so are we, sir.

Q. I likewise appreciate the fact that apparently someone else is going to testify after you.

A. About particular jobs and in great detail, sir.

Q. Yes. I would like to have from you now your general thoughts or ideas as to what the M. & St. L. would do, were they to be successful in their application, as far as the elimination of duplicate facilities and things of that nature.

A. And consistent with these policies on employees that I have already testified to?

Q. Yes, sir.

A. Because I want to make clear that anything that we testify on unification must be taken in the light of these policies with reference to employees which are top execu-

[fol. 1121] tive policies made the M. & St. L.

Q. Yes, sir.

A. In general, I would say, sir, that we propose to unify the operations of the T. P. & W. with the M. & St. L. in much the same manner as the operations of the Louisiana and Arkansas are unified with the Kansas City Southern, in terms of a pattern, particularly, and I want to emphasize, as I am sure everybody knows, I am not an operating man, but Mr. Schroeder and Mr. Devins will testify in detail on this, particularly we would expect to unify the two operations, so as to integrate the T. P. & W. into the M. & St. L. operations.

Q. Could you go a little more into detail, and let's say for example your general offices on the T. P. & W.?

A. Yes, Mr. Provo will testify to that, still within the framework of these policies. We have modernized and mechanized the office procedures of the M. & St. L. We believe that the absorbative capacities of the M. & St. L. are very substantial without an increase in cost or any substantial increase in cost. Accordingly it would be our hope that we would unify the accounting and general office operations of the T. P. & W. into the accounting and general office operations of the M. & St. L. In the interest, I might say, of greater efficiency and we believe much greater service to shippers, and so on.

Q. Would that likewise pertain to shop work?

A. Well, for example, the M. & St. L. has a yard in [fol. 1122] Peoria. The T. P. & W. has a yard in east Peoria. We would hope to consolidate those particular yards, probably in east Peoria, and abandon the M. & St. L.'s yard in Peoria proper. I am not sure that that's an answer quite, but I am trying to indicate what we would hope to do in broad principles with the notion that Mr. Schroeder who has a background by jobs could fill in the particular gaps that I am leaving.

Q. That is all I am asking for.

A. Yes, I am trying to outline the principles.

Q. Likewise would there be a change in operations?

A. Yes, sir.

Q. What would be the general nature of those?

A. Running power through, changing timetables for improved and better service, use of gangs northward of the T. P. & W. as the weather improved during the summer mechanization of maintenance both on the T. P. & W. and M. & St. L., floating gangs, trunk gangs, but I would say in general that consistent with the policies which I have stated and which are paramount policies, not paying lip service to those, that those are paramount policies that we would do everything possible to make the M. & St. L. and the T. P. & W. a very efficient road from a unified standpoint.

Q. Should your application be granted, there would likewise be upon your employees as well as those of the T. P. & W.?

A. We believe, and you will recall, sir, that I testified [fol. 1123] with reference to the attrition, and by attrition I mean not only the normal attrition as death and ages below 65 but I am also speaking with reference to the very substantial number of men of age over 65 on the M. & St. L. I have a conviction, based on our experience at the present time, and the speed, or rather the lack of speed, the manner in which we would put this into effect that the absorbative capacity of the two properties, taking into account the attrition that is described here, the number of employees of over age 65 and the like would be such as to have a minimal, plus the Washington Agreement, but I hope we would go beyond the Washington Agreement, to be honest with you, would have a minimal effect on the M. & St. L.

Mr. Wheeler: On the employees.

A. I mean on the employees of the M. & St. L., or the T. P. & W., because once it were acquired, if the Commission were to give us leave to acquire it, we would regard the employees of both properties as being the responsibility of the M. & St. L. as a unified group. In other words, there wouldn't be any discrimination between the employees.

Q. One last question, Mr. Heineman. In the financial sheet that you submitted this morning—

A. Yes, sir?

Q. (Continuing) —is there any cost reflected in there for the Washington Job Protection?

A. No, sir. Well, in the first place, sir, the financials that [fol. 1124] I submitted—

Q. (Interrupting) Yes?

A. (Continuing) —are actual figures adjusted only for the effects on those accounts that would be affected by the issuance of bonds. Another exhibit is being constructed or has been constructed which will deal pro forma or on a projected basis with the effect of the unification. Now, as to that the Washington Agreement, as such, and Mr. Provo can correct me, has not been included in the calculations, not because we were not aware of it, not because we don't intend to live up to every word of it, but because it becomes extraordinarily difficult to make those computations at this particular time. They depend on the speed with which you

do the unification and a great many other matters, including among other things, the attrition that happens on your own property, which makes the application of the Washington Agreement unnecessary to particular employees that you absorb by virtue of attrition. So that although fully conscious of it that exhibit will be qualified by testimony to the reference that it does not include the Washington Agreement allowance because at this moment we simply don't know quite how to calculate it and frankly we would think that the normal attrition would absorb so many of the employees as to make it relatively small, but it is not, it does not include the Washington Agreement for the reason I say.

Mr. Hoag: That is all I have. Thank you.

[fol. 1125] Exam. Albus: Mr. Cassell?

Mr. Cassell: No questions.

Exam. Albus: Mr. Broker, please.

Mr. Broker: I have a few questions.

[fol. 1126] Cross examination.

By Mr. Broker:

Q. On page 4 of your prepared testimony, Mr. Heineman, you talk about the competition or lack of it between the TP&W and the M&StL.

A. Yes, sir.

Q. Aren't you, in fact, competitive with the TP&W west of Peoria?

A. It is, of course, true that we have important bridge traffic so far as the M&StL is concerned between Peoria and Nemo, which could move Peoria-Lomax and vice versa, of course. There is no question, I take it, as to that traffic, which is vulnerable competitive traffic, that we could lose it if the Santa Fe-Pennsylvania acquired this property, and there will be testimony about that, or that we could solicit traffic from the Lomax-Peoria gateway, from the Lomax-Peoria route in order to take it or try to take it over Nemo-Peoria, so my answer to your question is certainly yes, sir. You happen to think that that is minimal. There are many operating reasons why Lomax is desirable to the M&StL.

including such matters of grade, curvature and other matters, which Mr. Schroder can testify to, and we firmly believe that the Lomax gateway would be very important to the unified operation.

Q. Now, on page 29 of your prepared statement—

A. (Interrupting) 29, sir?

Q. Yes. At approximately the middle of the page, you [fol. 1127] say the M&StL does not compete with the Santa Fe. Don't you, in fact, compete with the Santa to the same extent that the TP&W does?

A. Yes, I think so, although the Santa Fe—let me be sure I understand you. By that you mean that our Nemo gateway or Nemo interchange is short of Chicago?

Q. That is right.

A. And to that extent the Santa Fe short hauls, is that right?

Q. That is precisely it, plus one more thing.

A. Yes?

Q. And this supplements that, bringing in this idea of gateway competition that you have stressed throughout your testimony.

A. Yes. Well, in the case, of course, of the Santa Fe that is really saying the same thing because their gateway we are talking about is Chicago. I would say that the answer is yes, that this perhaps goes too far and that my thought was, at any rate, that when I said we did not compete with the Santa Fe I certainly, what I meant really was, was to the same extent or degree as certain of the other carriers involved here. I meant it was a relatively small competition.

Q. What do you consider as being in the Pennsylvania system, which roads?

A. Well, I think of the Wabash, among their controlled subsidiaries. I think of the Long Island. I think of the various subsidiaries which are shown here and included, [fol. 1128] for example, the Ann Arbor. I mean those are the types of things. I don't think I could pretend to name their subsidiaries.

Q. Would you include the DT&I?

A. Yes, sir, I would.

Exam. Albus: Healy Valley?

The Witness: You are beyond my competence, sir, I don't know.

Exam. Albus: Thank you.

By Mr. Broker:

Q. Do you know of any railroad system in the United States that is as competitive with the TP&W as the Pennsylvania system?

A. Well, from my standpoint, Mr. Broker, and I say this with great respect for the Nickel Plate, which is a very valued connection of ours, I would be at a loss to draw the distinction between the Nickel Plate and the Pennsylvania. I would put them both in the same category, except—I am not being quite accurate, except that the Pennsylvania is much larger, originates much more traffic, influences much more traffic accordingly and presumably exercises in dollars and tons more influence on traffic than the Nickel Plate.

Q. Do you think that size is an important consideration and that influence important considerations in determining competitive relationships?

A. Yes, sir, and being associated with a small railroad I feel that very strongly.

[fol. 1129] Q. So that, in fact, taking all of those things in consideration, size and influence, do you think that the Pennsylvania system is more competitive with the TP&W than the Nickel Plate?

A. In taking all of those into account and not confining myself to the geographical locations of the gateway and traffic solicitation policies as I understand them, my answer would be yes.

Mr. Broker: Thank you.

Exam. Albus: Mr. Davis.

Cross examination.

By Mr. Davis:

Q. Mr. Heineman, you make reference on page 6 of your prepared statement to the Wabash being the Pennsylvania's

owned and controlled subsidiary. Do you use the word "controlled" in that statement in the sense that it is a stock controlled subsidiary?

A. I use it in the sense that the Pennsylvania or Pennsylvania Company, I have forgotten which, used it in connection with its application to the I.C.C. for control of the Wabash.

Mr. Davis: That is all I have. Thank you.

Exam. Albus: Is there any further cross-examination? Mr. Thomas.

Further cross examination.

By Mr. Thomas:

Q. One question, Mr. Heineman, on page 27 of your prepared statement—

[fol. 1130] A. Yes, sir.

Q. (Continuing) —you state that you were informed that the Pennsylvania-Santa Fe had bought all the stock of the TP&W. You understand that that is not correct information, do you not?

Mr. Wheeler: Mr. Examiner, I object to a question of that kind. I think he should ask him a direct question.

Mr. Thomas: May I begin?

By Mr. Thomas:

Q. Are you familiar with the fact that, as Mr. Wheeler has been doing in all of his cross-examination.

Exam. Albus: That is true.

By Mr. Thomas:

Q. Are you familiar with the fact that that is not a correct statement?

A. Yes, sir. I was testifying to what I was informed and I thought the record was amply clear on what happened.

Q. You weren't informed by a representative of the trustees in any official capacity, were you?

A. No, sir.

Mr. Wheeler: Pardon me.

A. No, sir.

Exam. Albus: Let the answer stand.
Next question, please.
Mr. Thomas: That is all.
Mr. Lucas: Mr. Examiner, I would like to ask a question.
Exam. Albus: Mr. Lucas, please.

[fol. 1131] Further cross examination.

By Mr. Lucas:

Q. Mr. Heineman, are you taking the position that the TP&W as in its present status is inefficiently operated?
A. Oh, of course not.
Q. I didn't catch the answer.
A. Of course not.
Q. You consider that Mr. Coulter is operating the property and conducting the affairs of the TP&W in a good businesslike manner?
A. Better than good businesslike manner.
Q. Would you consider that he has a better basis for appraisal of the traffic competition of the TP&W than you do?
A. If I were to choose between Mr. Coulter's judgment and my own I would choose Mr. Coulter's, and I was asked for my own and by that I mean I would still have to give my own judgment and opinion. If it is mistaken, it is mistaken, but I was asked for my opinion.

Mr. Lucas: That is all.
Exam. Albus: Is there any further cross-examination?
Mr. Begley: In behalf of the State of Illinois my appearance is on—
The Witness (Interrupting): May I interrupt a second?
Exam. Albus: One minute, please.
The Witness: I would like to say this, I say this with [fol. 1132] the greatest deference of Russel Coulter for whose judgment I have the highest respect, that in certain areas, which are very understandable, his opinions have changed somewhat since May 26 from what they were before.
Exam. Albus: Now, sir.

Cross examination.

By Mr. Begley:

Q. Mr. Heineman, do I understand on page 46 of your direct testimony that Mr. Devins, whom I understand is president of the M&StL, stated to you that there were definite train operation abandonments from the abandonment of the western end of the TP&W?

A. At that time what I said was that we discussed them. Now, I will be glad to tell you what he said, if you wish.

Q. Yes, I would like to know what Mr. Devins had to say.

A. If I could refer to Exhibit 19. What he said was that we are a light density railroad, that it might be possible that he was speaking at the time without study to have the same carriage of traffic over the M&StL between Peoria and Nemo that we now have plus the carriage from Peoria to Lomax over the M&StL to Nemo where it would be delivered to the Santa Fe and that that would provide considerable additional density on this segment (indicating) and safe train miles in the event we acquired the property. I want to emphasize that that was a discussion between two officials of a railroad considering the acquisition of another, and we have tried to consider all possibilities, and [fol. 1133] we have discussed many that haven't been brought out here. I say that openly. But I have testified to what our final policy is after full consideration.

Q. You testified, I believe, as to policy of not abandoning it. But has there been anything changed since May, I think is when you said you talked to Mr. Devins about this, in the physical characteristics of the operation that would cause any change?

A. Yes, sir—well, not change, but additional factors that we were not taking into account in that preliminary discussion.

The M&StL has a 2.2 per cent grade out of its Peoria yard. That is a very substantial grade. It has been a matter of concern to the M&StL and for a great many years, and I ought to say that there were people who will testify from the M&StL that can testify technically much better than I can on this.

Now, the grade, as I understand it, westbound, and indeed eastbound, on the TP&W, the controlling grade is substantially, substantially less than that 2.2 per cent grade, and moreover we have certain curvature problems which are not present on the west end, and with respect to it I personally are not too familiar from an operating standpoint, so that after studying it, after inspecting the property, after considering it from a train operations standpoint, service, and all the elements that enter into such, public relations, all the elements that enter into it, traffic solicitation, we are all [fol. 1134] convinced that not only do we have no policy to abandon it, but that it would be contrary to the best interests of the unified system to abandon it.

Q. When you say "we"—

A. (Interrupting) I am talking about officials of the M&StL.

Q. And, of course, I take it that they are subject to the same mortality that you said God forbid to Mr. Coulter?

A. We all are. Pardon me?

Q. I think you said Mr. Coulter is a mortal like all of us and he may die?

A. The corollary of that is that we are all mortal.

Mr. Begley: That is all.

Exam. Albus: Are there any further questions?

Mr. Broker: Yes, sir, I have another question to ask in response to what Mr. Lucas said.

Further cross examination.

By Mr. Broker:

Q. When Mr. Coulter gave his opinion he spoke about the Pennsylvania Railroad, didn't he?

A. I am sorry, Mr. Broker, I don't know which opinion you are referring to.

Q. Let's put it this way, your opinion is based on the Pennsylvania's system, isn't it?

A. My opinion is based on the Pennsylvania railroad and the Pennsylvania system.

Mr. Broker: Thank you.

[fol. 1135] Exam. Albus: Is there any further cross examination?

(No response.)

Exam. Albus: Is there any redirect?

Mr. Wheeler: Yes, sir.

Exam. Albus: Mr. Wheeler, please.

Mr. Wheeler: First of all, Mr. Examiner, I would like to clear up a point that I failed to do on direct examination. I want to announce that this question is in the nature of direct rather than redirect normally so as not to indicate that I am cutting off cross on this question.

Further direct examination.

By Mr. Wheeler:

Q. Mr. Heineman, did Mr. Coulter indicate to you knowledge on his part prior to May 26, 1955, of the desire of the Santa Fe and the Pennsylvania Railroad to acquire control of the TP&W?

A. Yes, sir.

Exam. Albus: Is that the only direct question you are going to ask?

Mr. Wheeler: Yes, sir.

Exam. Albus: Is there any cross examination on this question?

Mr. Wheeler: Mr. Examiner—

Exam. Albus: I am sorry, Mr. Wheeler. What I was trying to do—

Mr. Wheeler: I understand what you are trying to do. [fol. 1136] I just want to think about this.

Exam. Albus: All right, you take your time and continue with the redirect, then.

[fol. 1137] By Mr. Wheeler:

Q. Can you indicate generally when Mr. Coulter indicated such knowledge on his part to you, that is, prior to May 26, 1955?

A. On a number of occasions and at least around April 15 or 20—well, I can do it better than that. At least, around April 20.

Mr. Wheeler: Now, Mr. Examiner, that concludes this question, the two questions that I wanted to ask, that I should have asked on direct.

Exam. Albus: Is there any cross examination on those two questions?

Mr. Thomas: No, sir.

Mr. Lucas: No, sir.

Exam. Albus: Now we are on redirect.

Redirect examination.

By Mr. Wheeler:

Q. Mr. Heineman, would you clarify for the record the situation with respect to the voting trust certificates of the Monon which you held and in that particular indicate whether or not those certificates had any voting power?

A. At no time that I or any of my associates owned any interest in the Monon did the certificates that we owned have any voting power.

Q. Mr. Heineman, you discussed the question of control of a corporation. Would you please state for the record whether or not control of the proxy machinery by the man-
[fol. 1138] agement is an element in determining control.

A. It is next to ownership, itself, of the securities. It is the second most important element to be taken into account in control situations.

Q. In your opinion, can management continue its control of a corporation as against the holder of a substantial block of securities in a company so long as that substantial block is less than a majority of the outstanding stock of the company?

Mr. Thomas: Isn't this a legal question we are getting into?

Mr. Wheeler: Mr. Examiner, this is merely to clear up a question that was opened on cross examination.

Exam. Albus: The witness may answer.

Mr. Broker: Could we have the question read again, please, Mr. Examiner.

Exam. Albus: Yes.

(The last question was read.)

Mr. Broker: I am going to object, Mr. Examiner.

Exam. Albus: On what grounds?

Mr. Broker: Until this is related to a specific situation.

Exam. Albus: No, it was brought out on cross, the question on cross examination pertaining to what Mr. Heineman had thought constituted control.

Mr. Wheeler: And the questioner, as I recall there, refused to localize it to a particular situation.

Exam. Albus: Let's have an answer, please. The objec-
[fol. 1139] tion is overruled.

The Witness: I am terribly sorry, myself. I really don't have the question.

Exam. Albus: We will take a 10-minute recess.

(Short recess.)

Exam. Albus: The hearing will please come to order. When we started the recess there was a question pending.

Mr. Wheeler: Mr. Examiner, suppose I try to reframe that question.

Exam. Albus: If you will, please, Mr. Wheeler.

By Mr. Wheeler:

Q. Mr. Heineman, what, in your opinion, is the power of management as against the holder or holders of large blocks of stock so long as those blocks are less than 50 per cent of the outstanding stock of the corporation?

A. Well, it is—well, my opinion is that management that controls proxy machinery that represents the status quo is extremely difficult to dislodge, even by relatively large blocks of stock, less than 51 per cent and, even from an objective test, there might be very good reasons for dislodging them.

Q. Mr. Heineman, during your cross examination by Mr. Thomas, I believe, he referred you to—

A. (Interrupting) And I might say, even though the management itself has almost no stock, in other words, the proxy machinery makes that much difference.

[fol. 1140] Q. Mr. Heineman, during the cross examination by Mr. Thomas he referred you to the paragraph at the top of page 27 of your written statement.

A. Yes, sir.

Q. And asked you a question in the light of the testimony heretofore given in this proceeding regarding the contract for the purchase of the TP&W stock from the trustees. I believe your answer was not clear and I should like you to restate your position with respect to that paragraph.

A. Well, this, in this part of the testimony I was trying to give a story of the negotiations, and this was precisely what I was informed. Now, I have never been clear whether the Santa Fe bought for its own account or bought as agent for the Santa Fe and Pennsylvania, and whatever those facts are, I did not intend to deal with those facts in any answer I gave to whoever it was who asked me the question. I was just commenting on this very narrow paragraph here.

Mr. Wheeler: I have no further questions.

Exam. Albus: Is there any recross examination of Mr. Heineman?

Mr. Broker: Just one question in recross examination. If you will recall, I objected to the question and it was reframed just before the recess and I assume my objection still holds even though reframed, is that right?

Exam. Albus: Yes, sir.

[fol. 1141] Recross examination.

By Mr. Broker:

Q. Mr. Heineman, as an additional element involved, if the block of stock which is less than 51 per cent has power to elect by cumulative voting?

A. I thought the question, Mr. Broker, was in terms of control, and I do not quite see how holders at a meeting with less than 51 per cent can elect a majority of the board, even though cumulative voting is permitted.

Q. You were thinking in terms of election of a majority of directors, I take it?

A. I was thinking in terms of control, yes, sir.

Q. Control in the sense that you have a majority of directors?

A. I don't want to get into the Nickel Plate's controversy with the Lackawanna or whatever, I mean, I am not—I was thinking in terms of a majority of the board, yes, sir.

Mr. Broker: Thank you.

Exam. Albus: Are there any further questions?

OFFERS IN EVIDENCE

Mr. Wheeler: Mr. Examiner, before Mr. Heineman leaves the stand, I would like to offer in evidence those documents that have been identified as H-19 through H-23.

Exam. Albus: They are received at this time.

(Applicant's Exhibits Nos. H-19 through H-23, inclusive, Witness Heineman, were received in evidence.)

Exam. Albus: You are excused, Mr. Heineman. Thank you.

(Witness excused.)

[fol. 1142] Mr. Wheeler: I will call Mr. John Devins.

Exam. Albus: Mr. Devins.

JOHN W. DEVINS was sworn and testified as follows:

Direct examination.

By Mr. Wheeler:

Q. Will you please state your full name and address, Mr. Devins?

A. My name is John W. Devins. My address is 111 East Franklin Avenue, Minneapolis.

Mr. Wheeler: Mr. Examiner, in connection with the testimony of Mr. Devins I should like to have marked for identification two documents: the first entitled "The Family Tree of the Minneapolis and St. Louis Railway", which I would like to have marked Exhibit H-26.

Exam. Albus: That will be marked H-26 for identification.

(Applicant's Exhibit H-26, Witness Devins, was marked for identification.)

Mr. Wheeler: The second is entitled "Minneapolis & St. Louis Railway Company Gateway Routing Map, the Peoria Gateway".

Exam. Albus: That may be marked for identification H-27.

(Applicant's Exhibit H-27, Witness Devins, was marked for identification.)

By Mr. Wheeler:

Q. Mr. Devins, do you have a statement to make to the Commission in connection with these proceedings?

A. I have a written statement I would like to read into the record.

[fol. 1143] I am president of The Minneapolis & St. Louis Railway Company. My experience in respect of railway operations extends over a period of 46 years, and includes service with five railroads, being variously occupied in their traffic, mechanical, accounting, transportation and executive departments. The aggregate length of my service with The Minneapolis & St. Louis comprises 41 years, which includes the period between 1923 and 1943 when the railway was operated by a receiver appointed by a United States District Court.

In connection with request for an R. F. C. loan, and on the recommendation of that agency, I was employed during the 1940's by two railroads to make a complete examination of their properties and operations and render a report thereon.

As shown by Exhibit H-26, the present Minneapolis & St. Louis system is the result of bringing together in 1912 the Iowa Central Railway Company of Illinois and The Minneapolis and St. Louis Railway Company (of Minnesota and Iowa). These two lines were conceived and constructed independently of one another—the Iowa Central being of Iowa lineage and the M. & St. L. being of Minnesota lineage. Each had humble beginnings, the Iowa Central traces its origin to the Eldora Railroad and Coal Company formed in 1866, which was no more than a 16-mile coal road between Eldora and Ackley, Iowa. The M. & St. L. had its birth in the Minnesota Western Railroad Company [fol. 1144] formed in 1853 to build a railroad from Fort St. Croix River through St. Paul past the Falls of St. Anthony on the Mississippi River (at present Minneapolis) to the western boundary of Minnesota.

A number of independent railroad companies are shown on Exhibit H-26. As to those concerning the Iowa Central, they became merged in one way or another: through sale, consolidation, or incorporation as subsidiaries with later absorption.

The shaping of the Iowa Central was in three states:

First, north and south between Minnesota and Missouri between 1866 and 1878, in which year the Central Railroad Company of Iowa, as it was then called, went into receivership and emerged in 1879 known as Central Iowa Railway. From the very beginning this north and south line suffered from financial reverses and insufficient traffic.

The second phase of the Central Iowa Railroad was east and west: from Oskaloosa to the Mississippi River, beginning in 1880. By 1882 the portion from Oskaloosa to the Mississippi River was in operation.

Meanwhile (the third stage) railroad developments were taking place on the Illinois side of the Mississippi River, beginning in 1869 with the company calling itself the Peoria and Farmington Railway. Through this company and the Burlington, Monmouth and Illinois River Railroad, trackage was laid between Peoria and the Mississippi River. During this period and by 1882 a new company was formed to operate this trackage, known as the Central Iowa Rail-[fol. 1145] way Company (of Illinois). So it came to pass that by 1883 there was a through route from Oskaloosa, Iowa, to Peoria, Illinois. This remains to this date. Prior to 1886 the through traffic was ferried across the Mississippi River. In 1886 the Keithsburg Bridge was built by the Mercer County Bridge Company and its successors. This bridge joined the two railroad segments. In 1888 another foreclosure of both the Central Iowa Railway Company (of Illinois) and also of the Central Iowa Railway took place, and they were sold in that year to a new company called the Iowa Central Railway Company of Illinois. This latter company in 1901 purchased the Keithsburg Bridge.

Other segments of the Iowa Central were constructed by independent railroads and later sold to or merged into the Iowa Central.

From its very beginning the Iowa Central had financial and traffic difficulties; it had no important terminals; it

was essentially an intermediate carrier and dependent to a large extent on its connections with other major lines, in which aspect the connecting carrier dictated the policies.

Until the year 1900 the northern terminus of the Iowa Central at Northwood, Iowa, had regressed to the status of an unimportant branch—the original plans to make Albert Lea a gateway for Iowa Central traffic having failed to materialize. In fact, the segment from Manly Junction to Northwood, Iowa, had long before been leased to the [fol. 1146] Burlington, Cedar Rapids & Northern, now the Rock Island Railroad. In 1900 the Iowa Central came under the management of the Minneapolis and St. Louis Railroad Company (of Minnesota and Iowa). Thus began the unified service which has existed to the present day and which from 1912 (when the Iowa Central was sold to the M. & St. L.) has continued under the single name of the latter company.

While the Iowa Central was being formed, the Minneapolis & St. Louis was likewise being constructed between the Twin Cities and the Iowa Line and into Iowa toward Fort Dodge, either under its own corporate name or those of independent railroad companies, which later were acquired.

By 1870 Minneapolis' main industries were lumber and grain milling, but it had no transportation outlets. The Falls of St. Anthony which furnished water power, was at the same time a handicap to river transportation. The rail lines furnishing access to the eastern markets centered in St. Paul. Minneapolis' only rail line to the east and the south was a part of what is now the Chicago, Milwaukee, St. Paul and Pacific Railroad, connecting with the main line of that railroad at Prairie du Chien, Wisconsin. That railroad's main cities were Chicago and Milwaukee. Freight rates were predicated over them rather than Minneapolis.

One of the lines of railroad serving St. Paul, Minnesota, was from Superior, Wisconsin and Duluth, Minnesota, [fol. 1147] which furnished access to the Great Lakes. In 1870 a group of businessmen of Minneapolis, desiring to realize benefits from this line of railroad to Duluth and Superior (by way of White Bear, Minnesota) and also to seek an independently operated railroad to the south and east controlled by local interests, acquired the charter of

the old Minnesota Western Railroad Company which had been incorporated by Minnesota Territory in 1853. In the same year (1870) the name was changed to The Minneapolis & St. Louis Railroad Company, and lines were built from White Bear, Minnesota, to Minneapolis, and thence south to Merriam Junction, Minnesota. These lines were opened for service in 1871. For financial reasons the part of the line from Minneapolis to White Bear was separately incorporated.

Between 1874 and 1877 the road was extended to Albert Lea, Minnesota, and thence to the Iowa State Line at Northwood, Iowa, in connection with the Burlington, Cedar Falls & Northern, now the Rock Island.

Due to the discovery of coal in Iowa in the vicinity of Fort Dodge, the M&StL began acquiring right of way and constructing a line of railroad southwesterly from Albert Lea to the Minnesota-Iowa State Line. Under M&StL sponsorship another company termed the Minnesota and Iowa Southern Railway Company was incorporated in Iowa in 1878; and this company built a railroad from the Minnesota-Iowa State Line to a connection near Livermore, Iowa, with a line built by the Fort Dodge and Fort Ridgely [fol. 1148] Railway Company (incorporated by Iowa people). Thereafter and in 1881, a new consolidated company was formed, called The Minneapolis & St. Louis Railway Company of Minnesota and Iowa. This consolidation was made up of the old company, its subsidiary the Minnesota and Iowa Southern Railway Company, the Fort Dodge and Fort Ridgely Railroad, and a fourth company.

In 1888 The Minneapolis & St. Louis Railway Company went into Receivership and was sold under foreclosure in 1894. The conveyance was in two parts so as to preserve the Iowa franchise rights. The Minnesota lines were sold to The Minneapolis and St. Louis Railroad Company, and the Iowa lines were sold to The Minneapolis & St. Louis Railroad & Telegraph Company of Iowa. In 1895 these two companies were once again brought back into one by the formation of The Minneapolis and St. Louis Railroad Company (of Minnesota and Iowa). During these periods the line of railroad from Hopkins, Minnesota, was extended westerly to Leola and LeBeau, South Dakota.

In 1912 a calamitous crop failure in South Dakota, Western Minnesota and Northwestern Iowa occurred, that drastically affected the M&StL. There was need for retrenchment and reorganization.

The year 1912 proved to be only typical, as M&StL western lines were unprofitable and a disappointment. The attention of the railroad then turned southward to the Iowa Central, which since the turn of the century had been op-
[fol. 1149] erated closely in connection with the M&StL; and traffic to Oskaloosa, Peoria, and the south and east took on added emphasis. On January 1, 1912, the Iowa Central was sold and conveyed to The Minneapolis and St. Louis Railroad Company, after which the two lines were operated as a unit.

Immediately, large expenditures were made between Oskaloosa and Peoria, as well as the acquisition of rolling stock. The crop failures in 1912 resulted in a deficit to the M&StL of over $600,000, and it was seen that the M&StL needed to diverge from a line practically dependent on agriculture with its seasonal fluctuations and periodic crop failures. This rehabilitation was financed through borrowed money.

In 1915 the M&StL purchased the Des Moines & Fort Dodge Railroad which theretofore had been leased, which gave the former a route from Minneapolis to Des Moines. The Des Moines & Fort Dodge Railroad operated from Des Moines to Ruthven, Iowa, through Fort Dodge.

Later and in 1916 the Iowa Central and Western (between Belmond and Algona, Iowa) was consolidated with The Minneapolis and St. Louis Railroad Company (of Minnesota and Iowa), forming The Minneapolis & St. Louis Railroad Company, a corporation of Iowa.

During the first World War years, the business of The Minneapolis & St. Louis Railroad Company was stimulated, as was that of other railroads. However, upon return to
[fol. 1150] private ownership in March 1920 and for succeeding years, the financial condition of the road was precarious. The rolling stock and track had taken a terrific beating under Federal control and much money had to be spent to put the railroad into good condition. Meanwhile prices and wages went up and although freight and pas-

senger rates were increased somewhat, revenues declined. Crop failures occurred. The commercial motor vehicle made its advent with inroads into the railroad's business. The shopmen's strike of 1922 did not add to the company's welfare.

The railroad had a deficit of over $1,800,000 in 1921 and over a million in 1922. Finally in 1923 the road went into receivership with a mortgage debt of over $45,000,000. It was not to be returned to private ownership until more than 20 years later.

When receivership ended, the railroad had accumulated a principal and interest debt on the outstanding bonds secured by the various mortgages, in the sum of $88,900,000.

The foregoing history of the M&StL lends substance to the statement of Commissioner Eastman in the Associated Railways Case (228 I.C.C. 277) that the M&StL was a sick railroad for a great many years (p. 375 of 228 I.C.C.). Commissioner Meyer in the same case noted that the M&StL was a problem long before the depression and the droughts of the 1930s (p. 378 of 228 I.C.C.).

As had been indicated by the record, the Railway from its inception and up to the year 1936, had found it difficult [fol. 1151] to operate successfully, to say nothing of profitably. At times its several managements' efforts to simply make both ends meet resulted in failure, finally culminating in a receivership in 1923. During the receivership period and prior to 1933, the Receiver found it necessary to borrow (through the medium of receiver's certificates) funds for use in maintaining the physical property, and, even then, by the year 1933, the railroad's roadway and equipment had reached such an advanced state of disrepair there was an unsuccessful effort made to borrow additional funds from the Reconstruction Finance Corporation, for current operating expenses. In 1935 there was a change in the personnel of the Railway's management. The country was just then commencing to emerge from the 1930-1935 depression. General business conditions began to improve. The upward trend continued, but notwithstanding, in 1936 eight midwestern railroads banded together, and, captioned as the Associated Railways, by petition to the Interstate Commerce Commission sought to acquire all of the properties

of The Minneapolis & St. Louis Railroad, with a view to pay therefor $7,200,000.

The Associated Railways alleged the railroad was in an advanced state of disrepair, was in the process of disintegration and could not be operated successfully as a unit. The Interstate Commerce Commission, in 1938, denied the Associated Railways' petition. Since 1936 the Railway steadily improved its position as such, and prospered, with the result that plans of reorganization of the M&StL as [fol. 1152] an independent carrier were progressed and thereafter successfully effectuated by the sale of the properties to the present company on December 1, 1943, and December 1, 1944. During the twenty-year period 1936 to and including 1955, the average annual operating revenues have been $15,845,000. The Railway has no outside sources of revenue. During the same twenty-year period and through the medium of earnings, and only through that media, the following major developments, among others, have taken place:

(A) Paid in full, Merriam Junction Bonds $1,562,180

(B) Paid in full, receiver's Certificates aggregating $1,185,000.

(C) Paid in full, debts incurred prior to receivership, amounting to $2,495,497.

(D) Paid in full, receivership expenses, totaling $2,427,434.

(E) Rehabilitated and improved its roadway and structures, including the installation of 137,540 tons of heavier rail, 5,518,000 cross ties and 2,391,611 cubic yards of crushed rock and high grade gravel, all at an aggregate charge to operating expenses of $47,988,738.

(F) Completely replaced steam locomotives with an adequate number of units of Diesel power, at an aggregate cost of $8,137,765. $7,193,605.

As of December 31, 1955, $7,193,605, or 88.4 per cent of that amount, has been paid. The average age of this equip- [fol. 1153] ment is 9.8 years.

(G) Acquired freight and passenger cars at a total cost of $19,323,187. $14,090,418.

As of December 31, 1955, $14,090,418, or 73 per cent of that amount, has been paid. The average age of this equipment is less than 10 years.

(H) Expended and paid for all additions and improvements to the physical property, excluding rolling stock, a net amount of $15,075,663.

(I) Paid dividends in the aggregate amount of $8,254,005.
Total $100,272,540.

In the year 1923 the annual operating revenues of the railroad aggregated $16,605,000, while 31 years later or in 1955, annual operating revenues amounted to $20,941,000. Now, it is not the purpose here to eulogize the management, but rather to establish the fact The Minneapolis & St. Louis Railway Company is a well established and going concern, and on the basis of its record in these later years is entitled to very serious consideration in its effort to augment its freight traffic volume. The railroad, consisting of approximately 1400 miles of principal main track, extends through the highly productive areas of four states. The population density adjacent to its lines is relatively light, as likewise is its freight volume per mile of operated railroad. Agricultural products and products related to agriculture constitute a substantial portion of its tonnage, which in all [fol. 1154] averages in excess of 210,000 revenue carloads annually. During the years 1951-1954, the annual interchange with connecting lines averaged 487,756 cars, loaded and empty. During four years from 1950, approximately 67 per cent of the railroad's aggregate loaded tonnage, either terminated or originated or did both on its rails, which fact discloses that during the same period approximately 33 per cent of the aggregate was bridge type traffic. It has connections with 25 railroads at 58 different places. There are 141 communities that are served exclusively by the M&StL. With modern rolling stock in adequate supply and in fit condition, the railroad is in a position to accommodate and handle in a safe and expeditious manner at least 25 per cent more freight volume over its well constructed and maintained trackage. Modern shops and other up-to-date

facilities have been constructed and installed to keep locomotives and cars in good serviceable condition.

As stated heretofore, during the period 1936 to and including 1955, the management of the railroad spent on the physical rehabilitation of the property $84,348,424 out of operating revenues only, without borrowing. This expenditure has made the railroad at the present time a modern and efficient operating plant. However, we are not utilizing the full capacity of our property because of our preponderant dependence on agriculture and absence of diversified traffic has prevented us from obtaining the volume we are now equipped to handle.

[fol. 1155] The population of the United States has increased from 105,710,620 in 1920 to 151,132,000 in 1950. The purchasing power of the dollar has dropped, but purchases by the consuming public have increased tremendously with the growth of the national income. This is a matter of common knowledge. Notwithstanding this, the gross revenues of this railroad have not kept pace with the enlarged economy of the country and Class I railroads. Its gross revenues, 1955 over 1923, are only approximately $4,000,000 greater. The primary reason is that the Railway is still tied closely to agriculture. It has not participated in the tremendous increase in manufactured consumer goods. In support of this statement, I call attention to the following tabulation which is an extraction from Moody's Transportation Manuals. This tabulation establishes the fact that in the period from 1936 to 1954 the Santa Fe and the Pennsylvania have shown very substantial increases in the percentage of their revenues derived from manufacturing and miscellaneous products. They have participated to a very large degree in the industrial growth of the country. The M&StL has not enjoyed this growth, as shown by the same tabulation:

	Percent to Total Revenue					
	M&StL		*Santa Fe*		*Pennsylvania*	
	1936	1954	1936	1954	1936	1954
Products of Agriculture	28.3%	30.4%	27.3%	18.4%	7.6%	9.5%
Manufactures & Miscellaneous	38.1%	43.6%	47.0%	64.0%	39.4%	51.1%

[fol. 1156] We feel that with the expenditures made to equip and modernize this railway, it can more efficiently and more adequately serve the public if it be permitted to broaden its service area and diversify its traffic. We have the modern plant, but unless this plant is utilized to its full extent by allowing this railroad to expand its commodity and revenue base, it will continue to be straight-jacketed in the channels of service that have handicapped it throughout its history, and this additional dedicated capital could by non-use be lost not only to the railroad itself but also to the shipping public. Having built the railroad to its present stage for public use in the public interest, it and the public should enjoy its full use. Acquisition of the TP&W by the Minneapolis & St. Louis will not only infuse into the unified system additional revenues as will be shown in detail by Mr. Nelson, but will also have the additional important aspects of diversifying the commodity base of the two railroads, and the greater utilization of both railroads, and lend impetus to the continuing improvement program of both carriers.

An inspection of the TP&W and inquiry into its management, recently made, is basis for the conclusion that this 239 mile railroad has plant capacity greatly in excess of its present utilization rate. Its fairly well maintained roadway and equipment gives ample evidence of a past and continuing improvement program, apparently designed, gauged and obviously calculated to observe the necessities of the present and future. Terminal properties and facilities are [fol. 1157] in an excellent state, and so located and of the type and capacity to accommodate additional volume. Space is available for expansion and enlargement, if necessary, of its East Peoria Yard. Motive power units are adequate. Freight car ownership is scant. It connects with all rail carriers entering Peoria. Personnel and management methods are to be admired. In short, unification with the Minneapolis & St. Louis could take place without extraordinary net capital outlay.

The real economic basis for existence of The Minneapolis & St. Louis Railway in the first instance consists in the mainline mileage of the road running in a generally southerly direction from the Twin Cities through Mason City

to Oskaloosa and Albis and in a generally easterly direction from Oskaloosa across the Keithsburg Bridge to Peoria. In addition to this mileage the railroad has numerous branch lines and feeders, some of which have value from an economic standpoint and others of which it would appear could not be abandoned in the public interest. The main line from the Twin Cities to Peoria connects the entire empire of the Northwest with the industrial and shipping centers of the East and Southeast, and avoids the congestion and delay in shipping freight through the Chicago gateway. The Peoria line is, therefore, the very backbone of the system. For a great many years "The Peoria Gateway" has appeared as a major contribution in the Railway's adver- [fol. 1158] tising programs, and its entire operations have been and are largely predicated over the flow of traffic through that passageway. A great many of its freight cars carry "The Peoria Gateway" as the Railway's only slogan. I invite your attention to the junction or gateway routing map of the M&StL which has been marked Exhibit H-27.

For purposes of brevity, I shall hereafter refer to the most important segment extending between the Twin Cities and Peoria, as the Peoria Line.

The Minneapolis & St. Louis maintains through routes and joint rates with its important connections by way of many junction points. The most important of these routes are maintained in connection with the Peoria Line which is an important carrier of east and west traffic, and one of the most effective routes between the Northwest and the East, South and Southeast. This railroad has through [fol. 1159] rates on business passing through Peoria to and from points east, south and southeast of Peoria. West of Peoria the traffic may move in connection with various railroads through 30 junction points in Illinois, Iowa and Minnesota. The railroad provides freight train service over all of its lines and passenger train service over some segments. Through freight train service is provided daily between Peoria and the Twin Cities, with same day arrival in each direction. The principal interchange point is the Twin Cities in Minnesota, where, during the two-year period 1954-1955, the average annual interchange was 160,408 cars.

The second principal interchange point is Peoria, where during the same period average annual interchange aggregated 114,276 cars. Of these, 101,316 at the Twin Cities were loaded cars and 82,570 at Peoria were loaded cars. The latter figures represent cars handled in line haul movements.

As will be later demonstrated, to curtail such volume would most certainly and adversely affect M&StL revenues, and thus hamper and impede its efforts to enlarge and improve service to the public generally, and to the area it independently and otherwise serves. If the M&StL is permitted to acquire the TP&W Railway, interests of both carriers and the public would be materially advanced by the introduction of a commercially sound through route. In all the country's major wars the nation's railroads have indispensably contributed to their success termination, and [fol. 1160] in this Atomic Age it is not inconceivable to regard the Peoria Gateway as of major consequence in by-passing the Chicago area in routing traffic between the East and the West, and between the North and the South. Based upon my foregoing testimony and upon a study which has been made of the properties and which will be discussed in detail by witnesses to follow, it is my opinion that the following major developments would ensue within a reasonable time if the M&StL were permitted to acquire control of the TP&W through stock ownership:
